Production.—The main industries of the Colony are timber extraction and the cultivation of rubber (estimated at 173,000 acres), rice (77,000 acres), coconuts and coconut products (50,000 acres), tobacco (1,700 acres) and hemp (4,400 acres). The cultivation of cocoa and oil palms is increasing. Fishing gives employment to a large number of local natives and Chinese. About four-fifths of the territory is still heavily timbered with many valuable species of hardwoods and soft hardwoods, of which the more important are seraya (Borneo cedar) and camphor.

Trade.—North Borneo is primarily a producer of raw materials, the principal exports of which, during 1960, were: timber, valued at \$90,749,182; rubber, valued at \$49,519,699; and copra, valued at \$40,240,242, with exports of tobacco leaf, hemp and cutch being of lesser importance. Imports consist mainly of foodstuffs (of which the largest single commodity is rice), clothing, manufactured tobacco, petroleum products, machinery and building materials.

GOVERNMENT

The constitution is regulated by Letters Patent under which a Governor and Commander-in-Chief of the Colony is appointed. Under this instrument all sovereign rights were assumed over the former State of North Borneo and the Settlement of Labuan following the respective North Borneo and Labuan Cession Orders in Council of 1946. Legislative and Executive Councils, in place of the Advisory Council which had existed hitherto, were provided for in 1950 by amending Letters Patent. This Legislative Council was established by Order in Council in 1950 and its constitution was varied by an amending Order in Council in 1960. The Legislative Council now consists of the Governor as President, four *ex officio* members, three official members and twelve nominated members. The Constitution of the Executive Council, which is fixed by Royal Instructions, is now four *ex officio* members, one official member and five nominated members.

BRUNEI

Sultan, H. H. Sir Omar Ali Saifuddin Wasa'dul Khairi Waddin, K.C.M.G., acceded 1950.
High Commissioner, D. C. White, C.M.G., O.B.E.

Brunei is a British Protected State on the north-west coast of the island of Borneo, total area about 2,226 sq. miles, population (1960 census figure)

83,877 of whom 59,203 were of Malay or other indigenous race and 21,795 Chinese. The chief town, Bruni, with its rural area, has a population of about 37,000. The country has a humid tropical climate.

On September 29, 1959, His Highness the Sultan of Brunei promulgated the first written constitution. The Constitution provides for a Privy Council, an Executive Council, and a Legislative Council. The post of British Resident has been abolished, and there is instead a *Mentri Besar* (Chief Minister) appointed by the Sultan and responsible to him for the exercise of executive authority. The Sultan presides over the Privy Council and the Executive Council, and the Chief Minister over the Legislative Council. Under a new agreement concluded between Her Majesty The Queen and His Highness the Sultan, the United Kingdom Government continues to be responsible for defence and external affairs. The agreement provides for a High Commissioner to advise the Sultan on such matters.

BRITISH GUIANA

Area and Population.—British Guiana, which includes the Counties of Demerara, Essequibo, and Berbice, is situated on the north-east coast of South America and has a total area of 83,000 square miles with a seaboard of more than 500 miles. The population at December 31, 1959, was estimated at 557,960. There are about 22,240 aboriginal Indians. The colony is bounded on the south by Brazil, on the east by Surinam, on the west by Venezuela, and on the north and N.E. by the Atlantic. The coastland is very like the Netherlands, below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the British Guiana-Venezuela-Brazil boundaries is Mt. Roraima, a flat topped mountain 9,000 feet above sea-level. There are many beautiful waterfalls in British Guiana: on the Potaro River (a tributary of the Essequibo) is the *Kaletwa Fall*, with a clear drop of 741 feet and a total fall of 822 feet, and on the Essequibo, the *Horse Shoe Falls* (discovered in 1934); a fall, with a drop of some 500 feet, discovered in 1934 on the Ipobe River, a tributary of the Kuribrong, has been named the *Marina Fall*, and other falls were discovered in 1938 on the Karanang River, 30 miles north-east of Mt. Roraima. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The climate on the coast, for the greater part of the year, is pleasant and healthy. In the Aug.-Oct. period it is hot. The mean temperature is 80.3°, its extremes during 86 years ranging between 68° and 96°, but these are very rare, the usual extremes being 70° and 90°. In the interior the mean temperature is higher—82.6°, its extremes ranging from 66° to 103°. The yearly rainfall is subject to marked variation, its mean on the coast lands averaging about 90 inches with an average of 58 inches on the savannahs. The daily average sunshine is a little over 6 hours and, except when rain is falling, dull and cloudy weather is rarely experienced.

Production, etc.—Much of the country is forest. The cultivated portion (about 280,000 acres, of which 86,700 are under sugar-cane and 179,200 in rice) is largely confined to the narrow coastal

alluvial belt. There are extensive deposits of gold, diamonds, manganese, bauxite and mica.

Communications.—There were 5,346 telephones in use in 1959; 189 sub-exchanges, call offices and private branch exchanges are in operation. 36 land-line telegraph stations are maintained at coastal post offices and 5 wireless telegraph stations in the interior, providing communications with the coast. In Georgetown, a central radio station provides radio-telephone communication with 6 branch offices, 7 stations operated by other Government departments, 34 by private concerns, and 9 coastal ships and launches. Overseas radio and telephone services are provided by Cable and Wireless (W.I.) Ltd., in association with the Post Office telephone system. There are 135 post offices and postal agencies. There are two broadcasting stations, which are operated on a commercial basis by private enterprise. There are 95 miles of railway, and the British Guiana Airways (a government company) provides internal air-services.

Education.—There are 332 primary schools in the colony, with an enrolment of 118,358, 2 Government-owned and 14 Government-aided private secondary schools with an enrolment of 5,435, 5 nursery schools, a vocational school and a technical institute with a combined enrolment of 2,377, and 30 other private secondary schools with an approximate enrolment of 3,000.

The leading exports are sugar (\$46,361,113 in 1959), rum, molasses, diamonds, gold, timber, balata, bauxite and rice.

GOVERNMENT

The new Constitution, effected by the Order of the Queen in Council dated April 1, 1953, was proclaimed in British Guiana on April 8, 1953.

On October 9, 1953, it was announced that Her Majesty's Government had decided that the Constitution of British Guiana must be suspended to prevent Communist subversion of the Government and a dangerous crisis both in public order and in economic affairs. Armed forces were landed to prevent public disorder.

The British Guiana (Constitution) (Temporary Provisions) Order in Council, 1953, provided for a wholly nominated Legislative Council, consisting of 27 members, including the three officials, under a Speaker, with an Executive Council of 10 members, all of whom were members of the Legislative Council. This interim Government was dissolved in 1957 and elections under a new constitution were held in August, 1957. The Legislative Council under the new constitution consists of the Speaker, 3 officials, 14 elected members and 6 nominated members. The Executive Council, presided over by the Governor, consists of the three official members and five elected members of the majority party in the Legislative Council. A further election was held on Aug. 21, 1961.

Governor, His Excellency Sir Ralph Francis

Alnwick Grey, K.C.M.G., K.C.V.O., O.B.E.

CAPITAL, Ψ Georgetown, Population (1959),
 94,137. Ψ New Amsterdam has a population
 (1959) of 15,000.

Georgetown is 16-21 days distant from London
 by sea, and 3 days by air *via* New York or Brazil.

BRITISH HONDURAS

British Honduras, in Central America, lies
 within 18° 29' 5" to 15° 53' 55" N. latitude and
 89° 9' 22" to 88° 10' W. longitude. Its extreme
 length and breadth are approximately 174 m.
 and 68 m. respectively; it is bounded on the north
 and north-west by Mexico (Quintana Roo Pro-
 vince, formerly Yucatan); on the west and south
 by Guatemala; and on the east by the Caribbean
 Sea. The total area is about 8,667 sq. miles, with
 a population (Census 1960) of 90,343 (44,586 males
 and 45,757 females). The climate generally is damp
 and hot, but not unhealthy. The temperature
 ranges from 59° to 92° F. The average lies between
 75° and 80°, but this is considerably tempered by
 the prevailing sea-breezes.

The greater part of the country is covered by
 forest, of which 72 per cent. is high rain forest,
 15-5 pine forest and dry savannah, 5-5 wet savannah
 and mangrove forest, the remaining 7 per cent.
 being existing or recently abandoned cultivation.
 The wire grass and sedges of the dry savannahs
 make very poor pasturage for cattle. The north
 of the Colony and the southern coastal plain
 (10 to 12 miles wide) is nearly flat, and near the sea
 is low and swampy. The central mountain mass
 has a general altitude of 2,000 to 3,000 feet and
 57 per cent. of the area of the Colony is over 1,000
 feet in elevation above mean sea-level.

The staple products are obtained from the
 forests, and include mahogany, cedar, and *chicle*
 (the basis of chewing-gum). Agricultural crops
 that grow readily include sugar cane, coconuts,
 citrus fruit, plantains, pineapples, mangoes, maize,
 rice, varieties of beans and peas. Bananas also grow
 well in certain localities but are subject to Panama
 Disease. All varieties of citrus fruits flourish, and
 in particular grape-fruit, of which a very high grade
 is exported.

In 1960 there were 123 Government and grant-
 aided and 35 private elementary schools in the
 Colony, the total enrolment being 21,332. There
 are also 9 secondary schools with a total enrolment
 of 1,734 students and a technical college with 96
 students.

There are 32 post offices, dealing in 1960 with
 1,860,356, articles of mail. There is a radio-telegraph
 station for external communications at Belize. Air
 services are scheduled twice weekly to and from
 Tegucigalpa, Spanish Honduras, *via* San Pedro Sula,
 and thrice weekly to Chetumal. A weekly service
 exists from and to Kingston, Jamaica, direct. There
 is a twice weekly service from and to New Orleans

and another to San Salvador and Guatemala, direct,
 and a weekly service from and to Miami and
 Tegucigalpa. A local scheduled air service links
 the principal districts.

CAPITAL, Ψ Belize. Population (1959) 32,000;
 other towns Ψ Corozal (2,800), El Cayo (1,518),
 Ψ Stann Creek (4,700), Orange Walk (2,300),
 Ψ Punta Gorda (1,400).

GOVERNMENT

The Constitution of 1960 provides for a Legis-
 lative Assembly of 25 members, 18 of whom are
 elected, 5 nominated and 2 *ex officio* members.
 The Assembly elects its Speaker and provision is
 made for the appointment of a First Minister. The
 life of the Assembly is 4 years, but the Governor
 has power to prorogue or dissolve it by proclama-
 tion. Certain other powers are reserved to the
 Governor. A full ministerial system has been intro-
 duced and portfolios allotted by the Governor, on
 the advice of the First Minister.

Belize is distant from London about 4,700 miles:
 transit, 17 days by sea, 4 to 6 days by air.

THE BRITISH VIRGIN ISLANDS

The Virgin Islands are a group of islands at the
 eastern extremity of the Greater Antilles, divided
 between Great Britain and the U.S.A. Those of
 the group which are British number about 42,
 of which 11 are inhabited, and have a total area of
 about 59 square miles. The principal are Tortola
 the largest, situate in 18° 27' N. lat. and 64° 40' W.
 long.), Virgin Gorda, Anegada and Jost. Van

Dykes. The population is approximately 7,350 (1960). Communication is by daily launch service to St. Thomas; also an external telephone service linking Tortola with St. Thomas and Puerto Rico by which messages may be sent to all parts of the world, and one linking Tortola with Antigua. An airfield on Beef Island is used by small planes. The principal exports are livestock, fish, charcoal, vegetables and fruit, for which the principal market is St. Thomas. Rum is distilled on a small scale.

EAST AFRICA HIGH COMMISSION, ETC.

EAST AFRICA HIGH COMMISSION

The East Africa High Commission, consisting of the Governors of Kenya, Tanganyika and Uganda, was constituted by the East Africa (High Commission) Order in Council, 1947, and came into operation on January 1, 1948. The Governor of Kenya is the Chairman of the High Commission, and in his absence the High Commission appoints one of its members to be Chairman.

The High Commission administers certain inter-territorial services such as: The East African Directorate of Civil Aviation, the East African Income Tax Department, the East African Posts and Telecommunications Administration, the East African Railways and Harbours Administration, the East African Customs and Excise Department, the East African Meteorological Department, the East African Statistical Department (dealing with specific subjects only), the East African Literature Bureau, the Royal East African Navy, the East African Department of Economic Co-ordination, the East African Office in London and various research organisations. Responsibility for the administration of these services rests with the Administrator, the Financial Secretary and the Postmaster General.

The East Africa Central Legislative Assembly was established by Order in Council in 1947.

It is presided over by a Speaker and consists of seven *ex officio* members who are officers in the High Commission's service, six nominated members and twenty unofficial members. Of the nominated members, two each are appointed by the Governors of Kenya, Tanganyika and Uganda. Of the unofficial members, six are appointed from each of the three territories, three of these being appointed by the Governor and the other three elected by the Legislative Council; the remaining two unofficial members are Arabs, and are appointed by the High Commission.

The High Commission has power to legislate, with the advice and consent of the Assembly, in respect of certain matters of common interest to the three territories, such as civil aviation, customs and excise, defence, income tax, inter-territorial research, Makerere College, posts and telegraphs, meteorological services, statistics, railways, harbours and inland water transport. It has also power to legislate with the advice and consent of the Legislative Councils of the three Territories on any matter concerned with the peace, order and good government of those territories.

FALKLAND ISLANDS

These, the only considerable group in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 52° 15'–53° S. lat. and 57° 40'–62° W. long. They consist of East Falkland (area 2,580 sq. miles), West Falkland (2,038 sq. miles) and upwards of 100 small islands in the aggregate, the total estimated population in 1960 being 2,127. Mount Adam, the loftiest peak, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. A settlement was made by Spain in 1764; this was subsequently sold to France, but the latter country recognized Great Britain's title to a part at least of the group in 1771. The settlement was destroyed by the Americans in 1831. In 1833 occupation was resumed by the British for the protection of the seal-fisheries, and the islands were permanently colonized as the most southerly organized colony of the British Empire. The climate is cold, the thermometer ranging in winter from 20° to 50°, and in summer from 46° Fahrenheit; it is notably windy. The islands are chiefly moorland. The population is mainly British, and is principally engaged in sheep-farming, to which practically all the land in the colony is devoted, 609,837 sheep being carried in 1960. The chief exports are wool, tallow, hides and sheepskins. The only important settlement is Stanley, on the coast of East Falkland.

FINANCE AND TRADE

CHIEF TOWN, Ψ Stanley. Estimated population 1,135.

DEPENDENCIES.—*South Georgia*, an island 800 miles east-south-east of the Falkland Group, with an area of 1,450 square miles. An Administrative Officer and other officials reside there. In the *South Shetlands*, Deception Island contains the harbour at Port Foster, ice-free for about five months of the year. The other dependencies, of which the principal units are the *South Sandwich Islands* and *Graham's Land* (a peninsula of the Antarctic Continent) and that Part of the Antarctic Continent lying between the longitudes of 20° W. and 80° W., are even more inhospitable than those already named, being covered with snow and ice and almost completely destitute of plant life. In

spite, however, of the climatic and other disadvantages, the estimated revenue derived from all the dependencies in 1959-60 amounted to £850,775 and the estimated expenditure to £827,397. There is a whaling industry in South Georgia. One British, 2 Argentinian and 1 Norwegian company operated during the 1959-60 season, 97,633 barrels of whale oil being exported. Sealing operations yielded 12,381 barrels of seal oil in 1960. A chain of meteorological stations is maintained in the Dependencies.

Trade of the Dependencies

	1959	1960
Total imports.....	£1,284,887	£1,181,193
Total exports.....	2,253,435	3,256,231
Imports from U.K.....	350,777	221,189
Exports to U.K.....	1,771,473	2,363,772

Ψ Stanley, the capital of the Falkland Islands, is distant from England about 8,103 miles; transit by steamer *via* Montevideo. Telegrams by wireless U.K. direct. The journey from U.K. to Falkland Isles can be accomplished in 6 days travelling to Montevideo by air and thence by local steamer to the Falklands.

FIJI

This is a group of 322 islands (of which only 106 are inhabited) in the South Pacific Ocean, about 1,100 miles north of New Zealand. The gross area of the group, which extends 300 miles from east to west, and 300 north to south, between 15° 45'–21° 10' S. lat. and 176° E.—178° W. long. is 7,083 square miles. Many of the islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu, Vanua Levu, Taveuni and Kandavu. The climate is oceanic. Shade temperatures seldom rise above 93°F. or fall below 60° except in the mountains. On the windward sides of the larger islands rainfall is copious and vegetation luxuriant; on the leeward (or dry) sides the vegetation is sparse and scattered. The chief products are coconuts, sugar cane, gold, rice, bananas, pineapples, yams, and dalo or taro (colocasia).

The population (estimated 1960) was 401,018 (197,952 Indians, 167,473 Fijians, 8,696 part Europeans, 10,667 Europeans, 11,287 other Pacific races and 4,943 Chinese and part Chinese).

FINANCE

Exports to U.K.....	4,807,758	7,078,678

Fijian currency—£111 Fiji = £100 sterling.

The principal exports are sugar, coconut oil, gold, copra, bananas, biscuits, trocas shell and manganese ore. The chief imports are drapery, machinery, motor vehicles, petroleum products, timber, foodstuffs and electrical goods. The tourist industry is growing.

GOVERNMENT

The Governor is appointed by the Crown, and is assisted by an Executive Council. Laws are

passed by a Legislative Council (of which the Governor is president) containing 16 official members, 5 European members (3 elected, 2 nominated), 5 Fijian members (nominated from a panel submitted by the Council of Chiefs), 5 Indian members (3 elected and 2 nominated), and a Speaker (H. M. Scott, C.B.E., D.F.C.).

The executive officer for the native administration is the Secretary for Fijian Affairs, who is responsible to the Governor and, in appropriate matters, to the Legislative Council. The controlling financial authority is the Fijian Affairs Board (whose members are the Secretary for Fijian Affairs (Chairman), the five Fijian members of Legislative Council, a legal adviser, and a financial adviser. The Board has power to make regulations affecting the Fijians, but such regulations are subject to approval by the Legislative Council.

* The Chief Justice and all subsequent officers in this list have a Post Allowance of £300.

CAPITAL, Ψ Suva, in the island of Viti Levu.

Population (1958), 37,371.

Suva is 11,000 miles from London; transit from London, *via* Auckland, about 30 days; *via* Vancouver or San Francisco, about 30 days; *via* Panama, about 30 days; by air, *via* Canada, U.S.A., or Sydney, about 4 days. Fiji is on the main air route between North America and Australia and New Zealand. It is a base for South

Pacific regional air services, covering New Zealand, Western Samoa, New Caledonia, Tahiti, Cook and Norfolk Islands.

GAMBIA

The West African river Gambia, which is navigable for some 300 miles from its mouth, was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth I. being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1685 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognized, by the *Treaty of Versailles*, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It now consists of the island of St. Mary, British Kombo, Albreda, the Ceded Mile, MacCarthy Island, and various other islands and territories on the banks of the river. The total area is estimated at 4,003 sq. miles. The population of the island of St. Mary, at the census of 1951 was 27,297, and that of the Protectorate was 260,160 (estimated, 1957, 236,421). The climate is unpleasant during the rainy season, *viz.*, from June to October; but during the rest of the year it is pleasant and generally healthy. The rainfall is extremely variable from year to year, ranging between 30 and 59 inches. Internal communication is by motor vessels and launches; there are no railways. There are 5 Government wireless stations.

Education.—Government expenditure on education amounted to about £172,000 in 1960. In Bathurst there are 10 primary schools with an enrolment of 3,600 pupils; all but one of these schools are financed entirely by Government. Pupils enter school at 5 years of age and have 3 years infants' schooling followed by 4 years primary; some 30 per cent. of the pupils obtain entry to secondary schools and the remainder spend a further 3 years in primary school. There are 2 secondary schools, run by the Missions—1 boys, 1 girls. There is also a technical school, a clerical school in Bathurst and a co-educational secondary school financed by the Government. In the Protectorate there are 28 District Authority schools and 13 Mission schools. Pupils enter school at 6–7 years of age for a 6 year course. There is also a secondary modern school at Georgetown.

Exports to U.K.....	667,243	1,239,840

The chief export is ground-nuts, which form over eighty-eight per cent. of the total exports; practically all of this crop is sent to Europe, where the oil is extracted and used for the same purpose as olive oil. Palm kernels, hides and skins, and beeswax are also exported; and rice, cotton, maize

and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities to meet local requirements. The chief imports are apparel, cotton goods, flour, kola nuts, oil, rice, soap, spirits, metals of all kinds, sugar, tobacco and motor vehicles.

Total tonnage of vessels entered and cleared in 1960 was 1,081,776.

CHIEF TOWN, Ψ Bathurst. Population (1951), 19,602.

GOVERNMENT

At present, the Colony is administered by an Executive Council consisting of the Governor, 4 *ex officio* members and 6 appointed members (Ministers). There is a House of Representatives consisting of the Governor as President, a Speaker, 4 *ex officio* members, 8 Chiefs' members, 2 nominated members and 19 elected members representing the town of Bathurst, Kombo St. Mary Division and the Protectorate. The Governor presides only on formal occasions.

Governor and Commander-in-Chief, His Excellency Sir Edward Henry Windley, K.C.M.G. (1957)..... £3,600
Civil Secretary, K. G. S. Smith, C.M.G. ... £5,500
Chief Justice, J. A. L. Wischam 2,280

British Council Representative, Bathurst, E. B. Evans.

Bathurst is distant from London, 2,600 miles; transit about 10 days. A twice weekly air service reduces transit time to 34 hours.

GIBRALTAR,

a rocky promontory, 3½ miles in length, ¾ of a mile in breadth and 1,396 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. The estimated population (1960) is 26,385.

Ψ Gibraltar is a naval base of vital strategic importance to Great Britain. It was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and was ceded to Great Britain by the Treaty of Utrecht, 1713. Several attempts have been made to retake it, the most celebrated being the great siege in 1779-83, when General Elliot, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. It is a popular tourist centre. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, beer, motor spirit, perfumery, coffee, fuel oil, motor vehicles, radios, cameras and cinematograph projectors, mechanical lighters, razor blades, watches and clocks.

The Department of Education runs 8 secondary schools and 14 primary and infant schools. There are also 3 private infant schools. Teacher training and University Scholarships have been provided, 4,034 pupils are at present in Government schools, and the Government expenditure on education in 1960 was £123,510.

Distance, 1,209 miles; transit, 3½ days. B.E.A. have a daily air service from U.K. *via* Madrid (transit time 4 hrs. 25 mins.).

HONG KONG

The Crown Colony of Hong Kong, consisting of a number of islands and of a portion of the mainland, on the south-eastern coast of China, is situated at the eastern side of the mouth of the Pearl River, between 22° 9' and 22° 37' N. lat. and 113° 52' - 114° 30' E. long.

The capital city, Victoria, situated on the island of Hong Kong, is 9½ miles S.E. of Canton and 40 miles E. of the Portuguese colony of Macao at the other side of the Pearl River. It lies along the northern shore of the island and faces the mainland; the harbour (16 sq. miles water area) lies between the city and the mainland, on which is situated Kowloon with a population equalling that of Victoria. The total area of the Colony is 308½ sq. miles with a population which has varied considerably during recent years owing to unsettled conditions in China. In Dec. 1960 it was thought to be about 3,014,000.

The island of *Hong Kong* is about 11 miles long and from 2 to 5 miles broad, with a total area of 29 square miles; at the eastern entrance to the harbour it is only separated from the mainland by a narrow strait (Lei Yue Mun), 500-600 yards in width. It was first occupied by Great Britain in January, 1841, and formally ceded by the Treaty of Nanking in 1842; *Kowloon* was subsequently acquired by the Peking Convention of 1860; and the *New Territories*, consisting of a peninsula in the southern part of the Kwangtung province, together with adjacent islands, by a 99-year lease signed June 9, 1898.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is 1,805 feet high. The New Territories contain several peaks higher than this, the highest being Tai Mo Shan, 3,140 feet. The summer weather is continuously hot and humid and often cloudy and showery. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The mean monthly temperature ranges from 59°F. in February to 82°F. in July, the average for the year being 72°F. The temperature rarely exceeds 95°F. in summer or falls below 40°F. in winter. The average annual rainfall is 84.76 in., of which no less than 75 per cent. falls between May and September, when the S.W. monsoon prevails.

Communications.—*Hong Kong*, one of the world's finest natural harbours, possesses excellent wharves and dry docks, capable of holding vessels up to 750 ft. in length. Shipping tonnage for the year ending March, 1961, was 35,130,417. A railway, 22 miles in length, owned by the Government, runs between Kowloon and the Chinese frontier. It forms a direct overland communication with Canton, Hankow and Shanghai, but since October, 1949, all through passenger traffic has been suspended.

Hong Kong (Kai Tak) Airport is on the north shore of Kowloon Bay, some 4 miles from the Kowloon Peninsula. The runway which was completed in August 1958 projects into the bay for a distance of 7,500 feet and the construction provided one of the major feats of land reclamation in the Far East. The runway, 8,350 feet in length, is used by 19 international airlines, one of which is locally registered and operates a fleet of piston and propeller turbined aircraft. The Colony is a focal point on the main routes serving the Far East. B.O.A.C. operates 13 services per week using Comet and Boeing 707 aircraft. Their Atlantic routes terminate at *Hong Kong* while the London *via* Bangkok and Singapore routes terminate in Japan. Frequent services are provided by other airlines on the same routes and also to U.S.A., Canada and Australia. Services to China have not yet been resumed.

Education.—In March, 1961, there were 1,804 schools with 598,725 pupils. 45 per cent. of the pupils are financed wholly or in part by the Government. The University of *Hong Kong* has a full-time residential student strength of 1,292 (including 338 women) in Faculties of Arts, Science, Medicine, Engineering and Architecture. There are also an Institute of Oriental Studies and a Department of Extra-Mural Studies.

\$=Hong Kong Dollar=1s. 3d.		

TRADE

Since the United Nations embargo on trade with China imposed severe limitations on *Hong Kong's*

traditional *entrepôt* economy, the pattern and direction of the Colony's trade have changed fundamentally. A different type of *entrepôt* trade has developed on a smaller scale, involving all countries in the Far East, with *Hong Kong* as an intermediary. However, re-exports now represent little more than 25 per cent. of total exports. This has been due to the rapid growth of domestic industry, mainly manufacturing for consumers, which now provides the bulk of goods for the export trade. The Colony's products include a wide range of cotton piecegoods, cotton yarn, rayon and silk brocades, clothing, household enamel and aluminium ware, plastic articles (including toys and artificial flowers), rattan and hardwood furniture, foodstuffs and beverages, basketware, jade and ivory, and an extensive range of metal products.

Diversification of manufacture is a feature of recent industrial developments. New products include corduroy, air conditioners and plywood, and there has been a marked improvement in both quality and output of items for which precision engineering is required, notably cameras, binoculars and transistor radios.

The adverse balance on visible trade is offset by a favourable balance on invisible account—remittances from overseas Chinese, exchange, shipping and insurance profits, and the spending of tourists, etc. In 1960 *Hong Kong's* principal customers for its domestic products, in order of value of trade, were U.S.A., the United Kingdom, Malaya, the Federal Republic of Germany, Japan, Australia and Thailand. China continued to be the Colony's principal supplier, followed by Japan, U.S.A., the United Kingdom, Thailand and the Federal Republic of Germany.

JAMAICA

(See WEST INDIES)

KENYA

The Colony and Protectorate of Kenya is bisected by the equator and extends approximately from latitude 4° N. to latitude 4° S. and from longitude 34° E. to 41° E. From the coast of the Indian Ocean in the east, the borders of Kenya are with Somaliland in the east and Ethiopia and Sudan in the north and north-west. To the west lie the Uganda Protectorate and Lake Victoria. On the south is Tanganyika Territory. The total area is 224,960 square miles (including 5,224 square miles of water). The total estimated population in mid 1960 was 6,551,000, including 67,700 Europeans, 174,300 Indo-Pakistanis and Goans, and 44,700 other non-Africans.

The Territory is divided into 6 Provinces (Nyanza, Rift Valley, Central, Coast, Southern and Northern) and an Extra-Provincial District (Nairobi).

Kenya Protectorate consists of a strip extending 10 miles inland along the coast from the Tanganyika mandated territory frontier to Kipini and the islands of the Lamu Archipelago. The Protectorate also includes the Witu Protectorate, a small tract of country at the mouth of the Tana River.

Production.—Although the Colony lies astride the Equator, the range of altitude from sea level to 27,000 feet enables most types of crops, both indigenous and introduced, to be grown. In the coastal region the principal crops are copra, maize, sisal, sugar, cotton and cashew nuts. Passing from the coastal strip the country becomes flat, dry and in some places semi-desert of very little agricultural value. At about two hundred and fifty miles inland the first rise of the Kenya Highlands is met. Part of this extremely fertile upland area at altitudes between 5,000 feet and 9,000 feet is cultivated by some thousands of European farmers who produce among other crops wheat, coffee, maize, sisal, wattle, pyrethrum and tea. Extensive herds of native and imported stock are maintained, and there is considerable production of meat and butter. Some 700,000,000 acres are under white occupation in this area. There are also very extensive forests

in the Highlands, cedar for the pencil industry being a valuable export. The value of domestic exports in 1960 was £35,188,000. Contributing to this total were sisal (£4,566,000), coffee (£10,261,000), hides and skins (£1,756,000), tea (£4,411,000), and pyrethrum (£2,019,000).

Prospecting and mining are carried on in many parts of the Colony, the principal minerals at present produced being copper, soda ash, salt, limestone, gold, kyanite and diatomite. The value of the production of main minerals in 1960 was as follows: refined gold, £108,143, soda ash £1,410,283, cement £2,635,123, salt £166,772, diatomite £51,674, carbon dioxide gas £47,667, graphite £28,024.

Hydro-electric power has been developed, particularly on the Upper Tana River and electricity is now available in Nairobi from the Owen Falls Dam scheme in Uganda.

Since the end of the war there has been a great increase in the number of secondary industries, many of which are engaged in processing agricultural produce but which also manufacture an increasing range of products from local and imported raw materials to meet the needs of the East African Territories. Industrial areas are being developed or planned in all the principal towns.

The main imports are manufactured goods, classified chiefly as materials, machinery and transport equipment, mineral fuels, lubricants and related materials.

Communications.—The postal service handled 73,500,000 postal packets in 1960. The telegraph and telephone system has nearly 122,384 miles of line. The number of telephones is approximately 42,000. Telephone calls can be made to other countries outside East Africa via the Cable and Wireless network. Direct communications are available to the United Kingdom, South Africa, Aden, Bahrain, Mauritius, India, Ethiopia, Somalia, the Sudan, and the Federation of Rhodesia and Nyasaland. Switched services over these links provide telephone communication with most countries in the world. An International Telex Service provides direct teleprinter communication, via the radio circuit to London, with any Telex subscriber in the United Kingdom, Europe, U.S.A., South Africa and Southern Rhodesia.

The East African Railways and Harbours are a self-contained and self-financing service of the East Africa High Commission; the railway, which is metre gauge, has a total route mileage of open line of 3,450 miles, made up as follows: Kenya and Uganda Section—Main Line: Mombasa-Kampala-Kasese (1,084 miles); Principal Lines: Nakuru Junction-Kisumu (131), Tororo-Soroti (100), Voi-Kahe Junction (94); Minor and Branch Lines: Rongai-Solai (27), Kisumu-Buture (43), Leseru-Kitale (41), Mbulamuti-Namasagali (19), Kampala-Port Bell (6), Gilgil-Thomson's Falls (48), Nairobi-Nanyuki (145). The Konza-Lake Magadi Line (91 miles) is worked but not owned by East African Railways and Harbours. Tanganyika Section—Main Line: Dar-es-Salaam-Kigoma (779 miles); Principal Line: Tabora-Mwanza (236); Branch Lines: Kailuwa-Mpanda (131), Kilosa-Mikumi (44). The Tanga Line runs from Tanga to Arusha (273 miles). Southern Province Railway: Mtwara-Nachingwea (132 miles); Chilingula-Masasi (23 miles). In addition the Administration operates a marine service on Lakes Victoria, Kioga, Albert and Tanganyika, and also on the River Nile, with a route mileage of 4,194 miles. There are also 2,928 miles of road services connecting the Central and Tanga Lines and providing regular transport to the Southern Highlands, with subsidiary road services in Kenya and Uganda. East African Railways and Harbours

control the five seaports of Mombasa, Tanga, Dar-es-Salaam, Lindi and Mtwara. Mombasa, Dar-es-Salaam and Mtwara have deep-water berths and Tanga and Lindi are lighterage ports.

Scheduled trunk airline services during 1960 were operated to or through Kenya, from Embakasi airport near Nairobi, by B.O.A.C., Air India, South African Airways, Air France, Central African Airways, Scandinavian Air Services, British United Airways and Alitalia, while regional scheduled services were also run by East African Airways, Sabena, Ethiopian Air Lines, Aden Airways and Alitalia.

Road affairs are under the control of the Road Authority. Capital funds are allocated to the Authority by the Colony's Development Committee.

The Colony has approximately 26,000 miles of road including 3,700 miles of trunk roads, 6,400 miles of secondary roads, 5,700 miles of minor roads and 10,200 miles of administrative roads. Included in these figures are 930 miles of trunk, 320 miles of secondary and 5,400 miles of administrative roads in the Northern Province. There is a total of 746 miles of bituminised roads throughout the Colony. During 1960, 89,505 vehicles were licensed, an increase of 15 per cent. over the previous year.

Since 1949 the Customs Departments of Kenya, Uganda and Tanganyika have been amalgamated under the title of the East African Customs and Excise Department as an East Africa High Commission Service.

GOVERNMENT

The Colony and Protectorate are administered under the Colonial Office by a Governor. The principal instrument of Government is the Council of Ministers composed of the Governor and twelve Ministers, no less than 4 of whom must be officials. Under the agreement reached at the constitutional conference held in London (at Lancaster House) in January and February, 1960, there are 8 unofficial Ministers, 4 of whom are Africans, 3 Europeans and 1 an Asian; all unofficial Ministers are elected members of the Legislative Council.

Under the Constitution Order in Council of November 30, 1960, the general terms of which were agreed at the constitutional conference of 1960, the Legislative Council is composed of a Speaker, appointed by the Governor on the Queen's instructions received through a Secretary of State, 53 constituency members elected on a common roll, 12 national members elected by the constituency members, 4 official Ministers, and a number of members (at present 11) nominated by the Governor in pursuance of instructions given to him by the Queen through a Secretary of State. Of the 53 constituency seats, 10 are reserved for Europeans, 3 for Asian Muslims, 5 for other Asians, and 2 for Arabs. Of the 12 national seats, 4 are reserved for Africans, 4 for Europeans, 1 for Asian Muslims, 2 for other Asians and 1 for Arabs.

Nairobi, the Capital City and seat of Government is situated at latitude 2° S. and longitude 36° 8' E. at 5,500 feet above sea level, and has a population of about 100,000. It is 307 miles by road from Mombasa, the Colony's port and is also the site of Africa's most modern airport, opened in 1958. Mombasa possesses what is perhaps the finest harbour on the East Coast of Africa and is well served by shipping lines from Europe and Asia besides a frequent coastal service. Other centres are Eldoret, Kisumu, Lamu, Nakuru and Nyeri.

Nairobi: transit from London about 16 days by sea; by air, 1 day.

LEEWARD ISLANDS

(See WEST INDIES)

THE MALDIVE ISLANDS

The Maldive Islands 420 miles south-west of Ceylon, are a number of islands naturally divided into groups. There are 17 such groups, forming 17 atolls. The total number of islands is over 7,000, some being very small indeed. They are richly covered with coconut palms, and yield millet, fruit and edible nuts. The principal export is dried fish, which finds a ready market in Ceylon. About 215 islands are inhabited. The old form of Government was abolished in 1932, and a new Constitution was introduced. In February, 1954, after a short period of republican government, the Sultanate was restored. The international relations of the Maldives, which is a Protected State, are conducted by the United Kingdom Government, which continues to protect the Islands. The United Kingdom, with the agreement of the Maldivian Government, has established an R.A.F. staging post on Gan Island, in Addu Atoll, the most southerly of the Maldive chain of atolls.

Population is from 85,000 to 90,000. The people are Moslems. They are highly civilized and are great navigators and traders.

The Capital of the Maldives is Malé, on King's Island.

U.K. Representative, H. A. Arthington-Davy M.B.E. (1960).

MALTA, G.C.

an island in the Mediterranean Sea, 60 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 94.9 square miles. The colony includes also the adjoining island of Gozo (area 25.9 sq. miles); Comino and several islets. The estimated population in January, 1961 was 328,938.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in A.D. 58. In 870 it was taken by the Arabs, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Normandy. It passed successively under the rule of the Angevins and Aragonese, and followed the fortunes of their kingdoms. In 1530 it was handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grandmaster La Vallette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and, with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then, at their own wish, admitted into the British Empire, the act being confirmed by the Treaty of Paris in 1814.

Malta was again closely besieged in the last war and again withstood the attacks of all its enemies. From June, 1940, to the end of the war, 432 members of the garrison and 1,540 civilians were killed by enemy aircraft, and about 35,000 houses were destroyed or damaged.

The Parliament of the United Kingdom made a free grant of £10,000,000 for restoring war damage, and a further grant of £20,000,000 was subsequently made for the same purpose and for general construction and replanning.

The climate, although not tropical, is hot in summer. The islands are intensively cultivated. The chief export crops are potatoes and onions. Wheat, barley, clover and tomatoes are extensively grown on dry lands, and on irrigated land all the usual temperate climate and sub-tropical vegetables are grown. Tomatoes are grown on irrigated and non-irrigated land. Agriculture and fishing are among the principal occupations of the inhabitants.

Medina (Notabile), the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Old Seminary; its population has now dwindled to 836, but its suburb, Rabat, has 13,080 inhabitants. Notabile has been entirely eclipsed in importance by the modern capital, Valletta, which was founded in 1566. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet and N.A.T.O. Mediterranean Command.

Malta possesses a University (337 students in 1961); 6 grammar schools (3,642 pupils); 114

primary schools (54,477 pupils); 6 technical schools (934 students); 3 secondary technical schools (1,288 pupils) and 89 private schools (18,444 pupils). Adult education classes, instituted in 1946, had an attendance of 845 in 1961. English and Maltese are the only languages taught in the Government primary schools. In religion the Maltese are Roman Catholics. The Maltese language is of Semitic origin, and is held by some to be derived from the Carthaginian and the Phœnician tongues. There is a Maltese order of nobility, recognized by the Crown, consisting of 28 families.

English and Maltese are the official languages of administration and Maltese is the official language in all the Courts of Law and the language of general use in the islands. The Court may order the use of the English language in any proceedings before it where any party or any accused person does not speak Maltese as the principal language to which he is accustomed; but when all parties or accused persons are English-speaking, the use of English is obligatory. Where the proceedings are in a language not known to the party or parties or to the accused they are translated. In 1934, Maltese was substituted for Italian as the principal language of the Courts of Law.

Imports from U.K.....	£10,841,153	£10,983,673
Exports to U.K.....	990,965	981,034

The principal imports for home consumption are foodstuffs—mainly wheat, meat and bullocks, milk and fruit—fodder, beverages and tobacco, fuels, chemicals, textiles and machinery (industrial, agricultural and transport). The chief domestic exports are scrap-metal, hides and skins, potatoes and onions, smoking requisites, gloves, hosiery, buttons, beer, mineral waters, canned fruits, edible oil, tallow, fresh flowers and flower-cuttings.

CAPITAL, Valletta. Population (1960) 18,403.

MALTA'S NATIONAL DAY is September 8, commemorating the raising of the sieges of 1565 and 1940-43.

GOVERNMENT

Self-government, which had been suspended in 1936 on account of the situation created by Italian Fascist policy towards Malta, was restored after the war by the granting of a new Constitution in 1947. This provided for the Governor to be assisted by an elected Legislative Assembly of 40 members, and an Executive Council consisting of the Prime Minister and seven other Ministers who, together with the 5-member Nominated Council, formed also the Privy Council. This Constitution was suspended in April, 1958, as a result of the resignation of the governing Labour Party and the refusal of the Nationalist opposition to form an alternative government. Efforts to bring about a resumption of constitutional life by means of discussions with the Malta political parties in London at the end of that year failed; and the Constitution was accordingly abrogated, and replaced by a new, interim, Constitution in April, 1959. Under this, the Governor administers the island direct, with the aid

of an Executive Council consisting of three British *ex officio* members, three Maltese official members and three Maltese unofficial members. In October, 1960, a Commission visited Malta with a view to formulating recommendations for a new Constitution. The Commission's report was published on March 8, 1961, and Her Majesty's Government decided to accept the Commission's constitutional recommendations as the basis for the next Maltese Constitution, and said that the drafting of constitutional instruments would be put in hand.

MAURITIUS

Mauritius is an island lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17'–57° 46' E. long. and S. lat. 19° 58'–20° 33', and comprising with its dependencies an area of 805 square miles. The resident population at the census of 1952 was 501,415, made up of Indians, Europeans (mainly French), and persons of mixed descent. The total population, including dependencies, was estimated (Dec. 31, 1959) at 650,474.

Mauritius was discovered in 1511 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1638 they established a small colony on the shore, but in 1710 they abandoned the island, and in 1715 the French took possession of it and changed the name to Isle de France, but did not settle it until 1721. Under the French it became a great centre of trade. In 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule though the ancient name, Mauritius, was restored.

Of the total cultivable area of about 225,000 acres, 208,000 are under sugar, about 600 under aloe (regular plantations), 600 under maize, 4,400 under tea, 1,000 under tobacco and the rest under other foodcrops and mixed farming. The sugar crop of 1960 was about 235,000 metric tons.

Situated just within the tropics but being a small land mass in a large ocean area, Mauritius has a climate more subtropical than tropical except at low altitudes. In summer, conditions are sometimes trying because of high humidities and light winds rather than because of the relatively high temperatures. The island lies in that region of the

South Indian Ocean where tropical cyclones are most frequent. At times, as in 1892, 1931, 1945 and 1960 they are very severe and do much damage to crops and buildings.

Railways and Shipping.—There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes entirely through Port Louis. The shipping entered in 1960 amounted to 1,300,618 tons, and the shipping cleared to 1,290,026 tons. In 1960 there were 82 miles of railway (4 ft. 8½ in. gauge). 76 post-offices and postal agencies, 48 telegraph offices and 15 telephone-exchange offices in the island, with 210 miles of telegraph, including block telegraph of the railway and 11,140 miles of underground and overhead (Government) telephone wires and 8,989 telephone installations.

Civil Aviation.—The island is linked by air with Africa, U.K. and Europe through the scheduled services of *Air France*, twice weekly with Starliner aircraft. Qantas Empire Airways operate through Mauritius on their service Johannesburg–Sydney once a week in each direction, and South African Airways operate a similar service once a fortnight.

Education.—The inhabitants of European descent are mostly Roman Catholic. Educational facilities are available up to University entrance level. Primary education is provided in 529 schools, of which 119 are Government, 76 aided and 334 unaided schools. There are 4 Government secondary schools, 3 for boys (one being a Technical Institute) and 1 for girls, and 69 non-Government secondary schools, 8 of which are grant-aided.

The necessities of life have all to be imported from abroad. 79 per cent. of the island's trade was with Great Britain and other Commonwealth countries in 1960.

GOVERNMENT

The Government is vested in a Governor with an Executive and Legislative Council. The Mauritius (Constitution) Order in Council, 1958, provides for a Legislative Council consisting of the Speaker (appointed by the Governor from outside the Council), three *ex officio* members (the Colonial Secretary, the Attorney-General and the Financial Secretary), forty elected members and such nominated members not exceeding 12 in number as the Governor may appoint.

The Colony is divided into 40 single member Constituencies and every person (male or female) has the right to vote who—(a) is a British subject of the age of 21 years or upwards; and (b) has resided in the Colony for a period of at least 6 months immediately before the date of registration or is domiciled in the Colony and is residing therein at that date; and (c) has resided in the constituency in which he claims to be registered as a voter for a period of at least 6 months immediately before the date of registration.

The Executive Council consists of the 3 *ex officio* members above mentioned and 9 appointed members. The appointed members are persons who are elected or nominated members of the Legisla-

tive Council and are appointed by the Governor acting in his discretion. The *ex officio* members and the appointed members are all styled Ministers. The Ministerial system was established in July, 1957 in anticipation of the constitution provided in 1958.

CAPITAL, Port Louis. Population (1960), 89,900; other centres are Curepipe (37,000), Beau Bassin and Rose Hill (36,400), Vacoas and Phoenix (36,000), Quatre Bornes (22,400) and Port Mahebourg (11,900).

DEPENDENCIES OF MAURITIUS

Rodrigues, 350 miles east-north-east of Mauritius, area, 40 square miles. Population (1960) 17,662. Cattle, beans, salt fish, sheep and goats are the principal exports. The island is under the administration of a Magistrate and Civil Commissioner from Mauritius, who takes his orders from the Governor of Mauritius. Magistrate, C. Rochecouste.

Trade with Mauritius

	1959	1960
Total imports.....	Rs.4,425,040	Rs.4,088,819
Total exports.....	1,250,925	1,555,535

Other Dependencies.—Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is coconut oil. The most important are the Oil Islands Group, the largest of which, *Port Diego Garcia* (pop. 1959, 644), lies on the direct route from the Red Sea to Australia, and possesses a good harbour; other islands are Six Islands, Peros Banhos, Agalega, St. Brandon, Salomon, and Trois Frères. The total area of the "Other Dependencies" is about 47½ square miles, with a population (1959) of 1,885.

Trade with Mauritius

	1959	1960
Imports.....	Rs.554,491	Rs.723,965
Exports.....	1,362,895	1,280,106

THE NEW HEBRIDES

The New Hebrides Group, in the South Pacific Ocean, situated between the 13th and 21st degrees of South latitude and the 166th and 170th degrees of East longitude, of an area of roughly 5,700 square miles, is administered by a British-French Condominium Government.

The principal islands are Espiritu Santo, Malakula, Epi, Ambrym, Efate or Sandwich, Erromanga, Tanna, Aniwayum, Aoba, Maewo and Pentecost. The British Resident Commissioner, exercising powers delegated to him by the High Commissioner for the Western Pacific, and the French Resident Commissioner, representing the High Commissioner for France in the Pacific Ocean, are the joint heads of the Administration. They each have small staffs of national officers who assist them in general administrative work and the running of social services (health and education) financed from national funds, part of which come from the Metropolitan Governments. In addition they jointly control the "mixed" public services (posts and telegraphs, public works, mines, meteorology, etc.) which are financed from funds raised in the Territory. The population (1960) was 60,374, of which 55,428 is the estimated number of native inhabitants. Principal products are copra, coffee, cocoa, kauri timber and sandalwood. Imports for 1960 totalled £2,384,205, of which £1,003,261 was the value of imports from Australia. Exports in 1960 were valued at £1,715,504, £1,169,938 being the value of exports to France. Joint revenue, 1960, £547,883; expenditure on joint services, £592,344.

Attached to the New Hebrides are the Banks (309 sq. miles, pop. 2,475) and Torres (40 sq. miles, pop. 164) Islands.

Seat of New Hebrides Administration—Port Vila, Efate, pop. about 1,900.

British High Commissioner, D. C. C. Trench, C.M.G., M.C.

French High Commissioner, L. Péchoux.

British Resident Commissioner, J. S. Rennie, C.M.G., O.B.E.

Secretary for Protectorate Affairs, V. J. Andersen, O.B.E.	2,250
Senior Assistant Secs., T. Russell; L. M. Davies (Finance); D. G. Cudmore ..	1,885

The principal groups under the High Commissioner in, over, and for the Western Pacific Islands are (1) The Gilbert and Ellice Islands Colony; (2) The British Solomon Islands Protectorate; (3) The New Hebrides; (4) There are also a number of scattered groups and isolated islands, including Caroline, Flint, Malden, Starbuck and Vostock Islands, which are not attached to any group.

The Gilbert and Ellice Islands Colony, which includes Ocean, Christmas, Fanning and Washington Islands, besides the Gilbert, Ellice and Phoenix Groups, was formerly a Protectorate, and was formally annexed to the Empire in November, 1915. The total land area of the Colony is about 360 sq. miles with a population (Census, 1947) of 36,000 (304 Europeans, 142 Chinese, 29,923 Micronesians and 5,066 Polynesians), estimated at 44,993 at the end of 1959. Expressed in Australian currency, the estimated revenue of the Colony in 1960 was £540,757; expenditure £541,022.

The Government maintains one boys' and one girls' boarding school and 24 primary schools. Village school primary education is mainly run by missionary societies, with financial assistance from the Government, and at the end of 1960 these schools were attended by 8,647 pupils. Missions have in recent years entered the field of secondary education, and supported 6 secondary schools at the end of 1960.

The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° E. longitude, consists of 16 islands, Makin, Butaritari, Marakei, Abaiang, Tarawa (Headquarters of the Colony), Maiana, Abemama, Kuria, Aranuka, Nonouti, Tabiteuea, Beru, Nikunau, Onotua, Tamana and Arorae. The area of the group is 114 sq. miles and the population (estimated 1959) 34,406. The Ellice Group of 9 islands (Nanumea, Nanumanga, Niutao, Nui, Vaitupu, Nukufetau, Funafuti, Nukulaelae and Nulakita) lies between lat. 5° 30' and 11° SE. and long. 176° E. and 180° E. The area of the group is 9½ sq. miles and the population (estimated 1958) 4,938. Ocean Island (or Banaba), in lat. 0° 52' S. and long. 169° 35' E. was proclaimed British in 1900. The Line Islands between lat. 4° 40' and 2° N. and long. 160° 20' and 157° W. include Fanning, Washington and Christmas Islands. Fanning and Washington Islands were included in the Colony in 1916, Christmas Island in 1919. Christmas Island is the largest atoll in the Pacific. The boundaries of the Colony were extended (March 18, 1937) to include the Phoenix Islands (Birnie, Canton, Enderbury, Gardner, Hull, McKean, Phoenix and Sydney Islands), between 3° and 5° S. and 170° and 175° W. Enderbury and Canton Islands are for common use of Gt. Britain and U.S.A. for aviation and communications, under an agreement made on April 6, 1939. Canton Island is an international airport on the Trans-Pacific route between Fiji and Honolulu, although, it has lost much of its former importance.

In each island of the Gilbert and Ellice Groups (except Niulakita) and in two islands in the Phoenix Group there is a native Government under an

appointed native magistrate whose court administers a code of native laws. The Colony is administered by the High Commissioner through a Resident Commissioner.

Resident Commissioner, Gilbert and Ellice Islands, Michael Louis Bernacchi, C.M.G., O.B.E., (1952) (+ allice. £175) £A3,645

The British Solomon Islands Protectorate, established in 1893, now includes all the islands in the Solomons Archipelago S. and S.E. of the large island of Bougainville. The main islands in the Protectorate are Choiseul, Santa Ysabel, Shortland Group, Vella Lavella, Kolombangara, Ganongga, Gizo, New Georgia, Florida, Guadalcanal, Russells, Malaita and San Cristobal, and the outlying islands of Bellona, Rennell, Santa Cruz, Vanikoro, Tikopia, Cherry, Mitre, Utupua, Swallow (or Reef Islands) and Duff Groups, Sikaiana (or Stewart) and Ontong Java (or Lord Howe Atoll). The Protectorate is situated between 5°-13° S. lat. and 155°-170° 20' E. long. It has a total land area of about 11,500 square miles and an estimated population of 800 Europeans, 366 Chinese, 188,000 Melanesians, 5,000 Polynesians and 450 Micronesians. Estimated revenue (1961) £A1,800,000 (including Colonial Development and Welfare Funds (£321,000) and Grant-in-Aid from the United Kingdom (£578,000)); estimated expenditure (1961) £A1,800,000; imports (1960) £A1,825,800; domestic exports £A1,790,228. The main imports are foodstuffs, consumer goods and building materials. Principal exports are copra, timber and shell. The headquarters of the Western Pacific High Commission were moved from Suva in Fiji to Honiara, the capital of the British Solomon Islands Protectorate, in December, 1952, and the High Commissioner for the Western Pacific assumed the direct administration of the Protectorate on Jan. 1, 1953.

SOUTH PACIFIC COMMISSION

The South Pacific Commission, an advisory and consultative body set up by the six Governments responsible for the administration of island territories in the South Pacific region, recommends to the member Governments means for promoting the well-being of the peoples of these territories. It is concerned with social, economic and health matters. Headquarters, Nouméa, New Caledonia.

The Commission was established by an Agreement between the Governments of Australia, France, the Netherlands, New Zealand, the United Kingdom and the United States of America, signed at Canberra in 1947 and ratified on July 29, 1948. Until November 7, 1951, the area of the Commission's activities comprised territories lying generally south of the Equator from and including Netherlands New Guinea in the west to the French Establishments in Oceania and Pitcairn in the east. On November 7, 1951, an additional Agreement was signed extending the scope of the Commission to include Guam and the Trust Territory of the Pacific Islands under United States administration. The Commission consists of twelve Commissioners, two from each Government, and normally holds one session each year. The first Session was held in May, 1948.

There are two auxiliary bodies, the Research Council and the South Pacific Conference. There is a Research Council meeting yearly, which may be either a meeting of the full Council, or of one or other of its three main sections, specializing in health, economic development and social development. Members of the Council are appointed by the Commission and are selected for their special knowledge of the questions with which the Com-

mission is concerned, and the problems of the Territories in these fields. The chief function of the Research Council is to advise the Commission what investigations are necessary. Arrangements to carry out those which are approved are the responsibility of the Secretary-General and other principal officers. The South Pacific Conference, which meets at intervals not exceeding three years, consists of delegates from the territories who may be accompanied by advisers. The first Conference was held in Fiji in April, 1950, the second in New Caledonia in April, 1953, the third in Fiji in April-May, 1956, and the fourth in New Britain in April-May, 1959. The fifth South Pacific Conference will be held in American Samoa in July, 1962.

Secretary-General, T. R. Smith.
Executive Officers, Dr. J. Barrau (*Economic Development*); Dr. R. Seddon (*Social Development*); Dr. W. Norman-Taylor (*Health*).

FEDERATION OF RHODESIA AND NYASALAND AREA AND POPULATION

The Federation of Rhodesia and Nyasaland covers an area of over 485,000 square miles (S. Rhodesia, 150,333; N. Rhodesia 290,323; and Nyasaland 46,066 square miles), including approximately 9,380 square miles of water.

Population.—The estimated total population of the Federation (December, 1960) is 8,430,000 of all races (S. Rhodesia 3,110,000; N. Rhodesia 2,460,000; Nyasaland 2,860,000).

PHYSIOGRAPHY

Boundaries.—The Federation extends from latitude 22° 30' South to latitude 8° 15' South. On the South it is bordered by the Union of South Africa, on the West by the Bechuanaland Protectorate, and Portuguese West Africa, on the North-West and North by the Congolese Republic, on the North by Tanganyika and on the East by Portuguese East Africa.

Relief.—Most of Rhodesia is at an altitude of between 3,000 and 5,000 feet above sea level, the highest land lying on the eastern border of Southern Rhodesia where some mountains rise above 8,000 feet above sea level. In the large river valleys, the Zambezi, Sabi, Kafue and Luangwa, the level of the land falls to below 2,000 feet.

In Nyasaland the level of the littoral of Lake Nyasa and of parts of the Shire River Valley is 1,500 feet above sea level. Elsewhere the altitude varies between 2,500 and 7,000 feet with the crest of the Mlanje Mountain massif rising to 10,000 feet above sea level. Lake Nyasa itself, the greatest depth of which is 1,226 feet, is a southward extension of the Great Rift Valley.

Rivers.—Portions of the Zambezi River, Lake Nyasa, Lake Bangweulu, the Luapula River and the Chambeshi River are navigable and are extensively used by waterborne transport. The Federation has, however, no great natural waterways, either to provide access to the sea or to connect major industrial centres, but there are a number of large rivers which could be brought into the service of agriculture for irrigation and of power supplies for hydro-electric schemes. The recently completed Kariba Dam, on the Zambezi, is 184 miles long and 1,800 sq. miles in area, provides hydro-electric power from the Copper Belt to Bulawayo. The principal rivers, in addition to the Zambezi, are—in Southern Rhodesia: the Sabi River and its tributaries (irrigation and power

potentialities); the Hunyani River (already dammed at several points); and the Umfuli River (irrigation potentialities). In Northern Rhodesia: the Kafue River (power potentialities); the Mulungushi and Lunsemfwa Rivers (already supplying hydro-electric power to Broken Hill mine and town); and the Zambezi River at the Victoria Falls (supplying hydro-electric power to Livingstone). In Nyasaland: the Shire River (power and irrigation potentialities).

Climate.—Though the entire Federal area lies within the tropics most of it is at an altitude which gives climatic conditions favouring permanent European settlement. The main rainfall throughout the area is concentrated into a season extending from about November to March. Average rainfall (except for certain somewhat arid low-lying regions on the one hand and some high altitude areas of very heavy rainfall on the other) is in the vicinity of 25 to 30 inches a year.

GOVERNMENT

The Federation of Rhodesia and Nyasaland came into being on September 4, 1953, when the first Governor-General assumed office. The Order-in-Council authorizing the setting up of the Federation was approved by Her Majesty the Queen on August 1, 1953. An interim Ministry was sworn in on September 7. The first elections to the Federal Assembly took place on December 15, 1953. In the first months of the Federation only the minimum administrative machine was created and the Federal Government assumed its functions from the territories by degrees. By July 1, 1954, the Federal Ministries had taken over most of their duties.

GOVERNOR-GENERAL AND STAFF

Governor-General, His Excellency the Earl of Dalhousie, G.B.E., M.C.; born Oct. 17, 1914; assumed office, October, 1957

LEGISLATURE

The Federal Assembly consists of 59 members and is composed as follows: forty-four elected members (Southern Rhodesia, 24; Northern Rhodesia, 14; Nyasaland, 6); eight African elected members (Southern Rhodesia, 4; Northern Rhodesia, 2; Nyasaland, 2); 4 specially elected African members (Northern Rhodesia, 2; Nyasaland, 2); and three European members charged with special responsibility for African interests, of whom one is elected in Southern Rhodesia and the other two appointed, one each by the Governors of Northern Rhodesia and Nyasaland.

The main matters on which the Federal Legislature has power to make laws are external affairs, defence, immigration, financial and economic affairs, inter-territorial roads, railways, European agriculture in the Rhodesias, posts and telegraphs, education except African primary and secondary education and Federal courts. In addition, there are a number of matters on which both the Federal and Territorial Legislatures have powers to make

laws. They include the development of industries, electricity, scientific and industrial research, health, town planning, archives, census and statistics.

AFRICAN AFFAIRS BOARD

A Standing Committee of the Federal Assembly, known as the African Affairs Board, consists of the three European members representing African interests and one of the elected African members from each territory. The Board makes representations to the Federal Government on matters within the authority of the Federation in the interests of Africans; to assist a Territorial Government, at its request, in the study of matters affecting Africans, and to draw attention to any Federal legislation of a differentiating character and to ask that it should be reserved for the consideration of Her Majesty's pleasure.

Speaker of the Federal Assembly, Hon. T. I. F. Wilson, C.M.G.

Clerk of the House, Col. G. E. Wells, C.B.E., E.D.

FEDERAL SUPREME COURT

The Court, constituted under the Federal Constitution of 1953, came into being on July 1, 1955.

Chief Justice of the Federation, Hon. Sir John Clayden.

Federal Justices, Hon. Sir Francis Briggs; Hon. V. E. Quénét.

The Chief Justices of Southern Rhodesia, Northern Rhodesia and Nyasaland are *ex officio* members of the Court.

DEFENCE

The Army of Rhodesia and Nyasaland, with headquarters in Salisbury is comprised of regular and territorial forces. The regular forces include a battalion of the Rhodesia Light Infantry, a battalion of The Rhodesian African Rifles, a battalion of the Northern Rhodesia Regiment and two battalions of the King's African Rifles, units of the Rhodesia and Nyasaland Corps of Engineers, the Rhodesia and Nyasaland Corps of Signals, the Rhodesia and Nyasaland Army Service Corps, the Rhodesia and Nyasaland Medical Corps and the Rhodesia and Nyasaland Army Pay Corps. The Territorial Force comprises three active force battalions and four reserve battalions of the Royal Rhodesia Regiment, with headquarters at Salisbury, Bulawayo and Kitwe. There are also three major training establishments. The Federation has its own regular air force, the Royal Rhodesian Air Force, which is equipped with Canberra and Vampire jet aircraft, as well as trainers and transport aircraft.

EDUCATION

The Federal Government is responsible for all education other than that of Africans, that is for European, Asian and Coloured children. In July, 1960, the numbers of such children at school were as follows: Southern Rhodesia, 48,493 (178 schools); Northern Rhodesia, 17,381 (70 schools); Nyasaland, 4,709 (35 schools). In addition to the Government Schools, there are 60 State-aided private schools, attended by a further 11,642 children.

FINANCE

The eighth Federal Budget was presented on June 29, 1961. Loan vote estimates for 1961-62 totalled £9,567,000. £1,270,000 of the loan vote was applied towards meeting part of the fiscal year's expenditure on the Kariba hydro-electric

project. This project is now estimated to cost £80,000,000 in its first stage. A total of £46,600,000 has been secured from external sources the International Bank contributing £28,600,000, the Colonial Development Corporation £15,000,000, the Commonwealth Development Finance Co. Ltd., £3,000,000 and £33,400,000 is being found from internal sources.

Revenue vote expenditure in 1961-62 is estimated at £69,068,000 against a total estimated revenue of £66,266,000.

	(1960-61) (Provisional)	(1961-62) (Estimated)
Revenue	£62,188,000	£66,266,000
Expenditure from revenue funds ...	£63,073,068	£69,068,000
Expenditure from loan funds	£12,214,823	£9,567,000

The public debt amounted to £309,100,000 (provisional) at March 31, 1961.

Currency.—Federal currency is linked to British sterling and currency backing is held in London in balances, in British Treasury Bills and in Government securities issued in the United Kingdom. The Bank of Rhodesia and Nyasaland, which was established by an Act of the Federal Assembly in 1960, is responsible for the issue of the currency.

PRODUCTION, TRADE AND INDUSTRY

Agriculture.—European agriculture in Southern and Northern Rhodesia is the administrative responsibility of the Federal Government, the remainder of the agricultural industry of the Federal area being in the charge of the various Territorial Governments. Production of principal crops in 1959 was:

	Southern Rhodesia '000 lb.	Northern Rhodesia '000 lb.	Nyasa- land '000 lb.	Total '000 lb.
Tobacco† ..	207,000	13,344	34,315	251,649
Cotton ...	1,715	23	27,132	28,870
Tea	2,195	—	26,609	28,804
Wattle				
Extract ..	23,508	—	—	23,508

† All types except Turkish. Production of flue-cured tobacco, mainly in Southern Rhodesia, totalled 222,407,000 lb. and of fire-cured tobacco, mainly in Nyasaland, 21,490,000 lb.

NUMBERS OF LIVESTOCK, 1960

	Southern Rhodesia	Northern Rhodesia	Nyasa- land	Total
Cattle ..	3,516,000	1,203,000	357,000	5,264,000
Sheep ..	319,000	177,000	69,000	1,478,000
Goats ...	420,000		443,000	
Pigs	104,000	65,000	72,000	241,000

MINERAL PRODUCTION, 1960

	Quantity	Value
Copper	624,000 tons	£120,883,000
Gold	563,000 oz.	7,073,000
Asbestos	134,000 tons	7,472,000
Chrome	668,000 tons	3,746,000
Zinc	33,000 tons	2,434,000
Coal	3,923,000 tons	3,756,000
Lead	16,000 tons	1,041,000
Cobalt	—	2,202,000

Manufactures.—Since 1955-56, the census of industrial production has been held on a federal basis, giving a gross output of £157,000,000 and a net output of £66,000,000 for the year 1960. Tobacco, textiles and garments, foodstuffs and metal

products remain the most important groups, drawing largely for their materials on local sources.

EXTERNAL TRADE

In 1960, the seventh year for which statistics of external trade were available for the Federation as a single trading entity, total external trade was valued at £362,709,000.

With exports valued at £205,870,000 and imports at £156,839,000, there was a favourable balance of trade of £55,992,000 (including net gold sales of £6,961,000).

About 67 per cent. of the exports consisted of minerals—copper, gold, asbestos, lead, zinc, chrome being the most important. About 17 per cent. of all exports consisted of tobacco.

The remaining 16 per cent. was made up of a wide range of products, including manufactured articles of which textiles are the most important.

About 25 per cent. of imports in 1960 were metals and machinery, a high proportion being mining, electrical and agricultural machinery, railway materials and other durable producers' goods required for the growth of industry, agriculture and basic services such as communications and the provision of electric power.

The most important market for the Federation's products was the United Kingdom. Exports to the United Kingdom in 1960 were made up mainly of copper (£52,000,000), tobacco (£25,000,000), asbestos and tea. The most important supplier of the Federation's requirements in 1960 was South Africa.

	Total	1959	1960
Imports from U.K. ...	£49,333,169	£46,489,954	
Exports to U.K.	90,300,485	103,307,138	

COMMUNICATIONS

Railways.—The two Rhodesias are served by the Rhodesia Railways which connect with the South African Railways at Mafeking. The main line forks at Bulawayo; the northern section runs *via* the Victoria Falls through Northern Rhodesia to the Copperbelt and on to the Congo Border where it connects with the Katanga system. The eastern section runs along the watershed of Southern Rhodesia to serve the main centres and ends at Umtali where it joins the Portuguese system to provide access to Beira. With branch lines, the total mileage of the Rhodesia Railways is over 2,600 miles, including the line linking the Midlands of Southern Rhodesia with the port of Lourenço Marques in Portuguese East Africa, which was completed in 1955.

Nyasaland is served by a Railway system (the Trans-Zambezia Railway, the Central Africa Railway and the Nyasaland Railways) which connects Beira with Nyasaland. The total length of the system is nearly 500 miles.

Roads.—Main roads, which are in process of modernization, connect all the main centres of the Federation with one another and with adjacent territories, and secondary roads serve rural areas. The total route mileage of roads is nearly 52,000 miles (28,500 miles in Southern Rhodesia, 18,000 miles in Northern Rhodesia and nearly 5,400 miles in Nyasaland) of which some 12,000 miles are designated as main or principal roads (5,000 miles in Southern Rhodesia, excluding roads in towns, 4,300 miles in Northern Rhodesia and 2,300 miles in Nyasaland). Major bridges, many of which were the gift of the Beit Trustees, span the larger rivers on main roads, the Beit Bridge over the Limpopo, the Ottobert Bridge at Chirundu over the Zambezi and the Birchenough Bridge over the Sabi River being noteworthy.

Air Services.—Civil aviation has made rapid progress in the Federal area since the war. The existing airline was reconstituted in partnership between the three territories as the Central African Airways Corporation. Flying Viscount, Dakota and Beaver aircraft, Central African Airways provide daily services between the major towns of the Federation as well as services to Nairobi, Johannesburg, Lourenço Marques, Durban, Elisabethville and Beira. Beaver aircraft provide services between many of the smaller centres in Northern Rhodesia and Nyasaland. Links to overseas countries are provided by a number of the major world airlines which operate through the international airport at Salisbury. The travelling time between the Federation and London is 17 hours by B.O.A.C. Comet and 15½ hours by S.A.A. Boeing 707's.

CAPITAL

SALISBURY, the Federal capital, is also the principal city of Southern Rhodesia. It is built round the site where the Pioneer Column ended its march into Mashonaland in 1890. Situated in the north-east of Southern Rhodesia, it is on the main railway line which traverses the more closely settled areas of the Colony. Branch railway lines run north-east and north-west. It is the centre of the tobacco industry—the tobacco auction sales at Salisbury are the largest in the world—and an industrial centre of considerable importance. Estimated population, including townships on the periphery of Salisbury: Europeans, 88,000; Africans, 190,000; Asians and Coloured (mixed race), 5,000.

SOUTHERN RHODESIA

Southern Rhodesia, comprising Matabeleland, Mashonaland and Manicaland, is that part of the territory named after Cecil Rhodes lying south of the Zambesi River, its political neighbours being Northern Rhodesia and Portuguese East Africa on the N.; the Transvaal and Bechuanaland on the S. and W.; and Portuguese East Africa on the E. The total area is 150,333 square miles. The estimated population, at Dec. 31, 1960, numbered 225,000 Europeans, 16,700 Asiatics and Coloureds and 2,870,000 Africans, giving a combined total of approximately 3,110,000. In 1960 there were 5,876 European births and 1,407 deaths, giving a birth-rate of 26 and a death-rate of 6 per 1,000.

The majority of the natives of Southern Rhodesia (members of the so-called Bantu race), are known as Mashona. In the Western portion of the Colony are the descendants of the Amandebele who conquered and settled down among the Mashona, and from whom the Province of Matabeleland derives its name.

Southern Rhodesia was administered by the British South Africa Company from the date of occupation (1890) to 1923, when responsible government was granted. On this latter date the Company relinquished all rights and interests in the land of Southern Rhodesia except in those estates which it was already developing on July 10, 1923. A Land and Agricultural Bank grants loans for farm development and acquisition of residential property on easy terms of repayment. Of the Colony's 97,184,000 acres, 21,020,000 have been allocated for Native Reserves, 8,052,000 for Native Purchase Areas and 12,878,000 for Special Native Areas.

FINANCE

	* Estimated.	

(A large proportion of the Public Debt has been taken over by the Federal Government.)

EDUCATION

Native education is controlled by Government and comes under the Minister for Native Education. Expenditure is now approaching £4,500,000 per annum: Capital expenditure in addition to revenue funds, amounts to more than £250,000. There are over 2,900 schools enrolling 520,000 pupils with 14,000 teachers. Both Mission and Government training centres provide for lower and higher primary teachers' courses. Secondary schools provide a standard of education up to Cambridge Certificate, while post primary schools include such subjects as building, carpentry, agriculture and home craft. In addition four special schools cater for the blind, the deaf and dumb. Eighty per cent. of pupils of school-going age are now able to attend schools.

GOVERNMENT

The Colony obtained self-government in 1923 and has a Parliament of 30 members and a Cabinet of 6 members. The Queen is represented by a Governor who presides over the Executive Council. The Southern Rhodesian Government is responsible for native affairs, bridges, irrigation, roads, power, local government, labour, housing and social welfare. All discriminatory legislation is reserved for the consent of the British Government.

Municipal self-government has been established in the city of Salisbury, the city of Bulawayo, and in the towns of Umtali, Gwelo, Gatooma, Que Que and Fort Victoria. Smaller areas are administered by Town Management Boards. Over the past ten years local self-government among the Africans has been encouraged and by the end of 1959 there were 60 Native Councils raising their own rates.

Governor, His Excellency Hon. Sir Humphrey Vicary Gibbs, K.C.M.G., O.B.E. (1959).

MINISTRY

(Feb. 18, 1958)

Prime Minister, Hon. Sir Edgar Whitehead, K.C.M.G., O.B.E.
 Minister of Labour, Social Welfare and Housing, Hon. A. E. Abrahamson.
 Minister of the Treasury and of Mines, Hon. C. J. Hatty.
 Minister of Roads, of Irrigation and of Lands, Hon. A. R. W. Stumbles.
 Minister of Justice and Internal Affairs, Hon. R. Knight, Q.C.
 Minister of Local Government and of Native Education, Hon. R. M. Cleveland, O.B.E.
 Minister of Native Affairs, Hon. H. J. Quinton.

Speaker, Legislative Assembly, Dr. the Hon. W. Alexander.

Secretary, Department of the Prime Minister and Cabinet Office, G. B. Clarke, I.S.O.

Secretary, Division of Justice and Internal Affairs, J. W. Pithey.

Director of Mines, W. Ralston, M.B.E.

Secretary for Native Affairs and Chief Native Commissioner, S. E. Morris, C.M.G.

Secretary to Treasury, C. E. M. Greenfield, C.M.G., M.B.E.

Secretary, Division of Labour, Social Welfare and Housing, C. L. Honey.

SALISBURY, the capital, is situated on the Mashonaland plateau, altitude 4,850 ft.. popula-

tion (estimated) 283,000, including 88,000 Europeans, BULAWAYO, the largest town in Matabeleland, altitude 4 450 ft., estimated population 202,000, including 52,000 Europeans. Other centres are Umtali, Gwelo, Gatooma, Que Que and Fort Victoria.

Salisbury is 5,600 miles from London (air route) transit 17 hours; by sea, *via* Cape Town, 17 days (approx.).

NORTHERN RHODESIA

The Protectorate of Northern Rhodesia lies on the plateau of Central Africa between the longitudes 22° E. and 33° 33' E. and between the latitudes 8° 15' S. and 18° S. Its area is 288,130 square miles, and its boundaries are 3,575 miles in length.

With the exception of the valleys of the Zambezi, the Luapula, the Kafue and the Luangwa Rivers the greater part of Northern Rhodesia has a flat to rolling topography, with elevations varying from 3,000 to 5,000 feet above sea level, but in the north-eastern districts the plateau rises to occasional altitudes of over 5,000 feet. In many localities the evenness of the plateau is broken by hills, sometimes occurring as chains which develop into areas of broken country. The highest group of hills is the Muchinga Mountains which form part of the Great Escarpment running down the western edge of the Luangwa River Valley, and of these, individual peaks rise to about 8,000 feet.

Although Northern Rhodesia lies within the tropics, and fairly centrally in the great land mass of the African continent, its elevation relieves it from the extremely high temperatures and humidity usually associated with tropical countries. The lower reaches of the Zambezi, Luangwa and Kafue rivers in deeper valleys do experience high humidity and trying extremes of heat, but these areas are remote and sparsely populated.

At June 30, 1960, the estimated population of Northern Rhodesia was 76,000 Europeans, 8,000 Asiatics, 2,000 mixed races and 2,340,000 Africans.

FINANCE

Revenue.....	£15,837,855	£18,239,705
Expenditure.....	16,179,899	18,637,854

* Estimated.

With the coming into being of the Federation of Rhodesia and Nyasaland, the Federal Government assumed, under the Constitution, powers to impose certain important taxes formerly enjoyed by the Northern Rhodesia Government and also took over responsibility for the administration of various departments and services.

GOVERNMENT

Government is carried on by a Governor appointed by the Crown, assisted by an Executive Council of four officials and six unofficial members, of whom two must be Africans. The Legislative Council consists of thirty members, of whom six are official, two are nominated by the Governor and the rest are elected. Of the elected members in the present Council, 14 are European and eight are Africans. The Governor's nominees consist of one African and one Asian, and the official members are all European. The Legislative Council is presided over by a Speaker who is an unofficial but not a member of the Council.

Governor of Northern Rhodesia, His Excellency Sir Evelyn Dennison Hone, K.C.M.G., C.V.O., O.B.E. (1958).

British Council Representative in N. Rhodesia, R. P. R. Sangster.

CAPITAL AND SEAT OF GOVERNMENT, Lusaka, situated in the Midlands (1956 Census, European pop. 9,440). Other centres are Livingstone, Broken Hill, Fort Jameson, Mazabuka, Abercorn, Kasama, Mongu, Ndola, Luanshya, Mufulira, Chingola, Bancroft and Kitwe (the main copper mining town of the copper belt—European pop. 9,680).

Commissioner in London, J. P. Murray, C.M.G., 57 Haymarket, S.W.1.

NYASALAND PROTECTORATE

The Nyasaland Protectorate comprises the western shore of Lake Nyasa, with the high tableland separating it from the basin of the Luangwa River, and the region lying between the watershed of the Zambesi and Shire Rivers on the west, and the Lakes Chiuta and Chilwa and the River Ruw (a tributary of the Shire) on the east, including the mountain systems of the Shire Highlands and Manje.

The Protectorate is bounded on the North by Tanganyika Territory, on the West by Northern Rhodesia and on the South and East by Portuguese East Africa (Mozambique). The rainy season is from November to March, and it is dry for the rest of the year.

Nyasaland has a total area of 46,257 sq. miles (land area, 36,879) with an estimated population in 1959 of 2,801,400 (2,780,000 Africans, 9,000 Europeans and 22,400 Asians and other races).

The seat of Government is Zomba (est. pop., 1959, 6,000), other centres being Blantyre and Limbe in the Shire highlands, ♀ Fort Johnston (on Lake Nyasa), Lilongwe, Manje and Mzimba.

* Financed by loans, grants under the Colonial Development and Welfare Acts, contributions from recurrent revenue, etc. † Estimated.

In 1953, the Government of the Federation of Rhodesia and Nyasaland assumed responsibility for the servicing of the public debt of the Protectorate, then amounting to £6,228,488. The Nyasaland Government is responsible for the servicing of the Public Debt raised since Oct. 23, 1953, totalling (at June 30, 1959) £5,476,798.

GOVERNMENT

The Government consists of the Governor and an Executive and Legislative Council. The Executive Council is presided over by the Governor and consists of three *ex officio* members, two nominated official members and four nominated unofficial members two of whom are Africans. The Legislative Council is presided over by a Speaker, appointed by the Governor, who is not a member of the Council, and consists of four *ex officio* members, ten official members and thirteen elected members of whom six are non-Africans and seven Africans. The non-African members are elected by direct vote and the African members by electoral colleges.

In 1944 and 1945 African Provincial Councils were established in each of the three provinces. These councils, which are advisory, are composed of chiefs and other responsible African members under the presidency of the Provincial Commissioner.

ST. HELENA

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in 15° 55' S. lat. and 5° 42' W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with an estimated population at Dec. 31, 1960, of 4,707. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. Although within the tropics, the south-east "trades" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator, João de Nova, in 1502 (probably on

St. Helena's Day) and remained unknown to other European nations until 1588. It was used as a port of call for vessels of all nations trading to the East until it was annexed by the Dutch in 1633. It was never occupied by them, however, and the English East India Company seized it in 1659. In 1834 it was ceded to the Crown. During the period 1815 to 1821 the island was lent to the British Government as a place of exile for the Emperor Napoleon Bonaparte who died in St. Helena on May 5, 1821. It was formerly an important station on the route to India, but its prosperity decreased after the construction of the Suez Canal. A phormium (flax fibre) and lacemaking industry has been established. St. James's Bay, on the north-west of the island, possesses a good anchorage.

GOVERNMENT

The government of St. Helena is administered by a Governor, with the aid of an Executive Council of up to 4 official and 3 unofficial members. The Governor is also assisted by an Advisory Council of up to 10 unofficial members chosen to represent, as far as possible, all unofficial sections of the community, the Governor alone making all ordinances.

ASCENSION

An isolated island in the South Atlantic (3,417 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of 2,620 feet, situated 7° 55' 55" S. lat. and 14° 25' 55" W. long. It is said to have been discovered by João de Nova, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with an area of about 38 square miles, and, being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815, when the English took possession of it; on Dec. 31, 1960, the population was 429. Ascension was administered by the Board of Admiralty until 1922, when by Royal Letters Patent it became a Dependency of St. Helena, and was transferred to the Colonial Office. St. George's town, the capital, is situated in a small bay on the N.W. coast. Ascension is visited from January to May by the sea-turtle, which lay their eggs in the

sand; the sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month.
Resident Magistrate, J. R. Bruce.

TRISTAN DA CUNHA

Is the chief of a group of islands of volcanic origin lying in lat. 37° 6' S. and long. 12° 2' W., discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. They have a total area of 45 square miles and in 1921 the inhabitants numbered 127, increased in 1959 to 292; they are stated to be very long-lived. The main island is about 1,800 miles W. of the Cape of Good Hope, 3,600 miles N.E. of Cape Horn, and about 1,320 miles S.S.W. of St. Helena. It was the resort of British and American sealers from the middle of the 18th century, and in 1760 a British naval officer visited the group and gave his name to Nightingale Island. On August 24, 1816, the group was annexed to the British Crown and a garrison was placed on Tristan da Cunha, but this force was withdrawn in 1817. William Glass, a corporal of artillery (*died* 1853), remaining at his own request, with his wife and two children. This party, with two ex-Navy men, Alexander Cotton and John Mooney, and three masons imported for the purpose of housing the garrison, formed the present settlement. In 1827 five coloured women from St. Helena, and afterwards others from Cape Colony, joined the party. The inhabitants are of mixed blood, but the British strain is predominant. In 1885 many of the able-bodied men were drowned through the loss of a boat, and in 1886 a grant of stores and provisions was made by Parliament. The principal settlement (Edinburgh) is in a fertile tract in the north-west of the island, its name being in honour of a visit from the former Duke of Edinburgh in 1867. The inhabitants grow potatoes and some vegetables, and possess cattle, sheep, pigs and donkeys. They are also able to earn money by fishing for the canning factory.

From the death of Corporal Glass until 1933 the oldest inhabitant acted as Governor; in 1933 a council of four was set up (with one of its members as Chairman), the chairman, or chief, acting as island spokesman and conducting marriages in the absence of a chaplain. In 1948 an Administrator was appointed by the Governor of St. Helena. The Council now has 24 members, including the Administrator as President, and 6 women members. The separate women's Council has been abolished. Communications with the outside world were infrequent until the outbreak of war in 1939, but have improved since that time. There is now a South African Government meteorological station equipped with wireless. The recent commencement of operations by a South African fishing company has led to more frequent visits of vessels to the island.

CAPITAL, Ψ Edinburgh.

Administrator, P. J. F. Wheeler (1961).
Resident Chaplain, Rev. C. J. Jewell.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl. Cultivation was started in 1937.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and $\frac{1}{2}$ mile wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Seals, innumerable penguins, and vast numbers of sea-fowl visit these islands.

GOUGH ISLAND (or Diego Alvarez), in 40° 20' S. and 9° 44' W., lies about 250 miles S.S.E. of Tristan

da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and sea-elephants and has valuable guano deposits. There is no permanent population, but there is a meteorological station maintained on the island by the South African Government and manned by South Africans.

By Letters Patent dated January 12, 1938, the Islands of *Tristan da Cunha, Gough, Nightingale and Inaccessible* in the South Atlantic were made Dependencies of the Island of St. Helena.

SARAWAK

Sarawak is a British Colony on the north-west coast of the island of Borneo, with a seaboard of about 500 miles, an area of 48,200 square miles, and a population estimated in 1960 at 744,529, composed of various races, of whom the Sea Dyaks (Ibans), Malays, Chinese, Land Dyaks, Melanau, Kayans and Kenyahs are the most numerous. The government of Sarawak was granted in 1841 by the Sultan of Brunei to Sir James Brooke, who became well known as Rajah Brooke of Sarawak. Other concessions were made in 1861, 1882, 1885, and 1890, when the Limbang River was obtained. The Lawas River was added in 1905. In 1864 Great Britain recognized Sarawak as an independent State, and under an agreement of 1888 the State was placed under British protection. In 1941 the centenary of Brooke rule was celebrated throughout the State.

Sarawak was ceded to Great Britain by the Rajah on July 1, 1946.

The territory of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of North Borneo. The southern boundary is, except for a few short stretches, formed by outstanding ridges of hills; the eastern boundary is a broken range of mountains with peaks rising to over 5,000 feet. The principal rivers are the Rejang (navigable for about 160 miles), the Baram (navigable for about 100 miles), the Batang-Lupar, and the Limbang. Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (23 miles).

The country produces rubber, oil, bauxite, timber, sago, rice, illipe nuts, birds' nests, gold, pepper, rattans and jungle produce. There are also known coal and cinnabar deposits.

GOVERNMENT

By the Sarawak (Constitution) Order in Council, 1956, a new constitution was granted to Sarawak, which came into force on April 1, 1957. Under this the Council Negri, in which legislative powers and the control of finance are vested, has a majority of elected unofficial members. There are 24 elected members, 14 *ex officio* members, 4 nominated members and 2 standing members who were elected for life prior to cession. The new Supreme

Council (i.e. Executive Council) has 3 *ex officio* and two nominated members and 5 members elected by the elected members of the Council Negri by secret ballot from among the elected, nominated or standing members of the Council Negri. The elected members of Council Negri are elected by divisional advisory councils (except for the Kuching Municipal and Sibn and Miri Urban District Councils which each elect one representative directly). The divisional advisory councils are elected by district and other local councils.

SEYCHELLES

The Colony of Seychelles, in the Indian Ocean, consists of two distinct collections of islands—the Mahé group, 32 islands in all, granitic with high hills and mountains (highest point 2,971 feet) and the Out-lying Islands, the Coralline group, numbering 60 more and, for the most part, only a little above sea-level. Proclaimed as French territory in 1756, the Mahé group began to be settled as a dependency of Mauritius from 1770, was captured by a British ship in 1794 and was finally assigned to Great Britain in 1810. By Letters Patent of September, 1903, these islands, together with the Coralline group, were erected into a separate Colony. The total area of the Granitic group is 87 square miles, of which Mahé, the largest island and the seat of Government, claims 55. The next largest island is Praslin, home

of the unique double coconut, Coco de Mer. Islands of the Coralline group lie at distances from Mahé varying between 60 to 612 miles and, exclusive of the Aldabra lagoon (50 sq. miles), have a total area of approximately 13 sq. miles. Aldabra is famous for the gigantic land tortoises. These islands have no permanent population and, where worked, are supplied by contract labour from the Granitic group. The population on May 4, 1960, was 41,425, of whom only 1,292 were residing in the Coralline group. Although only 4° S. of the Equator, the islands are healthy, the death and birth rates in 1960 were 10 and 38.3 per 1,000 respectively. There are 34 primary schools, 8 secondary schools and a teachers' training college.

The Governor is assisted by an Executive Council of 4 *ex officio* members and 4 unofficial members appointed by the Governor, and by a Legislative Council of 4 *ex officio*, 5 elected and 3 nominated members. One of the nominated members is an unofficial.

SINGAPORE

The State of Singapore consists of the island of Singapore and the adjacent islets with a total area of 224.5 sq. miles.

Singapore Island is situated off the southern extremity of the Malay Peninsula, to which it is joined by a causeway, carrying a road and a railway, across the Straits of Johore, which are about three-quarters of a mile in width; its length is 26 miles and its breadth 14 miles; its population at Dec. 31, 1960 was estimated at 1,665,400, comprising 1,253,400 Chinese, 232,400 Malaysians, 140,400 Indians and Pakistanis, 12,500 Eurasians and 26,700 Europeans and others.

The currency is linked to sterling and the rate of exchange is \$1.00 = 2s. 4d.

PRODUCTION AND TRADE

Singapore handles the major proportion of the imports and exports of the Federation of Malaya, and much of the external trade of her other neighbours passes through her. The chief exports are rubber, timber, petroleum products, copra, canned pineapples, coconut oil and spices. A wide range of manufactured consumer and capital goods is imported for local consumption and re-exports. In 1960, imports totalled M\$4,078,000,000 and exports M\$3,477,100,000. For the year, the value of imports from the United Kingdom was 8.9 per cent. and of exports to the United Kingdom was 8.2 per cent.

TRADE WITH U.K.

	1959	1960
Imports from U.K.....	£31,195,286	£33,638,191
Exports to U.K.....	21,939,157	21,914,334

GOVERNMENT

Singapore achieved statchood in 1959 after 140 years of British colonial rule. There is a Cabinet of nine elected Ministers presided over by the Prime Minister. The Ministers are collectively responsible to the fully elected 51-member Legislative Assembly for policy, but have full executive authority over their respective ministries. Each Ministry has a Parliamentary Secretary (an elected Assemblyman) and a Permanent Secretary (a civil servant) who exercises supervision under the direction of the Minister. Internal security is also within the responsibility of the Government, subject to the oversight of the Internal Security Council, which consists of three representatives each of the Singapore and U.K. Governments and one of the Government of the Federation of Malaya. The United Kingdom Government remains responsible for external affairs; in the latter, however, the Singapore Government may, with the assent of the United Kingdom Government, deal directly with overseas countries in matters concerning economic and cultural relations.

Head of State, The Yang di-Pertuan
Negara, Inche Yusof bin Ishak (Dec. 3,
1959).

U.K. High Commissioner, The Earl of
Selkirk, P.C., G.C.M.G., O.B.E., A.F.C.
Prime Minister, Lee Kuan Yew.

British Council Representative, D. Hard-
wick, M.B.E.

TANGANYIKA

The Trust Territory of Tanganyika (formerly German East Africa, 1884-1918) occupies the east central portion of the African continent, between 2°-11° 45' S. lat. and 29° 20'-40° 38' E. long. The Territory is bounded on the N. by Kenya and Uganda; on S.W. by Lake Nyasa, Nyasaland and N. Rhodesia; on S. by Portuguese E. Africa; on the W. it is bounded by the Belgian trust territory of

Ruanda-Urundi and the Congolese Republic; on the E. the boundary is the Indian Ocean. Tanganyika has a coast-line of about 500 miles and an area of 361,800 square miles (including 20,650 square miles of water). The coast-line extends from the mouth of the Umba to the mouth of the Rovuma.

The greater part of Tanganyika is occupied by the Central African Plateau from which rise many mighty mountains, including Mt. Kilimanjaro, the highest point in the Continent of Africa (19,340 ft.) and Mt. Meru (14,979 ft.). The Rovuma, Rufiji, Pangani, Wami and Ruwv rivers flow into the Indian Ocean; the Mara and Kagera into Lake Victoria; the Malagarasi into Lake Tanganyika; the Songwe into Nyasa; and the Rungwa and Lupa-Songwe into Lake Rukwa. The Serengeti National Park, which covers an area of 6,000 square miles in the Northern and Lake Provinces, is famous for its variety and number of species of game.

The native population consists mostly of tribes of mixed Bantu race. The estimated population (mid-1960) is 9,238,000, made up of 9,099,000 Africans, 22,300 Europeans and 117,300 other non-Africans, mainly Asians. Swahili, the language of the coastal people, is understood throughout the country, and forms an invaluable *lingua franca*. It has been adopted as the basic standard dialect for literature, both for educational and general purposes. A single system of education is being developed and integration of the present racial system is to take effect from January, 1962. Expenditure by Government on education in 1961-62 is £5,889,000. In 1960 there were 2,733 primary schools, mostly co-educational, with an enrolment of 250,156 boys and 136,111 girls. Of these 753 were maintained by Government and Native authorities and 1,980 by voluntary agencies. There was a total of 369 middle schools, and Government or Native authorities managed 130 of the boys' and 9 of the girls' schools. The enrolments were 37,041 boys and 7,748 girls. There were 12 secondary schools run by Government and 17 by voluntary agencies. The enrolments were 4,163 boys and 482 girls. Five teacher-training centres were maintained by Government and 25 by voluntary agencies. The number of students in training were 1,017 men and 424 women. There are 2 trade schools run by Government, each offering a 3-year course in the various engineering and building trades. Each has 600 boarders.

Educational facilities for Europeans are financed from the European Education Fund, which is controlled by the European Education Authority and derives its revenue from education tax paid by Europeans, fees paid by parents to Government European Schools and a contribution from Government.

There are 11 Government primary schools of which 2 are boarding schools and 14 private schools receiving financial assistance from the fund as well as 10 unassisted private schools. In 1960 there were 2,097 primary pupils. There is one aided secondary boarding school with 485 pupils, and, in 1960, 255 European Secondary pupils attended other assisted schools, the largest being St. Joseph's Convent, Dar es Salaam, which admits children of all races.

There is also a separate authority for Indian education with its own fund. There are Government primary schools in Dar es Salaam and Tanga with 3,264 pupils and secondary schools in Dar es Salaam, Tanga, Moshi, Dodoma, Lindi and Tabora, with 4,780 pupils, but most of the education facilities for Indians are provided by non-Government schools receiving grants in respect of staff, buildings and equipment; in 1960 there were 106

assisted primary schools with 12,887 pupils and 24 assisted schools providing a full or partial secondary course, with 4,534 pupils. A teacher training centre provides a 2-year course for Asian primary school teachers.

There are 3 Mission schools providing primarily for Goans and other non-natives, but also admitting Asians and Europeans, and 1 school run by the Goan community. They all receive grants from the Other Non-Native (including Goan) Education Fund. In 1960 there were 1,588 pupils at these schools. There is also one Mission school for half-castes.

The Technical Institute in Dar es Salaam provides technical and commercial education for both sexes of all races. There are at present 850 student places.

In 1960, 210 Africans followed the Higher School Certificate course in secondary schools; there were 171 students at the University College of East Africa at Makerere (Uganda), affiliated to London University, 27 at the Royal Technical College, Nairobi, and 243 at institutions of higher education outside East Africa. Financial assistance for students going overseas is provided from the Government Bursaries Fund.

Production, etc.—The economy is based mainly on the production and export of primary produce and the growing of foodstuffs for local consumption. The chief commercial crops are sisal, cotton, coffee and oilseeds. The most important minerals are diamonds, gold, lead and mica. Hides and skins are another valuable export. Industry is at present largely concerned with the processing of raw materials for either export or local consumption. There is also a healthy growth of secondary manufacturing industries, including factories for the manufacture of leather and rubber footwear, knitwear, razor blades, cigarettes and textiles, and a wheat flour mill.

The value of Tanganyika's principal exports in 1960 was: sisal, £15,442,000; coffee, £7,326,000; cotton, £8,827,000; diamonds, £4,653,000; oilseeds, nuts and kernels, £3,321,000; cashew nuts, £2,126,000; hides and skins, £1,836,000; meat and meat preparations, £1,942,000. Other exports include gold, metalliferous ores, tea, beans, peas and pulses, animal feeding stuffs, cassava flour, beeswax, papain, wood and timber, lead and unmanufactured tobacco.

Live Stock.—In 1960 there were about 8,000,000 cattle, 2,870,000 sheep, 4,290,000 goats, 15,600 pigs, 140,000 donkeys and 190 horses in the Territory.

Minerals.—The provisional value of mineral production in 1960 was £7,647,000. Principal exports were as follows: diamonds, £4,653,000; gold, silver, copper and lead, £2,239,000; mica sheet, £79,000; salt, £274,000; building minerals, £255,000; tin concentrates, £107,000; other, £40,000.

Communications.—The Railways in Tanganyika are operated by the East African Railways and Harbours Administration. They are metre gauge and comprise the following lines:—*Tanga Line.* Tanga to Moshi, 218 miles, with a branch line 54 miles in length from Moshi to Arusha. There is a connection with the Kenya and Uganda Section at Kahe near Moshi. *Central Line.* Dar es Salaam to Kigoma on Lake Tanganyika, 780 miles, with branch lines from Tabora to Mwanza on Lake Victoria (236 miles); and Kaliuwa to Mpanda (131 miles). *Southern Province Line.* Mtwara to Nachingwea (132 miles) with a branch to Masasi (24 miles). Steamers run on Lakes Victoria (to Uganda and Kenya) and Tanganyika (to Rhodesia

and the Congolese Republic). Railway road services operate over 2,600 miles, the main routes being from Morogoro to Korogwe (178 miles), Dodoma to Arusha (273 miles), Dodoma to Mbeya (406 miles), Itigi to Mbeya (305 miles) and Morogoro to Iringa (200 miles). A first-class bitumen-surfaced road, 131 miles long, runs from Namanga (on the Kenya border) to Himo, *via* Moshi and Arusha and new roads connect Dar es Salaam-Morogoro-Iringa and Tanga-Korogwe. The Tanganyika section of the Cape to Cairo road, from the Northern Rhodesian border to the Kenya border, is 810 miles in length and a new mountain section of this road, north of Mbeya, has been re-aligned and bitumenized. A section of the East-West road from Morogoro to Dodoma has been improved. A new 132 mile trunk road and a ferry on the 2½ mile crossing of an arm of Lake Victoria complete a direct trunk road route round the Southern half of Lake Victoria from the Kenya border, *via* Mwanza, Biharamulo and Bukoba to the Uganda border.

Tanganyika has an extensive telephone and telegraph network consisting of 65 telephone exchanges and 215 telegraph offices. These services are available to Kenya and Uganda. A radio telephone service is also available to most countries of the world and to suitably equipped ships in East African coastal waters within a range of 400 miles. There are 181 Post Offices.

East African Airways Corporation operates 3 Comet IV services weekly from East Africa to London. One is a direct service from Dar es Salaam and for the other two there are connecting services. The Corporation also serves 15 stations in Tanganyika and 10 stations in Southern Africa from Dar es Salaam.

ψ The chief seaports are Dar es Salaam, Tanga, Lindi, Mtwara and Kilwa. Dar es Salaam has three deep-water berths and Mtwara two. Tanga is a lighterage port.

GOVERNMENT

Following the constitutional conference held in Dar es Salaam in March, 1961, the dates of internal self-government and full independence were announced as May 1, 1961, and December 28, 1961, respectively. The latter date was later brought forward to December 9. The Cabinet of 12 members was formed on May 1. Other changes brought about by the constitutional conference were the abolition of the post of Deputy Governor and a change of title for the legislature from Legislative Council to National Assembly, which comprises 71 elected members (50 African, 11 Asian and 10 European) and 9 nominated members. Until full independence the Governor continues to be responsible for defence and external affairs.

Governor and Commander-in-Chief, His Excellency Sir Richard Gordon Turnbull, K.C.M.G., assumed office July, 1958 (and £2,500 duty allowance).....	£5,500
Chief Justice, Sir Ralph Windham.....	3,500

TONGA

The Tongan or Friendly Islands form a self-governing State under the protection of Great Britain, in accordance with the terms of the revised Treaty of Friendship signed at Nuku'alofa on Aug. 26, 1958. These islands are situated in the Southern Pacific some 300 miles to the E.S.E. of Fiji, with an area of 270 square miles, and population (1959) of 61,899. The largest island, Tongatapu, was discovered by Tasman in 1643. Most of the islands are of coral formation, but some are volcanic (Tofua, Kao and Niuafoou or "Tin Can" Island). The limits of the group are between 15° and 23° 30' S., and 173° and 177° W. Nukualofa, on the island of Tongatapu, is the seat of government. The present Queen Salote Tubou, G.C.V.O., G.B.E., succeeded her father the late King George Tubou II on April 12, 1918. The constitution provides for a Government consisting of the Sovereign, a privy council and cabinet, a legislative assembly and a judiciary. The legislative assembly has 21 members, with a Speaker, and includes the Ministers of the Crown, the two Governors of island groups, and the representatives of the Nobles and of the people (seven of each), who are elected triennially. In 1960, women were allowed to vote for the first time. Soil generally is fertile, the principal export is copra. Revenue 1959-60 £1733,528; expenditure £1800,870. There is no debt. Total imports (1960) £11,669,063; total exports £11,860,499. The total shipping cleared in 1960 was 203,113 tons. Tongan currency is on parity with Australian currency in relation to sterling.

British Commissioner and Consul, E. J. Coode (1960) (and duty allowance £200) £2,000.

TRINIDAD AND TOBAGO

(See WEST INDIES)

THE UGANDA PROTECTORATE

The territories now comprised within this Protectorate came under British influence in 1890. The present limits are approximately as follows:— On the north, the Sudan; on the east, the western boundary of Kenya Colony; on the south, Tanganyika Territory and Belgian Ruanda-Urundi; and on the west, the eastern boundary of the Belgian Congo. Within these boundaries lie Lake Victoria (part), Lake Edward (part), Lake George, Lake Albert (half), Lake Kyoga, Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to the Sudan frontier post at Nimule. Total area, 93,981 square miles, including 13,689 square miles of water.

For administrative purposes, the Protectorate is divided into 4 Provinces:—

- (1) Buganda (East Mengo, West Mengo, Masaka and Mubende).
- (2) Eastern (Teso, Busoga, Bugisu, Bukedi, Mbale Township).
- (3) Western (Bunyoro, Toro, Ankoile and Kigezi).
- (4) Northern (Acholi, Lango, West Nile and Karamoja).

The estimated population of Uganda (1959) was 6,538,175, composed as follows: Africans 6,451,117; Asians 71,933; Europeans 10,866; Arabs, 1,946; other races 2,313. About 2,500,000 Africans, who occupy the Central and Southern parts of the Protectorate, speak Bantu languages of which the most important is Luganda (the language of the Baganda tribe, from whom the present name of the Protectorate was originally derived). Ki-Swahili in a debased form is also spoken as a trading language and is used by the Police. The tribes occupying the North of the Protectorate are closely related to various tribes in the South of the Sudan. They speak a series of widely differing languages, now distinguished as belonging to the Sudanian, Nilotic and Nilohamitic clusters.

Development.—A five-year development plan involving the expenditure of approximately £34,000,000, was completed in 1960.

A dam at the Owen Falls on the Nile, near Jinja, provides hydro-electric power for industrial development. An eighth generator was installed in 1959, bringing the generating capacity up to 120,000 kW. The potential generating capacity of the dam is 150,000 kW. Power is now available over a wide area.

Mineral resources are mainly concentrated in two widely separated areas. In the west on the slopes of the Ruwenzori Mountains are found limestone, copper, cobalt and salt whilst around Tororo in the east the Sukulu mineral complex includes limestone, magnetite, apatite (phosphate), and pyrochlore (niobium).

In 1952, the Uganda Development Corporation Limited was established with a capital of £5,000,000 now increased to £8,000,000, of which £6,400,000 has been issued. Its object is to promote and assist the further expansion of the economy of the Protectorate by the establishment of enterprises with the co-operation of private capital wherever possible. The Corporation's Technical Development Division also undertakes research into technical aspects of industrial development and its services are available not only to its own associated and subsidiary companies but to industry generally. Developments which the Uganda Development Corporation has sponsored in participation with private enterprise include the mining and production of copper and cobalt from Kilembe, in the Ruwenzori Range, plans for the exploitation of the apatite and pyrochlore deposits at Tororo, and

the manufacture of textiles at Jinja from locally grown cotton.

A subsidiary of the Corporation, the Uganda Cement Industry Limited, at Tororo, can produce sufficient cement to meet all Uganda's requirements with a surplus for export. The Corporation is also concerned through subsidiaries with fish marketing, building, hotel development, cattle ranching and tea growing.

Education.—Separate schools are provided for members of the African, Asian and European communities, though since 1957 an effort has been made to extend multi-racial schools. The majority of African schools are managed by voluntary agencies, especially by Mission Societies. Substantial grants are provided by Government towards teachers' salaries, boarding and equipment, and there are about 354,500 children in grant-aided primary schools and about 21,000 in post-primary institutions, including training colleges and technical schools. There are 20,180 in Government and grant-aided Asian schools. Over 1,200 European children attend Government and grant-aided schools in the Protectorate, but there are no secondary schools in Uganda for European children and the majority of them attend secondary schools in Kenya or the United Kingdom. Total expenditure by the Protectorate Government in 1959-60 was £5,008,903. Makerere College, the University College of East Africa, is an autonomous inter-territorial foundation. It was granted special relationship with London University in 1949, and London external degrees were awarded for the first time at the end of 1953. In 1959 there were 881 students attending the College, of whom 304 (37 of them women) came from Uganda.

Communications.—The main line of the East African Railways in Kenya and Uganda extends from Mombasa, *via* Nairobi, Tororo, Jinja and Kampala to Kasere near the Congolese Republic border. There are branches from Tororo to Soroti, from Mbulamuti to Namasagali on Lake Kyoga, and from Kampala to Port Bell on Lake Victoria. The Railway Administration maintains a regular steamer service on Lake Kyoga between Namasagali and Masindi Port; and on Lake Victoria between Port Bell, Entebbe, Kisumu and Tanganyika Ports. A service is maintained on Lake Albert and the Nile between Butiaba and Nimule (connected by motor road with luba in the Sudan) and between Butiaba and the Congolese Republic port of Kasenyi. A road transport service operates between Masindi Port and Butiaba, and a freight service is thus provided by the Railway Administration from Mombasa to the Sudan and the Congolese Republic. The Uganda Public Works Department maintains 2,964 miles of main roads, of which 520 miles are tarmac; the various African local governments between them maintain a further 8,300 miles of roads of variable standard. There is a joint East African Posts and Telecommunications Service which operates throughout Kenya, Uganda and Tanganyika. Entebbe has a first-class international airport, and is a principal stopping place on the main B.O.A.C. routes through East Africa. Other airlines operating regularly through Entebbe include Alitalia, Sabena, Central African Airways and E.A.A.C. and British United Airways. It is also a stopping point on many charter flights. There are landing grounds at Jinja, Tororo, Masindi, Gulu, Soroti, Arua, Lira, Mbarara, Moroto, Murchison Falls, Kisenyi (on Lake George) and Kasere. There are hotels at Entebbe, Kampala, Jinja, Tororo, Mbale, Kasere, Masindi, Fort Portal, Kabale, Mbarara, Gulu and Masaka.

Production.—Agricultural production is largely in the hands of Africans, the most important

crops being cotton, coffee, tobacco, maize and groundnuts. Sugar, coffee and tea are the main crops on non-African estates. The potential mineral wealth is considerable, tin ore, wolfram and copper being won in the Western Province.

FINANCE

A. Revenue Budget:

	1958-59	1959-60
Revenue.....	£20,248,397	£20,642,120
Expenditure (excluding loans)...	20,285,751	19,611,539

B. Capital Budget:

Revenue.....	3,857,201	1,294,931
Expenditure.....	5,398,073	5,284,421

TRADE

	1959	1960
Total imports.....	£25,534,133	£26,030,950
Total exports.....	42,091,433	41,588,430
Imports from U.K.....	4,972,910	4,883,382
Exports to U.K.....	5,892,176	5,329,337

The Customs Services of Uganda, Kenya and Tanganyika are administered jointly by the Customs and Excise Department of the East Africa High Commission. The country's export trade is mainly in raw cotton, coffee, oil seed cake, tea, hides and skins and groundnuts. The chief imports are cotton and rayon fabrics, machinery and transport equipment, base metals and metal manufactures. The trade is chiefly with Great Britain, India, Japan and West Germany.

GOVERNMENT

The Uganda Protectorate is administered under the Colonial Office, by a Governor who is assisted by a Council of Ministers and a Legislature which comprises a Speaker, the 3 *ex officio* members, 82 members elected in country-wide elections by voters on a common roll and 9 specially elected members. The elections held at the end of March, 1961, returned the Democratic Party with a slight overall majority. A further 7 members have been nominated by the Governor bringing the total to 101. In 1955 a ministerial system was introduced. Under the present constitution there are 3 *ex officio* Ministers (the Chief Secretary, the Minister for Legal Affairs and the Minister of Finance). The remaining 10 Ministers are drawn from the elected members. This constitution will be for an interim period only.

THE WEST INDIES

Trade Enquiry Office in London, Trade Commissioner for the British West Indies, British Guiana and British Honduras, 6-10 Bruton Street, W.1.

The West Indies are a number of islands and islets, some of them mere rocks, situated between 10° to 27° North and 59° 30' to 85° West. The whole archipelago extends in a curve from the Florida Channel (North America) to within 7 miles of the coast of Venezuela (South America), and is divided into three main groups: I. GREATER ANTILLES, which contain the largest islands, Cuba (44,000 sq. miles) and Hispaniola (Haiti and the Dominican Republic) (30,000 sq. miles), Jamaica and Puerto Rico; II. BAHAMAS, which are entirely British. III. LESSER ANTILLES, which are divided among the United Kingdom, France, Netherlands, the United States and Venezuela; the British colonies in the Lesser Antilles are Barbados, Leeward and Windward Islands and Trinidad and Tobago. The total area of the archipelago is nearly 100,000 square miles, of which 72,000 square miles are independent, 12,300 British, 3,800 United States, 1,350 French, 430 Netherlands, and 90 Venezuelan.

The West India Islands that lie nearest the East have been called the *Windward Islands*; the others the *Leeward Islands*, on account of the winds blowing generally from the eastern point in those quarters.

CARIBBEAN ORGANIZATION

A new organization for economic and social co-operation in the Caribbean area, to replace the Caribbean Commission, was devised by agreement between the United Kingdom, France, the Netherlands and the United States in June, 1960. Membership of the new organization, which was intended to start operations in 1961 from San Juan, Puerto Rico, is open to France for French Guiana, Guadeloupe and Martinique; the Netherlands Antilles and Surinam; the Bahamas, British Guiana, British Honduras, British Virgin Islands, The West Indies; the Commonwealth of Puerto Rico and the Virgin Islands of U.S.A.

FEDERATION OF THE WEST INDIES

The Federation of the West Indies was set up on January 3, 1958, by Order in Council as provided for in the British Caribbean (Federation) Act, 1956, and consists of ten colonies with dependencies.

Area and Population.—The Federation has an area of 8,028 square miles and an estimated total population (1960 Census, preliminary figures) of 3,117,300.

TERRITORIES	Area	Population
	sq. miles	
Antigua	171	54,354
Barbados	166	232,085
Dominica	305	59,479
Grenada	133	88,617
Jamaica*	4,706	1,606,546
Montserrat	32	12,157
St. Kitts-Nevis-Anguilla	152	56,644
St. Lucia	233	86,194
St. Vincent	150	80,005
Trinidad and Tobago	1,980	825,730
Turks and Caicos Islands	166	5,716

* In a referendum held on Sept. 19, 1961, Jamaica voted to leave the Federation.

Government.—The Federal Legislature consists of a Senate and a House of Representatives. The executive authority in the Federation is exercised on behalf of Her Majesty by the Governor-General. Legislation by Order in Council may be enacted for the Federation in the United Kingdom on matters relating to defence, foreign relations or the maintenance of financial stability. As to other internal matters, division of legislative powers between the Federal and Territorial Legislatures is defined in two Legislative Lists, the Exclusive and the Concurrent Legislative Lists. The Federal Government may legislate on matters in either list; Territorial Legislatures have power to make laws for the territory on any subject included in the Concurrent List. In the event of inconsistency between federal and territorial law, the federal law prevails. No federal law is applicable to the Cayman Islands or Turks and Caicos Islands except where explicitly stated.

Governor-General, The Lord Hailes, P.C., G.B.E.

The Senate.—The Governor-General appoints a Senate of 19 members on a basis of 2 members from each Territory except Montserrat (1 member). Senators may not simultaneously be members of the House of Representatives or of the Legislative or Executive Council of a Territory. Bills, other than money bills, may be introduced in the Senate which has a term of 5 years. A quorum of 8 members is required.

President of the Senate, A. S. Cato (Barbados).

The House of Representatives.—On March 25, 1958, elections were held in the Federation for the first House of Representatives. The House consists of 45 members elected for a term not exceeding 5 years: from Jamaica, 17; Trinidad and Tobago, 10; other territories, 2 each, except Montserrat (1). An alternate member is elected for Montserrat who does not sit unless the member is absent or the seat vacant. Principal parties contesting the elections were the *Democratic Labour Party*, which won 25 seats, and the *Democratic Labour Party* (anti-socialist), 19 seats, the remaining seat being won by the *Barbados National Party*. 26 per cent. of the electorate of 1,500,000 voted. The quorum of the House is 17, of which 4 members must be elected in different territories.

Cabinet.—The Cabinet consists of the Prime Minister and other Ministers, of whom at least two must be Senators. The Cabinet is the principal instrument of policy for the Federation and advises the Governor-General in the exercise of his functions. Ministers are appointed by the Governor-General on the advice of the Prime Minister. The constitution provides for three persons holding office in the public service of the Federation to be nominated by the Governor-General to attend any meetings of the Cabinet and to take part in discussions at such meetings.

CABINET

Prime Minister, Sir Grantley Herbert Adams, C.M.G., Q.C.

Minister of Finance, R. L. Bradshaw (*St. Kitts*).

Trade and Industries, C. D. La Corbiniere (*St. Lucia*).

Natural Resources, F. B. Ricketts (*Jamaica*).

Communications and Works, W. A. Rose (*Trinidad*).

Social Affairs, Mrs. P. Allrey (*Dominica*).

Ministers without Portfolio, V. B. Vaughan (*Barbados*); N. H. Richards (*Antigua*).

Senators, A. G. Byfield (*Jamaica*); J. L. Charles (*St. Lucia*); J. W. Liburd (*Nevis*).

Judicature.—The Constitution provides for a Federal Supreme Court with jurisdiction *inter alia* in proceedings between the Federation and a territory, or between one territory and another; and for the appointment by the Governor-General of a Chief Justice and three Federal Justices. Responsibility for the initiation and conduct of criminal proceedings is vested in the Attorney-General of the Federation.

Chief Justice, Sir Stanley Gomes.

Federal Justices, C. V. Archer; C. Wylie, M.B.E., E.R.D.; A. M. Lewis; J. F. Marnan, M.B.E.

Finance.—In each calendar year 1958–1962 the Federal Government will derive its revenue from a mandatory levy on the territorial governments, provided that the total amount levied in a year does not exceed \$B.W.I. 9,120,000. Each territory is required to contribute proportionately.

CAPITAL.— Ψ Port of Spain, Trinidad (pop. 91,300). **FLAG.**—"Sun and Seas": white wavy lines on a background of Caribbean blue with an orange sun in the centre.

ANTIGUA

Antigua lies in $17^{\circ} 6' N.$ lat. and $61^{\circ} 45' W.$ long., and is nearly 108 square miles in area with a coastline of about 70 miles. Antigua was first settled by the English in 1632, and was granted to Lord Willoughby by Charles II. It is much less hilly and wooded than the other Leeward Islands, and is largely given up to the cultivation of sugar, for which one central sugar factory has been erected. Cotton is now planted on a large scale and the island also exports molasses, tomatoes and rum. The population, with Barbuda, is estimated at 57,000.

Barbados \$=4s. 2d.

Net tonnage of merchant shipping entered and cleared in 1958, 1,933,361 tons (906,616 tons British).

GOVERNMENT

Barbados has always remained in the possession of Great Britain, by which it was settled in 1627. The Crown has a veto on legislation. The Legislature consists of the Governor, a Legislative Council of 15 members appointed by the Sovereign, and a House of Assembly of 24 members elected every five years by adult suffrage.

A ministerial system of Government was introduced in 1954 and a cabinet system in Jan. 1958. There are a Premier and five other Ministers, responsible for the executive functions of Government except defence and security, personnel, establishment and external affairs.

Governor, Sir John Montague Stow, K.C.M.G. (1959) (+ duty allowance \$4,800) \$14,400

The CAPITAL and port is Ψ Bridgetown (estimated pop., 18,850), on the shores of an open roadstead (Carlisle Bay); Ψ Speightstown (pop. 2,600).

JAMAICA,

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within $17^{\circ} 43'$ — $18^{\circ} 32'$ North lat. and $76^{\circ} 11'$ — $78^{\circ} 21'$ W. long

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the Treaty of Madrid.

Area and Population.—It is the largest island of the Federation of the West Indies, being 146 miles in length and 51 in extreme breadth, containing an area of 4,411 square miles (with the Turks and Caicos Islands and the Cayman Islands 4,680 sq. miles). The island is divided into 3 counties (Surrey, Middlesex and Cornwall) and 14 parishes. The preliminary figures of the census taken in April, 1960, showed a total population of 1,606,546.

The climate attracts many winter visitors, mainly from U.S.A.

Physical Features.—From the sea-level on all sides of Jamaica a series of ridges gradually ascends towards the central ranges, dividing the large rivers, and attaining, in the culminating Blue Mountain Peak, in the eastern part of the island, an elevation of 7,402 feet. From these mountains at least 70 streams descend to the north and south shores, but none is navigable except the Black River, and that only for small craft.

Communications.—There are several excellent harbours, and the island is intersected by good roads. There are 249 miles of railway open. Telegraph stations and post offices are established in every town and in very many villages. The Palisadoes Airport at Kingston (now capable of handling the largest civil jet aircraft) is used by British West Indian Airways Ltd., British Overseas Airways Corporation, Pan-American Airways, K.L.M., Trans-Canada Air Lines, Avianca, RANSA and Aerovias Panama Airways, which provide air communications with Europe, North, Central and South America and the Caribbean Islands. The Montego Bay Airport is also used by many airlines. A number of non-scheduled airlines operate through the island for non-traffic purposes in accordance with the provisions of International Air Services Transit Agreement.

Production and Industry.—Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world, and the coffee raised in certain districts of the Blue Mountains is of fine quality and fetches a high price. There is an extensive trade in fruits, chiefly bananas, with the U.K. Citrus (and juices), cocoa and pimento are important export crops. Jamaica has developed a breed of dairy cattle known as the Jamaica Hope which is being exported to other tropical countries on an increasing scale. Good beef cattle are also

raised. Jamaica is now the largest producer of bauxite in the world. The bauxite deposits are worked by one Canadian and two American companies; the Canadian company processes bauxite into alumina. In 1959 the production and export of kiln-dried ore was 4,878,703 long tons (4,197,117 tons on dry basis). In addition, 1,597,236 tons of bauxite (dry basis) were converted into alumina. Alumina exports totalled 665,361 tons.

Gypsum is also mined, production for 1959 being 385,567 tons. Cement is manufactured locally, the output of the factory being 193,600 tons in 1959.

There is a textile mill and local factories also manufacture garments, knitted fabrics, shoes, paints, corrugated cardboard containers, small plastic articles, drugs, blankets, aluminium furniture and hollowware, gin, corn meal, soap, condensed milk, beer, baseballs, typewriters, radio sets, brake linings and brake shoes and electric light fittings.

GOVERNMENT

With the coming into effect of the Jamaica (Constitution) Order in Council, 1959, on July 4, 1959, full internal self-government within the West Indies Federation was attained.

The House of Representatives, whose normal term is five years, has become a 45-seat chamber. The Premier is appointed by the Governor. The Cabinet is appointed by the Governor on the recommendation of the Premier and is collectively responsible to the Legislature, the House of Representatives and the Legislative Council. It consists of 12 ministers, including not fewer than 2 or more than 3 from the Legislative Council. Official members are excluded from the Legislative Council. The Council consists of not fewer than 20 or more than 21 members, of whom 2 or 3 are appointed on the advice of the Premier and are available for appointment as Ministers without Portfolio, while the others are appointed by the Governor after consultation with the different political parties. The Legislative Council has no power to delay money bills for longer than one month or other bills for longer than seven months against the wishes of the House of Representatives.

The Governor has no reserved powers save in matters which appear to him to affect the Royal Prerogative, international relations or the constitution itself. Her Majesty retains the power to disallow any law which adversely affects the interests of stockholders in such Jamaican Government stock as, at the request of the Government of Jamaica, is treated as trustee stock in the United Kingdom. In civil service matters, the Governor is required to act on the recommendation of three Commissions—the Judicial Service, Public Service

and Police Service Commissions—save in cases of appeals in disciplinary matters, when he acts on the advice of the Privy Council. The Chief Justice, however, is appointed by the Governor after consultation with the Premier and special procedure governs the removal of a judge of the Supreme Court. Of the Privy Council's six members, four may be public officers.

Kingston is distant from London 4,000 miles; transit, 12 days.

THE CAYMAN ISLANDS

The Cayman Islands, forming a dependency of Jamaica, between $79^{\circ} 44'$ and $81^{\circ} 26'$ W. and $19^{\circ} 15'$ and $19^{\circ} 46'$ N., consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 100 square miles. Population (estimated Dec. 31, 1959), 8,803. The constitution provides for an Administrator, Legislative Assembly and an Executive Council. The Legislative Assembly consists of the Administrator, not less than two nor more than three nominated members, not less than two nor more than three official members and 12 elected members. The Executive Council consists of the Administrator, when the Governor is presiding but not otherwise, two official members appointed by the Governor from among the official members of the Assembly, one nominated member appointed by the Governor from among the nominated members of the Assembly and two elected members, elected by the non-official members of the Assembly from among the elected members of the Assembly. The normal life of the Assembly is three years.

The Governor of Jamaica has a supervisory power over the government of the islands and his assent to the Bills of the Legislature is necessary. Laws passed by the Legislature of Jamaica or by the Federal legislature which are in express terms made applicable to the Cayman Islands have effect there. The Supreme Court of Jamaica has power to hear and determine appeals from the Grand Court of the islands, except in certain matters which lie exclusively within the province of the Federal Supreme Court of the West Indies, or those matters in which the laws of the islands provide that the decision of the Grand Court of the islands shall be final.

The principal town is Ψ George Town, in Grand Cayman, population (1943) 1,462.

TURKS AND CAICOS ISLANDS

These West India islands geographically form a sort of annexe of the Bahamas group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from which they are distant about 450 miles. They have an area of about 166 square miles, and a population (1960 census, preliminary figures) of 5,716, of which the principal island, Grand Turk, contains 2,139. Ψ Grand Turk is an important cable station. The islands are celebrated for producing some of the finest salt in the world. Other exports are sisal, crawfish and conches. A considerable number of men are employed overseas in the Bahamas. There is a U.S. Air Force base and a Naval facility at Grand Turk, and a government-owned airstrip at South Caicos, at present used mainly for emergency purposes.

The Constitution provides for an Administrator, a Legislative Assembly and an Executive Council. The Legislative Assembly consists of the Administrator, not less than two nor more than three official members, not less than two nor more than three nominated members and nine elected members. The Executive Council consists of the Administrator, when the Governor is presiding but not otherwise, two official members appointed by the Governor from among the official members of the Assembly, one nominated member appointed by the Governor from among the nominated members of the Assembly and two elected members, elected by the non-official members of the Assembly from among the elected members of the Assembly. The normal life of the Assembly is three years.

The Governor of Jamaica is also the Governor of the islands. He has a supervisory power over the

government of the Turks and Caicos Islands and his assent to the Bills of the Legislature is necessary. Laws passed by the Legislature of Jamaica or by the Federal legislature and made applicable to the Turks and Caicos Islands in express terms have effect there. The Supreme Court of Jamaica has been constituted a Court of Appeal from the Supreme Court of the Islands. There are, however, certain matters of appeal which lie exclusively within the province of the Federal Supreme Court of the West Indies, and some in which the laws of the islands provide that the decision of the Supreme Court of the islands shall be final.

Administrator, His Hon. Geoffrey Colin Guy, M.B.E. (+ duty allowance, £350) £1,700
Assistant Administrator, J. S. Evans, (+ overseas allowance, £150) 1,200

THE LEEWARD ISLANDS

The post of Governor of the Leeward Islands was abolished on Jan. 1, 1960, and the Leeward Islands as a political unit ceased to exist.

MONSTERRAT

is situated in 16° 45' N. lat. and 61° 15' W. long., 27 miles S.W. of Antigua. It is about 11 miles in length and 7 in breadth, comprising an area of 32½ square miles, population (1960 census), 12,000. Discovered by Columbus in 1493, it was settled by Irishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1783. It is justly considered one of the most healthy and beautiful of the Antilles; it contains three active *soufrières* and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island is mountainous, the rest capable of cultivation. The chief exports are sea island cotton, tomatoes, carrots, onions, limes and lime products, bananas and livestock.

Finance and Trade

ST. KITTS-NEVIS WITH ANGUILLA

The islands of St. Kitts, Nevis, and Anguilla are united to form one Territory, and taken together they have a population (1960) of 57,472, and a total area of about 153 square miles. The climate is decidedly healthy for the tropics, the temperature being from 66° to 88°.

St. Kitts (population 1960, 38,624), the principal island, was the first possession of the British West Indies to be colonized (1623); it is situated in lat. 17° 18' N. and long. 62° 48' W., and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is

one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green sugar estates sweeping up all round the coast from the sea towards the central range, which rises to a height of 3,792 feet (Mount Misery). Cotton is also grown to a considerable extent. The capital, Ψ Basseterre, is a port of registry.

Nevis (population 1960, 12,916) is separated from St. Kitts by a strait 3 miles wide and has an area of 50 sq. miles. Cotton is exported and coconuts are now processed for the oil-extraction plant. The raising of livestock and cultivation of vegetables are also important features of the island's economy. Its greatest elevation is 3,596 feet. The chief town, Ψ Charlestown, is a port of entry.

Anguilla (population 1960, 5,932) is about 60 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. There are no hills. Salt is the principal product, and small stock are raised.

Finance and Trade

	1958	1959
Public revenue	£1,185,586	£1,147,625
Expenditure	1,183,948	1,188,197

Imports	2,368,282	2,519,274
Exports	1,964,186	2,001,166

Government

The Administrator normally acts in accordance with the advice of the Executive Council in the exercise of the executive authority of the Territory. The Executive Council consists of a Chief Minister, three other ministers and one other member, a nominated member from the Legislature, and one *ex officio* member (the Attorney-General). The Legislative Council consists of two official members, three nominated members and eight elected members. Since January, 1960, the four elected members in the Executive Council have held the portfolios of Chief Minister, Minister of Social Services, Agriculture and Labour and Communications and Works respectively.

TRINIDAD AND TOBAGO

Trinidad, the second largest and most southerly of the West Indian Islands, lies close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. The island is situated between 10° 2'—10° 50' N. lat. and 60° 55'—61° 56' W. long., and is about 50 miles in length by 37 in breadth, with an area of 1,864 square miles, and a population estimated (1960), at 825,700 (including Tobago). The racial groups at the 1946 census were: African 47 per cent., East Indian 35 per cent., Mixed or Coloured 14 per cent., European 3 per cent., Chinese 1 per cent. The island was discovered by Columbus in 1498, was colonized in 1532 by the Spaniards, capitulated to the British under Abercromby in 1797, and was ceded to Britain under the Treaty of Amiens (March 25, 1802). Two mountain systems, the Northern and Southern Ranges, stretch across

almost its entire width and a third, the Central Range, lies somewhat diagonally across its middle portion; otherwise the island is mostly flat. The highest peaks are in the Northern Range (Aripo 3,085 ft., El Tucuche 3,072 ft.). The climate is tropical with temperatures ranging from 70° to 90°F. and a rainfall ranging from 100 inches in the north east to 50 inches in the west. There is a well-marked dry season from January to May and a wet season from June to December. The nights are invariably cool. The main tourist season is from December to April.

Oil is the principal export. A remarkable phenomenon is the asphalt lake, 114 acres in extent, near the village of La Brea, from which in 1960 154,296 tons of natural asphalt were removed. The soil of Trinidad is rich and productive, the most important products being sugar, molasses, rum, cocoa, coconuts and coconut products, citrus and coffee. Agricultural exports totalled \$54,776,083 in 1960.

The system of education is being reformed to co-ordinate more closely the interlocking levels—primary, post-primary/secondary and higher. The system will provide for education of the pupils from 5 to 12 in primary schools—439 at present—and from 12 plus to 18 in a present total of 27 Government and assisted secondary schools—grammar, modern and technical—with a further 4 under construction. There are also about 25 recognized private secondary schools. Figures for 1960 of primary enrolment amount to 180,570, with an average attendance of 155,301. The Government Polytechnic Institute was established in 1959 and has an enrolment of about 1,000.

There are 109 miles of public railway and the total mileage of main and local roads maintained during 1958 was 2,510. There are 195 post offices and postal agencies, 56 of which transact savings bank and money order business. There is an internal telegraph system and two local broadcasting stations.

Trinidad is well served by steamship lines and there are deep water wharf facilities at Port of Spain. Eleven international scheduled airlines operate to and through Trinidad (Piarco), which acts as a focal point for air traffic between the Americas. There were 17,645 movements of aircraft in 1960. A domestic air service between Trinidad and Tobago is operated by B.W.I.A. Flights in 1960 averaged three per day.

The chief town and port of entry, Port of Spain (pop. 91,300), is one of the finest towns in the West Indies, with sewerage, electric lighting, omnibus and telephone services. Other towns of importance are Port San Fernando (pop. 42,100), about 33 miles south of the capital, and Arima (pop. 11,050).

Tobago lies between 11° 8' and 11° 21' N. lat. and between 60° 30' and 60° 50' W. long., about 75 miles south-east of Grenada, 19 miles north-east of Trinidad, and 120 miles S.W. of Barbados. It was ceded to the British Crown in 1814 and amalgamated with Trinidad in 1888. The island

is 26 miles long, and 7½ broad, and has an area of 116 square miles, with a population estimated (1960) at 32,965. It is one of the healthiest of the West Indies and a popular tourist resort. The main town is Scarborough.

Other Islands.—Corozal Point and Icosos Point, the N.W. and S.W. extremities of Trinidad, enclose the Gulf of Paria, and west of Corozal Point lie several islands, of which Chacachacare, Huevos, Monos and Gaspar Grande are the most important. On Chacachacare is a leper settlement, the Medical Superintendent of which appeals for Sunday and weekly editions of British newspapers.

GOVERNMENT

The Territory is administered in accordance with the provisions of the Trinidad and Tobago (Constitution) Orders in Council, 1950 to 1959, which provide for Cabinet and Legislative Council, on which there are unofficial elected majorities. The Cabinet, which is the chief instrument of policy, consists of a Premier as chairman, 8 other Ministers and 2 *ex officio* members. The Legislative Council consists of a speaker who presides, 2 *ex officio* members, 5 nominated members and 24 elected members.

THE WINDWARD ISLANDS

The Windward Islands consist of the four colonies of Grenada, St. Vincent, St. Lucia and Dominica with their dependencies; the Grenadines being divided between Grenada and St. Vincent. The total area is 821 square miles, with a population estimated (1958) at 328,625. There is an Administrator in each of the four islands and an elected majority in each of the four Legislative Councils. The ministerial form of government was introduced in 1956.

GRENADA AND THE GRENADINES

Grenada is situated between the parallels of 12° 13'–11° 58' N. lat. and 61° 20'–61° 35' W. long., and is about 21 miles in length and 12 miles in

breadth; it is about 96 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 133 square miles: estimated population (including some of the Grenadines), 88,608 (1960). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonized by the French, and was ceded to Great Britain by the Treaty of Versailles in 1783.

The soil is very fertile, and cocoa, spices, sugar cane, cotton, coconuts, limes and fruit are grown. The imports chiefly comprise dry goods, wheat flour, dried fish, bread-stuffs, hardware, etc.

ψ St. George's (population approximately 7,305), on the south-west coast, is the chief town, and possesses a good harbour.

The Grenadines are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,402 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. 6,431.

ST. LUCIA,

the second largest and the most picturesque of the Windward group, situated in 13° 54' N. lat. and 60° 50' W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 24 miles S. of Martinique, is 27 miles in length, with an extreme breadth of 14 miles. It comprises an area of 238 square miles with an estimated population (1960) of 86,200. It possesses perhaps the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports are sugar, bananas, copra, coconuts, cocoa, edible oil, lime oil, fresh fruit and vegetables. The chief imports are flour, machinery, cotton-piece goods, sacks and bags.

ψ Castries, the capital (estimated population, 32,215) is recognized as being one of the finest ports in the West Indies on account of its reputation as a safe anchorage in the hurricane season. In 1960, 1,262 vessels with a total gross tonnage of 1,054,496 called at Castries.

ST. VINCENT,

an island about 95 miles west of Barbados, situate in 13° 10' N. lat. and 60° 57' W. long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (1960) of 80,000. In 1846, a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the three other islands of the group. In 1783 it was secured to Great Britain.

The chief products are bananas, arrowroot, cotton, copra, coconuts, rum, sugar, cassava, cocoa ground provisions, and spices. Its chief imports are foodstuffs (including canned and pickled meat, salted and pickled fish, butter, rice and flour), cotton and woollen piece goods, hardware, lumber, iron and steel manufactures, cement and fertilizers.

There were 54 primary schools with 20,937 pupils in 1960, and 2 Government secondary schools with an attendance of 465. In addition, there are 2 grant-aided secondary schools with an attendance of 440.

DOMINICA

Dominica, the loftiest of the Lesser Antilles, was transferred from the Leeward to the Windward Group on Jan. 1, 1940. It is situated between 15° 20'—15° 45' N. lat. and 61° 13'—61° 30' W. long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad comprising an area of 305 sq. miles, or 195,200 acres, of which about 35,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish

and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85°. The climate is healthy, and during the winter months very pleasant. The exports consist almost entirely of agricultural produce, principally bananas, lime oil, lime juice, oranges, bay oil, cocoa, copra and vanilla. Population (census, 1960, 59,124). The principal towns are ΨRoseau, on the south-west coast, population (1960), 12,577 and Portsmouth, population (1960), 2,209.

Education.—There are 52 elementary schools, of which 49 are Government and 3 assisted. Of the 4 secondary schools, 3 receive a grant-in-aid and one is maintained by the Government.

ZANZIBAR

(The Zanzibar Protectorate)

Sultan, H. H. Seyyid Sir Abdulla bin Khalifa, K.B.E., C.M.G., born Feb. 12, 1910; succeeded Oct. 17, 1960.

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tunghi Bay and north to Warskeikh; but they are now confined to the islands of Zanzibar and Pemba, a coastal strip from Vanga to Ras Kiamboni (Dick's Head) and the islands of Lamu, Manda, Patta, and Siu.

Zanzibar has an area of 640 square miles with a population of 165,253 (1958 Census); Pemba (380 square miles) population, 133,858; total area, 1,020 square miles; total population, 299,111.

Production, etc.—The islands produce a large percentage of the world's supply of cloves and clove oil (cloves exported in 1960 were valued at £3,535,221 and clove oil at £120,993). They also export £274,484 of coconut oil, £310,391 of copra, and £136,459 of coconuts in 1960. Clove and coconut products constituted 97.32 per cent. of the Protectorate's total exports. Other products are chillies, coconut oil cake, sea shells, seaweed, frozen lobsters, forest products and lime. Rice and cassava are grown extensively for local consumption, but much of the staple foodstuffs is imported.

Education.—In 1960 there were 78 primary schools, out of which 63 were government schools, 10 grant-aided and 4 private. Eight secondary schools are open to all pupils from all communities. There are government training colleges for men and women primary teachers in Zanzibar. The total enrolment in all government and grant aided primary and secondary and assisted schools in November, 1960 was 21,075. The total expenditure from local revenue in 1960 was £386,968.

Communications.—There are 339 miles of road suitable for motor traffic in Zanzibar and 107 miles in Pemba. Radio telephone communication is available from Zanzibar to the three mainland territories. The town of ΨZanzibar, on the island of the same name, has a population of 45,284. It possesses a good anchorage, which provides facilities for shipping and trade generally.

A civil aerodrome is situated 5 miles south-east of the town, linked with Tanganyika and Kenya by charter and daily scheduled services. There is also a civil aerodrome in Pemba linking the island with Zanzibar, Kenya and Tanganyika by regular services with the East African Airways Corporation.

Ireland

See also Northern Ireland, pp. 687-690; Republic of Ireland, pp. 799-801.

Position and Extent.—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,408 sq. miles and its geographical position between 51° 26' and 55° 21' N. latitude and from 5° 25' to 10° 30' W. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizzen Head), is 302 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Annagh Head), is 174 miles. On the N. coast of *Achill Island* (Co. Mayo) are the highest cliffs in the British Islands, 2,000 feet sheer above the sea. Ireland is occupied for the greater part of its area by the *Central Plain*, with an elevation of 50 to 350 ft. above mean sea level, with isolated mountain ranges near the coastline. The principal mountains, with their highest points, are the *Sperrin Mountains* (Sawel 2,240 ft.) of County Tyrone; the *Mountains of Mourne* (Slieve Donard 2,796 ft.) of County Down, and the *Wicklow Mountains* (Lugnaquilla 3,039 ft.); the *Derryveagh Mountains* (Errigal 2,466 ft.) of County Donegal; the *Connemara Mountains* (Twelve Pins 2,695 ft.) of County Galway; *Macgillicuddy's Reeks* (Carrantuohill 3,414 ft., the highest point in Ireland); and the *Galtee Mountains* (3,018 ft.) of County Tipperary, and the *Knockmealdown* (2,609 ft.) and *Comeragh Mountains* (2,470 ft.) of County Waterford. The principal river of Ireland (and the longest in the British Isles) is the *Shannon* (240 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The *Slaney* flows into Wexford Harbour, the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Harbour, and the *Suir*, *Barrow* and *Nore*, to Waterford Harbour. As in Scotland, the principal hydrographic feature is the *Loughs*, of which Lough Neagh (150 sq. miles) in the north-east is the largest in Ireland and the British Isles, others being the Shannon Chain of Allen, Boderg, Forbes, Ree and Derg, and the Erne Chain of Gowna, Oughter, Lower Erne, and Erne; Melvin, Gill, Gara and Conn in the north-west; and Corrib and Mask (joined by a hidden channel) in the west. In County Kerry, to the east of Macgillicuddy's Reeks, are the famous *Lakes of Killarney*. The climate of Ireland is more equable than that of Great Britain, the extreme range of temperature readings being from 2° F. to 90° F. (compared with -17° F. to 100° F. over Great Britain). The average annual rainfall varies from 27 inches at Dublin to more than 100 inches in the mountains of Connemara. The rainfall is also more uniform from year to year than in Great Britain.

Primitive Man.—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island; a grave containing a polished stone axehead assigned to 2,500 B.C. was found at Linkardstown, Co. Carlow, in 1944, and the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age a Celtic race of *Goidels* appear to have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the south-east, while *Picts* from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the *Scoti*, who afterwards established themselves in Scotland.

History.—According to Irish legends, the island of Ierne was settled by a Milesian race, who came from Scythia by way of Spain, and established the *Kingdom of Tara*, about 500 B.C. The supremacy of the *Arádi* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Oriel, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn M'Cool (Fingal) to connect Antrim with Scotland (Staffa).

Hibernia was visited by Roman merchants but never by Roman legions, and little is known of the history of the country until the invasions of *Northmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as *Findgaill* (White Strangers) and the Danes as *Dubgaill* (Black Strangers), names which survive in "Fingall," "MacDougall" and "MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (land of the Irish), the names of the Provinces being survivals of Norse dialect forms (*Ulaids-tír*, *Laignis-tír*, *Mumans-tír* and *Kunnak-tír*). The outstanding events in the encounters with the Northmen are the *Battle of Tara* (980), at which the Hy Neill

king Maelsechlainn II. defeated the Scandinavians of Dublin and the Hebrides under their king Amlaib Cuarán; and the *Battle of Clontarf* (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Brians of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 Dermot MacMurrough (Diarmait MacMurchada), the deposed king of Leinster, sought assistance in his struggle with Ruaidhri O'Connor (the high king of Ireland), and visited Henry II., the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom, and Dermot enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as *Strongbow*, who landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermot's daughter. In 1172 (Oct. 18) Henry II. himself landed in Ireland. He received homage from the Irish kings and established his capital at Dublin. The invaders subsequently conquered most of the island and a feudal government was created. In the 14th and 15th centuries, the Irish recovered most of their lands, while many Anglo-Irish lords became virtually independent, royal authority being confined to the "Pale," a small district round Dublin. Though under Henry VII., Sir Edward Poyning's, as Lord Deputy had passed at the *Parliament of Drogheda* (1494) the act later known as *Poyning's Law*, subordinating the Irish Legislature to the Crown, the Earls of Kildare retained effective power until, in 1534, Henry VIII. began the reconquest of Ireland. Parliament in 1541 recognized him as King of Ireland and by 1603 English authority was supreme.

Christianity.—Christianity did not become general until the advent of St. Patrick. St. Patrick was born in Britain about 389, and was taken to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organize the Christian religion throughout the island.

Republic of Ireland

Area and Population.—The Republic has a land area of 26,600 sq. miles, divided into the four Provinces of LEINSTER (Carlow, Dublin, Kildare, Kilkenny, Leix, Longford, Louth, Meath, Offaly, Westmeath, Wexford and Wicklow); MUNSTER (Clare, Cork, Kerry, Limerick, Tipperary and Waterford); CONNACHT (Galway, Leitrim, Mayo, Roscommon and Sligo); and part of ULSTER (Cavan, Donegal and Monaghan). Total population of the Republic at the Census held on April 9, 1961 (preliminary figures) was 2,834,000 (males 1,443,000; females 1,391,000), a density of 107 persons per sq. mile. Provisional figures showed 60,730 births, 15,497 marriages and 32,658 deaths in the year 1960.

THE PRESIDENT

Uachtaran na hÉireann (President), Éamon de Valera, born 1882, assumed office June 25, 1959.

MEMBERS OF THE GOVERNMENT

GOVERNMENT

The Constitution.—The Constitution approved by a plebiscite on July 1, 1937, came into operation on December 29, 1937.

The Constitution declares that Ireland is a sovereign independent democratic State and affirms the right of the Irish Nation to choose its own form of Government, to determine its relations with other nations, and to develop its life, political, economic and cultural, in accordance with its own genius and traditions. The national territory is declared to be the whole island of Ireland, its islands and the territorial seas. Pending the reintegration of the national territory, and without prejudice to the right of the Parliament and the Government established by the Constitution to exercise jurisdiction over the whole of the national territory, the laws enacted by that Parliament shall have the like area and extent of application as those of the Irish Free State, which did not include the six counties of Northern Ireland. The national flag is the tricolour of green, white and orange. The Irish language, being the national language, is the first official language. The English language is recognized as a second official language.

The President.—The President—*Uachtarán na hÉireann*—is elected by direct vote of the people for a period of seven years. A former or retiring President is eligible for a second term. The President summons and dissolves Dáil Éireann on the advice of the *Taoiseach* (Head of the Government). He signs and promulgates laws. The supreme command of the Defence Forces is vested in him, its exercise being regulated by law. He has the power of pardon. The President, in the exercise and performance of certain of his constitutional powers and functions, is aided and advised by a Council of State.

The Legislature.—The Parliament—*Oireachtas*—consists of the President and two Houses: a House of Representatives—*Dáil Éireann*—and a Senate—*Seanad Éireann*.

The *Dáil Éireann* is composed of 147 members elected by adult suffrage on a basis of proportional representation.

Seanad Éireann is composed of 60 members, of whom 11 are nominated by the *Taoiseach* and 49 are elected; three by the National University of Ireland, three by the University of Dublin, and 43 from panels or candidates, established on a vocational basis.

The Executive.—The executive authority is exercised by the Government subject to the Constitution. The Government is responsible to Dáil Éireann, meets and acts as a collective authority, and is collectively responsible for the Departments of State administered by the Ministers.

The *Taoiseach* is appointed by the President on the nomination of Dáil Éireann. The other members of the Government are appointed by the President on the nomination of the *Taoiseach* with the previous approval of Dáil Éireann. The *Taoiseach* appoints a member of the Government to be the *Tánaiste* who acts for all purposes in the place of the *Taoiseach* in the event of the death, permanent incapacitation, or temporary absence of the *Taoiseach*. The *Taoiseach*, the *Tánaiste* and the Minister for Finance must be members of Dáil Éireann. The other members of the Government must be members of Dáil Éireann or *Seanad Éireann*, but not more than two may be members of *Seanad Éireann*.

THE LEGISLATURE

The Legislature (*Oireachtas*) consists of the President and two Houses—a House of Representatives (*Dáil Éireann*) and a Senate (*Seanad Éireann*). Dáil Éireann is composed of 147 Members, elected on the system of Proportional Representation by means of the single transferable vote. All citizens who have reached the age of 21 years and are not disqualified by law have the right to vote. The same Dáil does not continue for a longer period than seven years, but a shorter period of five years has been fixed by existing legislation. The present (16th) Dáil was elected on March 5, 1957, and met on March 20, 1957.

Party Strength (Dáil Éireann)

	1959	1960	1961

*** Members of Dáil Éireann are paid an allowance of £1,000 per annum (and members of Seanad Éireann £750) and are allowed free travelling facilities between Dublin and their constituencies.

Parliamentary Secretaries.

Parliamentary Secretary to the Taoiseach and to the Minister for Defence, Donnchadh Ó Briain.

Do. to Minister for Social Welfare, Micheál S. Ó. Cinnéide (Michael J. Kennedy).

Do. to the Minister for Finance, Seosamh Ó Braonáin (Joseph Brennan).

Do. to the Minister for Justice, Cathal Ó hEochaidh (Charles Haughey).

Attorney-General, Aindrias Ó Caoimh, A.S.

Secretary to the Government, Níoclás Ó Nualláin, Ph.D. (Nicholas G. Nolan).

Assistant Secretary to the Government, Tadhg Ó Cearbhaill (Tadhg O'Carroll).

United Kingdom Ambassador to the Republic of Ireland

H. E. Sir Ian MacLennan, K.C.M.G., 39 Merrion Square, Dublin.

Counsellor, G. E. Crombie, C.M.G.

First Secretary, A. H. Reed.

Military Attache, Brig. R. N. Thicknesse.

Trade Commissioner, G. L. Pearson, M.C.

Diplomatic Representatives Abroad

The Holy See: L. T. McCauley (Ambassador).

Argentina: W. B. Butler (Minister).

Australia: S. Kennan (Chargé d'Affaires).

Austria: T. J. Horan (Minister).

Belgium: F. Biggar (Ambassador).

Canada: W. P. Fay (Ambassador).

France: D. R. McDonald (Ambassador).

Federal Republic of Germany: W. Warnock (Ambassador).

Great Britain: H. J. McCann (Ambassador), 17 Grosvenor Place, London, S.W. 1.

Italy: T. V. Commins (Ambassador).

Netherlands: B. Gallagher (Ambassador).

Federation of Nigeria: A. O'Beirne (Chargé d'Affaires).

Norway: J. A. Belton (Minister).

Portugal: J. W. Lennon (Minister).

Spain: M. Rynne (Ambassador).

Sweden: J. A. Belton (Ambassador).

Switzerland: T. J. Horan (Minister).

U.S.A.: T. J. Kiernan (Ambassador).

THE JUDICIARY

The Judiciary consists of Courts of First Instance and a Court of Final Appeal called the Supreme Court—*Cúirt Uachtarach*. The Courts of First Instance include a High Court—*Ará-Chúirt*—invested with full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction, with a right of appeal as determined by law. The High Court alone has original jurisdiction to entertain the question of the validity of any law having regard to the provisions of the Constitution. The Supreme Court has appellate jurisdiction from all decisions of the High Court, subject to exceptions and regulations prescribed by law. No law may, however, be enacted excepting the question of the validity of any law from the appellate jurisdiction of the Supreme Court.

Chief Justice, Hon. Conor Maguire, £4,850

President of the High Court, Hon. Cahrl Davitt, 3,700

Judges, Supreme Court, Hon. Cecil Lavery; Hon. T. C. Kingsmill Moore; Hon. C. O'Daly; Hon. Kevin Haugh, each 3,700

Judges, High Court, Hon. F. G. O. Budd; Hon. R. McLoughlin; Hon. Thomas Teevan; Hon. George Murnaghan; Hon. Brian Walsh; Hon. Seán Kenny; Hon. Barra O'Brien (ex officio), each £3,250
Master of High Court, John O. Leary, S.C.

DEFENCE

Under the direction of the President, and subject to the provisions of the Defence Act, 1954, the military command of the Defence Forces is exercisable by the Government through the Minister for Defence. To aid and counsel the Minister for Defence on all matters in relation to the business of the Department of Defence on which he may consult it, there is a Council of Defence consisting of the Parliamentary Secretary to the Minister, the Secretary of the Department of Defence, the Chief of Staff, the Adjutant-General and the Quartermaster-General. Establishments provide at present for a Permanent Defence Force of approximately 13,000 all ranks, including the Air Corps and the Naval Service. The Defence Estimates for the year ending March 31, 1962, provide for approximately 25,500 all ranks of the Reserve Defence Force. Recruitment is on a voluntary basis. Minimum term of enlistment for the Army is three years in the Permanent Defence Force with, in most cases, nine years in the Reserve Defence Force. Suitable men may complete twenty-one years service in the Permanent Defence Force. For the Naval Service, enlistment is for six years in the Permanent Defence Force and six years in the Reserve Defence Force. The Naval Service comprises three corvettes and three tenders. The Defence Estimates for the year ending March 31, 1962, provide for an expenditure of £7,690,040.

FINANCE

	1960-61 (Actual)	1961-62 (Estimated)
Revenue.....	£138,839,000	£143,568,000
Expenditure.....	158,057,000	164,764,000

The expenditure figures include certain services of a capital nature regarded as proper to be met from borrowing. Issues for these services in 1960-61 amounted to £18,492,000 and for 1961-62 are estimated at £21,196,000.

The estimated Revenue for 1961-62 includes: Customs and Special Import Levy, £42,175,000; Excise, £31,505,000; Estate, etc., Duties, £2,955,000; Income Tax, Sur-tax and Super-tax, £28,650,000; Corporation Profits Tax, etc., £3,550,000; Motor Vehicle Duties, £6,650,000; Stamp Duties, £2,800,000; Post Office Services, £10,300,000.

The principal items of estimated Expenditure for 1961-62 are Debt Service, £30,622,000; Agriculture, land division, etc., £27,628,000; Army, £7,690,000; Police, £4,568,000; Education, £16,167,000; Social Insurance, £6,393,000; Social Assistance, £19,491,000; Health Services £9,077,000; Postal Services, £8,430,000; Superannuation, £6,411,000.

The Gross Debt on March 31, 1961, was £501,000,000 with Assets £271,000,000, leaving the net total of the debt at £230,000,000.

RELIGION

(Census of 1946)

Catholics.....	2,786,033
Protestant Episcopalians.....	124,829
Presbyterians.....	23,870
Methodists.....	8,355
Others.....	12,020

Total..... 2,955,107

EDUCATION

Primary Education is directed by the State (4,882 schools with an enrolment of 505,591, and average daily attendance 87.6 per cent.). Secondary Education is in private hands and is largely conducted by Religious Orders (526 recognized schools with 76,843 pupils 12-20 years of age). Vocational (Continuation and Technical) Education is conducted by 38 local Committees in 279 permanent schools (excluding 12 residential schools of domestic training and one day trades preparatory school) and a large number of temporary centres (26,322 whole-time day students and 65,965 other students). There are two Universities in Dublin, of which the National University has 3 constituent colleges (Dublin, Cork and Galway) with 566 Professors, etc., and 7,249 students; and Trinity College, Dublin with 216 Professors, etc., and 2,748 students in the academic year 1959-60. The estimated State expenditure on education in 1961-62, excluding administration and inspection, is Primary £10,323,446; Secondary £2,863,450; Vocational £1,663,860; Science and Art £248,680. The vote for Universities and Colleges for 1961-62 amounts to £1,070,130, while in addition grants of £216,534 are provided in respect of the Faculties of General Agricultural and Dairy Science.

PRODUCTION AND INDUSTRY

Agriculture and Live Stock.—In 1960 there were 1,267,738 acres under corn crops, 537,274 under root and green crops, 11,255 under fruit, and 1,980,126 under hay, a total of 3,655,393 acres. The principal produce in 1960 was: oats, 419,043 tons; wheat, 461,828 tons; barley, 434,998 tons; turnips, 2,158,226 tons; potatoes, 1,800,182 tons; sugar beet, 936,000 tons; and hay, 4,239,603 tons. The Live Stock included 4,740,217 cattle, 4,313,532 sheep, 950,749 pigs, and 223,749 horses.

Minerals.—1,400 persons were employed in the coal mines in 1959 and 231,000 tons of coal won.

Sea Fisheries.—5,868 persons were employed in the fisheries in 1960, the total value of all fish (excluding salmon) landed being £1,612,000.

COMMUNICATIONS

Railways.—There were (1960) 1,808 miles of railway of which 1,755 miles are of standard (5ft. 3 in.) gauge. 11,053,487 passengers and 2,510,382 tons of merchandise were conveyed. The gross receipts (1958) were £16,296,519* and the net loss £409,340.*

* Figures relate to the year ended March 31, 1959 for *Córas Iompair Éireann*, to the calendar year 1958 for other railways.

These figures include receipts from road transport services, canals, etc., operated by the railway companies.

Road Motor Services.—In 1960 road motor vehicles carried 302,368,650 passengers, the gross receipts being approximately £6,648,376.

Shipping.—In 1960 the number of ships with cargoes and in ballast entered at the various ports, Dublin, Cobh (Queenstown), Dún Laoghaire (Kingstown), Cork, Galway, Waterford, Rosslare, Limerick and Foynes, Dundalk, etc., was 9,522 of 9,798,679 tons, of which 1,655 (1,321,226 tons) were Republic of Ireland flag, and 4,787 (5,491,992 tons) British.

CIVIL AVIATION

Shannon Airport, 15 miles W. of Limerick, is on the main transatlantic air route. In 1960 the airport handled 416,290 passengers and 21,079 tons of cargo.

Dublin Airport, 6 miles N. of Dublin, serves the cross-channel and European services operated by the Irish national airline *Aer Lingus* and other airlines. During 1960 the airport handled 818,833 passengers and 16,321 tons of cargo.

Licensed private aerodromes include: Weston, 9 miles W. of Dublin; Dunmore East, 10 miles S.E. of Waterford; Coonagh, 2 miles W. of Limerick; Oranmore, 5 miles E. of Galway; Killarney Racecourse, 1 mile S. of Killarney; Farmers' Cross, 4 miles S.W. of Cork; Rosapenna Strand, 16 miles N. of Letterkenny.

PRINCIPAL ARTICLES

Imports (1960)

The principal groups were food £27,386,625; machinery and electrical goods £25,206,337; textiles (excluding clothing) £24,054,033; vehicles £21,479,897; oils, fats, resins and gums £20,088,599; chemicals, perfumery, dyes and colours £12,498,182; non-metallic mineral and quarry products £11,940,820; iron and steel £10,688,991; live animals £8,499,557; paper and cardboard £7,743,708; fertilizers £6,061,528.

Domestic Exports (1960)

Principally, live animals £44,754,186; food £43,832,551; textiles (excluding clothing) £10,568,002; drink £7,262,500.

CAPITAL

Dublin (*Baile Átha Cliath*) is a City and County Borough on the River Liffey at the head of Dublin Bay. In April, 1961, its population was 716,196. There are many notable public buildings in the City, among them the two Cathedrals of Christ Church and St. Patrick, the Bank of Ireland (formerly the House of Parliament) and Trinity College (the only constituent College of the University of Dublin). University College is a constituent college of the National University of Ireland. A large export trade of agricultural products passes through the city and there is a considerable brewing industry, while there is an increasing amount of light manufacturing.

Other cities and towns are Cork (pop. 80,011), Dún Laoghaire, formerly Kingstown (47,553), Limerick (50,886), Waterford (28,878), Galway (21,219), Dundalk (20,154), Drogheda (17,008), Sligo (12,947), Wexford (10,838), Bray (10,856), Kilkenny (10,607), Tralee (10,928), Clonmel (10,697) and Athlone (9,393).

ARMS OF IRELAND

Azure a harp or stringed argent.

FLAG

Equal vertical stripes of green, white and orange.

The United States of America

Divisions	Land Area, 1960 (sq. miles)	Population†	
		Census 1950	Census 1960*
Coterminous United States \$	3,548,924	150,697,361	179,323,175

Total	3,553,333	153,065,686	181,834,090

*Preliminary Figures.

\$Includes Alaska and Hawaii.

†Figures for military, &c. abroad and for small islands, are excluded.

The former Japanese Mandates in the Pacific (*Mariana, Caroline and Marshall Islands*) are a trust territory of the United Nations, administered by the U.S.A. The land area of these islands is 687 sq. miles and their population was estimated at 70,564 in 1958.

DENSITY OF POPULATION.—The following figures, based on preliminary figures of the 1960 census, were published on Aug. 1, 1960: The 50 States, 50 persons per sq. mile; the 48 coterminous States 57 persons per sq. mile; Hawaii only, 97 persons per sq. mile; Alaska only, 1 person to each 2½ sq. miles. The figure is that of population divided by number of square miles of land area.

REGISTERED BIRTHS AND DEATHS

Calendar Year	Live Births		Deaths	
	Number	Rate per 1,000	Number	Rate per 1,000
*1951	2,750,850	24.5	1,482,099	9.7
*1952	2,846,986	24.7	1,496,838	9.6

*1959	4,241,766	24.1	1,656,814	9.4
\$1960	4,247,000	23.6	1,702,000	9.5

* Births based on 50 per cent. sample. \$ Estimated. Includes data for Alaska.

Note.—Figures tabulated are for the United States, including (from 1959) Alaska and (from 1960) Hawaii. Deaths exclude fetal deaths. Birth and death rates are based on the population as estimated on July 1.

IMMIGRATION AND NATURALIZATION

From 1820 to 1960, 41,740,961 immigrants were admitted to the United States. Of those admitted in 1960, 26,643 were born in the United Kingdom; 31,768 in Germany; 1,970 in Austria; 7,133 in Scandinavia; 14,933 in Italy; 4,253 in

France; 7,257 in Hungary; 23,864 in Asia; 30,990 in Canada; and 32,684 in Mexico. The total number of immigrants admitted in 1960, was 265,398. 119,442 alien residents of the United States became naturalized citizens during that year.

MARRIAGE AND DIVORCE

Laws of marriage and of divorce are within the exclusive jurisdiction of each State. Each State legislature enacts its own laws prescribing rules and qualifications pertaining to marriage and its dissolutions.

Year	Marriages	Per 1,000 Pop.	Estimated Divorces	Per 1,000 Pop.
1951	1,595,000	10.4	381,000	2.5
1952	1,539,000	9.9	392,000	2.5
1953	1,546,000	9.8	390,000	2.5
1954	1,490,000	9.2	379,000	2.4
1955	1,531,000	9.3	377,000	2.3

The total number, including countries not specified, was 10,161,168 in 1950 compared with 11,419,138 in 1940. 1950 figures include a total of 180,024 from all Asian countries, 120,297 from countries in America other than Canada and Mexico and 86,375 from European countries not listed above.

PHYSIOGRAPHY

The conterminous States of the Republic occupy nearly all that portion of the North American Continent between the Atlantic and Pacific Oceans, in latitude 25° 07'–49° 23' North and longitude 66° 57'–124° 44' West, its northern boundary being Canada and the southern boundary Mexico. The separate State of Alaska reaches a latitude of 71° 32' N., at Point Barrow, a distance of 2,502 miles from the geographic centre of the United States.

Its coast-line has an estimated length of about 3,651 miles on the Atlantic, 1,872 miles on the Pacific, 2,908 miles on the Gulf of Mexico, and 2,470 miles on the Great Lakes. The principal river is the mighty Mississippi-Missouri-Red Rock, traversing the whole country from north to south, and having a course of 3,850 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Platte, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, James, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Alabama and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follow:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri-Red Rock. The chain of the Rocky Mountains separates the western portion of the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high tableland, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the partly marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Appalachian Highlands, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense prairies. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live oak, water-oak, magnolia, palmetto, tulip-tree, cypress, etc., still exist, the remnants of the forests which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilization. The Mississippi valley is eminently fertile. The mineral kingdom produces much ore of iron, copper, lead, zinc, and aluminium, the non-metallic minerals include immense quantities of coal, anthracite, petroleum, stone, cement, phosphate rock, and salt. Precious metals include gold and silver, mined chiefly in Colorado, California, Montana, Utah, and Idaho. The highest point is Mount McKinley (Alaska), 20,320 feet above sea level, and the lowest point of dry land is in Death Valley (Inyo, California), 282 feet below sea-level. The mean elevation of the United States is approximately 2,500 feet.

GOVERNMENT

The United States of America is a Federal Republic consisting of 50 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organization as Territories, and 30 were admitted after such organization), and of 1 organized Territory. Hawaii formally entered the Union as the 50th State on Aug. 21, 1959, from which date the flag of the United States has 13 stripes and 50 stars in 9 horizontal rows of six and five alternately.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to twenty-third Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1805, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 16, 1920, Aug. 26, 1920, Feb. 6, 1933, Dec. 5, 1933, Feb. 26, 1951 and March 29, 1961), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE

THE Executive power is vested in a President, who is elected every four years, and is eligible for reelection to one additional term. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet in their respective States on the first Monday after the second Wednesday in December following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the sixth day of January by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the highest on the list (not exceeding three) the House of Representatives elects a President, the votes being taken by States, the

representation from each State having one vote. There is also a Vice President, who, on the death of the President, becomes President for the remainder of the term. Under the XXth Amendment to the Constitution the terms of the President and Vice President end at noon on the 20th day of January of the year in which such terms would have ended if the Amendment had not been ratified, and the terms of their successors then begin. In case of the removal or death of both President and Vice President, a statute provides for the succession.

The President must be at least 35 years of age and a native citizen of the United States. He receives a taxable salary of \$100,000 with a taxable expense allowance of \$50,000 and a non-taxable travelling allowance of not exceeding \$40,000. Under the XXIIInd Amendment to the Constitution, the tenure of the Presidency is limited to two terms. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and has power, "by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the Senators present concur." The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT

President of the United States (January 20, 1961, to January 20, 1965), JOHN FITZGERALD KENNEDY, born May 29, 1917, sworn in as President (in succession to Dwight D. Eisenhower), January 20, 1961. Democrat. *Vice-President*, Lyndon Baines Johnson, of Texas, born Aug. 27, 1908, elected Nov. 8, 1960. Democrat.

THE CABINET

(Each \$25,000)

Secretary of State, Dean Rusk, of New York (born Feb. 9, 1909), appointed Jan. 21, 1961.

Secretary of Treasury, Douglas Dillon, of New Jersey (born Aug. 21, 1909), appointed Jan. 21, 1961.

Secretary of Defence, Robert S. McNamara, of Michigan (born June 9, 1916), appointed Jan. 21, 1961.

Attorney-General, Robert F. Kennedy, of Massachusetts (born Nov. 20, 1925), appointed Jan. 21, 1961.

Postmaster-General, J. Edward Day, of California (born Oct. 11, 1914), appointed Jan. 21, 1961.

Secretary of Interior, Stewart L. Udall, of Arizona (born Jan. 31, 1920), appointed Jan. 21, 1961.

Secretary of Agriculture, Orville L. Freeman, of Minnesota (born May 9, 1918), appointed Jan. 21, 1961.

Secretary of Commerce, Luther H. Hodges, of N. Carolina (born Mar. 8, 1898), appointed Jan. 21, 1961.

Secretary of Labour, Arthur J. Goldberg, of Illinois (born Aug. 8, 1908), appointed Jan. 21, 1961.

Secretary of Health, Education and Welfare, Abraham Ribicoff, of Connecticut (born Apr. 9, 1910), appointed Jan. 21, 1961.

THE CONGRESS

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a veto power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 301,164. The Senate consist of 100 members. The salary of a Senator is \$22,500 per annum, with mileage at 20 cents per mile each session. The House of Representatives consists of 437 Representatives, and a resident commissioner from Puerto Rico. The salary of a Representative is \$22,500 per annum with mileage as for Senators. By the XIXth Amendment, sex is no disqualification for the franchise. On July 1, 1950, there were 47,860,228 men and 49,556,137 women of voting age, excluding members of the armed forces overseas.

THE EIGHTY-SEVENTH CONGRESS

Noon of Jan. 3, 1961, to Noon of Jan. 3, 1963.

President of the Senate, Lyndon B. Johnson, Texas..... \$30,000

Speaker of the House of Representatives, Sam Rayburn, Tex..... \$30,000

Secretary of the Senate, Felton M. Johnston, Miss.

Clerk of the House of Representatives, Ralph R. Roberts, Ind.

Members of the 87th Congress were elected on Nov. 8, 1960.

The 87th Congress is constituted as follows:

Senate.—Democrats, 64; Republicans, 36. Total, 100.

House of Representatives.—Democrats, 263; Republicans, 174. Total 437.

CAPITAL OF THE U.S.

In 1790 Congress ratified the cession of 100 sq. miles by the States of Maryland and Virginia as a site for a Federal City to be the national capital of the United States. In 1791 it was decided to name the capital Washington and in 1793 the foundation-stone of the Capital building was laid. In 1800 the seat of government was removed to Washington, which was chartered as a city in 1802. In 1846 the Virginia portion was retroceded and the present area of the District of Columbia (with which the City of Washington is considered co-extensive) is 69,245 square miles, with a population at the Census of 1960 of 763,956.

The District of Columbia is ruled directly by the President and Congress through a Board of Commissioners appointed by the President.

The City of Washington, the Capital of the United States, is considered co-extensive with the District of Columbia. It is situated on the west central edge of Maryland, opposite the State of Virginia, on the left bank of the Potomac at its confluence with the Anacostia, 107 miles from Chesapeake Bay and 186 from the Atlantic Ocean.

LIBRARY OF CONGRESS

(National Library),

Capitol Hill, Washington, D.C.

The Library of Congress was established in 1800 and destroyed by fire in 1814. In 1815, Congress purchased Thomas Jefferson's library of some 6,000 volumes as the basis for a new collection, which was partially destroyed by fire in 1851. Since that date increased (1) by regular annual appropriations by Congress; (2) by deposits under the copyright law; (3) by gifts and exchanges. The collection is the largest in the Western Hemisphere and one of the largest in the world. Exclusive of unbound newspapers and parts of serials awaiting binding, its collections contained, on June 30, 1961, more than 41,282,900 items. These included more than 12,309,000 volumes and pamphlets; 169,900 bound newspaper volumes; 17,731,000 manuscripts; 2,622,000 maps and views; 188,600 microcards and microprint items; 69,600 reels of newspapers on microfilm; 135,000 reels and strips of microfilm; 133,500 reels of motion pictures; 2,076,000 pieces of music; 116,700 phonograph records; 534,500 volumes in raised type and 464,800 "talking book" containers for the blind; 3,060,000 photographic negatives, prints, and slides; 586,200 fine prints and reproductions and 1,023,000 other items such as broadsides, photostats, posters, etc. The main building was first occupied in 1897. Considerable additions, including an annex completed in 1939, have brought the total cost to approximately \$18,880,000 and the floor space to 1,563,189 square feet (nearly 36 acres) with more than 270 miles of shelving. An initial appropriation for making plans and specifications for a third Library building has been made. During the fiscal year 1961, \$24,131,102 was available for use by the Library. Of this sum \$16,142,389 was appropriated directly by Congress; \$5,462,756 was transferred from other Government agencies and \$2,525,958 was derived from gifts. During the fiscal year 1961, the Library registered copyright claims for 247,014 works and received \$1,012,231 as earned fees. The sale of 35,678,496 catalogue cards to approximately 14,000 subscribers and the sale of other library publications produced \$2,409,605. Receipts from these fees and sales are transferred to the U.S. Treasury. As the national library, the Library of Congress serves other Government agencies, other libraries throughout the world, scholars, and the general public as well as Congress. In addition to providing reference service on the materials in its collections and publishing catalogues and other guides, the Library administers a national programme to provide books for the blind, participates in international professional and cultural activities, and (through gift funds) sponsors music concerts, literary readings, and other cultural affairs.

Librarian of Congress, L. Quincy Mumford.

Chief Assistant Librarian of Congress, Rutherford D. Rogers.

Deputy Chief Assistant Librarian, Lucile M. Morsch.

Assistant Librarians, Mrs. Elizabeth E. Hamer (*Public Affairs*); David C. Mearns (*American Collections*).

Director, Administrative Department, Robert C. Gooch.

Director, Legislative Reference Service, Hugh L. Elsbree.

Director, Processing Department, John W. Cronin.

Director, Reference Department, Roy P. Basler.

Law Librarian, W. Lawrence Kelt.

Register of Copyrights, Abraham L. Kaminstein.

THE SMITHSONIAN INSTITUTION

The Mall, Washington, 25 D.C.

Secretary, Leonard Carmichael.

Assistant Secretaries, A. Remington Kellogg; James Bradley.

Administrative Officer, Louise M. Pearson.

Treasurer, E. L. Roy.

Chief, Editorial and Publications Division, P. H. Oehser.

Librarian, Ruth E. Blanchard.

Board of Regents

Chancellor, The Chief Justice of the U.S.

Chairman, Executive Committee, R. V. Fleming.

Directors of Bureaux

National Museum, A. Remington Kellogg.

Museum of Natural History, A. C. Smith.

Museum of History and Technology, F. A. Taylor.

Bureau of American Ethnology, F. H. Roberts, Jr.

Astrophysical Observatory, F. L. Whipple.

National Gallery of Art, J. Walker.

National Collection of Fine Arts, T. M. Beggs.

Freer Gallery of Art, A. G. Wenley.

National Zoological Park, T. H. Reed.

International Exchange Service, J. A. Collins.

National Air Museum, P. S. Hopkins.

Canal Zone Biological Area, M. H. Moynihan.

Chairman, National Cultural Center, L. Corrin Strong (acting).

NATIONAL COMMISSION OF FINE ARTS

Interior Dept. Building, Washington, D.C.

The Commission of Fine Arts was created by Act of Congress on May 17, 1910, to advise upon the selection of designs and locations for statues, fountains and monuments in the District of Columbia; and to advise generally upon questions of art when required to do so by the President or by any Committee of the Congress. Subsequent Executive Orders require contracting officers to request the advice of the Commission on the merits of designs for all important plans for parks and for all public buildings, which in any essential way affect the appearance of the City of Washington and the District of Columbia. The Advice of the Commission is also given on essential matters relating to the design of medals, insignia and coins produced by the Executive Departments of the Federal Government. The seven members of the Commission are appointed by the President of the United States for terms of four years, and they serve without remuneration, receiving only travel expenses and subsistence while attending meetings. Traditionally, the membership consists of three architects, one landscape architect, one sculptor, one painter, and a layman qualified in the arts.

Chairman, David E. Finley.

Members, Felix W. de Weldon; Peter Hurd;

Douglas W. Orr; William G. Perry; Michael Rapuano; Ralph Walker.

Secretary and Administrative Officer, L. R. Wilson.

THE JUDICATURE

The Federal Judiciary consists of three sets of Federal Courts: (1) The Supreme Court at Washington, D.C., consisting of a Chief Justice and eight Associate Justices, with original jurisdiction in cases affecting Ambassadors, &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts and from the decisions of the highest Courts of the States. (2) The United States Courts of

Appeals, dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (3) The 93 *District Courts*, served by 199 District Court Judges.

DEFENCE

Department of Defence.

Secretary of Defence (in the Cabinet), Robert S. McNamara (Jan. 21, 1961).
Secretary of the Army (not in the Cabinet), Elvis J. Starr, Jr.
Secretary of the Navy (not in the Cabinet), John B. Connally.
Secretary of the Air Force (not in the Cabinet), Eugene Zuchert.

The Defence Reorganization Act, making important changes in the organization of the United States armed forces, came into effect on Jan. 1, 1959. It provided for unified command of the three services and their central control by the Defence Department, which also became responsible for research and development of new weapons. The Secretary of each service, Army, Navy and Air Force, became responsible to the Secretary of Defence for the operation and efficiency of his department. Existing practice by which service chiefs and individual departments might approach Congress on their own initiative was, however, continued. The Secretary of Defence assumed powers under the Act to abolish, merge or transfer functions of the individual services, provision being made for proposals of this kind to be laid before Congress and the Senate for thirty days, with the possibility of a veto if objections were raised.

Unified Defence Commands

U.S. European Command, Paris.—*Cdr.*, Gen. Lauris Norstad (concurrently NATO *Supreme Allied Commander*).

Caribbean, Panama Canal Zone.—*Cdr.*, Lt.-Gen. Andrew P. O'Meara (U.S. Army).

Atlantic, Norfolk, Virginia.—*Cdr.*, Adm. Robert L. Dennison (U.S. Navy) (concurrently NATO *Supreme Allied Commander, Atlantic*).

Pacific, Hawaii.—*Cdr.*, Adm. Harry D. Felt (U.S. Navy).

E. Atlantic and Mediterranean, London.—*Cdr.*, Adm. Harold P. Smith (U.S. Navy).

Continental Air Defence Command, Colorado Springs.—*Cdr.*, Gen. Lawrence S. Kuter (U.S.A.F.).

Strategic Air Command, Omaha.—*Cdr.*, Gen. Thomas S. Power (U.S.A.F.).

Alaska Command, Anchorage, Alaska.—*Cdr.*, Lt.-Gen. Frank A. Armstrong, Jr. (U.S.A.F.).

Army.—The Army of U.S. had a strength of 8,291,336 on V.E. Day, reduced by June 30, 1959, to 591,700 (excluding Air Corps). The strength on May 31, 1961, was 856,233. The Army is now composed of 14 divisions, 2 brigades, 4 missile commands, 5 regimental-type units, 1 armoured combat command, and 9 infantry battle groups. Modern weapons introduced into the Army during the past 8 years included *Honest John* rockets and such surface-to-surface guided missiles as the *Redstone*, with a range in excess of 100 miles, the 85-mile *Corporal*, and the 20-mile *Lacrosse*. Under development at the close of 1960 were the advanced *Little John* to replace *Honest John* and the solid-propellant *Pershing* and *Sergeant* to take the place of the liquid-propellant *Redstone* and *Corporal*, respectively. For distances over 500 miles, the Air Force aerodynamic *Matador* was available and was being replaced by the longer range *Mace*. Other improved weapons include the new 7.62mm. rifles and machine guns, anti-tank missiles, and the M-60 tank. For air defence, Army field forces had operationally available in 1960 the mobile *Hawk* and the Marine Corps the land-based *Terrier*, while more advanced systems, such as *Mauler* and *Redeye*, were under development.

Navy.—The peak strength of the Navy (including Marine Corps) in the summer of 1945 was 3,855,497. The strength on June 30, 1950, was 454,800, and on May 31, 1961, it was 797,252.

SHIPS OF U.S. NAVY

	1940	1945 Aug. 31	1961 May
Attack Carriers.....	4	28	14
Support Carriers.....	8	71	9
Cruisers.....	37	73	15
Destroyers and Destroyer-type craft.....	220	737	225
Submarines*.....	94	234	117

* In May, 1961, including 100 conventionally powered submarines and 17 nuclear submarines (5 of them *Polaris* types).

In May, 1960, there were also 78 minecraft, 45 patrol craft, 110 amphibians and 204 auxiliary vessels. The Navy has greatly increased its striking power during the past 8 years. Since 1953, 4 *Forrestal*-type carriers have joined the fleet and 3 others were placed under construction, including the nuclear-powered *Enterprise*. No guided missiles were operational in the Navy in 1953. Since then the surface-to-surface *Regulus I* and the surface-to-air *Terrier* and *Talos* became operational, while the smaller surface-to-air *Tartar* is now in the final stage of development. By December, 1960, 22 warships had been either converted or newly constructed for the employment of these weapons and the conversion or construction of another 45 warships had been authorized; 49 warships equipped

with nuclear propulsion had been authorized, including a carrier, a cruiser and 14 *Polaris* submarines. Of this total, 14 had been commissioned, including 3 *Polaris* submarines. The proportion of jet aircraft in the naval aircraft establishment rose from 20 per cent. in 1953 to 45 per cent. in 1960. Supersonic F8U day fighters are now deployed on attack carriers and supersonic all-weather interceptors (F4H) and attack aircraft (A3J) are being procured.

Air.—The U.S. Air Force was formerly the Army Air Corps and directly under command of the War Department. In 1947 an independent Department of the Air Force was established under

a Secretary of the Air Force. The Navy and Marine Corps retained separate air organizations. Strength of the Air Force (May 31, 1961), 819,410.

Major changes have occurred during recent years in the tactical air support provided by the Air Force. By 1960, the propeller-driven tactical bombers had been completely replaced by jets, and the first generation of jet fighters, used in Korea, were giving place to supersonic, all-weather fighters of the Century series.

The efficiency and capability of airlift operations were increased by the addition of modern transports and by a sizeable force of helicopters.

FINANCE

Preliminary figures of revenue and expenditure for the fiscal year 1961 showed a deficit of \$3,925,000,000, compared with the actual surplus of \$1,224,000,000 in 1960.

(Fiscal year)

PUBLIC DEBT

On June 30, 1960, the *Federal Public Debt* of the United States stood at \$286,331,000,000; the level at the end of the fiscal year 1959 was \$284,706,000,000.

COST OF LIVING IN U.S.A.

The Consumer Price Index (for city wage-earner and clerical worker families in 46 cities representative of all cities in the United States) showed a

monthly average during the calendar year 1960 of 126.5 (the basic figure of 100 being the 1947-49 average). The average of consumer prices for the first four months of 1961 was: January, 127.4, February, 127.5, March, 127.5 and April, 127.5.

According to figures prepared by the Bureau of Labour Statistics, the index of consumer prices (all items) rose from 125.4 to 127.5 during the calendar year 1960, displaying a persistent upward movement. Most groups increased. In the year to

April, 1961, transportation fell from 148.1 to 145.8. Food rose from 117.6 to 121.2, medical care from 153.5 to 159.9; personal care from 132.7 to 133.8; apparel from 107.9 to 109.5; rent from 140.9 to 143.3; and reading and recreation from 120.3 to 124.1. During the first four months of 1961, the consumer price index for transportation fell from 146.2 to 145.8, but all other major groups increased.

The wholesale price index of all commodities showed a monthly average during 1958 of 119.2 (the average for the years 1947-49=100). The monthly average rose to 119.5 in 1960 and fell to 119.0 in May, 1961. Wholesale prices for farm products fell from 94.9 in 1958 to 89.1 in 1959, and further to 87.0 in May, 1961. Industrial prices rose from 126.0 in 1959 to 128.3 in 1960, and fell to 127.8 in May, 1961.

PERSONAL INCOMES IN U.S.A.

Personal incomes in the United States rose from \$360.3 billion in 1958 to \$383.3 billion in 1959 and

further to \$404.2 billion in 1960. In the year 1960, labour income rose by \$15.2 billion, business and professional income by \$1.2 billion and personal interest income by \$3.3 billion. Non-agricultural personal income rose by \$20.5 billion. Farm proprietors' income rose by \$2 billion. Other main groups of personal income rose slightly. Preliminary estimates for May, 1961 (seasonally adjusted annual rate) showed personal income at \$413.7 billion, an increase of \$9.0 billion over the 1960 level. Labour income rose from \$283.5 billion in 1960 to \$287.8 billion in May, 1961, an increase of \$4.3 billion. Transfer payments rose from \$29.0 billion in 1960 to \$32.5 billion in May, 1961, business and professional incomes fell from \$35.9 billion in 1960 to \$35.7 billion in May, 1961, and personal interest income rose from \$26.8 billion in 1960 to \$27.6 billion in May, 1961. All other types of personal income also rose from 1960 to May, 1961.

PRODUCTION

AGRICULTURE AND LIVE STOCK

Agriculture.—The total land surface, excluding island possessions and Alaska, is 1,901,680,000 acres of which about 59 per cent. is in farms. The total number of farms in 1959 (1959 Census of Agriculture) was 3,703,642. The cash income from crops in 1955 was \$13,676,000,000; in 1956, \$14,252,000,000; in 1957, \$12,461,000,000; in 1958, \$14,182,000,000; in 1959, \$14,573,000,000; and in 1960, \$15,076,000,000. Cash income from livestock and livestock products in 1955, \$15,880,000,000; in 1956, \$16,312,000,000; in 1957, \$17,363,000,000; in 1958, \$19,223,000,000; in 1959, \$18,879,000,000; and in 1960, \$18,938,000,000.

Crop production in 1960, at 122 per cent. of the 1947-49 base, broke the previous record (set up in 1958) by 3 per cent. Yields were uniformly good, with the composite yield per acre index at 143, only slightly below that for 1958. Acreage of 59 crops planted for 1960 harvest was 329,000,000 acres, about 6,000,000 less than in 1959 and the smallest since 1916.

Live Stock on Farms, Jan. 1.

	1959	1960	1961
All cattle . . .	93,322,000	96,236,000	97,139,000
Cows	20,132,000	19,527,000	19,291,000

	1959	1960	1961
Hogs	58,045,000	59,026,000	55,305,000
Sheep	32,606,000	33,170,000	32,932,000
Stock Sheep . .	28,108,000	28,819,000	28,677,000
Chickens	387,002,000	369,484,000	357,910,000
Turkeys	6,105,000	5,633,000	6,840,000

The index of livestock and poultry numbers on farms and ranches on January 1, 1961, was the same as a year earlier.

MINERALS

The value of mineral production in continental United States in 1960 totalled an estimated \$17.8 billion. The comparable value for 1959 was \$17.1 billion and for 1958 was \$16.5 billion.

Nearly 70 per cent. of the mineral production of the United States (in value) consists of fuels. In 1960 U.S. production of crude petroleum amounted to 2,569 million barrels, about 5,000,000 barrels less than in 1959.

Bituminous coal and lignite produced in 1960 totalled 415 million tons, 3,000,000 more than in 1959. The average value of soft coal at the mine was estimated at \$4.73 a ton, compared with \$4.77 in 1959.

MAJOR INDUSTRY GROUPS, 1960 (Adjusted)

Group	No. of Employees	Payroll	Value added by Manufacture
Food and kindred products	1,699,058	\$7,553,284,000	\$17,532,558,000
Tobacco manufactures	84,467	294,650,000	1,413,460,000
Textile mill products	901,677	2,938,140,000	4,857,638,000
Apparel, etc.	1,180,517	3,585,646,000	6,003,853,000
Lumber and wood products	581,302	1,585,109,000	3,176,613,000
Furniture and fixtures	347,599	1,388,669,000	2,349,488,000
Pulp, paper, etc.	555,348	2,779,885,000	5,707,474,000
Printing and publishing	864,101	4,479,679,000	7,922,562,000
Chemicals and products	699,166	3,947,175,000	12,270,371,000
Petroleum and coal products	179,166	1,116,673,000	2,518,424,000
Rubber products	347,842	1,723,295,000	3,276,612,000
Leather and products	349,050	1,145,683,000	1,897,465,000
Stone, clay and glass products	554,042	2,594,971,000	5,528,952,000
Primary metal products	1,096,359	6,303,447,000	11,671,341,000
Fabricated metal products	1,057,986	5,412,405,000	9,412,183,000
Machinery (except electrical)	1,348,265	7,303,661,000	12,391,190,000
Electrical machinery	1,122,284	5,005,985,000	10,395,369,000
Transportation equipment	1,557,759	9,164,581,000	15,283,604,000
Instruments, etc.	296,558	1,578,481,000	2,906,390,000
Miscellaneous	571,434	2,847,330,000	4,754,260,000
Administration and Auxiliary	570,686	4,232,972,000	—
Total	15,964,666	\$77,982,721,000	\$141,270,297,000

MANUFACTURES

The leading five States according to value added by manufacture (unadjusted) at the 1960 Annual Survey were: New York (\$15,891,767,000) California (\$12,047,983,000), Illinois (\$11,664,070,000), Ohio (\$11,472,503,000), and Pennsylvania (\$11,447,611,000).

The average number of employees in 1960 for the United States as a whole was 15,964,666, salaries and wages totalling \$77,982,721,000. The value added by manufacture (value of output less cost of materials and supplies, plus value created by merchandising operations, etc.) was \$141,270,297,000.

LABOUR IN THE UNITED STATES

Organized Labour.—On December 5, 1955, the American Federation of Labour (AFL), founded in 1881, and the Congress of Industrial Organizations (CIO), formerly established in 1938, merged into an organization called the American Federation of Labour and Congress of Industrial Organizations. The combined membership is now 15,072,000 (including 1,067,000 members in Canada). There are also 3,045,000 members of unions not affiliated to the AFL-CIO.

Approximately one-third of the non-agricultural labour force of the United States is estimated to be organized.

Work Stoppages.—There were 3,333 stoppages recorded in 1960, involving 1,320,000 workers. There were 19,100,000 man-days of idleness, representing 0.17 per cent. of estimated working time of all workers.

Employment and Unemployment.—The civilian labour force (working population) was 71,546,000 in May, 1961. This includes self-employed, wage and salary-earners, employed and unemployed. Unemployment was estimated at 4,768,000 (6.7 per cent.). In addition there were 2,026,000 temporarily stopped, and 13,124,000 working fewer than 35 hours a week.

	Wages		Hours	Average
	Average	Weekly		
March 1961	Earnings	Per Week	Per Week	Hourly Earnings
Manufacturing.....	\$90.71	39.1		\$2.32
Durable.....	97.96	39.5		2.48
Non-durable.....	82.04	38.7		2.12

Electrical work.....	156.35	38.7		4.04
Gas and Electricity.....	112.33	40.7		2.76
Wholesale trade.....	94.00	40.0		2.35
Retail trade.....	68.44	37.4		1.83
except eating and drinking places)				
Laundries.....	48.36	39.0		1.24

In March, 1961, gross average weekly earnings by industry ranged from \$156.35 per week in electrical work to \$42.01 in the manufacture of workshirts (35.6 hours and \$1.18 average hourly earnings). The average for all manufacturing was \$90.71, almost a four-fold increase since 1939 but in terms of 1947-49 purchasing power, the increase was 1½ times.

On Sept. 3, 1961, the minimum wage set by federal law became \$1.15 an hour for employees engaged in interstate commerce or in the production of goods for interstate commerce, or in activities closely related and directly essential to such production. The law requires at least time and a half

for all hours over 40 a week. From September 3, 1963, the minimum wage for these employees becomes \$1.25 an hour.

Other employees employed in certain large enterprises having some employees engaged in commerce or the production of goods for commerce, on September 3, 1961, became entitled to a minimum wage of \$1.00 an hour. Overtime premium pay will not become due to these workers until September 3, 1963, and then only after 44 hours in a week. The minimum wage and the maximum hours of work for these employees will gradually be changed until on September 3, 1965, all employees to whom the law applies will have a minimum wage of \$1.25 an hour and overtime premium pay after 40 hours in a week.

There are certain exemptions from these monetary requirements in specific occupations and industries.

In addition to cash wages, most workers receive some type of "fringe" benefits—the most common forms being paid vacations, and public holidays, various types of insurance and health funds financed by the employer or by employer and employees jointly.

RECLAMATION

Bureau of Reclamation, Department of the Interior, Interior Building, 18th and 19th Streets (between C and E streets), N.W., Washington, D.C. *Commissioner*, Floyd E. Dominy.

The Bureau of Reclamation constructs and operates irrigation, power and other multiple-purpose projects in the area west of the 97th meridian. It is the Federal agency with principal responsibility for water conservation in this region. Over 8 million acres of lands in the arid and semi-arid west can be irrigated by works constructed by the Bureau. In June, 1960, the Bureau had in operation, under construction or authorized, 130 irrigation and multiple-purpose projects. Among them are the multi-State Missouri River Basin Project; the Central Valley Project, California; and the Columbia Basin Project, Washington State.

Work is well advanced on the billion-dollar Colorado River Storage Project and participating projects which will aid economic expansion in 5 Western States—Colorado, Utah, Wyoming, Arizona, and New Mexico. The key structure, the 710-foot-high concrete *Glen Canyon Dam*, on the Colorado River in Arizona, will be completed in 1965; the 502-foot-high concrete *Flaming Gorge Dam*, on the Green River in Utah, will be completed in 1964; the 408-foot-high *Navajo Dam*, on the San Juan River in New Mexico, will be completed in 1963; and work has begun on *Blue Mesa Dam*, on the Gunnison River in Colorado, a part of the Curecanti Unit. The combined reservoir capacity of the 4 units is about 35,000,000 acre-feet of water. Power plants at three units will have a total installed capacity of nearly 1,100,000 kilowatts. Work is also proceeding on 6 of the 11 participating irrigation projects which will benefit from the storage of water at the main units.

The total value of crops grown on all reclamation projects in 1960 was almost \$1.2 billion, the second consecutive year when it exceeded one billion dollars. Cumulative value of all reclamation harvests since 1902 exceeded \$16.5 billion.

Grand Coulee Dam, on the Columbia River in the State of Washington, the largest concrete structure in the world by volume (10,585,000 cubic yards). Its installed hydro-electric power plant capacity is 1,974,000 kW.

Hoover Dam (Arizona and Nevada), on the Colorado River, is the highest dam in the United

States (726 ft.), and has an operating power plant with a capacity of 1,344,800 kW.

Shasta Dam (602 ft. high), on the Sacramento River in California, is a major feature of the Central Valley project. It was completed in 1945, and the power plant has a rated capacity of 379,000 kW.

Hungry Horse Dam, completed in 1953, on the

Flathead River in Montana, is 564 feet high and has a power capacity of 285,000 kW.

Trinity Dam, also a major feature of the Central Valley Project, on the Trinity River in California, and the world's highest earth dam, has reached its ultimate 537-ft. structural height and the reservoir is now filling. The power plant will have an installed capacity of 96,000 kW.

EXTERNAL TRADE OF THE UNITED STATES

MERCHANDISE.

ROADS*

In 1959 there were 3,510,660 miles of roads and streets in the United States, of which 3,094,462 miles were in rural areas and 416,198 miles were in urban areas. Surfaced roads and streets account for 2,502,565 miles of the total; 1,008,095 miles are unimproved and graded and drained. State primary roads, including extensions in urban areas, total 442,805 miles (438,394 surfaced). Other roads under State control total 259,393 miles (221,181 surfaced); 2,701,088 miles are under local control (1,817,020 surfaced); and 107,374 miles (25,970 surfaced) are under Federal control (in National forests and parks).

An estimated total of \$10,127,000,000 was spent in 1960 for roads and streets in the United States. Of this total \$6,384,000,000 was spent for State highways, \$1,843,000,000 was spent for county and local rural roads, \$1,728,000,000 was spent for city streets, and \$172,000,000 was spent on roads in Federal areas. Capital outlay accounted for 62.5 per cent. of the total expenditure; 25.7 per cent. was spent for maintenance; 4.9 per cent. for administration; 3.1 per cent. for highway police and safety; and 3.8 per cent. for interest on highway bonds.

Motor Vehicles and Taxation*.—The number of motor vehicles registered in 1960 in the United States was 73,898,770, an increase of 3.4 per cent. over the 1959 total of 71,497,399. In 1941 the registrations in the U.S.A. were 34,894,134. The State Governments received \$1,468,554,000 in 1941 and \$5,320,754,000 in 1960, respectively, from motor-fuel, motor-vehicle and motor-carrier taxes. In 1960 the Federal Government received \$4,509,479,000 from excise taxes on motor vehicles

and parts, tyres and tubes, gasoline, diesel and special fuels and lubricating oil.

Accidents.—In 1960 there were 38,200 deaths caused by motor vehicle accidents. The death rate per 100,000,000 miles of travel was 5.3 in 1960, compared with 5.4 in 1959.

* Including data for the new States of Alaska and Hawaii, 1958 and 1959.

SHIPPING

The active ocean-going Merchant Marine of the U.S. on June 1, 1961, consisted of 941 vessels of 1,000 gross tons and over, of which 896 were privately owned and 45 were government-owned ships under charter or general agency agreement with private companies. There were 1,914 government-owned vessels in the reserve fleets. Of the active vessels, 632 were dry cargo ships, 30 were combination passenger and cargo and 279 were tankers.

AIR TRANSPORT

United States domestic and international scheduled airlines in 1960 were estimated to have carried 57,700,000 passengers over 38,800,000,000 passenger miles. The freight flown by the scheduled airliners during 1960 totalled 643,800,000 ton-miles, and express 58,948,000 ton-miles. In addition, the airliners flew 240,580,000 ton-miles of mail.

Total operating revenues of all U.S. scheduled airlines reached the record figure of \$2,882,552,000 in 1960, a gain of 10.4 per cent. over 1959. Similarly, total operating expenses rose to a record high total of \$2,803,575,000 last year, or 12.6 per cent. more than the previous year. Net profit, after taxes and interest, for all carriers was \$9,579,000, a reduction of \$61,928,000 from the 1959 total of \$71,507,000.

Nine principal classes of commercial air carriers can be distinguished in the United States, (a) The Domestic Trunk Lines (12); (b) Local Service Lines, operating the low-density traffic routes between the smaller traffic centres and between small and large centres (13); (c) The International and Overseas Group, including all U.S. flag air carriers authorized to operate between the U.S.A. and foreign countries, between foreign countries and into Mexico and the Caribbean (19); (d) Intra-Hawaiian Air Carriers, operating in Hawaii (2); (e) Alaskan Carriers, providing service between the continental United States and Alaska and within Alaska (16); other classes are (f) Certified All Cargo Lines (6); (g) Helicopter Airmail Operators (3); (h) Supplemental transport carriers (35); and (i) air freight forwarders (75), air taxi operators and Alaskan pilot owners and air carriers.

721 stations of the United States are served by domestic trunk and local service airlines. In 1960, 166,408 persons were employed by the domestic and international airlines.

EDUCATION

State School Systems

Almost every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 16 years of age, and those from 14 to 16 must attend school or be lawfully employed. In the States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

In 1960-61 the total number of children in the United States of 5 to 17 years of age was 43,566,000, of whom 36,037,937 were enrolled in public elementary and secondary schools. The average daily attendance in the public schools was 32,083,194, the average length of school term was estimated at 178 days, and the average number of days attended by each pupil enrolled at 158. In 1960-61, 1,526,079 teachers were employed. The average annual salary of all teachers was \$5,389.

The total revenue receipts for school purposes, excluding balances on hand, was about \$14,778,972,000. Of this amount, about \$527,366,000 was received from Federal sources, \$5,931,466,000 from State sources and \$8,320,140,000 from county and local sources. Current expenditure was \$12,929,564,000. \$3,094,621,000 was expended for sites, buildings, furniture and equipment and \$451,950,000 for interest.

Institutions of Higher Education

In the autumn of 1960 enrolment in institutions of higher education numbered 3,610,007.

Institutions of higher education include universities, colleges, professional schools, teachers' colleges and normal schools, and junior colleges. The 1960 survey of enrolments covered 1,975 institutions classified as follows: 1,451 universities, colleges and professional schools enrolling 3,156,390 students; and 524 junior colleges enrolling 453,617 students. There are 104 institutions of higher education attended predominantly by Negroes, enrolling 93,889 students included in the foregoing figures.

During the school year 1959-60, 394,889 bachelor's degrees were conferred, 255,504 to men and 139,385 to women; 74,497 masters' degrees, 50,937 to men and 23,560 to women; and 9,829 doctorates, 8,801 to men and 1,028 to women. Education, Business and Commerce, and Engineering, were, in that order, the fields in which most students received baccalaureate degrees. There were 90,179 bachelor's degrees in Education, 51,522 in Business and Commerce, and 37,808 in Engineering. The three leading fields of study for the master's degree were Education (33,512), Engineering (7,159) and Business and Commerce (4,643). The most popular fields of study on the doctorate level were Education (1,590), Chemistry (1,048) and Engineering (786).

Particulars of some of the Universities are: Harvard (11,406 students, including 323 women in 1960), founded at Cambridge, Mass., on Oct. 28, 1636, and named after John Harvard of Emmanuel College, Cambridge, England, who bequeathed to it his library and a sum of money in 1638; Yale (8,214 students, including 677 women, in 1960), founded at New Haven, Connecticut, in 1701; Bowdoin, Brunswick, Me. (founded 1794) (810 men); Brown, Providence, R.I. (founded 1764; 4,103 students, including 1,113 women, in 1960); Columbia, New York, N.Y. (founded 1754; 23,620 students, including 9,248 women, in 1960); Cornell (founded at Ithaca, N.Y., 1865; 11,709 students, including 2,854 women, in 1960); Dartmouth, Hanover, N.H. (founded 1769, 3,180

students including 3 women in 1960); Georgetown, Washington, D.C. (founded 1789); 6,065 students, including 874 women, in 1960); North Carolina, Chapel Hill, N.C. (founded in 1789; 8,592 students, including 1,800 women, in 1960); Pennsylvania, Philadelphia, Pa. (founded 1740; 17,927 students, including 4,720 women, in 1960); Pittsburgh, Pittsburgh, Pa. (founded 1787; 13,423 students, including 3,593 women in 1960); Princeton, Princeton, N.J. (founded 1746; 3,904 men); Tennessee, Knoxville, Tenn. (founded 1794; 17,187 students, including 5,764 women, in 1960); William and Mary, Williamsburg, Va. (founded 1693; 9,826 students, including 5,764 women, in 1960); New York University, founded in 1831 at New York, had 32,465 students, including 8,264 women, in 1960.

Private Schools and Colleges

In 1960-61 it was estimated that there were about 5,592,000 pupils in private kindergarten and elementary schools, 1,160,000 pupils in private high schools and academies and 1,474,317 students in privately controlled institutions of higher education. In addition there were some 21,000 pupils enrolled in privately controlled elementary and secondary schools for exceptional children.

WEIGHTS, MEASURES AND CURRENCY

The *Weights and Measures* in the United States in common use are of British origin and in the case of weights and linear units correspond in large part with those now employed in Great Britain. The short ton of 2,000 pounds (20 hundred weight of 100 pounds each) is generally used instead of the long ton of 2,240 pounds. The old "Winchester" bushel and the wine gallon and their subdivisions are used instead of the British Imperial units of capacity; 1 U.S. bushel = 0.6689 British bushel, and 1 U.S. gallon = 0.83267 British gallon. The U.S. liquid quart is divided into 32 fluid ounces. The Metric System of Weights and Measures is permissive, but is not extensively used except in scientific and pharmaceutical work. The unit of currency is the dollar of 100 cents. The rate of exchange with sterling will be found on p. 84.

INDIAN POPULATION

On April 1, 1960, the estimated Indian population of the United States exclusive of Alaska, was 555,000. This includes 15,500 persons of Indian blood among the 37,000 natives of Alaska. There are many persons of Indian blood who are not enrolled with any recognized tribe, have no rights in tribal property, and receive no services from the Government. The States with the largest estimated number of Indians still residing in reservation areas and receiving some services from the Government are: Arizona, 69,300; Oklahoma, 57,800; New Mexico, 52,100; South Dakota, 25,900; Montana, 18,750.

34. Dwight D. Eisenhower*.....	Rep.	1890, Oct. 14	1953
35. John F. Kennedy.....	Dem.	1917, May 29	1961

* Re-elected Nov. 6, 1956. † Died in office.

‡ Assassinated. (a) Elected as Vice-President.

† Re-elected Nov. 5, 1940, the first case of a third term; re-elected for a fourth term Nov. 7, 1941.

TERRITORIES AND PRINCIPAL ISLAND POSSESSIONS OF THE UNITED STATES

CANTON AND ENDERBURY

The territories and the principal islands and island groups under the sovereignty of the United States of America comprise: Palmyra Island; Kingman Reef (about 1 sq. mile); Johnston (or Cornwallis) Island and Sand Island (about 1 sq. mile in all); Canton and Enderbury Islands (jointly administered with Great Britain); Midway Islands; Wake Island; Guam; Howland, Baker and Jarvis Islands (about 3 sq. miles in all); American Samoa (including the island of Tutuila, the Manua Islands, and all other islands of the Samoan group east of longitude 171° west of Greenwich together with Swains Island); the Commonwealth of Puerto Rico; the Virgin Islands of the United States, and Navassa Island (2 sq. miles).

The Canal Zone is under the jurisdiction of the United States.

The Trust Territory of the Pacific Islands is under the jurisdiction of the United States pursuant to a trusteeship agreement between the U.S. Government and the Security Council of the United Nations. It consists of the Mariana (except Guam), Caroline and Marshall Islands, with a land area of 687 square miles and a population of 75,836 in 1960. Nine individual languages are spoken in the Territory. Copra is the principal export of importance.

There are certain small guano islands, rocks, or keys which, in pursuance of action taken under the Act of Congress, August 18, 1856, subsequently embodied in Sections 5570-5578 of the Revised Statutes, are considered as appertaining to the United States. Responsibility for territorial affairs generally is centred in the Office of Territories, Dept. of the Interior, Washington, D.C.

Under the Anglo-American Pact of Aug. 10, 1938, Canton and Enderbury (of the Phoenix Islands Group in the Central Pacific) were declared to be for the common use of Gt. Britain and U.S.A. for aviation and communications. The islands, which are about midway between Hawaii and Australia, extend to a total of 27 sq. miles with a population of 320 (Census, 1960).

On April 6, 1939, the U.S. and Great Britain agreed to set up a joint regime for Canton and Enderbury Islands. Provision for the joint control of these islands was made by exchange of notes between the two Governments on April 6, 1939.

GUAM

Guam, the largest of the Ladrone or Mariana Islands in the North Pacific Ocean, lies in 13° 25' N. lat. and 144° 39' E. long., at a distance of about 1,506 miles east of Manila. The area of the island is estimated at 209 square miles, with a population of 67,044 at the 1960 Census. The Guamanians are of Chamorro stock mingled with Filipino and Spanish blood. The Chamorro language belongs to the Malayo-Polynesian family, but has had considerable admixture of Spanish. English is the language used throughout the island, although Chamorro is also used in Guamanian homes.

Guam was occupied by Japanese in Dec., 1941, but was recaptured and occupied throughout by U.S. forces before the end of August, 1944. Under the Organic Act of Guam of August 1, 1950 (Public Law 630 of the 81st Congress), Guam has

statutory powers of self-government, and Guamanians are United States citizens. A governor is appointed for a four-year term. A 21-member unicameral legislature is elected biennially. There is also a District Court of Guam, with original jurisdiction in cases under federal law.

Governor, William P. Daniel.

Secretary, Manuel F. Leon Guerrero.

CAPITAL, Agaña. Port of entry, Ψ Apra.

WAKE AND MIDWAY ISLANDS

Wake Island, annexed in 1898, has an area of about 3 sq. miles and lies in the N. Pacific about 2,300 miles from Hawaii on the direct route to Hong Kong. *Wake Island* was occupied by Japanese Dec. 27, 1941: it was re-occupied by U.S. on Sept. 15, 1945. Population (1960), 1,097.

Midway Island, with a total area of 28 sq. miles and a population (1960) of 2,356, lies in the N. Pacific about 1,300 miles from Hawaii. There is no indigenous population. The group is under the jurisdiction of the U.S. Navy.

PUERTO RICO

Puerto Rico (Rich Port) is an island of the Greater Antilles group in the West Indies, and lies between $17^{\circ} 50' - 18^{\circ} 30'$ N. lat. and $65^{\circ} 30' - 67^{\circ} 15'$ W. long., with a total area of 3,435 square miles and a population of 2,349,544 (1960 Census). The majority of the inhabitants are of Spanish descent and Spanish and English are the official languages. The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,399 miles distant from New York, and 963 miles from Key West. *Puerto Rico* was discovered in 1493 by Christopher Columbus. It was explored by Ponce de León in 1508. It continued a Spanish possession until Oct. 18, 1898, when the United States took formal possession as a result of the Spanish-American War. It was ceded by Spain to the United States by the Treaty ratified on April 11, 1899. Sugar is grown along the coastal plain and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, and yams are also grown. The trade is principally with the U.S. 4,536 miles of paved roads were in use in 1958. There are good harbours at San Juan and Ponce. The Constitution approved by the Congress and the President of the United States, which came into force on July 25, 1952, establishes the Commonwealth of *Puerto Rico* with full powers of local self-government. Legislative functions are vested in the Legislative Assembly, which consists of 2 elected houses; the Senate of 27 members (2 from each of 8 senatorial districts and 11 at large) and the House of Representatives of 51 members (1 from each of 40 representative districts and 11 at large). Membership of each house may be increased slightly to accommodate minority representatives. The term of the Legislative Assembly is 4 years. The Governor is popularly elected for a term of 4 years. A Supreme Court of 9 members is appointed by the Governor, with the advice and consent of the Senate. There are 9 similarly appointed Secretaries at the head of permanent departments, but the selection of the Secretary of State must be approved also by the House of Representatives. The Governor appoints all judges. *Puerto Rico* is represented in Congress by a Resident Commissioner, elected for a term of 4 years, who has a seat in the House of Representatives, but not a vote. Great improvement has been made in the progress, industrialization and welfare of the island during the

present century. A programme of tax exemption has raised income from industry to a level higher than that from agriculture. Public schools are established throughout—enrolment in 1959 reached 722,214. The capital, Ψ San Juan, had 588,805 inhabitants in 1960, other major towns being Ψ Ponce 145,586, Ψ Mayaguez 83,850, Caguas 65,098, Ψ Arecibo 69,879 and Bayamón 72,221.

FINANCE		1960
Revenue		\$204,000,000
Expenditure		262,000,000

TRADE		1960
Total Imports		\$911,980,393
Total Exports		611,838,292

Governor, Luis Muñoz Marín, elected 1948; re-elected 1952, 1956 and 1960.

Resident Commissioner, Antonio Fernós Isern.

AMERICAN SAMOA

American Samoa consists of the island of Tutuila, Aunu'u, Ofu, Olosega, Ta'u, Rose and Swains Islands, with a total area of 76.5 square miles and a population of 20,051 in 1960, distributed as follows:—Tutuila and Aunu'u 17,250; Rose Island, uninhabited; Manu'a Group (Ofu, Ta'u and Olosega Islands) 2,695; and Swain's Island.

Tutuila, the largest of the group, has an area of about 40 square miles and contains a magnificent harbour at Ψ Pago Pago (pop. 1960, 1,251), the capital and seat of government. The remaining islands have an area of about 30 square miles. Tuna and copra are the chief exports.

Under an Executive Order of the President, which became effective on July 1, 1951, civilian administration under the Department of the Interior replaced the Naval administration which had existed since 1900. At present the Government consists of an executive, a bicameral legislature and a judiciary. Most of the Samoans are U.S. nationals, but some have acquired citizenship through service in the United States armed forces.

Governor, H. Rex Lee.

Secretary, Eric J. Scanlan.

TRUST TERRITORY OF THE PACIFIC ISLANDS

The Trust Territory of the Pacific Islands consists of the Mariana (excluding Guam), Caroline and Marshall Islands which extend from latitude 1° to 20° north and from longitude 130° to 172° east. They cover an ocean area of 3,000,000 square miles but have a total land area of only 687 square miles. There are 96 separate islands and island groups in the Trust Territory. The population in 1960 was 75,836. The inhabitants of the Trust Territory are broadly classed as Micronesians. The native cultures vary markedly among island groups and even more among islands and atolls in the same geographic area. Nine mutually unintelligible languages are spoken in the territory.

The Trust Territory is administered by the United States pursuant to a Trusteeship Agreement with the Security Council of the United Nations of July 18, 1947. From the cessation of hostilities to that date, the area was administered under United States Military Government. On July 18, 1947, the islands were placed under the jurisdiction of the Secretary of the Navy. On July 1, 1951, civilian government was established with the transfer of responsibility for the Trust Territory to the Secretary of the Interior. By July 17, 1953, responsibility for the administration of all the islands in the Northern Marianas, except Rota, had been re-transferred to the Secretary of the Navy.

For administrative purposes, the territory is divided into seven districts: Saipan, Rota, Palau, Yap, Truk, Ponape and the Marshalls. Local governments exist within each district.

High Commissioner, M. Wilfred Goding.

Deputy High Commissioner, José A. Benítez.

Temporary seat of government: Agaña, Guam.

VIRGIN ISLANDS

Purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 133 sq. miles, with a population of 32,099 (1960 Census). St. Thomas (28 sq. miles) has a population of 16,201; St. Croix (84 sq. miles) has a population of 14,973; St. John (20 sq. miles) has a population of 925. St. Croix exports sugar and rum; St. Thomas is famous for its harbour.

CAPITAL, St. Charlotte Amalie contains one of the finest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refuelling station. The climate of the Virgin Islands is delightful at all times, and particularly so during the winter months.

Governor, Ralph M. Paiewonsky.

Government Secretary, Cyril E. King.

THE PANAMA CANAL

The Panama Canal and its adjuncts, including the related commercial enterprises in the Canal Zone, are operated by the Panama Canal Company, which was formed on July 1, 1915, under the provisions of the Panama Canal Company Act. The Canal Zone is governed by the Canal Zone Government, which was established simultaneously with the new Canal Company. Both organizations are headed by Major-General W. A. Carter, U.S.A., who holds the joint title of Governor of the Canal Zone and President of the Panama Canal Company.

In 1523, Charles V of Spain ordered an investigation as to the possibility of a canal through the Isthmus of Panama. From then until 1904, the principal maritime nations of the world gave earnest consideration to the project. In 1876 a concession for the construction of a canal was granted to a French promotion corporation which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Inter-oceanic Panama Canal Company, of which de Lesseps was nominal head. For various reasons, including those of finance and an inability to master the health problems on the humid isthmus, the initial effort failed. A receiver was appointed in 1889 and a second French company undertook the last project, with excavation work resuming in 1894. This was continued until the United States Government acquired the effects of the French company in Panama on May 4, 1904.

Congress authorized the President in 1902 to purchase the rights and property of the French company for \$40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of \$10,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new

Government was immediately recognized by the United States, and a treaty was ratified on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the isthmus, were ceded to the United States. The U.S. guaranteed the Republic of Panama's independence and agreed to pay it \$10,000,000 and an annuity which was to begin nine years after the ratification of the treaty. The canal is built through the centre of this territory. Under the terms of a treaty between Panama and the United States, signed at Panama in January, 1955, the United States increased its annual annuity to Panama from \$430,000 to \$1,930,000 and agreed to hand over to the Republic land and railroad yards valued at \$25,000,000, to construct a high-level bridge over the Pacific entrance to the Canal at a cost of about \$25,000,000 and to extend various commercial and other privileges to the Republic. The Canal Zone has an area of 533 sq. miles and a population of 41,684 (Census 1960).

The canal is fifty statute miles long (44.08 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. It contains 12 locks in twin flights; 3 steps at Gatun on the Atlantic side, 2 step at Pedro Miguel and 2 at Miraflores on the Pacific side. Each lock chamber is 1,000 feet long and 110 feet wide. Transit from sea to sea usually takes 8 hours. The least width is in Gaillard Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The Panama Canal Company is engaged in a \$46,000,000 Canal improvement programme. Gatun Lake is 85 feet above sea-level. The Canal's channel through all parts of the Lake including Gaillard (Culebra) Cut is 42 feet.

Including only ocean-going commercial vessels, 300 Panama Canal net tons measurement or over, against which tolls were collected, the volume of commercial traffic passing through the Canal during each of the last 24 fiscal years is shown below:—

Fiscal Year	No. of Transits	Canal. * Net Tons	Cargo Tons
1937	5,387	25,430,000	28,108,373
1938	5,524	25,950,000	27,385,921
1939	5,903	27,170,007	27,866,627
1940	5,370	24,144,366	27,299,016
1941	4,727	20,642,736	24,950,791

(Shipping); J. E. Poulden, C.B.E.; J. D. Hen-
nings (Colonial); Dr. H. T. Hookway (Scienti-
fic); Dr. D. G. Avery (Atomic Energy); S. F.
Nicholls, M.B.E.; Group Captain J. S. Row-
lands, G.C., O.B.E.

**UNITED STATES REPRESENTATIVES IN
GREAT BRITAIN**

EMBASSY

1 Grosvenor Square, W.1

(GR.Osvenor 9000)

*Ambassador Extraordinary and Plenipotentiary in
London, His Excellency David K. E. Bruce,*
C.B.E. (1961).

Minister and Deputy Chief of Mission, Hon. G.
Lewis Jones.

Minister for Economic Affairs, Hon. Wilson T. M.
Beale, Jr.

Counsellors, Elin O'Shaughnessy (Political);
Donald W. Smith (Consular); William L. Clark
(Public Affairs); Clinton L. Olson (Administra-
tion).

1st Secretaries, Harold Shullaw; Ralph N. Clough;
Walter A. Radius; Thomas T. Carter (Econo-
mic); William C. Truheart; John F. Correll
(Labour); Francis J. Galbraith; David D.
Newsom; Albert E. Irving; Edward T.
Lampson; Malcolm Toon; Carleton B. Swift,
Jr.; George R. Jacobs (Economic); Robert
Klaber (Administration); Edward N. Cooper
(Economic); John T. Sinclair (Administration);
James H. Sherrerd; Joseph A. Greenwald
(Commercial); Grant V. McClanahan; Hugh
W. Wolff; Sam L. Yates; Charles Gilbert;
Lewis M. Purnell; Alfred W. Wells.

2nd Secretaries, Henry J. Lilienfield; Paul J.
Campbell (Administration); Lillie Levine;
Catherine A. Rock; Mary E. Lyddane; Jack L.
Vrooman (Administration); F. Willard Calder;
Malcolm Lawrence; Paul J. Hoylen; Helen M.
Bailey; James O. Belden; Raymond J.
Swanson; Calvin E. Mehlert; Frazier Meade;
Jackson L. Smith; Bernice T. Jones; Joanne V.
Winn; Bernice M. Kelly; Gordon Chase.

Naval Attaché and Naval Attaché for Air, Rear-
Admiral Noel M. Gayler, U.S.N.

Senior Assistant Naval Attaché and Assistant
Naval Attaché for Air, Captain Richard P.
Nicholson, U.S.N.

Air Attaché, Brig.-Gen. Grover C. Brown, U.S.A.F.
Deputy Air Attaché, Col. John F. Splain, U.S.A.F.

Army Attaché, Brig.-Gen. James O. Boswell,
G.S., U.S.A.

Senior Assistant Army Attaché, Col. John H.
Boegtly, G.S., U.S.A.

Attachés, Frank G. Wisner; Robert N. Anderson
(Agriculture); Robert W. Bean (Financial);
Nathaniel Knowles (Commercial); Edward D.
Myers (Cultural); William E. Weld (Public
Affairs); James C. Graham; Ernest J. Warlow
(Administration); Elmer W. Hallowell (Agriculture); Paul J. Findlen (Agriculture); Duncan
N. Scott (Public Affairs); Clifford H. Adams,
(Public Affairs); Eva May Morris (Administra-
tion).

The United Nations

CHARTER OF THE UNITED NATIONS

The foundations of the Charter of the United Nations were laid at the Conference of Foreign Ministers in Moscow in 1943, and upon those foundations a structure was built at the meetings at Dumbarton Oaks, Washington, D.C., Aug. 21-Oct. 7, 1944. The design was discussed and criticized at San Francisco from April 25 to June 26, 1945, on which date representatives of 50 Allied Nations appended their signatures to the Charter.

The United Nations formally came into existence on October 24, 1945. It was later decided that its seat should be in the United States. Permanent headquarters have been erected at Manhattan, New York.

The following 99 states are members of the United Nations:—

Afghanistan, Albania, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Bulgaria, Burma, Byelorussian Soviet Socialist Republic, Cambodia, Cameroon, Canada, Central African Republic, Ceylon, Chad, Chile, China, Colombia, Congo (Brazzaville), Congolese Republic (Leopoldville), Costa Rica, Cuba, Cyprus, Czechoslovakia, Dahomey, Denmark, Dominican Republic, Ecuador, Ethiopia, Finland, France, Gabon, Ghana, Greece, Guatemala, Guinea, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iraq, Republic of Ireland, Israel, Italy, Ivory Coast, Japan, Jordan, Laos, Lebanon, Liberia, Libya, Luxembourg, Madagascar, Malaya, Mali, Mexico, Morocco, Nepal, Netherlands, New Zealand, Nicaragua, Niger, Nigeria, Norway, Pakistan, Panama, Paraguay, Persia, Peru, Philippines, Poland, Portugal, Roumania, Salvador, Saudi Arabia, Senegal, Somalia, South Africa, Spain, Sudan, Sweden, Thailand, Togo, Tunisia, Turkey, Ukrainian Soviet Socialist Republic, Union of Soviet Socialist Republics, United Arab Republic, United Kingdom, United States of America, Uruguay, Venezuela, Voltaic Republic, Yemen, Yugoslavia.

By September 1, 1961, 4 further States—Sierra Leone, Outer Mongolia, Mauritania and Kuwait—had been recommended for membership.

The principal organs of the United Nations are:—(1) The General Assembly; (2) The Security Council; (3) The Economic and Social Council; (4) The Trusteeship Council; (5) The International Court of Justice; (6) The Secretariat.

1. The General Assembly

The General Assembly consists of all the Members of the United Nations. Each Member is entitled to be represented at its meetings by five representatives, but has only one vote. The General Assembly meets once a year in regular session normally beginning on the third Tuesday in September. Special Sessions may also be held.

The work of the General Assembly is divided between seven Main Committees, on each of which every Member has the right to be represented:—

(1) Political and Security (including the regulation of armaments); (2) Economic and Financial; (3) Social, Humanitarian and Cultural; (4) Trusteeship (including Non-Self Governing Territories); (5) Administrative and Budgetary; (6) Legal. There is also a Special Political Committee, to relieve the burden on the first Committee.

The Main Committees consider items referred to them by the General Assembly and recommend draft resolutions for submission to the Assembly's plenary meetings.

The Assembly has two procedural committees—a General Committee and a Credentials Committee; and three standing committees—an Advisory Committee on Administrative and Budgetary Questions, a Committee on Contributions and a Disarmament Commission.

The General Assembly appoints such *ad hoc* committees as may be required from time to time for special purposes. The Assembly is also assisted in its work by subsidiary bodies such as a Board of Auditors, an Investments Committee, a United Nations Staff Benefit Committee, and an International Law Commission.

2. The Security Council

The Security Council consists of eleven Members, each of which has one representative and one vote. There are five permanent Members (China, France, U.K., U.S.A., U.S.S.R.) and six non-permanent Members elected for a two-year term.

The Security Council bears the primary responsibility for the maintenance of peace and security. Decisions on procedural questions are made by an affirmative vote of seven Members. On all other matters the affirmative vote of seven Members must include the concurring votes of the permanent Members, and it is this clause which makes the *Veto* possible. The only exception to this rule is that in regard to measures for peaceful settlement a party to a dispute must refrain from voting.

The General Assembly, any member of the United Nations, or the Secretary-General, can bring to the Council's attention any matter considered to threaten international peace and security. A non-member State can bring a dispute before the Council provided it accepts in advance the U.N. Charter obligations for peaceful settlement.

A Committee on the Admission of New Members was set up by the Security Council on May 17, 1946, for the purpose of examining applications for admission to membership in the United Nations which may be referred to it by the Security Council. It is composed of a representative of each of the members of the Security Council.

The Security Council also establishes *ad hoc* committees and commissions which may be required from time to time for special purposes.

3. The Economic and Social Council

This body is responsible under the General Assembly for carrying out the functions of the United Nations with regard to international economic, social, cultural, educational, health and related matters.

It has established the following Commissions: Statistical, Human Rights, Social, Status of Women, Narcotic Drugs, Population, International Commodity Trade, Regional Economic Commissions for Europe, Asia and the Far East, Latin America and Africa. The Council also supervises and co-ordinates the work of fourteen field agencies established to cover the main fields of international co-operation.

United Nations Children's Fund (UNICEF), London Office, 14-15 Stratford Place, W.1.—Established by the United Nations in 1946, to meet the emergency needs of children, particularly in war-devastated countries. UNICEF is financed by voluntary contributions from Governments and from the public, which amounted to £9,178,500 in 1960 and assisted 409 projects in 104 countries and territories.

4. Trusteeship Council

The establishment of a Trusteeship Council in connection with territories placed under United

Nations supervision through individual Trusteeship Agreements was made possible after the General Assembly on December 13, 1946, approved the following eight Trusteeship Agreements: *New Guinea* (with Australia); *Rwanda-Urundi* (Belgium); *French Cameroons and French Togoland* (France); *Western Samoa* (New Zealand); *British Cameroons, British Togoland, and Tanganyika* (the United Kingdom); a ninth agreement was afterwards approved concerning *Nauru* (administered by Australia on behalf of Australia, New Zealand and U.K.). The Trusteeship Agreement for British Togoland ceased to have effect in March, 1957, when that country was united with Ghana. The trusteeships in the French Cameroons and French Togoland came to an end in 1960 with the achievement of full independence by these States. The Trusteeship Agreements for the British Cameroons, Tanganyika and Western Samoa ended in 1961.

A Trusteeship Agreement for the former Japanese mandated islands, the *Marshalls, Marianas and Carolinas*, was submitted by the United States to the United Nations, and after approval by the Security Council, came into force on July 18, 1947.

A Trusteeship Agreement for the former Italian Colony of *Somaliland*, in force from Dec. 2, 1950, ended on July 1, 1960, with the establishment of the Somali Republic.

The Trusteeship Council is composed of countries administering Trust Territories, permanent members of the Security Council, and enough other countries (elected by the General Assembly for three-year terms) to make an equal division between countries which administer Trust Territories and countries which do not.

The Trusteeship Council considers reports from administering authorities; examines petitions in consultation with the administering authority; makes periodic inspection visits; and checks conditions with an annual questionnaire on the political, economic, social, and educational advancement of the inhabitants of trust territories.

5. International Court of Justice

The International Court of Justice is the principal judicial organ of the United Nations. The Statute of the Court is an integral part of the Charter and all Members of the United Nations are *ipso facto* parties to it. The Court is composed of 15 judges, no two of whom may be nationals of the same State, and meets at The Hague.

If any party to a case fails to adhere to the judgment of the Court, the other party may have recourse to the Security Council.

THE SECRETARIAT

Secretary-General (vacant).

Under Secretaries

Special Political Affairs, Ralph J. Bunche (U.S.A.); C. V. Narasimham (India).

Conference Services, V. Hoo (China).

Economic and Social Affairs, P. de Seynes (France).

Trusteeship and Information from Non-Self-Governing Territories, D. Protitch (Yugoslavia).

Political and Security Council Affairs, G. P. Arkadev (U.S.S.R.).

General Assembly Affairs, A. W. Cordier (U.S.A.).

Public Information, H. Tavares de Sa (Brazil).

U.N. Information Centre, 14-15, Stratford Place, W1.

BUDGET OF THE UNITED NATIONS

The financial year coincides with the calendar year. On February 13, 1946, the General Assembly established a Working Capital Fund of \$25,000,000 (U.S.).

For the year 1961, the gross appropriation was \$72,969,300 (£26,000,000). The scale of assess-

ments for the 1961 budget for British Commonwealth countries was: Australia, 1.79 per cent.; Canada, 3.11 per cent.; Ghana, 0.07 per cent.; India, 2.46 per cent.; Malaya, 0.17 per cent.; New Zealand, 0.42 per cent.; Pakistan, 0.40 per cent.; South Africa, 0.56 per cent.; United Kingdom, 7.78 per cent. The United States contribution was 32.51 per cent.; U.S.S.R. was 13.62 per cent.; France was 6.40 per cent.; and China was 5.01 per cent. A new scale of assessment is under discussion.

UNITED KINGDOM REPRESENTATIVES

New York

Permanent Representative to the Security Council and Representative to the United Nations, Sir Patrick Dean, K.C.M.G. £7,015

Deputy Permanent Representative, C. T. Crowe, C.M.G.

Ministers, A. H. M. Hillis (*Treasury Adviser*); A. A. Dudley, C.M.G. (*Adviser, Economic and Social Affairs*).

Counsellors, A. H. Campbell (*Head of Chancery*); J. L. Simpson, C.M.G., T.D. (*Legal Adviser*).

1st Secretaries, M. W. Errock; K. C. Thom; W. Bentley.

2nd Secretaries, S. J. G. Cambridge; Miss A. Warburton.

Minister and Permanent Representative to the Trusteeship Council, Sir Hugh Mackintosh Foot, G.C.M.G., K.C.V.O., O.B.E.

1st Secretaries, C. E. Diggins (*Commonwealth Relations*); G. K. Caston (*Colonial Affairs*).

Geneva

Permanent Representative to the U.N. European Office, E. Sniders, M.B.E.

INTERNATIONAL ATOMIC ENERGY AGENCY

Kärntnerring 11-13, Vienna I.

Set up on July 29, 1957, to accelerate and enlarge the contribution of atomic energy to peace, health and prosperity throughout the world and to ensure that assistance provided by it is not used to further any military purpose. Agreements have been reached concerning the Agency's working relationship with the United Nations and its international agencies. In 1961, 74 states were in membership.

A General Conference of all members meets in regular annual session and in such special session as may be necessary. A Board of Governors (23 members) carries out the functions of the Agency. *Director-General*, Sterling Cole (U.S.A.).

INTERNATIONAL AGENCIES

Twelve other international organizations, having wide responsibilities in economic, social, cultural, educational and other related fields, carry out their functions in co-operation with the United Nations under agreements made with a standing committee of the Economic and Social Council.

International Labour Organisation (ILO) Geneva (London Office, 38-39 Parliament Street, S.W.1).—Established in 1919 as an autonomous institution associated with the League of Nations and recognized in 1946 by the United Nations as a special agency, the ILO exists to contribute to the establishment of lasting peace by promoting social justice and by international action to improve labour conditions and living standards, and to promote economic and social stability. In June, 1961, the Organisation had 100 member States.

A *General Conference*, composed of national delegations of two government delegates, one delegate representing management and a fourth representing labour, meets annually and formulates international social standards.

A 40-member *Governing Body*, composed of the representatives of 20 Governments, ten worker members and ten employer members, supervises the work of the *International Labour Office* and of the various committees and commissions. Ten Governments hold seats on the *Governing Body* because of their industrial importance. These are at present Canada, China, France, Federal Republic of Germany, India, Italy, Japan, U.S.S.R., the United Kingdom and the United States.

The *International Labour Office* provides the Secretariat of the Organisation, collects and distributes information, assists governments upon request in drafting legislation on the basis of decisions of the Conference, directs technical and co-operation activities and issues publications.

Director-General, David A. Morse (U.S.A.).

Food and Agriculture Organization of the United Nations (FAO), *Ville delle Terme di Caracalla*, Rome.—Established on October 16, 1945, to advance the raising of levels of nutrition and standards of living, to secure improvements in the efficiency of the production and distribution of all food and agricultural products and by bettering the condition of rural populations to contribute towards an expanding world economy. Among its many activities the Organization promotes the global exchange of new type: of plants, combats epidemics of animal diseases in many countries and provides technical assistance in such fields as nutrition and food management, soil erosion control, re-afforestation, irrigation engineering, control of infestation of stored foods, production of fertilizers, control of crop pests and diseases, and improvement of fishing vessels, fish distribution and marketing. In July, 1960, FAO launched the world-wide *Freedom from Hunger Campaign*, which will continue until 1965, and which seeks to focus world attention on the continuing problem of hunger. The 1959 Conference approved a budget of \$18,980,050 for 1960-61 biennium. In addition to these funds, FAO receives a share of the UN Special Fund for the Expanded Technical Program (ETAP). For 1960 this amounted to \$8,004,686.

The policy of the Organization is directed by a two-yearly Conference of the 88 members and associates. A council (25 members) acts for the Conference between its sessions.

Director-General, B. R. Sen (India).

United Nations Educational, Scientific and Cultural Organization (UNESCO), 9 Place de Fontenoy, Paris, 7ème.—Unesco was established on Nov. 4, 1946, to contribute to peace and security by promoting collaboration among the nations through education, science and culture in order to further universal respect for justice, for the rule of law and for the human rights and fundamental freedoms which are affirmed for the peoples of the world, without distinction of race, sex, language or religion, by the Charter of the United Nations; to collaborate in the work of advancing the mutual knowledge and understanding of peoples, ... to give fresh impulse to popular education and to the spread of culture, ... to maintain, increase and diffuse knowledge.

The three main bodies of the Organization are: a *General Conference* which meets every two years to approve the programme and budget, an *Executive Board* of 24 members and the *Secretariat*. In addition, National Commissions are set up in Member States to serve as a link with Unesco and carry out the programme of the Organization.

This programme is essentially designed to stimulate and expand international co-operation and national efforts in the fields of education, natural

sciences, social sciences, cultural activities, mass communication and exchange of persons for study and educational travel abroad. Current activities of the Organization focus on development of international co-operation among specialists and non-governmental organizations, the collection and dissemination of information, direct action to promote education and science in under-developed countries and the preparation of international agreements related to Unesco's interests. Member States at June 1, 1961, 100. Approved budget for 1961, U.S.\$16,015,400.

Director-General, Vittorino Veronese (Italy).

World Health Organization (WHO), Palais des Nations, Geneva. Established on April 7, 1948, the World Health Organization exists to forward the attainment by all peoples of the highest possible level of health. Its services are of two kinds—advisory, to spread knowledge and help to train personnel on such subjects as malaria, tuberculosis, venereal diseases, maternal and child health, nutrition, and environmental sanitation—and technical, including such services as biological standardization and unification of pharmacopœias, collection and dissemination of epidemiological intelligence, special international medical research projects and publication of technical and scientific works. Expenditure in 1961 was estimated at \$19,780,448 and at \$23,607,180 for 1962. Membership (June, 1961), 109, including 4 Associate Members.

Organs are a *World Health Assembly* meeting annually to frame policy, an *Executive Board* (24 members), meeting at least twice a year, and a *Secretariat*.

Director-General, Dr. M. G. Candau (Brazil).

International Bank for Reconstruction and Development, 1818 H Street, Washington, 25 D.C.—Established on Dec. 27, 1945, to assist in the reconstruction and development of territories of members by facilitating the investment of capital for productive purposes; to promote private foreign investment and, when private capital is not readily available on reasonable terms, to supplement private investment by providing loans for productive purposes out of its own capital, funds raised by it, and its other resources; and to promote the balanced growth of international trade and the maintenance of equilibrium in balances of payments by encouraging international investment for the development of the productive resources of the International Bank's members. Loans made by the Bank since its inception to June 30, 1961, totalled \$5,790,000,000. Subscribed capital, July 5, 1961, \$20,103,100,000.

The *Board of Governors* consists of one Governor and one alternate appointed by each of the 68 member countries.

Eighteen *Executive Directors* exercise all powers of the Bank except those reserved to the Board of Governors. The *President*, selected by the Executive Directors, conducts the business of the Bank, with the assistance of an international staff.

President, Eugene R. Black (U.S.A.).

International Finance Corporation (IFC), 1818 H Street, Washington 25, D.C.—The IFC is an international investment institution with capital of \$96,600,000 subscribed by 59 member governments. It is closely affiliated with the World Bank, but its operations are distinct as IFC deals exclusively with private business. Its purpose is to further economic growth in its developing member countries by investing—without government guarantee—in productive private enterprises, in association with private capital and management.

In this connection, IFC seeks to attract private investment capital and bring together businessmen from the developing and industrialized areas, who are seeking partners for joint ventures. IFC is essentially an investing rather than a lending institution, and it judges projects on their merits as investments for private capital. It supplements rather than competes with private capital, and it does not exercise management functions.

By May 31, 1961, IFC made 37 investments totalling \$42,200,000 in 17 member countries.

IFC is controlled by a *Board of Directors* consisting of the President (*Chairman*) and those Executive Directors of the World Bank who represent at least one government which is a member of IFC. A President is selected by the Board of Directors. President, Eugene R. Black (U.S.A.).

International Monetary Fund, 19 and H Streets, Washington 25, D.C.—Established on Dec. 27, 1945, the Fund exists to promote international monetary co-operation and the expansion of international trade; to promote exchange stability, maintain orderly exchange arrangements and avoid competitive exchange depreciations; and to assist in the establishment of a multilateral system of payments in respect of current transactions between members and in the elimination of foreign exchange restrictions which hamper world trade. Total transactions of the Fund up to April 30, 1961, amounted to \$4 billion.

Managing Director, Per Jacobsson (Sweden).

International Civil Aviation Organization (ICAO), 1080 University Street, Montreal, 3—Established on April 4, 1947, to study problems of international civil aviation and the establishment of international standards and regulations for civil aviation, ICAO encourages the use of safety measures, uniform regulations for operation, and simpler procedures at international borders. It promotes the use of new technical methods and equipment. With the co-operation of members, it has evolved a pattern for meteorological services, traffic control, communications, radio beacons and ranges, search and rescue organization, and other facilities required for safe international flight. It has secured much simplification of government customs, immigration, and public health regulations as they apply to international air transport. 86 states are now members of ICAO. The net budget for 1961 was \$4,057,000 (Canadian).

An *Assembly* of delegates from member states meets annually. A *Council* of 21 members is elected by the Assembly, taking into account the countries of chief importance in air transport and the need for representation of the main geographical areas of the world. The Council is the executive body, working through subsidiary committees.

Secretary-General, R. M. Macdonnell (Canada).

Universal Postal Union (UPU), Schosshaldenstrasse 46, Berne.—Established on July 1, 1875, UPU exists to form a single postal territory of all the countries, members of the Union, for the reciprocal exchange of correspondence in order to secure the organization and improvement of the various postal services and to promote in this sphere the development of international collaboration. Every member agrees to transmit the mail of all other members by the best means used for its own mail. The Union comprises all the countries of the world with the exception of the Maldives and Laccadive Islands. Budget, 1961, about \$720,000.

A *Universal Postal Congress* meets at five-yearly intervals.

Secretary-General, Dr. Edouard Weber (Switzerland).

International Telecommunication Union (ITU), Palais Wilson, Geneva.—Founded at Paris in 1865

as the International Telegraph Union, ITU was re-organized in 1947 and since 1961 has been governed by the Convention adopted by the Geneva Conference held in 1959. ITU exists to set up international regulations for telegraph, telephone, and radio services to further their development and extend their utilization by the public, at the lowest possible rates; to promote international co-operation for the improvement and rational use of telecommunications of all kinds; the development of technical facilities and their most efficient operation. ITU allocates the radio frequency spectrum and registers radio frequency assignments. It studies, recommends, and collects and publishes information on telecommunication matters. The budget for 1961 was \$3,206,646.

Secretary-General, Gerald C. Gross (U.S.A.).

World Meteorological Organization (WMO), Geneva.—Established on March 23, 1950. WMO exists to facilitate world-wide co-operation in establishing networks of stations making observations related to meteorology, and to promote the establishment and maintenance of centres providing meteorological services; to promote the establishment of systems for the rapid exchange of weather information; to promote standardization of meteorological observations and to ensure their uniform publication; to further the application of meteorology to aviation, shipping, agriculture, and other human activities; to encourage research and training in meteorology and to coordinate their international aspects. The budget for 1960-63 is \$2,649,484.

A *World Meteorological Congress* meets at least once every four years. An *Executive Committee* (18 members), meeting at least annually, carries out the resolutions of the Congress, initiates studies and makes recommendations on matters requiring international action. Other organs are six *Regional Meteorological Associations* (Africa, Asia, S. America, N. and Central America, Europe and South-West Pacific), technical commissions and a Secretariat.

Secretary-General, D. A. Davies (U.K.).

Inter-Governmental Maritime Consultative Organization (IMCO), Chancery House, Chancery Lane, W.C.2.—Established on March 17, 1958, to provide machinery for cooperation among governments in the field of governmental regulation and practices relating to technical matters, including those concerning safety at sea; to encourage the removal of discriminatory action and of unnecessary restrictions by governments; to consider matters concerning unfair restrictive practices by shipping concerns; to consider any matters concerning shipping that might be referred to it by any organ or specialized agency of the United Nations; and to provide for the exchange of information among governments. In July, 1961, membership consisted of 48 nations. Budget, 1962-63, \$892,350.

An *Assembly* of all members meets every two years. A *Council* (16 members) acts for the Assembly between sessions.

Secretary-General, Ove Nielsen (Denmark).

International Trade.—A draft charter for an international trade organization was completed in 1948, but it became clear that the leading trading powers would not ratify it without considerable delay. The organization has not yet been established.

An international treaty to which 39 countries are parties, the *General Agreement on Tariffs and Trade* (GATT) was signed in 1947, with the object of lowering and stabilizing tariffs, expanding international trade and promoting economic development. Five tariff conferences have since been held at which members have reduced or frozen their tariffs on various items.

Executive Secretary, E. W. White (U.K.).

Foreign Countries

THE following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Courts, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies, Legations, and Consulates-General in London for various corrections and additions.

Salaries and Allowances.

The Salaries of Officers of Branch "A" of H.M. Foreign Service are shown below. In addition foreign allowances and furnished accommodation (or rent allowances in lieu thereof) are assigned to Officers serving abroad:—

Grade I—£7,015.	Grade V—£3,415.
Grade II—£5,015.	Grade VI—£2,715 to £3,415.
Grade III—£4,215.	Grade VII—£1,781 to £2,483.
Grade IV—£4,115.	Grade VIII—£1,402 to £1,719.
Grade IX—£793 to £1,282.	

NOTE.—Salaries of Ambassadors and of Ministers Plenipotentiary at British Embassies and Legations abroad shown in the following articles are in each case the maximum salary for the post and exclude *Frais de Représentation*.

ABYSSINIA. See Ethiopia.

AFGHANISTAN

(Afghānistān)

King of Afghanistan, H.M. Zahir Shah, born Oct. 15, 1914, acceded Nov. 8, 1933 (on the assassination of his father, Nadir Shah); married Nov. 7, 1931, Humaira, daughter of Sardar Ahmad Shah Khan, and has surviving issue four sons and two daughters: H.R.H. Prince Ahmed Shah Khan, b. Sept. 23, 1934; H.R.H. Prince Mohammad Nadir, b. 1941; H.R.H. Prince Daud, b. 1949; H.R.H. Prince Mir Wais, b. 1957; and H.R.H. Princess Bilqis, b. 1931; H.R.H. Princess Maryam, b. 1936.

EMBASSY IN LONDON

31 Princes Gate, S.W.7.
[Kensington: 8891]

Ambassador in London, His Excellency Mohammed Kabir Ludin.

1st Secretary, Faiz Ahmad Zikria.

2nd Secretary, Ghulam Farouk.

Afghanistan lies to the N. and W. of Western Pakistan. Its ancient name was Aryana, by which title it is referred to by Strabo, the Greek geographer who lived in the 1st century B.C. The estimated area is 250,000 sq. miles, and the population is estimated at about 10 to 12 millions. The population is very mixed. The most numerous race is the Pathan which predominates in the South and West, the main divisions being the Durrani, from whom the Royal family springs, and the Ghilzais. Then come the Tajiks, an Iranian people mainly cultivators and small traders. There are also Uzbeks and Turkomen in the North, Hazaras in the centre, Baluchis in the South-West and the Nuristanis who live near the Chitral border. All are Sunni Moslems, except the Hazaras and Kizilbashs, who belong to the Shia sect.

Afghanistan is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (now W. Pakistan) (boundary fixed 1896-7), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the

N.W. Frontier Province (now W. Pakistan) (boundary fixed 1895). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus, to the Oxus (or Amu Darya, "Mother of Rivers") which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier on the branch line from Merv, and thence N.E. was fixed by the Pamir agreement of 1895. The Russo-Afghan frontier was demarcated by the Tashkent Boundary Commission in 1948. The Indo-Afghan frontier was settled by the Durand agreement of 1893. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who have a strong tradition of independence and are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures.

Afghanistan is divided into seven major provinces, Kabul, Mazar-i-Sharif, Kandahar, Herat, Nengrahar (formerly Eastern), Paktya (formerly Southern) and Qataghan, and eight minor provinces, Parwan, Ghazni, Farah-Chakhansur, Girishk, Maimana, Badakhshan, Shibarghan and Ghore. Each province is under a Governor (called in major provinces *Naib-ul-Hakumah*, and in minor provinces *Hakim-i-Ala*).

Government.—Amir Abdurrahman (1880-1901) established a strong central government, with a regular civil and military organization, including offices for public works, posts, police, finance, trade, &c. The Army has been reorganized and is recruited by annual calls; service is for two years with the colours and eight with the reserve. The peace strength is about 64,000. A military academy and military colleges are located in Kabul; and provision is made for training of regular officers abroad. A small Air Force is maintained. All military and air force equipment is now of Russian pattern. Factories for munitions and for various commercial products have been erected in Kabul and elsewhere.

As the result of a British mission to Kabul in 1904-5, the engagements which had existed with the Amir Abdurrahman since 1880 were renewed by the treaty of March 21, 1905. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence. Afghan troops crossed the Indian frontier on May 2, 1919, on which the Indian Government took immediate steps to expel them; fighting followed and Dacca was occupied by British troops, but overtures were made by King Amanulla of Afghanistan and a treaty of peace was signed in August. By this treaty Afghanistan is left formally free and independent. By treaty of Nov. 22, 1921 (renewed in 1930), Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognize boundaries then existent, subject to a slight re-adjustment near the Khyber; and to establish Legations and consular offices. As successor state to the British Government, Pakistan has agreed that her relations with Afghanistan shall be based on the 1921 treaty.

Under the Constitution of Oct. 31, 1931, there is a Senate of 43 nominated members and a National Council of 171 elected members, with a Grand Assembly (*Loe Jirgeh*) which is summoned on important occasions. The administration is entrusted to a Council of Ministers.

The laws of Afghanistan are based on the "Shariat," or Islamic law, and tribal custom.

Production.—Agriculture and sheep raising are the principal industries. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Sugar beet and cotton are grown. Afghanistan is rich in fruits. Sheep, including the Karakuli, and transport animals are bred. Silk, woollen and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, lapis lazuli, gold, chrome and talc are found.

The following main roads are open to motor traffic. (a) Internal: Kabul-Kandahar (310 miles); Kandahar-Farrah-Herat (400 miles); Herat-Maimana to Mazar-i-Sharif (500 miles); Mazar-i-Sharif-Kabul (380 miles). Also Kabul-Khanabad-Faizabad (450 miles); Kabul-Gardez (80 miles); Kabul-Bamian (140 miles). The road from Kabul to the North is being shortened by cutting through the Salang pass. (b) Roads to the frontiers: Kabul-Khyber (175 miles); Kandahar-Chaman (70 miles) and roads from Herat to the Russian and Persian borders. Work on the metalling of the Kabul-Khyber road by American engineers has begun and a new metalled road from Kabul to Kandahar and Spin Baldak is shortly to be constructed under an I.C.A. contract. The Pakistan North-Western Rly. is to extend a spur from Chaman to Spin Baldak. An agreement has recently been signed with the Soviet Government for the construction of a road from the Russian border at Kushk to Herat and Kandahar. Otherwise roads are unmetalled. A network of minor roads fit for motor traffic in fine weather links up all important towns and districts.

Goods are still conveyed by pack animals, but motor transport is rapidly taking the place of pack transport as the chief means of conveyance. The chief trade routes to Pakistan and India are the Khyber Pass route, from Kabul to Peshawar (190 miles), and the road from Kandahar to Chaman (70 miles).

Language and Literature.—The languages of the country are Persian and Pushtu and Turki (spoken by Uzbeks and Turkoman tribes in the North). The Turki language is unwritten in Afghanistan. All schoolchildren learn both Persian and Pushtu. The Government is encouraging the spread of Pushtu, the language of the Pathans. Education is free and nominally compulsory, elementary schools having been established in most centres; there are secondary schools in large urban areas and a university (established in 1932) at the capital.

FINANCE.

Afghanis.

National Income 2,000,000,000

The annual revenue consists largely of payments in kind. There are taxes on land, sales of animals, a grazing tax, customs duties, stamps, fines, receipts from State lands, monopolies, and factories and mining royalties; in addition certain businesses and individuals have now become eligible for income-tax.

There are various official rates of exchange for the Afghani which apply mainly to government departments trading in certain commodities. The free rates fluctuate as much as 20 per cent. or more but in June, 1960, were approximately as follows:

700 Afghanis = 100 Indian Rupees.
550 Afghanis = 100 Pakistani Rupees.
106 Afghanis = £1.
38 Afghanis = \$1.

Trade with U.K.

	1959	1960
Imports from U.K.	£481,229	£636,328
Exports to U.K.	2,493,846	3,665,686

Exports are mainly Persian lambskins (Karakuli), fruits, cotton, raw wool, carpets and spices, while the imports are chiefly cotton yarn and piece goods, metals, leather goods, tea, sugar, jute manufactures, paper and cement.

CAPITAL. Kabul (about 300,000). The chief commercial centres are Kabul and Kandahar (77,000). Other provincial capitals are Herat (75,000), Mazar-i-Sharif (42,000), Jalalabad (22,000) and Khanabad (18,000).

FLAG.—Vertical stripes of black, red and green, with white device in centre.

BRITISH EMBASSY

(Kabul)

Ambassador Extraordinary and Plenipotentiary, His Excellency Michael Cavenagh Gillett, C.M.G.
(1957) £4,115

1st Secretary, H. J. Downing.

Military Attaché, Col. W. H. R. Clifford, O.B.E.

2nd Secretaries, H. H. Hale; J. F. Taylor.

3rd Secretary, D. H. A. Hannay.

Kabul is distant 7,500 miles from London, transit 21 days; by air 2-4 days.

ALBANIA

Head of the State, Hadji Lechi, assumed office, July 24, 1953.

Prime Minister, General Enver Hodja, recognized by Gt. Britain, U.S.A. and U.S.S.R., Nov. 10, 1945.

Situated on the Adriatic Sea, Albania is bounded on the north and east by Yugoslavia and on the south by Greece. The area of the Republic is estimated at 10,700 sq. miles, with a population (1955) of 1,394,000.

On Nov. 10, 1945, the British, U.S.A. and U.S.S.R. governments decided to recognize the Albanian administration under Colonel-General Enver Hodja as the provisional government of Albania on the understanding that free elections would be held at an early date, in order that a truly representative government could be formed. Elections were held in December, 1945, on Jan. 11, 1946, the Constituent Assembly declared Albania an independent Republic, and on Aug. 7, 1946, Albania applied for admission to the United Nations, but its entry was vetoed by Great Britain and the U.S.A. It was admitted in 1955. United Kingdom diplomatic relations with Albania ceased in 1946.

Albania is almost entirely an agricultural country and the staple crops are wheat and maize.

CAPITAL, Tirana (pop. 50,000).

FLAG.—Black two-headed eagle surmounted by yellow outline star, all on a red field.

ANDORRA

A small, neutral principality situated on the southern slopes of the Pyrenees, between Spain and France, with an approximate area of 180 square miles and population of approximately 6,000. It is surrounded by mountains which attain an altitude of from 6,500 to 10,000 feet. Historians place the origin between the eighth and ninth centuries. Andorra is divided into six Parishes each of which has four Councillors elected by vote to the Valleys of Andorra Council of Twenty-four (Heads of families only may vote). The nominal heads of the state are the Bishop of Urgel, Spain, and the President of the French Republic. These two

"co-princes" can veto certain decisions of the Council of the Valleys but cannot impose their own decisions without the consent of the Council. Each co-prince nominates his own representative and has a Permanent Delegation and a Supreme Tribunal for the hearing of civil causes. These two Tribunals together form the Supreme Courts. The official language of the country is Catalan. Spanish *pesetas* and French *francs* are the accepted currency. A good road crossing the Valleys from Spain to France is open between May and November. Andorra has deposits of iron and quantities of alum and lead, stone quarries, granite, jasper and marble. Slate is abundant. Timber includes pine, fir, oak, birch and box-tree. Potatoes and cereals are produced in the highlands and tobacco in the plains. The climate is naturally cold for six months, but mild in spring and summer. The mountain slopes are suitable for skiing, and it is estimated that 400,000 tourists visit the Valleys during the year. The imports from U.K. during 1960 were £32,667.

CAPITAL: Andorra la Vella (population 2,200).

FLAG.—Three vertical bands, blue, yellow, red; Andorran coat of arms frequently imposed on central (yellow) band but not essential.

ARABIA

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30'—60° E. long. and 12° 45'—34° 50' N. lat. The north-western limit is generally taken from Akaba at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Muscat and Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, Dahana, and Rub Al Khali deserts), and the total population is believed to be about 10,000,000.

Language and Literature.—Arabic is spoken not only in Arabia, but in many other countries, either as the principal or auxiliary tongue, notably in Egypt and the Sudan, Libya, Morocco, Algeria, Iraq, Jordan, Syria, Lebanon; and to some extent also in Nigeria, Madagascar and Zanzibar. Owing to Moorish incursions it was formerly spoken in Spain, the Balearic Islands and Sicily. There are anthologies of pre- and post-Islamic poetry and a considerable prose literature, including popular romances and story cycles (such as "The Thousand Nights and One Night"), historical and biographical studies, and, resulting from the westernizing movement, there is a general revival of learning among Arabic speaking peoples. Many daily newspapers are published in Arabic and there is a native Arabic drama.

See also.—BAHRAIN; KUWAIT; MUSCAT AND OMAN; QATAR; SAUDI ARABIA; TRUCIAL STATES; YEMEN.

ARGENTINE REPUBLIC

(República Argentina.)

President, Dr. Arturo Frondizi, G.C.M.G.; born October 28, 1908; elected February 23, 1958; assumed office, May 1, 1958.

CABINET

(July 1, 1958)

Minister of the Interior, Dr. Alberto R. Vitolo.
Foreign Affairs, Dr. Miguel Angel Cavcano.
Economy, Dr. Roberto T. Alemann.
Education and Justice, Dr. Luis R. MacKay.
National Defence, Dr. Justo P. Villar.
Social Assistance and Public Health, Dr. Hector V. Noblia.
Labour and Social Security, Dr. Bruno Quijano.
Public Works and Service, Ing. Arturo Acevedo.

Secretaries of State (Subordinate to the Minister of Economy):

Agriculture and Livestock, Dr. Cesar I. Urien.
Treasury, Dr. Jorge Wehbe.

Commerce, Dr. Pedro M. Garcia Oliver.
Industry and Mining, Sr. José A. Blanco.
Fuel and Power, Ing. Nicolas Branca.

(Subordinate to the Minister of National Defence):

War, Gen. Rodolfo A. Larcher.
Marine, Rear-Adm. Gastón Clement.
Air (vacant).

(Subordinate to the Minister of Public Works and Services):

Public Works, Ing. Manuel Acuña.
Communications, Dr. Miguel F. Mujica.
Transport, Ing. Guido C. Belzoni.

EMBASSY IN LONDON,

9 Wilton Crescent, S.W.1.

[Belgravia: 3717]

Ambassador, His Excellency Rear-Admiral Teodoro Hartung (1958).

Counsellors, Dr. Juan Angel Peña Gaona; Luis Francisco Bengolea.

Military Attaché, Col. Ricardo Gutiérrez.

Naval Attaché, Rear-Admiral Carlos A. Sánchez Sañudo.

Air Attaché, Commodore J. F. T. Buden.

Economic Counsellor, Raúl E. Dejean del Castillo.

Financial Counsellor, Dr. Carlos C. Helbling.

First Secretaries, Dr. Ernesto L. E. de la Guardia; Andres E. Ceustermans.

Second Secretary, Santos Nestor Martínez.

Third Secretary, Vicente Guillermo Arnaud.

Attachés, Roberto Delleplane Rawson; Guillermo Jorge McGough.

Commercial Attaché, Dr. Alfredo Louro.

Consul-General, Raúl Eduardo Sidders.

Consulate-General, 53 Hans Place, S.W. 1 (Knightsbridge: 1701).

There are also Consulates in Liverpool and Cardiff.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the mountainous Cordilleras, with their plateaux, extend from the northern to the southern boundaries; on the east are the great plains. Those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless

pampas extending from the Bolivian boundary in the north to the Río Negro; and south of the Río Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Córdoba by the San Luis and Córdoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra Ventana, near Bahía Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course in Argentina; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Río Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic. The climate ranges from sub-tropical to cold temperate.

The Republic consists of 23 provinces and one federal district (Buenos Aires), comprising in all an area of 1,079,965 square miles, with an estimated population of 20,959,100 (June 30, 1960).

In 1959 births numbered 467,300 and deaths 765,000, and in Jan.-June, 1960, 228,700 and 81,500 respectively.

Government.—The estuary of La Plata was discovered in 1515 by Juan Díaz de Solís, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. This city was abandoned and later founded once more by Don Juan de Garay in 1580. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9), after a long campaign of liberation conducted by General José de San Martín, the independence of Argentina was declared by the Congress of Tucumán. A revolt in September, 1955, overthrew the Government under the presidency of General Juan D. Perón and an interim Provisional Government was formed by the late General Eduardo Lonardi. This Provisional presidency passed to General Pedro Aramburu in November, 1955.

A Constituent Assembly, elected on July 28, 1957, decided that the country should revert to the 1853 Constitution, in accordance with which, on February 23, 1958, general elections were held and Dr. Arturo Frondizi was elected President and Dr. Alejandro F. Gomez, Vice-President, for the normal period of six years. They assumed office on May 1, 1958, but several months later, owing to dissensions, Dr. Alejandro Gomez, the Vice-President, was forced to resign. The vice-presidency has not since been filled. In June, 1959, extensive changes including mainly the economic portfolios took place in the Cabinet. In April, 1961, most of these economic ministers were again replaced and the present ministers are as listed above.

Agriculture.—Of a total land area of approximately 700,000,000 acres, farms occupy about 425,000,000. About 60 per cent. of the farmland is in pasture, 10 per cent. in annual crops, 5 per cent. in permanent crops and the remaining 25 per cent. in forest and wasteland. A large proportion of the land is still held in large estates devoted to cattle raising but the number of small farms is increasing. The principal crops are wheat, maize, oats, barley, rye, linseed, sunflower seed, alfalfa, sugar and cotton. Argentina is pre-eminent in the production of beef, mutton and wool, being self-sufficient in basic foodstuffs and conducting a large export

trade in many others. Pastoral and agricultural products provide more than 90 per cent. of Argentina's exports and they originate mainly from the pampas or rich central plain which embraces the provinces of Buenos Aires, Santa Fé, Entre Ríos, Córdoba and La Pampa.

The following table shows the yield of the more important crops:

Crop	1959-60 Tons
Wheat.....	5,837,000
Maize.....	4,108,000
Linseed.....	825,000
Oats.....	983,000
Barley.....	955,000
Rye.....	1,060,000
Sunflower seed.....	1,093,000
Rice.....	190,000
Canary seed.....	36,100
Cotton (fibre production).....	90,600
Sugar cane.....	7,827,000
Millet.....	247,000
Tea.....	45,300
Tobacco.....	36,300

Livestock.—Livestock population (in millions) in 1959 was: cattle, 41; sheep, 46; pigs, 4; horses, 5.5; and goats, 5. Meat production from 12,200,000 cattle slaughtered in 1958 totalled 972,000 tons; from 9,200,000 sheep, 105,700 tons; and from 2,230,000 pigs, 106,000 tons. Cattle stocks declined from 46,000,000 in 1956 to 40,000,000 in 1958, but are again increasing and the former level is expected to be reached in 1961. Meat exports to U.K. in 1959 were 258,000 tons, compared with 310,000 in 1958; total meat exports fell from 428,000 tons in 1958 to 383,000 tons in 1959.

Mineral Production.—Oil is found in various parts of the Republic and is obtained to a considerable extent at Comodoro Rivadavia (Chubut), Mendoza, Plaza Huincul (Neuquen), Tartagal (Salta) and in other districts. A natural gas pipeline between Comodoro Rivadavia and Buenos Aires has been in operation since 1949. An oil pipeline from Campo Duran (Salta) to a refinery in San Lorenzo (Santa Fé) was put in service in March, 1960, as was also a natural gas pipeline from the same source to the outskirts of Buenos Aires.

The production of oil is of first importance to Argentina's rapidly expanding industries and, to some extent, to her economic and financial development. The crude oil output in 1959 and 1960 was:

	1959	1960
	Cubic Metres	
State.....	6,120,000	9,607,237
Private companies.....	973,000	558,945
Total.....	7,093,000	10,166,182

Coal, lead, zinc, tungsten, iron ore, sulphur, mica and salt are the other chief minerals being exploited. There are small worked deposits of beryllium, manganese, bismuth, uranium, antimony, copper, kaolin, arsenate, gold and silver. Coal production is approximately 300,000 tons per year; this is produced at the Río Turbio mine in the province of Santa Cruz. The output of other minerals is not large but greater attention is now being paid to the development of these natural resources.

Industries.—Meat-packing is one of the principal industries; flour-milling, sugar-refining, and the

wine industry are also important. In recent years great strides have been made by the textile industry. Manufacture of agricultural machinery and vehicles is increasing.

Communications.—There are 27,874 miles of railways of which 15,604 miles are broad gauge (5' 6"), 1,940 miles standard (4' 8½"). 9,664 miles of 1 metre, 537 miles of 0.75 metre and 129 miles of 0.60 metre. They are all State property. Plans are in hand for complete re-organization of the railways which is expected to bring a substantial reduction in the lengths of lines operated. The combined national and provincial road network totals approximately 91,500 miles of which 7,500 miles are surfaced. World Bank and other important loans are to be used for a considerable extension and surfacing improvement. There are air services between Argentina and all the neighbouring republics, Europe, Canada and the U.S.A.

Total tonnage entering Argentine ports was 20,517,633 in 1960. Of the latter figure, 1,388,650 tons were Argentine; 1,793,406 British; 804,801 Norwegian; 743,089 U.S.A.; 844,562 Liberian; 754,202 Netherlands; 856,784 Italian; 533,377 French; 398,289 German; 207,245 Brazilian; 359,271 Swedish and 179,181 Danish.

There are now 13 short-wave broadcasting stations, 67 medium wave (of which 17 are official), 4 television stations in Buenos Aires, 1 each in Mar del Plata, Mendoza and Córdoba. Television receivers numbered 800,000 at the end of 1960.

Defence.—The Army is organized in 5 infantry, 1 motorised, 1 armoured and 3 cavalry divisions and 3 mountain groups, and numbers about 5,000 officers, 15,000 N.C.O.s and 65–70,000 men on a peace footing.

The Navy consists of 2 cruisers, 1 aircraft carrier, 1 training cruiser, 9 destroyers, 7 frigates, 1 ice-breaker, 8 minesweepers, 9 motor torpedo boats, 2 submarines, 23 landing craft, 7 oilers, 8 transports, 2 supply ships and auxiliary vessels; 4 squadrons Naval Air Arm. Strength about 2,000 officers and 25,000 men.

The Air Force consists of 5 brigades and a training force, with a strength of about 1,500 officers and 35,000 other ranks. The aircraft include Meteor IV, Lincoln, Lancaster, Viking, Bristol 170 and Dove.

Education.—Primary Education is free and compulsory for four years between the ages of 6 and 14. The scattered population of the country districts constitutes a problem in attendance which is being gradually solved. Illiteracy of adults has fallen in the last 20 years; it is now almost non-existent except in the north and far south, where it is still about 42 per cent. Secondary Education is controlled by the National Government in National Colleges, in Normal Schools, and in Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are National Universities at Córdoba, Buenos Aires, San Miguel de Tucumán, Santa Fé, Mendoza, La Plata and Bahía Blanca.

Language and Literature.—Spanish is the language of the Republic and the literature of Spain is accepted as an inheritance by the people. There is little indigenous literature before the break from Spain, but all branches have flourished since the latter half of the nineteenth century, particularly journalism. Under the Perón régime many newspapers and reviews were closed down and others turned into Government mouthpieces. Since the 1955 revolution the traditional freedoms have been restored. Over 400 daily newspapers are published in Argentina, including 64 in the city of Buenos Aires. The English language newspaper

is the *Buenos Aires Herald* (daily). There are numerous other foreign language newspapers.

Finance.—The budget for 1960–61 showed a deficit of paper pesos 19,700,000,000, on a total expenditure estimated at 138,700,000,000.

TRADE			
	1959	1960	
	Paper pesos	Paper pesos

Ambassador in London, His Excellency Dr. Johannes Schwarzenberg (1955).
 Counsellor, Dr. Friedrich Kudernatsch.
 2nd Secretary, Dr. Egon Libsch.
 3rd Secretary, Dr. Christoph Cornaro.
 Military and Air Attaché, Lt.-Col. Franz Attems-Petzenstein.
 Attaché, Dr. Wolfgang Seifert.

Austria is a country of Central Europe bounded on the north by Czechoslovakia, on the south by Italy and Yugoslavia, on the east by Hungary, on the north-west by Germany and on the west by Switzerland. Its area is 32,376 square miles and its population 7,021,500 (1960).

Government.—The Austrian Federal Republic comprises nine States (Vienna, Lower Austria, Upper Austria, Salzburg, Tyrol, Vorarlberg, Carinthia, Styria and Burgenland) and was established in 1918 on the break-up of the Austro-Hungarian Empire. On March 13, 1938, as a result of the *Anschluss*, Austria (*Oesterreich*) was incorporated into the German *Reich* under the name *Ostmark*. After the liberation of Vienna in 1945, the Austrian Republic was reconstituted within the frontiers of 1937 and, after a period of provisional government, a freely elected Government took office on December 20, 1945. The country was divided at this time into four zones occupied respectively by the U.K., U.S.A., U.S.S.R. and France, while Vienna was jointly occupied by the four Powers. On May 15, 1955, the Austrian State Treaty was signed in Vienna by the Foreign Ministers of the four Powers and of Austria. This Treaty recognized the re-establishment of Austria as a sovereign, independent and democratic state, having the same frontiers as on January 1, 1938. It entered into force on July 27, 1955.

There is a National Assembly of 165 Deputies. At the last general elections in May, 1959, the Government Coalition of Austrian People's and Socialist Parties increased its large majority by one seat. The present state of the parties is as follows:

Austrian People's Party.....	79
Socialist Party.....	78
Freedom Party (right wing)	8

Religion and Education.—The predominant religion is Roman Catholic. Elementary education is free and compulsory between the ages of 6 and 14, and there are good facilities for secondary, technical and professional education. There are Universities at Vienna, Graz and Innsbruck.

Language and Literature.—The language of Austria is German, but the rights of the Slovene- and Croat-speaking minorities in Carinthia, Styria and Burgen-

land are protected. The press is free. There are now 10 daily papers in Vienna and 23 in the provinces, as well as numerous weeklies and monthlies.

Production and Industry.—Agriculture is the most important industry, the arable land producing wheat, rye, barley, oats, maize, potatoes, sugar beet, turnips, and miscellaneous crops. Many varieties of fruit trees flourish and the vineyards produce excellent wine. The pastures support horses, cattle and pigs. Timber forms a valuable source of Austria's indigenous wealth with about 35 per cent. of the total land area consisting of forest areas. Coniferous species predominate and account for more than 80 per cent. of the timber under cultivation. Hard-wood trees are mainly confined to Lower Austria. Spruce is the most common among the conifers (about 60 per cent. of the total) and beech is the most prevalent of the broad leaf trees.

Austria has important heavy industries. Production figures for 1960 include (in thousands of metric tons): pig iron 2,230, crude steel 3,160, rolled products 2,080. Raw magnesite, nitrogenous fertilizers, paper and chemical pulp are produced in quantity. In addition, motor cycles and motor-scooters, tractors and motor lorries are produced.

Hydro-electric power offers great possibilities in Austria. Much has already been done to develop it, and a long-term plan has been evolved for further development including greater export of electric current to surrounding countries. Production in 1960 was 15,965 million kWh.

Minerals.—There are large iron ore deposits and, in Eastern Austria, large oil deposits. In addition there are useful deposits of brown coal, magnesite, salt and lead. There are also limited deposits of copper.

FINANCE.

Budget	1960 (Schillings)
Ordinary Budget:	
Expenditure.....	42,100,000,000
Revenue.....	42,158,000,000
Extraordinary Budget:	
Expenditure.....	3,070,600,000
Revenue.....	133,000,000

Trade with U.K.

	1959	1960
Imports from U.K....	£16,246,264	£20,974,485
Exports to U.K.....	9,115,417	11,774,442

Currency.—The unit of currency is the *Schilling* of 100 *Groschen*, reintroduced in December, 1945. The official rate of exchange was fixed in May, 1953, at 72.80 Austrian schillings = £1, for all purposes.

CAPITAL, Vienna, on the Danube, population 1,614,287. Other towns are Graz (226,453), Linz (285,218), Salzburg (105,439), Innsbruck (102,759) and Klagenfurt (66,336).

FLAG.—Horizontal stripes of red, white, red, with eagle crest on white stripe.

BAHRAIN

Ruler, H. H. Shaikh Sulman bin Hamad Al Khalifah, K.C.M.G., K.C.I.E., born 1895; acceded February 3, 1942.

Bahrain consists of a group of low-lying islands situated halfway down the Persian Gulf some 20 miles off the east coast of Arabia. The largest of these, Bahrain Island itself, is about 30 miles long and 10 miles wide at its broadest. The two most important towns are Manama (61,726) and Muharrag (32,302). The latter is situated on a separate island of the same name which is connected with Bahrain Island by a causeway $1\frac{1}{2}$ miles long. The population of the islands at the Census held in 1959 was 143,135, of whom about half are the original inhabitants belonging to the Shia Sect, the remainder, including the ruling family, being Sunnis. There are 2,815 Europeans and Americans (about 75 per cent. of whom live at the Bahrain Petroleum Company's town of Awali) and 21,586 non-Bahrainis of whom a considerable number are Iranians, Indians and Pakistanis. The standard of living is high among the large and influential merchant class and steadily rising among the lower social groups.

The ruling family (Al Khalifah) came originally from the neighbourhood of Kuwait and occupied Bahrain, which was then in the hands of the Persians, in 1782. The state is administered under the Ruler by a number of departmental heads whose activities are co-ordinated by the Secretariat. A small Administration Council consisting of members of the ruling family and heads of departments has been created by the Ruler to consider and advise on general matters; Health, Education, Port, Agriculture and Water Committees exist to advise the respective departments. Local government is the responsibility of six municipalities and the Rural Affairs Department which cares for the villages. Half of the members of four of the municipal councils (Manama, Muharrag, Rifaa and Hidd) are elected by the public and half nominated by the Government; all the members of the other two, which were created later (Sitra and Jidhafs) are nominated by the Government. In addition to the Department of Rural Affairs, there is a Department of Social Affairs and a Labour Department. There is free primary and secondary education and free medical treatment.

In earlier days the only industry was the pearl trade, of which Bahrain was an important centre, but this has now declined and petroleum dominates the scene. Oil was discovered in 1932 and The Bahrain Petroleum Company, Limited (BAPCO), has its headquarters in Awali, some eleven miles from Manama. The company also operates a refinery and about 80 per cent. of the oil refined is piped from nearby Saudi Arabia.

The second source of revenue is that of Bahrain's traditional *entrepôt* trade. The island is conveniently situated to handle goods in transit to the mainland and it is estimated that not less than 70 per cent. of the imports unloaded at Bahrain were, up to a few years ago, destined for onward movement. A decline in this *entrepôt* trade has, however, occurred as there is a growing tendency, as new developments occur, for eastern Saudi Arabia, Qatar and other places in the Gulf to import direct. (In 1959 Bahrain re-exported 41.56 per cent. of its imports and in 1960, 36.45 per cent.) To counteract this trend and to encourage the *entrepôt* trade, free transit facilities were introduced in the port of Bahrain on January 1, 1958.

The principal imports and re-exports are household goods, foodstuffs, piece-goods, timber and building materials, vehicles and machinery.

Manama, the capital and commercial centre, extends for two miles along the northern shore of Bahrain Island and is a regular port of call for thirty steamship lines. Bahrain is also a port of call for B.O.A.C. and other international airlines. Banking services are provided by the Bank of Bahrain and by branches of the Eastern Bank, the British Bank of the Middle East and of the Arab Bank. There is a radio-telephone service to the United Kingdom and many other parts of the world. The electricity supply system is being extended over the island and piped water supplies are being introduced into the principal towns and villages.

The principal coin in use is a rupee introduced especially by the Reserve Bank of India for circulation in the Persian Gulf States. The value of this special rupee is the same as that of the Indian rupee (Rs. 13.285 = £1).

FLAG: Red, with vertical straight or serrated white bar next to staff.

CAPITAL, Ψ Manama; population, 61,726.

Secretary to the Government, G. W. R. Smith, M.B.E. H.M. Political Agent, E. P. Wiltshire (1959). Bahrain is the headquarters of H.M. Political Resident in the Persian Gulf, Sir William Luce, G.B.E., K.C.M.G.

BELGIUM

(Royaume de Belgique.)

King of the Belgians, H.M. King Baudouin, born Sept. 7, 1930; succeeded July 17, 1951, on the abdication of his father, King Leopold III, after having acted as Head of the State since August 11, 1950; married Dec. 15, 1960, Doña Fabiola de Mora y Aragón.

Heir Presumptive, H.R.H. Prince Albert, born June 6, 1934, brother of the King; married July 2, 1959, Donna Paola Ruffo di Calabria, and has issue Prince Philippe Léopold Louis Marie, b. April 15, 1960.

Agricultural Attaché, M. Maurice Cammaerts.
Attachés, M. Jean Coene; M. Maurice Carmen; Mlle. F. van Haelewyck.

A Kingdom of Western Europe, with a total area of 11,775 square miles and a population, Dec. 31, 1959 (including Eupen and Malmedy) of 9,123,824. The Kingdom of Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea.

Belgium has a frontier of 831 miles, and a seaboard of 42 miles. The Meuse and its tributary, the Sambre, divide it into two distinct regions, that in the west being generally level and fertile, while the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dykes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 526 feet. The principal rivers are the Scheldt and the Meuse. Brussels has a mean temperature of 49° F. (summer 65°, winter 37°).

Belgium is inhabited by two distinct races, the Flemish, of Germanic stock, and the Walloos, of Latin stock. Since 1938 there has been an increase in the Flemish population of almost 517,000 and in the Walloon population of about 200,000. Nearly all the inhabitants are Roman Catholics.

Government.—The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium, in violation of the terms of the treaty.

The Kingdom was again invaded by Germany on May 10, 1940. The whole Kingdom eventually fell into enemy hands and was occupied by Nazi troops until the victorious advance of the Allies in September, 1944. A monument at Hertain in the province of Hainault (where British forces crossed the frontier on Sept. 3, 1944), set up by the Anglo-Belgian Union, was unveiled on St. George's Day, 1949.

According to the Constitution of 1831 the form of government is a constitutional representative and hereditary monarchy with a bicameral legislature, consisting of the King, the Senate and the Chamber of Representatives. The Senate is partly directly and partly indirectly elected (or co-opted) for 4 years. 106 members out of 175 are directly elected. The Chamber of Representatives consists of not more than 1 per 40,000 inhabitants and is elected directly by all adult nationals.

The elections of March 26, 1961, returned to the Senate 81 Social Christians (Catholics), 73 Socialists, 17 Liberals, 1 Communist and 3 others, total, 175; and to the Chamber of Representatives 96 Social

Christians (Catholics), 84 Socialists, 20 Liberals, 5 Communists and 7 others, total 212.

Production.—Belgium is essentially a manufacturing country. With no natural resources except coal, annual production of which formerly averaged some 30,000,000 tons but which dropped to less than 23,000,000 tons in 1959 following the closing of uneconomic pits, industry is based largely on the processing for re-export of imported raw materials. A large proportion of the population is engaged in agriculture and forestry, the former supplying four-fifths of the population's needs. Principal industries are coal, steel and metal products (Mons, Charleroi, Liège, Namur, Hainault, Brabant and Limburg), textiles (Ghent, Bruges, Courtrai, Verviers, etc.), glass, nitrogen, heavy chemicals, sugar, breweries, etc. Steel output in 1959 was 6,502,566 metric tons.

EDUCATION.—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control, Roman Catholic largely predominating. There are 261 State grammar and high schools. In addition there are 83 elementary schools under the control of the State and 296 under the control of local government authorities. There are 1,037 private colleges and secondary schools. The Universities of Ghent and Liège are maintained by the State; those of Brussels and Louvain are independent institutions. After considerable opposition, Ghent University was in 1930 turned into a purely Flemish institution.

Language and Literature.—Flemish is spoken in the provinces of West Flanders, East Flanders, Antwerp, Limburg, and the northern half of Brabant, and French in the provinces of Hainault, Namur, Luxemburg, Liège and the southern half of Brabant. The town of Brussels is bilingual. The official languages are both Flemish and French, and also German in the districts acquired after the 1914-18 war. The literature of France and the Netherlands is supplemented by a current of indigenous Belgian literary activity, in both French and Flemish. Maurice Maeterlinck (1862-1949) was awarded the Nobel Prize for Literature in 1911. Louvain library, which ranked among the great libraries of the world, was destroyed by German invaders in the war of 1914-18; reconstructed, mainly by American funds, after peace was declared, it was again destroyed in May, 1940, by German invaders. There are about 58 daily newspapers (French, Flemish and some German) in Belgium.

FINANCE.

Exports to U.K.	57,468,747	68,307,362

COMMUNICATIONS.—On Dec. 31, 1959, there were 4,713 kilometres of normal gauge railways operated by the Belgian National Railways, of which 887 kilometres were electrified; the length of

light railways operated in 1959 was 1,234 kilometres (of which 874 were electrified). Belgian National Railways also operate 9,325 kilometres of regular bus routes. On Dec. 31, 1959, there were 741,042 telephone subscribers in Belgium.

Ship canals include *Ghent-Terneuzen* (18 miles, of which half is in Belgium and half in the Netherlands), constructed 1825-27 which, under the terms of an agreement recently signed by the Belgian and Netherlands Governments is to be improved to permit the passage to Ghent of ships up to 50,000 tons; *Roupeil* (20 miles, by which ships drawing 18 ft. reach Brussels from the sea; opened in 1922); and *Bruges* (from Zeebrugge on the North Sea to Bruges, 6½ miles; opened in 1922). The *Albert Canal* (7½ miles), which figured prominently in the fighting (Sept. 1944), for the relief of Belgium and the Netherlands and for the invasion of Germany, links Liège with Antwerp; it was completed in 1939 at the cost of £13,500,000, and accommodates barges up to 1,350 tons. Plans for the expansion and modernization of the port of Antwerp were announced in June, 1956. The estimated cost of the project is £36,000,000, of which the State will contribute £31,000,000, and work is expected to be complete by 1963. Inland waterway approaches to Antwerp are also to be improved. The river Meuse from the Dutch to the French frontiers, the river Sambre between Namur and Monceau, the river Scheldt from Antwerp-Ghent and the Brussels-Charleroi Canal will be widened or deepened to take barges up to 1,350 tons. These improvements are expected to be completed in 1966 and to cost £78,500,000. There are 10,046 kilometres of State roads and 1,309 kilometres of provincial roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine consisting (1959) of 98 vessels (629,052 tons), in addition to which there are 451 fishing boats (28,207 tons).

The Belgian National Airline operates regular services between Brussels and London, Manchester and many continental centres, as well as overseas services to the United States, the Congo and the U.S.S.R. A passenger and mail-carrying helicopter service, the first of its kind in the world, was inaugurated in 1953. Many foreign air-lines call at Brussels.

CITIES AND TOWNS.

The Capital, BRUSSELS, had a population (Dec. 31, 1959) of 1,003,937 (with suburbs). Other towns are Ψ Antwerp, the chief port (632,771); Ψ Ghent (230,240), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; Liège (451,232), the centre of the iron industry, and Charleroi (284,402), the important coal-mining and metallurgical centre; Mechlin or Malines (64,015); Ψ Ostend (55,446); Ψ Bruges (52,465). Brussels is 224 miles from London; transit, by rail and sea, 8 hrs.; by air, 1 hr.

NATIONAL FLAG.—3 vertical bands, black, yellow, red.

BELGIAN TRUSTEE TERRITORY

Ruanda and Urundi (Mandated July, 1919, now a Belgian Trust Territory), formed the N.W. corner of German East Africa from 5° S. lat. to the S. borders of Uganda and have an area of about 20,540 square miles, with a total native population (1957) of 4,630,089, 7,257 Europeans and 2,856 Asiatics. The territories lie W. of the Victoria Nyanza and N.E. of Lake Tanganyika, through which are their respective outlets. The chief crop is coffee, which forms one of the territories' most important exports. Other exports are livestock and hides derived from the large herds maintained by the African population. The capitals are Kigali (Ruanda) and Kitega (Urundi). The most important commercial centre is Usumbura in Urundi. It is the seat of the administration for the Trust Territory. There are 4,870 miles of roads and no railways.

Self-government had been promised for Ruanda and Urundi in 1961 and a National Council was set up for each by decree on Oct. 19, 1960. In Ruanda the President of the National Council on Jan. 29, 1961, announced the deposition of the Mwami (King) of Ruanda (then abroad) and the formation of a republic, recognizing U.N. trusteeship with Belgium as administering power. *De facto* recognition was given by Belgium on Feb. 1, 1961. In agreement with a resolution of the United Nations of April 21, legislative elections were to be held in Urundi on Sept. 18 and with a referendum on the monarchy in Ruanda on Sept. 25, 1961. The Ruanda Government, suspended its activities on Aug. 5 and transferred them to the Belgian authorities. In Urundi the political parties had already agreed on formation of a government.

BHUTAN

Bhutan (area, about 18,000 sq. miles; pop. about 700,000, mainly Buddhists) is an independent State bounded on the North and East by Tibet, on the South by India, and on the West by Sikkim, which is now a Protectorate of the Republic of India. In 1949, a treaty was concluded with the Government of India under which the Kingdom of Bhutan agreed to be guided by the Government of India in regard to its external relations, but it still retains complete independence, issues its own passports and has diplomatic representatives in Tibet as well as in India. It also receives from the Government of India an annual payment of about £35,000 as compensation for portions of its territory

annexed by the British Government in India in 1864. The principal cottage industries are weaving, metal works and crafts, and the main exports are timber, rice and wheat. The present Ruler is Maharaja Jigme Dorji Wangchuk who was born in 1929 and succeeded his father in March, 1952. The Government of India has a diplomatic representative whose headquarters are situated at Gangtok, capital of the neighbouring State of Sikkim.

CAPITAL, Punakha.

BOKHARA. See U.S.S.R.

BOLIVIA

(República de Bolivia)

President of the Republic, Señor Victor Paz Estenssoro, assumed office, August 6, 1960.

EMBASSY IN LONDON.

106 Eaton Square, S.W.1

[Belgravia: 4248]

Ambassador, His Excellency Don Manuel Barrau Pelaez (1959).

Consulate, 106 Eccleston Mews, S.W.1.

Hon. Consul, Reginald Bird.

There are Bolivian Consular Offices in *Liverpool, Birmingham, Hull, Cardiff and Glasgow.*

The Republic of Bolivia extends between lat. 10° and 23° S. and long. 57° 30' and 69° 45' W., and its area is estimated at 475,000 square miles with an estimated population (1960) of 3,462,002. The Republic derives its name from its liberator, Simon Bolivar (born 1783, died 1830).

The executive power is vested in a President elected for 4 years by direct popular vote. A President is ineligible for re-election for a further term until 4 years have elapsed after a former term has ended. A Vice-President is elected for four years and is ineligible for re-election either as President or Vice-President. Since 1952 the National Revolutionary Movement has been in power. Dr. Paz was President from 1952 to 1956. Dr. Hernan Siles Zuazo from 1956 to 1960 and Dr. Paz was re-elected in 1960.

The National Congress consists of a Senate of 28 members elected for 6 years, with one-third renewable every two years and a Chamber of Deputies of 68 members elected for four years, one-half renewable every two years.

The chief topographical feature is the great central plateau (65,000 square miles) over 500 miles in length, at an average altitude of 12,500 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu, Illimani, and Sajama, three of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni, Mamore, and Madre de Dios.

Mining, petroleum and agriculture are the principal industries. The ancient silver mines of Potosi are now worked chiefly for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after those of Malaya and Indonesia, the largest in the world, 19,718 metric tons being exported in 1960: copper, antimony, lead, zinc, asbestos, wolfram, bismuth, salt and sulphur are also found, and petroleum is being produced in growing quantities. The Republic has been self-supporting in most petroleum products since January, 1954, and crude petroleum exports in 1960 to neighbouring countries, mainly Argentina, were valued at over \$U.S. 3,224,000. Its agricultural produce consists chiefly of rice, barley, oats, sugar-cane, maize,

cotton, indigo, rubber, cacao, potatoes, cinchona bark, medicinal herbs, brazil nuts, &c. Manufactures are in a very undeveloped state, but the Government plans to encourage their development under a policy of "diversification of the economy". There are 1,454 miles of railways in operation. New lines are under construction from Corumbá to Santa Cruz (405 miles) and from Yacuiba to Santa Cruz (312), both of which are virtually completed. Work on a third new line, from Cochabamba to Santa Cruz, was suspended some years ago. Another railway project from La Paz to Coroico is partially completed. There are about 10,950 miles of telegraphs, and wireless services between Riberalta, La Paz, Cobija, Capitandí (Chaco). There is direct railway communication to the sea at Antofagasta (32 hours), Arica (10 hours), and Mollendo (2 days), and also to Buenos Aires (3½ days); branch lines run from Oruro to Cochabamba, and from Rio Mulato to Potosi, and from Potosi to Sucre, the legal capital. The principal railway line is the Antofagasta and Bolivia railroad (749 miles), which is British owned. Communication with Peru is effected by rail to Guayaquil and thence by steamer across Lake Titicaca to the railroad at Puno.

Commercial Aviation in Bolivia is conducted by Pan American-Grace Airways and Braniff International Airways (American) and Lloyd Aereo Boliviano (Bolivian), the two former providing international connections with U.S.A., West coast South American countries, Canal Zone, Brazil and Argentina; Lloyd Aereo Boliviano, maintaining a service to Lima and attending to local flights, links La Paz with Oruro, Cochabamba, Santa Cruz and Trinidad, &c., and connects with LAN of Chile. Argentine Airlines and Cruzeiro do Sul of Brazil. There is a new line from La Paz to Asuncion and Buenos Aires, also operated by Lloyd Aereo Boliviano.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones, and Antofagasta by the "Pacific War" of 1879-1882. The Peace Army amounts to about 5,000 all ranks, the War Effective being about 105,000.

Language and Literature.—The official language of the country is Spanish, but the Indian inhabitants (about two-thirds of the population) speak either Quechua or Aymará, the two races being more or less equal in numbers.

The Roman Catholic religion is established and subsidized. Elementary education is compulsory and free and there are secondary schools in urban centres. The high percentage of illiterates is yielding to modern methods; all illiterates under 21 are nominally compelled to attend school. Provision is also made for higher education; in addition to St. Francisco Xavier's University at Sucre, founded in 1624, there are seven other universities, the largest being the University of San Andres at La Paz. Bolivian literature has not yet produced authors of world-wide renown. There are seven principal daily newspapers in Bolivia, with an estimated daily circulation of 80,000-100,000.

FINANCE.

The 1961 figure for estimated revenue and expenditure is Bs. 430,000,000,000.

On December 15, 1956, the Boliviano was made freely convertible for all purposes without restriction. The rate of exchange in 1961 was Bs. 11,865 = U.S. \$1; Bs. 33,222 = £1. (See also p. 84.)

Trade with U.K.

	1959	1960
Imports from U.K.	£890,882	£1,116,887
Exports to U.K. . .	13,592,016	11,829,749

The principal exports are tin (almost all of which is exported to the U.K.), lead and antimony ores, silver, copper, wolfram, zinc, gold, nuts, hides and skins, vicuña wool and coffee; Bolivia also ranks as the second rubber-exporting country in South America after Brazil. The chief imports are wheat and flour, sugar, iron and steel products, machinery, vehicles and textiles.

SEAT OF GOVERNMENT, La Paz. Population (estimated 1960) 347,394. Other large centres are Cochabamba (90,037), Oruro (81,553), Santa Cruz (66,548), Sucre, the legal capital and seat of the judiciary (60,092), Potosí (53,528), and Tarija (20,127).

FLAG.—Three horizontal bands; Red, yellow, green; device on yellow band.

Consul-General, Sr. Hygas Chagas Pereira.

Consuls, Senhora Maria de Lourdes Castro Silva de Vincenzi; Sra. Maria José Monteiro de Carvalho.

There are also Brazilian Consular offices at Liverpool, Newcastle-on-Tyne, Southampton, Cardiff and Glasgow.

POSITION AND EXTENT.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Álvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. Brazil extends between lat. 5° 16' N. and 33° 45' S. and long. 34° 45' and 73° 59' 22" W., being 2,685 miles from north to south, and 2,690 from west to east, with a coast-line on the Atlantic of 4,604 miles. The Republic comprises an area of 3,289,440 square miles with a population (estimated December, 1960) of 66,302,000.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central state of the Matto Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. The principal ranges are *Serra do Mar* in São Paulo; the *Serra Geral* (Caparaó 9,393 feet) between Minas Gerais and Espírito Santo, the *Serra do Mantiqueira* (Itatiaia, 9,163 feet), and the *Serra do Espinhaço* (Itacolúmi, 5,748 feet), in the south-east of Minas Gerais; the *Serra do Paranã*, between Goiás and Minas Gerais, the *Serra dos Aymores*, which divide Espírito Santo from Minas Gerais; and the *Serra do Gurgueia*, *Branca* and *Araípe*, which envelop Piauí.

Brazil is unequalled for its rivers. The River Amazon has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its principal northern tributaries are the Rio Branco, Rio Negro, and *Japurá*; its southern tributaries are the *Juruá*, *Purus*, *Madeira* and *Tapajós*, while the *Xingu* meets it within 200 miles of its outflow into the Atlantic. The *Tocantins* and *Araguaia* flow northwards from the Plateau of Matto Grosso and the mountains of Goiás to the Gulf of Pará. The *Parnaíba* flows from the encircling mountains of Piauí into the Atlantic. The *São Francisco* rises in the South of Minas Gerais and traverses Bahia on its way to the eastern coast, between Alagoas and Sergipe. The *Paraguay*, rising in the south-west of Matto Grosso, flows through Paraguay to its confluence with the *Paraná*, which rises in the mountains of that name and divides Brazil from Paraguay. On the *Iguassu*, which unites with the Upper *Paraná* at the Brazil-Argentine-Paraguay boundary, are the majestic *Falls of the Iguassu* (200 ft.), and on the *São Francisco* are the no less famous falls of *Paulo Afonso* (260 ft.).

Government.—Brazil was colonized by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King João VI. of Portugal. On Nov. 15, 1889, Dom Pedro II., second of the line, was dethroned and a republic was proclaimed. Constitutional Government, under the Constitution of 1891, was suspended after the revolution of 1930. Dr. Getúlio Vargas, who had been Chief of the Provisional Government since 1930, was elected President and assumed office on July 20, 1934. By a *coup d'état* of Nov. 20, 1937, he closed Congress, abolished the old political parties and issued a new Constitution. On Sept. 28, 1946, the *Estado Novo* established by Vargas was superseded by a new constitution, limiting the Presidential term to 5 years (in place of 7) and restoring a Congress of two chambers. In October, 1960, elections took place in which Sr. Jânio Quadros was elected President to succeed Dr. Kubitschek. Sr. Quadros resigned in August, 1961, and was succeeded by the Vice-President, Sr. Goulart.

Production.—There are large and valuable mineral deposits including among others, iron ore (hematite), manganese, bauxite, beryllium, chrome, nickel, tungsten, cassiterite, lead, gold, monazite (containing rare earths and thorium) and zirconium. Diamonds and precious and semi-precious stones are also found. The mineral wealth is still exploited to only a very limited extent. Production is increasing, but is capable of great further development. The iron ore deposits are particularly rich. The estimated production of iron ore in 1960 was 10,000,000 metric tons. Oil production in 1960 was 26,615,000 barrels. Coal production in 1960 was estimated at 2,500,000 metric tons. 1,499,158 metric tons of steel ingots were produced in 1959 and 63,690,000 barrels of refined petroleum products in 1960.

The total of investments and financing by foreign firms amounted to U.S.\$359,334,000 in 1960. These investments covered a wide variety of industries; the largest single item (U.S.\$52,300,000) was for the automobile industry, which produced 133,078 units in 1960. Substantial investments were also made in shipbuilding and engineering.

Brazil's agricultural and vegetable produce is abundant, coffee, cotton, maize, sugar, cocoa, rice, citrus fruits and bananas being the main agricultural products, and rubber, carnauba wax, maté, jute and other fibres being the main vegetable extracts. Timber is also important.

The main exports of agricultural produce in 1960 were:—

	Metric Tons	Value \$U.S.
Coffee	1,009,000	713,000,000
Cotton	95,400	45,586,000
Cocoa beans.....	125,500	69,181,000

Coffee is grown mainly in the States of São Paulo and Paraná and to a lesser extent in Minas Gerais and Espírito Santo.

Defence.—The peace-time strength of the Army is 100,000, with an immediate reserve of 250,000. The Navy consists of 1 aircraft carrier, 2 cruisers, 19 destroyers and escorts, 11 corvettes, 3 submarines, 15 submarine chasers, 1 sail training ship, 3 ocean-going tugs, 3 survey vessels, a river monitors and various auxiliaries. The strength of the Navy is about 25,000 all ranks. The Air Force is the largest in South America, with 650 aircraft and a strength of 35,000 all ranks.

Education.—Primary education is carried out by State governments and municipalities and private initiative, in some cases with a Federal subsidy. In 1958 there were 82,953 primary schools (not including kindergartens) with an enrolment at the beginning of the school year (March) of 5,775,000 pupils. There were 182,602 teachers in the primary schools.

Secondary education is carried out by the Federal Government, State and Municipal Governments and by private schools. In 1959, there were 3,435 schools and 794,690 pupils. Other establishments classified at an intermediate level are: 1,256 commercial schools with an enrolment of 171,994 pupils; 1,149 normal schools with 21,526 scholars; 420 industrial training schools with 22,312 pupils; 88 agricultural schools with 5,679 students.

A total of 89,586 students attended 20 Federal and State Universities and other establishments offering courses at a university level in 1959. There were 544 faculties in all the universities of Brazil, and also 502 isolated faculties. Of this total (1,046), there were 331 federal, 138 State, 23 municipal and 554 private faculties.

Language and Literature.—Portuguese is the language of the country, but Italian, Spanish, German, Japanese and Arabic are spoken by immigrant minorities, and newspapers of considerable circulation are produced in those languages. English and French are currently spoken by educated Brazilians.

Until the second quarter of the nineteenth century Brazilian literature was dominated by Portugal. French influence is traceable for the next half century, since when a national school has come into existence and there are many modern authors of high standing. Public libraries have been established in urban centres and there is a flourishing national press with widely circulated daily and weekly newspapers; 25 daily newspapers are published at Rio de Janeiro.

Communications.—In 1958 there were about 38,000 kilometres of railways in service, largely of 1 metre gauge, but including some 4,000 kilometres of other gauges. Traffic carried in 1959 was—Passenger (km.), 12,034,000,000; Freight (ton-km.), 12,034,000,000; Livestock (head-km.), 1,569,000,000. During 1959 the ports of Rio de Janeiro and Santos together were used by 9,210 vessels representing 27,792,000 registered tons.

Nine foreign airlines, Air France, B.O.A.C., SAS, KLM, Aerolinas Argentinas, Swissair, Iberia, Alitalia and Lufthansa (in addition to Panair do Brasil) operate services between Brazil and Europe. Pan American World Airways, Braniff, Varig and Real Aerovias Brazil operate services between Brazil and U.S.A., and there are connections with all Latin American countries. Eight major domestic airlines, as well as the Brazilian Air Force, maintain services throughout the country. During 1960, 7,367,701 passengers passed through Brazilian airports; 77,400 tons of cargo were received and 75,993 despatched. The airports of Rio de Janeiro and São Paulo alone recorded 163,466 aircraft arrivals and departures in 1960.

Postal facilities in Brazil include approximately 5,750 post offices and 50,000 miles of telegraph. In 1958, 874,000 telephones were in use, of which a large proportion are dial operated.

	FINANCE. 1960 (millions of Cruzeiros)	1961* (millions of Cruzeiros)
Revenue.....	Cr.219,800,000	Cr.246,600,000
Expenditure....	Cr.296,400,000	Cr.302,300,000
	*Estimated	

The total external debt of Brazil on December 31, 1960, was U.S.\$2,890,291,000. The total internal debt of the Union in 1960 amounted to Crs.25,737,816,000; States (1959) Crs.34,651,905,000. The average for the year 1960 of the official selling rates of the Bank of Brazil was Crs.53.204 = £1. Crs.18.92 = U.S.\$1. The free exchange market for the year 1960 gave an average of Crs.565.02 = £1 and Crs.204.13 = U.S.\$1.

	TRADE (1960)
Total Imports.....	\$U.S.1,462,000,000*
Total Exports.....	\$U.S.1,269,000,000*

*Converted at official exchange rate.

Trade with U.K.		
	1959	1960
Imports from U.K...	£13,090,301	£18,883,236
Exports to U.K.....	37,049,343	29,195,742

The principal imports are fuel oils, machinery, wheat, chemicals, industrial raw materials and newsprint. The principal exports are coffee (about 70 per cent. of the total value of exports), cocoa, timber, iron ore, sugar, fruit, tobacco, wax, hides and skins and fibre.

CAPITAL.—Brasília (inaugurated on April 21 1960). Population (estimated 1960), 142,000. Other important centres are the former capital Ψ Rio de Janeiro, with a population (est. 1960 of 3,288,000); São Paulo 3,850,000; Ψ Salvador (Bahia) 656,000; Ψ Recife (Pernambuco) 784,000; Ψ Belém (Para) 401,000; Ψ Belo Horizonte (Minas Gerais) 600,000; Ψ Fortaleza (Ceará) 514,000; Ψ Niterói (Rio de Janeiro) 245,000; Curitiba (Paraná) 362,000; Ψ Porto Alegre (Rio Grande do Sul) 643,000.

FLAG.—Green, with yellow lozenge in centre; blue sphere with white band and stars in centre of lozenge.

LEGATION IN LONDON.

12, Queen's Gate Gardens, S.W.7.

[Knightsbridge: 9400]

Minister, His Excellency Georgi Petrov Zengulekov (1958).

The Republic of Bulgaria is bounded on the north by Roumania, on the west by Yugoslavia, on the east by the Black Sea, and on the south by Greece and Turkey. The total area is approximately 43,000 square miles, with a population at the end of 1959 of 7,797,800. The prevailing religion of the Bulgarians is the Eastern Orthodox Church (83 per cent.); Moslems (Turks and Pomaks) (14 per cent.) and various others (3 per cent.). For secular purposes the Gregorian (Western) Calendar is in use.

A Principality of Bulgaria was created by the *Treaty of Berlin* (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912-13 a successful war of the *Balkan League* against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of Southern Dobrudja to Roumania. On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the *Treaty of Neuilly*, which ceded to the Allies her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.

Nazi troops entered the country on March 3, 1941, and occupied Black Sea ports, but Bulgaria was not officially at war with the Soviet Union. On August 26, 1944, the government declared Bulgaria to be "neutral in the Russo-German war" and delegates to Cairo sought terms of peace from Great Britain and the United States. The Soviet Union refused to recognize the so-called "neutrality" and called upon Bulgaria to declare war against Germany, and no satisfactory reply being received on Sept. 5, 1944, the U.S.S.R. declared war on Bulgaria. Bulgaria then asked for an armistice and on Sept. 7 declared war on Germany, hostilities with U.S.S.R. ending on Sept. 10. The armistice with the Allies was signed in Moscow, Oct. 28. On Sept. 9 a *coup d'état* gave power to the Fatherland Front, a coalition of Communists, Agrarians, Social Democrats and Republican officers and intellectuals. In August, 1945, the main body of Agrarians and Social Democrats left the Government. The Peace Treaty with Bulgaria was signed on Feb. 22, 1947, and came into force on Sept. 15, 1947. It recognized the return of Southern Dobrudja to Bulgaria.

GOVERNMENT.—On Sept. 8, 1946, a referendum was held, at which, according to the published results, an overwhelming majority declared for the abolition of the Monarchy and the setting up of a

Republic. On Oct. 27, a general election to a Grand National Assembly (with power to make a constitution) was held; the Opposition won 207 seats out of 465. According to the new Constitution the legislature is a single chamber National Assembly or *Subranie* elected by adult suffrage on the basis of one deputy to every 30,000 inhabitants for a maximum term of four years. The opposition Agrarian Party was suppressed on Aug. 24, 1947, following the pronouncement of the death sentence on its leader, Nikola Petkov. The opposition newspapers ceased to appear after April, 1947. Nine opposition Social Democrats continued to sit in the National Assembly until they were placed under restraint in July, 1948. The Government Social Democratic Party fused with the Workers' (Communist) Party on Aug. 12, 1948.

Bulgaria linked herself to the other countries of Eastern Europe by a series of treaties of friendship, collaboration and mutual aid, the first of which was signed with Yugoslavia on November 27, 1947. This was followed by similar treaties with Roumania (January 16, 1948), the Soviet Union (March 18), Czechoslovakia (April 26), Poland (May 30) and Hungary (July 6). The treaty with Yugoslavia was abrogated in 1949.

PRODUCTION.—Bulgaria is essentially an agricultural country, but is engaged upon an elaborate programme of industrialization. Over 90 per cent. of the country's agriculture has been collectivized, and a much smaller proportion mechanized. The principal crops are wheat, maize, beet, tomatoes, tobacco, oleaginous seeds, fruit, vegetables and cotton. Several of the basic crops were adversely affected by bad weather in 1956, and Bulgaria has continued to import considerable quantities of wheat from the U.S.S.R. The live-stock includes sheep, goats, cattle, pigs, horses, asses, mules and water buffaloes.

In 1960 electricity generating capacity totalled 4,657 million kWh., compared with 3,869 million kWh. in 1959. Much of this increase is from hydro-electric stations. The considerable progress which has been made in the exploitation of Bulgaria's mineral resources, is shown by the following production figures:—

	Production 1960	Percentage increase over 1959
Coal.....	17,125,000	12
Lead.....	40,000	23
Zinc.....	17,000	86
Copper concentrate (20 per cent. copper base)	71,000	29
Steel.....	253,000	10

There are other mineral deposits of varying importance, but no production figures are available. There are also a number of thermal and mineral springs, several of which have been modernized. Bulgaria's newly acquired heavy industry includes an iron and steel works which inaugurated its first blast furnace in 1957, a nitrogenous fertilizer plant and other chemical works.

DEFENCE.—Under the Peace Treaty signed between Bulgaria and the Allies, the Bulgarian Army is limited to 55,000 men, but it is believed at present to be at least 200,000 strong.

EDUCATION.—Free basic education is compulsory for children from 7 to 15 years inclusive. The Bulgarian educational system was reorganized on Soviet lines in September, 1950, and in 1959–60 there were 5,854 primary schools, 178 combined primary and secondary schools, 173 secondary

schools and 210 vocational training schools; there were 1,471,797 pupils and 53,740 teachers.

There are 20 universities (known as Higher Educational Establishments and including universities proper and Academies of Music, Science, etc.), including those of Sofia, Plovdiv and Varna. In 1959–60 there were stated to be 48,880 students at higher educational establishments.

LANGUAGE AND LITERATURE.—Bulgarian is a Southern Slavonic tongue, closely allied to Russian (see U.S.S.R.) with local admixtures of modern Greek, Albanian and Turkish words. There is a modern literature, chiefly educational and popular. The alphabet is Cyrillic, as in Russia. In 1958 there were 6 daily newspapers in Sofia.

FINANCE. 1961
leva

Budget revenue (estimated)..... 33,156,399,000
Budget expenditure (estimated) ... 32,956,242,000

TRADE.

The principal imports are wool, industrial and agricultural machinery, metals, tools, chemicals, dyestuffs, drugs, rubber, paper. The principal exports are cereals, tobacco, fruit, vegetables, oil seeds, oils, fats, textiles, eggs, chemicals, essential oils including attar of roses, hardwoods, non-ferrous metals, and livestock. In 1960, 82 per cent. of Bulgaria's foreign trade was with the Soviet bloc, including 54 per cent. with the Soviet Union.

Trade with U.K.

	1959	1960
Imports from U.K....	£1,903,942	£2,668,831
Exports to U.K.....	1,505,534	2,235,815

CAPITAL, Sofia. Pop. (1956), 725,756, at the foot of the Vitosha Range, the capital and commercial centre, is on the main railway line to Istanbul, 338 miles from the Black Sea port of Varna (119,769) and 125 miles from Lom (23,015), on the Danube; ΨBurgas (72,795) is also a Black Sea Port, those on the Danube being ΨRuse (83,472), ΨSvishtov (18,537), ΨVidin (23,984). Other important trading and industrial centres are Plovdiv (162,518) and Pleven (57,758).

FLAG.—3 horizontal bands, white, green, red; national emblem on white stripe near hoist.

BRITISH LEGATION.

Residence, 69 Boulevard Tolbuhin, Sofia.

BURMA

(Republic of the Union of Burma.)

President (from March 13, 1957), U Win Maung.
Prime Minister and Minister of Defence, Home Affairs, Information, Local Administrations and Relief and Resettlement, U Nu (April 4, 1960).

BURMESE EMBASSY IN LONDON

19A Charles St., Berkeley Square, W.1.

Ambassador, His Excellency U Hla Maung (1961).

Area and Population.—Burma forms the western portion of the Indo-Chinese district of the continent of Asia, lying between 9° 58' and 28° N. latitude and 92° 11' and 101° 0' E. longitude, with an extreme length of approximately 1,200 miles and an extreme width of 575 miles. It has a sea coast on the Bay of Bengal to the south and west

and a frontier with Pakistan and India to the north-west; in the north and east the frontier with China was determined by a treaty with the People's Republic in October, 1960, and is now in process of demarcation; there is a short frontier with Laos in the east, while the long finger of Tenasserim stretches southward along the west coast of the Malay Peninsula, forming a frontier with Thailand to the east. The total area of the Union is about 262,000 square miles, with an officially estimated population of 21,526,824—about 82 persons to the square mile.

Political Divisions.—The Union of Burma comprises Burma proper (at about 145,000 sq. miles by far the largest unit), administered direct by the Central Government, and also the Shan State (about 57,500 sq. miles), Kachin State (about 29,500 sq. miles), Karen State (about 11,600 sq. miles) and Kayah State (about 4,600 sq. miles) each with their own State Governments. There is also the Special Division of the Chins (about 14,000 sq. miles). Two additional States—Arakanese and Mon—are proposed.

Physical Features.—Burma falls into four natural divisions, Arakan (with the Chin Hills region), the Irrawaddy basin, the old Province of Tenasserim, including the Salween basin and extending southwards to the Burma-Siam peninsula, and the elevated plateau on the east made up of the Shan States. Mountains enclose Burma on three sides, the highest point being Hka-kabo Razi (19,296 ft.) in the northern Kachin hills. Mt. Popa, 4,981 ft., in the Myingyan district is an extinct volcano and a well-known landmark in Central Burma. The principal river systems are the Kaladan-Lemro in Arakan, the Irrawaddy-Chindwin and the Sittang in Central Burma, and the Salween which flows through the Shan Plateau.

Races, Language and Religions.—The indigenous inhabitants who entered Burma from the north and east are of similar racial types and speak languages of the Tibeto-Burman, Mon-Khmer and Tai groups. The three important non-indigenous elements are Indians and Pakistanis (about 800,000), Chinese (about 300,000), with Europeans and Anglo-Burmans numbering less than 10,000. Burmese is the official language, but minority languages include Shan, Karen, Chin, and the various Kachin dialects. English is still spoken in educated circles in Rangoon and elsewhere. Buddhism is the religion of 85 per cent. of the people, with 5 per cent. Animists, 4 per cent. Moslems, 4 per cent. Hindus and rather less than 3 per cent. Christians.

Government.—Burma formed part of British India until April 1, 1937, when it became a separate territory with a considerable measure of self-government. The country was invaded by the Japanese in December, 1941, and until October, 1945, the Civil Government functioned in India.

The Treaty which made Burma an Independent State outside the British Commonwealth was signed in London on Oct. 17, 1947, and came into force on Jan. 4, 1948. For the first three years of its existence the Republic was torn by insurrection, mutiny and disorder. By 1951 the Union Government had recovered control of most of the country, though Papun, the capital of the Karen rebels, was not recovered till 1955.

The first general election under the new Constitution, during 1951, resulted in the return to power of the "Anti-Fascist People's Freedom League." At the second general election in April, 1956, the A.F.P.F.L. was returned with a reduced majority (171 out of 250 seats). In April, 1958,

U Nu quarrelled with his principal supporters and in September invited General Ne Win and a caretaker Government to take office. In February, 1959, this arrangement was prolonged for another year. Elections were held in February, 1960, resulting in overwhelming victory for the "Clean" faction of the A.F.P.F.L. led by U Nu, now renamed the Union Party. U Nu's Government took office on April 4, 1960.

Defence.—Burma has an army of fair strength and quality, but the navy and air force are small. The British Services Mission was withdrawn in 1954.

Education.—The literacy rate is high compared with other Asiatic countries, there is no caste system and women engage freely in social intercourse and play an important part in agriculture and retail trade. The University of Rangoon was founded in 1920 with a Medical College, an Engineering College and a Teachers' Training College attached. The Intermediate College at Mandalay was granted full university status in 1958; there are also intermediate colleges at Moulmein, Bassein, Taunggyi, Magwe, and Kyaukpadaung (in Arakan) and a new one is planned at Myitkyina. Good progress is being made in re-organization and extension of the educational system.

Finance.—The chief sources of revenue are profits on state trading, income-tax, customs duties, commercial taxes and excise duties; the chief heads of expenditure are general administration, defence, education, police and development. The budget estimates for 1960-61 were (in terms of sterling): receipts £105,372,000; expenditure £108,736,000.

Production, Industry and Commerce.—Two-thirds of the population depend on agriculture; the chief products are rice, oilseeds (sesamum and groundnut), maize, millet, cotton, beans, wheat and grain. Rice is the mainstay of Burma's economy; before the war Burma was the world's largest exporter of rice, her total production of over 7,000,000 tons a year being derived from 12,000,000 acres or 70 per cent. of the country's total cropped area. The pre-war yearly average of rice exports was over 3,000,000 tons. In 1960 exports were 1,784,177 tons. The net area sown to all crops in 1959-60 was 17,515,000 acres and reserved forests covered 19,311,029 acres; 1,360,000 acres were irrigated in 1955-56. The principal export after rice is teak of which some 200,000 tons were exported annually before the war. The 1960 figure was 94,000 tons. Burma is rich in minerals, including petroleum, lead, silver, tungsten, zinc, tin, wolfram and gemstones. Of these, petroleum is the most important. Production in 1960 was 142,731,341 gallons. There is a new refinery at the main oilfield, Chauk, and the capacity of the Syriam refinery near Rangoon is due to be increased from 185,000 to 685,000 gallons a day. Their combined output of petroleum products is sufficient for most of Burma's needs. The main production of petroleum is handled by a joint venture between the Burma Oil Company and the Union Government.

Under the Government's development plan, a steel rolling mill, a jute bag and twine mill, two cotton spinning and weaving mills, a pharmaceutical plant, a large hydro-electric scheme and three sugar factories are in production.

Trade with U.K.

	1959	1960
Imports from U.K.	£14,513,158	£11,538,475
Exports to U.K.	7,941,171	10,175,800

Burma joined the Colombo Plan in 1952 and is now receiving important assistance from member countries.

Communications.—The Irrawaddy and its chief tributary, the Chindwin, form important waterways, the main stream being navigable beyond Bhamo (900 miles from its mouth) and carrying much traffic.

ψ The chief seaports are Rangoon, Moulmein, Akyab and Bassein.

The Burma Railways had a total length in 1945 of 2,300 miles, extending to Myitkyina, on the Upper Irrawaddy. The first diesel locomotives were introduced in 1958 and a further 50 diesel-electric locomotives are to be purchased with a recent World Bank loan. There are about 5,472 miles of main roads. Since the war a considerable network of internal air services has come into being. The airport at Mingaladon, about 9 miles north of Rangoon, has been reconstructed and handles much international traffic.

Chief Towns.—The chief city of Lower Burma, and the seat of the government of the Union is Rangoon, on the left bank of the Rangoon river, about 21 miles from the sea. The city contains the Shwe Dagon pagoda, much venerated by Burmese Buddhists. Population (1953), about 740,000. Mandalay, the chief city of Upper Burma had a population of (1953) 186,000. Moulmein one of 103,000 and Bassein 78,000. Pagan, on the Irrawaddy, S.W. of Mandalay, contains many sacred buildings of interest to antiquaries.

NATIONAL FLAG.

The Union flag is red, with a canton of blue bearing a large white five-pointed star surrounded by 5 smaller stars.

ROYAL CAMBODIAN EMBASSY IN LONDON

26 Townshend Road, N.W.8.

[Primrose: 8011]

Ambassador in London, His Excellency Au Chheun.

1st Secretary, Chea San.

3rd Secretary, Limhoeur Limtouch.

Attaché, Meas Sonn.

Area and Population.—A kingdom with an area of some 70,000 square miles and a population of 5,000,000 (estimated), Cambodia is situated between Thailand to the west and South Vietnam to the east. It is bordered on the north and south respectively by Laos and the Gulf of Siam.

History.—Once a powerful kingdom, which, as the Khmer Empire, flourished between the tenth and fourteenth centuries, Cambodia became a French protectorate in 1863 and was granted independence within the French Union as an Associate State in 1949. Two years earlier Prince (then King) Norodom Sihanouk had promulgated a constitution providing for parliamentary government. The Geneva Conference of 1954 took Cambodia further along the road to independence by ensuring the withdrawal of French and Vietnamese forces from the country, and the process was completed when, in January, 1955, Cambodia became financially and economically independent not only from France but also from Laos and Vietnam. The present Government is drawn from the Popular Socialist Community, a movement formed by Prince Norodom Sihanouk who abdicated from the throne in March, 1955, in favour of his parents, King Norodom Suramarit and Queen Kossamak. The community holds all 61 seats in the National Assembly as a result of the last general elections which were held in March, 1958. Following the death of King Norodom Suramarit in April, 1960, a Council of Regency was in being until June, when Prince Norodom Sihanouk assumed office as Head of State.

Geography, Economy and Communications.—Cambodia is largely underdeveloped and underpopulated with an economy based on agriculture, fishing and forestry, the bulk of its people being rice-growing farmers living in the basins of the Mekong and Tonlé Sap rivers. In addition to rice, which is the staple crop, the major products are rubber, livestock, maize, timber, pepper, palm sugar, fresh and dried fish, kapok, beans, soya and tobacco. Rice and rubber are the main exports. Seventy-five per cent. of the total land area is virgin forest abounding in wild life of all kinds, including big game. The climate is tropical monsoon with a rainy season from May to October.

The country has some 4,000 kilometres of roads, of which about a third are hard-surfaced and passable in the rainy season. There is one railway which runs from Phnom-Penh to the Thai border, where it connects with the Thai railway system. Phnom-Penh is a river port capable of receiving ships of up to 2,500 tons all the year round. The main installations of a deep water port at Sihanoukville (Kompong Som) on the Gulf of Thailand have been completed and can receive ships up to 10,000 tons. The port is linked to Phnom-Penh by a modern highway. A railway linking Sihanoukville to the capital is under construction. There is as yet no large-scale industry but various small industrial plants, including a textile mill, and cement, paper and plywood factories and a jute mill are scheduled for construction under the Five Year Plan (1960-64). Cambodia receives substantial foreign aid, notably from the U.S.A., China, France, the Soviet Union, the Colombo Plan countries and Japan. Since 1956, Cambodia has sought to increase her foreign trade by the conclusion of trade exchange and payments agreements with several countries, including China, Poland, Czechoslovakia, North Vietnam, Yugoslavia, the United Arab Republic, Laos and Japan.

The Cambodian airline, Royal Air Cambodge, operates services with Air Vietnam and Thai International between Phnom-Penh and Saigon and

Bangkok, and with Cathay Pacific Airways between Phnom-Penh and Hong Kong. There are flights also to Siemreap where the famous ruins of Angkor Wat are situated. Cargo boats from Singapore and Hong Kong visit Phnom-Penh regularly.

Culture and Education. Cambodian culture is predominantly Indo-Siamese and is distinct from Annamite culture which is largely derived from China. The state religion is Buddhism of the "Little Vehicle". There are fairly large Chinese (300,000) and Vietnamese (400,000) minorities. The national language is Cambodian, although French is widely spoken and is still largely the official language of government and commerce. Considerable efforts are now being devoted to the development of education and new schools, colleges and technical institutes have been established. A Buddhist University has been inaugurated in Phnom-Penh, where there are also Faculties of Medicine and Law. A residential teachers' training college is now in operation.

Trade with U.K.

CAMEROON REPUBLIC

President, Ahmadou Ahidjo, elected for 5 years, May 5, 1960.

The Cameroon Republic lies on the Gulf of Guinea between Nigeria and the Central African Republic. It has an area of 143,415 sq. miles and a population estimated at 3,187,000. Principal products are cassava, bananas, millet, sorghum, groundnuts and cocoa. The principal exports in 1960 were cocoa, coffee and aluminium. Timber, cotton, rubber, palm kernels and bananas are also exported. Trade with the United Kingdom in 1960 amounted in value to: Imports, £510,994; Exports to U.K., £471,551, rather less than in 1959.

Formerly part of the German colony of Kamerun, the territory was administered by France from 1916 until 1959 as a trusteeship, latterly under the auspices of the United Nations Organization. Agreement regarding independence for the territory was reached between the Prime Minister of the Cameroons and the French Government in October, 1958, and from December of that year the Cameroonian Government assumed responsibility for all matters except defence, external relations and currency which were reserved to France. Cancellation of the French trusteeship on Jan. 1, 1960, was approved by the General Assembly of the United Nations and on that date the territory became independent under the name of the Cameroon Republic. A constitution for the new Republic, modelled on that of France, was approved at a referendum held on February 21, 1960.

CAPITAL.—Yaoundé (32,000). Ψ Douala (119,000), is an important commercial centre.

FLAG.—Vertical stripes of green, red and yellow.

Consulate, 3 Hamilton Place, W.x.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from just north of Arica to Cape Horn south, between lat. 17° 15' and 55° 59' S., and long. 66° 30' and 75° 48' W. Extreme length of the country is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a greater height. The chain, however, lowers considerably towards its southern extremity. The Andes form a boundary with Argentina, and at the head of the pass where the international road from Chile to Argentina crosses the frontier, has been erected a statue of *Christ the Redeemer*, 26 feet high, made of bronze from old cannon, to commemorate the peaceful settlement of a boundary dispute in 1902. There are no rivers of great size, and none of them is of much service as a navigable highway. In the north the country is arid.

Among the island possessions of Chile are the *Juan Fernandez group* (2 islands) about 360 miles distant from Valparaíso, where a wireless station has been erected. One of these islands is the reputed scene of Alexander Selkirk's (Robinson Crusoe) shipwreck. *Easter Island* (27° 8' S. and 109° 28' W.), about 2,000 miles distant in the South Pacific Ocean, contains stone platforms and hundreds of stone figures, the origin of which has not yet been determined. The area of the island is about 45 sq. miles.

Chile is divided into 25 provinces and the total area of the Republic is estimated at 290,000 square miles, with an estimated population of 7,440,000 (April, 1959). In 1929 Chile signed a treaty ceding

the province of Tacna to Peru but retained the province of Arica in return for a payment to Peru of £1,200,000. Included in the total are four racial divisions: (a) Spanish settlers and their descendants; (b) indigenous Araucanian Indians, Fuegians, and Changos; (c) mixed Spanish Indians; and (d) European immigrants.

In 1958 the registered births per thousand inhabitants numbered 29.5; marriages 6.0; and deaths 10.1.

GOVERNMENT.—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1810, when a revolutionary war, culminating in the *Battle of Maipú* (April 5, 1818), achieved the independence of the nation. Under the present Constitution (Aug. 30, 1925), the President is elected by direct choice of all Chilean citizens who have the right to vote. The National Congress consists of a Senate of 45 members, and of a Chamber of 147 Deputies. There is universal suffrage for persons who have attained the age of 21, can read and write, and are on the electoral roll. Chilean women obtained equal voting rights with men on Dec. 21, 1948, before which they only participated in municipal elections.

PRODUCTION, &c.—Agriculture and mining are the principal occupations, though industrial development is being actively encouraged by the Government. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, hemp, chill-pepper, potatoes, onions and melons are grown extensively; the vine and all European fruit-trees flourish in the central zone and fruit is an important export item. Excellent wines are produced and exported and are becoming more widely known in world markets. There are large timber tracts in the central and southern zones of Chile, some types of which were exported to Europe and the Argentine, but high production costs have caused serious difficulties to this export trade. The mineral wealth is considerable, the country being particularly rich in copper-ore, iron-ore and nitrate. Uranium is also said to have been discovered in small quantities. The production of refined copper in 1960 was 496,956 metric tons. The rainless north is the scene of the only commercial production of nitrate of soda (Chile saltpetre) from natural sources in the world. Production in 1960 (including potassium nitrate) was 924,635 metric tons. Chile also produces iodine, manganese ore, coal, and a small quantity of gold. 1,423,691 metric tons of coal and 4,843,331 metric tons of iron ores were produced in 1960. The country has also large deposits of high grade sulphur, but mostly around high extinct volcanoes in the Andes Cordillera, difficult of access. Production of refined sulphur has hitherto been in relatively small quantities. Annual production is between 25,000 and 50,000 metric tons. Oil was struck in Magallanes (Tierra del Fuego) in December, 1945, and the industry is now self-supporting. Production in 1960 was 1,149,604 cubic metres. An oleoduct 70 kilometres long now joins the principal field in Cerro Manantiales with Clarence Bay. Almost all the production is now being refined at Concon, a few miles north of Valparaíso. A large steel plant was completed and started operation during 1950 at Huachipato, near Concepcion. In 1959-60 the output of steel billets from Huachipato totalled 417,121 metric tons; rolling mill products totalled 292,642 metric tons.

In recent years a considerable cotton and woollen textile industry has developed. Minor industries include tanning, flour milling, lumbering, distilling, fish canning and whaling, brewing, and the manufacture of starch, soap, biscuits, rope, glassware,

plastic goods, pottery, paint, boots and shoes, hosiery, millinery, cheese, furniture, matches, brushes, cordage, paper and newsprint, radio receivers and valves, rubber products, synthetic detergents, motor vehicle tyres and cigarettes. Domestic industries include weaving and embroidery.

COMMUNICATIONS.—Most of the country's commerce is distributed along its lengthy sea-board in Chilean ships, which have a virtual monopoly of cabotage. Foreign trade continues to be carried on mostly by foreign steamship lines operating either directly to the West Coasts of North and South America, or *via* the Panama Canal to Europe or *via* the Straits of Magellan. Chilean vessels have also been participating for many years in foreign trade with North America and Europe. The Chilean mercantile marine in 1960 numbered 74 vessels (of over 100 tons gross) with a total gross tonnage of 168,454. Under a law promulgated in June 1956, 50 per cent. of Chile's foreign trade must be carried by Chilean vessels.

The first railway was opened in 1851 and there are now 6,575 miles of track, of which 5,360 miles are State owned. A metre-gauge line runs from Pisagua to La Calera, just north of Santiago. From La Calera to Puerto Montt runs the wide-gauge (1.676 metre) main line of the State railways.

With the completion of a section of 435 miles from Corumbá, Brazil, to Santa Cruz, Bolivia, the Trans-Continental Line will link the Chilean Pacific port of Arica with Rio de Janeiro on the Atlantic. Another line from Antofagasta to Salta (Argentine) was opened in 1948. Further south, the Trans-Andine Railway connects Valparaíso on the Pacific with Buenos Aires, crossing the Andes at 11,500 ft.

Chile is served by 11 international airlines which, in 1958, carried 143,271 passengers in and out of the country. Four-fifths of the domestic traffic is carried by the State-owned *Línea Aérea Nacional*, which in 1960 carried 388,000 passengers over 429,900,000 passenger-miles. Chile has an extensive system of airports which are being modernized with U.S. financial assistance.

Chile's road system is about 55,000 kilometres in length, but only an estimated 3,000 kilometres are first-class paved highways. At the end of 1960 there were registered 57,578 cars and taxis, 63,238 goods vehicles, 5,515 buses and 19,304 motor cycles and scooters.

The country had 183,363 telephone subscribers at the end of 1959. Telegrams are handled by 607 telegraph offices, mostly owned by the State.

DEFENCE.—Military service is compulsory, but not all those who are liable are required. Recruitment for the Navy is voluntary. In 1960 the Army had 6 infantry and 1 cavalry divisions with a total strength of 1,900 officers, 11,000 regular other ranks plus 9,000 conscripts. In addition there is a police force of "Carabineros" of 21,200 officers and men. The Air Force had 600 officers and 6,180 other ranks with a strength of 230 aircraft. The Navy consisted of 2 cruisers, 5 destroyers, 3 frigates, 3 corvettes, 1 submarine, all operational. There is a support force of transports, tankers, 1 submarine depot ship and ancillary small craft. The strength of the Navy is 937 officers and 13,785 men, plus a Marine Force for coastal defence of 87 officers and 2,200 men.

EDUCATION is free, elementary education being compulsory since 1920; there were (in 1958) 26,042 pupils at infant schools, 752,275 at primary, and 164,019 at secondary schools. There are 8 Universities (3 in Santiago, 2 in Valparaíso, 1 in Antofagasta, 1 in Concepcion and 1 in Valdivia). The religion is Roman Catholic.

LANGUAGE AND LITERATURE.—Spanish is the language of the country, with admixtures of local words of Indian origin. Recent efforts have reduced illiteracy and have thus afforded access to the literature of Spain, to supplement the vigorous national output. The Nobel Prize for Literature was awarded in 1945 to Señoría Gabriela Mistral, for Chilean verse and prose. There are over 100 newspapers and a large number of periodicals, including some devoted to professional, scientific and social subjects.

FINANCE

1960

Escudos

Local Currency:

Revenue..... 836,000,000
Expenditure..... 811,100,000

Foreign Currency:

Revenue..... \$93,400,000
Expenditure..... 93,600,000

At the end of 1960 funded debt amounted to—Internal, E° 51,900,000 and \$243,700,000; External, E° 1,400,000 at local currency equivalent. The total outstanding foreign debt service in Sept., 1960, including commercial obligation, amounted to \$608,300,000.

Chile's official exchange rate registered with the International Monetary Fund is E° 1.049 = U.S. \$1. The official rate of exchange in June, 1961, was about E° 2.94 = £1.

EXTERNAL TRADE.

1960

Total imports..... U.S. \$499,672,000
Total exports..... \$490,017,000

Trade with U.K.

1959

1960

Imports from U.K.... £6,445,826 £13,485,216
Exports to U.K..... 26,244,361 34,031,627

The principal exports are metallic and non-metallic minerals (refined copper, ingots and bars, iron ore, etc.), cereals, vegetables, fruit and wool. The principal imports are industrial oils, raw cotton, chemicals, machinery, tools, electrical and transport equipment and sugar.

CAPITAL, Santiago (December, 1956) 1,627,962 (Greater Santiago). Other large towns are:—Ψ Valparaíso (261,684), Ψ Concepción (158,941), Temuco (109,141), Viña del Mar (107,563), Chillán (79,461), Talca (75,354), Ψ Antofagasta (74,050), Ψ Valdivia (72,988), Ψ Talcahuano (75,643), Ψ Iquique (47,906), Ψ Punta Arenas (44,597). Punta Arenas, on the Straits of Magellan, is the southernmost city in the world.

FLAG.—a horizontal bands, white, red; in top sixth a white star on blue square, next staff.

BRITISH CHAMBER OF COMMERCE IN THE REPUBLIC OF CHILE, Calle Bandera 227 (Piso 4°) Casilla 4087, Santiago and Calle Blanco 689, Casilla 1676, Valparaíso (Branches at Concepción, Talcahuano and Punta Arenas).

Valparaíso is distant from London 9,000 miles *via* Panama, and 11,000 *via* the Strait; transit 28 to 45 days.

CHINA

(Ta Chung-Hua Jen-Min Kung-Ho Kuo—The People's Republic of China.)

Chairman of the Central People's Government Council, Liu Shao-Chi, elected April, 1959.

Vice-Chairman, Gen. Chu Teh.

Prime Minister, Chou En-Lai.

Deputy Prime Minister and Foreign Secretary, Gen. Chen Yi.

Deputy Prime Minister and Minister of Defence, Lin Piao.

Minister of Agriculture, Liao Lu-Yen.

Minister for Internal Affairs, Tseng Shang.

LONDON OFFICE.

49 Portland Place, W.1.

Chargé d'Affaires, Huan Hsiang.

AREA AND POPULATION.—Estimates of population vary considerably. A census was carried out in June, 1953, and on Nov. 1, 1954, the National Bureau of Statistics, Peking, announced a final figure of 582,603,417 for the population of mainland China. 11,743,320 Chinese were estimated to be resident or studying abroad. The Bureau stated that 51.82 per cent. of the mainland population were males and 48.18 per cent. females; the birth rate averaged 37 per 1,000 and the death rate 17 per thousand. Distribution of the population by nationalities was:—

Chinese.... 547,283,057 Mongolians... 1,462,955
Tibetans.... 2,775,622 *Tribal peoples

Manchus.... 2,418,931 Other.... 6,718,025

* Incl. many aboriginal or primitive tribes in remote western districts of Western China. The total area has been stated as approximately 4,300,000 sq. miles.

The population of China was estimated by the United Nations in 1959 at 640,000,000.

THE PROVINCES OF CHINA.

The National Bureau of Statistics, Peking, published in 1954 the results of the 1953 Census of Population. Populations of the Chinese provinces, including Tibet and Inner Mongolia, are shown below. The Provinces of Jehol and Sikang were abolished on July 19, 1955, their territories being divided up; those of Jehol among Hebei, Liaoning and the Inner Mongolian Region; those of Sikang being absorbed by Szechwan Province.

Population Census of 1953.

† These 4 Eastern Provinces constitute the "East China People's Government" set up by the Communist Central Government in January, 1950. This regional régime includes the large centres of Shanghai, Nanking, Tsingtao and Foochow.

‡ The population of Formosa was estimated at approximately 11,000,000 at the end of 1959.

§ These 3 Provinces constitute the "North-Western China People's Government."

§ Sinkiang (Chinese Turkestan) was converted into Sinkiang-Uigur Autonomous Region in July, 1955. Autonomous local governments were set up by the various nationalities in the area—Uigurs, Kazakhs, Tadzhikhs, etc. Sinkiang is the largest province of China, about one-sixth of the whole area of the country. Some 80 per cent. of its population are Uigurs, of the Moslem religion.

Government.—On October 10, 1911, the party of reform forced the Imperial dynasty, to a "voluntary" abdication, and a Republic was proclaimed at Wuchang.

Many years of internal dissension followed the establishment of the Republic, but in 1923 the Kuomintang (Nationalist Party) achieved supremacy and established a one-party government in Nanking which was accorded recognition by the Foreign Powers. After more than seven years of war with Japan (July 7, 1937, to Aug. 5, 1945), disputes arose between the Central Government and the Chinese Communists. There were hopes of a peaceful settlement in January, 1946, when, as a result of mediation by General George C. Marshall (then President Truman's special Envoy in China), an armistice was signed at Chungking and an all-party Consultative Conference was convened to resolve the disputed issues. These hopes of agreement were disappointed and hostilities broke out again.

On April 18, 1947, President Chiang Kai-shek attempted to unite the country by declaring one-party rule in China at an end and by announcing the formation of a new State Council to include representatives of the main political parties. The Communists declined to co-operate in the formation of this body and the Central Government's offer to reserve a number of seats for Communist representatives was later withdrawn.

A National Assembly was elected on Nov. 22, 1947, for six years. It had the power to elect and recall the President and Vice-President of the Republic, to amend the Constitution and to ratify amendments thereto proposed by the Legislative Yuan.

The year 1949 was marked by a rising tide of Communist successes. In January, 1949, Marshal Chiang Kai-shek resigned office as President and the

authority of the Nationalist Government rapidly declined as province after province was occupied by Communist forces. The Nationalist Government abandoned Nanking on April 23, 1949, and headquarters were removed to Chungking. In August, the Communist forces advanced into South China, and by January, 1950, the Nationalists retained control only in the islands of Formosa (Taiwan) and Hainan, and in some remote parts of Western China. Taipei, in Formosa, is now the Nationalist capital.

On Sept. 30, 1949, the "People's Political Consultative Conference" of 636 Delegates meeting at Peking elected a council of 56 members and a National Committee of 180 members to make proposals and recommendations to the Council. On October 1, Mao Tse-tung, Chairman of the Central People's Government, proclaimed at Peking the inauguration of the People's Republic of China.

The U.S.S.R. broke off negotiations with the Nationalist Government on October 2, 1949, and established diplomatic relations with the Central People's Government. The régime was recognized by all the Communist-dominated countries, by Great Britain on Jan. 6, 1950, and by a number of other countries.

Defence.—An order introducing compulsory military service for all men between the ages of 18 and 40 was passed by the Chinese Parliament in 1955. Regulations were also approved for the creation of an officer corps with ranks similar to those of the Russian Army. Nearly 80,000,000 men were made liable for service in the Army (3 years), the Navy (5 years) or the Air Force (4 years). It was announced that the new Army would be organized in 14 combat and supporting corps, including a "political" division to serve with front-line troops.

Religion.—The indigenous religions of China are Confucianism (which includes ancestor worship), Taoism (originally a philosophy rather than a religion) and, since its introduction in the first century of the Christian era, Buddhism. All three are professed and practised by Chinese other than Moslems, Christians and Jews.

Education.—Under the Nationalist Government education was compulsory from the age of 6 to 12. This policy is stated to have been continued by the Communists. In 1952 there were about 550,000 primary schools in operation with about 45,000,000 pupils. There were also 5,100 secondary schools, with about 2,000,000 pupils. The majority of the 35 provinces have provincial universities in addition to national and private institutions. In August, 1950, the Communist Government took over all schools supported by foreign missions, and in October, 1950, closed the Roman Catholic University in Peking.

Language and Literature.—The Chinese language has many dialects, Cantonese, Hakka, Swatow, Foochow, Wenchow, Ning-po and Wu, and, most important, Mandarin (of which the standard form is Pekinese). There are many sub-dialects of Mandarin, some of which are closely allied while others diverge so much as to be almost separate dialects. Chinese literature is among the richest in the world and paper has been employed for writing and printing for nearly 2,000 years, movable wooden blocks having superseded carved wooden slabs many centuries ago. Confucian books of religion, histories, works dealing with philosophy and the arts, poetry, and literary criticism, novels and romances are abundant and many have been translated into other tongues. In 1937 there were 337 daily newspapers and 1,881 periodicals published at Nanking, Shanghai

Peking, Tientsin, Hankow, Canton and other large centres. All English-language newspapers in China had been closed down by March, 1951. As from Jan. 1, 1956, all Chinese newspapers appeared with characters printed horizontally, instead of in vertical form, and reading from left to right. Official approval was given in February, 1956, to a 30-letter Latin alphabet to replace some 30,000 ideographic characters at present used in written Chinese. The new alphabet has been introduced for trial in a Government campaign to modernize Chinese writing and eradicate illiteracy.

Currency and Exchange—The *yuan* was re-valued with effect from March 1, 1955, on the basis of 10,000 old *yuan* for one new *yuan*. From the same date the official exchange rates for sterling and dollars were altered to:

6.893 *yuan* = £1; 2.46 *yuan* = \$1.

Production and Industry—China is essentially an agricultural and pastoral country. Wheat, barley, maize, millet and other cereals, with peas and beans, are grown in the northern provinces, and rice and sugar in the south. Rice is the staple food of the inhabitants. Cotton (mostly in valleys of the Yangtze and Yellow Rivers), tea (in the west and south), with hemp, jute and flax, are the most important crops.

It was estimated that 230,000 sq. miles of cultivated land, about one-half of the total, had been affected by a series of national disasters—drought, floods, typhoons and insect pests—during 1960. Strict food rationing was in force in August, 1960, and early in 1961 it was announced that 20,000,000 workers had been transferred from urban areas and rural subsidiary occupations to agricultural work in the autumn of 1960. 750,000 tons (28,000,000 bushels) of wheat and 260,000 tons (12,133,000 bushels) of barley were purchased from Canada and 1,050,000 tons of Australian wheat and 40,000 tons of flour in 1960–61.

Total grain production in 1959 was 270,050,000 tons, an increase of 8 per cent. over the previous year. Sugar production increased to 1,130,000 tons and salt production to 11,040,000 tons.

Livestock is raised in large numbers. Silkworm culture is one of the oldest industries. Cottons, woollens and silks are manufactured in large quantities, and flour and rice milling have grown important in late years. The mineral wealth of the country is very great, coal of excellent quality being produced; iron ore, tin, antimony, wolfram, bismuth and molybdenum are also abundantly found. Oil is produced in the province of Kansu and in South Manchuria. Coal production in 1959 was 347,800,000 tons, an increase of 25 per cent. over 1958; crude oil production rose by 63 per cent. to 3,700,000, still a comparatively small amount. It was announced that 18,400,000 tons of steel were produced in 1960, compared with 13,350,000 tons in 1959 and 8,000,000 tons in 1958. Pig iron produced in 1959 totalled 20,500,000 tons.

Other production figures (with percentage increases over the year) were: Cotton, 2,410,000 tons (31 p.c.); Electricity, 41,500,000,000 kWh (51 p.c.); Cement, 12,270,000 tons (32 p.c.); Timber, 41,200,000 cu. metres (18 p.c.); Fertilizers, 1,333,000 tons (64 p.c.); Machine tools, 70,000 (40 p.c.); and Paper, 2,310,000 tons (31 p.c.).

TRADE.

The value of the Special Trade of China (Imports retained for home consumption and Exports of merchandise of home produce or manufacture) is shown below for a series of years in Standard Dollars.

Year	Imports	Exports
1939.....	\$1,333,654,000	\$1,027,247,000
1940.....	2,027,143,000	1,970,121,000
1942.....	1,444,340,000	191,700,000
1943.....	3,114,320,000	164,460,000
1946.....	1,501,160,000	412,110,000
1947.....	10,681,326,570	6,376,504,300

The principal articles of export were animals and animal products; oils; textiles fibres; ores and metals and tea. The principal imports were raw cotton, cotton yarn and thread; oils, fats and soap; motor cars and ships; books, paper and paper-making materials; chemicals; metals and ores; and dyes, paints and varnishes.

Trade with U.K.

	1959	1960
Imports from U.K. . .	£24,405,763	£31,415,703
Exports to U.K. . . .	19,687,907	24,901,427

COMMUNICATIONS.—Of the total area of China about half consists of table lands and mountainous districts where communications and travel are generally difficult and dangerous, the highest point being *Minyaa Konka* (24,900 ft.) about 150 miles west of Chungking. To open up sea communications from the south-west the *Burma Road*, over 770 miles in length from Lashio, Burma, to Kunming in Yunnan, was constructed in 1937–39. The road was the chief highway for war supplies to China, until cut by the Japanese in 1942; the success of the Allies in Burma in 1945 restored the use of the road and of communication between Yunnan and Burmese ports. Motor lorries perform the journey in seven days, in contrast with the difficult and lengthy pack-mule transit before the road was constructed. There is motor road and railway connexion between Chungking and French Indo-China. In districts not served by roads the principal means of communication from E. to W. is afforded by the rivers, of which the principal are the Yangtze (3,400 miles), Hoangho or Yellow (2,600) and the West River (1,650), and from N. to S. by the Grand Canal.

Telegraphs connect Peking with Europe and Tibet. There are about 97,000 miles of land lines and several high-power wireless installations. Telephones, municipal and long-distance, are in general use in the settled and trade areas, and wireless telephony has been installed in the large centres.

SPECIAL TERRITORY

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly demarcated), from Kashmir to Burma, but is separated therefrom by the Himalayas. The area is estimated at 463,000 square miles with a population of 1,273,969 (1953 Census.) About one-fifth of the male population are monks and polyandry is common. There is an army with an establishment of 10,000 all ranks, consisting of infantry serving on a militia basis and armed with modern weapons. India imports from Tibet wool, borax, salt, and musk; musk, horn and herbs are sent to China. The imports are chiefly cotton and woollen goods, grain, hardware, glass, sugar, biscuits, dried fruits and tobacco, with silver bullion and coined rupees to balance the excess of exports. The present currency is reckoned in *sangs* (strongly paper). The 1939 value was about 8 *sangs* = 1 rupee, which has risen in favour of Tibet to about 34 *sangs* = 1 rupee (1946). Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces.

In October, 1950, Chinese Communist forces invaded Eastern Tibet. The Dalai Lama later left

Lhasa and set up his Government at Yatung, near the Sikkim frontier. On May 23, 1951, an agreement was reached whereby Tibet accepted Chinese suzerainty. The Communist army was allowed entry into Tibet and a Communist military and administrative headquarters set up.

A series of revolts against Chinese rule over several years culminated on March 17, 1959, in a rising in Lhasa. Heavy fighting continued for several days before the rebellion was suppressed by Chinese troops and military rule imposed. The Dalai Lama fled to India where he and his followers were granted political asylum. On May 4, the Indian Government announced that an estimated 9,000 Tibetans had entered India or the Himalayan hill states. The 7,000 refugees who had entered Assam would be settled in a suitable region of India. On March 28, 1959, the Chinese Prime Minister issued an order dissolving the Tibetan Government and setting up a 16-member Preparatory Committee for the Tibetan Autonomous Region, with the Panchen Lama as Chairman and including 4 Chinese officials.

CAPITAL.—Peking, population, 2,768,149 (Census of 1953). The population of the principal ports and trade marts is estimated as follows: Nanking, 1,020,000; Ψ Amoy, 240,000; Ψ Antung, 200,000; Ψ Canton, 1,496,000; Changsha, 700,000; Ψ Chefoo, 250,000; Clinkiang, 220,000; Chungking, 1,110,000; Ψ Foochow, 400,000; Ψ Hangchow, 600,000; Hankow (including Wuchang and Hanyang), 800,000; Harbin, 638,000; Hsinking, 420,000; Ichang, 110,000; Kirin, 150,000; Ψ Mengtsz, 200,000; Mukden, 1,551,000; Newchwang, 170,000; Ψ Ningpo, 300,000; Ψ Shanghai, (1953) 6,204,417; Shasi, 150,000; Ψ Sochow, 300,000; Ψ Swatow, 200,000; Tientsin, (1953) 2,693,831; Ψ Tsingtao, 756,000.

FLAG OF "PEOPLE'S REPUBLIC."—The "Gate of Heavenly Peace" at Peking, superimposed on the national flag, with a large star and four small stars at the top, and a wheel at the base. The whole is encircled by ears of wheat and rice.

(República de Colombia.)

President, Dr. Alberto Lleras Comargo, elected May 4, 1958.

EMBASSY IN LONDON

3 Hans Crescent, S.W.1.

(Kensington; 9177)

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Vergilio Barco (1961).

Chargé d'Affaires, Señor Dr. Pablo Samper.

1st Secretary, Dr. Jaime Canal Rivas.

Consulate-General, 3 Hans Crescent, S.W.1.

Consul-General, Señor Pablo Uribe Grajales.

There are Colombian Consular Offices at Liverpool and Glasgow.

The Republic of Colombia lies in the extreme north-west of South America, having a coastline on both the Atlantic and Pacific Oceans. It

is situated between 2° 40' S. to 12° 25' N. lat. and 68° to 79° W. long., with an estimated area of 461,606 square miles, and a population (estimated 1958) of 13,500,000.

The Colombian coast was visited in 1502 by Christopher Columbus, and in 1536 a Spanish expedition under Jiménez de Quesada penetrated to the interior and established on the site of the present capital a government which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811-1824. In 1819 Simon Bolivar (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829-1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and is now a separate Republic.

Following a period of dictatorship and government by decree from 1953, a military junta established on May 10, 1957, prepared the way for a return to democratic government. Congressional elections were held on March 16, 1958, which yielded a Liberal majority of votes. A plebiscite voted on December 1, 1957, had made constitutional changes by which the office of president would during the next sixteen years alternate between candidates of the Liberal and Conservative parties who would hold office for terms of four years, while the two parties would have equal representation in Congress and in the national and departmental governments. On May 4, 1958, presidential elections returned the Liberal Señor Alberto Lleras Comargo, supported by Liberal and Conservative votes.

There are three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast tablelands, cool and healthy. This temperate region is the most densely peopled portion of the Republic.

The principal rivers are the Magdalena, Cauca, Atrato, Caquetá, Meta, Putumayo and Patia. The Patia flows through the famous Minima Gorge of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guaitara) is spanned by the Rumichaca Arch, or Inca's Bridge, of natural stone. On the Rio Bogotá is the Great Fall of Tequendama, 482 feet in height.

The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; in 1960 some 55 million barrels of petroleum were produced and prospecting for new sources of production is in progress in many parts of the Republic. The principal agricultural products are coffee (which accounts for 80 per cent. of total exports by value), cotton, bananas, rice, cocoa, sugar, tobacco, maize, wheat and other cereals. Manufactures, mainly for home consumption, consist of woollen, cotton and artificial silk textiles, leather goods, chemicals, asbestos-cement goods, many pharmaceutical products, rubber goods, including motor tyres, furniture, boots and shoes, confectionery, cigarettes, beer, cement, glass containers and, since the latter part of 1954, steel. Successive foreign exchange crises have led to the encouragement by the Government of the rapid development of new industries, including the local assembly and partial

manufacture of motor vehicles, radio sets and office machinery.

The Navy consists of 4 destroyers, 3 frigates, some gunboats and some other small craft, with personnel about 4,500, including one battalion of marines; a battalion of the Colombian army served with the United Nations forces in Korea. The first railway was opened in 1855, about 1,914 miles being open in 1949. The "Atlantic Railway" running through the Magdalena Valley, which links the departmental lines running down to the river, and completes the connection between Bogotá and Santa Maria, was opened in July, 1961. There are about 2,200 miles of rail in use at present. There were also (1955) some 13,125 miles of metalled roads, of which 8,440 miles are national highways and the remainder departmental and municipal highways; this excludes "dirt" roads (passable by motors in dry weather only). Colombia was granted loans totalling \$47,300,000 (118,500,000 pesos) by the International Bank, towards the total of 525,000,000 pesos expected to be required to complete the rehabilitation of highways which is now in progress. The national telephone and telegraph system consists primarily of wireless links between the more important centres. Large appropriations have been made for modernization of the country's telecommunication system. A large volume of traffic is carried on the River Magdalena, which is navigable for 900 miles. There are daily passenger and cargo air services between Bogotá and all the principal towns. There are daily services to the U.S.A., frequent services to other countries in South America, a direct B.O.A.C. *Britannia* service once a week to London, and other services to London daily *via* New York, three times a week *via* Jamaica and twice a week *via* Paris, and air mail is delivered to the United Kingdom 3 to 5 days after leaving Bogotá. There are wireless stations in the main cities, and a television station in Bogotá with relays to Manizales, Medellín, Cali and Tunja.

Roman Catholicism is the established religion.

Language and Literature.—Spanish is the language of the country and education has been free since 1870. Great efforts have been made in reducing illiteracy and it is estimated that about 60 per cent. of those over 10 years of age can read and write. In addition to the National University with headquarters at Bogotá there are 20 other universities. There is a flourishing press in urban areas and a national literature supplements the rich inheritance from the time of Spanish rule.

CAPITAL, Bogotá, pop. (1958 estimate), 1,064,740. Bogotá is an inland city in the Eastern Cordilleras, at an elevation of 8,600 to 9,000 feet above sea-level. Other centres are Medellín (545,360), Cali (503,530), Barranquilla (392,330), Bucaramanga (173,740) Ψ Cartagena (162,610), and Manizales (156,270).

FLAG.—Broad yellow band in upper half, surmounting equal bands of blue and red.

BRITISH EMBASSY.

(Carrera 8, No. 15-46, Bogotá.)

2nd Secretary (Commercial), H. F. Franks.
Information Secretary, J. Tobon.

BRITISH CONSULAR OFFICES.

There are British Consular Offices at Bogotá, Barranquilla, Medellín, Cali and Cartagena.

BRITISH COUNCIL.—Representative in Colombia, G. F. de Sausmarez, Calle 22, No. 6-21, Bogotá.

Distant from London 6,200 miles; sea and local air transit, to Bogotá (*via* Cartagena or Barranquilla), 22 days. Also *via* New York, minimum 12 days. By air, direct or *via* New York, Paris or Jamaica, 1 day.

THE CONGOLESE REPUBLIC

President, Joseph Kasavubu, assumed office June 30, 1960.

The State of the Congo, founded in 1885, became a Belgian Colony on Nov. 15, 1908, and was administered by Belgium until June 30, 1960. Situated between long. 12°-31° E. and lat. 5° N.-13° S., the Congolese Republic comprises an area of 905,582 sq. miles, with a native population (Dec. 31, 1958) of 13,540,182 and a non-native population of 112,759. About three-quarters of the latter were Belgians, many of whom have since left the country.

Government.—On June 30, 1960, the Belgian Congo became an independent unitary state under the Presidency of M. Kasavubu with a provisional constitution, the *Loi Fondamentale*, drawn up by the metropolitan Belgian Parliament. On July 11, M. Moïse Tshombe announced the independence of the State of Katanga and although he failed to obtain international recognition he continued to act in an independent manner with the creation of a visa system, a Katanga franc, etc. M. Albert Kalondji followed in August with the creation of the "Autonomous Mining State of South Kasai" at Bakwanga.

By August there were about 25,000 U.N. troops in the Congo, sent at the request of the Prime Minister, M. Lumumba, but they were unable to prevent his attack on South Kasai. This action finally persuaded President Kasavubu to dismiss Lumumba on September 5 and to appoint M. Ileo, President of the Senate, in his stead. On September 14, Col. Mobutu, Chief of the General Staff, announced that he had decided to "neutralize" all politicians and political institutions until January 1, 1961. The Congo would be governed by a College of Commissioners General under the chairmanship of M. Justin Bomboko.

Many of the ministers of the Lumumba government fled to Stanleyville in October and on December 14, M. Antoine Gisenga, Vice-Premier in the Lumumba government, announced that he had decided to transfer the capital of the Republic to Stanleyville where the "legal" government would in future reside. His government was recognized by the Soviet Union, countries of the Eastern bloc and some members of the Afro-Asian bloc. In Leopoldville the College of Commissioners General continued in office until February 9, 1961, when, following a rumour that the U.S.A. and the Soviet Union had made an agreement to disarm the Congolese army, a pre-Round Table conference of Congolese leaders meeting at Leopoldville called for the immediate formation of a provisional government. M. Ileo was again appointed Prime Minister by the President. In March, 1961, all Congolese leaders, with the exception of M. Gisenga, met at Tananarive to discuss the future political structure of the Congo. It was decided in principle that it should become a Confederation of as yet undetermined number of sovereign states. In the weeks following the conference 14 new states were formed but none of them had a legal basis for their existence pending the legal modification of the *Loi Fondamentale*. A further conference met at Coquilhatville at the end of April to discuss the implementation of the Tananarive decisions. M. Gisenga again stayed away. M. Tshombe attended and was detained. (See also EVENTS OF THE YEAR.)

Climate.—Apart from the coastal district in the West which is fairly dry, the rainfall averages between 60 and 80 inches. The average temperature is about 80° F., but in the South the winter temperature can fall nearly to freezing point. Sleeping sickness, once very prevalent and destructive, is now decreasing, and malaria is under control in Leopoldville and Matadi.

Extensive forest cover the central districts.

Production.—Oil palms are plentiful, and supply an increasing trade in palm-oil and palm-kernels. Cotton, cocoa, rubber and coffee are successfully planted. The Colony is rich in minerals. The metallic mineral output in 1958 was: copper, 237,562 tons; raw zinc concentrates, 200,017 tons; coal, 29,323 tons; manganese ore, 338,145 tons; cobalt (alloys), 4,342 tons; (granulated), 4,263 tons; cassiterite, 11,783 tons and smelted tin, 2,684 tons. Refined gold amounted in 1958 to 10,957 kg.; diamonds (Lubilash) 16,004,145 carats and (Kasai) 669,329 carats. Extensive radium deposits exist in the Elisabethville Province, where there are enormous deposits of copper. Bukama is the centre of an extensive tin-belt, and alluvial and reef gold are found in the North-eastern Congo. Diamond-bearing gravels are worked in the south. Since independence there has been a general disruption of economic life and a decline in trade. The production of copper and diamonds has continued as before but production of other minerals, especially tin, has declined. Exports of agricultural products have fallen sharply. There are important secondary industries, the main products being: cotton fabrics, blankets, sacks, footwear, clothing, beer, cigarettes, paint, cement and sugar. There are very large reserves of hydro-electric power.

Trade with U.K.

	1959	1960
Imports from U.K.....	£8,344,401	£5,762,385
Exports to U.K.....	5,115,917	4,806,915

The chief exports are copper, palm-kernels and palm oil, coffee, diamonds, cotton and ores (manganese, wolfram, etc.).

Language, Religion and Education.—The people are mainly of Bantu-Negro stock, divided into semi-autonomous tribes, each speaking a Bantu tongue. Swahili, a Bantu dialect with an admixture of Arabic, is the nearest approach to a common language in the East and South, and Lingala along the river. It is estimated there are 5,000,000 African Christians in the Colony (Roman Catholic 4,200,000, Protestant 800,000).

CAPITAL, Leopoldville (pop. 389,547; 21,568 whites). Principal towns, Ψ Matadi (59,184); Elisabethville (182,638); Jadotville (74,478); Stanleyville (79,941); Luluabourg (59,935); Coquilhatville (37,587); Kolwezi (47,712) and Ψ Boma (31,598).

FLAG.—Large gold star in centre of pale blue ground, vertical row of six small stars by staff.

COSTA RICA

(República de Costa Rica.)

President (1958-62), Señor Mario Echandi Jiménez, elected February 1958.

EMBASSY IN LONDON.

4 Palace Gate, W.8.

Ambassador, His Excellency Dr. Alfredo Alfaro-Sotela.

1st Secretary and Consul-General (vacant).

Civil Attaché, Señor Marco Aurelio Guillén-Solano.

Cultural Attaché, Señor Don Alex de Soto-Montenegro.

Consul General, Miss O. Rodríguez-Quirós.

The Republic of Costa Rica, the most southern State of Central America, extending across the Isthmus between 8° 17' and 11° 20' N lat. and from 82° 30' to 85° 45' W. long., contains an area of 19,653 English square miles, and an estimated population (Dec., 1960) of 1,199,116. The rate of increase is about 4 per cent., one of the highest in the world. The population is basically of European stock in which Costa Rica differs from most Latin American countries. The Republic lies between Nicaragua and Panama and between the Caribbean Sea and the Pacific Ocean.

For nearly three centuries (1530-1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country joined in the War

of Independence, and from 1824-1839 it was one of the United States of Central America.

On Dec. 1, 1948, the Army was abolished, the President declaring it unnecessary, as the country loved peace.

The coastal lowlands by the Caribbean Sea and Pacific have a tropical climate but the interior plateau, with a mean elevation of 4,000 feet, enjoys a temperate climate. The capital is 103 miles from the Atlantic and 72 miles from the Pacific.

The principal agricultural products are coffee (of a high quality), bananas, rice, maize, sugar-cane, potatoes, cocoa beans and hemp, the soil being extremely fertile. Increasing attention is being paid to cattle raising.

The chief ports are Limón, on the Atlantic coast, through which passes most of the coffee exported, and Puntarenas on the Pacific coast. Bananas are principally exported from Golfito, a port which has been developed on the Pacific Coast by the United Fruit Co. In 1960, 1,098 ships of a gross tonnage of 4,102,842 entered at Costa Rican ports. About 400 miles of railroad are open. The country is well provided with airways, and Pan-American Airways, K.L.M., IACSA and TACA call at San José, while feeder services link the main centres of population with the capital.

Spanish is the language of the country. Education is compulsory and free. The literacy rate is the highest in Latin America. In post-war years there has been a big advance in the provision of social services.

CUBAN EMBASSY IN LONDON

22 Mount Street, W.1.

[Mayfair: 6636]

Ambassador in London (vacant).
Chargé d'Affaires, Señor Manuel Stolik.
Consul, Señor Julio del Castillo, 329 High Holborn, W.C.1.

Cuba (the largest of the "West India" Islands) lies between 74° and 85° W. long., and 10° and 23° N. lat., with a total area of 44,178 sq. miles and a population (estimated, 1955) of 6,125,000.

The island of Cuba was visited by Christopher Columbus during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. [The island was under British rule for one year, 1762-1763, when it was returned to Spain in exchange for Florida.] Separatist agitation culminated in the closing years of the 19th century in a fierce and blood-thirsty war. In 1898 the government of the United States intervened and despatched the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which remains an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from Aug. to Sept., 1906, when the U.S. Government resumed control. On Jan. 28,

1909, a republican government was again inaugurated. In 1933 a revolution was followed by provisional government until May, 1936, when a constitutional government was elected. A new Constitution was promulgated in 1940, but its operation was suspended for various periods until February 24, 1955, when the Government elected on November 1, 1954, took office. A revolution led by Dr. Fidel Castro overthrew the Government of General Batista on January 1, 1959. A provisional government was set up and elections were promised within four years. During 1961 the Revolutionary Government was carrying out a programme of land and urban reform. All the major industries had been nationalized or placed under Government control.

Of the total area of 28,000,000 acres, there were (1953), about 5,750,000 acres under cultivation, of which 61 per cent. was under sugar. Tobacco, sweet potatoes, bananas, rice, coffee, cocoa and maize are also grown and tropical fruits (oranges, coco-nuts, pineapples, &c.) flourish. The chief agricultural products of the island are sugar and tobacco; sugar crop (1959) 5,790,600 Spanish long tons; tobacco crop (1959) 40,500 metric tons; the chief product of the forests is mahogany. White cedar is also used for boxing the tobacco crop. The estimated livestock figures include (1955) 4,500,000 cattle and 400,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

11,256 route miles of railroad are open (public service 3,677; private lines on plantations and in mining areas 7,579) and about 12,000 miles of telegraph line; there are about 8,291 miles of roads. The island forms an important stopping place for many international airlines.

Language and Literature.—Spanish is the language of the island, but English is widely understood. Education is compulsory and free. The University of Havana was founded in 1728 but until its enlargement under American auspices in the first quarter of the twentieth century no great progress was made in secondary or higher education. Public libraries have been established and there is a flourishing daily press with wide circulations.

FINANCE.

Public revenue in 1958 was estimated at \$365,247,946 and in 1959 at \$460,287,219. The public debt stood at \$760,300,000 at the end of 1958.

Nominally \$=U.S.\$1. U.S. currency ceased to be legal tender in Cuba on June 30, 1951 (see also p. 84).

Area and Population.—Czechoslovakia, formerly part of the Austro-Hungarian Monarchy, declared its independence on Oct. 28, 1918 (Czechoslovak Independence Day), the territory thus affected having an area of 53,700 square miles.

Since the War of 1939-45 the territory and population of the Republic have undergone change. By a treaty with the Soviet Union (June 29, 1945) Ruthenia was ceded to U.S.S.R., thus reducing the area by over 4,000 square miles and the population by over 750,000. In addition, the Sudeten German minority was expelled as sanctioned at the Potsdam Conference and the latest estimate of the population (Dec. 31, 1960) is 13,693,000.

Government.—In September, 1938; Adolf Hitler demanded the cession of the Sudeten districts. On Sept. 29, 1938, a Four Power Conference at Munich acquiesced in the annexation of the territory on the understanding that no further demands would be made, but on March 14, 1939, Nazi troops invaded Czechoslovakia, in flagrant violation of the terms of the Munich Conference, and two days later Adolf Hitler proclaimed that Czechoslovakia had "ceased to exist": a "Slovak State" was established and Bohemia and Moravia were declared a Protectorate of the Reich.

On July 22, 1940, Great Britain recognized the Czechoslovak National Committee set up in London as a provisional Czechoslovak Government, and on July 18, 1941, Great Britain fully recognized the Czechoslovak Government headed by President Benáš.

Following the liberation of Eastern Slovakia by Soviet forces in 1945, President Benáš and most of the members of his Government left London for Moscow for discussions with the Czechoslovak *émigré* movement in the Soviet Union on the formation of a new Government which would have its seat on Czechoslovak territory. The composition and programme of this Government, which was headed by M. Z. Fierlinger, were announced at Kosice in Slovakia on April 4, 1945. The Kosice Government included equal representation of four Czech parties (Czech Socialists, Social Democrats, Communists and Popular Party) and two Slovak parties (Democrats and Communists).

The first elections in the liberated Republic were held on May 26, 1946, the Communists emerging as the leading party with 38 per cent. of the votes cast. On July 3, 1946, K. Gottwald, the Communist leader, formed a Government of parties participating in a National Front. The uneasy alliance between the parties was terminated by a crisis precipitated by the mass resignation on February 20, 1948, of Ministers representing parties opposed to the Communists in protest against the widespread introduction of Communists into the police force by the Communist Minister of the Interior. The Communist Party, with the aid of Action Committees, seized power, and on February 25 a new Government, predominantly Communist, was formed. On May 30, 1948, new elections were held, the choice lying between a single joint election list of parties in the National Front, and a blank vote. The Communist control of the country is now unqualified. On July 11, 1960, a new constitution was proclaimed, replacing that of 1948. Its purpose was to express the fact that Czechoslovakia is now deemed to have completed the construction of Socialism and to be on the road to true Communism. The official

title of the State was accordingly changed to "The Czechoslovak Socialist Republic".

The first Five-Year plan which came to an end in December, 1953, was largely concerned with extending heavy industry and industrializing Slovakia. It was officially claimed that production had doubled during the plan, but it was also admitted that the economy had been thrown out of balance by poor progress in the development of ore reserves, fuel, power and agricultural production. The second Five-Year plan covered the years 1956-1960, after two interim years (1954 and 1955) devoted to correcting these faults. During the second Five-Year plan gross industrial production increased by 66 per cent., the emphasis remaining on heavy industry. Progress in hard coal production and in increasing power generating capacity, however, was less good, and agricultural production remained virtually stagnant in spite of the continued formation of agricultural co-operatives. One of the major tasks of the third Five-Year plan (1961-65) is to increase agricultural production by improving the mechanization of agriculture.

Language and Literature.—Czech and Slovak are the official languages but the literature is mainly Czech in Bohemia, Moravia and Silesia. The Reformation gave a widespread impulse to Czech literature, the writings of Jan Hus (who was martyred in 1415) familiarizing the people with Wyclif's teaching. This impulse endured to the close of the seventeenth century when Amos Komenský, or Comenius (1592-1670) was expelled from the country. Under Austrian repression, and with the outlawing of the national language, there was a period of stagnation until the national revival in the early nineteenth century. Modern prose drama and fiction are represented by several authors of international reputation, notably K. M. Capek-Chod (1860-1927), F. X. Svoboda (1860-1943), Jaroslav Hilbert (1871-1936), Viktor Dyk (1877-1931), Arnost Dvůřák (1880-1933), Ivan Olbracht (b. 1882), K. Capek (1890-1938), and Vladimír Vancura (1891-1942). Liberty of the press ceased with the violation of independence in 1939. It was temporarily restored on the liberation of the country. After the Communist coup of February 25, 1948, however, freedom of the press was "curtailed." All papers and periodicals were forced to follow the party line and a number of publications were banned.

Education.—In 1960-61 the number of pupils in general (primary and secondary) schools was given as 2,220,800. In addition there were, in 1960-61, 237,900 pupils at technical schools, including 92,400 adults studying extra-murally. Education is compulsory and free for all children from the ages of 6 to 14, and under the 1960 Education Act the school-leaving age is being raised to 15. There are four universities in Czechoslovakia of which the most famous is Charles University in Prague (founded 1348), the others being situated at Bratislava, Brno and Olomouc. In 1960-61 the number of university students was said to be 94,040, with another 26,740 extra-mural students.

Finance.—The Czechoslovak currency is the Czechoslovak *Koruna* (*Kčs*=Czechoslovak crown) of 100 *heller*. From the devaluation of the pound in 1949 up to May 30, 1953, the exchange rate was *Kčs*. 139.58 = £1. On June 1, 1953, the official rate was changed to *Kčs*. 20.16 = £1, but a bonus of 100 per cent. was added to certain non-commercial transfers including the encashment of travellers' cheques. This change took place as the result of an internal currency reform when a new currency was issued at a basic exchange rate of *Kčs*. 1.00 of the new currency for *Kčs*. 5.00 of the

old. The present rate is Kčs. 20.10 = £1. The 100 per cent. bonus still applies. The Budget estimates for 1961 total Kčs. 111,915,000,000 for expenditure and Kčs. 112,534,000,000 for revenue.

DAHOMÉY

(Republic of Dahomey)

President, Hubert Maga, elected for five years, December 11, 1960.

President of the National Assembly, Valentin Djibodé Aplogan.

President of the Supreme Court, Emile Zinzou.

Vice-President and Minister of Development, S. M. Apithy.

A republic situated in West Africa, between 2° and 3° W and 6° and 12° N., Dahomey has a short coast line of 78 miles on the Gulf of Guinea but extends northwards inland for 437 miles. It is flanked on the west by Togo, on the north by the Voltaic Republic and Niger and on the east by Nigeria. It has an area of about 47,000 square miles and a population estimated in 1959 at 2,000,000. Although poor in resources, Dahomey is one of the most thickly populated areas in West Africa, with a high level of education. It is divided into four main regions running horizontally: a narrow sandy coastal strip, a succession of intercommunicating lagoons, a clay belt and a sandy plateau in the north.

The first treaty with France was signed by one of the kings of Abomey in 1851 but the country was not placed under French administration until 1892. Dahomey became an independent republic within the French Community on Dec. 4, 1958; full independence outside the Community was proclaimed on August 1, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, defence, etc., were signed in Paris on April 24, 1961. Dahomey is a member of the Conseil de l'Entente (see Ivory Coast). The official language is French.

The Constitution of Dahomey, adopted on November 25, 1961, provides for a presidential system of government, a single Chamber National Assembly and a Supreme Court. At elections held on Dec. 7, 1960 the newly-established Parti Dahoméien de l'Unité won a large majority.

Principal products are agricultural—palm oil, palm kernels, ground-nuts, maize, millet and

sorghum, the first three providing the main exports. Total revenue of the Republic in 1960, excluding foreign aid, was francs CFA 3,702,000,000, expenditure francs CFA 5,402,000,000. Trade in 1960 was valued at: Imports, francs CFA 7,600,000,000; Exports, francs CFA 4,500,000,000. The currency of Dahomey is the Franc CFA (francs CFA 50 = French N.F. 1).

CAPITAL.—Porto Novo (35,000). Principal commercial town and port, Cotonou (81,800). FLAG.—Three stripes, one vertical, green, two horizontal yellow and red.

British Ambassador (see Ivory Coast).

Vice-Consul, T. F. Germer.

AREA AND POPULATION.—A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zealand, Funen, Lolland, etc., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'–57° 45' N. lat., and

8° 5'–15° 12' E. long., with an area of 16,608 square miles, and a population estimated (January, 1, 1960) at 4,565,500. In 1960 there were 76,195 births, 43,681 deaths and 36,176 marriages.

GOVERNMENT.—Under the Constitution of the Kingdom of Denmark Act of June 5, 1953, the legislature consists of one chamber, the *Folketing*, of not more than 179 members, including 2 for the Farøe and 2 for Greenland. The voting age is 21 years. In the 1960 elections the Social Democrats obtained 76 seats; Venstre 38; Conservatives 32; Radicals 11; Socialist People's Party 11; Farøe 2; Greenlanders 2; Slesvig Party (German Minority) 1; Independent 6.

EDUCATION is free and compulsory, the schools being maintained by taxation. Special schools are numerous, technical and agricultural predominating. There are Universities at Copenhagen (founded in 1478) and Aarhus (1933).

LANGUAGE AND LITERATURE.—The Danish language is akin to Swedish and Norwegian. Danish literature, ancient and modern, embraces all forms of expression, familiar names being Hans Christian Andersen (1805–1875), Søren Kierkegaard (1813–1855) and Georg Brandes (1842–1927), with Henrik Pontoppidan (1857–1943) and Karl Gjellerup (1857–1919), who shared the Nobel Prize for Literature in 1917, and Johannes V. Jensen (1873–1950), who received the same award in 1945. Over 200 newspapers are published in Denmark; 11 daily papers are published in Copenhagen.

PRODUCTION AND INDUSTRY.—Twenty-one per cent. of the population live exclusively by agriculture, and about 48 per cent. by manufactures and trade. The chief products are wheat, rye, oats, barley, potatoes, seeds, cattle, horses, pigs and dairy produce; manufactures based on imported raw material cover most of the home consumption.

COMMUNICATIONS.—Mercantile marine (ships above 100 gross tonnage) (December, 1959) 880 ships, with a gross tonnage of 2,208,033. In 1959 there were 4,301 kilometres of railway and 528,885 kilometres of telegraph and telephone lines.

BRITISH COUNCIL.

Representative, M. W. Blake (Cultural Attaché), c/o The British Embassy.

Outlying Parts of the Kingdom

The outlying parts of Denmark have about 55,000 inhabitants. The FARØE, or Sheep Islands (540 sq. m. pop. (1955) 32,456), capital, Thorshavn, are governed by a Lagting of 25 members, and send 2 representatives to the Folketing at Copenhagen. On September 14, 1946, the Lagting, with the consent of the Danish Government, for its own guidance held a plebiscite on the Farøe. About one-third of the electors did not, however, take part in the voting; of the rest a little more than half the votes cast were in favour of separation from Denmark and the establishment of a republic. At a subsequent general election for the Lagting a great majority voted in favour of remaining a part of the Kingdom of Denmark with a certain extent of home rule. In 1948 the Farøe received a certain measure of home rule. Special Farøese affairs are administered by a council of 3 members. Trade with U.K. in 1960 totalled: Imports, £559,443; Exports, £1,336,917. GREENLAND (ice-free portion about 132,000 sq. m., total area about 840,000 sq. m., population, Dec. 31, 1959, 31,855), is divided into 3 provinces (West, North and East). West Greenland (capital, Godthaab) has a Landsraad of 14 members and sends 2 representatives to the Folketing at Copenhagen. The trade of Greenland is mainly under the management of the Royal Greenland Trade Department; discoveries of lead were made in 1948. Imports from U.K. (1960), £171,081. The United States of America has acquired certain rights to maintain air bases in Greenland.

DOMINICAN REPUBLIC

The Dominican Republic, formerly the Spanish portion of the island of Hispaniola, is the oldest settlement of European origin in America.

The island was discovered by Christopher Columbus in December, 1492, who named it "La Española" or "Little Spain." In 1496 he ordered his brother, Bartholomew Columbus, to found the capital at the mouth of the Ozama River, on the south of the island, which city he called Santo Domingo. The island immediately became the objective for adventurous Spanish colonists, who exploited the native Indians for the sake of the gold found in the streams. African negroes were imported for the sugar and other plantations both in Santo Domingo and Haiti.

In 1821 Santo Domingo broke away from Spain and declared itself independent, but in 1822 it was invaded and subjugated by its negro neighbours from the west, the Haitians. The latter were driven out on Feb. 27, 1844, when the Dominican Republic was definitely proclaimed by the natives.

The country was occupied by American marines from 1916 until the adoption of a new Constitution in 1924. In July, 1924, a properly elected Constitutional Government was installed, with complete authority over all matters except the collection of the Customs and the redemption of foreign obligations, which continued to be administered by an American official. On Sept. 24, 1940, a new convention was signed at Washington; this provided for the withdrawal of the U.S. Receiver-General, the Customs to be collected by the Dominican Government, and the whole public revenue to be deposited in an agreed bank, the service of the debt being recognized as a first charge on the deposit. Congress consists of a Senate of 26 members, elected for 5 years, and of a Chamber of Deputies of 64 members, also elected for 5 years.

The Dominican Republic lies between Cuba on the west and Puerto Rico on the east and covers an area of about 19,322 square miles, with a population of 3,013,525 at a Census held in August, 1960. The climate is tropical in the low lands and semi-tropical to temperate in the higher altitudes. According to local classification there are 1,289 miles of first class and 1,412 miles of second class and inter-communal roads in the Republic. There is a direct road from Ciudad Trujillo to Port-au-Prince, the capital of Haiti, enabling the journey to be made in one day. There are about 80 miles (Sánchez-La Vega) of public railway, and a telephone system connects practically all the principal towns of the republic. The Dirección General de Comunicaciones, All American Cables, and Radio Corporation of America maintain an efficient telegraph service with all parts of the world. There are 28 commercial broadcasting stations and there is a television station operated by La Voz Dominicana, which with the help of relay stations provides reception of its programmes throughout the Republic. A

second television station in Ciudad Trujillo—Rahintel transmits to the Ciudad Trujillo area.

Spanish is the language of the Republic and education has made considerable progress.

Sugar, coffee, cocoa, and tobacco are the most important crops. Other products are peanuts, maize, rice, bananas, molasses, salt, cement, timber, cattle, iron ore, sisal products, honey and chocolate. There are several light industries producing sisal bags and rope, glass products, cotton textiles, shoes, paper, rum, matches, peanut oil and other products.

The Republic is served by four airlines, Pan-American, Caribair, Compania Brasileira de Aviación (VARIG) and the Compania Dominicana de Aviación. The new international airport 18 miles to the east of Ciudad Trujillo is now in full operation.

FINANCE

[Knightsbridge: 1367]

Ambassador in London, His Excellency Don Alfredo Ledesma Malo (1961).

Minister-Counsellor, Señor Don Gustavo Ycaza Boria.

Air Attaché, Maj.-Gen. Bollivar Pico.

2nd Secretary, Señor Don Vicente Aguirre.

3rd Secretary, Señor Don Alvaro Villagómez.

Corsuls at Liverpool, Birmingham and Glasgow.

Area and Population.—Ecuador is an equatorial State of South America, the mainland extending from lat. $1^{\circ} 38' N.$ to $4^{\circ} 50' S.$, and between $75^{\circ} 20' W.$ and $81^{\circ} W.$ long., comprising an area reduced by boundary settlements with Peru (Jan. 29, 1942) to about 226,000 sq. miles.

The Republic of Ecuador is divided into 20 provinces and one territory. It has a population estimated (June, 1959) at 4,769,204, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The territory of the Republic extends across the Western Andes, the highest peak of which is Aconcagua, in the Chilean sector (22,976 ft.), the highest peaks in Ecuador being Chimborazo (20,498 ft.), Illiniza (17,405 ft.), Carluhairazo (16,515 ft.), Cotacachi (16,301 ft.), and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,498 ft.), Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,690 ft.), and Sínchola (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayas, Mira, Santiago, Chone, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common.

The *Galápagos* (Tortoise) Islands forming the province of Colón, were annexed by Ecuador in 1832. The archipelago lies in the Pacific, about 500 miles from Saint Elena peninsula, the most westerly point of the mainland. There are 12 large and several hundred smaller islands with a total area of about 3,000 sq. mi. and an estimated population (1959) of 1,790. The capital is San Cristobal, on Chatham Island. Although the archipelago lies on the equator, the temperature of the surrounding water is well below equatorial average owing to the Antarctic Humboldt Current. The islands export guano, orchilla moss and cattle. There is an increasing amount of fishing, mainly for the North American market.

Government.—The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice-royalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822). A new constitution was issued on Dec. 31, 1946.

Production and Industry.—The chief products are bananas, cocoa, coffee, rice, petroleum, straw hats, vegetable ivory and balsa wood. The petroleum, like the products of Ecuador's farm lands and cotton industry, which are extensive, is almost wholly consumed internally. Small amounts of gold, silver and lead are mined, and emeralds and rubies are occasionally found.

Communications.—There are about 2,000 miles of permanent roads and 2,500 miles of roads which are only open during the dry season. There are about 750 miles of railway, including the railway from Quito to Guayaquil. The laying of a new track from Ibarra to San Lorenzo has now been

completed. Seven commercial airlines (Panagra, Area, Braniff, K.L.M., Avianca, Equatoriana de Aviación and Air France), operate international flights, linking Ecuador with New York, Miami, Lima, Santiago, Rio de Janeiro, etc. Area and other Ecuadorian companies operate internal services between all important towns.

Defence.—The standing Army has a strength of about 8,000. There is an Air Force of some 40 front line aircraft and a small Navy. All are being advised by U.S. missions.

Language and Literature.—Spanish is the language of the country. The electorate of Congress is confined to adult male and female citizens who can read and write, and in recent years considerable headway has been made in reducing the high figure of illiteracy. 3 daily newspapers are published at Quito and 6 at Guayaquil. Elementary education is free and compulsory. In 1957-58 there were 501,622 pupils at the 4,661 primary schools and 53,840 pupils at the 249 High Schools. The 6 Universities (at Quito, Guayaquil, Cuenca, Loja and Portoviejo) and the Polytechnic School at Quito had 6,646 students in the same year.

FINANCE 1960

3rd Secretary, Banta Melles.

Cultural Attaché, Abebe Kebede.

Position and Extent.—The Empire of Ethiopia, with which Eritrea has been federated since 1952, is in North-Eastern Africa, bounded on the north west by the Sudan; on the south by Kenya; on the east by French Somaliland and the Republic of Somalia; and on the north-east by the Red Sea. The area is estimated at 400,000 square miles (Eritrea approximately 50,000), with a population officially estimated at 20,000,000 (Eritrea 1,000,000), of whom about one-third are of the ruling race of Amharas and the remainder mainly Gallas, Guraghi, Sidama, Agao, negro tribes on the west and south frontiers, and Danakil and Somalis on the east.

Ethiopia is mainly a mountainous country, volcanic in origin, with several peaks of about 14,000 ft., notably in the centre and in the Simien range in the north; many other mountains exceed 10,000 ft. Eritrea consists of a mountainous hog-back range up to 10,000 ft., interposed between the Red Sea and the Sudan, flanked on east and west by flatter territory. The lower country and valley gorges of both Ethiopia and Eritrea are very hot; the higher plateaux are well watered, with a genial climate. On the high plateaux there are two main seasons in the year, a dry winter, October to May, and a rainy summer from June to September, with a season of "small rains" occurring generally in March. The chief river is the Blue Nile, issuing from Lake Tana; the Atbara and many other tributaries of the Nile also rise in the Ethiopian highlands.

The Amharas, who inhabit the southern highlands of Eritrea, provinces of Tigre, Begemdir, Gojjam, parts of Shoa, and many of the Gallas, are Christian (a branch of the Coptic Church). The head of the Coptic Church is the Patriarch at Alexandria. Since 1959, however, the Ethiopian Church has been autocephalous; the Patriarch ranks immediately after the Alexandrian Patriarch. Moslems predominate in some areas, notably northern Eritrea, Harar and Jimma and Arussi, the Moslem centre being at Harar. The province of Gamu Gofa and parts of Sidamo and Arussi have considerable pagan elements.

GOVERNMENT

Ethiopia.—The Empire is governed by a Council of Ministers, responsible to the Emperor, and a Parliament consisting of a Senate and a Chamber of Deputies, in accordance with the constitution promulgated in 1955. Elections, on a basis of universal suffrage, were held in 1957, and the Chamber of Deputies met for the first time at the end of that year. The Chamber enjoys greater fiscal control than the previous Assembly and there is a limited degree of ministerial responsibility to Parliament. The Senate continues to be nominated by the Emperor.

Eritrea.—Eritrea was administered by Great Britain from the end of the Second World War until September 15, 1952, when in accordance with a resolution of the United Nations Assembly of December 2, 1950, it was federated with Ethiopia under the Ethiopian Crown. A new Constitution for Eritrea was ratified by the Emperor on August 11, 1952. The Government of Eritrea has legislative, executive and judicial powers in domestic affairs, and its jurisdiction extends to all matters not vested in the Federal Government, including health, education, welfare, law and order, the levying of taxes and adoption of a budget. Defence, currency, foreign affairs, finance, foreign trade and communications (including ports) are within the jurisdiction of the Federal Government.

Full executive power is, subject to certain safeguards, in the hands of a Chief Executive elected by the Assembly to hold office during its own term, but not responsible to the Assembly. The single chamber Assembly is elected by all adult males of federal nationality. There is also in Eritrea a representative of the Emperor who has certain formal rights and prerogatives not affecting Eritrea's autonomy. English was adopted as the official language of the Eritrean Assembly.

Production and Industry.—The principal pursuits are agriculture and cattle breeding. In the hotter regions, sugar-cane, cotton, &c., flourish; in the middle zone maize, wheat, barley, coffee, oranges and other fruit trees, tobacco, potatoes and oil seeds are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. Coffee provided approximately 55 per cent. of the country's total exports by value in 1960. The forests are a potential source of wealth. Horses, mules, donkeys, cattle, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people. Industry is small, the main products being textiles, foodstuffs, beer and cement.

Communications.—A railway links Addis Ababa, the capital, *via* Dire-Dawa, with Jibuti, 486 miles away. In Eritrea a narrow gauge line runs from Massawa to Asmara and on to Agordat. Several roads were constructed before and during the Italian occupation; the principal road runs from Addis Ababa to Dessie and on to Asmara, with a branch from Dessie to Assab on the Red Sea Coast. Gondar is linked to Asmara by a road through Axum and Adua. Others run from Addis Ababa west to Lékempti, south-west to Jimma, Gore and Gambela, south to the Kenya frontier, and in the East from Dire Dawa to Harar and the northern region of the Somali Republic. Partly financed by large loans from the International Bank for Reconstruction and Development, much further improvement and extension of roads is being undertaken. The Ethiopian Air Lines maintain regular services from Addis Ababa to most of the provincial towns. External services are operated to Jibuti, Taiz, Hodeida, Port Sudan, Cairo, Khartoum, Nairobi, Athens, Frankfurt, Lagos, Accra, Conakry and Monrovia.

Defence.—A Ministry of Defence has been instituted. The armed forces comprise the Imperial Army, the Imperial Air Force and the Imperial Navy. The Army consists of infantry, artillery, engineers, signals, ordnance, and supply services, and has an armoured squadron of light tanks and armoured cars. An American Military Mission trains the Army, and Swedish officers are employed in the Ministry of Defence. There is now a military academy at Harar. The Imperial Air Force comprises a ground attack wing, a transport squadron and a flying training school. The aircraft are of Swedish and American manufacture and the training staff is Swedish, though some Americans are employed on conversion training to American types of aircraft.

The Imperial Navy has a small headquarters in Addis Ababa with a naval base situated at Massawa. The training of the Navy is mainly in the hands of Norwegian instructors. The Fleet comprises two coastal cutters and two motor torpedo boats.

Education.—Elementary education is provided without religious discrimination by Government schools in the main centres of population; there are also Mission schools. In or near the capital are several secondary schools, a university college, a technical school, an agricultural school, a theological college, commercial school, and a teacher-training college; also cadet-schools for the Army, Imperial Guard, Air Force, and Police. Schools of higher grade than elementary are also to be found in some of the provincial capitals. Amharic is the official language of instruction, with English as the first foreign language. Arabic is taught in Koran Schools; and Ge'ez (the ancient Ethiopic) in Christian Church Schools, which abound. Adult education is met to some extent by institutes which provide evening classes in Addis Ababa.

FINANCE

	1960-61	Ordinary	Extraordinary
Revenue.....	£28,100,000	£4,000,000	
Expenditure.....	27,300,000	4,900,000	

Currency.—The Ethiopian dollar has a value of 5.52 grains of fine gold and is divided into 100 cents. At Dec. 31, 1960, the combined note and coin issue amounted to £27,700,000; gold, silver and foreign exchange reserves amounted to £20,000,000. Eth. \$7 = £1.

TRADE

Total Imports (Yr. to Sept. 10, 1960)	£30,100,000
Total Exports (Yr. to Sept. 10, 1960)	29,200,000

Trade with U.K.

	1959	1960
Imports from U.K.....	£2,661,873	£2,382,374
Exports to U.K.....	1,544,941	1,655,795

The chief imports by value are cottons, petroleum products, machinery, motor vehicles and parts; the principal exports by value being coffee, oilseeds, hides and skins, and pulses.

CAPITAL. Addis Ababa (estimated population 400,000), also capital of the province of Shoa; Asmara (population 120,000) is the capital of Eritrea; other provincial capitals are Makale (Tigré), Gondar (Begemdir), Dessie (Wallo), Debra Markos (Gojjam), Lekkempti (Wallega), Goré (Illababor), Jimma (Kaffa), Chencha (Gamu-Gofa), Yirgalem (Sidamo), Aselle (Arusi), and Harar (Harar). Dire Dawa is the most important commercial centre after Addis Ababa and Asmara, Ψ Massawa and Ψ Assab (recently enlarged) are the two main ports. There are ancient architectural remains at Aksum, Gondar, Lalibela and elsewhere.

ETHIOPIAN FLAG.—Three horizontal bands; green, yellow, red; bearing crowned lion at centre.

FINNISH EMBASSY IN LONDON

66 Chester Square, S.W.1
 (Sloane: 0771)

Ambassador in London. His Excellency Leo Tuominen (1957).

Area and Population.—A country situated on the Gulfs of Finland and Bothnia, with a total area of 130,127 square miles, of which 70 per cent. is forest, 9 per cent. cultivated, 9 per cent. lakes and 12 per cent. waste and other land, population (Jan. 1, 1961), 4,477,300. In 1959 the birth rate was 18.9, death rate 8.8 per 1,000. The infant mortality rate was 23.6 per 1,000 live births. 93.1 per cent. of the people are Lutherans, 1.6 per cent. Greek Orthodox and 5.3 per cent. others. The loss of Karelia meant resettling about 480,000 refugees mainly on some 46,000 new farms provided by the Government, partly from holdings exceeding 62 acres and partly by purchase.

The Aland Archipelago (Åhvenanmaa), a group of small islands at the entrance to the Gulf of Bothnia, covers about 572 square miles, with a

population (1959) of 2,144 (97 per cent. Swedish-speaking). The islands have a semi-autonomous status.

Government.—Under the Constitution there is a single Chamber (*Eduskunta*) for which women are eligible, now composed of 200 members, elected by universal suffrage of both sexes. The legislative power is vested in the Chamber and the President. The highest executive power is held by the President who is elected for a period of 6 years.

After the last general election in July, 1958, 10 Social Democrat Deputies who had been elected on official party lists joined the Social Democrat opposition group in the Diet. The present state of the parties, therefore, is as follows:—Finnish People's Democratic League (Communist), 50; Agrarian Union, 47; Social Democrat Party, 37; Conservatives, 29; Swedish People's Party, 14; Social Democrat Opposition, 14; Finnish People's Party (Liberal), 8; Small Farmers' Party, 1.

Defence.—By the terms of the Peace Treaty (Feb. 10, 1947) with U.K. and U.S.S.R., the army is limited to a force not exceeding 34,000. The Navy is limited to a total of 10,000 tons displacement with personnel not exceeding 4,500. The Air Force, including naval air arm, is limited to 60 machines with a personnel not exceeding 3,000. Bombers or aircraft with bomb-carrying facilities are expressly forbidden. The Defence Forces contain a cadre of regular officers and N.C.O.'s, but their bulk is provided by conscripts who serve for 8–12 months. None of the defence forces has the full complement permitted.

Education.—Primary education is compulsory and free for all children from 7 to 15 years, and in 1960 there were 630,900 in attendance at primary schools, with 216,100 in secondary schools; and 31,000 in colleges for vocational training. In 1960 there were 11 Higher Schools with 6,300 students, and 4 universities; the State University of Helsinki (about 11,000 students); 2 at Turku (one Swedish-speaking); and a new university (400 students) at Oulu. Combined enrolment at Higher Schools and Universities was 21,350.

Language and Literature.—Most Finns are bilingual. 91.2 per cent. speak Finnish as their first language, 8.6 Swedish and the remaining 0.2 per cent. other languages (mainly Lapps living a nomadic life in the North). Since 1883 Finnish has been on an equal footing with Swedish as the official language of Finland, but since independence in 1919 Finnish has slowly been displacing Swedish. In literature also, until the close of the eighteenth century, Swedish was dominant, but awakening Finnish nationalism in the early years of the nineteenth century and the establishment of an association for the promotion of Finnish literature in 1831 gave Finnish the status of a literary language. There is a vigorous modern literature. Eemil Sillanpää was awarded the Nobel Prize for Literature in 1939. There are 65 daily newspapers in Finland.

Production and Industry.—Finland has a greater area covered in forest than any other European country except the Soviet Union. Consequently the national economy is based on the timber, pulp and paper industries. These industries employ a large proportion of the working population and accounted in 1959 for 74 per cent. of Finland's foreign exchange earnings. The metal and metal working industries, producing 17 per cent. of Finland's export income in 1959, form the second important group. In the agricultural field, production is relatively low and the tendency is towards dairy farming. Exports of agricultural and dairy products amounted to 6 per cent. of total exports in 1959. The remaining export revenue came from the glass, ceramics and furniture industries. To a

large extent domestic requirements in the textile, rubber, plastics, chemical and pharmaceutical, footwear and foodstuff trades, are met by local factories.

Communications.—There are 3,700 miles of railroad and a well-developed telegraph and telephone system. There is railway connection with Sweden and U.S.S.R., passenger boat connection with most of the countries of Western Europe, and telephone communication with most countries of the world. External civil air services are maintained by BEAC (as far as Stockholm), Aero Oy (Finnish Airlines), Scandinavian Airlines System and Pan American Airways. Aero Oy and Aero Flot each maintain a service with Moscow twice a week. Aero Oy maintains an extensive internal air service. Aero Flot maintains a service twice a week with Leningrad and Czech State Airlines twice a week with Prague. The merchant fleet (June, 1961) consists of 204 steamships (298,095 tons gross), 241 motor vessels (501,188 tons gross), and 88 sailing ships with auxiliary engine (9,417 tons gross).

(a), (b), (c). These Departments correspond with the districts of Alsace and Lorraine.

Area and Population.—The most westerly State of Central Europe, extending from $42^{\circ} 20'$ to $51^{\circ} 5'$ N. lat., and from $7^{\circ} 45'$ E. to $2^{\circ} 45'$ W. long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles, and its area (in 1939) at 212,895 square miles (excluding Algeria) divided into 90 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The population of Metropolitan France on Jan. 1, 1961, was estimated at 45,710,000 by the French National Institute of Statistics. During 1960 there were 816,000 live births, 517,200 deaths and 320,000 marriages.

Government.—The monarchical system of government was overthrown by the *French Revolution* (1789–1793), and the *First Republic* endured until the Great Napoleon (born Aug. 15, 1769, died May 5, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the “Hundred Days” of Napoleon (March 20–June 29, 1815), until the *Second Republic* of 1848, which became the *Second Empire* on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III. (nephew of the Great Napoleon) was deposed, and the *Third Republic* was set up. The constitution of the Third Republic vested the legislative power in a Chamber of Deputies and a Senate. The executive was vested in the President, who was elected for 7 years by the Senate and Chamber assembled in Congress.

On Sept. 1, 1939, Germany invaded Poland, thus precipitating war with France and Great Britain, which had (March 31, 1939) given an open pledge to support Poland against aggression.

On June 17, 1940, the late Maréchal Pétain sought terms of surrender from the Germans. A number of French troops had reached British ports after the evacuation of the British Expeditionary Force from Dunkirk and St. Valéry, and on June 23, 1940, after stating that the French Government had capitulated before all means of resistance had been exhausted, General de Gaulle announced the formation of a Provisional National Committee “to defend that part of the French Empire which has not yet been conquered by Germany and to free that part of France still under the yoke of the invader.”

On June 3, 1943, after prolonged negotiation, there was set up a *French Committee of National Liberation*, which was recognized by the allied nations on August 26, 1943.

Paris was liberated on August 25, 1944, and on October 13, 1944, the de Gaulle administration was recognized by the allied nations as the government of France.

Under the de Gaulle administration there was a single chamber legislature (The National Consultative Assembly) which met at Algiers until France was liberated. The enlarged Consultative Assembly met in the Luxemburg Palace (Paris), formerly the Senate House, on Nov. 7, 1944.

Following a national referendum on Oct. 27, 1945, a Constituent Assembly was elected with the task of drafting a new constitution. This was duly drawn up and adopted at a further referendum on Oct. 13, 1946. A National Assembly and Council of the Republic, elected on a territorial basis, were set up. With amendments made in 1954, the Constitution of the Fourth Republic was in force from 1946 until Oct. 5, 1958. From the liberation of Paris in 1944 until the Fourth Republic came to an end in 1958, 26 Cabinets were formed with an average life of $5\frac{1}{2}$ months. The Government of M. Mollet for 16 months in 1956–57 was the longest in

office, that of M. Queuille in 1950 the shortest, being in office for only three days.

Insurrections took place in Algeria and in the Metropolitan Department of Corsica in May, 1958, and, faced by a threat of imminent insurrection among the armed forces at home, President Coty warned the nation that it was on the brink of civil war and invited General de Gaulle to form a Government. M. Pflimlin formally resigned the office of Prime Minister on May 31. On June 1, by 329 votes to 224, Gen. de Gaulle was invested in the National Assembly as Prime Minister, with power to govern by decree for a period of six months during which time proposals for constitutional reform would be submitted to a national referendum.

The Fifth Republic.—The Constitution of the Fifth Republic, embodying important changes, was adopted by an overwhelming majority at a referendum held on Sept. 28 in Metropolitan France and all overseas departments and territories. (See also *French Community* below).

The President is elected for a term of 7 years by an electoral college consisting of both Houses of Parliament, the departmental general councils, overseas assemblies and elected representatives of the municipal councils. He is also eligible for re-election. The President appoints the Prime Minister. He may dissolve the National Assembly after consultation with the Prime Minister and Presidents of both Houses, but may not do so more than once in twelve months. He may submit disputed legislation to a national referendum at the request of the Government or of both Houses of Parliament. The President may assume special powers in an emergency. At the presidential elections held on Dec. 21, 1958, General de Gaulle was elected President by an overwhelming majority and took office on Jan. 8, 1959, as first President of the Fifth French Republic.

Parliament consists of the National Assembly and the Senate. Bills may be presented in either House, except money bills, which must originate in the National Assembly. The normal session of Parliament is confined to $5\frac{1}{2}$ months each year and it may also meet in extraordinary session for 12 days at the request of the Prime Minister or a majority of the Assembly. Voting rights are personal and can only be delegated in special circumstances.

The Prime Minister and the Cabinet are responsible only to Parliament. The Prime Minister is assumed to have the Assembly's confidence unless the Opposition moves a censure motion signed by not less than one-tenth of the deputies; such motion must be approved by an absolute majority; if defeated, its sponsors must not introduce another no-confidence motion in the same session. Ministers relinquish Parliamentary seats on joining the Cabinet.

A *Constitutional Council* is responsible for supervising all elections and referenda and must be consulted on all constitutional matters and before the President of the Republic assumes emergency powers. At the request of the Government, the *Economic and Social Council* gives advice on bills, ordinances or decrees referred to it. Any economic or social plan or bill must be submitted to it.

Production.—The chief agriculture products are wheat, barley, rye, maize, oats, potatoes, beet-root (for the manufacture of sugar), hops, &c. Rice is being grown in parts of the Camargue (Rhône delta). Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c.

The harvest in 1960 was:—

	(Quintals)
Wheat.....	108,800,000
Oats.....	27,700,000
Barley.....	57,000,000
Rye.....	4,200,000
Maize.....	20,100,000

Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut and the cork-tree in the south. The vine is cultivated to a very great extent, as the names Bordeaux, Burgundy, Champagne, &c., universally testify. Production of wine in 1960 (excluding Algeria) was 61,800,000 hectolitres. Cider-making is also an important industry. The live stock (1960) included 18,400,000 cattle, 8,700,000 sheep and lambs, 8,400,000 pigs, 1,900,000 horses and 1,200,000 goats. The mineral resources include coal, oil, pig iron, bauxite, copper, lead, silver, antimony and salt. In 1960 coal production amounted to 58,210,600 tons and oil production in the *Franc Zone* totalled 11,400,000 tons. The most important manufactures are of metals, cars, aircraft, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, cottons, woollens, carpets, linen, silk and lace.

Language and Literature.—French is the universal language of France and of a large proportion of the people of Belgium, Luxembourg, Switzerland, Italy, Egypt, Tunisia, Algeria, Mauritius, Haiti, the Province of Quebec, Canada, and of the State of Louisiana, U.S.A., to whom the almost inexhaustible literature of France is a treasured heritage. The work of the *French Academy*, founded by Richelieu in 1635, has established *le bon usage*, equivalent to "The King's English" in Great Britain. French authors have been awarded the Nobel Prize for Literature on 9 occasions—R.F.A. Sully-Prudhomme (1901), F. Mistral (1904), Romain Rolland (1915), Anatole France (1921), Henri Bergson (1937), Roger M. du Gard (1937), André Gide (1947), François Mauriac (1952) and Albert Camus (1957).

Defence.—The personnel of the Defence Forces at the end of 1960 was: Army, 834,000 (including *Gendarmerie* of 63,000); Navy (June, 1961), 76,000; Air Force, 139,000. The French Navy included 3 aircraft carriers, 3 cruisers, 66 destroyers and frigates and 22 submarines.

Education.—The educational system is highly developed. *Central Administration* comprises (a) Ministry of National Education with Secretariats of State for Technical Education, Youth and Sports, and for Fine Arts; (b) Superior Educational Council, charged with the actual administration; (c) Consultative Committee (advisory); (d) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. *Local Administration* comprises (a) Territorial Academies, with inspecting staffs for all grades; and (b) Departmental Councils, presided over by the *préfet*, charged especially with primary education. (i.) *Primary* education is secular, compulsory and free, the school age being 6 to 14. Schools are for boys, for girls, or mixed. (ii.) *Secondary*: State lycées, communal colleges, and many private establishments, 7- yrs. course, either (a) purely classical; (b) purely modern; (c) Latin and sciences; or (d) Latin and modern languages. Sèvres school and the Sorbonne (University of Paris) are among the well known establishments. (iii.) *Special Schools* are numerous. (iv.) There are 17 *Universities* (State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix (A.D. 1409), Alger,

Besançon (1485), B. ordeaux (1441), Caen (1432), Clermont (1808), Dijon (1722), Grenoble (1339), Lille (1530), Lyons (1808), Montpellier (1125), Nancy (1572), Paris (1150), Poitiers (1431), Rennes (1735), Strasbourg (1567), and Toulouse (1230).

Archæology, etc.—There are dolmens and menhirs in Brittany, prehistoric remains in Dordogne, cave drawings in Ariège, and throughout France various megalithic monuments erected by primitive tribes, predecessors of Iberian invaders from Spain (now represented by the Basques), Ligurians from northern Italy and Celts or Gauls from the valley of the Danube. Julius Caesar found Gaul "divided into three parts" and described three political groups—Aquitani south of the Garonne, Celts between the Garonne and the Seine and Marne, and Belgæ from the Seine to the Rhine. Roman remains are plentiful throughout France in the form of aqueducts, arenas, triumphal arches, &c., and the celebrated Norman and Gothic Cathedrals, including Notre Dame in Paris, and those of Chartres, Reims, Amiens (where Peter the Hermit preached the First Crusade for the recovery of the Holy Sepulchre), Bourges, Beauvais, Rouen, etc., have survived invasions and bombardments, with only partial damage, and many of the renaissance and XVIIIth century châteaux survived the French Revolution.

Roads.—The length of the *Routes Nationales* is about 50,000 miles, and of other roads 382,000 miles. The principal rivers of France are the Seine, Loire, Garonne, and Rhône, the navigable waterways in general use having a length of 8,000 km. The Rhône is navigable for 1,200-ton vessels from the sea to Switzerland.

Railways.—The system of railroads in France is very extensive. The length of lines of general interest, exclusive of local lines, open for traffic on Jan. 1, 1960, was 39,190 km., of which 6,770 km. were electrified. The lines left open in Sept., 1944 totalled only 11,125 miles, but the work of reconstruction then begun has restored the pre-war figure. Traffic in 1959 totalled 32,000,000,000 passenger-kilometres and 53,400,000,000 ton-kilometres and in 1960, 31,800,000,000 passenger-km. and 56,500,000,000 ton-km.

Civil Aviation.—In 1960 passenger/kilometres flown by aircraft of French airlines totalled 4,730,000,000, of which 4,200,000,000 were by Air France.

Shipping.—The French mercantile marine on Jan. 1, 1961, consisted of 797 ships of 4,626,441 tons gross, of which 64 were passenger vessels (582,886 tons), 169 tankers (1,945,738 tons) and 564 cargo vessels (2,097,817 tons).

FINANCE	1961
Total revenue (Budget).....	NF. 63,605 milliard
Ordinary expenditure (do.).	70,462 milliard

The *Public Debt*, on November 30, 1960, amounted to NF 84,564,000,000, of which the external debt accounted for NF 13,257,000,000.

Currency.—The unit of currency is the *franc* of 100 centimes. On August 11, 1957, a system of exchange rates was introduced which amounted to a devaluation of the franc by 20 per cent. in certain sectors. This devaluation was made general on October 26, 1957. On Dec. 29, 1958, the franc was further devalued by 17½ per cent. to Frs. 2,382 = £1 (Frs. 492.70 = \$1 U.S.). The *New Franc*, worth 100 old francs, came into use on Jan. 1, 1960, in metropolitan France and Algeria, as the basic monetary unit. Bank notes in 10, 50 and 100 new franc denominations and coins for 1 and 5 new francs were introduced. Further coinage in new francs is being introduced to replace the old coinage progressively.

COMMERCE

The principal imports are wool, cotton, chemicals, coke, crude oil, oleaginous fruits and seeds, machinery, raw skins, timber, rubber, copper and coffee. The principal exports are chemical products, iron and steel, textiles (silk and cotton), automobiles, wine and other agricultural products, soaps and perfumes, and glass.

FRENCH FOREIGN TRADE 1960

New Francs

Imports.....	23,988,000,000
Export.....	23,744,000,000

Trade with U.K.

	1959	1960
Imports from U.K. £	76,904,943	87,044,655
Exports to U.K. £	103,690,455	131,204,508

ALGERIA

Algeria and the French Saharan Departments lie between 8° 45' W. to 12° E. longitude, 37° 6' N. to a southern limit about 19° N. Area, 855,900 sq. miles (estimated). Population (1960), about 10,095,000.

Government.—Algiers surrendered to a French force on July 5, 1830, and Algeria was annexed to France in Feb. 1842. From 1881 the three northern departments of Algiers, Oran and Constantine formed an integral part of France. Between 1955 and 1960 these were re-organized to form 13 departments: Algiers, Tizi-Ouzou, Orleansville, Médéa, Constantine, Bône, Sétif, Batna, Oran, Tlemcen, Mostaganem, Saïda and Tlaret. An armed rebellion led by the Moslem *Front de Libération Nationale (F.L.N.)* against French rule broke out on Nov. 1, 1954. On May 13, 1958, demonstrations by the European population in favour of keeping Algeria French led to the formation of a Committee of Public Safety under the Commander-in-Chief, General Salan, and to the investiture of General de Gaulle as Prime Minister of France on June 1, 1958. General Salan became Delegate General of the French Government in Algeria. He was succeeded in December, 1958, by M. Paul Delouvrier. On September 16, 1959, General de Gaulle announced plans for the self-determination of Algeria, but the Moslem Nationalist Rebellion continued. In January 1960, the European population of Algiers staged a seven-day revolt against General de Gaulle's policy, and barricades were erected in the streets. Peace talks between representatives of the French government and the Moslem Nationalist Leaders at Melun in June, 1960, proved abortive. M. Paul Delouvrier was replaced as Delegate General by M. Jean Morin on November 19, 1960. Further European riots at Algiers and other cities against the self-determination policy took place in Algeria in December, 1960, and were followed by Moslem demonstrations in favour of an independent Algeria. On April 22, 1961, a military junta led by a former Commander-in-Chief in Algeria, General Challe, and pledged to ensure that Algeria would remain French, seized power in Algiers, but the revolt collapsed within four days. A further series of peace talks between representatives of the French Government and the Nationalists opened at Evian on May 20, 1961. (See also EVENTS OF THE YEAR.)

Economic.—Total value of imports in 1960 was N.F. 6,245,300,000 and of exports 1,946,500,000. The bulk of the trade is with France. Trade with the United Kingdom in 1960 was valued at imports £3,258,258. Exports to the United Kingdom (Algeria's best customer, after France) £11,967,424. Exports are mainly wine, barley and other cereals, skins, olives, fruits,

iron and zinc ores, phosphate rock, corkwood, esparto grass, manufactured tobacco, vegetables and crude petroleum. The principal imports from the United Kingdom were tractors and agricultural machinery, earthmoving and public works machinery, engines, machine tools and other machinery, rubber manufactures and metal manufactures. Natural gas from the Sahara is being supplied to the coastal area; plans are going ahead to export it. In a few years crude oil and natural gas will probably represent important elements in the Algerian economy. Iron, zinc, lead and quicksilver mines are being worked. In 1958 there were 2,620 miles of railways open for traffic, and in 1960 the number of ships in foreign trade entering Algerian ports was 5,894. 50,820 commercial aircraft arrived at or departed from Algerian airports in 1959.

The principal town is Ψ Algiers, the capital. It has expanded considerably in the last six years and its population (1960) is 870,000. Other towns include Ψ Oran (430,000), Constantine (217,000), Ψ Bône (144,000), Sidi-Bel-Abbes (101,000), Tlemcen (80,000), Ψ Philippeville (85,000), Blida (87,000), Mostaganem (64,000), Tizi Ouzou (40,000).

Saharan Departments (previously known as the Southern Territories).—The territories of Ain Sefra, Ghardaia, Touggourt and the Saharan Oasis were formed into a separate colony on December 24, 1902. In 1957, a Ministry for the Sahara was set up in Paris, and two Saharan Departments, Saoura and the Oasis, were formed, with administrative headquarters at Colomb-Béchar and Laghouat respectively. (The administrative capital of the Oasis was moved to Ouargla in 1959). The Saoura consists of the former territories of Ain Sefra and the Oasis, of the former Territory of that name, together with parts of Ghardaia and Touggourt. The parts of Ain Sefra, Ghardaia and Touggourt lying north of the Saharan Atlas mountains were merged with the Algerian Departments of Saïda and Médéa. In 1957, a joint organization for the Sahara (O.C.R.S.) was set up to control the economic development of the entire Saharan region, including the former French Sudan (now Mali), Niger and Chad, which were represented on the mixed Commission, and a Delegate General was appointed by the French Government to be responsible for the execution of the programme and for defence and public order. In May, 1961, the O.C.R.S. was re-organized so as to separate the functions of the Minister of the Sahara and those of the Delegate General to the O.C.R.S.

Oil, natural gas and iron ore were found to exist in quantities in the Saharan regions. Substantial oil and gas deposits are now being worked. In 1960 just over 7,000,000 tons of crude oil were exported. In the same year 13,128 commercial aircraft landed or took off from airports in the Sahara.

OVERSEAS DEPARTMENTS

With effect from Jan. 1, 1947, the colonies of French Guiana, Martinique, Guadeloupe and La Réunion with its dependencies were raised to the same status as Metropolitan Departments and rank with the rest of France for education, health and social services.

La Réunion.—Formerly Ile de Bourbon, about 420 miles E. of Madagascar, Réunion has been a French possession since 1643. Area, about 1,000 sq. miles. Population (1957), 301,000. Capital, St. Denis (41,863). Assigned to the administration of Réunion are the distant islands of St. Paul (3 sq. miles), New Amsterdam (27 sq. miles) and Kerguelen containing whaling and fishing stations

(1,100 sq. miles). The Crozet Islands (200 sq. miles) and Adélie Land (see p. 720) in the Antarctic Continent are also dependencies of Réunion.

Martinique.—An island situated in the Windward Islands group of the West Indies, between the British colonies of Dominica in the north and St. Lucia in the south. Population (1957) 255,600. Capital, Ψ Fort de France (60,600). Other towns are Ψ Trinite (39,173) and Ψ Marin (31,369).

Guadeloupe.—In the Leeward Islands of the West Indies, the island of Guadeloupe, together with Marie Galante, the Ile des Saintes, Petite Terre, St. Barthélemy and St. Martin, form the other West Indian Department of France. Capital, Ψ Pointe à Pitre (26,200). Other towns are Ψ Basse Terre (13,636) in Guadeloupe and Ψ Grand Bourg (12,827) in Marie Galante.

French Guiana.—Area, 35,000 sq. miles. Population (1957), 29,000. Capital, Ψ Cayenne (13,300). Situated on the north-eastern coast of South America, French Guiana is flanked by Netherlands Guiana on the west and by Brazil on the south and east. Under the administration of French Guiana is a group of islands (St. Joseph, Ile Royale and Ile du Diable), known as Iles du Salut. On Devil's Isle, Captain Dreyfus was imprisoned from 1894-1899.

CAPITAL OF FRANCE. Paris, on the Seine.

Population (1954), (Paris ville) 2,850,189. The population of Greater Paris (within 15-mile radius) is approximately 6,600,000. Twenty-three other cities exceeded 100,000 at the Census of 1954— Ψ Marseilles (661,492), Ψ Lyons (553,039), Toulouse (268,863), Ψ Bordeaux (257,946), Ψ Nice (244,360), Ψ Nantes (222,790), Strasbourg (200,921), Lille (194,616), St. Etienne (181,730), Ψ Toulon (141,117), Ψ Le Havre (139,810), Nancy (124,797), Rennes (124,122), Reims (121,145), Ψ Rouen (116,540), Grenoble (116,440), Clermont Ferrand (113,391), Dijon (112,844), Le Mans (111,891), Ψ Brest (110,713), Roubaix (110,067), Limoges (105,990) and Angers (102,142).

The chief towns of Corsica are Ψ Ajaccio 32,997 and Ψ Bastia 42,729.

Paris is distant from London 267 miles; transit by air, 1 hr. 10 mins.

FLAG.—The "tricolour," three vertical bands, blue, white, red (blue next to flagstaff).

BRITISH EMBASSY

(35 Faubourg St. Honoré, Paris 8e)

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Pierson Dixon, G.C.M.G., C.B. (Oct, 1960)..... £7,015

Envoy Extraordinary and Minister Plenipotentiary, Sir Anthony Rumbold, Bt., C.B., C.M.G.
Minister (Economic), W. Harpham, C.M.G., O.B.E.
Counsellor and Consul-General, H. Braham, C.B.E.
Counsellors, R. M. Hadow; C. L. G. Philpotts, C.M.G.

Counsellor (Press), F. B. Richards, D.S.C.
Counsellor (Labour), L. Hagestadt, O.B.E.

1st Secretaries, R. A. Farquharson; M. D. Butler; R. A. Fyjis-Walker; J. H. G. Leahy; S. H. Anstey; A. H. Birch, O.B.E.; D. Bluelock.
2nd Secretaries, J. W. R. Shakespeare; T. Macaulay; A. M. Brooks, D.S.O., M.C.; Miss A. M. Wood; Miss M. C. McConachie; C. F. Miller; H. Tansey; J. Greaves; D. H. Bevan.

3rd Secretaries, M. R. Jenkins; J. A. Birch; G. A. P. Cockell.

Naval Attaché, Capt. P. M. Compston, R.N.

Asst. Naval Attaché, Cdr. E. R. Gurney, R.N.

Military Attaché, Brigadier B. Wilson, D.S.O.

Asst. do., Lt.-Col. R. A. Readman; Lt.-Col. J. I. G. Capadose.

Air Attaché, Air Commodore G. F. W. Heycock, D.F.C.

Asst. Air Attaché, Wing-Cdr. J. L. Goldby, D.F.C.

Scientific Attaché (Ministry of Aviation), D. C. Evans, M.B.E.

Civil Air Attaché, P. A. Robinson.

Scientific Attaché, R. V. Melville.

Chaplain of the British Embassy Church, Rev. R. J. W. Morris.

BRITISH CONSULAR OFFICES

There are British Consular Offices in Metropolitan France at Paris, Ajaccio, Bordeaux, Boulogne, Calais, Cherbourg, Dieppe, Dunkirk, Le Havre, Lille, Lyons, Marseilles, St. Malo and Strasbourg.

BRITISH CHAMBER OF COMMERCE

6 Rue Halévy, Paris

President, H. Talbot.

Vice-Presidents, C. Kirk; M. F. Bannerman.

BRITISH COUNCIL

Representative in Paris, R. P. Hinks, 36 rue des Ecoles, Paris V.

THE FRENCH COMMUNITY

The Constitution of the Fifth French Republic promulgated on Oct. 6, 1958, set up the French Community (successor to the French Union), in which member States enjoy autonomy and manage their own affairs freely. There is a single citizenship within the Community; all citizens have the same rights and duties, irrespective of their origin, race or religion. Matters of common policy are specified in the Constitution and include foreign affairs, defence, financial and economic policy, justice, higher education, transport and telecommunication. The President of the French Republic is President of the French Community and in the latter capacity is represented in each state of the Community by a High Commissioner. The official language, national anthem and flag of France were adopted for the Community. The following organs of the Community were set up in 1959. A Senate and a Court of Arbitration, also set up in 1959, were abolished in 1961.

Executive Council.—Composed of the President (Chairman), the Prime Ministers of the French Republic and the heads of government of each member State, and the Ministers responsible for the common affairs of the Community (in abeyance, 1961).

Secretariat General to the Presidency of the Community, and African and Malgasy Affairs.—To advise the President in his role as head of the Community, on Community and African affairs.

Secretary-General, M. Jacques Foscari.

The African member States and Madagascar each nominate two members to sit on the Economic and Social Council (see under Fifth Republic above).

On June 3, 1960, an amendment to the Constitution, permitting continued membership of the French Community to member countries after the achievement of full independence, and to allow independent states to join the Community, was approved by the Senate.

The French Community consists of the following: The French Republic (Metropolitan France, Algeria and the Overseas Departments)

Madagascar (République malgache).—See separate article.

MAURITANIA

(Islamic Republic of Mauritania)

Head of State and Prime Minister, Moktar Ould Daddah.

Mauritania lies on the north-west coast of Africa between Spanish Sahara and the Republic of Senegal. It is bounded on the east and south by the Republic of Mali. Area 322,340 sq. miles. The population of Mauritania was estimated at 624,000 in 1957. The Republic of Mauritania elected on November 28, 1958, to remain within the French Community as an autonomous republic and became fully independent on Nov. 28, 1960.

FLAG.—Yellow star and crescent on green ground.

CAPITAL.— Ψ Nouakchott.

British Ambassador, His Excellency John Hugh Adam Watson, C.M.G. (1960) (Resident at Dakar).

REPUBLIC OF SENEGAL

President, Léopold Senghor, elected Sept. 5, 1960.

Prime Minister, Mamadou Dia (Aug. 22, 1960).

Ambassador in London, His Excellency M. Léon Boissier-Palun, 24 Cadogan Square, S.W.1 [Knightsbridge: 6491].

Senegal lies on the west coast of Africa between Mauritania in the north and the Republic of Guinea in the south. It has an area of 77,814 sq. miles and the population was estimated at 2,269,000 in 1957.

Formerly a French colony, Senegal elected on Nov. 25, 1958, to remain within the French Community as an autonomous republic. Foundation of a Federation of Mali, to consist of the State of Senegal, (French) Soudan, Dahomey and Upper Volta, was announced in January, 1959, and the Federation came into existence on April 4, consisting of Senegal and the Sudanese Republic only, the others having meanwhile withdrawn. Mali was proclaimed fully independent by the President of the Federal Assembly, M. Léopold Senghor, on June 20, 1960. However, these arrangements proved short-lived as on August 22, 1960, the Senegal Legislative Assembly formally approved measures to secede from the Federation and continue as an independent state.

CAPITAL.— Ψ Dakar (383,000).

FLAG.—Three vertical bands, green, yellow and red; a green star on the yellow band.

British Ambassador, His Excellency John Hugh Adam Watson, C.M.G. (1959) £4,115

CHAD REPUBLIC

President, François Tombalbaye, elected August 11, 1960.

Situated in north-central Africa, the Chad Republic extends from 23° N. latitude to 7° N. latitude and is flanked by the Republics of Niger and Cameroon on the west, by the Kingdom of Libya in the north, by the Sudan on the east and by the Central African Republic on the south. It has an area of 487,920 sq. miles and a population estimated in 1957 at 2,581,000. Chad became a member state of the French Community on Nov. 28, 1958, and was proclaimed fully independent on August 11, 1960.

CAPITAL.—Fort Lamy, south of Lake Chad (45,600).

FLAG.—Vertical stripes, blue, yellow and red.

French High Representative, M. Daniel Doustin.

British Ambassador, His Excellency J. V. Rob, C.M.G. (Resident at Brazzaville, Congo).

CENTRAL AFRICAN REPUBLIC

President, David Dacko, assumed office August 17, 1960.

2 E*

Formerly the French colony of Ubanghi Shari, the Republic lies just north of the Equator between the Cameroon Republic and the southern part of Sudan. It has a common boundary with the Republic of Chad in the north and with the Congolese Republic in the south. The Republic has an area of about 234,000 sq. miles and an estimated population of 1,135,000. On December 1, 1958, Ubanghi Shari elected to remain within the French Community and adopted the title of the Central African Republic. It became fully independent on August 17, 1960.

CAPITAL.—Bangui, near the border with the Congolese Republic (82,300).

French High Commissioner, M. Pierre Bordier.

British Ambassador, His Excellency J. V. Rob, C.M.G. (Resident at Brazzaville, Congo).

REPUBLIC OF CONGO

President, Fubert Youlou, assumed office August 17, 1960.

The Republic lies on the Equator between Gaboon on the west and the Congolese Republic on the east, the River Congo and its tributary the Ubanghi forming most of the eastern boundary of the state. The Congo has a short Atlantic coastline. Area of the Republic of Congo is 129,960 sq. miles, with a population estimated in 1957 at 759,000. Formerly the French colony of Middle Congo, it became a member state of the French Community on November 28, 1958, and was proclaimed fully independent on August 17, 1960.

CAPITAL.—Brazzaville (105,200); Ψ Pointe Noire (57,000).

FLAG.—Tricolour of green, yellow and red (diagonal yellow stripe).

French High Representative, M. Jean Rossard.

British Ambassador, His Excellency John Vernon Rob, C.M.G.

REPUBLIC OF GABOON

President, Leon M'ba, assumed office August 17, 1960.

Gaboon lies on the Atlantic coast of Africa at the Equator and is flanked on the north by the Spanish territory of Rio Muni and the Cameroon Republic and on the east and south by the Republic of Congo. It has an area of 101,400 sq. miles and a population estimated in 1957 at 404,000. Gaboon elected on Nov. 28, 1958, to remain an autonomous republic within the French Community and was proclaimed fully independent on August 17, 1960.

CAPITAL.—Libreville (16,700).

FLAG.—Horizontal bands, green, yellow and blue.

French High Representative, M. Risterucci.

British Ambassador, His Excellency J. V. Rob, C.M.G. (Resident at Brazzaville, Congo).

SOMALILAND AND ISLAND TERRITORIES

French Somaliland.—Area, 9,000 sq. miles. Population (1957), 67,000. Capital, Ψ Jibuti (17,000). Situated on the N.E. African coast round the Gulf of Tadjura and extending about 80 miles inland.

New Caledonia.—Area, 7,200 sq. miles. Population (1956), 68,000. Capital, Ψ Noumea (12,000). A large island in the Western Pacific, 700 miles E. of Queensland. Dependencies are the Isle of Pines, the Loyalty Islands (Mahé, Lifou, Urea, etc.), the Huon Islands and Alofi. New Caledonia was discovered in 1774 and annexed by France in 1854; from 1871 to 1896 it was a convict settlement.

Wallis and Futuna Islands.—Following a request from local kings and chiefs, it was decided by referendum (Dec. 27, 1959) that the islands would

become the sixth Overseas Territory of France. Population of the islands, formerly dependencies of New Caledonia, is about 95,500, mostly Polynesians.

French Polynesia.—Area, 2,500 sq. miles. Population (1956), 77,000. Capital, Papeete (15,220), in Tahiti. Includes the Society Islands (Tahiti, Moorea, Makatea, etc.), the Marquesas (Nukahiva, Hiva-oa, etc., 500 sq. miles population, 3,000); the Leeward Isles (Huahine, Raiatea, Tahaa, Bora Bora, Maupiti, etc.); the Gambier Islands (Mangareva, etc.); the Tubuai Islands (Tubuai, Rurutu, Raiivava, Rimatara and Rapa Island; and Maiao Island).

Comoro Archipelago.—Area, 800 sq. miles. Population (1957), 177,000. Capital, Dzaoudzi. Includes the islands of Great Comoro, Anjouan, Mayotte and Mohilla and certain islets in the Indian Ocean.

St. Pierre and Miquelon.—Area, 93 sq. miles. Population (1957), 4,900. Two small groups of islands off the coast of Newfoundland.

GERMANY

* Deutsches Reich (German Realm)

THE HISTORY OF GERMANY from 1863-1945 is marked by wars of aggression. In 1864, Prussia, in company with Austria, attacked Denmark, and after a short campaign annexed the peninsula of Schleswig-Holstein. In 1866, as a result of war with Austria (the Seven Weeks' War), Prussia acquired the hegemony of the North Germanic Confederation from Austria. After the Franco-Prussian War of 1870, when Prussia wrested Alsace-Lorraine from France, the North Germanic Confederation and three South German States became the Germanic Confederation, the King of Prussia being proclaimed German Emperor at Versailles on Jan. 18, 1871.

At the outbreak of the War of 1914-1918, Germany was a Confederate League bearing the name German Empire under the hereditary presidency of the King of Prussia holding the title of German Emperor. At the close of the war, Germany lost most of the gains she had acquired since 1863, including all her colonies.

GERMANY BETWEEN THE TWO WARS.—On Nov. 9, 1918, two days before Germany sued for an Armistice from the victorious Allies, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. In January, 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female). The Assembly met at Weimar (Feb. 6, 1919), and elected Friedrich Ebert President of the Republic, a position he occupied until his death (Feb. 28, 1925) when Field Marshal Paul von Hindenburg was elected in his stead. Von Hindenburg was re-elected April 30, 1932, the rival candidate being Adolf Hitler, who was born at Braunau, Austria (April 20, 1889) and had migrated as a young man to Bavaria. A General Election of 1933 provided Hitler's party, the *Nationalsozialistische Deutsche Arbeiter Partei* (National Socialist German Workers' Party, or Nazis) with an

absolute majority in the legislature (*Reichstag*) and Hitler became Prime Minister (Chancellor), a position which became fused with that of President at the death of von Hindenburg (Aug. 2, 1934), and Adolf Hitler exercised supreme and uncontrolled authority in the Reich.

THE WAR OF 1939-1945.—After concluding a Treaty of Non-Aggression with Soviet Russia (Aug. 24, 1939), Germany invaded Poland (Sept. 1, 1939), thus precipitating war with France and Great Britain, who had (March 31) given a pledge to support Poland against aggression.

Germany invaded and occupied Denmark and Norway (April, 1940), Belgium, the Netherlands, Luxembourg and France (May, 1940). Norway capitulated on June 9, France sued for peace in mid-June. The lightning war against Britain began on August 11, 1940, but the *Luftwaffe* attack, which was to prepare the way for invasion, was defeated. In April, 1941, Yugoslavia was invaded and Germany joined Italy in attacking Greece and Crete. On June 22, 1941, the U.S.S.R. was invaded. In 1942 the Nazi empire reached its height. The boundaries of Greater Germany included Alsace-Lorraine, Luxembourg, Eupen-Malmédy, large areas of Poland, Memelland and Slovenia; Germany and her satellites controlled all European countries except the British Isles, Spain, Portugal, Switzerland, Sweden and parts of European Russia, as well as large tracts of North Africa. The turning point came in November, 1942, with the Soviet victory at Stalingrad and the British at El Alamein. In 1943 a Soviet offensive threw the invader back almost to the Polish frontier, and the Western Allies, after defeating the Axis in North Africa, landed in Italy. In June, 1944, the Second Front opened on the Normandy beaches and by September, 1944, Germany itself was the battlefield. On May 8, 1945, the unconditional surrender of all German forces was accepted by representatives of the Western Allied and Soviet Supreme Commanders.

Hitler committed suicide on April 30, 1945.

THE POST WAR PERIOD.—After the surrender the Allied Powers assumed supreme authority in Germany. Power was to be exercised by the Commanders-in-Chief, each in his own zone of occupation and jointly in matters affecting Germany as a whole through a Control Council. Berlin was to be governed jointly by the four occupying powers. The guiding lines of policy were laid down in the agreement reached between the U.K., U.S. and U.S.S.R. Governments at Potsdam in August, 1945, which was to remain in force until a Peace Treaty should confirm or revise its directives. It was decided that "for the time being no Central German Government shall be established," but that central German administrative departments acting under the direction of the Control Council should be established in the fields of finance, transport, communications, foreign trade and industry. The Eastern frontier of Germany was provisionally redrawn (pending final settlement in the Peace Treaty) to transfer the northern area of East Prussia, including Königsberg (now Kaliningrad), to the U.S.S.R. and the rest of East Prussia and all the area lying east of the Oder and Western Neisse rivers to Polish control. On Oct. 15, 1947, the Saar, enlarged at the expense of German territory, voted for economic union with France, but following a plebiscite was incorporated in the Federal Republic of Germany on Jan. 1, 1957. The Potsdam agreement also laid down that Germany should be disarmed and prohibited from producing armaments, that production of certain other goods should be limited to the amount

* Nazi historians referred to the National Socialist régime as *Drittes Reich*. The First was the Holy Roman Empire, established in A.D. 962 by Otto I of Saxony, enduring until 1806. The Second was established by Prince Otto von Bismarck, after the Franco-Prussian war in 1871, and endured until 1918. The Third was established by Adolf Hitler in 1933.

needed to support a peacetime economy and that existing capital equipment surplus to these requirements should be removed as reparations and distributed by the Inter Allied Reparations Agency among the nations who had suffered war damage, in proportion to their losses. (The proportions were fixed by the Paris Conference of November, 1945.) The agreement further dealt with denazification, democratization, refugees, restitution, decartelization, etc.

Though certain details of the Potsdam agreement (not yet superseded by a Peace Treaty) have been carried out, differences in interpretation among the Allies have made it impossible to apply the provisions in full. Quadripartite control became a dead letter when the Russians withdrew from the Control Council in March, 1948.

Federal Republic of Germany

President, Dr. Heinrich Lübke, born Oct. 14, 1894, elected July 1, 1959, for five years from Sept. 15, 1959.

CABINET

Federal Chancellor, Dr. Konrad Adenauer (C.D.U.).
Vice-Chancellor and Minister for Economic Affairs, Prof. Ludwig Erhard (C.D.U.).

Foreign Minister, Dr. Heinrich von Brentano (C.D.U.).

Interior, Dr. Gerhard Schroeder (C.D.U.).

Justice, Fritz Schäffer (C.S.U.).

Finance, Franz Etzel (C.D.U.).

Defence, Dr. Franz-Josef Strauss (C.S.U.).

Labour, Theodor Blank (C.D.U.).

Affairs of the Federal Council and Länder and Minister for Refugees, Dr. Hans-Joachim von Merkatz (C.D.U.).

Housing, Paul Lücke (C.D.U.).

Agriculture, Werner Schwarz (C.D.U.).

All-German Affairs, Ernst Lemmer (C.D.U.).

Transport, Dr. Hans-Christoph Seebohm (C.D.U.).

Posts and Telegraphs, Richard Stücklen (C.S.U.).

Family and Youth Questions, Dr. Josef Würlmeling (C.D.U.).

Economic Property of the Federal Republic, Dr. Hans Wilhelm (C.D.U.).

Atomic Matters, Prof. Siegfried Balke (C.S.U.).

C.D.U.=Christian Democratic Union; C.S.U.=Christian Social Union.

EMBASSY IN LONDON

Chesham Place, S.W.1.

[Belgravia: 5033]

Ambassador Extraordinary and Plenipotentiary, His Excellency Hasso von Eetzdorf (1961).

Minister-Counsellor, Dr. Rudolf Thierfelder.

Counsellors, Prof. Fritz Caspar; Dr. Hans-Joachim Mangold.

Area and Population.—The area of the Federal Republic is approximately 95,737 sq. miles. The population at the end of 1960 was estimated at 53,756,100, compared with 42,998,500 in May 1939. Distribution of the population among the Länder in December, 1960 was:—

Schleswig-Holstein.....	2,309,400
Hamburg.....	1,837,000
Lower Saxony.....	6,576,100
Bremen.....	704,300
North Rhine Westphalia.....	15,852,500
Hessen.....	4,783,400
Rhineland Palatinate.....	3,411,200
Baden-Württemberg.....	7,726,900
Bavaria.....	9,494,900
Saarland.....	1,060,500

Western Berlin had an estimated population of 2,202,200 at the end of 1960.

The estimated population of the principal cities and towns in the Federal Republic in June 1960 was:—

Hamburg.....	1,829,500	Münster/	
Munich.....	1,079,400	Westph.....	180,300
Cologne.....	789,300	Bielefeld.....	174,500
Essen.....	727,300	Solingen.....	169,600
Düsseldorf.....	694,700	Aachen.....	168,200
Frankfurt/Main.....	666,500	Ludwigshafen.....	161,900
Dortmund.....	637,600	München/	
Stuttgart.....	634,600	Gladbach.....	152,400
Hanover.....	572,300	Bohn.....	146,500
Bremen.....	557,100	Freiburg.....	141,200
Duisburg.....	501,800	Bremerhaven.....	140,000
Nuremberg.....	452,400	Darmstadt.....	136,600
Wuppertal.....	420,500	Osnabrück.....	135,100
Gelsenkirchen.....	388,800	Mainz.....	130,900
Bochum.....	362,000	Recklinghausen.....	130,200
Mannheim.....	308,700	Saarbrücken.....	128,700
Kiel.....	270,700	Heidelberg.....	127,400
Oberhausen.....	256,700	Remscheid.....	124,200
Wiesbaden.....	255,600	Regensburg.....	123,400
Brunswick.....	244,100	Oldenburg.....	121,800
Karlsruhe.....	237,100	Würzburg.....	114,000
Lübeck.....	231,800	Herne.....	113,700
Krefeld.....	209,300	Offenbach/	
Augsburg.....	205,000	Main.....	113,000
Kassel.....	204,400	Bottrop.....	110,800
Hagen.....	193,800	Salzgitter.....	107,600
Mülheim/Ruhr.....	182,300	Wanne-Eickel.....	107,200

Vital Statistics.—There were 17.7 live births per 1,000 inhabitants in the Federal Republic in 1960, compared with 19.8 per 1,000 for the same area in 1938. There was an excess of live births over deaths in 1960 of 6.4 per 1,000 and in 1938 of 8.4.

Government.—The Federal Republic grew out of the fusion of the three western zones. The economic union of the U.K. and U.S. zones followed the Fusion Agreement of December, 1946. The Bizone was later joined by the French zone and in 1948–49 a Parliamentary Council, elected by the Diets of the three zones, drafted a provisional democratic federal constitution for Germany. This Basic Law came into force in the three western zones on May 24, 1949. It provides for a President, elected for a five-year term, a Lower House, with a four-year term of office, elected by direct universal suffrage, and an Upper House composed of delegates of the Länder, without a fixed term of office. The results of the election for the lower house (Bundestag) held on Sept. 6, 1953, were as follows:—

Party	Numbers
Christian Democratic and Christian Social Unions.....	243
Social Democrats.....	151
Free Democrats.....	48
Refugee Party.....	27
German Party.....	15
Independents.....	3
Total.....	487

In July 1955, 7 Refugee Party members seceded and subsequently joined the Christian Democrats. In April, 1956, 14 Free Democrats seceded to form a new party, the Free Peoples' Party. In January, 1957, 10 new Saar members joined the Bundestag. The D.P. and F.V.P. had formed a joint party with the name D.P. In April, 1961, the D.P. and the Refugee Party (BHE) merged and founded an "all-German Party". The figures in June, 1961, were:

Party	Numbers:
Christian Democratic and Christian Social Unions.....	281
Social Democrats.....	169
Free Democrats.....	43
Independents.....	4
Total.....	497

When the Federal Government took office the Allied Military Governors were replaced by High Commissioners. In 1952 a contractual agreement was signed between the Federal Republic and the western Allies, whereby the Republic, in return for certain promises regarding a defence contribution, a foreign debt settlement, and the continuation of allied policies concerning decartelization, democratization, restitution, etc., regained virtual sovereignty in May, 1955, after ratification by all the parties concerned. The High Commissioners then became Ambassadors.

The Prime Ministers of the *Länder* governments in July, 1961, were:—

Ministers-President

Baden-Württemberg.—Kurt-Georg Kiesinger.

Bavaria.—Dr. Hans Ehard.

Berlin.—Willy Brandt (Governing Mayor).

Bremen.—Wilhelm Kaisen.

Hamburg.—Dr. Paul Neumann.

Hessen.—Dr. Georg-August Zinn.

North Rhine-Westphalia.—Dr. Franz Meyers.

Rhineland-Palatinate.—Dr. Peter Altmeier.

Saarland.—Dr. Franz-Josef Röder.

Lower Saxony.—Hinrich Wilhelm Kopf.

Schleswig-Holstein.—Kai Uwe von Hassel.

Economic Position.—Despite the difficulties arising from the division of Germany, which cut off from the Federal Republic the main food producing areas of Eastern Germany and some of the principal centres of light industry, German economic recovery has made rapid strides since the currency reform of 1948. As a result of United States and British economic aid and of successful economic policies pursued by the Federal Government, Germany has regained her position as the main industrial power on the Continent, and is the most economically powerful member of the European Common Market. The Gross National Product at current prices in 1959 is estimated at DM. 244.4 milliard, an increase of DM. 7.5 milliard or 17.1 per cent. over 1958 and DM 147.2 milliard or 151 per cent. over 1950. In accordance with the Franco-German Agreement of 1957, the economic integration of Saarland with the Federal Republic took place on July 6, 1959.

Agriculture.—The total agricultural area (in 1959) amounted to 55,560 sq. miles, of which 19,847,000 acres were under plough. The forest area is 27,340 sq. miles. The 1959 harvest yielded 8,610,100 metric tons of bread grains, 5,783,100 metric tons of feeding and industrial grains and 22,708,300 metric tons of potatoes. The livestock population at the end of 1959 included 12,480,400 cattle, 814,200 horses, 1,084,200 sheep, 14,875,700 pigs and 60,011,200 fowls.

Industry.—The average index of industrial production per working day (excluding Saarland and Berlin) has developed as follows (1936=100):

	1958	1959
Mining.....	152	148
Manufacturing industry.....	237	255
(i) Basic materials.....	210	236
(ii) Capital goods.....	306	330
(iii) Consumer goods.....	209	222
(iv) Foodstuffs.....	219	224
Power (electricity and gas).....	374	402
Building Industry.....	203	235
Total industry (including building)...	232	249

Hard coal production fell from 148.8 million tons in 1958 to 142.3 million tons in 1960; brown coal rose from 93.5 million tons to 95.8 million tons; pig iron fell from 19.7 million tons to 18.9 million tons; crude steel rose from 25.7 million tons to 34.7 million tons; rolled steel products from 17.6 million tons to 19.4 million tons. An average of 113,027 passenger vehicles a month were produced in 1959 (1958=98,395), 17,308 commercial vehicles (1958=15,066), 200,000 tons of sulphuric acid (1958=198,000) 49,347 tons of chlorine (1958=44,871), 33,200 tons of cotton yarn (1958=32,727) and 9,389 tons of woollen yarn (1958=8,858), 556,658 new dwellings were completed in 1959 (1958=480,726).

Labour.—Of 20,135,400 employed in September, 1959, 13,304,600 were men. The average number of unemployed was 480,000, of whom 302,400 were men. In 1959, an average of 7,477,000 were employed in industry; coal mining absorbed 570,000; iron and steel production, 334,400; mechanical engineering and vehicle production, 1,239,000; chemicals, 428,000; and textiles and clothing, 911,400. Productivity of labour in industry (excluding electricity, gas and building industry) per working hour in 1959 reached 171 per cent. (1958=158) of the 1950 level.

Finance.—Under the Federal constitution the yields of indirect taxes, other than the beer tax, accrue to the Federal Government, while direct taxes accrue to the *Länder*, who are obliged to transfer part of them to the central authorities. From 1961, the financial year coincides with the calendar year instead of, as previously, ending on March 31 each year. The 1960 financial year is from April 1 to December 31, 1960, and figures are therefore valid only as to 75 per cent.

The pattern of budgetary expenditure in 1960 was: Total expenditure DM. 41.9 milliard (1959=39.8 milliard); Social expenditure (including housing and welfare), DM. 17.6 milliard (about 42 per cent.); Defence (including the amount spent on foreign troops in the Federal Republic), DM. 10.7 milliard (about 26 per cent.); Agriculture and food, DM. 2.8 milliard (about 7 per cent.); Transport, DM. 3.4 milliard (about 8 per cent.).

In 1952 an agreement was reached for the settlement of German pre-war and post-war foreign debts. An agreement was also signed whereby the Federal Republic will pay to Israel and Jewish organizations over a period of years reparations amounting to DM. 3.5 milliard.

Foreign Trade.—In 1959, imports (including West Berlin and from July 6, 1959, Saarland) were valued at DM. 35,823,000,000 (1958=31,133,000,000); and exports at DM. 41,184,000,000 (1958=36,998,000,000); 30 per cent. of imports consisted of foodstuffs and 21.6 per cent. of raw materials; 28.8 per cent. came from the Common Market countries 20.7 per cent. from the E.F.T.A.* and 14.7 per cent. from the United States and Canada. The Common Market countries took 27.8 per cent. of all exports, the E.F.T.A.* 27 per cent. and the United States and Canada, 10.5 per cent.

Trade with U.K.

	1959	1960
Imports from U.K....	£141,995,149	£159,319,483
Exports to U.K....	144,250,467	181,711,041

† Common Market: W. Germany, Belgium and Luxembourg, France, Italy, Netherlands.

* E.F.T.A. (European Free Trade Association): Austria, Denmark, Norway, Portugal, Sweden, Switzerland, U.K.

Communications.—The state-owned railways of the Federal Republic measure 18,957 miles and the privately owned railways 3,400 miles, a total of 22,357 miles. In 1959 the railways handled 327,900,000 tons of goods and the inland waterways 141,600,000 tons. Railway rolling stock (*Deutsche Bundesbahn*) included, in 1959, 7,800 steam locomotives, 938 electric locomotives, 723 diesel locomotives, 25,315 passenger coaches (including rail buses) and 254,296 goods waggon. The classified roads measure 84,000 miles. On Jan. 1, 1960, there were 3,895,760 cars and 624,939 lorries. Ocean-going shipping under the German flag in Dec. 1959, amounted to 4,743,000 tons gross.

Social Welfare.—There is compulsory insurance against sickness, accident, old age and unemployment. Children's allowances are payable in respect of the third and subsequent children. Pension schemes for widows and orphans of public servants are in operation. Public assistance is given to persons unable to earn their living, or with insufficient income to maintain a minimum standard of living.

Law and Justice.—Judicial authority is exercised by the Federal Constitutional Court, the Supreme Federal Court, and the courts of the *Länder*. Judges are independent and subject only to the law. The death sentence has been abolished.

Language and Literature.—Modern (or New High) German has developed from the time of the Reformation to the present day, with differences of dialect in Austria and Alsace and in the German-speaking cantons of Switzerland. The literary language is usually regarded as having become fixed by Luther and Zwingli at the Reformation, since which time many great names occur in all branches, notably philosophy, from Leibnitz (1646–1716) to Kant (1724–1804), Fichte (1762–1814), Schelling (1775–1854) and Hegel (1770–1831); the drama from Goethe (1749–1832) and Schiller (1759–1805) to Gerhart Hauptmann (1862–1946); and in poetry, Heine (1800–1856). German authors have received the Nobel Prize for Literature on five occasions—Theodore Mommsen (1902), R. Eucken (1908), P. Heyse (1909), Gerhart Hauptmann (1912), and Thomas Mann (1929). There are now 1,464 daily papers.

Education.—School attendance is compulsory for all children between the ages of 6 and 14. For the school year 1959–60 there were 30,000 elementary schools, with 198,000 teachers and 5,000,000 pupils in the Federal Republic. State expenditure per primary school pupil per annum amounted to DM. 640. In addition there were 760 intermediate schools with 310,000 pupils and 10,100 teachers, 1,550 grammar schools with 763,000 pupils and 14,000 teachers. State expenditure per pupil for intermediate schools was D.M. 980 and for grammar schools was D.M. 1,440 per annum. The grammar school leaving examination (*Abitur*) entitles the holder to a place of study at a university. The number of examinations passed in 1957 was 38,700. Children below the age of 18 who are not attending an intermediate or grammar school are obliged to take a three-year course (part-time) at a vocational school. There were 9,700 such schools with 2,300,000 pupils and 22,000 teachers. State expenditure per pupil per annum was DM. 1,100. In the winter term of 1959 the 18 universities, 8 technical universities, and 7 other institutions of university status, together with teacher training and other colleges in the Federal Republic registered a total of 196,000 German, and 18,800 foreign students. The largest universities are in Munich, Berlin, Cologne, Aachen (T.U.), Hamburg, Frankfurt, Heidelberg, Freiburg

and Göttingen. There were 1,200 adult education centres with 3,500 rural branches. The attendance figure for 1959 was 4,400,000 and state expenditure amounted to 40,000,000 DM.

Religion.—At the 1950 Census there were 24,430,815 Protestants in the Republic, 21,576,179 Roman Catholics, 17,116 Jews, 142,849 agnostics and 1,528,713 others.

CAPITAL, Bonn, in North Rhine Westphalia, on the left bank of the Rhine, 15 miles distant from Cologne. Population, 146,500.

Minister, E. M. Rose, C.M.G.

Counsellors, F. W. Marten, M.C. (Head of Chancery); A. L. Pope, O.B.E.

1st Secretaries, A. A. Duff, D.S.O., D.S.C.; R. Brash; P. L. V. Mallet; H. G. Darwin; P. N. Lunn, C.M.G., O.B.E.; J. C. C. Bennett; W. Cohn, and Secretaries, C. G. Mays; A. D. S. Goodall; D. J. M. Cornwell; K. M. Thomas; P. L. Morgan; A. W. Rhodes.

Minister (Economic), J. A. M. Marjoribanks, C.M.G.

1st Secretaries (Commercial), N. Statham; Miss R. M. B. Chevallier; N. G. S. Beckett.

2nd Secretaries (Commercial), K. B. A. Scott; R. J. Jacques; G. A. Ball; E. L. Bailey.

Counsellor (Information), A. G. R. Rouse, C.M.G., O.B.E.

1st Secretaries (Information), P. W. R. C. Haley, M.B.E.; H. Berman, O.B.E.

2nd Secretaries (Information), Miss P. D. Chorley; I. H. May.

Naval Attaché, Capt. B. D. O. MacIntyre, D.S.C., R.N.

Asst. do., Cdr. W. E. Grenfell, R.N.

Military Attaché, Brig. M. V. Fletcher.

Asst. do., Maj. K. J. Walsh.

Air Attaché, Air Commodore J. N. Tones, C.B.E.

Civil Air Attaché, J. L. Roberts.

Labour Attaché, E. C. M. Cullingford.

Asst. do., F. Kenny, M.B.E.

Scientific Attaché, Brig. C. F. C. Spedding (ret.).

1st Secretary (Scientific), Dr. M. Francis.

Supply Attaché, C. F. McFarlane, C.B.E.

Asst. do., F. A. Neal.

Head of Visa Section (Düsseldorf), A. S. Auger.

Counsellor (Administration), C. Whitworth, M.B.E.

1st Secretary (Administration), E. G. Ducker.

Chaplain, Rev. G. P. Spink.

Archivist, Miss H. H. Sheppard.

Accountant, F. E. Greville.

There are British Consulates-General at Berlin, Hamburg, Hanover, Düsseldorf, Frankfurt, Munich and Stuttgart; and a British Consulate at Bremen.

BRITISH COUNCIL

Liaison Officer, R. Seymour, C.B.E., Hahnenstrasse 6, Cologne. There are British Council offices at Berlin, Hamburg, Frankfurt, Munich and Stuttgart.

BERLIN

G.O.C. British Sector, Maj.-Gen. Sir Rohan Delacombe, K.B.E., C.B., D.S.O.

Deputy Commandant, G. L. McDermott, C.M.G.

Administrative Officer, L. H. Barnes, M.B.E.

Eastern Germany

Administration.—When the Federal Republic was formed, the People's Council of the Soviet zone, appointed in 1948, was converted into a Provisional People's Chamber. On Oct. 7, 1949, this Chamber enacted a constitution of the "German Democratic Republic," and a provisional Land Chamber was established, now known as *Volkskammer*. The German Democratic Republic is not recognized by the governments of western countries. A number of governmental reforms have been introduced since the original constitution was drafted. The Presidency was abolished on Sept. 22, 1960. From that date the main Government posts have been held as follows:—

Chairman, Council of State, W. Ulbricht.

Prime Minister, Otto Grotewohl.

President of the Volkskammer, Dr. Johannes Dieckmann.

Deputy Prime Minister and Foreign Affairs, Dr. Lothar Bolz.

Chairman, State Planning Commission, B. Leuschner.

Chairman, State Control Commission, F. Lange.

It was not until the summer of 1953 that the Soviet Commander-in-Chief was replaced in the civilian sphere by a High Commissioner. In September 1953, the post of High Commissioner was combined with that of Ambassador.

Area and Population.—The area of Eastern Germany is 41,380 sq. miles and its population in October, 1945, was 17,300,000*:—

Saxony-Anhalt . . . 4,200,000	Saxony . . . 5,600,000
Brandenburg . . . 2,500,000	Thuringia . . . 2,900,000
Mecklenburg . . . 2,100,000	

Principal cities and towns: Dresden (467,966); Leipzig (607,657); Magdeburg (236,326); Halle (222,505); Erfurt (174,633); Rostock (114,869); Zwickau (122,862); and Karlmarxstadt (Chemnitz) (250,188). Eastern Berlin, an integral part of the zone and its capital city, has a population of approximately 1,200,000.

In July, 1952, in the interests of "democratization" and the further centralization of power, the old *Länder* were abolished and replaced by 14 *Bezirke* (regions) as follows:

<i>Land</i>	<i>Bezirke</i>
Mecklenburg . . . Rostock; Schwerin; Neubrandenburg.	

Brandenburg . . . Potsdam; Cottbus; Frankfurt.
Saxony Karlmarxstadt; Dresden; Leipzig.
Saxony-Anhalt . . . Halle; Magdeburg.
Thuringia Erfurt; Gera; Guhl.

Each region has its own *Bezirksstag* (assembly) and *Bezirksrat* (council) to deal with purely regional affairs.

* Figures published in 1961 by the West German Ministry of Refugees showed that 2,600,000 refugees had fled to the Federal Republic from Eastern Germany (German Democratic Republic) in 1949-1961, many of them crossing to the Western sector of Berlin. More than a quarter of a million persons fled to the Federal Republic in each of the years 1955-1957. In the first six months of 1961, 103,159 refugees were received in West-Germany, 30,444 more in July and a further 25,000 in August, 1961, until the Berlin border was sealed by the East German authorities. Refugees crossing in 1960 included about 700 doctors, 142 professors and college lecturers and some 2,000 school teachers.

Economic Position.—From the economic point of view the Eastern zone is a more unbalanced area than the Federal Republic. It is more nearly self-sufficient in food, but has few industrial raw materials apart from brown coal and copper ore. Before the war its highly developed secondary industries were dependent on Ruhr coal and steel.

The Soviets claimed reparations from Germany to a value of \$(1938)10 milliard. Between 1945 and March, 1948, they removed considerable quantities of capital equipment to the U.S.S.R. and took over a number of important plants as Soviet State Concerns (S.A.G.). S.A.G.'s now account for perhaps one-eighth of all industrial production in Eastern Germany. Their products are sold partly in Germany and partly to the U.S.S.R. and other foreign countries. In addition the zone pays reparations from current production to the U.S.S.R. and, although the amounts have been reduced, the obligation continues until 1965. Economic control has been centralized, industry subjected to rigid central planning, state ownership and trading greatly expanded at the expense of private interests and the basic industries given priority over secondary industries. Large new steel plants have been erected at Fürstberg/Oder and at Calbe, and crude steel production is now greater than before the war.

The East German Government announced on April 14, 1960, that collectivization of agriculture in East Germany had been completed, the only exceptions being a few small areas unsuitable for large-scale farming.

Trade with U.K.

	1959	1960
Imports from U.K. . . .	£3,524,857	£7,090,514
Exports to U.K.	4,610,993	6,272,023

GREECE

(Hellas)

King of the Hellenes, Paul I, born Dec. 14, 1901; acceded (on the death of his brother King George II), April 1, 1947; married Jan. 8, 1938, Princess Frederika, daughter of the Duke of Brunswick (born April 18, 1917), and has issue:—

- (i) Crown Prince (*Diadoch*) H.R.H. Prince Constantine, Duke of Sparta, born June 2, 1940.
- (ii) H.R.H. Princess Sophia, born Nov. 2, 1938.
- (iii) H.R.H. Princess Irene, born May 11, 1942.

CABINET

(June, 1956)

Prime Minister, Constantine Karamanlis.
Deputy Prime Minister, P. Kanellopoulos.
Minister of Co-ordination, A. Protopapadakis.
Foreign Minister, E. Averoff-Tositsas.
Minister to the Prime Minister, C. Tsatos.
Justice, C. Kallias.
Interior, D. Makris.
Education and Cults, G. Voyadjis.
Finance, C. Papaconstantinou.
Commerce, L. Dertilis.
Industry, N. Martis.
Communications and Public Works, General Solon Ghikas.
Agriculture, C. Adamopoulos.
Minister of Social Welfare, A. Stratos.
Merchant Shipping, G. Andrianopoulos.
Labour, A. Dimitratos.
Minister for Northern Greece, A. Theologitis.

ROYAL GREEK EMBASSY IN LONDON

51 Upper Brook Street, W.2

[Mayfair: 0694]

Ambassador Extraordinary and Plenipotentiary, His Excellency George St. Seférides (1957).

Counsellors, M. J. Delivanis; J. Dracoulis (*Consular Affairs*).

1st Secretaries, D. C. Petrou; A. J. Stephanou.

2nd Secretary (*Consular Affairs*), S. Konstantopoulos.

Naval and Military Attaché, Captain E. G. Panas.

Minister Plenipotentiary (*Press Affairs*), M. Cosmetatas.

Air Attaché, Group Capt. M. J. Fragiskos.

Commercial Counsellor, E. Amagnostopoulos.

Commercial Secretary, G. Mitrofanis.

Hon. Educational Counsellor, P. Argenti.

Attaché, J. Temenides.

Consulate General and Department of Information, 34

Hyde Park Square, W.2.

There are Honorary Consulates at Birmingham, Bradford, Bristol, Falmouth, Hull, Immingham, Liverpool, Middlesbrough, Newcastle, Plymouth, Portsmouth, Southampton and Yarmouth, Swansea and Glasgow, and at Belfast.

A maritime Kingdom in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Libyan and Ionian seas, and on the E. by Turkey, with an estimated area of 51,182 sq. miles. Provisional results of a census held throughout the country on March 19, 1961, recorded a population of 8,357,526.

The area of the mainland is 41,328 sq. miles, and of the islands 9,854 sq. miles. The main divisions are: Macedonia (which includes Mt. Athos and the island of Thasos), Thrace (including the island of Samothrace), Epirus, Thessaly, Continental Greece (which includes the island of Euboea and the Sporades or "scattered islands," of which the largest is Skyros), the Peloponnese (or Morea), the Dodecanese or Southern Sporades (12 islands occupied by Italy in 1911 during the Italo-Turkish War and ceded to Greece by Italy in 1947) consisting of Rhodes, Astypalaia, Karpathos, Kassos, Nisyros, Kalymnos, Leros, Patmos, Kos, Symi, Khalki and Tilos, the Cyclades (a circular group numbering about 200, with a total area of 923 sq. miles; the chief islands are Syros, Andros, Tinos, Naxos, Paros, Santorini, Milos and Serifos), the Ionian Islands (Corfu, Paxos, Levkas, Ithaca, Cephalonia, Zante and Cerigo), the Aegean Islands (Chios, Lesbos, Limnos and Samos). In Crete there was for over 1,500 years (3000 to 1400 B.C.) a flourishing civilization which spread its influence far and wide throughout the Aegean, and the ruins of the palace of Minos at Cnossos afford evidence of astonishing comfort and luxury. Greek civilization emerges about 1300 B.C. and the poems of Homer, the blind poet of Chios, which were probably current about 800 B.C., record the 10-year struggle between the Achaeans of Greece and the Phrygians of Troy (1194-1184 B.C.).

Government.—The Independence of Greece dates from March 25 (O.S.), 1821, and was ratified by the Treaty of Adrianople (Sept. 14, 1829) and the Convention of London (Feb. 3, 1830), after a successful insurrection against the Ottoman Empire, to which the country had been subjected since the 15th century. The first Head of State was a Greek, John Capodistrias, who was assassinated in Nauplia in 1831. The Allied Powers then chose a prince of the Wittelsbach (Bavarian) dynasty; he ruled as King Otho until his abdication in 1862. He was succeeded by King George I of the Glucksburg (Danish) dynasty. Since then Greece has had one period as a republic (1924-35) and one period of uncertainty (from the Second World War until September, 1946), but in both cases returned to the monarchical system under the Glucksburg dynasty after a plebiscite.

At the time of its independence, the Kingdom of Greece included little more than the Peloponnese, Sterea Hellas and the Cyclades, but the Ionian Islands were added in 1864, Thessaly in 1881, Macedonia, Crete and the Aegean Islands in 1913, Western Thrace in 1919 and the Dodecanese in 1947. The Treaty of Sévres (1922), under which Greece would have received large territories round Istanbul and in Asia Minor, was nullified by the Greek defeat in the Asia Minor campaign of 1922. This was followed by a major exchange of populations which largely settled the minority problems between Greece and Turkey. The long campaign for *enosis* (union) of Cyprus with Greece was terminated in 1959 by the Zürich and London Agreements which led to the proclamation of Cyprus as an independent republic in 1960.

On October 28, 1940, Italy declared war on Greece and invaded the country from Albania, but within a month Greek troops, assisted at sea and in the air by Great Britain, expelled the invader and advanced in triumph into Albania. On April 6, 1941, Germany invaded Yugoslavia and Greece and came to the aid of the defeated Italian forces. British and Commonwealth ground forces were sent to the assistance of Greece, but the fresh onslaught led to her occupation by German, Italian and Bulgarian troops. By her own exertions and by Allied help Greece was freed in October, 1944.

There followed in December-January, 1944-5 a short period of civil war in which the Communists attempted to seize power by force. In 1947, Communist guerrilla disturbances assumed the proportions of civil war, which continued with increasing damage and destruction to the country until the summer of 1949 when the Greek Army's victories overwhelmed the guerillas. Normal conditions were sufficiently restored throughout the country to enable a general election to be held on March 5, 1950. Since then, with considerable economic help from the United States, Greece has made great progress in the formidable task of rehabilitation and reconstruction. Greece acceded to the North Atlantic Treaty in Feb. 1952. In the economic field the country has made steady, if slow, progress. From 1954-59 relations between Greece and the United Kingdom were severely strained by the Cyprus issue, but since its settlement by the Zürich and London agreements (February 11 and 19, 1959) they have improved rapidly. The interim Government of M. Karamanlis was confirmed in office by the General Election of February, 1956. At a general election held on May 11, 1958, under a new electoral system, the National Radical Union Party of M. Karamanlis slightly increased its majority in the Chamber, obtaining 173 seats, though this party secured a smaller proportion of the votes, and a new Government was formed by M. Karamanlis on May 17. At this election the extreme Left Wing party, E.D.A., emerged as the leading Opposition party with 78 seats in the Chamber. On July 9, 1961, an agreement (subject to ratification) for Greece to be associated with the European Economic Community was signed in Athens.

Defence.—The Navy has 80 ships, about one-quarter of which are on loan from Britain. The strength of the Army is 115,000. The Air Force consists of 24,000 men, nine offensive squadrons and one transport squadron, together with a few helicopters and the necessary support, training and maintenance organizations.

Production.—Though there has in recent years been a substantial measure of industrialization, Greece is still predominantly an agricultural country. Agriculture employs about half the

working population, the most important product and export being tobacco, which still, despite recent difficulties in disposing of the crop abroad, accounts for one-third of the value of total visible exports from Greece. Since the war the production of wheat, cotton and rice has been greatly increased, partly in an attempt to make the country's economy less dependent upon tobacco. The most important of the fruit trees are the olive, vine, orange, lemon, fig, almond, pomegranate and currant-vine, and considerable efforts have lately been made to develop exports of Greek fresh fruit and vegetables as well as currants and other dried fruits. Currants, grown mainly around Patras, remain one of Greece's main exports, the United Kingdom being the principal purchaser.

The principal minerals mined in Greece are iron ore, iron pyrites, manganese, magnesite, chrome, bauxite, lead, zinc and emery, and prospecting for petroleum is being carried on. The chief industries are textiles (cotton, woollen, silk and rayon), chemicals, cement, glass, metallurgy, shipbuilding, domestic electrical equipment and footwear. An oil refinery, the first in Greece, was opened near Athens early in 1958 and industrial projects, either in the course of being carried out or planned in the near future, include the extension of the existing iron and steel industries, the establishment of a plant for the manufacture of aluminium and other factories for sugar, fertilizers, tyres and polystyrene; the development of the country's electric power resources; irrigation and land reclamation schemes, and the exploitation of Greece's lignite resources for fuel and industrial purposes. Greece enjoys substantial financial assistance from the United States and has received a loan from the Federal Republic of Germany.

Communications.—The 2,650 kilometres of Greek railways had all been repaired by the end of 1950, in spite of delays due to the activities of guerilla bands. All are now State owned with the exception of the Athens-Piraeus Electric Railway. The railway from Athens to the Peloponnese, serving Patras and southern Greece, is metre gauge, but the other lines, except one or two minor ones, are standard gauge. Athens is linked with Istanbul, Paris (*via* Belgrade, Trieste and Lausanne), Ostend (*via* Belgrade, Salzburg, Cologne and Brussels) and Vienna by direct sleeping-car services. Greek roads total somewhat over 50,000 kilometres, of which about 30 per cent. are classified as national highways and 30,000 km. are classified as provincial roads. More than 7,000 km. of both classes are asphalt and a further 14,000 km. are macadamized. At the end of Dec., 1960, the Greek mercantile fleet numbered 817 ships with a total tonnage of 5,574,621 tons gross. A further 703 Greek-owned ships were under foreign flags (6,626,143 tons gross). The Greek national airline, Olympic Airways, flies numerous internal and external services, including Athens-London, and it and other airlines connect Athens directly with most countries in Europe and the Middle East.

Religion.—Over 97 per cent. of the people are adherents of the Greek Orthodox Church, which is the State religion, all others being tolerated and free from interference. The Church of Greece recognizes the spiritual primacy of the Ecumenical Patriarch of Constantinople, but is otherwise a self-governing body administered by the Holy Synod under the Presidency of the Archbishop of Athens and All Greece. It has no jurisdiction over the Church of Crete, which has a degree of autonomy under the Ecumenical Patriarch, nor over the Monastic Community of Mount Athos and the Church in the Dodecanese, both of which come directly under the Ecumenical Patriarch.

Education is free and compulsory from the age of 6 to 12 and is maintained by State grants. There are two Universities Athens and Salonica, that of Athens being of wide repute.

Language and Literature.—The spoken language of modern Greece is descended by a process of natural development from the "Common Greek" of Alexander's empire. Official and technical matter is mostly composed in *Katharevousa*, a conservative literary dialect evolved by Adamantios Corais (Diamant Coray), who lived and died in Paris (1748-1833), but novels and poetry are mostly composed in *dimotiki*, a progressive literary dialect which owes much to John Psycharis (1854-1929). The poets Solomos, Palamas, Cavafis and Sikelianos have won a European reputation.

CURRENCY

The Greek *drachma* has an official exchange rate of 84=£1 sterling and 30=U.S. \$1.

GUATEMALA

(República de Guatemala)

PRESIDENT

Gen. Miguel Ydigoras Fuentes, *assumed office*
March 1, 1958.

LEGATION IN LONDON

30 Collingham Gardens, S.W.5

[Fremantle: 7463]

Envoy Extraordinary and Minister Plenipotentiary in London, Col. Doroteo Monterosseo (1960).

There is a Consulate-General at *Liverpool* and Consuls at *Glasgow and Belfast.*

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 45' to 17° 49', and in W. long from 88° 12' 49' to 92° 13' 43', and comprises an area of 43,042 square miles, and a population (at the census of 1950) of 2,788,122. There is a single chamber legislative assembly of 68 members and a cabinet of 21 of whom 10 are Ministers of State. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital (which is at an altitude of 4,800 ft.) was destroyed by an upheaval in Dec., 1917. The country is well watered by numerous rivers; the climate is hot and malarial near the coast, temperate in the higher regions. The rainfall in the capital is 57 in. per annum. The chief sea-ports are San José de Guatemala and Champerico on the Pacific and Livingston, Matías de Gálvez (formerly Santa Tomás) and Puerto Barrios on the Atlantic side.

Language and Literature.—Spanish is the language of the country, and since the establishment of the University in the capital education has received a marked impulse and the high figure of illiteracy is being reduced. The National library contains about 80,000 volumes in the Spanish tongue.

FINANCE 1961-62

Estimated Revenue. *Quetzales* 121,028,834

Estimated Expenditure. 121,028,834

At par 1 *Quetzal* = \$1 U.S. Exchange rate 2.80 Q = £1. (See also p. 84.)

TRADE

Telecommunications, Diop Alassane.

Foreign Affairs, Beavogui Louis-Lansana.

Industry and Mines, Drame Alioune.

Youth, Arts and Culture, Tounkara Jean Faragué.

Rural Economy, Barry Sory Ibrahim.

Formerly part of French West Africa, Guinea has a coastline on the Atlantic Ocean between Portuguese Guinea and Sierra Leone and in the interior is adjacent to Sénégal, Mali and the Republic of Ivory Coast. Area, 96,865 sq. miles. The population was estimated by the French administration in 1957 at 2,492,000, mostly of the Fullah, Malinké and Soussou tribes. It is estimated that there are about 2,000 Europeans in the country.

Government.—Guinea was separated from Sénégal in 1891 and administered by France as a separate colony until 1958. In the referendum held in Metropolitan France and the overseas territories on Sept. 2, 1958, Guinea rejected the new French Constitution. Accordingly, on Sept. 28, it was declared that Guinea had separated itself from the other territories of French West Africa which had adopted the Constitution. French administrative and financial assistance was terminated; and Guinea left the French Community. On October 2, 1958, Guinea became an independent republic governed by a Constituent Assembly. M. Sekou Touré, Prime Minister in the Territorial Assembly, assumed office as head of the new Government.

A provisional constitution, adopted on Nov. 12, 1958, declared Guinea "a democratic, secular and social republic", powers of government being exercised by a president assisted by the Cabinet. The President, eligible for a term of 7 years and for re-election, is head of state and of the armed forces. M. Sekou Touré was elected President of the Republic by an overwhelming vote in an election (in which he was the sole candidate) in January, 1961. General recognition of Guinea as an independent state was followed by her admission to membership of the United Nations in December, 1958.

Guinea withdrew from the Franc Zone on March 1, 1960, and established her own currency, the *Guinea franc* (at par with the *franc C.F.A.*). The consequent payment difficulties led to the rupture of commercial relations with France, hitherto her most important supplier and purchaser.

Production, etc.—The principal products of Guinea are bauxite, iron-ore, palm kernels, millet, rice, coffee, bananas, pineapples and rubber. Principal imports are cotton goods, manufactured goods, tobacco, petroleum products, sugar, rice, flour and salt; exports, bauxite, iron-ore, diamonds, coffee, hides, bananas, palm kernels and pineapples. In the mountains in the hinterland of Guinea (Fouta Dialon, 4,970 feet), where the rivers Sénégal, Gambia and Niger have their sources, large deposits of bauxite (the raw material of aluminium) are worked and alumina is produced for export. Bauxite is at present exported from the Conakry area where there are also rich deposits of iron-ore and large-scale mining is carried on.

HAITI

(République d'Haiti)

President, Dr. François Duvalier, installed Oct. 22, 1957; re-installed May 22, 1961.

EMBASSY IN LONDON

22 Hans Road, S.W.3.

Ambassador, His Excellency Dr. Colbert Bonhomme.

1st Secretary, M. Casseus.

The Republic of Haiti occupies the western third of the island of Hispaniola, which, next to Cuba, is the largest island in the West Indies.

The area of the Republic is about 10,000 sq. miles with a population of about 4,000,000. The people are mainly negroes but there are numbers of

mulattoes and others with some admixture of European blood. About 250 British subjects, chiefly of British West Indian origin, reside in Haiti.

A French colony under the name of Saint-Dominique from 1697, the slave population, estimated at 500,000, revolted in 1791 under the leadership of Toussaint L'Ouverture, who was born a slave and made himself Governor-General of the colony. He capitulated to the French in 1802 and died in captivity in 1803. Resistance was continued by Jean Jacques Dessalines, also a former black slave, who, on January 1, 1804, declared the former French colony to be an independent state. It was at this time that the name Haiti, an aboriginal word meaning mountainous, was adopted. Dessalines became Emperor of Haiti, but was assassinated in 1806. In 1915, following a period of political upheaval, the country was occupied by a force of U.S. marines. The occupation came to an end in 1934, and U.S. control of the revenue of Haiti officially ended on October 1, 1947.

The six-year term of General Magloire having ended in December 1956, he attempted to stay in power for a further period but was forced to resign and go into exile. A period of political upheaval followed and for many months there was no effective government. A military junta took over in June, 1957, and elections were held in September, following which Dr. Duvalier was installed as the new President of the Republic.

Production, Industry, etc.—In French colonial times, Haiti was one of the most productive countries in the world and the richest French possession. Improvident methods of peasant agriculture succeeded the plantation system and resulted in the gradual impoverishment of natural resources through exhaustion of the soil, deforestation and erosion. In recent years measures for agricultural rehabilitation have been taken with the aim of a gradual restoration of the productivity of the country. The main project now approaching completion is a scheme for the irrigation of more than 70,000 acres of the Artibonite valley for which the Import-Export Bank approved a loan of \$27,000,000 and the Development Loan Fund, on May 28, 1959, a further loan of \$4,300,000. The principal products are coffee, sisal, sugar, essential oils, bananas, logwood, cocoa and cotton. Coffee accounts for about two-thirds of total exports and is the mainstay of the country's economy. Exports of bauxite began in 1957 and production of copper in the Terre Neuve area started in 1960. Industry is still on a small scale. The tourist trade expanded until 1956, since when it has fallen off owing to political upheavals.

Communications.—There are very few asphalted roads and internal communications are very bad. Air services between the capital and the principal provincial towns are maintained by the Aviation Corps of the Haitian Army. The principal towns and villages are connected by telephone and/or telegraph. The internal telephone and telegraph system is permanently out of order. The reinstallation which was being carried out by a British firm was stopped in 1957 and has not been resumed. External telegraph, telephone and postal services are normal.

Air services by Pan-American World Airways are regular and frequent, and there are passenger sailings every 10 days (approx.) for New York and Panama by the Grace Line. Freight sailings are frequent for the U.S.A., Canada and Europe. Sailings between Haiti and Jamaica are infrequent. (Air mail transit U.K./Port-au-Prince 4-7 days.)

Climate.—The climate is tropical with comparatively little difference in the temperatures between the summer (March–Oct.) and the winter (Nov.–Feb.). The temperature at Port-au-Prince rarely exceeds 95° F., but the humidity is high, especially in the autumn.

Language and Literature.—French is the language of the government and the press, but it is only understood by the educated minority. The usual language of the people is Creole. Education is free but estimates of illiteracy are as high as 90 per cent. There are 4 French daily newspapers and several weekly papers including 2 in English. The total circulation is very small.

HONDURAS

(Republica de Honduras)

President, Dr. José Ramón Villeda Morales (Dec. 21, 1957).

HONDURAN EMBASSY IN LONDON

104 Great Portland Street, W.1.
[Langham: 6103]

Ambassador, His Excellency Dr. Francisco José Durón (1960).

Consul-General, Dr. Gonzalo Rodríguez-Soto.

There is a Consular Office at Birmingham.

Honduras, one of the five Republican States of Central America, lies between lat. 13° and 16° 30' N. and long. 83° and 89° 41' west, with a seaboard of about 400 miles on the Caribbean Sea and an outlet, consisting of a small strip of coast 77 miles in length on the Pacific. Its frontiers are contiguous with those of Guatemala, Nicaragua and El Salvador. The Republic contains a total area of approximately 43,278 square miles and a population

of 1,887,389 (estimate of June 30, 1959) of mixed Spanish and Indian blood. There is a strong foreign negro (British West Indian) element in Northern Honduras. The country is very mountainous, being traversed by the Cordilleras, but possesses well watered fertile valleys and wooded tablelands. The climate varies with the altitude, being tropical throughout the year in the coastal belts and temperate and mainly healthy in the uplands.

Originally discovered and settled by the Spaniards at the beginning of the sixteenth century, Honduras formed part of the Spanish American Dominions for nearly three centuries until 1821 when independence was proclaimed.

Under the Constitution of Dec. 21, 1957, the Legislature consists of a single Congress of 58 members elected by popular vote in the ratio of approximately one per 30,000 inhabitants. The executive authority is vested in the President who is assisted by a Cabinet of nine Ministers. The Republic is divided into 18 departments, the newest of which, Gracias a Dios, formed in Feb. 1957, covers all the territory previously known as La Mosquitia, together with portions of the Departments of Olancho and Colón. It is inhabited by Indian tribes and largely unexplored.

The chief industry is the production of bananas. Other products are coffee, coconuts, tobacco, beans, maize, rice and tropical fruits. Cattle raising is becoming an increasingly important industry, a large number of cattle being exported to the neighbouring countries every year. Honduras is also a timber producing country, the most important woods being pine, mahogany and cedar. There are large tracts of uncultivated land.

The mineral resources of the country are reputed to be considerable, but only a small portion is at present exploited owing to transport difficulties.

1,008 miles of railway were in operation in the year 1957, chiefly to serve the banana plantations and the Caribbean ports. The total road mileage is approximately 2,000, the greater part of which is in poor condition, but improvements are now being made and new roads built. There are 15 airports in use in Honduras, exclusive of numerous small landing and emergency fields. There are three international air services (TACA Internacional, PAA and TAN) and a domestic air service (SAHSA). There are 2,979 miles of telephone lines, 4,981 miles of telegraph lines and 369 post-offices.

The chief ports are Puerto Cortes, Tela and La Ceiba on the North Coast, through which passes the bulk of the trade with the United States and Europe, and Amapala, situated on Tiger Island in the Gulf of Fonseca, on the Pacific side.

Language and Literature.—The language of the country is Spanish. Primary and secondary education is free and compulsory and, although there is still a great deal of illiteracy, it is gradually diminishing. There is no recognized native literature.

LEGATION IN LONDON

(35 Eaton Place, S.W.1)

[Belgravia: 4048]

Minister in London, His Excellency Béla Szilágyi (1959).

Consulate, 46 Eaton Place, S.W.1 (Belgravia: 4462).

Area and Population.—The area of Hungary may be stated as approximately 36,000 sq. miles with a population (Jan. 1, 1960) of 9,997,870.

Government.—Hungary was reconstituted a kingdom in 1920 after having been declared a republic on Nov. 27, 1918. She joined the Anti-Comintern Pact on Feb. 24, 1939, and entered the 1939-45 War on the side of Germany. On Jan. 20, 1945, a

Hungarian provisional government of liberation which had been set up during the preceding December, signed an armistice with the United Nations under the terms of which the frontiers of Hungary were withdrawn to the limits existing in 1937.

For the first four years after the liberation, Hungary was governed by a coalition of the Smallholder, National Peasant, Social Democrat and Communist parties. During this time land reform was carried out, the great landowners being dispossessed and their estates partitioned among peasants; mines, heavy industry, banks and schools were nationalized. By 1949 the Communists, under the leadership of Mr. Rákosi, having compelled the Social Democrat Party to merge with them, and having disrupted the peasant parties, had succeeded in gaining a monopoly of power. Elections in that year, in which candidates for the National Assembly were drawn from a single list, resulted in 95.6 per cent. of the votes cast being obtained by the Communist-dominated People's Front. A campaign was opened to collectivize agriculture and by 1952 practically the entire economy had been "socialized."

In mid-1953 Mr. Imre Nagy replaced Mr. Rákosi as Prime Minister, though the latter continued to hold his post as First Secretary of the Party. Mr. Nagy introduced a more moderate policy based largely on the development of agriculture rather than heavy industry; but in April, 1955, Mr. Rákosi succeeded in turning the tables on his rival who was removed from his position as Prime Minister and subsequently expelled from the Party. But after the 20th Congress of the Soviet Communist Party, opposition to Mr. Rákosi within the Hungarian Communist Party mounted and on July 18, 1956, he was removed from his post as First Secretary and succeeded by Mr. Gerő, who had been one of his closest associates. The period from July to the outbreak of the national revolution on Oct. 23, 1956, was marked by growing ferment in intellectual circles and increased discord within the Party. The immediate signal for the revolt was a series of students' demonstrations, first in Szeged on Oct. 22 and in Budapest a day later. The chief demands put forward by students and other demonstrators were for the return of Mr. Nagy as Prime Minister, for the withdrawal of Soviet troops from the country and for free elections. Fighting broke out on the night of Oct. 23 between demonstrators, who had been joined by large numbers of factory workers, and the State Security Police (A.V.H.). Soviet forces intervened in strength early the next morning. By Oct. 30 Soviet troops had withdrawn from Budapest and on Nov. 3 Mr. Nagy formed an all-party coalition government. This government was overthrown and the revolution suppressed as the result of a renewed attack by Soviet forces on Budapest in the early hours of Nov. 4. Simultaneously the formation of a new Hungarian Revolutionary Worker Peasant Government under the leadership of Mr. Kádár, Mr. Gerő's successor as First Secretary of the Party, was announced. The trial and execution of Imre Nagy and three of his associates was announced on June 17, 1958. Dr. Ferenc Münnich succeeded as President of the Council on Jan. 27, 1958, and held office until Sept. 13, 1961, being replaced by Mr. Kádár. Several other Ministers were replaced at the same time.

Production, Industry, etc.—Though industrialization has made considerable progress in the last decade, agriculture still occupies an important place in the Hungarian economy and 58 per cent. of the total area of the country is arable land. In March, 1961, 14 per cent. of this arable land was owned by

state farms and about 75 per cent. by co-operative farms. Production of the most important crops in 1960 was as follows (1,000 tons):—Wheat 1,767; rye 354; barley 986; oats 203; rice 45; maize 3,504; potatoes 2,656; sugar-beet 3,370; cattle-turnip 1,431; sunflower 68; lucerne 852; red clover 501.

Industry is mainly based on imported raw materials, but Hungary has her own coal (mostly brown), bauxite, some iron ore and oil. Output figures in 1960 (1,000 tons) were as follows:—coal 26,523; bauxite 1,189; iron ore 516; pig-iron 1,249; steel 1,885; crude oil 1,215; cement 1,571.

The output of raw materials and general industrial production were sharply reduced by the revolution of Oct., 1956, but all the ground then lost has since been made up and industrial production rose by 12 per cent. in 1959.

Religion and Education.—About two-thirds of the Magyars are Roman Catholics, and the remainder mostly Calvinist. There are five types of schools under the Ministry of Education—infant schools 3-6, general schools 6-14 (compulsory), vocational schools (15-18), secondary schools (15-18), universities and adult training schools (over 18). In the academic year 1959-60 there were 31,000 students at universities, 177,000 at secondary schools of all types and 1,314,000 at general schools.

Language and Literature.—Magyar, or Hungarian, is one of the Finno-Ugrian languages. Hungarian literature began to flourish in the second half of the sixteenth century. Among the greatest writers of the nineteenth and twentieth centuries are Mihály Vörösmarty (1800-1855), Sándor Petöfi (1823-1849), János Arany (1817-1882), Endre Ady (1877-1918), Attila József (1905-1937), Mihály Babits (1883-1941) and Dezső Kosztolányi (1885-1936).

Finance.—The budget estimates for the year 1961 were: Revenue, Forints 75,987,000,000; Expenditure, Forints 75,724,000,000. The Forint (of 100 Filler) has an official exchange value of 32.87 Forints = £1, but travellers to Hungary are accorded a bonus of 100 per cent. when exchanging sterling and certain other foreign currencies.

EMBASSY IN LONDON

1 Eaton Terrace, S.W.1

[Sloane: 5131-2]

Ambassador Extraordinary and Plenipotentiary, His Excellency Henrik Björnsson (1960).

Iceland is a large volcanic island in the North Atlantic Ocean, extending from 63° 23' to 66° 33' N. lat., and from 13° 22' to 24° 35' W. long., with an estimated area of 40,500 square miles, or greater than that of Ireland. The population was 177,073 on Dec. 1, 1960.

Iceland was uninhabited before the ninth century, when settlers came from Norway. For several centuries a form of republican government prevailed, with an annual assembly of leading men called the *Althing*, but in 1241 Iceland became subject to Norway, and later to Denmark. During the colonial period, Iceland maintained its cultural integrity but a deterioration in the climate, together with frequent volcanic eruptions and outbreaks of disease led to a serious fall in the standard of living and to a decline in the population to little more than 40,000. In the nineteenth century a struggle for independence began which led first to home-rule for Iceland under the Danish Crown (1918), and later to complete independence under a republican form of rule in 1944.

The Icelandic Cabinet normally consists of six Ministers, responsible to the *Althing*, a Parliamentary assembly of 60 members. The present government is a coalition of Conservatives and Social Democrats, with the Progressive and Communist parties forming the Opposition.

Iceland lives very largely by her catching and export of fish, and this is held to justify an extension of exclusive fishery limits round her coast to a greater extent than that hitherto sanctioned by international law. In 1952, the Icelandic limits were extended from three to four miles, and at the same time a new method of establishing base-lines across bays and estuaries was introduced. This led to a dispute with the U.K., and the British trawler industry succeeded in imposing a ban on the landing of fish by Icelandic trawlers in England. This dispute was settled in October, 1956, by which time a considerable proportion of the Icelandic fish trade had been diverted to Russia. Conferences on the law of the sea held at Geneva in 1958 and 1960 ended without reaching a decision and it was announced on April 28, 1960, that the British Government refused to recognize Iceland's unilateral claim for a 12-mile fishery limit.

After lengthy negotiation between the Icelandic and British Governments, the dispute was settled by an Exchange of Notes on March 11, 1961, by which the United Kingdom Government agreed that it would no longer object to a 12 mile fishery zone around Iceland and the Icelandic Government agreed that United Kingdom fishing vessels could fish within certain specified zones between 6-12 miles for a period of 3 years.

The principal products of the island are fish, fish oils, whales, mutton, wool and ponies. The principal exports are fish, fish meals and oils, whale oil and meat, and sheepskins; the imports consist of almost all the necessities of life, the chief items being grain and meal, sugar, coffee, salt, coal, oil and petrol, cotton goods, tobacco, spirits, hardware and timber.

At January 1, 1961, the mercantile marine consisted of 820 vessels of a gross tonnage of 131,301. Of these 60 were trawlers (36,458 tons), 7 passenger ships (7,796 tons), 21 were freight vessels (35,758 tons) and 4 oil tankers (13,878 tons). Excluding trawlers, the number of vessels engaged in fishing was 708 of a gross tonnage of 33,713. There is a regular shipping service between Reykjavik, Leith and Copenhagen, fortnightly in summer and every three weeks in winter. Frequent but irregular services run between Reykjavik and Hull, and the Continent.

A regular twice-weekly air service (daily in summer) is maintained between Renfrew and London and Reykjavik. There are also air services from the island to Scandinavia, U.S.A. and Germany. Road communications are adequate in summer but greatly restricted by snow in winter. Only roads in town centres are well surfaced. The State highways and side roads are non-metalled (gravel and lava dust). The climate and terrain make first-class surfaces for highways out of the question.

Language and Literature.—The ancient Norraena (or Northern tongue) presents close affinities to Anglo-Saxon and as spoken and written in Iceland to-day differs little from that introduced into the island in the ninth century. There is a rich literature with two distinct periods of development, from the middle of the eleventh to the end of the thirteenth century and from the beginning of the nineteenth century to the present time.

INDONESIAN EMBASSY IN LONDON

38 Grosvenor Square, W.1.

Ambassador Extraordinary and Plenipotentiary (vacant).
Minister Counsellor (Economic), Dr. Y. Ismail.
and Secretaries, Miss S. Pringgohardjoso (Consular Affairs); Mr. Soekarno (Press and Public Relations); Iman Surjakusuma (Press and Public Relations); Surjo Atmono (Economic).
3rd Secretary, Mr. Slamet.
3rd Secretary (Economic), Leon Iskandar Sumantri.
Attaché, Marjono Soenarmo.
Naval and Air Attaché, Cmdr. Sardjoeno.
Military Attaché, Col. Siswondo Parman.

Situated between latitudes 6° North and 11° South and between longitudes 95° and 141° East, Indonesia comprises the islands of *Jawa* and *Madura*, the island of *Sumatra*, the *Riouw-Lingga Archipelago* (which with *Karimon*, *Anambas*, *Natuna* Islands, *Tambelan*, and part of *Sumatra*, forms the "Residency of *Riouw*"), the islands of *Bangka* and *Billiton*, part of the island of *Borneo*, *Celebes* Island, the *Molucca Islands* (*Ternate*, *Halmahera*, *Buru*, *Ceram*, *Banda*, *Timor-Laut*, *Larat*, *Bachiam*, *Obi*, *Kei*, *Aru*, *Babar*, *Leti* and *Wetar*), part of *Timor Island*, and the islands of *Bali* and *Lombok*, with a total area of 735,000 miles, and a population estimated at 90,000,000.

From the early part of the 17th century much of the Indonesian Archipelago was under Netherlands rule. Following the World War, 1939-45, a strong nationalistic movement manifested itself and after sporadic fighting the formal transfer of sovereignty by the Netherlands took place on December 27, 1949. The provisional federal constitution then adopted was on August 15, 1950, changed to a unitary Republic of Indonesia in which the separate provinces were guaranteed broad regional autonomy and on February 13, 1956, the agreement of 1949 with the Netherlands was unilaterally abrogated. As a result of the failure of the parliamentary parties to provide political and economic stability, President Sukarno as Commander-in-Chief of the Armed Forces proclaimed martial law on March 14, 1957, and appointed a temporary cabinet under a non-party Prime Minister. At the end of the year the Government,

In response to popular feeling, took over control of most of the Dutch commercial concerns. The great majority of Dutch citizens left the country during the next few months. On February 15, 1958, regional discontent came to a head with the proclamation of a rival Indonesian Government in West Sumatra and North Celebes under Dr. Sjafruddin. The Central Government resorted to military action and organized resistance had ceased in Sumatra by May, 1958.

On July 5, 1959, the President issued a decree dissolving the Constituent Assembly and declared the re-application of the 1945 constitution. The elected House of Representatives was dissolved by the President on March 5, 1960, and a nominated House has been set up in its place. There are also a Supreme Advisory Council and a National Planning Council with advisory powers. Under the 1945 constitution, sovereignty is vested in the Provisional People's Consultative Assembly which was inaugurated in November, 1960. This nominated Assembly is responsible for ratifying national policy, but effective authority is vested in the President himself.

Finance.—The budgetary system in Indonesia has been in deficit for some years now. The note circulation increased from *rupiahs* 19.5 billion to Rp. 25.6 billion during 1959, and to Rp. 34.5 by the end of 1960. Gold and foreign currency cover for the currency declined during the early part of 1959 from around 8 to 5 per cent., but a revaluation of the *rupiah* in August, by means of a currency reform which also devalued the higher notes to one-tenth of their full value, readjusted the percentage of cover to over 30 per cent. An improvement in the foreign currency reserves raised this to 34.7 per cent. by the end of the year. By the end of 1960 the figure stood at 34.6 per cent., since when no further figures for gold and foreign currency cover or money in circulation have been released.

Another effect of the monetary measures in August, 1959, was to reduce the *rupiah* from Rp. 85=£1 to Rp. 126=£1. Further monetary measures introduced from August 27, 1960, allow the import of many previously banned commodities, at a special rate of exchange of *Rupiah* 560=£1. A special tourist rate of exchange of the U.S. \$ equivalent to *Rupiah* 250=£1 was introduced on May 1, 1961.

Production.—Nearly 70 per cent. of the population of Indonesia is engaged in agriculture and related production. Copra, kapok, nutmeg and cinnamon are produced mainly by smallholders; palm oil, sugar, fibres and cinchona are produced by large estate companies. Rubber, tea, coffee and tobacco are also produced in quantity. Rice is a traditional staple food for the people of Indonesia and the islands of Java and Madura are important producers.

Indonesia is rich in minerals; petroleum, tin, coal and bauxite are the principal products; gold, silver, manganese phosphates, nickel and sulphur were produced in quantity before the Second World War and there are considerable deposits, the exploitation of which the Government is now starting.

Trade with U.K.

	1959	1960
Imports from U.K.	£11,094,348	£19,366,768
Exports to U.K.	5,603,770	5,907,387

Principal exports to the United Kingdom are rubber, tea, petroleum and sugar. Imports from the United Kingdom are mainly of machinery, electrical equipment, aircraft, cars, cycles, and other

vehicles, chemical and pharmaceutical goods, woven and piece goods and sewing thread.

Transport.—In Java a main line connects Djakarta with Surabaya in the East of Java and there are several branches, including an island line from Semarang on the North coast to Djogjakarta in the South. In Sumatra the important towns of Medan, Padang and Palembang are the centres of short railway systems.

Sea communications in the archipelago were maintained for many years by a Dutch shipping line but in December, 1957, this ceased to operate. The resulting dislocation of shipping services among the islands is gradually being mitigated by the acquisition by the Government Shipping Board of ships for various national shipping companies. Transport by small craft on the rivers of the larger islands plays an important part in the export trade. Air services in Indonesia are operated by Garuda Indonesian Airways and the country is served by various international services, including those of B.O.A.C. There are approximately 46,500 miles of roads in Indonesia.

CAPITAL: Batavia (Java) was renamed Djakarta (estimated population, 3,000,000) and is the capital of the Republic of Indonesia. Other important centres are: (Java) Surabaya, Semarang, Bandung, Tjiribon, Surakarta and Djogjakarta; (Madura) Pamekasan (180,000); (Sumatra) Palembang (500,000), Medan (500,000) and Padang; (Celebes) Macassar (450,000) and Menado; (Borneo) Banjarmasin, Balikpapan and Pontianak; (Moluccas) Ternate (9,000), (Bali) Denpasar and Singaradja (120,000); (W. Timor) Kupang (10,000).

FLAG.—Equal bands of red over white.

NATIONAL ANTHEM: *Indonesia Raya*. August 17 is celebrated as INDEPENDENCE DAY in Indonesia.

BRITISH EMBASSY Djakarta

Ambassador Extraordinary and Minister Plenipotentiary, His Excellency Dermot Francis MacDermot, C.M.G., C.B.E. (1961) £4,125
Counsellor, R. C. Barnes.
Counsellor (Commercial), J. O. McCormick, M.C.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Djakarta, Surabaya and Medan.

IRAQ

Council of Sovereignty (exercising presidential powers), General Najib al-Rubai (*Chairman*); Mohammed Mahdi Kubba; Khalid Nakshabandi (*assumed office*, July, 1958).

CABINET

(February, 1959)

Prime Minister and Minister of Defence, Maj.-Gen. Abdul Karim Kassem.
Minister of Foreign Affairs, Hashim Jawad.
Interior and (Interim) Agrarian Reform, Brig. Ahmad Muhammad Yahya.
Justice, Rashid Mahmud.
Education and acting Minister of Guidance, Brig. Ismail Ibrahim Arif.

Health, Maj. Gen. Muhammad al-Shawwaf.
 Communications, Hassan al-Talabani.
 Planning, Dr. Talaat al-Shaibani.
 Municipalities, Baqir al Dujailli.
 Commerce, Nadhim al Zahawi.
 Public Works and Housing, Hassan Rifaat.
 Minister of State, Brig. Fuad Arif.
 Industry, Brig. Muhiddin Hamid.
 Finance, Dr. Mudhaffar Hussein Jamil.
 Agriculture, Colonel Adil Jalal.
 Oil, Muhammad Salman.

IRAQ EMBASSY IN LONDON

21-22 Queen's Gate, S.W.7

[Knightsbridge: 7141]

Ambassador in London (vacant).
 Chargé d'Affaires, Nathir Umari.
 1st Secretary, Taha Marouf.
 2nd Secretary, Wusama Al-Zahawie.
 Military Attaché, Brig. Abdul Kadir Faik.
 Asst. Military Attaché, First Lieut. Omar Shibly.
 Air Attaché, Lt.-Col. Kamal Azzawi.
 Commercial Attaché, Dr. Khalid Al-Shawi.
 Assistant Commercial Attaché, Abdul Kadier Moham-med.
 Cultural Attaché, Ismail Mohamad Ismail (acting).
 Press Attaché, Khalis Azmi.
 Financial Attaché, Tariq Abdul Karim Wajdi.
 Assistant Financial Attaché, Hamid Fahmi Al-Qadhi.
 Attachés, Mamdoh Abdul Hamid Mohammad;
 Widad Ali Ajjam; Abdul Karem Al-Tikreti.

Area, etc.—Lying between the Rivers Euphrates and Tigris, Iraq extends from Turkey on N. and N.E. to the Persian Gulf on the S. and S.E. and from Iran on E. to Syria and the Arabian Desert on W., the approximate position being between 37½° to 48½° E. long., and from 37½° to 30° N. lat.

The total area of Iraq is about 172,000 sq miles, the distance from Basrah in the south to Mosul in the north being approximately 500 miles.

Population (1957 census):—

	Males	Females	Totals
Baghdad.....	670,161	636,443	1,306,604
Hillah.....	177,543	176,071	353,614
Diyalah.....	166,506	163,307	329,813
Diwaniyah...	246,467	261,081	507,548
Ramadi.....	119,306	114,956	234,262
Karbala.....	105,347	111,668	217,015

Deserts.....	37,059	31,503	68,562
Iraqi communities abroad.....	30,750	11,714	42,464
Delayed registrations.....	124,632	96,434	221,066
	3,294,073	3,244,036	6,538,109

The *Liwa* is the present Iraqi unit of administration, the *Wilayat* being the former Ottoman unit.

Of the total population there were in 1947: Moslems 4,226,974 (five-thirteenths being Sunni and eight-thirteenths Shiite), Christians 141,664, Jews 116,836, and other religions, 38,862 (Mandaeans, Yazidis, Bahais, &c.). Almost the entire Jewish population has now emigrated to Israel.

The Euphrates (which has a total length of 1,700 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles); the other arm rises in the north-west of Erzerum in the Dumlü Dagh. The Tigris has a total length of 1,150 miles from its source to its junction with the Euphrates at Qurna, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the districts of Diarbekir, Van and Bitlis conjoin.

Government.—Under the Treaty of Lausanne (1923), Turkey renounced the sovereignty over Mesopotamia. A provisional Arab Government was set up in Nov., 1920, and in Aug., 1921, the Emir Faisal (3rd son of ex-King Hussein of the Hejaz) was elected King of Iraq.

In 1939 King Faisal II, grandson of Faisal I, acceded to the throne at the age of 3 on the death of his father, King Ghazi, and until 1953, when Faisal II ascended the throne, Iraq was ruled by Prince Abdullillah as Regent. Faisal II, together with Prince Abdullillah, other members of the Royal family and the then Prime Minister, Gen. Nuri es-Said, was assassinated in Baghdad in July, 1958, during a *coup d'état* resulting in the formation of a republican form of government. The monarchy was succeeded by a three-man Council of Sovereignty exercising presidential powers and a republican cabinet formed by Brigadier (now Major-General) Kassem.

Production and Industry.—Iraq is capable of supporting a considerably greater population if irrigation is developed and extended. Apart from the valuable revenues to be derived from oil the wealth of the country depends upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley, beans, rice, dates and Indian corn; wheat averages 464 lb. per acre, barley 612 lb., and rice over 370 lb. Cotton growing is successful in some years. Tobacco from the northern *liwas* is sufficient for the needs of the country. Production of crude oil in Iraq totalled 962,609 long tons in 1935, rising to 4,162,939 long tons in 1938. Revised production figures for the years 1953-1960 are:

	Long Tons	Long Tons
1953....	27,220,199	1957.... 21,361,979
1954....	29,615,569	1958.... 34,931,461
1955....	32,716,227	1959.... 40,897,676
1956....	30,606,282	1960.... 46,534,398

Few industries are yet established on any scale but an increasing industrialization is taking place under both private enterprise and Government action. Existing industries include cement, building materials, flour milling, cigarettes, soap, beer, steel furniture, tanning and textiles.

Communications and Trade.—The country is being rapidly opened up and communications improved and secured, particularly in the hitherto inaccessible northern districts. Not less than 50 per cent. of all oil royalties received (a minimum of £25,000,000 oil royalties per annum is guaranteed, but the Iraq Government is at present receiving about £80,000,000 per annum) is allocated for development projects. The first five-year development programme of public works has been completed and the second one is under way, including flood control, dams and irrigation, roads and bridges,

housing, schools and hospitals and the establishment of local industries. The port of Basrah is well equipped and able to handle expeditiously all sea-borne traffic. Continuous dredging of the Shatt-al-Arab has provided a navigable channel of 22½ feet at low water (as compared with 9 feet before dredging was begun) giving easy access to the Port at all times. A new channel across the Fao Bar has recently been dredged. The desert route between Baghdad and the Mediterranean carries an increasing amount of traffic, though most goods reaching Iraq are still sent *via* Basrah. Exceptional floods in the spring of 1954 caused serious damage in Central Iraq and interruptions to communications, but effective flood control works have since been completed and prevented severe flooding in 1957.

Airports for the use of international air traffic have been provided at Baghdad and Basrah (Maqil). The latter serves as a terminus for air traffic originating in the oil fields of the Persian Gulf, and as a staging post for airlines operating between Europe and the Far East. BOAC provides a twice-weekly service between London and Baghdad, which is also served by Iraqi Airways and airlines of Egypt, Iran, the Lebanon, the Netherlands, Scandinavia, Italy, West Germany, Switzerland and Pakistan. Iraqi Airways operates a daily service to Basra and services from Baghdad to Mosul, Kirkuk, the Persian Gulf, Amman, Beirut, Cairo, Damascus, Tehran, Athens, Istanbul, Rome, Zürich, Prague, Vienna, Frankfurt, London, Karachi and Bombay.

Iraqi Republican Railways provide a regular passenger and goods service between Baghdad and Basrah by the metre gauge line completed in 1920, which also extends northwards to Khanaqin, Kirkuk and Erbil. The railway line from Baghdad to Mosul, linking up through Syria and Turkey with the Mediterranean and the Bosphorus, is standard gauge. The Basra-Baghdad line is being replaced by a standard gauge line. The route for a line between Kirkuk and Sulaimaniya is being surveyed.

Language, Literature and Archaeology.—The language is mainly Arabic (*see* Arabia) and English is widely used in commerce, science and the arts.

There is evidence that an advanced civilization had been reached in the alluvial valley of the Euphrates while Europe was in a state of barbarism. Astronomy, geometry, engineering and land surveying were cultivated by the Sumerians of Mesopotamia, and various arts reached a point of perfection by 3000 B.C., as investigations at Ur of the Chaldees have shown. Sumerian culture spread from Mesopotamia to Crete and Egypt and to Greece. In 1944 excavations at Tell Hassuna, near Shura (on the Tigris in North Iraq) unearthed abundant traces of culture dating back to 5000 B.C.

Excavations in 1948 at Tel Abu Shahrain, 14 miles south of "Ur of the Chaldees," confirm Eridu's claim to be the most ancient city of the Sumerian world.

Hillah, the ancient city on the left bank of the Shatt el Hillah, a branch of the Euphrates, about 70 miles south of Baghdad, is near the site of Babylon and of the "house of the lofty-head" or "gate of the god" (Tower of Babel).

Mosul *Liwa* covers a great part of the ancient kingdom of Assyria, the ruins of Nineveh, the Assyrian capita, being visible on the banks of the Tigris, opposite Mosul. A British archaeological expedition has been excavating at Nimrud in the same area since 1950.

Qurna, at the junction of the Tigris and Euphrates, is the traditional site of the Garden of

Eden. The "Tree of Knowledge," which had stood there "from time immemorial," withered and died in December, 1946. It has been replaced by a shoot said to be from the original tree.

FINANCE

	1958-59*	1959-60*
Total revenue....	ID73,613,600	ID95,343,500
Total expenditure....	77,358,453	104,010,880

*Estimated.

The Iraqi Dinar of 1,000 Fils = £1 sterling.

TRADE

(Excluding oil)

	1957	1958
Total imports....	ID121,784,897	ID10,109,795,843
Total exports.....	12,879,622	14,247,690
Re-exports.....	2,358,502	8,957,337

Trade with U.K.

	1959	1960
Imports from U.K.....	£31,810,092	£28,887,275
Exports to U.K.....	53,070,199	54,113,163

The principal imports are iron and steel, mechanical and electrical machinery, motor cars, cotton and rayon piecegoods, sugar and tea; and the chief exports are crude petroleum, cereals, dates, raw wool, hides, live animals and raw cotton.

CAPITAL.—The chief city is Baghdad, the former capital of the Abbassid dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nights." Baghdad has a population of 552,047; of the other towns Mosul has a population of 340,541 and Basrah, 206,302.

FLAG.—Equal vertical stripes of black, white and green; 8-pointed star bearing yellow orb in centre of white stripe.

BRITISH EMBASSY

(Saleh Al Din Street, Karkh, Baghdad)

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Humphrey Trevelyan, K.C.M.G., C.I.E., O.B.E. (1958) £5,015

Health, Israel Barzilai (*Mapam*).
Social Welfare, Josef Burg (*N.R.P.*).
Religious Affairs, Rabbi Yaacob Moshe Toledano (*non-party*).

NOTE:—*Mapai* = Labour Party.

N.R.P. = National Religious Party.

EMBASSY IN LONDON
 2 Palace Green, Kensington, W.8

Ambassador in London, His Excellency Arthur Lourie (1960).

Consular Section, 2A Palace Green, W.8.

Area and Population.—Israel lies on the western edge of the continent of Asia at the eastern extremity of the Mediterranean Sea, between lat. 29° 30'–33° 15' N. and long. 34° 15'–35° 40' E. Its political neighbours are Lebanon on the North, Syria on the North and East, Jordan on the East and the Egyptian province of Sinai on the South.

The area is estimated at 7,992 square miles out of the 10,429 square miles comprised in the whole of Palestine (the remainder being occupied by Jordan and Egypt). The population was estimated (Dec., 1960) at 2,150,412 of whom 1,911,277 were Jews, the remainder mostly Arabs. These figures result from the gradual process of Jewish immigration during the 30 years preceding Israel's independence (in 1912 there were only 83,790 Jews in Palestine out of a total population of 752,048). During the upheavals of 1948–49 some 600,000 Arabs left the country as refugees and settled in neighbouring countries.

Hebrew is the official language of Israel. Arabic is also used extensively in Government publications and on coins and stamps. Arabs are entitled to transact all official business with Government Departments in Arabic, and provision is made in the *Knesset* for the simultaneous translation of all speeches into Arabic.

Physical Features.—Israel comprises four main regions: (a) the hill country of Galilee and Judaea and Samaria, rising in places to heights of nearly 4,000 feet; (b) the coastal plain from the Gaza strip to North of Acre, including the plain of Esdraelon running from Haifa Bay to the south-east, and cutting in two the hill region; (c) the Negev, a semi-desert triangular-shaped region, extending from a base south of Beersheeba, to an apex at the head of the Gulf of 'Aqaba; and (d) parts of the Jordan valley, including the Hula Region, Tiberias and the south-western extremity of the Dead Sea. The principal river is the Jordan, which rises from three main sources in Israel, the Lebanon and Syria, and flows through the Hula valley and the canals which have replaced Lake Hula, drained in 1958. Between Hulata and Tiberias (Sea of Galilee) the river falls 926 ft. in 11 miles and becomes a turbulent stream. Lake Tiberias is 696 ft. below sea-level and liable to sudden storms. Between it and the Dead Sea the Jordan falls 591 ft. The other principal rivers are the Yarkon and Qishon. The largest lake is the Dead Sea (shared between Israel

and Jordan); area 393 sq. miles, 1,286 feet below sea-level, 51.5 miles long, with a maximum width of 11 miles and a maximum depth of 1,309 ft.; it receives the waters of the Jordan and of six other streams, and has no outlet, the surplus being carried off by evaporation. The water, therefore, contains an extraordinarily high concentration of mineral substances. The highest mountain peak is Mount Meron, 3,962 feet above sea-level, near Safad, Upper Galilee.

Climate.—The climate is variable, similar to that of Lower Egypt, but modified by altitude and distance from the sea. The summer is hot but is tempered in most parts by daily winds from the Mediterranean. The winter is the rainy season lasting from November to April, the period of maximum rainfall being January and February.

Antiquities.—The following are among the principal historic sites in Israel: Jerusalem: the Church of the Dormition and the Cenaculum on Mount Zion (the principal Christian and Moslem Holy Places of the Jerusalem area are in Jordan territory); Ein Kerem: Church of the Visitation, Church of St. John the Baptist. Galilee: The Sea; Church and Mount of the Beatitudes, ruins of Capernaum and other sites connected with the life of Christ. Mount Tabor: Church of the Transfiguration. Nazareth: Church of the Annunciation and other Christian shrines associated with the childhood of Christ. There are also numerous sites dating from biblical and mediæval days, such as Ascalon, Cæsarea, Athlit Megiddo and Hazor.

History.—The early history of Palestine, from the time when Moses led the children of Israel from Egyptian bondage towards the *Promised Land* to the time of the *Diaspora* (Dispersion) in the second century of the Christian Era, can be found in the Books of the Old Testament and in the Works of Josephus. Before the dispersion it had become the cradle of Christianity and the *Holy Land* of the Christian World, but after the break up of the Roman Empire, into which it had been brought by Pompey in 65 B.C., it was conquered by Moslem Arabs (A.D. 634), remaining under the Crescent as part of the Ottoman Empire (except for a break from 1098 to 1187 under the Crusaders) until Allenby's victory over the Germano-Turkish forces in the plain of Armageddon (Megiddo) on September 19, 1918.

On November 2, 1917, a statement, afterwards known as *The Balfour Declaration*, was made by the British government that Britain viewed with favour the establishment in Palestine of a home for the Jewish people. This principle was incorporated in the mandate to Britain, which came officially into force on Sept. 29, 1923. From 1917 until 1948 Great Britain administered Palestine and laid the foundations of modern self-government.

The British mandate ended at midnight on May 14, 1948, when the Jewish National Council proclaimed a Jewish State of Israel, with David Ben Gurion as Prime Minister. On the following day Palestine was invaded by Syrian and Lebanese troops in the north, by the Transjordan Arab Legion and the Iraqis in the east and by the Egyptians in the south. On June 30 the last British troops left Haifa, which was taken over by Israel.

Hostilities ceased in January, 1949. The four armistice agreements signed under United Nations auspices in 1949 left Israel in occupation of various areas originally allotted to the Arab State. The situation as at present governed by the terms of the armistices has not yet been stabilized by peace treaties between Israel and any of its neighbours. The Arab parts of Palestine occupied by Jordan were

formally incorporated with the latter in April, 1950. Egyptian forces occupy the "Gaza strip," a small coastal area with an Arab population.

Government.—There is a Cabinet and a single-chamber Parliament (*Knesset Israel*) of 120 members. A coalition between the three non-Communist socialist parties (*Mapai*, *Achdut Ha'avoda* and *Mapam*), the National Religious Party and the liberal Progressive party held office from November, 1959, until August, 1961, latterly as a caretaker government, following the resignation of Mr. Ben-Gurion on Jan. 31, 1961, as a result of a prolonged controversy over the circumstances in which Mr. Pinhas Lavon, Minister of Defence, had resigned in 1955. Mr. Ben-Gurion was unable to form a new government and the *Knesset* dissolved pending a General Election. Eleven political parties returned members to the *Knesset* on August 15, 1961, including *Mapai* (42), *Liberals* (17), *Herut* (17), *National Religious Front* (12) and *Mapam* (9).

Immigration.—The Declaration of Independence of May 14, 1948, laid down that "the State of Israel will be open to the immigration of Jews from all countries of their dispersion." The Law of Return, passed by the *Knesset* on July 5, 1950, provides that an immigrant visa shall be granted to every Jew who expresses his desire to settle in Israel. Since the establishment of the State 971,469 immigrants had entered Israel from over 100 different countries by the end of 1960.

Education.—Elementary education for all children from 5 to 14 years is compulsory. In the 1959-60 school year the number of pupils in elementary and secondary schools was approximately 580,250, of whom about 46,300 were Arab pupils attending Arab schools. There are some 444 schools of other types with about 32,700 pupils. The Hebrew University (Jerusalem, Rehovoth and Tel Aviv) has 6,800 graduate and undergraduate students. The Israel Institute of Technology (*Technion*) at Haifa provides courses in engineering, architecture, aeronautics and other technical subjects for 3,300 students. Tel Aviv University provides courses in sciences and the humanities for 616 students. The Weizmann Institute of Sciences at Rehovoth is engaged in pure and applied research.

Finance.—Government expenditure for the fiscal year 1959-60 totalled I£1,394,900,072, while revenue during the same period was I£1,361,222,995.

The unit of account is the Israel pound of 100 *agorot*. The effective rate of exchange is I£5.067 = £1 sterling.

COMMUNICATIONS

Railways and Roads.—Israel State Railways started operating in August, 1949. Towns now served are Haifa, Tel Aviv, Jerusalem, Lydda, Naharia, Beersheba, and intermediate stations. In October, 1960, the total railway network amounted to 640 kms. There were approximately 3,052 km. of paved roads. In December, 1959, there were approximately 70,000 licensed vehicles.

Shipping.—Israel's merchant marine on December 31, 1960, included 50 vessels with a total displacement of 381,303 tons. In 1960, 1,761 ships with a net tonnage of 3,380,544 entered Israel ports. Cargo unloaded during the year amounted to 2,035,790 tons and cargo loaded to 1,179,474 tons.

The chief ports are Ψ Haifa, a modern harbour, with a depth of 30 ft. alongside the main quay; the new port of the Red Sea at Ψ Eilat, with an annual cargo-handling capacity of 150,000 tons, Ψ Jaffa

and Ψ Tel Aviv, where there are harbours for small craft, and large vessels anchor at open roadstead. Ψ Acre has an anchorage for small vessels.

Civil Aviation.—The B.E.A./Olympic Airways/Cyprus Airways consortium operates 11 *Comet* services per week between Lydda and London, four of them *via* Nicosia. B.O.A.C. operates two *Rolls Royce 707* services per week on the same route. Israel National Airlines (*El Al*) operate four *Britannia* and 3 *Boeing 707* services per week between Lydda and London and other services to Athens, Zürich, Istanbul, Paris, Rome, Vienna, Munich, Brussels, Nicosia, Tehran, Johannesburg, New York, and Amsterdam. During 1960, 2,926 aircraft arrived at Lydda carrying 111,606 passengers and 1,485,956 kilograms of freight; 113,818 passengers and 1,485,956 kilograms of freight left through the same airport.

PRODUCTION AND INDUSTRY

Agriculture.—The country is generally fertile and climatic conditions vary so widely that a large variety of crops can be grown, ranging from temperate crops, such as wheat and cherries, to sub-tropical crops such as sorghum, millet and mangoes. The famous "Jaffa" orange is produced in large quantities in the coastal plain for export; other kinds of citrus fruits are also grown and exported. The citrus yield during the 1960-61 season was approximately 470,000 tons. Of this total, 318,000 tons were exported, of which about 125,000 tons went to the U.K. Olives are cultivated, mainly for the production of oil used for edible purposes and for the manufacture of soap. The main winter crops are wheat and barley and various kinds of pulses, while in summer sorghum, millet, maize, sesame and summer pulses are grown. Large areas of seasonal vegetables are planted; potatoes can be grown in the autumn and in the winter. Since the establishment of the State of Israel, beef, cattle and poultry farming have been developed and the production of mixed vegetables and dairy produce has greatly increased. Tobacco and medium staple cotton are now grown. Fishing has also been extended, and production (mostly from fish ponds) reached 13,850 tons in 1960. All kinds of summer fruits such as figs, grapes, plums and apples are produced in increasing quantities for local consumption. Water supply for irrigation is the principal limiting factor to greater production, but the number of new deep wells is being extended and a plan to bring water to the Negev from the Yarkon river is nearly completed. A large part of the dairy industry is dependent on the production of fodder crops under irrigation; areas under fodder crops have doubled. The Israel land measure is the *dunam*, equivalent to 1,000 square metres (approximately a quarter of an acre).

Industry.—Among the more important industries are citrus and by-products, manufactured food products, pharmaceuticals, textiles and wearing apparel, artificial teeth, polished diamonds, plywood, cement, plastics, light engineering and the assembly of motor cars and trucks.

TRADE

	1959	1960
Imports.....	I£771,407,000	I£893,173,000
Exports.....	326,179,000	395,372,000

Trade with U.K.

	1959	1960
Imports from U.K.....	£15,196,157	£15,208,725
Exports to U.K.....	15,241,807	14,905,154

The principal imports are foodstuffs, crude oil, machinery and vehicles, iron, steel and manufactures thereof, and chemicals. The principal

exports are citrus fruits and by-products, polished diamonds, plywood, cement, artificial teeth, finished and semi-finished textiles and pharmaceutical drugs.

CAPITAL. Jerusalem, population (Dec. 31, 1960), 164,000. Other principal towns are Ψ Tel Aviv-Jaffa (390,000); Ψ Haifa and district (180,000); Ramat Gan (87,000).

FLAG.—White, with two horizontal blue stripes, the Shield of David in the centre.

JERUSALEM

Jerusalem and District is at present divided between Israel and Jordan under the terms of the armistice arranged at the end of hostilities. The Old City, which contains 34 of the 36 recognized Holy Places, is under the control of Jordan; the New City, with 2 Holy Places, is under Jewish administration. A resolution proclaiming Jerusalem as the capital of Israel was adopted by the Israel parliament on Jan. 23, 1950.

BRITISH EMBASSY

Chancery: 192 Hayarkon Street, Tel Aviv; Consular and Visa Sections: Farmers' Building (Beit Haikarim).

Ambassador Extraordinary and Plenipotentiary, His Excellency Patrick Francis Hancock, C.M.G. (1959) £4,115

BRITISH COUNCIL

Representative, J. D. K. Arkles, 13 Idelson Street, Tel Aviv.

ITALY

(Repubblica Italiana)

PRESIDENT OF THE ITALIAN REPUBLIC, Giovanni Gronchi, G.C.B., born at Pontedera in 1887. Elected April 29, 1955.

COUNCIL OF MINISTERS

(July 27, 1960)

President of the Council, Signor Amintore Fanfani.

Deputy President, Senator Attilio Piccioni.

Foreign Affairs, Prof. Antonio Segni.

Interior, Signor Mario Scelba.

Justice, Signor Guido Gonella.

Budget, Signor Giuseppe Pella.

Treasury, Prof. Paolo Emilio Taviani.

Finance, Signor Giuseppe Trabucchi.

Defence, Signor Giulio Andreotti.

Education, Senator Giacinto Bosco.

Public Works, Dr. Benigno Zaccagnini.

Agriculture and Forests, Prof. Mariano Rumor.

Transport, Signor Giuseppe Spataro.

Posts and Communications, Senator Lorenzo Spallino.

Industry and Commerce, Signor Emilio Colombo.

Labour and Social Insurance, Signor Fiorentino Sullo.

Foreign Trade, Signor Mario Mortinelli.

Merchant Marine, Senator Angelo Raffaele Jervolino.

State Participation, Signor Giorgio Bo.

Health, Signor Camillo Giardina.

Sports and Tourism, Signor Alberto Folchi.

Without Portfolio, Signor Giulio Pastore (Fund for the South); Signor Tiziano Tessitore (Administrative Reform); Prof. Codacci-Pisanelli (Relations with Parliament).

ITALIAN EMBASSY IN LONDON

14 Three Kings Yard, Davies Street, W.1
[Mayfair: 8200]

Italian Ambassador in London, His Excellency Signor Pietro Quaronei (1961).

Minister-Counsellor (vacant).

Counsellor, Count Roberto Riccardi.

1st Secretaries, Signor Emilio Savorgnan; Signor Umberto La Rocca.

2nd Secretaries, Signor Sergio Romano; Signor Guglielmo Guerrini-Maraldi.

3rd Secretary, Signor Umberto Toffano.

Labour Counsellor, Signor Angelo Macchia.

Commercial Counsellor, Signor Clemente Boniver.

Commercial Attachés, Signor Saverio Santaniello; Signor Giovanni Battistini.

Naval Attaché, Rear Adm. Emanuele Filiberto Perucca-Orfei.

Military Attaché, Lt.-Col. Giangiorgio Barbasetti di Prun.

Air Attaché, Col. Flavio Danieli.

Assistant Air Attaché, Maj. Francesco Carosio.

Financial Counsellor, Signor Antonino Zecchi.

Cultural Attaché, Prof. Gabriele Baldini.

Press Attaché, Signor Mario de Mandato.

Italian Consulate General, 38 Eaton Place, S.W.1. (Belgravia: 4831).

Consul General, Signor Stanislao Cantono di Ceva.

Area and Population.—Italy is a Republic in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba and about 70 islands (with certain dependencies noted below). Italy is bounded on the N. by Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavia, etc., and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area may be estimated at 304,000 sq. kilometres, about 131,000 sq. miles, with a population (estimated February, 1961) of 51,217,000.

Live births in 1960 numbered 910,833, deaths 480,849, and marriages 388,025.

Physiography.—The peninsula is for the most part mountainous, but between the Apennines, which form its spine, and the East coastline are two large fertile plains; of Emilia/Romagna in the north and of Apulia in the south. The Alps form the northern limit of Italy, dividing it from France, Switzerland and Austria and Yugoslavia. *Mont Blanc* (15,782 feet), the highest peak, is in the French Pennine Alps, but partly within the Italian borders are *Monte Rosa* (15,217 feet), *Matterhorn* (14,780 feet) and several peaks from 12,000 to 14,000 feet.

The chief rivers are the Po (220 miles), which flows through Piedmont, Lombardy and the Veneto and the Adige (Trentino and Veneto) in the north, the Arno (Florentine Plain) and the Tiber (flowing through Rome to Ostia). The *Rubicon*, a small stream flowing into the Adriatic near Rimini (and now usually identified with the Fiumicino) formed the boundary between Italy and Cisalpine Gaul: "crossing the Rubicon" (as Caesar did in 49 B.C., thus "invading" Italy in arms) is a step definitely indicating an aggressive course of action.

Government.—Italian unity was accomplished under the House of Savoy, after an heroic struggle from 1848 to 1870, in which the great patriots *Mazzini* (born 1805; died 1872), *Garibaldi* (born 1807; died 1882) and *Cavour* (born 1810; died 1861) were the principal figures. It was completed when Lombardy was ceded by Austria in 1859 and Venice in 1866, and through the evacuation of Rome by the French in 1870. In 1871 the King of Italy entered Rome, and that city was declared to be the capital.

Benito Mussolini, known as *Il Duce* (The Leader), was born July 29, 1883, and was continuously in office as Prime Minister from June 30, 1925, until July 25, 1943, when the Fascist régime was abolished. He was captured by Italian partisans while attempting to escape across the Swiss frontier and was put to death on April 28, 1945.

In fulfilment of a promise given in April, 1944, that he would retire when the Allies entered Rome a decree was signed on June 5, 1944, by the late King Victor Emmanuel III under which Prince Umberto, the King's son, became "Lieutenant-General of the Realm." The King remained head of the House of Savoy and retained the title of King of Italy until his abdication on May 9, 1946, when he was succeeded by the Crown Prince.

A general election was held on June 2, 1946, together with a referendum on the question of Republic or Monarchy. The Referendum resulted in 12,717,923 votes for a Republic and 10,719,284 for a Monarchy. The Royal Family left the country on June 13, and on June 28, 1946, a Provisional President was elected.

Since the General Election of 1948, governments have been formed by Signor de Gasperi (1948-53, coalition); Signor Pella (1953-54, *Christian Democrat*); Signor Scelba (1954-55, coalition); Signor Segni (July, 1955-May, 1957, coalition); Signor Zoli (June, 1957-May, 1958, *Christian Democrat*); Signor Fanfani (May, 1958-Feb., 1959, coalition); S. Segni (Feb., 1959-Feb., 1960, *Christian Democrat*, with *Liberal* support). Signor Segni resigned on Feb. 24, 1960, when the Liberal Party withdrew its support and, after a long crisis in which two unsuccessful attempts were made to form Centre-Left governments, Signor Tambroni formed another single-party *Christian Democrat* government on March 25, 1960, enjoying the Parliamentary support of the Neo-Fascist Party. This was, however, short-lived, being succeeded in July, 1960, by a new ministry headed by Signor Fanfani which was assured of a majority in both Houses by agreement reached with the Social Democrats, Republicans and Liberals. All members of Signor Fanfani's cabinet are of the *Christian Democrat* Party. Administrative elections held in November, 1960, and early in 1961, confirmed that the Government and the 3 Centre parties giving it external support commanded overall majority support in the country.

The New Constitution.—On Dec. 22, 1947, the Constituent Assembly approved the new Constitution laying the foundation of the Italian Republic, Article I of which states "Italy is a Democratic Republic founded on work. Sovereignty belongs to the people who exercise it in the forms and within the limits of the Constitution."

Production.—Agriculture, of which the principal products are cereals, vegetables, fruit, olives and wine, is Italy's basic industry. Wheat production has greatly increased since the war; the yield in 1959 showed an increase of approximately 1,000,000 tons over the average annual yield in the period 1936-39. Other important industrial crops are sugar beet, tobacco and hemp, whereas livestock breeding supplies important dairy and meat industries. Fishing is carried on extensively, mainly for domestic consumption, though some tunny is exported. Italy is generally poor in mineral resources, but the discovery and rapid exploitation since the war of large quantities of natural methane gas has reduced considerably the requirements of imported coal and lowered industrial production costs.

The production of sulphur, principally in Calabria and Sicily, is important, and among other minerals produced are iron pyrites, mercury, lead, zinc, aluminium, potassic salts and iron ores. The production of oil from natural deposits is rising rapidly and there are 35 oil refineries in the country. Marble is a traditional product particularly of the Massa Carrara district. Salt and tobacco are Government monopolies.

The chief manufactures are woollens, cotton, silk, rayons, hemp, iron and steel and their products, shipbuilding, rolling-stock, motor vehicles, rubber products, leathers, chemicals, agricultural and industrial machinery of all types, paper, furniture, footwear, food preserves and plastics. Numerous artisan industries produce gloves, straw products and typical Italian artistic products such as pottery, glassware, mosaics, coral and imitation jewellery.

Tourist Traffic.—The record total of 18,000,000 tourists visited Italy during 1960, compared with 16,800,000 in 1959, 15,300,000 in 1958, 14,600,000 in 1957 and 12,700,000 in 1956. Of the 1960 total, the largest number were from Germany, 4,665,000. There were 1,500,000 visitors from the United Kingdom in 1960.

Defence.—The Army consists of about 230,000 men and includes two armoured divisions, five recently reorganized infantry divisions, five Alpine brigades and five brigade groups. The Navy consists of 3 cruisers, 6 destroyers, 46 escorts, 6 submarines, 93 minesweepers and also coastal craft and fleet auxiliaries. The Air Force consists of about 1,000 aircraft, of which about half are operational; approximate strength: officers, 5,444; men, 51,784.

Language and Literature.—Italian is a Romance language derived from Latin. It is spoken in its purest form at Siena (Tuscany), but there are numerous dialects, showing variously French, German, Spanish and Arabic influences. Sard, the dialect of Sardinia, is accorded by some authorities the status of a distinct Romance language. Italian literature (in addition to Latin literature, which is the common inheritance of the civilized world) is one of the richest in Europe, particularly in its golden age (Dante, 1265-1321; Petrarch, 1304-1374; and Boccaccio, 1313-1375) and in the renaissance during the fifteenth and sixteenth centuries (Ariosto, 1474-1533; Machiavelli, 1469-1527; Tasso, 1544-1595). Modern Italian literature has many noted names in prose and verse, notably Manzoni (1785-1873), Carducci (1835-1907) and Gabriele d'Annunzio (1864-1938). The Nobel Prize for Literature has been awarded to Italian authors on four occasions—G. Carducci (1906), Signora G. Deledda (1926), Luigi Pirandello (1934) and Salvatore Quasimodo (1959). In 1959, there were 94 daily newspapers published in Italy, of which 18 were published in Rome and 12 in Milan.

Education.—Primary education is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the 26 Universities are of very ancient foundation, Bologna, Genoa, Macerata, Naples, Padua and Perugia in thirteenth century; Siena, Rome, Pisa, Pavia and Ferrara in fourteenth century; Catania and Turin in fifteenth century; Parma, Messina and Urbino in sixteenth century.

Communications.—Serious damage was done to the Italian railway system by the war, but by the end of 1948 the work of restoring the tracks was almost completed. A large programme for rebuilding stations, replacing and increasing rolling stock, electrification and for repairing and building new roads has been carried out, special attention being given to a large-scale development programme for Southern Italy. The Italian Mercantile Marine has been increased to 5,064,681 tons (Jan. 1, 1960) compared with 3,500,000 tons before the war.

CURRENCY

In the first six months of 1961 the buying rate for the Italian *lira* averaged about 1,733 = £1.

PRODUCTION AND TRADE

General Economic Conditions.—The Italian economy in 1960 was in a flourishing condition. Industry has come to play as important a part in the economy of the country as agriculture. While most of the industrial activity is concentrated in the North, the Government's development programmes and private investment are steadily extending industry in Southern Italy. Industrial production in 1960 was about 17 per cent. higher than in 1959. Steel production was about 25 per cent. more than the 1959 figure of 6,762 metric tons. At the end of 1959 there was one car for every 24 inhabitants; in the first nine months of 1960 motor vehicle production totalled 490,248 units, an increase of 39 per cent. on the first nine months of 1959. The currency and cost of living remained stable. Unemployment fell slightly in 1960 and half way through the year stood at roughly 1.5 million out of a total population of over 51,000,000. Increasing prosperity and the rising standard of living led to a growing demand for consumer goods. Heavy foreign investment helped to balance the higher import bill and during 1960 Italy's foreign exchange reserves rose to U.S. \$3,065,000,000 (at October 31, 1960).

Natural Resources and Industry.—Nearly half Italy's population works on the land. The agricultural staples are citrus fruit, fruit and vegetables, olive oil, wine and cheese. Although Italy is not rich in minerals and imports most of her coal, the development of natural gas deposits in the Po Valley, coupled with hydro-electric power, made possible the industrialization of the North. Recently more gas deposits, and some oil, have been discovered in the South. Electricity production in 1960 was about 15 per cent. above the 1959 level and by the end of the year the capacity of hydro-electric and thermo-electric power stations in Italy was about 63,000 k.w.h. Two nuclear power plants were under construction, the first of which was expected to come into operation early in 1962. The centres of heavy industry are Milan, Turin and Genoa. The main industries are general engineering, the motor vehicle industry, ship-building (the Italian merchant marine tonnage is over 5,000,000), electrical, petro-chemical, rubber, oil refining, textile, clothing, leather, food preserving and processing, and the tourist industry.

Foreign Trade.—Germany, the United States, the Middle East oil states and the United Kingdom are the main sources of Italy's imports. The principal markets for her exports are Germany, the U.S.A., Switzerland and the United Kingdom. In recent years the balance of visible trade has been against Italy, but this deficit has been offset by her invisible earnings, particularly from tourism, and by a high level of foreign investment.

	1958 £'000,000	1959 £'000,000	1960 £'000,000 (Jan-Aug)
Total Imports..	1,155.1	1,200.0	1,116.7
Total Exports..	925.7	1,040.0	863.9

Trade with U.K.

	1959 £72,464,545	1960 £87,634,532
Imports from U.K.....	92,781,659	98,954,509

The following table gives the percentage by value of Italy's total trade in 1959 with EEC, EFTA and United Kingdom:—

	Italian Imports	Italian Exports
EEC.....	26.8	27.8
EFTA (including U.K.)....	18.2	22.2
U.K.....	5.6	7.5

CAPITAL, Rome, founded according to legend by Romulus in the year now known as 753 B.C., is situated on the Tiber, 15 miles from its mouth. It was the focal point of Latin civilization and dominion under the Republic and afterwards under the Roman Empire, and became the capital of Italy when the kingdom was established in 1872. Population (estimated, Feb. 1961), 2,056,368.

Estimated population of the principal cities and towns on March 31, 1960 was: Milan 1,513,464, ♀ Naples 1,172,915, Turin 1,002,635, ♀ Genoa 770,214, Florence 438,663, Bologna 444,963, ♀ Venice 348,810, ♀ Trieste 282,934, ♀ Bari 319,912, Verona 217,365, ♀ Leghorn 161,752, ♀ Taranto 194,905, Brescia 169,795, Ferrara 151,719, ♀ Reggio Calabria 154,176, ♀ La Spezia 122,458, ♀ Ancona 100,204, ♀ Ravenna 112,787, ♀ Salerno 115,667, ♀ Savona 71,755, ♀ Brindisi 70,564; in Sicily, ♀ Palermo 603,137, ♀ Catania 373,218, ♀ Messina 253,458, ♀ Syracuse 86,398, ♀ Trapani 78,771; and in Sardinia, ♀ Cagliari 178,770.

TRIESTE.—From June 12, 1945, the area of Trieste was administered by Allied Military Government; Zone A, including Duino and the city and harbour of Trieste, by Anglo-U.S. forces and Zone B, including the towns of Capodistria, Pirano and Cittanuova by Yugoslavia. Provision for setting up a Free Territory of Trieste, included in the Italian Peace Treaty signed in Paris on Feb. 10, 1947, proved to be unworkable and military occupation of the two Zones continued until 1954, when an agreement was concluded in London on Oct. 5 between Italy, Yugoslavia, the United Kingdom and the United States, partitioning this territory between Italy and Yugoslavia along the line of demarcation of the two Zones, with a minor frontier rectification in favour of Yugoslavia. Zone A, an area of about 90 square miles with a population of 296,229, was formally handed over to Italian administration on October 26, 1954.

ISLANDS.—*Pantelleria Island* (part of Trapani Province) in the Sicilian Narrows, has an area of 31 sq. miles and a population of 10,306. The *Pelagian Islands* (Lampedusa, Linosa and Lampione) are part of the Province of Agrigento and have an area of 8 sq. miles, pop. 4,458.

FLAG.—Vertical stripes of green, white and red.

BRITISH EMBASSY

There are *British Council Institutes* at Milan and Naples, and a *Centre* at Bologna. There is also a *British Institute* at Florence.

IVORY COAST

(Republic of the Ivory Coast)

President and Minister for Foreign Affairs, Félix Houphouët-Boigny, elected for five years on November 27, 1960.

President of National Assembly, Philippe Yacé.

President of Economic & Social Council, Jean Delafosse.

President of Supreme Court, Ernest Boka.

Minister of State, Auguste Denise.

IVORY COAST EMBASSY IN LONDON

4 Halkin Place, S.W.1

[Belgravia; 3562]

Ambassador Extraordinary and Plenipotentiary, His Excellency Amadou Bocoum.

Counsellors, M. Louis Guirandou N'Diaye; M. René Boissin.

1st Secretary, M. Victor Oga Agnon.

The Ivory Coast is situated on the Gulf of Guinea between 5° and 10° N and 3° and 8° W and is flanked on the West by Guinea and Liberia, on the North by Mali and the Voltaic Republic and on the East by Ghana. It has an area of about 189,029 square miles—tropical rain forest in the southern half and savannah in the northern—and a population estimated in 1959 at 3,200,000 divided into a large number of ethnic and tribal groups.

Although official French contact was made in the first half of the 19th century, the Ivory Coast became a Colony only in 1893 and was finally pacified in 1912. It decided on December 5, 1958 to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 7, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, defence, etc., were signed in Paris on April 24, 1961. The Ivory Coast was a founder member of the *Conseil de l'Entente*, established on May 29, 1959, as a loose union embracing also, without abrogation of sovereignty, Dahomey, Niger and Upper Volta. The official (and only common) language is French.

The Ivory Coast has a presidential system of government modelled on that of the United States and the French Fifth Republic. The single Chamber National Assembly of 70 members was elected on November 27, 1960, for five years. The defence of the Constitution, which was promulgated on Nov. 3, 1960, is vested in a Supreme Court.

Finance.—The currency of the Ivory Coast is the *Franc CFA* (50 francs CFA = 1 French N.F.). Revenue in 1960 totalled *Francs CFA* 26,346,000,000; expenditure *Francs CFA* 26,301,000,000.

Trade.—The principal exports are coffee, cocoa, bananas and timber, a small percentage of the latter being sent to the U.K. The country has a small diamond industry and a few other unimportant deposits. Trade in 1960 was valued at: Imports, *Francs CFA* 29,611,000,000; Exports, *Francs CFA* 37,329,000,000.

CAPITAL, Abidjan (population 200,000) which is also the main port and handled 1,766,708 tons of goods (exports and imports) in 1960.

FLAG.—3 vertical stripes, orange, white and green.

BRITISH EMBASSY

Avenue Chardy, Abidjan.

Ambassador Extraordinary and Plenipotentiary, His Excellency Thomas Corney Ravensdale, C.M.G. (1960) £4,115 (also *Ambassador* to Dahomey, Niger and the Voltaic Republic).

Attachés, Masamichi Hanabusa (*Protocol*); Hiroyuki Yushita (*Press*); Tsuguo Umehara (*Accounts*).

Area and Population.—Japan consists of 4 large and many small islands situated in the North Pacific

Ocean between longitude $128^{\circ} 6'$ East and $145^{\circ} 49'$ East and between latitude $26^{\circ} 59'$ and $45^{\circ} 31'$ N., with a total area of 182,700 square miles and a population (Jan., 1960) of 93,160,000.

Japan Proper consists of *Honshū* (or Mainland), 230,532 sq. k. (89,011 sq. m.), *Shikoku*, 18,773 sq. k. (7,248 sq. m.), *Kyūshū*, 42,079 sq. k. (16,247 sq. m.), *Hokkaidō*, 77,096 sq. k. (29,764 sq. m.). Formosa and the Kwantung Province, which had been throughout the years of Japanese expansion and aggression leased or annexed, reverted to Chinese sovereignty after the War of 1939-45.

After the unconditional surrender to the Allied Nations (Aug. 15, 1945), Japan was occupied by Allied forces under General MacArthur (Sept. 15, 1945). A Japanese peace treaty conference opened at San Francisco on Sept. 4, 1951, and on Sept. 8, 48 nations signed the treaty, which became effective on April 28, 1952. Since that date Japan has restored relations with a number of nations, including the U.S.S.R., Poland and Czechoslovakia.

British participation in the occupation of Japan was virtually over by May, 1950. However, the outbreak of hostilities in Korea in June, 1950, resulted in the despatch to Korea of British Forces, from the United Kingdom, Australia, New Zealand and Canada to participate in the United Nations action. The main base of this force was established in Japan at Kure. On July 1, 1956, the base was moved to Inchon, Korea, and all Commonwealth troops had left Japan by the middle of 1957.

Under the terms of the Japan-U.S.A. Security Treaty of Sept. 8, 1951, United States forces remained to assist in the defence of Japan. However, as Japan's own Self Defence Forces have been built up, U.S. ground troops have been withdrawn. A revised version of the security treaty, which went into effect on June 23, 1960, was the subject of considerable controversy in the summer of that year.

Vital Statistics.—In October, 1960, Japan proper contained 93,418,000 inhabitants. The average annual increase between 1950 and 1960 was 1,021,800. The birth rate in 1960 was 17.2 per 1,000 and the death rate 7.6 per 1,000. The *Ainu*, remnant of the indigenous inhabitants, are dying out but are still found in small numbers.

Physiography.—The coastline exceeds 17,000 miles and is deeply indented, so that few places are far from the sea. The interior is very mountainous, and crossing the mainland from the Sea of Japan to the Pacific is a group of volcanoes, mainly extinct or dormant. Mount Fuji, the loftiest and most sacred mountain of Japan, about 60 miles from Tokyo, is 12,370 ft. high and has been dormant since 1707, but there are other volcanoes which are active, including Mount Aso in Kyūshū. There are frequent earthquakes, mainly along the Pacific coast near the Bay of Tokyo. Japan proper extends from sub-tropical to sub-arctic zones. Heavy snowfalls are frequent on the western slopes of Hokkaidō and Honshū, but the Pacific coasts are warmed by the Japan current. There is a plentiful rainfall and the rivers are short and swift-flowing, offering abundant opportunities for the supply of hydro-electric power.

Government.—According to Japanese tradition, Jimmu, the first Emperor of Japan, ascended the throne on Feb. 11, B.C. 660. Under the Constitution of Feb. 11, 1889, the monarchy was hereditary in the male heirs of the Imperial house. A new constitution approved by the Supreme Allied Commander was published on March 6,

1946, superseding the "*Meiji Constitution*" of 1889 and containing many radical changes based on the constitutional practices of the United Kingdom, U.S.A. and France. Among the most important innovations are the abandonment of the doctrine of Imperial Divinity, the renunciation of war, and the establishment of a Supreme Court.

The new constitution came into force on May 3, 1947. Legislative authority rests with *The Diet*, which is bicameral, consisting of a *House of Representatives* and a *House of Councillors*, both Houses being composed of elected members. Executive authority is vested in the Cabinet which is responsible to the Legislature.

The Japanese peace treaty came into force on April 28, 1952, after ratification by Argentina, Australia, Canada, Ceylon, Mexico, New Zealand, Pakistan, the U.K., the U.S.A. and Japan herself. Japan thereupon resumed her status as a sovereign and independent power.

A general election was held on November 20, 1960, in which the Liberal Democratic Party was once more returned to power. The strength of the parties in the House of Representatives on June 20, 1961, was: Liberal Democratic Party, 299; Socialist Party, 145; Democratic Socialist Party, 16; Communist Party, 3; Independents 2; (2 vacancies). In the House of Councillors it was: Liberal Democratic Party, 136; Socialist Party, 66; Democratic Socialist Party, 16; Independents, 13; Comrades Group, 11; Communist Party, 3; vacancies, 5.

Agriculture and Livestock.—Owing to the mountainous nature of the country not more than one-sixth of its area is available for cultivation. There were in 1957 over 25,000,000 hectares of forest, which include the *Cryptomeria japonica*, *Pinus massoniana*, *Zelkova keaki*, and *Pawlonia imperialis* in addition to camphor trees, mulberry, vegetable wax tree and a lacquer tree which furnishes the celebrated lacquer of Japan. The soil is only moderately fertile, but intensive cultivation secures good crops. In 1960 there were 4,868,000 hectares under cereals (rice 3,336,000 hectares). The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; rice is the staple food of the people, about 12,000,000 metric tons being produced annually. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit is abundant, including the orange, persimmon and loquat; European fruits, such as apples, strawberries, pears, grapes, figs, and peaches, are produced, and the American navel orange is extensively grown. Mulberry trees are now cultivated on only 170,700 hectares (1960), compared with 577,525 in 1935.

Minerals.—The country has mineral resources, including gold and silver, and copper, lead, zinc, iron chromite, white arsenic, coal, sulphur, petroleum, salt and uranium, but iron ore, coal and crude oil are among the principal post-war imports to supply deficiencies at home.

Industry.—Japan is the most highly industrialized nation in the Far East, with the whole range of modern light and heavy industries, including mining, metals, machinery, chemicals, textiles (cotton, silk, wool and synthetics), cement, pottery, glass, rubber, lumber, paper, oil refining and shipbuilding. The labour force of Japan in January, 1961, was 42,730,000, of which 10,080,000 were classed as proprietors, 22,580,000 as paid workers, 9,590,000 as family workers and the remainder unemployed. Of the total labour force, some 11,370,000 were engaged in agriculture, only 460,000 being paid employees.

Communications.—There were 27,890 kilometres of Government and private railroad (steam and electric) in March, 1960. The Japanese mercantile marine reached 6,000,000 gross tons in 1941, but more than three-quarters of it was sunk during the war. On January 1, 1961, the merchant fleet (ocean-going ships over 3,000 tons gross) consisted of 1,937 steel vessels totalling 6,399,868 tons gross. It is intended to expand to 13,350,000 tons by 1970, which will necessitate new construction of 9,700,000 tons, of which 74 per cent. will be industrial carriers.

In Japan the Maritime Safety Board has responsibility for merchant shipping and pilotage. Its strength in 1961 was about 10,900 with some 420 vessels and a few aircraft.

Armed Forces.—After the unconditional surrender of August, 1945, the land forces were disbanded and all aircraft confiscated by the occupying forces. Although the Constitution of Japan prohibits the maintenance of armed forces, an internal security force, known as the National Police Reserve, came into being at the end of 1950. In October, 1951, this Force was renamed the National Safety Force and together with a Coastal Safety Force was placed under a National Safety Agency. By January, 1953, the National Safety Force had reached its authorized strength of 110,000. In March, 1954, a Mutual Defence Agreement for the supply of equipment and materials was concluded with the United States. In June, the mission of the forces was extended to include the defence of Japan against direct and indirect aggression, the Agency was renamed the Defence Agency, the forces under it the Ground Self Defence Force and the Maritime Self Defence Force respectively, and a new arm, the Air Self Defence Force, was created. By 1956, the authorized uniformed strength of these forces was 160,000, 22,700 and 10,350 respectively and by 1961 these figures had increased to 170,000, 32,079 and 43,612. The Combined Defence Agency vote for 1961-62 is Yen 171,700,000,000, 9.1 per cent. of the total budget. At the end of 1960, the MSDF had 107 ships (excluding auxiliaries) totalling 99,761 tons of which 42 were destroyers and frigates and 2 new submarines while the Maritime Air Arm had 109 operational aircraft, including helicopters, all of which were shore-based. The ASDF had at the end of 1960, 290 piston and 270 jet training aircraft, 490 jet operational aircraft, many of which are used in a training rôle, 47 transport aircraft and a few helicopters, mostly of U.S. design. Its strength was 5,887 officers, 30,823 airmen and 4,898 civilians, total 41,608. The authorized strength of the Ground Self Defence Force in May, 1961 was 170,000. Broadly the Force is organized in six light divisions, four combined brigades and an airborne brigade. Re-organization is in progress and it is intended to form 12 "Pentonic" type divisions (about 9,000 strong) and one armoured division by 1963. Ground Force weapons are mainly of U.S. manufacture.

Religion.—All religions are tolerated. The principal religions of Japan are Mahayana Buddhism and Shinto. The Roman Catholic Church has 1 Cardinal, 1 archbishop and 9 bishops. The Nippon Seikokai (Holy Catholic Church of Japan) has 10 Japanese bishops and is an autonomous branch of the Anglican communion. There is also an United Protestant Church.

Education.—According to the laws passed in 1947, education on elementary level (6-year course) and lower secondary level (3-year course) is free, compulsory and co-educational. Upper secondary schools (3-year course) are mainly established and

maintained by prefectures, and are co-educational. They have several courses in general, agricultural, commercial, technical, mercantile marine, radio-communication and home-economics education, etc. There are 2- or 3-year junior colleges and 4-year universities. Some of the 4-year universities have graduate schools. In May, 1959, the total number of these junior colleges and universities was 525, of which 99 were established and maintained by the State, while 72 were established and maintained by prefectures and cities, and 354 were private institutions. The most prominent universities are the seven State Universities of Tokyo, Kyoto, Tohoku (Sendai), Hokkaidô (Sapporo), Kyushu (Fukuoka), Osaka and Nagoya, and the two private universities, Keio and Waseda.

Language and Literature.—Japanese is said to be one of the Uro-Altaic group of languages and remained a spoken tongue until the fifth-seventh centuries A.D., when the Chinese characters came into use. Japanese who have received school education (99.8 per cent. of the population) can read and write the Chinese characters in current use (about 1,800 characters) and also the syllabary characters called Kana. English is the best known foreign language. It is compulsory in almost all middle and high schools. In April, 1960, there were 771 libraries open to the public (5 National Diet libraries, 723 state and 43 private) with 20,448,533 volumes. In addition, there were 528 University libraries with 23,545,819 volumes in October, 1960. There were 95 daily newspapers in Japan of which 14 were published at Tokyo, 12 at Osaka and 12 in the Nagoya region. Japan's present total newspaper circulation is estimated at 36,373,000 copies and 2.45 per household.

FINANCE

The Budget for the financial year 1961-62, ending on March 31, is estimated to balance at Yen 1,952,776,000,000 for revenue and expenditure on the general account.

The official rate of exchange of yen 360=1 U.S.\$ was established on April 25, 1949, and (after Japan's accession to the International Monetary Fund) was confirmed by the Fund on May 11, 1953. The list of currencies in which banks are allowed to deal has recently been expanded considerably. Exchange rates of all currencies are allowed to fluctuate within IMF limits.

FOREIGN TRADE

	*Yen 1,000 = £1 (approx.).	

Trade with U.K.

	1959	1960
Imports from U.K.....	£32,188,035	£27,662,896
Exports to U.K.....	43,137,882	42,083,272

There was an adverse balance of U.S.\$124,123,496 for the fiscal year ending March 31, 1959.

Being deficient in natural resources, Japan has had to develop a complex foreign trade. Principal imports consist of raw materials (cotton, wool, mineral oils, rubber, iron ore, coking coal, salt, wood pulp, hides), foodstuffs (wheat, barley, soya beans, sugar), petroleum, chemicals and specialized machinery. Principal exports consist of cotton and rayon textiles, machinery, ships, metals and products, canned fish, chemicals and a wide variety of manufactured goods, including chinaware, toys, bicycles, sewing machines, cameras and transistor radios.

CAPITAL OF JAPAN, Tokyo. Its population in January, 1960, was estimated to be 9,683,802. The other chief cities had the following populations in October, 1960.

ψ Osaka.....	3,011,563

JORDAN

(The Hashemite Kingdom of The Jordan)

King of the Jordan, Hussein, G.C.V.O., born November 14, 1935, succeeded on the deposition of his father, King Talal, Aug. 11, 1952, assumed constitutional powers, May 2, 1953, on coming of age.

Prime Minister and Minister of Foreign Affairs, Bahjat Talhouni (Aug. 29, 1960).

JORDANIAN EMBASSY IN LONDON

7 Palace Green, W.8

[Western: 3685]

Ambassador, His Excellency Anastas Hanania.

1st Secretary and Consul, Dr. Ahmed Attiaye.

Military and Air Attaché, Col. Abdullah Bitar.

3rd Secretary and Cultural Attaché, Riad Sabri.

Area and Population.—The Hashemite Kingdom of the Jordan is made up of two areas: Western Jordan, which includes the districts of Hebron, Jerusalem and Nablus, and Eastern Jordan, which includes the districts of Ma'an, Kerak, Beqaa and Ajlun. The union of East and West Jordan was effected by a decision taken unanimously by both houses of the Legislature on April 24, 1950. The union was recognized a few days later by the British Government subject to certain reservations on the subject of Jerusalem. The Kingdom is bounded on the north by Syria, on the west by Israel, on the south by Saudi Arabia and on the east by Iraq. The majority of the population are Sunni Moslems and Islam is the religion of the state. The estimated population is 1,800,000 persons, of whom about 600,000 are displaced Palestinians.

Government.—The Executive consists of a Council of Ministers and the legislature of a Senate (25 persons nominated by the King) and a House

of Representatives, consisting of 50 elected members.

Production and Industry.—West Jordan is fertile, but severely eroded. East Jordan (the old Amirate of Transjordan), consists of a fertile mountainous area and the eastern half of the Jordan valley which are productive; the rest of the country is arid steppe. Jordan's only industrial product of note is raw phosphate, of which about 320,000 tons were exported in 1960, valued at nearly £1,500,000.

Communications.—The Hejaz Railway runs (with the exception of the first few miles) through Jordan territory from Deraa to Ma'an. During the Second World War, 24 miles of line were laid from Ma'an to Ras Naqb; there are good roads to all the chief towns in the country. A new road now connects Aqaba, the country's only port, with Amman.

KOREA

(Hankuk.)

Korea is situated between 124° 11' and 130° 57' E. long., and between 33° 7' and 43° 1' N. lat. It has an area of 85,256 sq. miles with an estimated population of about 28,000,000, of whom about 21,500,000 live south of the present dividing line. The southern and western coasts are fringed with innumerable islands, of which the largest, forming a province of its own, is Chejudo (Quelpart). The soil is fertile, but the arable land is limited by the mountainous nature of the country. The staple agricultural products are rice, barley, and other cereals, beans, cotton, tobacco and hemp. Fruit-growing and seri-culture are also practised. Gingseng, a medicinal root much affected by the Chinese, is largely grown at Kaesong (now in North Korean hands) but also in parts of South Korea. It forms a rich source of revenue. Gold, copper, coal, iron, graphite, tungsten and other minerals are distributed throughout the country, but are more abundant in the north. In pre-war days the south was mainly agricultural and most of the limited industries were in the north. Political necessity in recent years has led to some industrialization south of the demarcation line, but the

southern portion of the peninsula remains predominantly agricultural.

History.—The last native dynasty (Yi) ruled from 1392 until 1910, in which year Japan formally annexed Korea. The country remained an integral part of the Japanese Empire until the defeat of Japan in 1945, when it was occupied by troops of the U.S.A. and the U.S.S.R.; the 38th parallel being fixed as the boundary between the two zones of occupation. The U.S. Government endeavoured to reach agreement with the Soviet Government for the creation of a Korean Government for the whole country and the withdrawal of all Russian and American troops. These efforts met with no success, and in September, 1947, the U.S. Government laid the whole question of the future of Korea before the General Assembly of the United Nations. The Assembly in November, 1947, resolved that elections should be held in Korea for a National Assembly under the supervision of a temporary Commission formed for that purpose by the United Nations and that the National Assembly when elected should set up a Government. The Soviet Government refused to allow the Commission to visit the Russian Occupied Zone and in consequence it was only able to discharge its function in that part of Korea which lies to the south of the 38th parallel.

The Korean War.—The country remained effectively divided into two along the line of the 38th parallel, until the aggression of June 25, 1950, when the North Korean forces invaded South Korea. On the same day, at an emergency meeting of the United Nations Security Council, a resolution was adopted calling for immediate cessation of hostilities, and the withdrawal of the North Korean armed forces to the 38th parallel. The Communist forces ignored this demand and continued their advance. In response to a Security Council recommendation that United Nations members should furnish assistance to repel the attack, 16 nations, including the United States of America and the United Kingdom, came to the aid of the Republic of Korea. A unified command under the leadership of the United States was established on July 8. Shortly afterwards U.S. troops were landed in Korea but were at first unable to stem the Communists' onslaught. Finally the United Nations and South Korea forces were able to stabilize a front around the Pusan perimeter. On September 15, U.S. Marines made a successful surprise landing at Inchon which was quickly followed by a breakthrough from the Pusan perimeter and a general advance to the north. The Communist forces had been pushed back almost to the Manchurian frontier, when, at the beginning of November, hordes of Chinese "Volunteers" began to pour over the Yalu River and by sheer weight of numbers forced the U.N. troops to withdraw once again south of Seoul. However, the latter quickly regrouped and threw the Communist forces back to approximately the old dividing line.

The fighting was ended by an armistice agreement signed by the U.N. Commander-in-Chief and the commanders of the North Korean army and the Chinese People's "Volunteers" on July 27, 1953. By this agreement (which was not accepted by the government of the Republic of Korea) the line of division between North and South Korea remained in the neighbourhood of the 38th parallel. The Geneva Conference discussed Korea from April 26 to June 15, 1954, but failed to agree on measures for reunifying the country.

Republic of Korea

President, Yoon Bo Sun, elected for 4 years, Aug. 12, 1960.

Prime Minister, Maj.-Gen. Song Yo Chan (July 3, 1961).

KOREAN EMBASSY IN LONDON

36 Cadogan Square, S.W.1.

[Kensington: 8025]

Ambassador Extraordinary and Plenipotentiary, His Excellency Yong Shik Kim.
Councillors, Yoo Dong Han.

1st Secretary and Consul, Kwang Jung Song.
2nd Secretaries, Ha Jong Yoon; Soo Woo Ryee.
3rd Secretary, Ki Soo Kim.
Attaché, Johnsong Limb.
Naval, Military and Air Attaché, Col. Im Hwan Chung.

The Republic of Korea has been officially recognized by the Governments of the United States, France, Great Britain, and most other countries except the U.S.S.R. and its satellites. It has an area of 96,930 sq. km. (37,426 sq. miles) and a population (estimated Dec. 1, 1960) of 24,994,117.

A general election was held on May 10, 1948, and the first National Assembly met in Seoul on May 31. The Assembly passed a Constitution on July 12, and on July 20 elected Dr. Syngman Rhee as the first President of the Republic of Korea for four years. On August 15, 1948, the Republic was formally inaugurated and American Military Government came to an end. All U.S. troops were withdrawn by the end of June, 1949.

In the elections on March 15, 1960, Syngman Rhee and his nominee the late Lee Ki Poong were returned by overwhelming majorities as President and Vice-President respectively. Widespread resentment against the conduct of the elections culminated in demonstrations by University students in Seoul on April 18 and 19, renewed on April 25 and 26 after demonstrations by the professors, which finally led to the resignation of President Rhee on April 27 and the replacement of his Liberal Party Government. On May 16, 1961, a number of army officers led a revolution which overthrew the government of Dr. John M. Chang, while leaving the President in office. This movement, now re-named the Supreme Council for National Reconstruction, rules the country in place of the former House of Representatives and House of Councillors. The Supreme Council's programme calls for efficient, incorrupt government, austerity, social, moral and economic regeneration, strengthened anti-Communism and adherence to the U.N. Charter and Korea's international commitments. The first Chairman of the Supreme Council and Prime Minister, Lt.-Gen. Chang Do Yung, resigned on July 3, 1961, and Maj.-Gen. Song Yo Chan, the Defence Minister, was appointed Prime Minister, the chair of the Supreme Council being taken by Maj.-Gen. Pak Chung Hi.

The Republic of Korea has an army of about 550,000 men, a small navy mainly for coast protection duties, a small air force and a Marine Corps which includes one division trained in amphibious operations.

Finance.—The Budget for the year ending December 31, 1961, balances revenue and expenditure at Hwan 608,800,000,000. Expenditure on National Defence is estimated at Hwan 168,000,000,000.

The official rate of exchange consists of a basic rate, used only for budgetary purposes, of Hwan 1,250 = \$1 plus a variable certificate rate. From Feb.-July, 1961, the certificate rate was Hwan 50 = \$1 giving a total rate of Hw. 1,300 = \$1. (Hwan 3,630 = £1).

Trade.—The Republic of Korea's main exports are tungsten and iron ores, graphite, anthracite, fish and fish products, agar-agar, seaweed, raw silk and cotton sheeting. Her main customer is Japan. Imports greatly exceed exports. In 1960 visible exports totalled \$20,451,000; imports amounted to \$32,385,000 of which \$203,044,000 were financed by American aid.

Trade with U.K.

	1959	1960
Imports from U.K.....	£3,266,461	£2,718,410
Exports to U.K.....	321,263	624,536

CAPITAL.—Seoul, population (1960), 2,444,883. Other main centres are Ψ Pusan (pop. 1,163,614), Taegu (pop. 678,277) and Ψ Inchon (pop. 402,009). Pusan on the south-east coast, and Inchon on the west coast, only 28 miles from Seoul, are the main ports but the development of Inchon is hampered by a tide variation of 28–30 feet.

Democratic Peoples' Republic of Korea.—Meanwhile in the Russian-occupied zone north of the 38th parallel the Democratic People's Republic had been set up with its capital at Pyongyang; a Supreme Peoples' Soviet was elected in September 1948, and a Soviet-style Constitution adopted. Recognition had been given by the U.S.S.R. and its satellites. In January, 1949, the Soviet Government announced that all Russian troops had been withdrawn from Korea by the end of December, 1948.

KUWAIT

(The Shaikdom of Kuwait)

Ruler, Shaikh Sir Abdullah as-Salim As-Sabah, G.C.M.G., C.I.E., born 1895, acceded Feb. 25, 1950.

Kuwait is a fully independent Arab State whose relations with the United Kingdom are governed by an exchange of letters dated June 19, 1961, in which Her Majesty's Government confirmed its recognition of Kuwait's independent status. It extends along the shore of the Persian Gulf from Iraq to Saudi Arabia, with an area of about 5,800 square miles and a population, according to a census taken in 1961, of just over 321,000. The total European and American population was about 3,500 in 1961. The port of Ψ Kuwait, the capital (pop. 97,000; with suburbs 210,000), is traditionally an *entrepôt* for goods for the interior, and for the export of pearls (in diminishing quantities), skins and wool. However, with the development of the oil industry, the importance of the *entrepôt* trade has diminished. Imports for the year 1959 amounted to approximately £92,500,000, while exports, including re-exports, amounted to about £7,250,000, excluding oil. Kuwait was traditionally the dhow-building centre for the Persian Gulf, but the craft is declining. The centre of the Kuwait Oil Company's production is at Burgan, south of Kuwait town. An oil port has been constructed by the company at Mina-al-Ahmadi, about five miles from Ahmadi, the company's administrative and residential centre. Production of crude oil in 1960 totalled 80,573,627 tons. The Company is jointly owned by the British Petroleum Company and the American Gulf Oil Corporation. It employs about 7,000 men, including British,

Americans, Indians, Pakistanis, Kuwaitis and Arabs from neighbouring territories. Oil was also struck in the Kuwait-Saudi Arabian Neutral Zone to the South of the State early in 1953. Concessions for this area are held by the American Independent Oil Co. from Kuwait and the Getty Oil Company from Saudi Arabia. Total production of crude oil in the neutral zone in 1960 was approximately 49,770,362 barrels. The Arabian Oil Company, of Japan, having been awarded in 1958 the oil concession for the Neutral Zone offshore sea-bed by Kuwait and Saudi Arabia for their respective half shares, commenced exploratory drilling in the summer of 1959 and struck oil in commercial quantity early in 1960. The first shipment of crude oil was made in March, 1961. A concession covering the off-shore area of Kuwait proper was awarded to the Shell Company in November, 1960, and the concession agreement in the name of The Kuwait Shell Petroleum Development Co. was signed in Kuwait on January 15, 1961. The establishment of a Kuwaiti company, The Kuwait National Petroleum Co., was authorised by an Emirial Decree on October 5, 1960. This Company took over the distribution of petroleum products in Kuwait from the Kuwait Oil Co., on June 1, 1961.

As a result of the very considerable oil revenues, the Kuwait Government embarked on a large scale development scheme and plans for social services. Education and medical treatment are free. New hospitals and schools continue to be built. In 1960–61 there were 27,698 boys and 17,459 girls in 128 schools. Kuwait has a domestic water supply from a State-owned sea water plant which operates on waste natural gas from the oil fields. The plant can produce over 4,000,000 gallons of fresh water daily. For storage there are two 15,000,000 gallon reservoirs and one of 3,000,000 gallons. The power station will have by the end of 1961 a capacity of 130,000 kw. and early in 1962 a further 30,000 kw. will have been added. The town is now served by a network of dual carriageway roads and more are under construction.

Ships of British, Dutch and other lines make regular calls at Kuwait. B.O.A.C., Kuwait Airways and several Middle Eastern airlines operate regular air services, and other companies make non-scheduled flights to Kuwait under charter. Wireless communications, telephone and postal services are conducted by the Kuwait Government. Banking is carried out by the British Bank of the Middle East, the National Bank of Kuwait and the Commercial Bank. The currency is the Kuwait *dinar*, equal in value to the £. The introduction of a new Kuwaiti *rupee* is under consideration.

FLAG.—Red, with white lettering ("Kuwait" in Arabic).

BRITISH EMBASSY Kuwait

LAOS

King, Setha Khatya (... Savang Vatthana), born 1908, succeeded Nov. 4, 1959.

Prime Minister, Prince Souvanna Phouma (Aug. 16, 1960).

EMBASSY IN LONDON 5 Palace Green, W.8

Ambassador Extraordinary and Plenipotentiary, H.R.H. Prince Tiao Khammao (1958).

Laos includes the former Kingdoms of Luang Prabang and Vientiane and the Principality of the Champassac, united under King Sisavang Vong of the House of Luang Prabang, father of the present ruler. The country has an estimated area of 90,000 square miles. In 1948, the population was given as 1,500,000; it is now probably slightly over 2,000,000. The independence of the kingdom was recognized by France in July, 1949. Laos was invaded by the Communist Viet Minh in the spring of 1953. Under the terms of the Geneva Armistice Agreements of July, 1954, the Viet Minh troops were to evacuate Laos by November of that year. The two Northern Provinces of Sam Neua and Phong Saly remained, however, under the effective control of the rebel *Pathet Lao* forces until November, 1957, when an agreement reached between the Royal Laotian Government and the *Pathet Lao* leaders provided for the assumption of control of these provinces by the Government and the integration of the *Pathet Lao* forces into the Royal Army.

The government was overthrown on August 9, 1960, by a *coup d'état* led by Captain Konglae. The new government of Prince Souvanna Phouma was opposed by one half of the army led by General Phoumi Nosavan who set up a Revolutionary Committee at Savannakhet under the nominal headship of Prince Boun Oum. General Phoumi retook Vientiane in December, 1960, and, Souvanna Phouma's government having fled, a government under Prince Boun Oum was approved by the National Assembly on January 4. Captain Konglae and Prince Souvanna Phouma returned to Xieng Khouang where they joined forces with the Communist controlled *Pathet Lao* movement. Supplies of Russian arms and equipment from North Vietnam enabled them to make a considerable recovery, and when the 14-nation conference on Laos began on May 16, the Government forces had been driven back to the line of the Mekong towns.

CAPITAL.—Vientiane, population (estimated) 30,000.

FLAG.—Three-headed white elephant on 5 steps, surmounted by parasol, all on a red ground.

LEBANON

President of the Republic of Lebanon, General Fuad Chehab, elected July 31, 1958; assumed office September 23, 1958.

Prime Minister and Minister of Defence, M. Saeb Salam.

Foreign Affairs, M. Philippe Takla.

LEBANESE EMBASSY IN LONDON
(22 Kensington Palace Gardens, W.8)
[Bayswater: 7265]

*Ambassador, His Excellency Hussein el-Jisr (1960).
Counsellor, Elie J. Boustany.*

Attaché, Ibrahim Kharmat.

*Consular Section, 15 Palace Gardens Mews, W.8.
(Bayswater: 8485).*

The Republic of the Lebanon is in the Levant, covering a portion of the former Ottoman Empire taken from the Turks by British forces (with a small French detachment and some Arab forces under the Emir Faisal and Colonel Lawrence) in 1918, but following the Anglo-French Convention of September, 1919, Great Britain withdrew in favour of France, to whom a Mandate was granted by the Supreme Council of Allied Powers in 1920. The French authorities granted a Constitution and the first President of the Republic (under the Mandate) was elected in 1926.

In 1941 hostilities broke out between the French troops in Syria and Lebanon and the Allied Forces in the Middle East, the latter having been directed to prevent further Nazi penetration into French Mandated Territory. Hostilities ceased on July 11, 1941, and the French High Command agreed to remove the garrison.

In accordance with the undertaking given by the British and Free French Forces, Syria and Lebanon were declared to be independent and separate States. In 1943 the amended Constitution came into force and the first President of the independent Lebanon Republic was elected.

Under an agreement signed by General Catroux (on behalf of the French Committee of National Liberation) and by representatives of Syria and Lebanon "all powers and capacities exercised hitherto by the French under mandate" were transferred to the Syrian and Lebanese governments as from Jan. 1, 1944.

Lebanon forms a strip, about 120 miles in length and varying in width from 30 to 35 miles, along the Mediterranean littoral, and extending from the Palestine frontier on the south to the Nahr al Kebir (15 miles north of Tripoli) on the north; its eastern boundary runs down the Anti-Lebanon range and then down the Great Central depression, the *Beqaa*, in which flow the rivers Orontes and Litani. It is divided into 5 districts, North Lebanon, Mount Lebanon, Beirut, South Lebanon and Beqaa. The seaward slopes of the mountains have a Mediterranean climate and vegetation. The inland range of Anti-Lebanon has the characteristics of steppe country. There is a mixed Arabic-speaking population of Christians, Moslems and Druses.

Area and Population.—The total area of Lebanon is about 4,300 sq. miles, the population being estimated at 1,626,000 in 1960.

Production.—Fruits are the most important products and include olives, citrus fruit and apples. Tobacco, silk, cotton, cement, textiles, confectionery, steel and wooden furniture, wines and other alcoholic drinks are also produced. There is little remaining of the famous cedars of Lebanon.

Railways.—A narrow-gauge railway runs from Beirut to Damascus, connecting at Rayak with a branch of the standard-gauge line which runs from Tripoli through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotchek. A standard gauge railway also runs up the coast from Nakoura on the Palestine border, through Beirut to Tripoli, but the Beirut-Nakoura sector is not in use at present.

Roads.—All the principal towns in the country are connected by roads, for the most part good.

Civil Aviation.—Beirut International Airport is one of the most important traffic centres in the Middle East. Numerous international air services to all parts of the world pass through it, and local

services connect with all Middle Eastern capitals except Tel Aviv. There are 4 national airline companies in the Lebanon serving international as well as local routes. One of these companies (Middle East Airlines) enjoys the financial support of B.O.A.C. and operates *Comet* and *Viscount* services.

Rivers.—The Orontes flows northwards from the Lebanon range across the northern boundary to Antioch; the Litani flows southwards from Lebanon, turns westwards round the southern extremity of the range and flows into the Mediterranean.

Archæology, etc.—Lebanon has some important historical remains, notably Baalbek (Heliopolis) which contains the ruins of I-III century Roman temples and Jubail (Biblos), one of the oldest continuously inhabited towns in the world.

Language and Literature.—Arabic is the principal language (see Arabia), and French is also widely used. The use of English is increasing. About 35 daily papers are published, including 3 in French, 2 in English and 4 in Armenian; and a further 30 periodicals.

Education.—There are three universities in Beirut, the American and the French (R.C.) Universities established in the last century, and the Lebanese National University which is a recent foundation and in the early stages of development. There are several institutions for vocational training and there is a good provision throughout the country of primary and secondary schools, among which are a great number of private schools.

CHIEF TOWNS.— Ψ Beirut (population about 450,000) is the capital of the Lebanon. Ψ Tripoli (100,000), Zahlé (40,000), Ψ Sidon (25,000), Ψ Tyre (12,000) are other towns of importance.

FINANCE

Receipts and Expenditure, 1961 (Estimated)
£L273,800,000.

Currency. The monetary unit is the Lebanese \mathcal{L} (L); official rate $\mathcal{L}1 = \mathcal{L}L6.13$. There is also an officially recognized free market in foreign currencies, which is used for nearly all commercial transactions. The free market rate for sterling is variable, but averages about £L8.70 = $\mathcal{L}1$.

TRADE

Principal imports: Gold and precious metals, cereals, cotton and woollen textiles, artificial and cotton yarns, iron and steel goods, wood pharmaceuticals, raw hides, sugar, motor-vehicles, live-stock, wheat, flour, machinery, crude oil, chemicals and domestic electric appliances, and paper.

Principal exports: Gold and precious metals, citrus fruits, onions, textiles, apples and pears, scrap metal, vegetables, hides and skins, soap, butter, cereals, oil-seed, cement products, wooden and steel furniture, tobacco and wines.

Trade with U.K.

	1959	1960
Imports from U.K.	£9,497,910	£10,876,804
Exports to U.K.	2,380,749	1,889,770

There is also a considerable transit trade through Beirut, mainly in gold and crude oil. Lebanon is the terminal for two oil pipe lines, one, belonging to the Iraq Petroleum Company, debouching at Tripoli, the other belonging to the Trans-Arabian Pipeline Company, at Sidon. There are refineries at each end of the pipeline which can, to all intents and purposes, fulfil Lebanon's needs.

FLAG.—Horizontal bands of red, white and red with a green cedar of Lebanon in the centre of the white band.

AIR TRANSIT FROM U.K.—London-Beirut (2,169 miles), 6 hrs. 40 mins.

LIBERIAN EMBASSY IN LONDON

21 Prince's Gate, S.W.7

[Kensington: 9405]

Ambassador Extraordinary and Plenipotentiary, His Excellency George T. Brewer, Jr. (1959).

Consul-General, Mrs M. Reeves-Gorgla, 13 New Burlington Street, W. 1.

An independent Negro Republic of Western Africa, occupying that part of the coast between Sierra Leone and the Ivory Coast, which is between the rivers Mano in the N.W. and Cavalla in the S.E., a distance of about 350 miles, with an area of about 43,000 square miles, and extending to the interior to latitude 8° 50', a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1822, and has been recognized since 1847 as an independent State. Estimates of the population vary between 750,000-2,500,000.

The executive power is vested in a President elected for 4 years (8 years in the first instance) assisted by a Cabinet; there are two houses of Legislature, the Senate, with 10 members elected for six years, and the House of Representatives with 39 members elected for four years. There is no regular army, but there is an enlisted frontier force of about 2,000 men. The artificial harbour and free port of Monrovia was opened on July 26, 1948. There are 9 ports of entry, including 3 river ports.

Liberia is receiving assistance from the U.S. International Co-operation Administration and technicians have been sent from U.S.A. to advise on various projects. A loan of \$15,000,000 has been

negotiated with the Import-Export Bank to finance road construction. UNESCO, WHO and FAO have missions in the country providing technical assistance. The U.S.A. has also made loans for the improvement of power supplies and telecommunications.

FINANCE		1958-59
Revenue.....		\$22,664,199

Cultural Attaché, Ahmed Ben Khayal.

Commercial Attaché, Suleiman Fteita.

Libya, on the Mediterranean coast of Africa, is bounded on the East by Egypt and the Sudan, on the South by the Republics of Chad and Niger, and on the West by Algeria and Tunisia. It consists of the three provinces of Tripolitania, Cyrenaica and the Fezzan, with a combined area of approximately 810,000 square miles and a population estimated (1954) at 1,091,000. The people of Libya are principally Arab with some Berbers in the West and African negroes in the Fezzan, and there is a considerable Italian minority in Tripolitania. Islam is the official religion of Libya, but all religions are tolerated. The official language is Arabic.

Vast sand and rock deserts, almost completely barren, occupy the greater part of Libya. The Southern part of the country lies within the Sahara Desert. There are no rivers and, as rainfall is precarious, a good harvest is infrequent. Agriculture is confined mainly to the coastal areas of Tripolitania and Cyrenaica, where barley, wheat, olives, almonds, citrus fruits and dates are produced, and to the areas of the oases, many of which are well supplied with springs supporting small fertile areas. Among the important oases are Gadames, Jofra, Sebha, Gat, Jalo, Bir Hakim and the Kufra group in the South-East. Exports from Libya include wool, cattle, sheep and horses, esparto grass, olive oil, sponges and hides and skins. Principal imports are foodstuffs, including sugar, tea and coffee and most constructional materials and consumer goods. Twenty-two oil companies are prospecting in the country and two American companies, Esso and Oasis, have already found exploitable fields.

The ancient ruins in Cyrenaica, at Cyrene, Ptolemais (Tolmeta) and Apollonia, are outstanding, as are those at Leptis Magna near Homs, 70 miles from Tripoli and at Sabratha, 40 miles west of Tripoli. Recently an Italian expedition has found in the S.W. of the Fezzan a series of rock-paintings more than 3,000 years old which are technically in advance of any yet seen. The Museum in the Castello at Tripoli has been completely re-organized and is of great interest to visitors.

Communications in Libya are good in the coastal area, where a motor road runs from the Tunisian frontier through Tripoli to Benghazi, Tobruk and the Egyptian border, serving the needs of the main population centres. A road from the coast to Sebha, capital of the Fezzan, is under construction. Elsewhere roads are poor and the transport inland is confined to caravan and occasional motor bus routes. Small railway systems exist in the Tripoli and Benghazi areas. There are airports near Tripoli (Idris el Awal) and Benghazi (Benina) regularly used by commercial airlines, and military airfields at El Adem (near Tobruk, R.A.F.), and Wheelus Field, Mellaha (near Tripoli, U.S.A.A.F.).

Government.—Libya was occupied by Italy in 1911-12 in the course of the Italo-Turkish War, and under the Treaty of Ouchy (Oct., 1912) the sovereignty of the province was transferred by Turkey to Italy. In 1939 the four Provinces of Libya (Tripoli, Misurata, Benghazi and Derna) were incorporated in the national territory of Italy as *Libia Italiana*. After the Second World War Tripolitania and Cyrenaica were placed provisionally under British and the Fezzan under French administration, and in conformity with a resolution of the General Assembly on Nov. 22,

1949, Libya became on Dec. 24, 1951, the first independent state to be created by the United Nations.

Libya has a federal form of government and an hereditary monarchy. Government is by a two-chamber parliament. The Senate of 24 members, equally divided between the three Provinces, is nominated half by the King and half by the three Provincial Legislative Councils. The House of Representatives is an elected body at present consisting of 55 members, 35 from Tripolitania, 15 from Cyrenaica and 5 from the Fezzan. Members are elected on a basis of one for every 20,000 inhabitants provided that the number of members in any one of the three provinces shall not be less than 5, and elections of all members are to be held every four years. Legislation may be initiated by the King, the Senate or the House of Representatives, except laws concerning the Budget or taxation, which may not be introduced by the Senate.

The three Provinces of Tripolitania, Cyrenaica and the Fezzan are each administered by a Governor assisted by an Executive and a Legislative Council.

Currency.—Libya entered the Sterling Area on January 3, 1952, and a new currency was introduced on March 24, 1952. The £ Libyan is equal to the £ Sterling and is divided into 100 piastres and 1,000 millièmes. There are seven denominations of notes (£10, 5, 1, ½, and ¼, 10 piastres and 5 piastres) and five denominations of coins (1 and 2 piastres, 5, 2 and 1 millièmes).

Grants have been made by the United Kingdom, France, Italy and the United States to foster Libya's economic development and technical assistance is being provided by the United Nations and the United States.

A treaty of alliance and friendship between the United Kingdom and Libya, together with military and financial agreements, was signed at Benghazi on July 29, 1953. The United Kingdom will provide financial aid to Libya for 20 years. During the first five years £1,000,000 was paid annually for economic development, while from 1953-55 £2,750,000, in 1956 £3,000,000 and 1957 £3,250,000 was paid to the Libyan Budget. The figure for the second five-year period has been fixed at £3,250,000 for the Budget; the development aid from this source has ceased. Libya will make military facilities available to British troops (including the R.A.F.) which will be stationed in Libya under certain conditions. The United States Government is permitted under the terms of the United States-Libyan Base Rights Agreement of Oct. 30, 1954, to maintain armed forces and installations in Libya. A separate exchange of notes governs the financial assistance which the United States Government will provide for Libya's economic development during the period of this Agreement which runs until Dec. 24, 1970.

CAPITAL. Tripoli and Benghazi are the joint capitals of Libya. A new Federal capital is under construction at Beida in Cyrenaica.

The principal towns with the latest available estimates of populations are Tripoli (170,000); Misurata (56,902); Benghazi (69,718); Homs-Cussabak (62,272); Derna (15,891); Barce (9,992); Tobruk (4,995); Sebha (7,298).

FLAG.—The Libyan National flag is a tricolour of red, black and green horizontal stripes, bearing a white crescent and star in the centre.

BRITISH EMBASSY IN LIBYA

Ambassador Extraordinary and Plenipotentiary (vacant) £4,115
Counsellor, G. N. Jackson, M.B.E.
1st Secretaries, A. A. W. Landymore; D. C. Carden (Oriental); J. G. Morley; J. A. N. Graham.
Consul (Tripoli), D. I. Newman.
Vice-Consul (Benghazi), L. H. Cook.
2nd Secretary (Commercial) (Tripoli), D. R. Collard.

There are British Consular Offices at Benghazi and Tripoli.

British Council Representative, Dr. A. Craig-Bennett, O.B.E., 16 Zaviet el Dahmani, Tripoli.

LIECHTENSTEIN (Fürstentum Liechtenstein)

Prince, Franz Josef II., b. Aug. 16, 1906; suc. Aug. 25, 1938; married March 7, 1943, Countess Gina von Wilczek.

A Principality on the Upper Rhine, between Vorarlberg (Austria) and Switzerland, with an area of 59.61 square miles and a population (census, Dec. 1960) of 16,495. The main industries are metal goods, cotton spinning and weaving, calculating machines, cameras, measuring instruments, coating of lenses, manufacture of vacuum apparatus, ceramics, artificial teeth and sausage casings, textiles, various apparatus, foodstuffs, leatherware and woodwork. The chief products are cotton yarn, cotton material, screws, needles, knitting machinery, ceramics, artificial teeth, precision measuring instruments, vacuum pumps, coated lenses, shoes, leather gloves, calculating machines, cameras, bed springs, conveyor belts, cooking ovens, boilers, preserves, damask cloth, socks and stockings, and furniture. Revenue (1960), *Swiss francs* 11,134,512. Expenditure (1960), *Swiss francs* 10,899,880.

Trade with U.K.

Imports from U.K.....	£49,527	£124,720
Exports to U.K.....	1,871,364	1,695,385

The language of the Principality is German.

FLAG.—Blue and Red (blue at the top, red at the bottom, with a gold crown in the blue part).

CAPITAL, Vaduz. Pop. (1960) 3,370.

British Consul-General, S. Lockhart, C.M.G., O.B.E. (1960) (resides at Zürich, Switzerland).

LUXEMBURG

(Grand-Duché de Luxembourg)

Grand Duchess, H.R.H. Charlotte, G.C.V.O., born Jan. 23, 1896, succeeded (on the abdication of her sister) Jan. 9, 1919; married, Nov. 6, 1919, Prince Felix of Bourbon-Parma (H.R.H. the Prince of Luxembourg, K.B.E.). *Heir Apparent* (and since May, 1961, *Lieutenant-Representative* of the Grand Duchess), The Hereditary Grand Duke (Prince Jean), born Jan. 5, 1921, married, April 9, 1953, Princess Joséphine-Charlotte of Belgium, and has issue, Princess Marie Astrid, born Feb. 17, 1954; Prince Henri, born April 15, 1955; Prince Jean and Princess Margaretha (twin son and daughter), born May 15, 1957.

Prime Minister and Minister of Finance, M. Pierre Werner.

Deputy Prime Minister, Foreign Affairs, Defence, M. Eugène Schaus.

Labour, Social Security, Public Health, M. Emile Colling.

Public Works, Physical Education, M. Robert Schaffner.

Agriculture, Education, M. Emile Schaus.

Justice, Economic Affairs, Middle Classes, M. Paul Elvinger.

Interior, Transport, M. Pierre Grégoire.

EMBASSY IN LONDON
27 Wilton Crescent, S.W.1.

[Belgravia; 6961]

Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency André J. Clasen (1955).

A Grand Duchy in Western Europe, bounded by Germany, Belgium, and France. Established as an independent State under the sovereignty of the King of the Netherlands as Grand Duke by the Congress of Vienna in 1815, it formed part of the Germanic Confederation, 1815-66, and was included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory. On the death of the King of the Netherlands in 1890 it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the beginning of the war in 1914, but was liberated in 1918. By the Treaty of Versailles, 1919, Germany renounced her former agreements with Luxemburg in respect of the customs union, etc., and in 1921 an economic union was made with Belgium (Belgolux). The Grand Duchy was again invaded and occupied by Germany on May 10, 1940. The constitution of the Grand Duchy was modified on April 28, 1948, and the stipulation of permanent neutrality was then abandoned. Luxemburg is now a fully effective member of the Western association of powers and a signatory of the Brussels and North Atlantic Treaties. She is also a member of the European Coal and Steel Community, the High Authority and Court of which have their seat in Luxemburg; of the European Economic Community and of "Euratom". Besides Belgolux, Luxemburg is also a member of the Belgium-Netherlands-Luxemburg Customs Union (Benelux).

The area is 1,000 square miles; the population (estimated, 1959) 318,000, nearly all Roman Catholics. There is a Chamber of 52 Deputies, elected by universal adult suffrage for 5 years. Legislation is submitted to the Council of State. The Grand Duchy is rich in iron-ore and possesses an important iron and steel industry with an annual productive capacity of over 3,000,000 tons. The revenue for 1961 was estimated at *Francs* 5,763,391,000, expenditure *Francs* 5,871,955,000. The Luxemburg franc has at present the same value as the Belgian franc and the latter is legal tender in the Grand Duchy. Exchange Rate, 140 *Francs* = £1. There are approximately 260 miles of railway.

Trade with U.K.

	1959	1960
Imports from U.K.....	£448,587	£311,230
Exports to U.K.....	512,366	1,117,801

The capital, Luxemburg, pop. (1957), 67,500, is a dismantled fortress. The country is well wooded, with many deer and wild boar. The language is Letzeburgesch but French is the official language; also speak German and many English.

FLAG.—Three horizontal bands, red, white and blue.

BRITISH EMBASSY Luxemburg

Ambassador Extraordinary and Plenipotentiary, His Excellency Geoffrey William Aldington, C.M.G., O.B.E. (1961)..... £3,415
1st Secretary and Consul, C. A. Thompson.
Vice-Consul, B. Smith.

MADAGASCAR

(La République Malgache)

President and Head of Government, M. Philibert Tsiranana (1959).

Vice-President of the Government, M. Calvia Tsiebo
Minister of Foreign Affairs, M. Albert Sylla.

MALGASY EMBASSY IN LONDON

Ambassador, His Excellency M. Razafy-Andriamihaingo (1961).

Area 228,000 sq. miles. Population (1960), 5,312,000. Madagascar is 240 miles distant from the S.E. coast of Africa and is the fifth largest island in the world. It became a French protectorate in 1890. In 1896 the Hova dynasty was suppressed and the administration entrusted to a Governor General. Constitutional reforms were introduced in 1957, giving the island internal autonomy and Madagascar adopted republican status on Oct., 14, 1958, while remaining within the French Community. Complete independence was proclaimed on June 26, 1960, and immediately thereafter, the President of the Republic, M. Philibert Tsiranana, signed formal agreements with the French Government confirming Madagascar's continued membership of the French Community and establishing co-operation with the French Republic on defence, monetary, judicial and educational matters, etc.

Agriculture and cattle raising are the principal industries; minerals include gold, graphite and mica. The island's basic exports suffered drastic reductions in 1959 through disastrous cyclones and accompanying floods. Total exports in 1960 were *Frs. CFA* 18,489,400,000 compared with *Frs. CFA* 18,645,000,000 in 1959. Principal exports in order of value during 1960 were coffee (31½ per cent. of total exports), vanilla, sugar, rice, raffia, tobacco, fresh meat, sisal, essential oils, hides, butter beans and groundnuts. The main imports in 1960 (which totalled *Frs. CFA* 27,657,200,000) were transport equipment, textiles, metal goods, chemical products, food products and beverages, machinery, clothing, etc., and mineral products (cement, petroleum oils, etc.).

Trade with U.K.

	1959	1960
Imports from U.K.....	£682,257	£595,729
Exports to U.K.....	806,962	968,958

CAPITAL, Tananarive (240,000). Other towns are ΨTamatave (39,627), the chief port; Fianarantsoa (36,189); ΨMajunga (34,119), the second port; Tuléar (33,843), and Diego Suarez (22,772).

The former dependencies of Madagascar in the Mozambique Channel, Juan de Nova, Europa Island and Bassas da India (uninhabited), are integral parts of the French Republic and, as such, are administered by the Ministry of Overseas Territories and Departments of the French Government. The island of Saint-Marie, off the east coast of Madagascar is recognized as a dependency of the Malgasy Republic but its inhabitants are to enjoy dual (French/Malgasy) nationality.

FLAG.—Equal horizontal bands of red (above) and green, with vertical white band by staff.

BRITISH EMBASSY 19 Rue Amiral Pierre, Tananarive (P.O. Box 167)

Ambassador Extraordinary and Plenipotentiary, His Excellency John Edmund Dudley Street. £3,415
1st Secretary and Consul, P. P. Caruana, M.B.E.
Vice-Consul, M. Pitchen.

There is an Honorary British Vice-Consul at Tamatave.

MALI

(Republic of Mali)

President of the Council, Modibo Kéita.

The Republic of Mali, an inland state in north-west Africa, is bounded by Mauritania in the west, by Algeria in the north, by the Republic of Niger in the east and by the Voltaic Republic, Ivory Coast and Guinea in the south. It has an area of 582,437 square miles and the population was estimated at 3,708,000 in 1957.

Formerly the French colony of Soudan, the territory elected on Nov. 24, 1958, to remain as an autonomous republic within the French Community. It associated with Sénégal in the Federation of Mali which was granted full independence on June 20, 1960. The Federation was effectively dissolved on August 22 by the secession of Sénégal. Dissolution of the Federation was recognized by the Sudanese Republic and the title Republic of Mali was adopted on Sept. 22, 1960. The Republic is no longer a member of the French Community.

CAPITAL.—Bamako (68,600).

FLAG.—Horizontal stripes of green (by staff), yellow and red; with black figure on yellow band.

BRITISH EMBASSY

Social Security, Lic. Benito Coquet.

MEXICAN EMBASSY IN LONDON

48 Belgrave Square, S.W.1

[Belgravia: 4037]

Ambassador, His Excellency Señor, Lic. Don Antonio Armendariz (1961).

Minister-Counsellor, Señor Don Gustavo Luders de Negri.

Counsellor, Señor Lic. Don Rubén González Sosa.
Commercial Attaché, Señor Lic. Don Julio Faesler Carlisle.

3rd Secretary, Señor Lic. Don. Raul Valenzuela Ezquerro.

Area and Population.—Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 14° 33' to 32° 43' N. lat. and 86° 46' to 117° 08' W. long., and comprising one of the most varied zones in the world. It contains 29 states, 2 territories, and the federal district of Mexico, making in all 32 political divisions, covering an area of 758,000 square miles.

Preliminary results of the Mexican General Census taken on June 8, 1960, showed a total population of 34,625,903.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing Isthmus of Tehuantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of Lower California, with a mountainous surface, separated from the mainland by the Gulf of Lower California. The Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltepetl ("El Pico de Orizaba") on the east. In February, 1943, a new volcano (El Parícutin) was in eruption about 250 miles from Mexico City and 20 miles from the town of Uruapan, but is no longer active. The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 feet), the higher levels form the *Tierra Templada*, or temperate region (from 3,000 to 6,000 feet), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 6,000 feet). The only considerable rivers are the *Rio Grande del Norte*, which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Rio Grande de Santiago*, the *Rio Balsas* and *Rio Papaloapan*. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas." The largest fresh-water lakes are *Chapala* (70 miles long and 20 miles wide), and *Pátzcuaro*. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude, the rainy season lasting from June to October.

History and Archaeology.—The present Mexico and Guatemala were once the centre of a remarkable indigenous civilization, which had unknown beginnings in the centuries before Christ, flowered in the periods from 500 to 1100 A.D. and 1300 to 1500 A.D. and collapsed before the little army of Spanish adventurers under Hernán Cortés in the years following 1519. Pre-Columbian Mexico was divided between different but connected Indian cultures, each of which has left distinctive archaeological remains: the best-known of these are Chichén Itzá, Uxmal, Bonampak and Palenque, in the States of Yucatán and Chiapas (Maya); Teotihuacán, renowned for the Pyramid of the Sun (216 feet high) in the Valley of Mexico (Teotihuacano); Monte Albán and Mitla, near Oaxaca (Zapotec); El Tajín in the State of Vera Cruz (Totonac); and Tula in the State of Hidalgo (Toltec). The last and most famous Indian culture of all, the Aztec, based on Tenochtitlán, suffered more than the others from the Spaniards and only very few Aztec monuments remain.

A few years after the Conquest, the Spaniards built Mexico City on the ruins of Tenochtitlán, and appointed a Viceroy to rule their new dominions, which they called New Spain. The country was largely converted to Christianity, and a distinctive colonial civilization, representing a marriage of Indian and Spanish traditions, developed and flourished, notably in architecture and sculpture. In 1810 a revolt began against Spanish rule. This was finally successful in 1821, when a precarious independence was proclaimed. Friction with the United States in Texas led to war from 1845–48, at the end of which Mexico was forced to cede the northern provinces of Texas, California and New Mexico. In 1862 Mexican insolvency

resulted in invasion by French forces which installed Maximilian as Emperor. The empire collapsed with the execution of the Emperor in 1867 and the austere reformer, Juárez, restored the republic. Juárez's death was followed by the dictatorship of Porfirio Díaz, which saw an enormous increase of foreign, particularly British and United States, investment in the country. In 1910 began the Mexican Revolution which reformed the social structure and the land system, curbed the power of foreign companies and ushered in the independent industrial Mexico of today.

Government.—Under the Constitution of Feb. 5, 1917 (as subsequently amended), Congress consists of a Senate of 60 members, elected for six years, and of a Chamber of Deputies, at present numbering 178, elected for three years. Presidents, who wield full executive powers, are elected for six years; they cannot be re-elected.

There are five political parties registered in Mexico, of which by far the largest and most influential is the *Partido Revolucionario Institucional* (P.R.I.) which has for many years constituted the government party.

Communications.—Veracruz, Tampico and Coatzacoalcas are the chief ports on the Atlantic, and Guaymas, Mazatlán, Acapulco and Salina Cruz on the Pacific. Work is proceeding on two new ports, Matamoros on the Atlantic and Topolobampo on the Pacific. Registered merchant marine amounted at the end of 1959 to 300,000 gross tons, with 890 vessels of which 60 per cent. were tug-boats and dredgers. There were 23,730 kilometres of railway track open in Mexico in 1958. Work is proceeding on the reorganization, rehabilitation and re-equipment of the whole system: help in this has been forthcoming from the World Bank, the Export-Import Bank and private sources in the United States. Railway wagons are already manufactured in Mexico and it is possible that railway carriages will be manufactured before very long. Work is going ahead fast on a track between Chihuahua and Topolobampo to link north central Mexico with the Pacific.

The total length of road at the end of 1959 was 47,820 kilometres, of which 41,651 kilometres were usable in all weathers. Mexico City may be reached by at least three excellent roads from the United States, and work is continuing on roads southward from Mexico City to Yucatán and the Guatemalan border. These are already usable for all but the rainy season. The road between Durango and Mazatlán was opened in 1961.

At the end of 1958 the national telegraph system's lines were 180,046 kilometres in length. International telegraph services to the United States frontier are provided by the Government-owned Mexican Telegraph Company and then through the United States to Canada and Europe. Telephone communications are similar.

There is a good internal network of air services: commercial flights rose from 88,000 in 1958 to 102,000 in 1959. Distances covered were 48,000 kilometres within the country and 42,000 kilometres abroad in 1959. Registered civil aircraft in 1958 numbered 661, of which 85 were commercial and 576 private. The principal international air services are from Mexico to New York, Vancouver, Toronto, Los Angeles, Chicago, Miami, Lima, Guatemala, direct; Mexico to Houston-Montreal-Amsterdam; Mexico to Panama-Caracas; and Mexico to Miami-Paris.

Production.—The total acreage of arable land is estimated at 60,000,000 acres, though only some 25,000,000 acres are considered arable without artificial irrigation. Approximately 13,000,000

acres are under cultivation and great efforts are being made to increase this area. Grazing land is estimated at 80,000,000 acres and about 50,000,000 acres are under forest. The principal agricultural crops are maize, beans, wheat, sugar cane, coffee, cotton, tomatoes, chili, tobacco, rice, chickpeas, groundnuts, sesame, alfalfa, vanilla, cocoa and many kinds of fruit, both tropical and temperate. The maguey, or Mexican cactus yields several fermented drinks, mezcal and tequila (distilled) and pulque (undistilled). Another species of the same plant supplies sisal-hemp (herequen). The forests abound in mahogany, rosewood, ebony and chicle trees.

In 1959 there were 21,561,000 head of cattle, 5,228,000 horses, 2,698,000 mules, 3,297,000 donkeys, 5,788,000 sheep, 10,620,000 goats, 9,422,000 pigs and 127,067,000 poultry.

The principal industries (apart from agriculture) are mining and petroleum, but during recent years there has been very considerable expansion of both light and heavy industries, 80 per cent. of all consumer goods now being made in Mexico. Most of the remaining 20 per cent. is in fact made up of bulk imports of foodstuffs and motor vehicles for assembly, so that the true figure for local manufacture of consumer goods is nearer to 90 per cent. The steel industry has expanded rapidly and produced 1,600,000 tons of steel in 1960. The mineral wealth is great, but in recent years the low world market prices have caused a slump in the mining industry. The principal minerals are gold, silver, copper, lead, zinc, quick-silver, iron and sulphur. Substantial reserves of uranium have been found.

MINERAL PRODUCTION

	1959	1960
Gold (Troy oz.)	313,539	296,319
Silver (Troy oz.)	44,080	44,690
Copper (Metric tons)	57,257	60,333
Lead (Metric tons)	189,680	190,670
Zinc (Metric tons)	263,934	262,925

The total petroleum reserves are said to be over 4,000 m. U.S. barrels. Total production of crude oil and natural gasoline reached 108,000,000 barrels in 1960, against 106,000,000 in 1959. During 1959 and 1960 Petroleos Mexicanos, the nationalized oil industry, received large credits from various countries for the re-equipment of the industry and the development of the petro-chemical industry.

Woolen and cotton spinning and weaving, the making of footwear and clothing and of domestic appliances of all kinds have made such progress in recent years that all these industries are protected by high import duties and import licence restrictions.

An indication of the rapid industrial expansion of Mexico is that output of electricity increased from 4,423 million kWh in 1950 to 9,774 million kWh in 1959.

Defence.—The regular army has a strength of fifty infantry battalions, one infantry brigade and a Presidential Guard of three battalions, 21 cavalry regiments, a parachute battalion and a small number of artillery and engineer units. There is also a conscript army of about 250,000 men organized into National Service divisions, each 6,000-7,000 strong. The Navy has some 36 ships of all kinds and the Air Force some 160 aircraft.

Language and Literature.—Spanish is the official language of Mexico and is spoken by about 90 per cent. of the population. About 2,500,000 inhabitants speak Indian languages, but half of these speak Spanish as well. Of those speaking indigenous languages only about 30 per cent. speak Nahuatl, 9 per cent. Maya, 8 per cent. Zapotec,

7 per cent. Otomi and 10 per cent. Mixtec, the remainder speaking other varieties of the minor linguistic families. The National Library at the capital contains about 500,000 volumes. The Press of Mexico is in a flourishing condition with many daily newspapers in the capital and in other urban centres. The first printing press and the first regularly issued newspaper in the New World were established by the Spaniards in Mexico City.

Education.—Education is divided into primary, secondary and university. Primary education is free, secular and nominally compulsory. In 1957 there were 28,417 primary schools with 3,814,940 pupils, 889 secondary schools with 276,838 pupils, and 864 technical and commercial secondary schools with 174,126 pupils. The National University of Mexico was founded in 1533 and re-organized in 1910. There are 9 other Universities, including one exclusively for women. The prevailing religion is Roman Catholic. In 1957, only 28 per cent. of the population above 6 years old were illiterate; while progress in reducing illiteracy has been steady over the last few years, it has barely kept pace with the rapidly increasing population.

	FINANCE	1961

(Principauté de Monaco)

Sovereign Prince, H.S.H. Rainier III-Louis-Henri-Maxence Bertrand, born May 31, 1923, succeeded his grandfather (H.S.H. Prince Louis II), May 9, 1949; married April 19, 1956, Miss Grace Patricia Kelly and has issue Prince Albert Alexandre Louis Pierre, born March 14, 1958, and Princess Caroline Louise Marguerite, born January 23, 1957.

Minister of State, M. Emile Pelletier.
Secretary of State and Director of Prince's Household, M. Paul Noghes.

CONSULATE-GENERAL IN LONDON

4 Gray's Inn Square, W.C.1

[Chancery: 5323]

Consul-General, H. E. Cubitt,

Vice-Consul, A. J. Hucker.

A small Principality on the Mediterranean, with land frontiers joining France at every point, and consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the famous casino. The Principality comprises a narrow strip of country about 2 miles long and half-a-mile broad (area approx. 360 acres), with (1956) 20,422 inhabitants (Monégasque nationals, 2,696), and a yearly average of over 650,000 visitors. The whole available ground is built over, so that there is no cultivation, though there are many public and private gardens. Monaco has a small harbour (20 ft. alongside quay), and the import duties are the same as in France. There is a Council of State of 13 members and a Council of Government composed of the Minister of State and three State Counsellors. There is a local police force of 160 men.

CAPITAL, Monaco-ville.

FLAG.—Red and white.

BRITISH CONSULAR OFFICE

Monaco—Consul-General, L. Pott, C.B.E.

MONGOLIA

(Mongolian People's Republic)

Prime Minister, Tse Den-bal (May, 1952).

Area and Population.—Mongolia is an almost entirely unsurveyed tract in Asia, bounded by the Siberian provinces of U.S.S.R. in the north, the Chinese province of Sinkiang and the Great Wall of China in the south, by Manchuria on the east and by the Tarbagatai Mountains and the Turkestan provinces of U.S.S.R. on the west.

The total area is estimated at 1,750,000 to 2,000,000 square miles with a total population (not yet enumerated) of 3,000,000 to 5,000,000, of whom the greater number are traditionally adherents of Lamaism, a form of Buddhism.

North-West Mongolia consists of an elevated plateau bounded by the Russian Altair range (N.W.), the Sayans (N.E.), the Kentei (S.E.), and the Ektagh Altai (S.W.). The plateau contains many lakes and is watered by numerous rivers, among which are the headwaters of the Yenisei, the Irtysh and the Selenga. Agriculture is almost unknown, but excellent pasture provides grazing grounds for numerous cattle and sheep, and particularly for transport animals (camels and oxen). The exports are wool, hides, skins, and gold.

The principal town of North-Western Mongolia is Ulan Bator (Ulan-Bator-Khoto, "Town of the Red Knight") which has an estimated population of 80,000 to 100,000; other centres are Uliassutal, and Kobdo, of importance as trading posts on the main caravan routes. Part of North-Western Mongolia has been incorporated in the Soviet Union as the Tannu Tuva autonomous Province which lies between the Sayan and Tannu Ola ranges, the capital being Kyzyl.

South-East and South Mongolia include the Gobi ("Desert"), or *Shamo* ("Sand Desert"), which covers nearly one-third of the total area, and in the extreme south-east the *Ordos* Desert, bounded on the south by the Great Wall of China, and encircled on the north by part of the main stream of the Hwangho river. Agriculture is carried on wherever Chinese influence has been exerted, but is mainly confined to the south-eastern borders. The principal industry (as in North-West Mongolia) is sheep and cattle raising and the breeding of camels, oxen and horses for transport, in order to supply the caravan routes from China to Siberia. The centres of population depend mainly upon the overland commerce of China and Eastern Russia across the Gobi. Of recent years this trade has been organized and financed by Soviet Russia. The principal centres are: Kalgan, Kukulkhoto, Kuku-erghi, Dolon-Nor and Birukhoto. In the north-east, Keru-lun (on the river of that name), is a junction of the southern routes from the Chinese province of Perchill and the western routes from Urga, in N.W. Mongolia.

Government.—In 1915 Mongolia threw off its allegiance to China, and by the Treaty of Kiakhka was recognized as an Autonomous Republic. Negotiations with Russia, after the 1917 revolution, led to an alliance, and by Treaty (May 31, 1924) the U.S.S.R. acknowledged the suzerainty of China over Outer Mongolia, but by the Russo-Chinese Treaty of Aug. 25, 1945, China recognized the complete independence of Outer Mongolia.

MOROCCO

(Kingdom of Morocco)

King, H.M. King Hassan II, born July 9, 1929; acceded February 26, 1961, on the death of his father, King Mohammad V.

CHIEF MINISTERS

(May 8, 1961)

Prime Minister, Minister of Defence, Agriculture and Interior, H.M. King Hassan II.

Minister Without Portfolio and personal representative of the King, Ahmad Balafrej.

Justice, Abdul Khaliq Torres.

Posts and Telegraphs, Mohammad Cherkaoui.
Labour and Social Affairs, Dr. Abdelkrim Al Khatib.

MOROCCAN EMBASSY IN LONDON

65 Ennismore Gardens, S.W. 7.

[Knightsbridge: 8827]

Ambassador, Prince Moulay Hassan Ben El Mehdi.
Secretaries, Mohamed Abderrahman El Alaoui;
Abbas El Mokri; Abdelhaq Saadani.
Chancellors, Abdelhaq Lahlou; Driss Lahlou.

Area and Population.—Morocco is situated in the north-western corner of the African continent between latitude $27^{\circ} 40' - 36^{\circ}$ N. and longitude $2^{\circ} - 11^{\circ}$ W. with an area estimated at approximately, 180,000 sq. miles, and a population (Census of 1960) of 11,598,700. It is traversed in the north by the Rif Mountains and in a general S.W. to N.E. direction, by the Middle Atlas, the High Atlas, the Anti-Atlas and the Sarrho ranges. The northern flanks of the Middle and High Atlas Mountains are well wooded but their southern slopes, exposed to the dry desert winds, are generally arid and desolate, as are the whole of the Anti-Atlas and Sarrho ranges. The north-westerly point of Morocco is the peninsula of Ceuta which is separated from the continent of Europe by the narrow strait of Gibraltar. The Jebel Mousa dominates the promontory and, with the rocky eminence of Gibraltar, was known to the ancients as the *Pillars of Hercules*, the western gateway of the Mediterranean.

Climate.—The climate of Morocco is generally good and healthy, especially on the Atlantic coast, the country being partially sheltered by the Atlas mountains from the hot winds of the Sahara. The rainy season may last from November to April. The plains of the interior are intensely hot in summer. Average summer and winter temperatures for Rabat are 81° F. and 45° F.; for Marrakesh 101° F. and 40° F. respectively.

Administration.—The Treaty of Fez of 1912 provided for the establishment of a French Protectorate over Morocco, and France became responsible for the foreign relations of the Sultan and for the defence and administration of the country. The subsequent Franco-Spanish Treaty of 1912 provided for the establishment of a Spanish "sphere of influence" extending over northern Morocco with the exception of the Zone of Tangier, Ceuta and Melilla (see under Spain) are Spanish "State Territories." Ceuta, situated opposite Gibraltar, has been a Spanish possession since the close of the sixteenth century, and Melilla, further east on a rocky promontory of the Rif coast, has been a Spanish possession since 1492. The Penon (Rock) of Alhuma, Penon de Velez and the Zaffarin Islands are Spanish possessions. The pacification of the French Zone of Morocco was completed in 1934.

Tangier, until 1960, enjoyed a special régime. Before the war of 1914-1918, negotiations between the British, French and Spanish Governments took place but the outbreak of the war prevented the proposed international régime for Tangier from being put into operation. A new Convention providing for the Tangier Statute for the international administration of the Tangier Zone was, however, signed by the three Governments at Paris on December 18, 1923. It was brought into force on June 1, 1925, and modified by a Protocol of July 25, 1928, by which Italy adhered to it. Under the Convention only native affairs were reserved to the Sherrefian authority. In March, 1941, Spain suppressed the international administration, deposed the Sultan's representative in Tangier and substituted for him the Sultan's Khalifa in the

Spanish Zone. In 1956 negotiations between the Moroccan Government and the Statutory Powers culminated in the Tangier Conference which sat in Tangier in October. This was followed by the grant of a Royal Charter on August 26, 1957, ensuring the continuation of a free monetary system and free trade in Tangier. These arrangements ended on April 19, 1960, when the Zone was fully incorporated into Moroccan territory.

On August 20, 1953, Sidi Mohammed ben Youssef, Sultan of Morocco for 25 years, was de-throned, and exiled together with his family. Sidi ben Moulay Arafat was proclaimed Sultan in his stead but although a series of reforms was instituted as a progressive handing over of government to the Moroccans, the Nationalist movement increased rapidly and civil disturbances became serious. The insistent Moroccan desire for the return of their former Sultan led to the withdrawal in September, 1955, of Sultan Moulay Arafat. Mohammed ben Youssef was reinstated as Sultan and he returned to Morocco on November 16, 1955. The formation of a Moroccan Government quickly followed; negotiations with France which opened in February, 1956, culminated in a joint Franco-Moroccan declaration of March 2, 1956, which recognized Morocco's independence and sovereignty. Negotiations with the same end in view were then engaged with Spain, resulting in a similar joint declaration of April 7, 1956.

Following independence there has been a series of Governments, headed by prominent Moroccan political personalities. A split in the Istiqlal Party in 1957 led to the emergence of a left wing grouping known as the National Union of Popular Forces, a leading member of which, M. Abdulla Ibrahim, headed a Government, the fourth since independence, charged with the organization of elections for Chambers of Commerce and Industry and Municipal and Communal Councils. These took place on May 9 and May 29, 1960 respectively. King Muhammad V dismissed this Government on May 20, 1960, and took charge himself as Prime Minister with his son, the Crown Prince Moulay Hassan, as his Deputy. At the same time the King announced that a Constitution would be enacted by the end of 1962, drawn up by a constitutional Council of 78 members who were appointed by the King later that year. King Muhammad died suddenly on February 26, 1961, and was succeeded by the Crown Prince, who took the style of King Hassan II.

Defence.—In the protectorate era, the protecting powers were responsible for defence. Arrangements were completed during 1951 with France for the use of air bases in the Southern (former French) Zone by the U.S. Air Force. Bases were constructed at Nouaceur, Sidi Slimane and Benguerir, but in 1959 it was agreed that the U.S.A. would evacuate her forces by the end of 1963 and there followed a period of increasing pressure upon France and Spain to evacuate their forces also. France agreed to evacuate her land and sea forces by March 2, 1961, under an agreement signed on September 1, 1960, and subsequently agreed to the complete evacuation of all her forces by October, 1961. There has been no agreement with Spain, but Spanish forces on Moroccan territory have been substantially reduced. The Moroccan army, formed in 1956, is about 40,000 strong. A Moroccan air force was also formed in 1956 and a navy in 1960. The Soviet Union agreed in November, 1960, to supply Mig 15 and 17 jet aircraft for the Moroccan air force. 14 aircraft were delivered in February, 1961. They were accompanied by a party of technicians and instructors. The Moroccan Army has also received a consignment

of Russian small arms. The Army already possesses quantities of American, British and French equipment.

Production and Trade.—Morocco's main sources of wealth are agricultural and mineral. The construction of dams for irrigation and for electric power is an important factor in the country's development. Its industries are in the main extractive and such as rely on local raw materials. Importance is also attached to the tourist trade.

Among agricultural, forest and animal products in sufficient quantity for export are citrus fruits, early and canned vegetables, leguminous plants, esparto, vegetable fibre, cork, skins and hides, casings, raw wool, fish (preserved and canned). Livestock in 1960 included about 15,000,000 sheep, 6,000,000 goats, 2,500,000 cattle and smaller numbers of donkeys, camels, horses and pigs.

Morocco's leading mineral exports are phosphates, manganese, iron ore, lead and zinc. Other minerals produced include anthracite, petroleum, cobalt, graphite, copper, molybdenum, tin, antimony, ochre and gypsum. Production of phosphates reached 7,620,000 tons in 1960 and almost as much was exported. There is an oil refinery at Sidi Kacem and another is being built near Casablanca. Production of crude oil in 1960 amounted to 92,000 tons.

Morocco's main import requirements are: petroleum products, motor vehicles and tyres, building materials, fabrics, agricultural and other machinery, chemical products, clothing, household-ware, sugar, green tea and other foodstuffs.

The trade of Morocco, which is chiefly with France and the franc area, the U.S.A., Germany, Cuba, China, the United Kingdom, Spain, Italy, Netherlands and Belgium, was valued in 1960 at: Imports, DH 2,080,000,000; Exports DH 1,792,000,000 (dirham (DH) = 100 M. francs.).

Trade with U.K.*

	1959	1960
Imports from U.K.	£4,511,408	£4,929,219
Exports to U.K.	10,608,903	13,800,610

* Excluding Tangier Province

There are British Chambers of Commerce at Casablanca (101 Boulevard Mohammed el Hansali) and at Tangier (Boite Postale 2142, Socco).

TANGIER PROVINCE

	1959
Imports	M.fr.s.9,785,838,000
Exports	1,592,688,000

Trade with U.K.

	1959	1960
Imports from U.K.	£625,557	£289,680
Exports to U.K.	101,925	150,470

Finance and Currency.—A new unit of currency, the dirham (1 DH = M. francs 100) was introduced in October 1959, concurrently with the devaluation of the M. franc from M. francs 1,176 = £1 to M. francs 1,416.8 = £1. Future public accounting will be expressed in dirhams, the rate for which is thus: DH 14.168 = £1.

The 1961 Ordinary Budget amounted to DH 1,616,300,000 and the Development Budget to DH 451,100,000.

Communications: Railways.—The railway runs south from Tangier to Sidi Kacem. From this junction, one line runs eastwards through Fez and Oujda to Algeria, and another continues southwards, through Rabat and Casablanca, to Marrakesh. A line running due South from Oujda skirts the Morocco-Algeria frontier and reaches Colomb-Bechar in Algeria, the beginning of the Mediterranean-Niger project. Moroccan

railroads cover 1,092 miles and traction is electric or by diesel locomotives.

Roads.—In the former Southern Zone the road network is extensive (9,000 miles of road suitable for year-round traffic and some 20,000 miles of dry-season tracks). In the former Northern Zone an asphalt road links Tangier with Tetuan, branches north to Ceuta, and continues eastward through Villa San Jurjo to Mellila, and on to Oujda through Berkane.

Tangier is distant from London about 1,200 miles or a matter of hours by air, 4 days by sea. There are air services between Tangier and Gibraltar connecting with B.E.A. services to London. Air-France and Royal-Air-Maroc operate internal services and many between Morocco and towns in France and Spain. There are also regular services to other European countries and to Algeria, West Africa, Equatorial Africa and the Congolese Republic.

Language.—Arabic is the official language. Berber is the vernacular mainly in the mountain regions. French and Spanish are also spoken, mainly in the towns. The European population, about 500,000 in 1954, has since been much reduced by the departure of a large part of the French community. Three Arabic, five French and one Spanish newspapers are published daily.

Education.—There are government primary, secondary and technical schools. At Fez there is a theological university of great repute in the Moslem world. There is a secular university at Rabat. Schools for special denominations, Jewish and Catholic, are permitted and may receive government grants.

CAPITAL. Rabat (population 224,901). The other chief towns are: Casablanca (960,812); Marrakesh (241,900); Fez (215,812); Meknès (177,128); Tangier (141,926); Oujda (127,055); Tetuan (101,155); Kenitra (85,563); Safi (81,091). The towns of Fez, Marrakesh and Meknès were capitals at various times in Morocco's past history.

FLAG.—Red, with green pentagram (the Seal of Solomon).

MUSCAT & OMAN

(The Sultanate of Muscat and Oman)

Sultan, Said bin Taimur, born, Aug. 13, 1910, succeeded his father (as 13th of his dynasty to be Sultan of Muscat and Oman), Feb. 10, 1932.

The independent State of Muscat and Oman is situated at the easterly corner of Arabia. Its seaboard is nearly 1,000 miles long and extends from

near Tibat on the west coast of the Musandam Peninsula round to Ras Darbat Ali, with the exception of the stretch between Dibba and Kalba on the east coast of the peninsula which belongs to the Trucial Shaikhdom of Sharjah. Ras Darbat Ali marks the boundary between the Sultanate and the territory of the Sultan of Qishn and Socotra, a Sultanate within the Aden Protectorate. The Sultanate extends inland to the borders of the Rub'al Khali or "Empty Quarter" as the South-Eastern Arabian Desert is called. Physically, the Sultanate consists of 3 divisions, a coastal plain, a range of hills and a plateau. The coastal plain varies in width from 10 miles in the neighbourhood of Suwaiq to practically nothing in the vicinity of Matrah and Muscat towns, where the hills descend abruptly into the sea. The mountain range runs generally from north-west to south-east, reaching its greatest height in the Jebel Akhdar region where heights of over 9,000 feet occur. The hills are for the most part barren, but in the high area round Jebel Akhdar they are green and there is considerable cultivation. The plateau has an average height of 1,000 feet. With the exception of oases there is little or no cultivation. North-west of Muscat the coastal plain is known as the Batinah. It is fertile and prosperous, the date gardens extending for over 150 miles, Batinah dates (which ripen in the first half of July, well before the Basra dates) being famous for their flavour. The coast-line between Muscat and the province of Dhofar is barren and forbidding. The fertile province of Dhofar lies on the south-eastern coast of Arabia. Sugar cane is grown and cattle can be raised in this province, which is the only part of the Arabian peninsula to receive the benefit of the monsoon. Frankincense is also exported. Its principal town is Salalah on the coast, while ΨMurbat is the port. ΨGwadar, situated on the Baluchistan coast, formerly belonged to the Sultanate, but was transferred to Pakistan on September 8, 1958.

The town of Muscat is the capital and seat of Government of the Sultanate of Muscat and Oman, although the Sultan himself has stayed in Salalah since 1958. Possessing a natural harbour, though exposed to the north-west wind (*Shumal*), and at one time a town of some commercial importance, it has lost most of its trade, which has been transferred to the adjacent town of Matrah. Matrah is the starting point for the trade routes into the interior. Other ports on the Gulf of Oman are Sohar, Khaburah and Sur. None, however, provides sheltered anchorage.

The area of the Sultanate has been estimated as about 82,000 square miles and the population as 550,000. The inhabitants are for the most part Arab, but there is a strong infusion of negro blood, especially along the coast. The inhabitants of the towns of Muscat (pop. 3,500) and Matrah (pop. 8,500) are mostly of Baluchi and Negro stock. The Baluchis have originally mostly migrated from Mekran and the Negroes from Zanzibar. There are few Arab residents in these two towns. In the valleys of the interior, as well as on the Batinah, date cultivation has reached a high level, and there are possibilities of agricultural development if the water supply were more certain. A Development Secretary was appointed in 1958, and under his control much progress has been made in agriculture, public health, education and roads. The inland tribes breed large numbers of camel, which are prized in Arabia for their quality. There are no industries of importance.

The only port of call for steamers is ΨMuscat (one of the ports on the mail route between Bombay and Basra). 241 vessels of all nationalities

with a total tonnage of 771,447 entered the port in the foreign trade of Muscat in 1960. The mail service between Muscat and Basra is once every two or three weeks in each direction. The G.P.O. London, operates the post office in Muscat. The postage stamps are ordinary British stamps surcharged with their value in Indian currency. Cable and Wireless, Ltd., operates the telegraph office, and an automatic telephone service in Muscat and Matrah.

Inland transport is by pack animals. A motor road connects Muscat with Matrah and a motorable track extends to Khor Fakhan at the far end of the Batinah, a distance of 210 miles. There is also a motor road running up the Wadi Samail to the interior for about 180 miles. Hajar and Boshier are also connected by motorable tracks with Matrah. Cars run frequently between Muscat and the towns in the Batinah. Other routes are being developed, but none should be used without previous arrangement.

In December, 1951, a new treaty of friendship, to remain in force for 15 years, was signed between the United Kingdom and the Sultanate of Muscat and Oman.

FINANCE.

Annual Revenue (estimated).....Rs. 40,00,000

The common medium of exchange is the Maria Theresa dollar. On the coast the Indian Gulf rupee circulates, and is the official currency of the Sultanate, although not generally in use in the interior. There are also three denominations of copper coins, twenty, ten, and five, called "baizas." The normal rate of exchange is 170 baizas = 1 M.T. dollar = Rs. 3½ (approx.). The weights in use are one kiyas = the weight of six dollars or 5.9375 oz.; 24 kiyas = one Muscat maund; 10 maunds = one Farasala; 200 maunds = 1 Bahar. Rice is sold by the bag, other cereals by the following measurement: 40 Pals = one Farrah; 20 Farrahs = one Khandi.

Trade with U.K.

	1959	1960
Imports from U.K.....	£1,462,217	£707,677
Exports to U.K.....	10,028	15,242

Trade is mainly in the hands of Hindu Banias and Muslim Khojas, many of whom derive British nationality by descent, and is mainly to and from India and Pakistan. The chief imports are cereals, tea, cigarettes, matches, sugar and cotton piece goods. The chief exports are dates and limes.

CAPITAL, Ψ Muscat, population (estimated) 3,500.
Muscat—British Consul-General, J. F. S. Phillips.

NEPALESE EMBASSY IN LONDON

12A, Kensington Palace Gardens, W.8
[Bayswater: 1594]

Ambassador, His Excellency Kali Prasad Upadhyay (1961).

1st Secretary, Bharat Raj Bhandary.

Military Attaché, Col. Rabi Shamsher Jang Bahadur Rana.

Nepal (area about 54,000 sq. miles; pop. (1955), 8,337,537) lies between India and Tibet on the slopes of the Himalayas, and includes Mt. Everest (29,002 ft.). Amid the mountains lie many fertile valleys. The lower hills and Terai Plains are covered with jungle, in which wild animals abound. Rice, wheat, maize, etc., are grown. Katmandu, the capital, is connected with India by a road, the mountain section of which was built by India under the Colombo Plan.

Nepal exports rice and other grains, hides, oilseeds, ghi, cattle, jute, large quantities of timber, &c., and imports cotton goods and yarn, sugar, salt, spices, petrol, metals, &c. The revenue realized chiefly from land rent, forests, customs, &c., is approximately £5,500,000. A State Bank was inaugurated on April 26, 1956, to issue bank notes, regulate the Nepalese currency, fix foreign exchange rates and help in the preparation of a national budget.

The inhabitants are of mixed stock with Mongolian characteristics prevailing in the north and Indian in the south, and their religions are Buddhism and Hinduism. They were originally divided into numerous hill clans and petty principalities, one of which, Gorkha or Gurkha, became predominant in 1768. During the 1914-18 and the 1939-45 wars, the Nepalese Government rendered unstinted and unconditional assistance to the British Government.

From the middle of the nineteenth century, Nepal was ruled by the Rana family which provided the hereditary prime ministers of the country. After the Second World War, a revolutionary movement in 1950 and 1951 achieved the aim of restoring to the monarchy the powers which it had lost 104 years before and of breaking the hereditary power of the Ranas. After ten years, during which various parties and individuals tried their hand at government, King Mahendra resumed direct powers on December 15, 1960, with the object of leading a united country to basic democracy.

CAPITAL.—Katmandu (pop. 306,579).

FLAG.—Double-peaked standard of brown with blue border on peaks; white human face in centre of each peak.

Consul, A. G. Jonker.

Area and Population.—The Kingdom of the Netherlands is a maritime country of Western Europe, situated on the North Sea, in lat. 50° 46'–53° 34' N. and long. 3° 22'–7° 14' E., consisting of 12 provinces plus the North-East Polder (reclaimed part of the Zuider Zee) and containing a total area of 34,830 sq. kms. The population on Jan. 1, 1961, was 11,556,000. The live birth-rate in 1960 was 20.8 per 1,000 of the population, and the death-rate 7.6.

The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Scheldt. The chief agricultural products are potatoes, sugar beet, cattle, horses, swine, butter, wheat, rye, barley, oats, beans, peas, flax-seed, cheese, poultry, eggs, vegetables, fruit and flower bulbs and there is an important fishing industry. Among the principal industries are engineering, motors, shipbuilding, iron and steel, incandescent lamps, radio, electrical and telecommunications equipment, cotton, woollen, linen and rayon spinning and weaving, earthenware, glass, leather goods, boots and shoes, chemical and pharmaceutical products, oils, paper and board, cigars, sugar, "genever" liqueurs, beer, clothing, bicycles, tyres and rubber products. Production of coal (1960) was 12,498,000 metric tons; oil, 1,918,000 metric tons; and steel, 1,941,000 metric tons. Diamond-cutting, though still an important

industry, has declined considerably in importance, now employing about 655 hands, compared with about 3,500 before the war.

Government.—In 1815 the Netherlands became a constitutional Kingdom under King William I., a Prince of Orange-Nassau, a descendant of the house which has taken a leading part in the destiny of the nation since the 16th century. The States-General comprise the *Eerste Kamer* (First Chamber) of 75 members, elected for 6 years by the Provincial Diets; and the *Tweede Kamer* (Second Chamber) of 150 members, elected for 4 years by men and women voters of 23 years and upwards. Members of the *Tweede Kamer* are paid.

General elections were held on March 12, 1959, for the Second Chamber of the States-General. Party representation (after the increase in the Chamber's membership of Nov. 6, 1956) now stands at Catholic People's Party 49; Labour Party, 48; Liberal, 19; Anti-Revolutionary, 14; Christian Historical Union, 12; Communists, 3; Pacifist Socialists, 2; Political Reformed, 3. The present Cabinet was formed on May 19, 1959, after an interregnum of four months.

The Upper House of the States General was elected by the Provincial Councils after the General Elections. Representation (after the increase in the Chamber's membership of Nov. 6, 1956) is: Catholic People's Party, 25; Labour Party, 22; Anti-Revolutionary Party, 8; Christian Historical Union, 8; Party of Freedom and Democracy, 7; Communist, 4; Political Reformed Party, 1.

Defence.—The post-war army is a component part of the North Atlantic Treaty Organization. The Royal Netherlands Navy is being built up to a modern force of one aircraft carrier, 2 heavy cruisers, 12 modern destroyers and 6 submarines, supported by an escort force of 24 frigates and a considerable number of ancillary vessels. The Air Force, which since 1953 has been independent of the Army with the title "Royal Netherlands Air Force," has been reconstituted since the war, and now forms an integral part of the air defences of the N.A.T.O. countries. After a period of reorganization and expansion it has now attained a considerable strength consisting mainly of jet-fighters which are divided between an air defence and a tactical air command. Part of the latter is integrated into a N.A.T.O. tactical air force.

Language and Literature.—Dutch is a West-Germanic language of Saxon origin, closely akin to Old English and Low German. It is spoken in the Netherlands and the northern part of Belgium. It is also used by many people in the Netherlands West Indies. Afrikaans, one of the two South African languages, has Dutch as its origin, but differs from it in grammar and pronunciation. There are eleven national papers, four of which are morning papers, and there are several regional daily papers.

Education.—Illiteracy is practically non-existent. Primary and secondary education is given in both denominational and State schools, the denominational schools being eligible for State assistance on equal terms with the State schools. Attendance at primary school is compulsory. Secondary schools for working classes are numerous, well equipped and well attended. The principal Universities are at Amsterdam, Groningen, Leiden, Nijmegen (R.C.), and Utrecht, and there are technical universities at Delft (polytechnic), Rotterdam (economics), Wageningen (agriculture), Tilburg (R.C.) (commercial) and Eindhoven (polytechnic) (opened in Sept. 1957).

Communications.—The total extent of navigable rivers is 4,232 miles (large rivers comprising

696 miles) and of main roads approximately 2,830 miles. On Jan. 1, 1961, the total length of the railway system amounted to 2,018 miles, of which 1,015 miles were electrified. The mercantile marine on Jan. 1, 1961, consisted of 1,734 ships of total 4,604,000 gross registered tons, including vessels registered in the Netherlands Antilles and Surinam, but excluding tugs and contractors' equipment. The total length of air routes covered by K.L.M. (Royal Dutch Airlines) in the summer of 1960 was 164,500 miles.

TRADE

During 1960 further progress was made towards the establishment of the European Economic Community, as established by the Treaty of Rome in 1957, between France, Germany, Italy and the Benelux countries (Belgium, Luxemburg and the Netherlands, which already form a customs union).

The Netherlands has removed quantitative restrictions on the great majority of imports in accordance with the agreement between O.E.E.C. countries. On July 1, 1960, the extent of liberalization was 97 per cent. (agricultural produce 89.8 per cent.; raw materials 99.5 per cent. and manufactured products 96.6 per cent.). 94 per cent. of imports from dollar countries were liberalized.

The rate of overall production in the Netherlands rose from 138 to 157 in 1960 and that of production per worker from 127 to 140 (1953 = 100).

In 1960 Dutch imports amounted to Fl. 17,217,000,000 and exports to Fl. 15,305,000,000 so that imports were covered by exports to the extent of 88.9 per cent. Imports from the United Kingdom during 1960 amounted to Fl. 1,183,401,000 and exports to Fl. 1,167,058,000.

BRITISH CONSULAR OFFICES

There are British Consulates-General in Amsterdam and Rotterdam, and Consular Officers at Willemstad and Aruba in the Netherlands Antilles and at Paramaribo in Surinam.

BRITISH COUNCIL

Representative, E. R. H. Paget, O.B.E., 343 Keizersgracht, Amsterdam.

OVERSEAS TERRITORIES

I. Netherlands New Guinea:—

The territory of Netherlands New Guinea (estimated population 1956, 730,000), comprises the western half of the island of New Guinea. Mount Wilhelm is the highest point in Oceania.

It was decided at the Round Table Conference between Holland and Indonesia that the future status of New Guinea would be decided by negotiation between the two parties within a year of the transfer of sovereignty to Indonesia on December 27, 1949. A joint Dutch-Indonesian Commission was formed to investigate the facts of the case, and reported back to the two Governments in 1950. As a result of the failure of the two sides of the Commission to agree, the position of New Guinea remains unchanged under Dutch sovereignty. Exports to the United Kingdom in 1960, £45,347; imports, £291,456. Governor of Netherlands New Guinea, Dr. J. Platteel.

II Netherlands West Indies:—

"Nederlandsch West-Indië" comprise Surinam (Dutch Guiana) in South America, and certain islands in the West Indies known as the Netherlands Antilles (Curaçao, Bonaire, Aruba, part of St. Martin, St. Eustatius, and Saba). The area of Surinam is about 54,000 sq. miles, with a population in 1952 of about 237,930; area of Netherlands Antilles, 394.1 sq. miles, with a population of 190,340 at January 1, 1958. Under the Realm Statute which took effect on December 29, 1954, Surinam and the Netherlands Antilles received autonomy in domestic affairs, as parts of the Netherlands Realm under the Crown. Agreement on their new status was reached after prolonged negotiations between the Netherlands Government and representatives of the territories concerned. Bauxite is an important export of Surinam. The Netherlands Antilles has a considerable trade with the United Kingdom:

Trade with U.K.

	1959	1960
Netherlands Antilles		
Imports from U.K....	£9,456,968	£7,516,388
Exports to U.K....	25,399,111	22,697,612
Surinam		
Imports from U.K....	£1,313,845	£1,596,324
Exports to U.K....	39,468	39,150

The administrative capital of Surinam is Paramaribo (population, 1952, 86,400); the capital of Curaçao is Ψ Willemstad (pop. 45,000) of Aruba, Ψ Oranjestad; of Bonaire, Ψ Kralendijk; of St. Martin, Philipsburg; of St. Eustatius, Oranjestad; and of Saab, Bottom. Governor of Netherlands Antilles, Dr. A. B. Spekenbrink. Governor of Surinam, J. van Tilburg.

NICARAGUA

(República de Nicaragua)

President, Col. Luis Somoza, re-elected Feb. 2, 1957.
Foreign Affairs, Dr. Alejandro Montiel Argüello.

Area and Population.—Nicaragua is the largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45'–15° N. lat. and 83° 40'–87° 38' W. long., containing an area of 57,145 English square miles and a population (1960 estimate) of 1,474,549, of whom about three-quarters are of mixed blood. Another 15 per cent. are white, mostly of pure Spanish descent, and the remaining 10 per cent. are Indians or negroes. The latter group includes the Mosquitos, who live on the Atlantic Coast and were formerly under British protection.

Government.—The eastern coast of Nicaragua was touched by Columbus in 1502, and in 1519 was overrun by Spanish forces under Davila, and formed part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. The present constitution took effect on May 1, 1951. The President is elected by direct suffrage for six years. Congress comprises a Senate of 16 members (together with ex-Presidents of the Republic) and a Chamber of Deputies of 42 members.

Agriculture and Industry.—The country is mainly agricultural. The major crops are coffee, cotton, sesame, sugar, rice and maize. Bananas, beans, cocoa and ipecacuanha are also important. Livestock and timber production, already considerable, are capable of unlimited expansion. Nicaragua possesses deposits of gold and silver, both of which are mined and exported by United States and Canadian concessionaires.

Communications.—There are 270 miles of railway all on the Pacific side, 3,159 miles of telegraph and 3,271 miles of telephone, and there are several powerful wireless stations at Managua. An automatic telephone system has been installed in the capital. Transportation, except on the Pacific slope, is still attended with difficulty but many new roads have either been opened or are under construction. The Inter-American Highway runs from the Honduras frontier in the north to the Costa Rican border in the south; the interoceanic highway, running laterally from Corinto on the Pacific coast to Rama, whence there is a natural waterway to Bluefields on the Atlantic, is progressing and admits of a through passage in dry weather.

Until the advent of aircraft, the Atlantic littoral was practically isolated from the rest of the Republic and the chief centres of population, but LANICA Airways now have a daily service between Managua and the Atlantic littoral.

Language and Literature.—The official language of the country is Spanish. In 1961 there were 5 daily newspapers published at Managua, and 4 in the provinces. Education is backward, at least 60 per cent. of the population being illiterate. There are universities at León and Managua.

NIGER

(Republic of Niger)

President, Minister for Foreign Affairs and Minister of National Defence, Hamani Diori, elected for five years, November 9, 1960.

President, National Assembly, Boubou Hama.

Situated in West Central Africa, between 12° and 24° N. and 0° and 16° E., Niger has common boundaries with Algeria and Libya in the north, Chad in the east, Nigeria and Dahomey in the south, and Mali and the Voltaic Republic in the west. It has an area of about 484,000 square miles with a population estimated in 1959 at 2,800,000. Apart from a small region along the Niger Valley in the south-west near the capital the country is entirely savannah or desert. The main races in Niger are the Haussas in the east, the Djerms in the south-west and the nomadic Touaregs in the north.

The first French expedition arrived in 1891 and the country was fully occupied by 1914. It decided on December 18, 1958, to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 3, 1960. Special agreements with France, covering financial and cultural matters technical assistance, defence, etc., were signed in Paris on April 24, 1961.

The constitution of Niger, adopted on November 8, 1960, provides for a presidential system of government, modelled on that of the United States and the French Fifth Republic, and a single Chamber National Assembly, whose life was extended under the terms of the constitution for a further period of five years. Niger is a member of the *Conseil de l'Entente* (see Ivory Coast). The official language is French.

Finance and Trade.—Revenue in 1960 totalled francs CFA 4,928,000,000 and expenditure francs CFA 5,828,000,000. Total value of trade in 1959 was: Imports, francs CFA 1,787,000,000; Exports francs CFA 2,851,000,000. The currency of Niger is the Franc CFA (50 francs CFA = 1 French N.F.). Cattle-rearing and the cultivation of groundnuts are the main industries and provide the two main exports.

CAPITAL.—Niamey (30,200).

FLAG.—Three horizontal stripes, orange, white and green with an orange disc in the middle of the white stripe.

BRITISH AMBASSADOR (see Ivory Coast).

NORWAY

(Norge)

King, Olav V, K.G., G.C.B., b. July 2, 1903; succeeded, Sept. 21, 1957, on death of his father King Haakon VII, married March 21, 1929, Princess Märtha of Sweden (born March 29, 1901; died April 5, 1954); having issue, Harald (see below) and two daughters.

Heir-Apparent, H.R.H. Prince Harald, b. Feb. 21, 1937.

CABINET

(January 22, 1955)

Prime Minister, M. Einar H. Gerhardsen.

Foreign Affairs, M. Halvard M. Lange.

Defence, M. Gudmund Harlem.

Justice and Police, M. Jens Haugland.

Finance and Customs, M. Peter Bjerve.

Social Affairs, M. Olav Brautk.

Consulate-General, 42 Lancaster Gate, W.2.

Consul-General, M. G. F. C. Collin.

Consul, M. A. A. Boustoun.

Vice-Consul, M. A. Petersen.

Area and Population.—Norway ("The Northern Way"), a kingdom in the northern and western portion of the Scandinavian peninsula, was founded in 872. It is 1,752 km. in length, its greatest width about 430 km. The length of the coastline is 2,650 km., and the frontier between Norway and the neighbouring countries is 2,555 km. (Sweden 1,643 km., Finland 716 km. and U.S.S.R. 196 km.). It is divided into 20 counties (*fylker*) and comprises an area of 323,917 sq. km. with a population (1959) of 3,572,000. In 1958 there were 62,985 births (17.9 per 1,000 inhabitants), 31,645 deaths (9.0 per

1,000) and 23,931 marriages (6.8 per 1,000); the infant mortality rate in 1958 was 20.0 per 1,000 live births.

The Norwegian coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. At the North Cape the sun does not appear to set from the second week in May to the last week in July, causing the phenomenon known as the *Midnight Sun*; conversely, there is no apparent sunrise from about Nov. 18 to Jan. 23. During the long winter nights are seen the multiple coloured *Northern Lights* or *Aurora Borealis*, which have a maximum intensity in a line crossing North America from Alaska to Labrador and Northern Europe to the Arctic coast and Siberia. A similar phenomenon occurs in the Antarctic and is known as *Aurora Australis*.

Production.—The cultivated area is about one-fortieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains.

The *Gulf Stream* pours from 140 to 170 million cubic feet of warm water per second into the sea around Norway and causes the temperature to be higher than the average for the latitude. It brings shoals of herring and cod into the fishing grounds and causes a warm current of air over the west coast, making it possible to cultivate potatoes and barley in latitudes which in other countries are perpetually frozen.

The chief industries are agriculture and forestry, mining, manufactures, fisheries, whaling and shipping. The most recent figures showed that 34 per cent. of the population lived on industry, 22 per cent. on agriculture and forestry, 9 per cent. on trading, 9 per cent. on transport and communications and 6 per cent. on fishery and whaling. Manufactures are aided by great resources of water power, estimated at 12,500,000 kw. at 75 per cent. efficiency, of which over 3,200,000 kw. are utilized. In normal years the quantity of fish caught by Norwegian fishing vessels is greater than that of any other European country except U.S.S.R. In 1958 the total catch amounted to 1,370,000 metric tons. Whale oil production, chiefly from pelagic whaling in the Antarctic, was 863,000 barrels in 1959.

Government.—From 1397 to 1814 Norway was united with Denmark, and from Nov. 4, 1814, with Sweden, under a personal union which was dissolved on June 7, 1905, when Norway regained complete independence. Under the constitution of May 17, 1814, the *Storting* (Parliament) itself elects one-quarter of its members to constitute the *Lagting* (Upper Chamber), the other three-quarters forming the *Odelsting* (Lower Chamber). Legislative questions alone are dealt with by both parts in separate sittings.

On April 8-9, 1940, Germany invaded Norway, and it was not until June 7, 1945, that the late King Haakon was able to return from Great Britain to Oslo.

Defence.—Norway is a member of the North Atlantic Treaty Organization, and the Headquarters of Allied Forces, Northern Europe, is situated near Oslo. Extensive reorganization of the Norwegian armed forces is in progress. Compulsory national service lasts 18 months in the navy and air force and 16 months in the Army.

Education is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid. Secondary

schools are provided by the State, by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Oslo (opened in 1811) was attended by 5,161 students and the University of Bergen (opened in 1948) by 929 students in 1959. The State Institute of Technology in Trondheim possesses University status and awards degrees in engineering and architecture. In 1959 it was attended by 1,433 students.

Language and Literature.—Norwegian is a branch of the Scandinavian languages and is the language of the mainland and of Svalbard. Old Norse literature is among the most ancient (and the richest) in Europe. Modern Norwegian became formed in the time of the Reformation and Ludwig Holberg (1684-1754) is regarded as the founder of Norwegian literature, although modern Norwegian literature dates from the establishment of a national university at Christiania (Oslo) in 1811 and with the writings of Wergeland (1805-1845). Some of the famous names are Henrik Ibsen (1828-1906) the dramatist, Bjørnstjerne Bjørnson (1832-1910) journalist, dramatist and novelist and Nobel Prize-winner in 1903, Jonas Lie (1833-1908) novelist, Knut Hamsun (1859-1952) novelist and Nobel Prize-winner in 1920, and Sigrid Undset (1882-1949), champion of Norwegian womanhood and herself a Nobel Prize-winner in 1928. In 1958 there were 87 daily newspapers in the country with a total circulation of 1,298,000, and 90 newspapers publishing on two or three days a week with a total circulation of 335,000.

Communications.—The total length of railways open in 1959 was 4,492 km., of which 77 were private lines. The length of telegraph and telephone lines in 1959 was 86,110 km. (State, 79,956) with 3,584,000 km. of wire (State, 3,369,000). At the end of 1959 a total of 462,863 road motor vehicles were registered, of which 192,377 were passenger cars (including taxis) and 151,516 were motor cycles.

Civil Aviation.—On scheduled airlines operated by Scandinavian Airlines System (SAS) on behalf of Det Norske Luftfartsselskap (DNL), by Braathens South American and Far East Airtransport (SAFE), and by Widerøes Flyveselskap A.S. in 1959:—kilometres flown, 19,436,000; passengers carried, 577,790.

Mercantile Marine.—The Mercantile Marine, Jan. 1, 1960, consisted of 2,209 vessels of 10,486,000 gross tons (vessels above 100 gross tons, excluding fishing boats, floating whaling factories, tugs, salvage vessels, icebreakers and similar types of vessel). The fleet ranks fourth among the merchant navies of the world.

SVALBARD

(Spitsbergen and Bear Island)

By Treaty (Feb. 3, 1920) the sovereignty of Norway over the Spitsbergen ("Pointed Mountain") Archipelago was recognized by the Great Powers and other interested nations, and on Aug. 4, 1925, the Archipelago was officially taken over by Norway. In September, 1941, Allied forces (British, Canadian and Norwegian) landed on the main island. After destruction of the accumulated stocks of coal and dismantlement of mining machinery and the wireless installation, the Norwegian inhabitants (about 600) were evacuated to a British port and the Russians (about 1,500) to the U.S.S.R. After the war the Norwegian mining plants were rebuilt. In 1956 the production of coal, the chief mineral of the archipelago, was 390,000 tons.

The Svalbard Archipelago lies between 74°-81° N. lat. and between 10°-35° E. long., with an estimated area of 24,295 square miles. The archipelago consists of a main island, known as West Spitsbergen (15,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the mainland by Olga Strait; Barents and Edge Islands, separated from the mainland by Stor Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S.; with many similar islands in the neighbourhood of the main group. In addition to those engaged in coal-mining, the archipelago is also visited by hunters for seal, foxes and polar bears.

* Boundaries extended, January 1, 1958.

South Cape is 360 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsø, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsø to Green Harbour 2½ to 3 days; from Aberdeen 5 to 6 days.

JAN MAYEN, an island in the Arctic Ocean (70° 49'—71° 9' N. lat. and 7° 53' 9" 5' W. long.) was joined to Norway by law of Feb. 27, 1930.

Norwegian Antarctic

BOUVET ISLAND (54° 26' S. lat. and 3° 24' E. long.) was declared a dependency of Norway by law of Feb. 27, 1930.

PETER THE FIRST ISLAND (68° 50' S. lat. and 90° 35' W. long.), was declared a dependency of Norway by resolution of Government, May 1, 1931.

PRINCESS RAGNILD LAND (from 70° 30' to 68° 40' S. lat. and 24° 15' to 33° 30' E. long.) has been claimed as Norwegian since Feb. 17, 1931.

QUEEN MAUD LAND.—On Jan. 14, 1939, the Norwegian Government declared the area between 20° W. and 45° E., adjacent to Australian Antarctica, to be Norwegian territory.

There are Consular Offices of the Republic at Newcastle, Glasgow and Birmingham.

Panama on the isthmus of that name which connects N. and S. America, was formerly one of the nine Departments of Colombia. After a revolt (Nov. 3, 1903) it declared its independence and established a separate Government, with a single chamber legislature elected every four years and now consisting of 53 elected members. The area of the Republic is 31,890 sq. m., the population, according to preliminary figures of the 1960 census, was 1,067,766. The birth rate in 1959 was 40.8 and the death rate 9.2 per thousand. The soil is extremely fertile, but nearly one-half of the land is uncultivated. The chief crops are bananas, coconuts, cacao, coffee and cereals. The shrimping industry plays an important rôle in the Panamanian economy. A railway 47 miles in length joins the Atlantic and Pacific oceans.

Education is compulsory and free from 7 to 15 years. In 1960-61 there were 1,215 official primary schools and 83 private primary schools; 27 official secondary and 100 private secondary schools. Primary students numbered 161,800 in 1960-61; secondary students, 38,874. There were 7,534 students at Panama University.

Language and Literature.—The official language is Spanish. There are 8 daily newspapers published in the capital, 2 of which print editions in English. There is also one English and one Spanish weekly newspaper.

THE PAPAL STATE

(Stato della Città del Vaticano)

Sovereign Pontiff (261st), His Holiness Pope John XXIII (Angelo Giuseppe Roncalli), born at Sotto il Monte (Bergamo), Nov. 25, 1881, elected Pope (in succession to Pius XII) Oct. 28, 1958.

Secretary of State, Cardinal Amleto Cicognani, appointed Aug. 14, 1961.

The office of the ecclesiastical head of the Roman Catholic Church (*Sancta Sede* or Holy See) is vested in the Pope of Rome, the Sovereign Pontiff. For many centuries the Sovereign Pontiff exercised temporal power, and in 1859 the Papal States had an area of 17,218 square miles, with a population of 3,124,688. During the reign of Pius IX. (1846-1878), the Papal States of Romagna, Umbria and the Marches were in-

corporated in the Kingdom of Sardinia and with the remaining States (Rome, Comacchio, Viterbo, Civita Vecchia, Velletri and Frosinone) became part of Unified Italy in 1870. The territory of the Papacy was confined to the palaces of the Vatican and the Lateran and the Villa of Castel-Gandolfo, and the temporal power of the Pope was in suspense until the treaty of Feb. 11, 1929, which recognized the full and independent sovereignty of the Holy See in the City of the Vatican. Accompanying the treaty were conventions regulating the condition of religion and of the Catholic Church in Italy and agreeing to pay 750,000,000 lire in cash and the income at 5 per cent. on 1,000,000,000 lire State bonds as a final settlement of the claims of the Holy See against Italy for the loss of temporal power. The population of the Vatican City at the census in March, 1947, was 940.

PARAGUAYAN EMBASSY IN LONDON

518 Cornwall Gardens, S.W.7
[Western: 1253]

Ambassador in London, His Excellency Dr. Ramiro Recalde de Vargas (1960). Consul-General, Sr. Oscar Barrios Arce. There are Paraguayan Consulates in London and Liverpool.

Area and Population.—Paraguay is an inland sub-tropical State of South America, situate between Argentina, Bolivia and Brazil. The area is computed at 157,000 square miles, with a population (1950 Census) of 1,408,000.

Paraguay proper consists of a series of plains, intersected by abrupt ranges of hills, some of which reach an altitude of 2,000 to 3,000 feet above sea level. The Paraguay and Alto Paraná rivers are navigable at all seasons for vessels of 6 to 7 feet draught. Many of the tributary streams are also navigable for much of the year. The Pilcomayo river is navigable for small craft for 180 miles from Asunción; but is liable to shrink unduly with drought. Paraguay is a country of grassy plains and dense forest, the soil being marshy

in many parts and liable to floods: while the hills are covered for the most part with immense forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence are extensive marshes, one of which, known as "Neembucu," or "endless," is drained by Lake Ypoa, a large lagoon, south-east of the capital. The Chaco, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivia, formed the subject of a long-standing dispute with that country and led to war between Paraguay and Bolivia from 1932 to 1935. The Chaco is practically a dead level, though a slight and uniform rise westward is now known to exist: it suffers much from floods and still more from drought.

Government.—Paraguay was visited in 1527 by Sebastian Cabot, and in 1535 was settled as a Spanish possession. In 1811 Paraguay declared its independence of Spain.

The Senate was abolished under the constitution adopted in 1940 and replaced by a Council of State nominated by the government. The Chamber of Representatives comprises 40 members. In 1954 women were accorded civil rights.

Production.—About three-quarters of the population are engaged in agricultural and pastoral pursuits, cattle breeding being the principal industry. In addition to canned meat, timber, quebracho extract, cotton, hides, yerba maté, tobacco, and petit grain essence (which are the principal exports), mandioca, sugar, maize, rice, citrus fruits and edible oils are also produced for home consumption. Grape fruit is now exported. The production of rice, wheat and ground nuts is being encouraged by the government. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find a market abroad.

Communications.—A railway, 985 miles in length, connects Asunción with Buenos Aires. The journey takes 55 hours. Train ferries enable the run to be accomplished without break of bulk. River steamers also connect Buenos Aires and Asunción (3 to 5 days). Direct shipping services operate frequently between Hamburg, Antwerp, Amsterdam and Asunción, and monthly between Liverpool, London and Asunción. A shipping service from New York was started early in 1955. Five airlines operate services from Asunción. Aerolíneas Argentinas operates a service with Sunderland flying-boats six times weekly between Asunción and Buenos Aires, stopping at Corrientes. Twice a week this service also calls at the river ports of Rosario and Formosa, and once a week at Posadas. There are also landplane services twice a week. Braniff (American) has a bi-weekly service through Asunción between Buenos Aires and the United States (calling also at Lima and La Paz). Panair do Brasil, a Brazilian company affiliated to Pan American Airways, operates a twice weekly service between Asunción and Rio de Janeiro, and weekly services between Asunción and Buenos Aires and Santiago. Pluma (Uruguayan) carries on a twice-weekly service between Montevideo and Asunción, while Real, another Brazilian airline, operates a service five times a week between Rio de Janeiro and Asunción, calling at São Paulo and Foz de Iguaçu. There are about 100 miles of asphalted roads in Paraguay, and about 200 miles of earth roads in fairly good condition. Bus services connect the principal towns.

Defence.—There is a permanent military force of about 8,000 all ranks. Two gunboats and a number of torpedo boats patrol inland waters.

Language and Literature.—The language of the country is Guarani (the idiom of the most advanced tribe of Indian inhabitants with whom the Spanish explorers formed an alliance) but Spanish is spoken in the larger towns. Three daily newspapers are published in Asunción.

Education.—Primary education is free and compulsory. There are a few secondary and special schools and a national university with close on 2,000 students.

Area and Population.—Persia comprises an area of 628,000 sq. miles, with a population estimated at 18,900,000 in the 1956 census. It is mostly an arid table-land, encircled, except on the east, by mountains, the highest in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert.

The Persians are mostly Shi'ah Moslems but amongst them are a few hundred thousand Zoroastrians, Bahais, Sunni Moslems and Armenian Christians. There is also a substantial Jewish community. Civil and Penal codes based on those of France and Switzerland are in force.

Government.—Persia was ruled from the end of the 18th century by Shahs of the Qajar Dynasty, with despotic power, subject only to the influence of interpreters of the sacred law. A nationalist movement became active in Dec., 1905, and in Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution. After the war of 1914–18, the subsequent troubles and the signature of the Soviet-Persian Treaty of 1921, a vigorous Prime Minister, Reza Khan, formerly an officer of the Persian Cossack Regiment, re-established general order. On Oct. 31, 1925, the last representative of the Qajar Dynasty, Sultan Ahmed Shah who had been absent from the country for some time, was deposed by the National Assembly, which handed over the

* On Oct. 26, 1949, it was announced that foreigners might henceforth use the name Persia.

government to the Prime Minister, Reza Khan, who was elected Shah on Dec. 13, 1925, by the Constituent Assembly, and took the title Reza Shah Pahlavi.

Owing to Nazi German penetration before and during the early part of the war of 1939-45, the Shah and his Government tended so far to favour the Axis powers that, after the German invasion of the U.S.S.R. In 1941, counter-measures became necessary; British and Soviet Forces entered the country from south and north on August 25, 1941, and expelled the agents of the Axis. On September 16, 1941, Reza Shah abdicated and left the country, nominating the Crown Prince as his successor. The Prince ascended the throne under the title of Mohammad Reza Shah Pahlavi.

Under the Anglo-Soviet-Persian Treaty of Alliance of January 29, 1942, the independence and territorial integrity of the country were guaranteed by the United Kingdom and the U.S.S.R. Evacuation by the forces of both powers was to take effect within six months of the signature of the armistice with Germany and her associates. On September 9, 1942, Persia declared war on the Axis powers and on February 28, 1945, on Japan. During the remainder of the war with Germany, Persia became one of the principal routes of aid to the Soviet Union. United States Forces, which had joined British and Soviet troops in Persia to participate in the delivery of aid to Russia, were withdrawn from the country at the end of 1945. British troops evacuated Persia, in accordance with the Anglo-Soviet-Persian agreement, by March 2, 1946, six months after the conclusion of hostilities with Japan. Soviet troops, nevertheless, remained; and when Communist disturbances took place in the north-west part of Persia known as Azerbaijan, they refused to allow Persian forces to enter the area, with the result that an autonomous government was established at Tabriz. Soviet forces, however, eventually left the country in the month of May. This belated evacuation took place in accordance with an agreement which included provision for the formation of a Perso-Soviet Oil Company to operate in the north of Persia, subsequently rejected by the Majlis, and an understanding that the question of Azerbaijan should be peaceably settled. In December, 1946, Persian Government forces entered the province, virtually unopposed by the partisans of the autonomous Government, which itself collapsed upon the flight of the revolutionary leaders into the Soviet Union.

In March, 1949, the Shah issued an Imperial Firman convoking a Constituent Assembly to make certain revisions to the Constitution and the Assembly was duly elected and convened on April 21. After this Assembly the Senate was formed for the first time.

On March 17, 1951, the Majlis adopted a Bill for the nationalization of the Persian oil industry, and on March 20, the Bill was approved by the Senate. On April 28, the Majlis agreed to a resolution, which was passed on April 30 by the Senate, recommending the immediate taking over of all installations, including those of "the late Anglo-Iranian Oil Company." On April 29 the Shah appointed Dr. Mussadiq Prime Minister. The oil company sought arbitration, but this was rejected by the Persian government, and on May 26 the British government applied to the International Court of Justice at The Hague for a declaration that this refusal to submit to arbitration was illegal. The application was not approved.

In August, 1953, after the Shah had appointed Gen. Zahedi as Prime Minister, fighting broke out between his followers and those of Dr. Mussadiq.

The Shah temporarily left the country, but Gen. Zahedi's forces were successful, and Dr. Mussadiq was arrested together with a number of the members of his former Cabinet. In December, 1953, diplomatic relations with Great Britain, which Persia had broken off in October, 1952, were re-established, and in August, 1954, the oil dispute was settled by an agreement, ratified on October 29, which provided for compensation to the A.I.O.C. and for the production, refining and sale of Persian oil by a Consortium in which the A.I.O.C. have a 40 per cent. share (*Production and Industry*, below). In November, 1955, Persia joined the Baghdad Pact, later Central Treaty Organization (CENTO).

For the purposes of local government the country is divided into 21 Provinces (*Ustans*) comprising 76 Sub-Provinces (*Shahristsans*), under Governors-General and Governors, respectively.

Defence.—The present strength of the Persian Army, mainly conscript, is approximately 185,000, including 10,000 officers and 40,000 N.C.O.'s. The N.C.O. cadre is up to establishment but officers are still under strength. The army, to which is attached a U.S. Advisory Mission, is well-equipped by 1939 standards and comprises 12 divisions and ancillary troops grouped in 6 corps. The present strength of the Air Force is approximately 5,000. It is equipped with about 200 American aircraft, of which 60 are jet ground attack types.

The gendarmerie, to which is also attached a United States Mission, has been reorganized. The Persian Navy consists of a small fleet of frigates, landing craft and motorboats in the Persian Gulf and the Caspian Sea.

Education.—Since 1943 primary education has been compulsory and free. There are over 9,000 schools, 1,700,000 pupils, and also a few foreign schools in Tehran; there are Universities in Tehran and Tabriz, and University Colleges at Isfahan, Meshed and Shiraz.

Language and Literature.—Persian, or Farsi, the language of Iran, and of some other areas formerly under Persian rule, is an Indo-European tongue with many Arabic elements added; the alphabet is mainly Arabic, with writing from right to left. Among the great names in Persian literature are those of Abu'l Kāsim Mansūr, or Firdausi (A.D. 939-1020), Omar Khayyām, the astronomer-poet (died A.D. 1122), Muslihū'd-Dīn, known as Sa'dī (born A.D. 1184) and Shems-ed-Dīn Muhammad, or Hafiz (died A.D. 1389). The Persian Press consists of a large number of Tehran and provincial newspapers and periodicals. Two Tehran dailies and three weeklies have circulations exceeding 20,000 copies. Circulations in the provinces are very small. English and French dailies are published in Tehran.

The commercial rate of exchange was stabilised in 1955 as follows: Bank Mellī buying rate: *Rials* 210 = £1. Selling rate *Rials* 214.2 = £1. The official rate of Exchange is *Rials* 75 = \$1.

Production and Industry.—While petroleum is the principal product and by far the greatest export, Persia, except for its desert areas, is essentially an agricultural country and 80 per cent. of the inhabitants depend for their living on the land. Sheep

and goats are numerous and good wool is produced. There are extensive forests in the north and west, the conservation of which is an urgent problem. The cultivation of opium is prohibited. A certain amount of progress has been made in the development of industry. Apart from petroleum, the principal industries are carpet weaving, cotton spinning, spinning and weaving (Isfahan, Tehran and Shahi areas), wool spinning and weaving, jute sacks, silk goods (Chalus), sugar, tea, fruit, caviar (Caspian Fisheries Company), meat canning, distilling and brewing, tobacco and cigarettes. The oilfields had produced over 200,000,000 metric tons of oil from their first output to Dec. 31, 1946, and subsequent figures (in metric tons) were 1946, 19,858,471; 1947, 21,737,949; 1948, 24,871,000; 1949, 26,807,000; 1950, 35,000,000; 1951 (to Oct.) 17,000,000. Oil shipments were resumed on Oct. 30, 1954, and recent production figures have been (long tons): 1955, 15,772,000; 1956, 25,934,000; 1957, 37,800,000; 1958, 39,800,000; 1959, 44,700,000; 1960, 51,000,000.

The former functions of A.I.O.C. (now renamed "British Petroleum Company") in Persia were taken over for an initial period of 25 years by a consortium of 8 oil companies (including A.I.O.C., one French, one Dutch and five U.S.), A.I.O.C. receiving from Persia £25,000,000 cash in the 10 years from Jan. 1, 1957, in compensation for its oil assets in Northern Persia and in settlement of losses since 1951; and from the other members of the consortium for their shares, about £214,000,000 payable over 20-25 years. The consortium is responsible for the production, refining and sale of Persian oil through two operating companies, while "non-basic" operations are undertaken by the National Iranian Oil Company.

Communications.—The principal roads are from the frontier of Iraq at Khusravi to Tehran; from Tehran *via* Arak to Ahwaz and Khorramshahr; from Tehran *via* Qum, Isfahan and Shiraz to Bus-hire; from Tehran into Azerbaijan, through Tabriz to Julfa (on the Soviet frontier) with branch roads into Turkey and Northern Iraq; from Tehran to Meshed; three roads through the Elburz mountains to the Caspian coast and the Soviet borders east and west of the Caspian Sea; and from Isfahan, *via* Yazd and Kerman to Zahidan and thence to Meshed. Zahidan is connected by road with Quetta (Pakistan). Some of these roads traverse extremely difficult mountainous country; others are desert tracks. Generally speaking, Persian roads are not-asphalted but gravel-surfaced. Railways have been constructed since 1927. The *Trans-Iranian Railway*, from Bandar Shah, on the Caspian Sea, to Bandar Shapur, on the Persian Gulf, was inaugurated in 1938; this line has a total length of 872 miles, the total cost, after eleven years' work, being approximately £30,000,000. The branch lines from Tehran to Meshed and to Tabriz have now been completed. There are also railroads from Tabriz to Julfa and from Zahidan to Mirjawa and branch lines from Ahwaz to Khorramshahr and from Khorramshahr to Tanuma in Iraq (on the Shatt el Arab, opposite Basra) were opened during the war. An extension from Qum to Kashan is now in operation as is one from Bandar Shah to Gorgan.

Civil Aviation.—In May, 1946, a Department of Civil Aviation was created, subordinate to the Ministry of Roads. Progress has been made towards establishing first-class International Airports at Tehran and Abadan, with secondary airfields in accordance with ICAO standards. *Iranian Airways* (non-government owned) formed in May, 1946, runs services to some Middle Eastern countries as well as internal services. *Persian Air Services*

(independently owned) formed in late 1954, runs non-scheduled passenger and freight services to adjoining countries and also to Europe. Air France, K.L.M., S.A.S., Iraqi, M.E.A., P.A.A., Lufthansa, B.O.A.C., Alitalia and Aryana Airways operate services to Tehran.

TRADE

	1958-59	1959-60

PERUVIAN EMBASSY IN LONDON

52, Sloane Street, S.W.1

[Belgravia: 1917]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Don Ricardo Rivera Schreiber, K.B.E. (1954).

1st Secretary, Señor Don Hubert Wieland.

Air Attaché, Gen. J. Melgar.

Consul-General, Señor Don Luis R. Méndez.

Consul-General, Liverpool (24 Sir Thomas Street), Señor Don Victor Pezet.

Vice-Consuls, Señor Guillermo Nieto; Señor Jaime Cáceres.

There are Consulates at Hull, Birmingham and Glasgow.

Area and Population.—Peru is a maritime Republic of South America, situated between $0^{\circ} 00' 48''$ and $18^{\circ} 21' 00''$ S. latitude and between $68^{\circ} 39' 27''$ and $82^{\circ} 20' 13''$ W. longitude. The area of the Republic, including 4,440 square kilometres of the Peruvian section of Lake Titicaca and 32 square kilometres of the coastal islands, is about 531,000 square miles. The total population on June 30, 1959, was estimated at 10,524,000. In 1959 there were 367,412 births, 101,519 deaths and 38,371 marriages.

Physical Features.—The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points in the Peruvian sector being Huascaran (22,211 feet), Huanaboy (20,855 feet), Ausangate (20,235 feet), Arequipa (or Misti) volcano (18,364 feet), Hualcan (20,000 feet), Chachani (19,037 feet), Antajasha (18,020 feet), Pichupichu (17,724 feet), and Mount Melgas (17,583 feet).

There are three main regions, the *Costa*, west of the Andes, the *Sierra* or mountain ranges of the Andes, which include the *Punas* or mountainous wastes below the region of perpetual snow and the *Montana*, or *Selva*, which is the vast area of jungle stretching from the eastern foothills of the Andes to the eastern frontiers of Peru. The coastal area, lying upon and near the Pacific, is not tropical, though close to the Equator, being cooled by the Humboldt Current; its chief products are cotton, sugar, and petroleum. It contains the capital, Lima, and most of the white population. In the mountains, where most of the Indians live, are to be found minerals in great richness and variety, and cattle, sheep, llamas and alpacas are bred there. In the mountain valleys maize, potatoes and wheat are grown. Upon the eastern slopes of the Andes are to be found very large tracts suitable for cultivation and stock raising. The main products of the jungle are timber, barbasco and leche caspi.

Government.—Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541). He subjugated the Incas (the ruling caste of the Quichua Indians), who had started their rise to power some 500 years earlier, and for nearly three centuries Peru remained under Spanish rule. A revolutionary war of 1821–1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1856 (amended in 1860, 1919, 1933,

1936 and in 1939), and is that of a democratic Republic. The President is elected for six years by direct vote of the people. Congress is composed of a Senate and of a Chamber of Deputies, both Houses being elected for six years. Voting is compulsory for all Peruvian men and women between the ages of 21 and 60, for married men and women between 18 and 60 and for single men and women between the ages of 18 and 21 who are legally released from parental tutelage.

Production.—Agriculture and mining are the principal industries, employing over 70 per cent. of the inhabitants. The chief crops in order of value are cotton, potatoes and other vegetables, sugar, fruit, maize, rice, wheat barley, grapes and coffee. At June 30, 1959, the gainfully employed population numbered 3,893,551, of whom 2,255,923 were engaged in agricultural and pastoral activities. About 4,259,082 acres were under cultivation at the end of 1958 and steps are being taken to increase this area, which was probably larger in Inca times, by more intensive irrigation. Minerals produced in 1958 were valued at soles 5,056,952,000 and included lead, zinc, copper, iron ore, petroleum, silver, gold, tungsten, bismuth, antimony and vanadium. The islands off the Pacific coast provided guano amounting to 167,011 metric tons in 1958.

Communications.—In recent years the coastal and sierra zones have been opened up by means of roads and air routes and there is air communication, as well as communication by protracted land routes, with the tropical eastern zones, which lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. The completion in 1944 of the trunk road of the *Andean Highway* from the Pacific port of Callao, *via* Lima, Oroya, Cerro de Pasco (14,700 ft.), Huanuco, Tingo Maria, to Pucallpa, the river port on the Ucayali, one of the largest tributaries of the Amazon and accessible all the year round to vessels of 3,000 tons, forms a link between the Pacific, the Amazon and the Atlantic. The trunk road runs through the *Boqueron del Padre Abad*, a pass rediscovered on July 22, 1937, in the backbone of the Blue Cordillera. The Peruvian section of the Pan American highway is complete and is asphalted throughout the major part of its length.

The first railway was opened in 1850 and of the 2,494 miles of railways now operating, Government lines account for 578 miles, the Peruvian Corporation 1,180 miles and private enterprises about 726 miles. There is also steam navigation on the eastern rivers such as the Ucayali (*see* Andean Highway, above) and Huallaga, and in the south on Lake Titicaca. Air services are maintained throughout Peru, and a number of international services call at Lima.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription, and numbers about 30,000 of all ranks; the Navy consists of 2 cruisers, 4 destroyer escorts and 3 frigates; 4 new submarines completed in U.S.A. in 1954–57; 4 L.S.T.'s; 8 river gunboats; 2 transports; 2 river transports; 3 (8,000 ton) oil tankers and five smaller tankers; 6 motor launches; a fleet supply ship; a submarine salvage vessel and 2 tugs. There is a naval cadet school at La Punta and a submarine base at Callao. There are military aerodromes at Talara, Chiclayo, Las Palmas (near Lima) and Piura, an air transport squadron at Lima and a seaplane base at Iquitos. The air force is equipped with British- and American-built aircraft.

Education.—Elementary education is compulsory and free for both sexes between the ages of 6 and

14. In 1958 there were 1,308,236 pupils undergoing primary education and 122,221 attending secondary schools. There were 11,802 state primary schools with 29,155 teachers and 154 state secondary schools with 3,762 teachers, providing 5 year courses from 12 to 17. In addition there were 2,087 private schools providing primary and secondary education with 10,097 teachers and 317 schools conducted by religious orders. The State provides rural agricultural schools for Indians, mining schools and polytechnics in the more populated centres. The University of San Marcos at Lima, founded in 1551, had 10,442 students in 1957, and there are smaller universities at Cuzco, Arequipa and Trujillo, a Catholic university at Lima, and a national engineering university.

Language and Literature.—Spanish is the official language of the country and notably of the original Spanish stock from which the governing and professional classes are mainly recruited, but more than half the nation is composed of Indians, whose principal languages (Quichua and Aymara) are widely spoken. Before the arrival of Pizarro, the Incas had attained a high state of culture, some traces of which survived three centuries of Spanish rule. Modern Peruvian literature includes a national drama in the Spanish tongue and many Peruvian writers have attained international fame. The national library founded at Lima in 1821 was pillaged by Chileans in the Pacific War of 1879–1882, but many of the scattered manuscripts and books have since been recovered. The greater part of the historical section of the library was destroyed by fire in 1943. The first printed news-sheet in South America was issued at Lima in 1594 and in 1960 there were 5 main national daily papers, and 48 provincial ones with a small and purely local circulation. A chair of English was established in 1938 at the Universidad Mayor de San Marcos in Lima.

PHILIPPINE EMBASSY IN LONDON

9a Palace Green, W.8

[Western: 3646]

Ambassador in London, His Excellency Leon Ma. Guerrero (1954).

Area and Population.—The Philippines are situated between 21° 20'–4° 30' N. lat. and 116° 55'–126° 36' E. long., and are distant about 500 miles from the south-east coast of the continent of Asia.

The total land area of the country is 114,834 square miles, of which total 106,914 square miles are contained in the eleven largest islands, the 7,079 other islands having a combined area of 7,920 square miles.

The principal islands are:—

Name	sq. miles	Name	sq. miles
Luzon.....	40,422	Mindoro.....	3,759
Mindanao..	36,538	Leyte.....	2,786
Samar.....	5,050	Cebu.....	1,703
Negros.....	4,906	Bohol.....	1,492
Palawan....	4,550	Masbate.....	1,262
Panay.....	4,446		

Other groups in the Republic are the Sulu Islands (Capital, Jolo), Babuyan and Batanes; the Catanduanes; and Culion Islands.

The population of the Philippines at the 1960 census was 27,455,199.

The inhabitants, known as Filipinos, are basically all of Malay stock, with a considerable admixture of Spanish and Chinese blood in many localities, and over 90 per cent. of them are Christians, predominantly Roman Catholics. Most of the remainder are Mohammedan Moros in the south, and Pagans, mainly in the north. There is a Chinese minority estimated at 350,000, and other much smaller foreign communities, notably Spanish, American and Indian.

Government.—The Portuguese navigator Magellan came to the Philippines in 1521 and was slain by the natives of Mactan, a small island near Cebu. In 1565 Spain undertook the conquest of the country which was named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 Manila was occupied by a British force, but in 1764 it was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. After the Spanish fleet had been destroyed in Manila Bay (May 1, 1898), Manila was captured by American troops with the help of Filipinos, on Aug. 13, 1898, and the Islands were ceded to the United States by the Treaty of Paris of Dec. 10, 1898. However, the Filipinos, under Aguinaldo, rose up in arms on Feb. 4, 1899, against the U.S. Government, maintaining a desultory rebellion until it was quelled in 1902. Following this, the Philippine Commission was established, consisting of a Governor-General and Commissioner appointed by the President of the United States, who exercised a large measure of executive and legislative authority.

A measure of local independence was granted under the Jones Act of August 29, 1916. On March 24, 1934, the Tydings-McDuffie Law, gave the Philippines a "Commonwealth" Status. The Republic of the Philippines came into existence on July 4, 1946. The Constitution provides for a President elected for a term of four years, and a bi-cameral Congress, consisting of a Senate composed of 24 senators and a House of Representatives of not more than 120 members. No person may serve as President for more than eight consecutive years. The term of office of Senators is six years and of Representatives four years.

Language and Literature.—The official languages are English, Spanish and the National language (of Malay origin) Tagalog. A majority of the people read or understand English, which is the language of instruction. The literacy rate is estimated at 75 per cent. There is a National library in the capital with branches in other urban centres, and a flourishing English press. Education accounts for about a quarter of local expenditure in

the national budget. Secondary and higher education is extensive. There are 22 private universities recognized by the Government, including the Dominican University of Santo Tomas (founded in 1611), the first in the Far East and 25 years older than Harvard; there is also the State-supported University of the Philippines at Manila (1908).

Roads and Railways.—Communications suffered serious damage during the War of 1941-45 owing to the lack of proper maintenance during the Japanese occupation and destruction by bombardment. The highway system of approximately 22,747 miles of roads and streets is undergoing rehabilitation and extension. Before the war the railways, which were largely Government owned, operated approximately 845 miles of track of which some 832 miles were in operation in 1960. Rolling stock losses were also heavy, but have been largely made up, and the Manila railway, on Luzon island, has been converted to diesel traction.

Shipping.—The ports of entry are Manila, Cebu, Iloilo, Zamboanga, Davao, Jolo, Legaspi, Aparri, José Panganiban, San Fernando La Union and Tacloban. There are nearly 2,000 vessels of various types, totalling over 130,000 tons, engaged in coastwise and river traffic.

Civil Aviation.—Air transport plays an important rôle in inter-island travel and in communications overseas. Philippine Air Lines (54 per cent. Government-owned) operate eight weekly services to Hong-Kong; foreign airlines serve the Hong-Kong and other international routes.

The Philippines is a predominantly agricultural country, the chief products being rice, coconuts, maize, sugar-cane, abaca (manilla hemp), fruits, tobacco and lumber.

The principal Philippine exports in both natural and manufactured states are coconuts, sugar, abaca, base metals, lumber, pineapples, embroideries and tobacco.

CAPITAL.—Manila, in the island of Luzon: population (1960), including the separately administered but integral areas of Quezon City and Pasay City (formerly Rizal), 3,006,627. Quezon City has been designated as the future capital of the Philippines, but pending completion of government building projects, the Executive, Legislative and Judicial departments of the government are still located in Manila. The next largest cities are Cebu (259,194), Davao (231,833), Iloilo (150,976), Zamboanga (131,411) and Bacolod (119,169).

FLAG.—Equal horizontal bands of blue (above) and red; gold sun with three stars on a white triangle next staff.

[Langham: 4324]

Ambassador in London, His Excellency Witold Rodzinski (1960).

Counsellors, M. Bohdan Tomorowicz; M. Zdzislaw Szewczyk.

1st Secretary, M. Czeslaw Makowski.

2nd Secretary, M. Stanislaw Konik.

Commercial Counsellor, Dr. Aleksander Wolynski.

Attachés, Mme. Felicia Muszynska; M. Wladyslaw Neuman; Mme. Jadwiga Pastecka; M. Henryk Matusiak.

Military, Air and Naval Attaché, Col. Mieczyslaw Roman.

Asst. Military Attaché, Col. Zdzislaw Modrzewski.

Commercial Attachés, M. Jerzy Dzierzynski; M. Jan Koscinski.

Consulate-General in London, 19 Weymouth Street, W.1.

Area and Population.—In 1939 the area of the Polish Republic was 150,572 square miles with a population of about 35,000,000, of whom 30 per cent. were national minorities (including over 3,000,000 Jews). Frontier changes took place at the end of the war as foreshadowed at the Tehran Conference in 1943. About 69,000 square miles of territory in the east were ceded to the Soviet Union. In exchange Poland received in the west 39,000 square miles of Eastern Germany. The southern boundary was not affected except for minor adjustments to that part formerly dividing Poland from Ruthenia (Czechoslovakia). The western boundary is formed by the Rivers Oder

and Neisse. Poland now has a maritime frontier stretching from west of Kaliningrad (formerly Königsberg) to west of Szczecin (formerly Stettin). As a result of the change of frontier and of very great war-time losses, at the census of December 3, 1950, the population had fallen to 24,977,000 in an area of 121,000 square miles. At a census held in December, 1960, the population was 29,731,000 (preliminary figures). In 1960 live births showed a rate of 22.4 per 1,000; deaths, 7.5 per 1,000; infant mortality, 56 per 1,000 (provisional figures). Roman Catholicism is the religion of the vast majority of the inhabitants.

Government.—The Republic of Poland (reconstituted within the limits of the old Polish Commonwealth) was proclaimed at Warsaw in November, 1918, and its independence guaranteed by the signatories of the Treaty of Versailles. The Polish Commonwealth had ceased to exist in 1795 after three successive partitions in 1772, 1793 and 1795, in which Prussia, Russia and Austria shared. During the Napoleonic wars, the small Grand Duchy of Warsaw was created but was dissolved by the final act of the Congress of Vienna. The so-called "Congress Kingdom" was then established on the Polish territory which had fallen to Russia's share and the Tsar assumed the title of King of Poland. Prussia acquired Poznan and Polish Pomerania, Austria acquired Galicia and the small Republic of Cracow came into existence under the joint control of Prussia, Russia and Austria. In 1831, after an insurrection, the Congress Kingdom was dissolved and annexed by Russia and in 1848 the Austrians absorbed the Cracow Republic, Poland as an independent state ceasing to exist until the end of the War of 1914-18, when she became independent once again, after 150 years of foreign rule.

In March, 1939, Great Britain entered into a treaty with Poland (France had done so in 1921) guaranteeing Polish territory against aggression, and on Hitler's invasion France and Britain implemented their guarantee. On September 17, 1939, Russian forces invaded eastern Poland and on September 21, 1939, Poland was declared by Germany and Russia to have ceased to exist. A line of demarcation was established between the areas occupied by German and Russian forces. At the end of the war a Coalition Government was formed in which the Polish Workers' Party played a large part. In December, 1948, the Polish Workers' Party and the Polish Socialist Party fused in the new Polish United Workers' Party. This is a Communist Party which closely controls every branch of State activity. A new Constitution modelled on the Soviet Constitution of 1936 was adopted on July 22, 1952. It changed the title of the country to the Polish People's Republic (*Polska Rzeczpospolita Ludowa*). It made no provision for a President of the Republic, whose functions were to be jointly exercised by a Council of State. Private ownership of land and freedom of religion was recognized. Church and State were to be separate.

Despite the guarantee of religious freedom in the Constitution, a campaign of encroachment in 1953 culminated in the arrest of the Primate of the Roman Catholic Church, Cardinal Wyszyński. Dissatisfaction with the régime and conditions of life led to riots in Poznan in June, 1956, and subsequently M. Wladyslaw Gomułka, who had been expelled from the Party in 1949, was reinstated and elected First Secretary of the Party. At the same time Cardinal Wyszyński was allowed to resume his functions. In Jan., 1957, elections to the *Sejm* were held and in Feb., 1957, a reconstructed Government, still led by M. Cyrankiewicz, took office.

Fresh elections to the *Sejm* were held in April, 1961; M. Cyrankiewicz remained Prime Minister, with the composition of the Government almost unchanged.

Education.—Elementary education is compulsory and free. In 1960-61 there were over 4,900,000 pupils in elementary schools and over 300,000 in secondary schools, and over 700,000 students in technical, professional and trade colleges and schools. There are universities at Krakow, Warsaw, Poznań, Łódź, Wrocław, Lublin and Toruń and a considerable number of other seats of higher study.

Language and Literature.—Polish is a western Slavonic tongue (see U.S.S.R.), the Latin alphabet being in use, as in Czechoslovakia. Polish literature developed rapidly after the foundation of the University of Cracow (a printing press was established there in 1474 and there Copernicus died in 1543). A national school of poetry and drama survived the dismemberment and the former era of romanticism was followed by realistic and historical fiction, including the works of Henryk Sienkiewicz (1846-1916), Nobel Prize-winner for literature in 1905, Bolesław Prus (1847-1912), and Stanisław Reymont (1868-1925), Nobel Prize-winner in 1924. There are now 46 daily papers published in Poland, 11 of them in Warsaw.

Production and Industry.—On January 3, 1946, a decree was issued to provide for the nationalization of mines, petroleum resources, water, gas and electricity services, banks, textile factories and large retail stores. At present over 90 per cent. of Polish industry is stated to be "socialized", but 86 per cent. of agricultural land is privately farmed.

FINANCE 1961

Estimated revenue. Złoty 228,400,000,000
Estimated expenditure. „ 225,900 000 000

The official exchange rate is 11.20 złoty = £1 but this is not used in practice. A special rate of 67.20 złoty = £1 has been in force since Feb. 11, 1957 for non-commercial transactions with western countries. All foreign trade is conducted in foreign currencies. (See also p. 84.)

Oliveira Neves.

Consulate-General, 103 Sloane St., S.W.1
(Sloane: 0095).

Area and Population.—Continental Portugal occupies the western part of the Iberian Peninsula, bounded on north and east by Spain, and on south and west by the Atlantic ocean; it contains an area of 34,500 square miles, with an estimated population (including the Azores and Madeira) of 8,980,682 (1958). It lies between 36° 58' 42" 9' 12" N. lat. and 6° 11' 48" 9' 29' 45" W. long., being 302 miles in length from N. to S., and averaging about 117 in breadth from E. to W. The Azores and Madeira Islands in North Atlantic are politically an integral part of the Republic.

In 1958 there were 212,467 live births, 91,891 deaths and 73,096 marriages in Continental Portugal.

Government.—From the eleventh century until 1910 the government of Portugal was a monarchy, and for many centuries included the Vice-Royalty of Brazil, which declared its independence in 1822. In 1910 an armed rising in Lisbon drove King Manoel II. and the Royal family into exile, and the National Assembly of Aug. 21, 1911, sanctioned a Republican form of government. The President is elected for seven years by indirect vote of the electors, who vote for members of an electoral college to select the President. He is not eligible for a second term. The Prime Minister is appointed by the President, who also appoints the other Ministers on the recommendation of the Prime Minister. The Government is responsible only to the President. There is a single Chamber Legislature (*Assembleia Nacional*) of 120 members elected by direct vote of the electors. There is also a "Corporate Chamber" consisting of representatives of local authorities and industrial, commercial, cultural and religious interests, to which all bills introduced into the Chamber must be submitted for its opinion. The Legislature is in session for three months in the year. In the recess the Government legislates by decrees or decrees-laws, of which the latter only must be confirmed by the legislature. Both men and women enjoy the franchise; but there are certain educational or tax-payment qualifications.

Production.—The chief agricultural products of Portugal are cork, wheat, maize, rye, rice, oats, barley, potatoes, beans, chickpeas, onions, olives, oranges, lemons, figs, almonds, resinous products, timber and wine (including the rich red "port" shipped from Oporto). Sardine fisheries are important.

There are extensive forests of pine, oak, cork, eucalyptus and chestnut, covering about 20 per cent. of the total area of the country, and lumbering is the second largest industry.

The principal mineral products are iron pyrites, wolfram, iron ores, tin, and gold and silver. The principal manufactures are textiles, furniture, pottery, glassware, cork goods, leather, paper, cement, fertilizers and chemicals. A steel works has recently begun production.

The Second Six-Year Development Plan (1959-64) provides *inter alia* for irrigation, agricultural resettlement and afforestation, for the development of electricity generation, mainly by hydroelectric means, of the steel and chemical industries, for extensive port works including a new shipyard at Lisbon, railway electrification, a bridge over the River Tagus at Lisbon and the expansion of the fishing and merchant fleets.

Defence.—Military service is compulsory for all men who are physically fit, less than 25 per cent. being exempted each year. The peace strength of the army is: officers 2,821 (active list), and about 2,000 (reserve); other ranks—permanent cadre of 34,000 with a yearly class of 31,000. A considerable amount of modern equipment has been received from the U.S.A. The navy consists of 860 officers and 6,375 ratings, manning a total of over 60 destroyers, frigates, sloops, submarines, mine-sweepers, patrol vessels and other small craft. The destroyers are of pre-war design, and many of the others have been either built or bought abroad mainly in the U.K. or U.S.A. The frigates, minesweepers, submarines and coastal patrol vessels are all of late-war or post-war construction. The establishment of the Air Force is 500 officers and 2,000 men with 350 aircraft of all types.

Language and Literature.—Portuguese is a Romance language with admixtures of Arabic

and other idioms. It is the language of Portugal and Brazil. Portuguese language and literature reached the culminating point of their development in the *Lusitadas* (dealing with the voyage of Vasco da Gama) and other works of Camões (Camões), born in 1524, died in 1580. Until the second quarter of the nineteenth century Portuguese literature dominated that of Brazil. Modern literature, both prose and verse, is in a flourishing condition and there are more than twenty daily newspapers, of which 9 are published in Lisbon.

Education is free and compulsory for three years from the age of 7. In 1952 a series of new measures was decreed to ensure school attendance and to reduce illiteracy, which was 30 per cent. at the time of the 1950 Census. Secondary education is mainly conducted in State lycées, but there are also private schools. There are also military, naval, technical and other special schools. There are Universities at Coimbra (founded in 1290), Lisbon (1911) and Oporto (1911).

Communications.—On Jan. 1, 1959 there were 2,235 miles of railway open for traffic, of which 475 miles were narrow gauge. The Lisbon-Sintra (15 miles), Lisbon-Cascais (16 miles) and Lisbon-Entroncamento (66 miles) lines are electrified and work on the Entroncamento-Oporto was expected to start in 1961.

On Dec. 31, 1959, the mercantile fleet comprised 90 long-distance vessels with a total gross registered tonnage of 427,430 tons, 19 port-to-port vessels (21,452 tons), 30 national coasters (3,791 tons) and 41 international coasters (6,351 tons). In 1959, 35,147,174 gross tons of shipping entered ports in continental Portugal and adjacent islands, including 5,890,065 gross tons under the British flag.

Civil Aviation is controlled by the Ministry of Communications. There is an international airport at Portela, about 5 miles from Lisbon, and the airport of Pedras Rubras near Oporto is also used for some international services. There is a civil airline, an inter-island service, services in Portuguese Africa and an airline running services within Portuguese India and to Karachi. British European Airways and Transportes Aereos Portugueses operate a daily service between London and Lisbon by agreement between them which calls at Oporto twice weekly in both directions. There are altogether 19 airlines operating a total of about 400 services a month through Lisbon airport.

FINANCE		1961

BRITISH CONSULAR OFFICES

There are British Consular Offices at Lisbon, Oporto, Setúbal and Vila Real de Santo Antonio (Portugal), Ponta Delgada (Azores), St. Vincent (Cape Verde Islands), Funchal (Madeira), Lourenço Marques and Beira (Portuguese East Africa), Luanda (Portuguese West Africa) and Macão.

BRITISH COUNCIL

Representative, J. G. G. Muir, O.B.E., D.S.C. The British Institute, Rua de Luís Fernandes 3, Lisbon.

There is a British Institute at Coimbra (Rua Alexandre Herculano 34) and an Anglo-Portuguese Association at Oporto (Rua de Breyner, 79).

ROYAL BRITISH CLUB, rua S. Pedro d'Alcantara, 3, Lisbon.

BRITISH CHAMBER OF COMMERCE IN PORTUGAL, 4 Rua Victor Cordon, Lisbon (Branches at Madorninha Senhora de Hora, Oporto, and 134 Rua 5 de Junho, Funchal, Madeira).

MADEIRA AND THE AZORES

Madeira and The Azores are administratively parts of metropolitan Portugal.

The *Madeiras* are a group of islands in the Atlantic Ocean about 520 miles west of Lisbon, and consist of Madeira, Porto Santo and 3 uninhabited islands (Desertas). The total area is 314

square miles, with a population of 269,769. Ψ Funchal in Madeira, the largest island (270 square miles), is the capital, with a population of 37,035; Machico (4,734). Trade with U.K., 1960: Imports from U.K., £891,366; Exports, £231,380.

The *Azores* are a group of 9 islands (Flores, Corvo, Terceira, Sao Jorge, Pico, Fayal, Graciosa, Sao Miguel and Santa Maria) in the Atlantic Ocean, with a total area of 922 square miles and a population of 318,558. Ψ Ponta Delgada the capital of the group, has a population of 22,448. Other ports are Ψ Angra, in Terceira, (10,296) and Ψ Horta (8,564). Trade with U.K., 1960: Imports from U.K., £728,998; Exports, £169,810.

PORTUGUESE OVERSEAS PROVINCES

CAPE VERDE ISLANDS, off the west coast of Africa, consist of two groups of islands, Windward (Santo Anião, São Vicente, Santa Luzia, São Nicolao, Boa Vista and Sal, the last-named having a South Atlantic air base, opened in 1949) and Leeward (Maio, São Tiago, Fogo and Brava) with a total area of 1,516 square miles and a population (Census of 1950) of 148,331. Revenue (1957) *Escudos* 119,969,000; imports (1957) *Escudos* 378,361,000; exports *Escudos* 346,820,000, shipping entries (1957) 8,749,927 gross tons. Capital, Ψ Praia (6,000). Vessels take coal and oil at Ψ Mindelo, Sao Vicente (pop. 20,000).

SÃO TOMÉ and PRÍNCIPÉ ISLANDS, in the Gulf of Guinea (area 372 square miles, population (1950), 60,159). Revenue (1957) *Escudos* 71,899,000; imports (1956) *Escudos* 137,345,000; exports, *Escudos* 173,670,000. Capital, Ψ São Tomé (3,187). The fort of St. John Baptist on the Slave Coast is a dependency of the Province of São Tomé.

ANGOLA has an area of 488,000 sq. miles, pop. 4,145,266, with present capital Ψ St. Paul de Luanda (pop. 40,000), and capital designate Nova Lisboa, and includes also Kabinda and Portuguese Zaire (N. of Congo). Angola was restored to Portugal by the Netherlands in 1648. Revenue (1957): *Contos* 2,172,394; imports (1957), *Contos* 3,595,578; exports, *Contos* 3,327,927. Imports from U.K., 1960, £4,291,637. Shipping entries (1957) 8,991,000 gross tons.

PORTUGUESE GUINEA, area 14,000 sq. miles, pop. (1950) 510,777 (capital Ψ Bissau, population 6,000). Revenue (1957) *Escudos* 150,446,000; imports (1956) *Escudos* 208,082,000; exports, *Escudos* 207,359,000; shipping entries (1953), 186,783 gross tons.

A transcontinental railway from Benguela (Lobito Bay) in Angola, which traverses the Katanga mineral district of the Congo and then runs southwards through Rhodesia to Bulawayo and eastwards to Beira, is being developed under British, Belgian and Portuguese control. This line makes through communication from Lobito Bay on the Atlantic to Beira on the Indian Ocean.

PORTUGUESE EAST AFRICA, OR MOZAMBIQUE, Lourenço Marques, Inhambane, Quelimane, Tete, Mozambique, Cape Delgado and Nyasa, together with the territory of Manica and Sofala, has a total area of 297,657 square miles, with a population (1950) of 5,732,317. Capital Ψ Lourenço Marques (48,000). Revenue (1957) *Escudos* 3,131,067,000; imports (1957), *Escudos* 3,111,562,000; exports, *Escudos* 2,029,294,000; trade with U.K., 1960: Imports from U.K., £6,397,051; Exports, £2,984,962. Shipping entries (1956), 18,463,714 gross tons.

Ψ MACAU, in China, on the Canton River, has an area of 5 square miles and a population (1950) of 187,772. Revenue (1957), *Escudos* 109,755,000.

PORTUGUESE INDIA. Portuguese Possessions in India cover about 1,500 sq. miles and consist of the colony of Goa with the islands of Anjediva, São Jorge and Morcegos on the Arabian (Malabar) sea coast; *Daman* (Damao) with the territories of Dadra and Nagar-avely on the Gujerat coast at the entrance to the Gulf of Cambay, together with the tiny island of Diu with coastal tracts of Gogola and Simbor. (Dadra and Nagar-avely came under the *de facto* control of the Indian Government in July, 1954). The total area of these territories is 1,540 sq. miles, with a population in 1950 of 637,591. Revenue (1957) *Escudos* 344,913,000; imports (1955) *Escudos* 710,990,000; exports *Escudos* 328,107,000; shipping entries (1957), 2,475,971 gross tons.

PORTUGUESE TIMOR (the eastern portion of the island), in the Malay Archipelago, has an area of 7,329 square miles, with a population (1950) of 442,378. Revenue (1957) *Escudos* 71,546,000; imports (1957), *Escudos* 61,330,000; exports *Escudos* 38,880,000; shipping entries (1957), 88,587 gross tons. Capital, *Ψ*Dili, pop. 7,000.

QATAR

Ruler of Qatar, Ahmad bin Ali bin Abdullah al Thani.

Qatar is an independent Arab Shaikhdom in special treaty relations with Her Majesty's Government. It covers the peninsula of Qatar from approximately the Northern shore of Khor al Odaid to the Eastern shore of Khor al Salwa. The area is about 4,000 sq. miles, with a population estimated at 40,000.

Oil deposits on land are being exploited by the Qatar Petroleum Company, a subsidiary of I.P.C., under a concession granted by the Ruler, and the first oil shipment was made on December 31, 1949. Oil is now being extracted at the rate of about 8,000,000 tons a year. Considerable development has resulted from this source of income. Outside Doha and the oil company's installations, conditions are primitive. The inhabitants are semi-settled tribesmen and Bedouin; apart from employment in the oil industry and on development projects, pearling, which has greatly declined in recent years, and fishing, are the only alternatives to poor grazing as a means of livelihood. Such towns as exist are merely enlarged villages, with the exception of Doha, which boasts a bazaar, a good harbour for native craft, an airport, an increasing number of modern buildings, and an expanding population. The oil company has constructed a deep water port at Umm Said on the East coast of the peninsula. The offshore concession is held by the Shell Company of Qatar, which is at present drilling for oil in the sea bed. Regular air services connect Qatar with the other Persian Gulf Shaikhdoms (Bahrain, the Trucial States and Kuwait), Muscat, the Lebanon, Europe and the United Kingdom. The Ruler has an international staff of technical assistants. Wireless communications are managed by Cable and Wireless, Ltd. The Post Office is run by the British G.P.O. The currency is the Indian external rupee.

Foreign affairs are in the charge of the British Political Agent who lives in Doha.

CAPITAL, Doha. **Population,** Approximately 30,000.

FLAG.—White and coffee-coloured, white portion nearer the mast; vertical indented line comprising 17 angles divides the colours.

British Political Agent, J. C. Moberly.
Director-General, Dept. of Finance and Administration,
Shaikh Khalifa bin Hamad al Thani.
Secretary-General, Ahmad Mulla.

ROUMANIAN LEGATION IN LONDON

4 Palace Green, W.8

[Western: 9666]

Envoy Extraordinary and Minister Plenipotentiary,
His Excellency Petre Balaceanu (1957).

Area and Population.—Roumania is a republic of South-Eastern Europe, formerly the classical *Dacia* and *Scythia Pontica*, having its origin in the union of the Danubian principalities of *Wallachia* and *Moldavia* (and the addition thereto of a strip of Southern *Bessarabia*) under the *Treaty of Paris* (April, 1856). The area in October, 1945, was estimated at 91,600 sq. miles, with a population (Census, 1956) of 17,489,794.

Government.—The principalities remained separate entities under Turkish suzerainty until 1859, when Prince Alexandru Ion Cuza was elected Prince of both, still under the suzerainty of Turkey. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown was vested. By the *Treaty of Berlin* (July 13, 1878) the Principality was recognized as an independent State, and part of the *Dobruja* (which had been occupied by the Roumanians) was incorporated. On March 27, 1881, it was recognized as a Kingdom.

The outcome of the War of 1914-18 added *Bessarabia*, the *Bukovina*, *Transylvania*, the *Banat* and *Crșana-Maramureș*, these additions of territory being confirmed in the *Treaty of St. Germain*, 1919, and the *Treaty of Petit Trianon*, 1920.

On June 27, 1940, in compliance with an ultimatum from U.S.S.R., *Bessarabia* and Northern *Bukovina* were ceded to the Soviet Government, the area affected being about 20,000 sq. miles, with a population of about 4,000,000.

In August, 1940, Roumania ceded to Bulgaria the portion of Southern Dobruđa (about 3,000 sq. miles) taken from Bulgaria in 1919.

During 1947 the historical parties, the National Peasant Party and the National Liberal Party, were liquidated and the trials and condemnations of their leaders took place. On Dec. 30, 1947, King Michael was forced to abdicate and the establishment of the Roumanian Peoples' Republic was proclaimed. On February 23, 1948, the Social Democrats were swallowed up by the Communist Party when the two fused to form the Roumanian Workers' Party, since when the Social Democrat element has been steadily liquidated. On March 28, elections were held for the Grand National Assembly. The People's Democratic Front, composed and dominated by the Roumanian Workers' Party, with its puppets the Ploughmen's Front, the National Popular Party and the Popular Hungarian Union, allocated itself 405 out of 414 seats; the new Constitution was passed and the Præsidium and Council of Ministers appointed. Thereafter the progress of the new People's Democracy towards socialism was hastened by the nationalization law of June 11, which brought under State control all industrial enterprises, mining, banking, transport and insurance. In October the Uniate Church was forcibly suppressed. At the turn of the year the dictatorship of the proletariat was officially established. The landowners were dispossessed, disfranchised and exiled on March 2, 1949. In 1950 the creation of collective farms was intensified. The liquidation of the middle classes continued, and on April 20 most buildings owned by former members of the "bourgeoisie" were nationalized without compensation.

The currency reform of January, 1952, effectively wiped out the savings of the peasants. In May, 1952, several ministers were attacked for opposing the currency reform, following a deviationist policy of economic opportunism, and sabotaging the economic development of Roumania. They were replaced by other ministers, and the changes were made the occasion for a tightening of the Workers' Party organization and the elimination of the remaining Social Democrats from the Government and Workers' Party.

A new Constitution, modelled on the Soviet Constitution of 1936, was adopted unanimously on September 24, 1952, by the Grand National Assembly. The Assembly was later dissolved and elections were held for a new Grand National Assembly on November 30, 1952; in each constituency there was only one candidate for election, representing the People's Democratic Front. Further elections on similar lines were held in February, 1957 and in March, 1961.

Agriculture.—The soil of Wallachia and Moldavia is among the richest in Europe producing wheat, maize, millet, oats, barley, rye, beans, peas and other vegetables. Grape vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax, and hemp. Agriculture and sheep and cattle raising are the principal industries of Roumania, but the climate of this part of South-Eastern Europe is of the Continental character, and the intense winter cold and summer heat, and fierce summer drought sometimes defeat these principal industries. The forests of the mountainous regions are extensive (17,851,401 acres), and the timber industry is important. The total arable land under cultivation in 1960 was about 10,000,000 hectares.

Natural Resources and Industry.—Petroleum is the backbone of Roumanian industry and of the country's general economy. Production in 1936

(the peak pre-war year) amounted to 8,700,000 tons. In the immediate post-war period, production declined to less than half this figure, but it is now claimed that, with the discovery of new oil-fields, production has recovered and reached a new peak of 11,500,000 tons in 1960. The country is also rich in other minerals, and produces in limited quantities coal, lignite, iron, gold, silver, mica and uranium. At the end of the first Five-Year Plan, 1951-55, the Government claimed to have exceeded their intention of increasing industrial production by 244 per cent. compared with 1950. The subsequent Five-Year Plan was later reduced to cover a four-year period, 1956-59, during which an average annual increase in industrial production of 10 per cent. was claimed. The new Six-Year Plan (1960-65) provides for an average annual increase of industrial production of 13 per cent.

Other 1960 production figures, with 1965 targets in brackets are:

Crude oil.....	11,500,000 tons (12,200,000)
Coal.....	8,163,000 tons (11,500,000-12,500,000)
Electric power 7,626,000,000 kWh (18,500,000,000)	
Natural gas .6519,000,000 cu. metres	
	(13,300,000,000)
Steel:	1,806,000 tons (3,000,000)
Pig Iron.....	1,014,000 tons (2,000,000)

Language and Literature.—Roumanian is a Romance language with many archaic forms and with admixtures of Slavonic, Turkish, Magyar and French words. The folk-songs and folk-lore, composed by the people themselves, and transmitted orally through many centuries (and collected in the 19th century), form one of the most interesting of such collections. The publication of all books and reviews is controlled and authorized by the *Editura de Stat*, which comes under the jurisdiction of the Council of Ministers. In 1960, 31 daily newspapers were published. The dominating religion is that of the Roumanian Orthodox Church.

Education is free and nominally compulsory with 2,588,000 in attendance, including over 241,000 at secondary schools and 80,000 in higher education. There are four Universities, at Bucharest, Iași, Cluj and Timisoara. A "Marxist-Leninist" University was opened in Bucharest in 1951. There are polytechnics at Bucharest, Timisoara, Cluj, Brasov, Galatz and Iași, two commercial academies at Bucharest and Brasov, and agricultural colleges at Bucharest, Iași, Cluj, Craiova and Timisoara.

Communications.—In 1939 there were about 7,000 miles of railway open for traffic, of which about 1,000 miles were in Bessarabia and Northern Bukovina, now ceded to the Soviet Union. The mercantile marine, as a result of war losses, seizure and reparations, has been reduced to a few moderate-sized sea-going steamers and a number of coastal and river craft. The principal ports are Constantza (on the Black Sea), Giurgiu, Braila, and Turnu-Severin (on the Danube), and Sulina (on the Danube Estuary). Work on a canal linking the Danube and the Black Sea just north of Constantza was abandoned in 1953 and no more was heard of the project to build a canal linking Bucharest with Danube Estuary.

FINANCE

Final figures of actual state revenue expenditure in 1959 were: Revenue, Lei 51,058,000,000; Expenditure, Lei 48,260,000,000.

	1960*	1961*
	Lei	Lei
Revenue.....	56,800,000,000	65,651,000,000
Expenditure.....	55,930,000,000	64,801,000,000

*Budget Estimates.

Up-to-date figures of the Public Debt are not available. No foreign loans (other than short-term commercial loans) are known to have been contracted since March, 1947. The internal debt was virtually wiped out by stabilization in August, 1947; there has been no internal loan issue since that date.

The Roumanian *Leu* (of 100 *Bani*) was revalued for the third time since the war on Feb. 1, 1954, foreign exchange rates being fixed at £1=16.80 lei and 1 U.S. \$=6.00 lei. On July 1, 1957, the Roumanian State Bank announced the payment of 100 per cent. premium on all "capitalist" currencies for non-commercial transactions. This premium brings the tourist exchange rate to £1=33.60 lei and 1 U.S. \$=12 lei.

	TRADE	
	1959	1960
	Lei	Lei
Imports... U.S. \$3,011,800,000		U.S. \$3,886,700,000
Exports...	3,134,600,000	4,303,700,000

No complete figures for foreign trade have been published since the start of the Communist régime. Imports are chiefly semi-manufactured goods, raw materials, machinery and metals; exports consist principally of maize, wheat, barley, oats, petroleum, timber and cattle. Trade with U.K., although relatively small has increased since the signature of an Anglo-Roumanian trade arrangement in 1960.

Trade with U.K.

	1959	1960
	£	£
Imports from U.K....	£1,519,632	£3,032,697
Exports to U.K.....	2,148,756	3,964,596

By far the greater part of Roumania's foreign trade is now with the Soviet Union and the other countries of Eastern Europe. Roumania is a member of the Soviet-sponsored "Council for Mutual Economic Assistance."

CAPITAL. Bucharest, on the Dimbovitza, population (1956) 1,236,905. Other towns with a population of over 100,000 in 1956 are: Cluj (154,752); Timişoara (142,251); Stalin (123,882); Ploesti (114,560); Iaşi (112,989); Arad (106,457); and Braila (102,491).

FLAG.—Three vertical bands, blue, yellow, red, with the emblem of the Republic in the centre band.

Minister of Foreign Affairs, Dr. Rafael Eguizabel
Tobias.

SALVADOREAN EMBASSY IN LONDON

6 Roland Gardens, S.W.7

[Fremantle: 2455]

Ambassador, Dr. Antonio Melendez (1958).
Secretary and Consul-General, Dr. Ricardo González.

Area and Population.—The Republic of El Salvador extends along the Pacific coast of Central America for 160 miles with a general breadth of about 50 miles, and contains an estimated area of 8,058 square miles, with a population estimated (1960) at about 2,580,000. El Salvador is therefore one of the most densely populated countries of the new world. It is divided into 14 Departments.

The surface of the country is very mountainous, many of the peaks being extinct volcanoes. The highest peaks are the Santa Ana volcano (7,700 ft.) and the San Vicente volcano (7,200 ft.). Much of the interior has an average altitude of 2,000 feet. The lowlands along the coast are generally hot, but towards the interior the altitude tempers the severity of the heat. Much has been done in recent years to improve sanitary conditions and services. There is a wet season from May to October, and a dry season from November to April. Earthquakes have been frequent in the history of El Salvador, the most recent being that of May 6, 1952, when the towns of Jucupa and Chinameca were destroyed.

The principal river is the Rio Lempa. There is a large volcanic lake (Ilopango) a few miles to the east of the capital, while farther away and to the west lies the smaller but very picturesque lake of Coatepeque, which appears to have been formed in a vast crater flanked by the Santa Ana volcano.

Government.—Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish vice-royalty of Guatemala until 1821. In 1839 the Republic broke away from the federation of Central American States. A new Constitution was adopted in 1950. The President is elected for six years and the Legislature for two. President Lemus was elected in 1956, but was deposed in Sept., 1960. A five-man *Junta de Gobierno* assumed power, but was itself deposed in Jan., 1961, when the present Civil-Military Directory took office.

Production and Industry.—The chief industry is the cultivation of coffee, which is grown under shade-trees principally on the slopes of the volcanoes; cane sugar is also produced, as well as cotton, maize, sesame, indigo, rice, balsam, etc. In the lower altitudes towards the east, sisal is produced and used in the manufacture of coffee and sugar bags.

Education.—The illiteracy rate is about 50 per cent. Primary education is nominally compulsory, but the number of schools and teachers available is too small to enable education to be given to all children of school age. In recent Budgets, however, a high percentage of the national revenue has been devoted to education and great efforts are being made to eliminate the existing shortage of schools and teachers.

Language and Literature.—The language of the country is Spanish. Indigenous literature has not yet produced work of international repute. There are 4 daily newspapers published at the capital, and 4 in the provinces.

Communications.—A British railway (the Salvador Railway Co.), nearly 100 miles in length, connects Acajutla with the capital and with the important coffee centre of Santa Ana. The International Railways of Central America have a line from the port of La Unión (on the Gulf of Fonseca) to the capital and another one in the opposite direction which taps the richest coffee growing region in the country and proceeds to Zacapa (in Guatemala) thereby affording continuous railway communication between San Salvador and Guatemala City and Puerto Barrios on the Caribbean coast. The re-draining and re-paving of most of the capital has been completed, as has also the macadamizing

or paving of several hundred miles of rural roads, many of which are now passable all the year round. There is a good motor road between the port of La Libertad and the capital (23 miles), while motor transportation is possible throughout the year between the capital and Guatemala City. The Pan-American Highway from the Guatemalan frontier follows this route and continues to the Honduran frontier. The highway is now completed through the country. Pan-American Airways, TACA, TAN, LANICA, SAHSA and LACSA connect El Salvador with the rest of the world.

There are post and telegraph offices throughout the country. There are many broadcasting stations and two television stations.

FINANCE

	1960 Colones	1961 Colones
Revenue (Budget).....	163,908,000	170,264,000
Expenditure (do.).....	181,000,000	188,000,000

Hon. Commercial Attaché, S. M. Stadler, O.B.E.

There is a Consular Office at La Libertad.

San Salvador is 5,700 miles from London.

SAN MARINO

(Repubblica di San Marino)

Regents, Two "Capitani Reggenti",

CONSULATE GENERAL IN LONDON

37-39 High Holborn, W.C.1
(Holborn: 9861)

Consul General, R. E. Rudge.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious stonemason of Dalmatia in the 4th century. The Republic always resisted the Papal claims and its integrity is respected by Italy. The Republic is governed

by a Council of 60, of whom two are elected as Regents for six months (April 1 and October 1), being thereafter ineligible for office for three years. A Council of Twelve forms a Supreme Court of Justice. The area is approximately 23 square miles, the population about 17,000. There is an army of 180. The city of San Marino, on the slope of Monte Titano, has three castles, a fine church and Government palace, a theatre and a museum. The principal industries are wine, cereals, cattle, ceramics, lime, concrete, cotton yarns, colour and paints. A Treaty of Extradition between the Governments of Great Britain and the Republic of San Marino has been in force since 1899.

In 1960 revenue totalled lire 1,151,280,000; expenditure lire 1,645,402,000; there is no debt. The capital San Marino, has a population of 2,000.

FLAG.—Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

SAUDI ARABIA

(al Mamlaka al Arabiyya as-Sa'udiyya.)

King of Saudi Arabia, H.M. King Saud bin Abdul Aziz, G.B.E., born 1902, succeeded Nov. 9, 1953. The Saud family previously ruled in Nejd but was deposed by Ibn al Rashid and took refuge in Kuwait. Ibn Saud, the father of the present king, occupied Riyadh in 1900 and conquered the larger part of Nejd in 1913. In 1921 he became Sultan of Nejd, conquered the Hejaz and became King in 1926. He changed the name of his Kingdom to Saudi Arabia in 1932.

Crown Prince, H.R.H. Amir Faisal bin Abdul Aziz, G.B.E., born 1904.

Foreign Affairs, Shaikh Ibrahim al Sewayel.
Economy and Finance, H.R.H. Tallal bin Abdul Aziz.
Interior, Abdul Aziz.

Defence and Civil Aviation, H.R.H. Mohammed bin Saud.

Agriculture, Shaikh Abdullah Debag.

Education, Shaikh Abdul Aziz bin Hassan.

Trade and Supplies, Shaikh Ahmed Shata.

Communications, H.R.H. Bader bin Abdul Aziz.

Oil and Mineral Resources, Shaikh Abdullah Tariqi.
Health, Dr. Hassan Latif.

EMBASSY IN LONDON.

(Diplomatic relations suspended.)

The Kingdom of Saudi Arabia, so named since Sept. 20, 1932, is a personal union of two countries, the Sultan of Nejd being also King of the Hejaz.

By the Treaty of Jeddah (May 20, 1927) Great Britain recognized Ibn Saud as an independent ruler, King of the Hejaz and of Nejd and its Dependencies.

The total area of the Kingdom is about 927,000 sq. miles, with an estimated population of not more than 6 millions.

In the 18th century Nejd was an independent State and the stronghold of the Wahhabi sect. It subsequently fell under the Turkish yoke, but in 1913 Ibn Saud threw off Turkish rule and captured from the Turks the Province of Hasa. In 1921 he added to his dominions the territories of the Rashid family of Jebel Shammar, which he captured by force of arms; in 1925 he completed the conquest of the Hejaz, and in 1926 accepted the surrender of the greater part of Asir, the whole of which is now part of the Kingdom.

Nejd ("Plateau") has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dabana Deserts, and reaches eastward to the Persian Gulf (Hasa). The population is largely nomadic

and is estimated at close on 3,000,000, the majority being Moslems of the Wahhabi movement. There is little agriculture, but wheat and barley are grown, and there is an experimental farm, irrigated from natural deep pools and covering 3,000 acres, at al-Kharj, about 50 miles south of Riyadh. The principal occupation of the bulk of the population is camel and sheep raising, but oil makes by far the largest contribution to the economy of the country. Oil was found in commercial quantities at Dammam, near Dhahran in the Hasa in 1938, and by 1955 production of crude oil from field storage amounted to over 350,000,000 barrels per annum. Exports other than oil are negligible. The capital is Riyadh (100,000), and the principal trading centres are Hofuf (the chief town of the Hasa province) (100,000), Ψ Al Khobar and Ψ Dammam on the Persian Gulf littoral, Anaiza, Buraida, Hail (20,000), and Jauif. The old ports (Persian Gulf) were Ψ Qatif, Ψ Uqair and Ψ Al Khobar, which were suitable only for sailing craft, but the Arabian-American Oil Company, which is exploiting the Hasa oil under a 60 years' lease, has built a deep-water port for its own purposes at Ψ Ras Tannura, and a civil deep-water port, with a pier seven miles long, was brought into use at Ψ Dammam in 1950. A railway is now in operation from Dammam through Hofuf to Riyadh.

The Hejaz ("The Boundary"—between Nejd and Tihama) extends from Asir in S. to Trans-Jordan in N., and from the Red Sea, the Gulf of Akaba in the W. to the ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about 112,500 sq. miles, with a population of from 1,000,000 to 1,500,000, including many nomad tribes. On the coast are the small ports of El Wejeh, Yanbu', Rabegh, Gizan and Ψ Jedda, the main port of Saudi Arabia. Jedda contains the ruins of the reputed "tomb of Eve, the mother of mankind"; and inland are many settlements through which runs the course of the disused Saudi-Arabian section of the Hejaz Railway which is scheduled for reconstruction. The Oasis of Khaiibar, east of the railway, contains a considerable population, descendants of former negro slaves, with a centre at Kasr el Yahudi. The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. Medina (al Madinah al Munawwarah, "The City of Light"), once the terminus of the Hejaz Railway, 820 miles from Damascus, has a permanent population of about 20,000 and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabia, A.H. 12). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. Mecca, the birth-place of the Prophet, is 45 miles east of the seaport of Jedda, by road, and about 200 miles south of Medina, and has a fixed population estimated at 100,000. The city contains the great mosque surrounding the Kaaba, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. Ψ Jedda (200,000) is the principal port and commercial centre.

Asir ("The Inaccessible") extends, geographically, from a line drawn inland from Birk on the southern limit of Hejaz to the northern boundary of the Yemen, some 12 miles N. of the port of Meidi. Its breadth extends about 180 miles eastwards to Bisha in the north and to the boundary of the Beni Yam in the south. According to ancient Arab geographers, Asir used to be considered as a

part of the Yemen. The territory includes the Irsan Islands, where prospectors have searched for oil, but without success. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. Capital, Abha.

Trade and Finance.—Formerly the annual pilgrimage to the Holy Places of the Hejaz provided Saudi Arabia with virtually the whole of her means of payment for imports. It is therefore not surprising that the foreign trade of the country was largely conducted by the merchant communities of Jedda and Mecca. Industry was, and is, almost non-existent. Imports are estimated to have averaged about £2,500,000 annually before 1939, of which the United Kingdom contributed less than £100,000. India was traditionally Saudi Arabia's principal commercial connection; and indeed the legal tender of Saudi Arabia, the silver rial, is of the same weight and fineness as the old Indian rupee. Religious objections to usury have affected the development of banking in Saudi Arabia. Though paper money is widely used, it is not officially recognised as currency. It has virtually supplanted gold as a means of payment for transactions nevertheless. Exchange rates, which were formerly subject to violent fluctuations, have now been given a considerable degree of stability by the operations of the Saudi Arabian Monetary Agency. The country shared the inflationary experiences of other Middle East countries during the war years. The effect of oil developments and of investment, mainly American, in Saudi Arabia has been to revolutionize the country's foreign exchange position and greatly to increase the size of the market.

Trade with U.K.

	1959	1960
Imports from U.K.	£6,843,692	£6,174,931
Exports to U.K.	5,362,100	9,788,226

Communications.—The railway from the port of Dammam to the oilfields at Abqaiq and through Hofuf to Riyadh was opened late in 1951. The only completed metalled road, apart from those in the oilfields area, connects Mecca with its Port of Jedda, but a new road from Jedda to Medina (about 410 miles) was partially completed by a British firm and the remainder has been completed by a local contractor. The Saudi Arabian Government employs Trans-world Airlines to pilot and maintain the Government-owned Saudi Arabian Airlines with Dakota, Skymaster, Convair and Bristol aircraft. Scheduled services are flown between Jedda, Talf, Riyadh, Hofuf and Dhahran. There are first-class airports at Dhahran, originally built by the United States Army as a military base, and at Jedda. The other airfields named are being developed. Saudi Arabian airlines also maintain regular services to Cairo and Beirut. Twice-weekly services operated by Aden Airways, Arab Airways (both subsidiaries of B.O.A.C.), Air Liban and Misrair call at Jedda, the route of Aden Airways including Cairo-Luxor-Jedda-Port Sudan-Asmara-Kamaran-Aden and return.

Education.—There are over 300 Government schools, mostly primary, but including seven secondary schools and one preparatory school, which prepares students who have completed their secondary course for University training, in Egypt or elsewhere. There is no University in Saudi Arabia. With three exceptions, all schools are maintained by the Government. Instruction is given to boys only. There are no girls' schools.

SAUDI ARABIAN FLAG.—Green oblong, white Arabic device in centre: "There is no God but God, Muhammad is the Prophet of God," and a white scimitar beneath the lettering.

CAPITAL, Riyadh, population about 100,000.

BRITISH EMBASSY

Saudi Arabia severed diplomatic relations with the United Kingdom on November 6, 1956. The Government of Pakistan has assumed responsibility for the protection of British interests in Saudi Arabia.

SOMALIA

(Somali Republic)

President, Aden Abdulle Osman, elected July 6, 1961, for a term of six years.

Prime Minister, Dr. Abdi Rashid Ali Shirmarke.

Deputy Prime Minister, Abdi Hassan Boni.

Minister of Foreign Affairs, Abdullahi Issa.

The Somali Republic occupies part of the north-east horn of Africa, with a coast-line on the Indian Ocean extending from the boundary with Kenya (2° South latitude) to Capo Guardafui (12° N.); and on the Gulf of Aden to the boundary with French Somaliland. Somalia is bounded on the west by French Somaliland, Ethiopia and Kenya and covers an area of approximately 288,000 sq. miles. The population, of which a large proportion is nomadic, is estimated at about 1,864,000. Cattle raising is the main occupation in Somalia and there is a modest export trade in cattle on the hoof, skins and hides. Italy imports the bulk of the banana crop under agreement with the Somali Government.

Government.—The Somali Republic, consisting of the former British Somaliland Protectorate and the former Italian trust territory of Somalia, was set up on July 1, 1960. British rule in Somaliland lasted from 1887 until June 26, 1960, with the exception of a short period in 1940–41 when the Protectorate was occupied by Italian forces. Somalia, formerly an Italian colony, was occupied by the United Kingdom from 1941 until the end of 1950, when it was placed under Italian administration by resolution of the United Nations. This trusteeship came to an end on July 1, 1960, when Somalia became independent and united with the former British Somaliland Protectorate under the title of the Somali Republic. The President of the Legislative Assembly of Somalia was elected provisional first President of the Republic. Aden Abdulle Osman was returned to office as the first substantive President of the Republic and a new government was formed on July 27, 1961.

CAPITAL.— Ψ Mogadishu, population (estimated 1956), 74,056. Other towns are Hargeisa (50,000), Kismayu (30,000), Ψ Berbera (19,000) and Burao (10,000).

FLAG.—Five-pointed white star on blue ground.

Assistant Army Attaché, Capt. S. A. Peddie.

Area and Population.—The Republic occupies the southernmost part of the African continent from the courses of the Limpopo, Malopo and Orange Rivers (34° $50'$ $22''$ South latitude) to the Cape of Good Hope, with the exception of Basutoland, Bechuanaland and Swaziland, and part of Mozambique. It has a total area of 472,359 square miles, and a total population (census of 1961, preliminary) of 15,841,128 (White, 3,067,638; African, 10,807,809; Coloured, 1,488,267; and Asian, 477,414). Populations of the Provinces at the 1961 census (preliminary figures) were: Cape Province (278,465 sq. miles), 5,308,839; Natal (33,578 sq. miles), 2,933,447; Transvaal (110,450 sq. miles), 6,225,052; Orange Free State (49,866 sq. miles), 1,373,790.

Zululand, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the districts of Babanango, Vrhaid and Ngotshe and by Swaziland. In 1951, the appointment was confirmed of Cyprian Bekuzulu, grandson of Dinizulu and great-grandson of Cetewayo, as Paramount Chief of the Zulus in Natal.

The southernmost province contains many parallel ranges, which rise in steps towards the

interior. The south-western peninsula contains the famous *Table Mountain* (3,582 feet), while the *Great Swartberg* and *Langberg* run in parallel lines from west to east of the Cape province. Between these two ranges and the *Roggeveld* and *Niuveld* ranges to the north is the *Great Karroo Plateau*, which is bounded on the east by the *Sneeuberg*, containing the highest summit in the province (*Kompasberg*, 7,800 feet). In the east are ranges which join the *Drakensberg* (11,000 feet) between Natal and the *Orange Free State*.

The *Orange Free State* presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopjes. The *Transvaal* is also mainly an elevated plateau with parallel ridges in the *Magaliesberg* and *Waterberg* ranges of no great height. The veld or plains of this northernmost province is divisible into the *High Veld* of the south, the *Bankenveld* of the centre, and the *Low Veld* of the north and east, the first and second forming the grazing and agricultural region of the *Transvaal* and the last a fertile sub-tropical area. The eastern province of *Natal* has pastoral lowlands and rich agricultural land between the slopes of the *Drakensberg* and the coast, the interior rising in terraces as in the southern provinces. The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the *Drakensberg* and flowing into the Atlantic between the Territory of *South West Africa* and the *Cape Province*. The *Limpopo*, or *Crocodile River*, in the north, rises in the *Transvaal* and flows into the *Indian Ocean* through *Portuguese East Africa*. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

Government.—The self-governing colonies of the *Cape of Good Hope*, *Natal*, the *Transvaal* and the *Orange River Colony* became united on May 31, 1910, under the *South Africa Act*, 1909, in a legislative union under the name of the *Union of South Africa*, the four colonies becoming *Provinces* of the *Union*. The *Union of South Africa* continued as a member of the *British Commonwealth* until 1961, the *Crown* being represented by a *Governor-General*. A referendum held among white voters on October 5, 1960, decided by a narrow majority in favour of *Republican status*. 1,633,772 votes were cast—a poll of 90.73 per cent.—with 52.05 per cent. in favour. The *Union of South Africa* became a republic on May 31, 1961, and withdrew from the *Commonwealth*. Mr. C. R. Swart, *Governor-General* of the *Union* from Jan. 12, 1960, resigned on April 30, 1961, and was elected the first *President* of the *Republic* on May 10, by an electoral college consisting of the members of both *Houses of Parliament*. The *President* assumed office on May 31, 1961.

The *Senate*, as reconstituted by the *Senate Act*, 1960, consists of 54 members, appointed or elected for a term of five years. Eleven are appointed by the *Government* (8 for the *Republic*, 2 for *South West Africa* and a *Coloured representative*). Forty-three are elected (*Transvaal*, 14; *Cape Province*, 11; *Natal* and *Orange Free State*, each 8; and *South West Africa*, 2). The *Act* of 1960 reintroduced proportional representation at elections to the *Senate* and excluded *Native representation*.

The *House of Assembly* consists of 160 elected members, 52 of whom represent the *Cape of Good Hope*, 26 *Natal*, 68 *Transvaal*, 14 the *Orange Free State*, and 6 *South West Africa*. There are also 4 members elected under the *Separate Representation of Voters Act*, 1951, to represent the electoral divisions for the coloured voters in the *Cape Province*. Members of both *Houses* must be *South*

African citizens of white descent. *White female franchise* was introduced under the provision of *Act No. 18* of 1930. *Cape Bantu voters* ceased to be entitled to elect 3 members in Nov. 1959.

In Nov., 1959, the party representation in the *House of Assembly* was as follows: *Nationalist Party*, 103; *United Party*, 53; *Representatives of Coloured Voters*, 4. Total, 160.

Defence.—The *South Africa Defence Act*, 1957, became law on Nov. 1, 1958. This *Act*, as amended in 1961, provides that every citizen between the ages of 17 and 65 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed course of peace training with the *Citizen Force or Commandos* spread over a period of four consecutive years. Thereafter citizens are required to serve with the *Reserve* for a prescribed period of time.

Education.—The *Provinces* have been relieved of all vocational education (technical and industrial), and the *Department of Education, Arts and Science* under the *Minister* is concerned with 9 *Universities*, 11 technical colleges, schools of industries, reformatories and *State technical, housecraft and commercial high schools* *State-aided vocational schools* and *State and State-aided special schools* for the physically handicapped. There are two non-white university colleges and three *Bantu university colleges*, students of these taking the examinations of the *University of South Africa*. The number of full-time students at the universities in June, 1960, was 26,947.

The central direction of public education (other than higher education) is exercised by the *Provincial Education Department* in each of the four *Provinces*. Each *Department* is controlled by a *Director*. The majority of schools for whites in all the *Provinces* are *state schools*. In all *Provinces* primary education in schools for all races is free. Secondary education in all the *Provinces* is also free, with an age limit of 19 years in the *Cape Province*. Expenditure on education in 1959-60 by the *Central Government* was R.41,823, and by provincial administrations R.122,667, a total for the *Republic* of R.164,490.

Communications.—The total open mileage of *Government-owned railway lines* at the end of March, 1960, was 13,564 miles, of which 12,771 miles were 3 ft. 6 in. gauge and 793 miles 2 ft. gauge. The capital expenditure on *Government railways* up to March 31, 1960, amounted to R.1,329,646,170. Working expenditure (excluding depreciation) amounted to R.197,683,598. Internal air services are operated between all the major centres in *South and South West Africa*. Regional air services are operated between *Johannesburg and Bulawayo* and *Johannesburg and Lourenço Marques*. The "Springbok Service" is operated jointly by *South African Airways* and the *British Overseas Airways Corporation*, using modern pressurized aircraft and providing a regular service between *Johannesburg and London*.

In 1960, *South African ports* handled about 17,984,025 tons of goods, excluding mail, passengers' baggage and stores, in the overseas trade and 972,000 tons in coastwise trade. The total harbour revenue for 1959-60 was R.17,573,932, the expenditure R.7,392,570. The principal ports are *Cape Town*, *Port Elizabeth*, and *East London (Cape Province)*; *Durban (Natal)*; *Walvis Bay* and *Luderitz Bay (S.-W. Africa)*.

On March 31, 1960, there were 3,280 post and 3,457 telegraph offices open.

Production and Trade.—The principal crops produced in 1958 (lbs. '000) were wheat, 1,617,885; barley, 23,925; oats, 87,276; kaffir corn, 531,200;

meat, 8,461,200; potatoes, 571,845; ground-nuts, 254,856. Mineral production is of the greatest importance in the South African economy, value of production in 1960 being: Gold, R.536,018,614; Diamonds, R.33,852,188; Coal, R.54,988,000; Copper, R.21,069,396; Tin, R.1,903,358; Silver, R.1,471,882; Asbestos, R.21,612,000; and Prescribed minerals, R.98,519,378. 42,079,084 tons of marketable coal was produced in 1960.

Value of trade in 1960 (with 1959 figures in italic type) was: R.1,111,540,344 (R.977,388,134); Exports, R.876,076,356 (R.857,832,144).

Trade with U.K.*

	1959	1960
Imports from U.K.	£148,899,724	£153,202,084
Exports to U.K.	89,263,574	97,083,368

*Excluding gold bullion and specie.

Currency.—The South African £ reached parity with the £ sterling in 1946. A new decimal currency the *Rand* (R.) was introduced in South Africa on Feb. 14, 1961, including the British High Commission Territories of Basutoland, Bechuanaland and Swaziland. By agreement with the International Monetary Fund the par value of the *Rand* had previously been fixed at 10s. sterling. Five silver coins, the *crown* (50 cents); *florin* (20 cents); *shilling* (10 cents); *6d.* (five cents); and *3d.* (2½ cents); and three bronze coins, 1 cent, ½-cent and ¼-cent, were struck for ordinary use. Sterling was expected to circulate for a period up to 20 months together with the new coinage before the change is complete. (See also p. 84.)

Finance.—Revenue of the Union of South Africa in 1959-60 totalled R.702,712,000 (1958-59, R.584,562,000); Expenditure, R.598,976,000 (1958-1959, R.561,860,000). The Gross Public Debt of the Union on March 31, 1960, was R2,464,000,000.

CAPITAL.—The administrative seat of the Government is PRETORIA, Transvaal; population (census of 1960, preliminary), 415,989; the seat of the Legislature is Ψ CAPE TOWN, population (1960), 731,484. Cape Town is 5,979 miles from Southampton; transit by mail steamship 14 days, and by air mail two days. There is a modern and well-equipped aerodrome seventeen miles by road from the centre of the city. Cape Town's harbour and docking facilities, existing and projected, are in keeping with its status as a world port of commercial and strategic importance. Other large towns are Johannesburg, Transvaal (1,096,541); Ψ Durban, Natal, the principal harbour on the south-east coast (655,370); Germiston, Transvaal (204,605); Ψ Port Elizabeth, Cape (270,815); BLOEMFONTEIN, capital of Orange Free State (140,924); Benoni, Transvaal (135,467); Springs, Transvaal (135,231); PIETERMARITZBURG, capital of Natal (95,124); Veerreniging-Vanderbyl Park, Transvaal (115,892); and Ψ East London, Cape (114,584).

FLAG.—Three horizontal stripes of equal width; from top to bottom, orange, white, blue; in the centre of the white stripe, the old Orange Free State flag hanging vertical, towards the pole the Union Jack horizontal, away from the pole the old Transvaal Vierkleur, all spread full. The national flag was adopted by the Union in 1927 and was flown side by side with the Union Jack. This practice was expected to be continued in Natal.

British Council Representative, R. T. Butlin, O.B.E.

South West Africa.

Administrator, D. T. du P. Viljoen.

SOUTH WEST AFRICA lies between S. lat. 17° 23' and the Orange River, with a narrow strip between 17° 30'–18° 20' S. lat. extending from 21° to 25° E. long., known as the Caprivi Zipfel, and gives access to the Zambesi. Off the coast are a number of guano islands (Hollandsbird, Mercury, Ichaboe, Seal, Penguin, Halifax, Long, Possession, Albatross, Pomona, Plumpudding, Sinclair and Roastbeef Islands).

The estimated area of the country is 318,261 square miles, and the population (1961 census, preliminary) is 525,064, of whom 73,154 are whites.

South West Africa was occupied by Germany in 1884, but at the conclusion of the War of 1914–1918 the territory was mandated to the Union of South Africa in accordance with the Treaty of Versailles. Under the Union Act No. 49 of 1919, the exercise of the mandate was vested in a Governor-General, who delegated his powers to an Administrator appointed by the Union Government. A limited measure of self-government was conferred upon the inhabitants by the Union Act No. 42 of 1925. Fundamental and far-reaching changes in the constitutional position of the Territory were introduced by the passing of the South-West Africa Affairs Amendment Act, 1949 (No. 23 of 1949). The Advisory Council was abolished and all 18 members of the Legislative Assembly are now chosen by the registered voters of the Territory.

The Territory is represented in the House of Assembly of the Republic of South Africa by six members duly elected by the registered voters of the Territory and in the Senate by four Senators, of which two are elected and two nominated by the Republican Government.

Generally speaking, only the Parliament of the Republic has the power to legislate on those matters in respect of which the Legislative Assembly is not competent to legislate, and the Legislative Assembly in respect of other matters.

On July 11, 1950, the International Court of Justice at The Hague delivered an opinion that South West Africa was still under international mandate; that international obligations resulting from the mandate were still incumbent on the Union, including obligation to submit reports on its administration; and that South Africa was not competent to modify its international status without consent of the United Nations.

The Capital of the Territory is Windhoek, which lies practically in the centre of the country at 5,500 ft. above sea-level. The ports are Ψ Walvis Bay and Ψ Luderitz.

Area and Population.—A National State in the south-west of Europe, between 36°-43' 45' N. lat. and 4° 25' E.-9° 20' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees. Continental Spain occupies about eleven-thirteenths of the Iberian peninsula, the remaining portion forming the Republic of Portugal. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and

605 by the Atlantic—and it comprises a total area of 190,700 square miles, with an estimated population (Dec., 1960) of 30,245,757. Provisional returns for 1960 gave 645,151 births, 271,979 deaths and 235,315 marriages. Infantile mortality was estimated at 3.53 per 100 births.

Physical Features.—The interior of the Iberian Peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, Sierra Morena, Sierra Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho.

Government.—Phoenician traders visited the peninsula more than a thousand years before the Christian era, but they were traders rather than settlers, although Cadiz has preserved its identity and claims to be "the oldest city in the world." The Roman occupation of Spain was completed after the close of the Second Punic War (201 B.C.) and Hispania was divided into two provinces. After the decline of the Roman Empire the Italian elements, which had partly displaced the Celts and Iberians, were in turn disturbed by settlers of Germanic origin. After the union of Aragon and Castile in the 15th century Spain was ruled by sovereigns of the Aragon, Habsburg and Bourbon lines (with the intervention of a Republic 1873-74). Alfonso XIII. succeeding at birth in 1886, On April 14, 1931, following the results of the Municipal Elections, which showed anti-monarchical feeling to be extremely high in all the chief towns of Spain, King Alfonso XIII. left the country, and the Queen and other members of the Royal Family on the following day. A Republic was immediately proclaimed and a Provisional Government, drawn from the various Republican and Socialist parties, was formed. The Republican Assembly (*Cortes*) was a single Chamber Congress of Deputies. Each Province had an Assembly (*Diputación Provincial*), and, with the approval of the *Cortes*, Provinces might combine to form an Autonomous Region within the Republic.

On July 18, 1936, a counter-revolution broke out in many military garrisons in Spanish Morocco and spread rapidly throughout Spain. The principal leader was General Francisco Franco Bahamonde, formerly Governor of the Canary Islands, from which office he was dismissed by the Azaña Government. The struggle, in its later phases, threatened to embroil some of the European Powers, those of Nazi-Fascist tendency lending aid to General Franco (leader of the Military-Fascist fusion, or *Falange*) while those of Communist views supported the Azaña (*Popular Front*) government. In October, 1938, many of the supporting troops were withdrawn, and on March 29, 1939, the Civil War was declared to have ended, the Popular Front Governments in Madrid and Barcelona surrendering to the Nationalists (as General Franco's followers were then named). On June 5, 1939, the Grand Council of the *Falange Española Tradicionalista y de las Juntas Ofensivas Nacional-Sindicalistas*, which replaced the former *Cortes*, met at Burgos to legislate for the reorganization of the country under the Presidency of General Franco, who had assumed the title of *Caudillo (Leader) of the Empire and Chief of the State*. In the Civil War of 1936-39 over 1,000,000 lives were lost.

On July 1, 1942, General Franco announced the re-institution of the *Cortes de España*, which was composed (May, 1955) of 515 members: *ex officio* members—16 ministers, 101 National Councilors of Falange, the President of the Council of State,

the President of the Supreme Court of Justice, the President of the Supreme Court of Military Justice, 22 rectors of universities, 3 presidents of Royal Academies, and 52 mayors of the provincial capitals including Ceuta and Melilla. *Elected Members*—153 representatives of national syndicates, 101 representatives of municipalities, 4 representatives of Royal Academies, and 15 representatives or professions. *Nominated Members*—50 persons of high ecclesiastical, military, administrative or social rank.

On April 1, 1947, a Law of Succession was promulgated creating two new bodies: the Council of the Realm and the Council of Regency. The main duty of the Council of the Realm is to nominate a successor to Generalissimo Franco should the latter not already have done so before the time of his decease or incapacitation. On July 6, 1947, a referendum asking approval of this law was announced (July 27) to have received 14,145,163 affirmative votes out of a recorded total of 15,219,563. Under this law a Regency Council of three was to be set up in the event of the death or incapacitation of the Head of the State.

Defence.—*Army*—Spain is divided into 9 Military Regions. Seven of these regions have a Corps headquarters with 2 infantry Divisions (with the exception of the 8th region, which has one Division). The 9th region has no Corps headquarters, and only one Division. There are independent commands in the Balearics and Canaries. There are also one armoured and one motorized cavalry Division. The Spanish Army in Morocco is being reorganized as a consequence of Moroccan independence.

The active *Navy* consists of 3 cruisers, 6 destroyers, 27 A/S escorts (destroyers, frigates and corvettes), 3 minelayers, 19 minesweepers, 3 landing ships, 2 squadrons of helicopters and a large number of small craft. An extensive modernization programme is being carried out, and is due to be completed in 1961.

The *Air Force* is divided into 5 Air Regions with 2 overseas Air Zones, and a separate, functional Air Defence Command. It consists of 5 Fighter Wings, 2 Fighter-Bomber Wings, 3 Light Bomber Wings and 2 Transport Wings, with many training and rescue aircraft.

Education.—Primary education is free, but compulsory attendance cannot be enforced because of the inadequate number of schools. Official figures of illiteracy in 1950 give a total number of illiterates, excluding children under 10, of 3,983,890, or 14.24 per cent. of the population (men, 9.86 per cent., women, 18.30 per cent.). There are 11 Universities in continental Spain and 1 at La Laguna in the Canary Islands. The University of Salamanca was founded in 1230, Valencia (1245), Oviedo (1317), Valladolid (1346), Barcelona (1450), Saragossa (1474), Santiago (1501), Seville (1502), Granada (1526), Madrid, Murcia (1915).

Language and Literature.—Castilian is the language of more than two-thirds of the population of Spain and is the form of Spanish spoken in Mexico, Central and (except in Brazil) Southern America. Basque, reported to have been the original language of Iberia, is spoken in the rural districts of Vizcaya, Guipuzcoa and Alava. Catalan is spoken in Provincial Spain, and Galician, spoken in the north-western provinces, is allied to Portuguese. The literature of Spain is one of the oldest and richest in the world, the *Poem of the Cid*, the earliest and best of the heroic songs of Spain, having been written about A.D. 1140. The outstanding writings of its golden age are those of Miguel de Cervantes Saavedra (1547-1616), Lope Felix de Vega Carpio (1562-1635) and Pedro Calderón de la Barca (1600-

1681). The Nobel Prize for Literature has three times been awarded to Spanish authors—J. Echegaray (1904), J. Benavente (1922) and Juan Ramón Jiménez (1956).

FINANCE 1960

Revenue.....	Pesetas 72,700,000,000
Expenditure.....	67,107,000,000

Public Debt (December 31, 1960) excluding parastatal entities and State-guaranteed issues: *Pesetas* 93,113,200,000.

The rate of exchange for the *peseta* in June, 1961, was 168.0 *pesetas* = £1 sterling (see also p. 84).

Production and Industry.—The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, apricots and grapes. The agricultural products include wheat, barley, oats, rice, hemp and flax. In 1960 the orange crop, of which Germany, France and the Netherlands were the chief importing countries, amounted to 1,600,000 tons. The vine is cultivated widely; in the south-west, Jerez, the well-known sherry and tent wines are produced. Exports of agricultural products in 1960 represented about 53 per cent. of Spain's export earnings.

Spain's mineral resources of coal, iron, wolfram, copper, lead and other ores are variously exploited. Many of the richer and more easily worked deposits have been exhausted, but the authorities are actively engaged in stimulating the exploitation of hitherto unworked or lower grade deposits. In 1960 the coal output amounted to 15,540,000 tons and iron ore 4,896,000 tons. The iron and steel industries produced 1,895,000 tons of pig iron and 1,958,000 tons of steel. Other production figures (in tons) included: cement, 5,180,000; lead, 71,000; zinc, 151,000; wolfram, 696; sulphuric acid, 1,107,000; paper, 345,000; cotton yarn, 80,760; and wool yarn 12,133. Production of electric power was 18,600 million kWh. The fishing industry is of importance.

The principal manufactures are textile goods of all kinds, footwear and other leather goods, ceramics, sewing machines, bicycles, chemical products and light engineering manufactures.

The tourist industry is becoming increasingly important and it is estimated that 4,332,363 tourists visited Spain in 1960.

Communications.—In 1960 there were 11,335 miles of railways in service. The sea-going mercantile marine in 1960 consisted of 1,742 vessels of 1,643,621 gross tons. Civil aviation is under the control of the Air Ministry; there are several inland and international services in operation.

TRADE

	1959 Pesetas	1960 Pesetas
Imports.....	47,690,405,000	43,280,199,000
Exports.....	29,859,709,000	43,501,454,000

Trade with U.K.

	1959 £	1960 £
Imports from U.K. .	£20,302,623	£24,772,276
Exports to U.K.	35,255,364	56,230,579

The principal imports are cotton, tobacco, cellulose, timber, coffee and cocoa, fertilizers, dyes, machinery, motor vehicles and agricultural tractors, wool and petroleum products. The principal exports include iron ore, cork, salt, vegetables, citrus fruits, wines, olive oil, potash, mercury, pyrites, tinned fruit and fish, bananas and tomatoes.

CAPITAL, Madrid. Population 2,000,000. Other large cities are Ψ Barcelona (1,800,000), Valencia

(543,000), Ψ Seville (500,000), Ψ Malaga (350,000), Zaragoza (301,000), Bilbao (281,000); Murcia (243,000).

BRITISH COUNCIL

Representative, D. A. A. Traversi, O.B.E., Calle de Almagro 5, Madrid.

There are British Institutes at Madrid, Barcelona, Seville and Valencia.

BRITISH CHAMBER OF COMMERCE OF SPAIN, Carrera San Jeronimo 28, Madrid; Paseo de Gracia 11 (Segundo), Barcelona; Pascual y Genis 22, Valencia.

Madrid, 1,150 miles; transit, 45 to 50 hours.

The BALEARIC ISLES are an archipelago off the east coast of Spain. There are four large islands (Majorca, Minorca, Iviz and Formentera), and seven smaller (Aire, Aucanada, Botafoch, Cabrera, Dragonera, Pinto and El Rey). The islands were occupied by the Romans after the destruction of Carthage and provided contingents of the celebrated Balearic slingers. The total area is 1,935 square miles, with a population of 441,842. The archipelago forms a province of Spain, the capital being Ψ Palma in Majorca, pop. 149,921; Ψ Mahon (Minorca), pop. 16,547.

The CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population of 908,718. The Canary Islands form two Provinces of Spain.—*Las Palmas* (Gran Canaria, Lanzarote, Fuerteventura and the islets of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos), with seat of administration at Ψ Las Palmas (pop. 177,746) in Gran Canaria, where major oil companies have installations for re-fuelling shipping; and *Santa Cruz de Tenerife* (Tenerife, La Palma, Gomera and Hierzo), with seat of administration at Ψ Santa Cruz in

Tenerife, pop. 124,462. Trade with U.K., 1960: Imports from U.K., £4,422,954; Exports, £13,132,074.

ISLA DE LOS FAISANES or ÎLE DE LA CONFÉRENCE is a Franco-Spanish condominium, under the Treaty of Bayonne Dec. 2, 1856, and March 27, 1901. It lies at the mouth of the Bidassoa in La Higuera bay. It is uninhabited.

Ψ CEUTA is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 square miles, with a population of 64,000.

Ψ MELILLA is a town on a rocky promontory of the Rif coast, connected with the mainland by a narrow isthmus. Melilla has been in Spanish possession since 1492. The population is 87,000. Ceuta and Melilla are parts of Metropolitan Spain.

Spanish Colonies

The Spanish Colonies consist of certain settlements in, and islands round the coast of, Africa, with a total area of close on 82,400 square miles, and a population estimated in 1935 at 951,000.

SPANISH GUINEA, consisting of the islands of Fernando Póo and Annobon, the Corisco Islands and Rio Muni (mainland) was divided into two provinces on April 1, 1960, each becoming a province of Metropolitan Spain under a civil governor, the inhabitants having the same rights as Spanish citizens. *Fernando Póo* lies in the Bight of Biafra in 3° 12' N. lat. and 8° 48' E. long., about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar-cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. With its dependencies it has an area of about 800 square miles, and a population estimated at 34,200. The capital of Spanish Guinea is Ψ Santa Isabel (pop. 9,000) on the island of Fernando Póo. The total area, mainland and islands, is about 10,000 sq. miles, with an estimated population of 204,495, of whom about 4,124 are whites.

Annobon Island (Anno Bom), in the Gulf of Guinea, in 1° 24' S. lat. and 5° 3 E. long.; population 1,410.

Corisco Islands, consisting of Corisco, Elobey Grande, and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce.

Rio Muni (the second province) is a coastal settlement between Cameroon and Congo (1° N.—2° 10' N. lat.), extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni Benito and Campa rivers, and at Ψ Bata (the principal town) on the coast.

WESTERN SAHARA.—Spanish possessions in the Western Sahara consist of two provinces—Ifrni and Spanish Sahara. Ifrni (capital, Sidi Ifrni) extends on the coast from the mouth of Bou Sedra (Asif Salogvad) (approximately 29° 38' N. lat.) to the River Assaka (Nun) which forms the S.W. boundary. The eastern boundary runs between 9° 50' and 9° 55' W. long. The coast line is 36 miles in length and the territory measures approximately 950 square miles. The province of Spanish Sahara extends from 27° 40' N. lat. in the north to La Agüera (Cape Blanco) in the south, though the main southern boundary runs along latitude 21° 20'. The land area is approximately 125,000 square miles. Spanish Sahara is divided into two regions separated by latitude 26° which passes south of Cape Bojador. The northern region is the Seguela el Hamra (Rio Rojo) of which

the capital is Aaiun. It extends eastward to approximately $8^{\circ} 40'$ W. long. The southern region is the Río de Oro, of which the capital is Villa Cisneros. Its eastern boundary is approximately 12° W. long. Total population about 36,000.

SPANISH MOROCCO.—In addition to Ceuta and Melilla, Spain exercised until 1956 a protectorate over a part of Northern Morocco. Moroccan independence was proclaimed after negotiations with France and Spain in 1956 (see "Morocco"). Remaining Spanish settlements on the Moroccan seaboard are:—

Alhucemas, the bay of that name includes six islands: population 366.

Peñon de la Gomera (or *Peñon de Velez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay; population 450.

The Chafarinas (or *Zaffarines*) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population 610.

SUDAN

(Republic of the Sudan)

Council of Ministers

President, Prime Minister, Minister of Defence and Commander-in-Chief, Ferik Ibrahim Abboud.

Minister of Information and Labour, Lewa Mohammed Talaat Farid.

Works and Mineral Resources, Lewa Ahmed Rida Farid.

Minister of State for Headquarters and Deputy Commander-in-Chief, Lewa Hassan Beshir Nasr.

Communications, Lewa Ahmed Magdoub El Bahari. *Commerce, Industry and Supply*, Miralai Mohammed Ahmed Irwa.

Interior and Local Government, Miralai El Magboul El Amin El Hag.

Education and Justice, Sayed Ziada Osman Arbab.

Finance and Economics, Sayed Abdel Magid Ahmed.

Foreign Affairs, Sayed Ahmed Mohammed Khair.

Health, Sayed Dr. Mohammed Ahmed Ali.

Animal Resources, Sayed Santino Deng.

Agriculture, Irrigation and Hydro-Electric Power, Sayed Mekki El Manna.

[The first seven Ministers are also members of the Supreme Council for the Armed Forces.]

SUDANESE EMBASSY IN LONDON

3 Cleveland Row, S.W.1.

[Trafalgar: 8080]

Ambassador Extraordinary and Plenipotentiary, His Excellency Sayed Amin Ahmed Hussein (1961). *1st Secretaries*, Baghir Abdel Mutaal; Mohamed Kamal el Bakri.

3rd Secretary, Ali Yassein Geily.

Military, Naval and Air Attaché, Col. Sulciman Ibrahim Mohamed.

Cultural Attaché, Bushra Abdel Rahman Soghayer. *Assistant Cultural Attaché*, Shafik Shawgi.

Area and Population.—The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, $3^{\circ} 36'$ N. lat., and reaches from French Equatorial Africa about $21^{\circ} 49'$ E. (at $12^{\circ} 45'$ N.) to the north-west boundary of Eritrea at $38^{\circ} 35'$ E. (at 18° N.). The greatest length from north to south is approximately 1,300 miles, and from east to west 950 miles.

The northern boundary is the 22nd parallel of North latitude; on the east lie the Red Sea, Eritrea and Ethiopia; on the south lie Kenya Colony, the British Protectorate of Uganda and

the Belgian Congo; and on the west French Equatorial Africa and Libya.

The *White Nile* enters from Uganda at the Sudan frontier post of Nimule in Equatoria Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. The *Blue Nile* flows from Lake Tana on the Ethiopian Plateau. Its course in the Sudan is nearly 500 miles long, before it joins the *White Nile* at Khartoum. The next confluence of importance is at Atbara where the main Nile is joined by the River Atbara. The total length of the Nile, now accepted as the longest river in the world, is estimated to be 4,160 miles from its source to the Mediterranean Sea. Between Khartoum and Wadi Halfa occur five of the six *Cataracts*.

The estimated area is about 976,750 sq. miles, with a population of 10,262,556 (census, 1956), partly Arabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 8,000 Europeans. The Arabs and Nubians are all Moslems. The Negroes are generally pagans, but some have been converted to Christianity and others are beginning to go over to Islam. Population of provinces at the census of 1956 was: Bahr-el-Ghazal 991,022; Blue Nile 2,069,646; Darfur 1,328,765; Equatoria 903,503; Kassala 941,039; Khartoum 504,923; Kordofan 1,761,968; Northern 873,059; Upper Nile 888,611.

Government.—By virtue of the Condominium Agreement of 1899 between H.M. Government and the Egyptian Government, and Article 11 of the Anglo-Egyptian Treaty of 1936, the Sudan was administered by a Governor-General on the joint behalf of Great Britain and of Egypt.

On February 12, 1953, an Anglo-Egyptian Agreement guaranteed to the Sudanese the right to determine their own future and reserved the sovereignty of the Sudan until the day of self-determination for the Sudanese. The first Sudanese General Election was held at the end of 1953.

The Sudan House of Representatives on Dec. 19, 1955, voted unanimously a declaration that the Sudan was a fully independent sovereign state, and on Jan. 2, 1956, the Republic was proclaimed and was recognized by Great Britain and Egypt, a Supreme Commission being sworn in to take over sovereignty. On November 17, 1958, by means of a *coup d'état*, the Army took over control of the country. The constitution was suspended, Parliament and political parties dissolved. A Supreme Council of the Armed Forces and a Council of Ministers were set up.

Education.—Arabic has been adopted as the national language, and the Government has taken over formal education in the southern provinces, which had hitherto been largely in the hands of various Christian Missions. The University of Khartoum (formerly Gordon Memorial College) was raised to university status on July 24, 1956. It has over 1,300 students. There are 13 boys' and 2 girls' secondary schools with 5,403 boys and 586 girls; 132 boys' and 29 girls' intermediate schools with 19,351 boys and 3,947 girls; 668 boys' and 292 girls' elementary schools with 123,077 boys and 48,887 girls; 1,382 junior elementary schools with 135,824 pupils; 15 technical intermediate boys' schools with 1,694 pupils and 5 technical secondary schools with 711 pupils. Khartoum Technical Institute has 727 students. There are 4 training centres for men with 553 students and 2 training centres for women with 176 students. A training centre for intermediate school teachers has 162 students. In addition there are 272 non-government schools of various grades.

Production.—The principal grain crop is *dura* (great millet), the staple food of the people in the Sudan. Sesame and ground-nuts are other important food crops, which also yield an exportable surplus and a promising start has been made with castor seed. The principal export crop is cotton. Main production is of long-staple (Egyptian type) cotton, but smaller quantities of short-staple (American type) cotton are also grown. Much of the high quality, long-staple cotton is provided by the Sudan Gezira Scheme, a Government-controlled project irrigated from the Sennar Dam on the Blue Nile. An extension to this known as the South West Extension (Managil Scheme) has also been producing long staple cotton since 1959. The Sudan also produces the bulk of the world's supply of gum arabic. Livestock is the mainstay of the nomadic Arab tribes of the desert and the negro tribes of the swamp and wooded grassland country in the South.

Communications.—The railway system (3 ft. 6 in. gauge) has a route length of about 3,200 miles, linking Khartoum with Wadi Halfa, Port Sudan, Wad Medani, Sennar, Kosti, El Obeid and Nyala. A line branching out southwards to Wan from the Sennar/Nyala western line has reached Aweil. Regular rail and Nile steamer services (operated by Sudan Railways) connect with the Egyptian State Railways to the North, and with the East African Railways and Steamers system to the South. Port Sudan is a well-equipped modern seaport. Sudan Airways run regular services from Khartoum to many parts of the Sudan and to Egypt, Greece, Italy, the Lebanon, Aden and the United Kingdom.

FINANCE

	1961-62*
Revenue.....	£S57,015,874

Area and Population.—Sweden occupies the eastern half of the Scandinavian peninsula in N.W. Europe and comprises 25 local government districts, "Län," with an area of 173,436 sq. miles, and a population, Jan. 1, 1960, of 7,471,345. Of the 48,104 foreigners (non-Scandinavians) with permission to reside in Sweden, about 5,600 are Baltic refugees and 19,000 Germans. In 1959 there were 104,844 births (14.0 per 1,000 inhabitants), 70,922 deaths (9.5 per 1,000) and 49,899 marriages (6.7 per 1,000). In 1959 the infantile mortality rate was 16.4 per 1,000.

* This is the official title of the King of Sweden.

Government.—Under the Constitution of June 6, 1809 (with amendments) the throne is hereditary in the House of Bernadotte, Prince of Ponte Corvo, a Marshal of France, who was invited to accept the title of Crown Prince, with succession to the throne. The Marshal landed at Helsingborg on Oct. 20, 1810, and succeeded Charles XIII. in 1818. There is a Diet (*Riksdag*) of two Chambers, *Första Kammaren* of 150 members, elected for 8 years; and *Andra Kammaren* of 230 members, elected for 4 years. The Council of Ministers (*Statsråd*) is responsible to the Riksdag.

Production and Industry.—About 22 per cent. of the working population is devoted to agriculture, forestry and fisheries, about 282,000 being owners and 51,000 tenants of the land they cultivate. The country may be divided into three separate districts, the northern, forest; central, mining, industrial agricultural and forest; the southern, agricultural and industrial. The climate in the south is favourable for producing grain. The principal articles of cultivation are oats, wheat, rye, barley, potatoes, roots, oiliferous plants and grasses. Dairy produce, however, accounts for about half the value of Swedish agricultural production. Sweden contains the great lakes of Vänern, Vättern, Mälaren and Hjälmaren. The forests are very extensive, covering over one-half of the surface of the country, and consisting chiefly of pine, spruce and birch; these are of great importance, supplying timber, pitch, fuel and tar, in addition to sulphite, sulphate and mechanical wood pulp for the paper-making and rayon industries. The mineral resources are extremely rich; iron ore of excellent quality; lead, zinc, sulphur, manganese, arsenic, gold, granite and marble. There are also considerable deposits of low grade uranium ore. There is a railroad opening up the rich iron-ore districts of Lapland and mineral trains run from Gällivare and Kiruna to Luleå on the Gulf of Bothnia and to Narvik on the Atlantic; small quantities of coal are worked in Scania (Skåne).

In 1958 there were 16,587 industrial establishments (including mines and quarries) employing 676,646 operatives, and 187,375 in administrative and executive posts. The fishing industry landed catches valued at Kr. 162,257,000 in 1959.

Communications.—Railroads totalling 9,740 miles in length (of which 9,170 are the property of the State) were open on January 1, 1960. At the beginning of 1960 there were 353 telephones for every 1,000 of the population, 359 per 1,000 had obtained wireless licences and at the beginning of 1961 the number of television licences issued totalled about 1,050,000. The number of private cars in use on the same date was estimated at about 1,100,000 or 1 to every 7 of the population. The Mercantile Marine (March, 1961), consisted of a total of 1,482 ships of 3,836,000 gross tons. Civil aviation is under the control of the Ministry of Communications, under whose supervision all matters concerning civil aviation are handled by the Department of Civil Aviation. Regular domestic air traffic is maintained by the Scandinavian Airlines system (on behalf of the Swedish Airlines) and by A. B. Linjeflyg. Regular European and intercontinental air traffic is maintained within the framework of the Scandinavian Airlines System in Copenhagen by the Swedish Airlines in collaboration with the Danish and Norwegian Airlines.

Defence.—Service in the Defence Forces is universal and compulsory, between 35,000 and 40,000 being trained annually; strength of the Army during the war of 1939-45 was about 500,000, equipped on modern lines and principally mechanized. The Navy consists of 2 cruisers, 8 destroyers, 13 frigates, 37 motor torpedo boats, 21 submarines and a large

number of minor craft and auxiliaries. The naval stations are Stockholm, Karlskrona and Göteborg. The Air Force consists of 20 wings, chiefly fighters.

Religion.—The State religion is Lutheran Protestant, to which over 95 per cent. of the people adhere.

Language and Literature.—Swedish is one of the Germanic languages spoken by the people of Scandinavia and is closely allied to Icelandic, Danish and Norwegian. Swedish national literature may be dated from the foundation of the University of Uppsala in 1477 and reached its golden age under Gustavus III. (1771-1792), who founded the Swedish Academy in 1786. Among modern Swedish authors who have achieved world-wide reputations are August Strindberg (1849-1912), dramatist and novelist; Selma Lagerlöf (1858-1940), who was awarded the Nobel Prize for Literature in 1909 on account of her pre-eminence as a novelist; Verner von Heidenstam (1859-1940), poet and Nobel Prize-winner (1916); Erik A. Karlfeldt (1864-1931), Nobel Prize-winner in 1931 after his death, and Par Lagerkvist, Nobel Prize-winner, 1951. In 1961 there were 180 daily newspapers in the country, 5 major papers being published at Stockholm, 4 at Göteborg and 4 at Malmö.

Education.—(i.) *Primary:* Compulsory and free. Maintained by the State and by local taxation. Attendance good. (ii.) *Secondary:* Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technics, commerce and navigation. (iv.) *Universities:* State Universities at Uppsala (founded 1477); Lund (founded 1668); Stockholm and Göteborg.

Consul and Head of Chancery, Ernst Ribi.

There is a Swiss Consulate in Manchester.

Area and Population—The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50'–47° 48' N. lat. and 5° 58'–10° 3' E. long. It is composed of 22 Cantons, 3

subdivided, making 25 in all, of very dissimilar size, united under a Constitution dated May 29, 1874, and comprises a total area of 15,950 square miles, with a population (Dec. 31, 1960) of 5,429,061. In 1960 there were 94,372 live births, 52,094 deaths and 41,574 marriages. The infant mortality rate was 12 per 1,000 live births. In 1950, out of a total of 4,714,992, 56 per cent. of the population was Protestant, 41 per cent. Roman Catholic and 0.4 per cent. Jewish.

Physical Features.—Switzerland is the most mountainous country in all Europe. The Alps, covered with perennial snow and from 5,000 to 15,217 feet in height, occupy its southern and eastern frontiers, and the chief part of its interior; and the Jura mountains rise in the north-west. The Alps occupy 61 per cent., and the Jura mountains 12 per cent., of the country. The Alps are a crescent-shaped mountain system situated in France, Italy, Switzerland, Bavaria and Austria, covering an area of 80,000 square miles from the Mediterranean to the Danube (600 miles). The highest peak, Mont Blanc, Pennine Alps (15,732 feet) is partly in France and Italy; Monte Rosa (15,217 feet) and Matterhorn (14,780 feet) are partly in Switzerland and partly in Italy. The highest wholly Swiss peaks are Finsteraarhorn (14,026), Aletschhorn (13,711), Jungfrau (13,671), Mönch (13,456), Eiger (13,040), Schreckhorn (13,385), and Wetterhorn (12,150) in the Bernese Alps, and Dom (14,918), Weisshorn (14,803) and Breithorn (13,685).

The Swiss lakes are famous for their beauty and include Lakes Maggiore, Zürich, Lucerne, Neuchâtel, Geneva, Constance, Thun, Zug, Lugano, Walensee and Brienz.

Production and Industry.—Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables as well as grapes are grown. Dairying and stock-raising are the principal industries, about 3,000,000 acres being under grass for hay and 2,000,000 acres pasturage. The forests cover about one-quarter of the whole surface. The chief manufacturing industries comprise engineering and other metal-lurgical industries, clothing, watchmaking, wood-working, foodstuffs, chemicals, cotton, silk and rayon, embroidery and footwear.

Government.—The legislative power is vested in a Parliament, consisting of two Chambers, a National Council (*Nationalrat*) of 196 members, and a Council of States (*Ständerat*) of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council (*Bundesrat*) of 7 members, elected for four years by the Federal Assembly and presided over by the President of the Confederation. The members of the Federal Council are elected for four years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year. Not more than one of the same canton may be elected member of the Federal Council; on the other hand, there is a tradition that Italian and French-speaking areas should between them be represented on the Federal Council by at least two members.

Defence.—*Army*. Elite (ages 20 to 36), 16 yrs.; initial training, 118 days. Subsequently 8 training periods of 21 days; then Landwehr (36 to 48) and Landsturm (48 to 60). Under the proposed reorganization of the Swiss forces, the ages for military service will be reduced as follows: Elite, 20–32 years, Landwehr, 33–42, Landsturm, 43–50.

* The President is elected in December and remains in office from Jan. 1 to Dec. 31; he is generally succeeded by the Vice-President.

Air Force. Ground personnel: as Army. Flying personnel: age 20 to 36. Initial training 1 year. 6 weeks with squadron each year and completion of 70 hours' flying. After 36 revert to ground duties with Air Force or Army.

Communications.—By the end of May, 1960, the electrification of the entire Federal Railways' system of some 3,215 miles of track was completed. At the end of 1960, there were 39,535 miles of telegraph and telephone lines. By Dec. 31, 1960, the number of telephone subscribers amounted to 1,090,975 and the network was fully automatic throughout the country. There were also 1,444,975 licensed radio receivers and 128,956 television receivers. At the end of 1959, the total length of first-class roads was 10,840 miles. The number of motor vehicles licensed on Sept. 30, 1960, was 865,106 (485,233 private cars, 291,326 motor cycles and motor scooters, 3,127 motor buses, 79,196 motor lorries and 6,224 tractors). A merchant marine, established in 1940, consisted in 1960 of 26 vessels with a total displacement of 139,693 tons (gross). In addition 433 vessels with a total tonnage of 376,233 were engaged in Rhine shipping. In 1960, goods handled at the Basle Rhine Port amounted to 6,961,750 tons. 115 lake vessels transported 9,931,000 passengers and 577,362 tons of freight in 1958. During 1960, Swissair flew 31,996,000 kilometres and carried 1,285,520 passengers.

Education.—Control by cantonal and communal authorities. No central organ. Illiteracy practically unknown. (i.) *Primary*: Free and compulsory. School age varies, generally 7 to 14. (ii.) *Secondary*: Age 12–15 for boys and girls. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities*: Basle (founded 1460), Basle (1834), Fribourg (1889), Geneva (1873), Lausanne (1890), Zürich (1832), and Neuchâtel (1909), and the technical University of Zürich and commercial University of St. Gall.

Language and Literature.—There are three official languages: French, German and Italian. In addition Romansch is recognized as a national, but not an official language. German is the dominating language in 19 of the 25 cantons; French in Fribourg, Geneva, Neuchâtel, Valais and Vaud; Italian in Ticino, and Romansch in parts of the Grisons. Many modern authors, alike in the German school and in the Suisse Romande, have achieved international fame. Karl Spitteler (1845–1924) and Hermann Hesse (1877–) were awarded the Nobel Prize for Literature, the former in 1919, the latter in 1947.

ROYAL THAI EMBASSY IN LONDON

21–23 Ashburn Place, S.W. 7 [Frobisher: 2983]; 28 Princes Gate, S.W. 7 [Knightsbridge: 5421].

Ambassador in London, His Excellency Mom Luang Peckdhip Malakul (1958).

Area and Population.—The Kingdom of Thailand, or Muang Thai, formerly known as Siam, has an area of 198,247 sq. miles with a population (estimated

1960) of 25,500,000. Thailand is in South-Eastern Asia. It has a common boundary with the Federation of Malaya in the south, and is bounded on the west and north-west by the Union of Burma and in the north-east and east by the Kingdoms of Laos and Cambodia, which were formerly part of the French Colony of Indo-China. Although there is no common boundary between Thailand and China, the Chinese province of Yunnan is only separated from the Thai northern border by a narrow stretch of Burmese and Lao territory. The country slopes southwards from the north-west and from the great mountains of Tibet. The principal rivers are the Salween (which forms a boundary with Burma for 200 miles), the Menam Chao Phya with its tributary the Meping (which are Thai throughout) and the Mekong and its tributaries, which water the eastern plateau.

Government.—Thailand is a sovereign independent state. Under the interim constitution promulgated in February, 1959, following on the bloodless revolution of October, 1958, the King exercises legislative power by and with the advice and consent of a Constituent Assembly, executive power through the Council of Ministers and judicial power through the courts established by law. He is advised by a Privy Council appointed by himself. The 240 members of the Constituent Assembly, who were appointed in February, 1959, under the terms of the interim constitution, as well as acting for the time being as the national legislature, have the additional task of drafting a permanent constitution for Thailand, but no definite date has yet been set for the completion of this.

Language, Religion and Education.—Thai is basically a monosyllabic, tonal language, a branch of the Indo-Chinese linguistic family. The principal religion is Buddhism, its followers numbering over 16 millions in 1953, with 627,435 Moslems and some 70,000 Christians. The 2,500th anniversary of the Buddhist Era was celebrated in Bangkok from May 12-15, 1957, with religious and public ceremonies. Primary education is compulsory and free and secondary education in Government Schools is free. In 1960 there were 27,374 schools of all kinds, with 4,344,689 pupils and 131,651 teachers. There are 5 Universities attended by 40,829 students, 34 training colleges and 196 vocational schools (all types).

Production and Industry.—The country's most important products are agricultural or forest; rice (about 4,500,000 tons a year), rubber (about 170,000 tons a year and increasing) and timber (about 1,300,000 cubic metres a year and decreasing). Other crops of some importance are sugar cane, tapioca, kenaf, groundnuts, tobacco, maize, soya beans and coconuts.

As regards mineral wealth, tin (production about 10,000 tons a year) is important, and small amounts of wolfram, iron and lead ores are mined, and over 100,000 tons of lignite. Upwards of 200,000 tons a year of salt is produced by sea-water evaporation, but production is declining owing to marketing difficulties.

Much emphasis has been laid since 1959 on the encouragement of foreign investment in new local industries. By mid-1960 forty contracts had been signed for investment of this sort, including 4 car assembly plants, two pharmaceutical factories (the latter already in production), as well as textile, electrical bulb and appliances, and a wide range of other factories of moderate size.

Up to 1959, industry had been comparatively undeveloped in Thailand; but industries established previously include: cement, sugar, a little iron and

steel, soap products, cigarettes, leather, glassware, ceramics, gunny bags, paper, textiles, marble, plywood and shaving board and tapioca. Cottage industries produce silk and cotton textiles in substantial quantity, and these and the local black-engraved (niello) silverware and bronzeware are popular with visitors.

Communications.—About 2,250 miles of State-owned railways were open to traffic in 1961. The track is metre gauge. Main lines run from Bangkok to Aranya Pradet, linking up with the Cambodian state railway at this border town (160 miles E.); via Korat to Ubol (about 352 miles E.) and to Nongkhai (415 miles N.E.) the ferry terminal on the River Mekhong opposite Vientiane, capital of Laos; to Chiangmai (411 miles N.); and to Haadyai (600 miles S.), whence lines go down the eastern and western sides of the Malayan Peninsula, via Sungai Golok and Penang respectively, to Singapore.

In 1960 the country had about 6,000 miles of main, all-weather roads, of which about 1,000 miles might be termed first-class. A large road-building programme is in preparation. Bangkok is an international airport of importance, and services connect it with Europe, America, India, Pakistan, Japan and Australasia, as well as other parts of S.E. Asia. The Thai Airways Company has internal services between Bangkok and all the principal towns, and a new company, Thai Airways International (THAI), was formed in 1960 in association with SAS to operate international routes. There are about 14,500 miles of telegraph lines. The harbour at Bangkok can take vessels up to 10,000 tons dead weight.

	FINANCE	1960	1961
		Millions of Baht	
Budget Estimates			
Total revenue	7,700	8,000
Total expenditure	7,700	8,000

Since 1953 Thailand has received a total of U.S.\$106,000,000 in loans from the International Bank for rehabilitation and development of railways, the port of Bangkok, and irrigation, including the latest loan (in 1957) of \$66,000,000 for the Yan-Hee hydro-electric project.

The value of United States economic and technical aid to Thailand amounted by July, 1960 (the beginning of the U.S. fiscal year) to U.S.\$275,200,000 (including \$46,200,000 in loans); the expected programme for 1961 being about \$24,300,000. In addition, the military aid programme up to the end of the fiscal year 1959 cost \$304,718,000 (\$17,000,000 in 1959) and the estimate for 1960 was \$24,782,000.

The exchange rate for the Baht is not officially fixed, but has for some time remained in the neighbourhood of Baht 59 = £1 sterling, with little fluctuation. Foreign exchange reserves are at present sufficient and steady, and the currency backing is 60 per cent.

	TRADE	1960	
		Millions of Baht	£ sterling
Total imports (c.i.f.)	9,362	159,000,000
Total exports	8,610	146,000,000

	Trade with U.K.	1959	1960
Imports from U.K.	£12,480,064	£12,432,861
Exports to U.K.	2,006,966	3,790,322

In 1960 the value of rubber exports equalled the value of rice exports. These two commodities together accounted for about 60 per cent. of the total value of all Thailand's exports. Other exports consisted mainly of tin, live cattle, eggs,

maize, tapioca, teak, hides and skins and lac. Main imports are textiles, metal manufactures, machinery, vehicles and transport equipment, chemicals and petroleum products.

CAPITAL. Ψ Bangkok (with Dhonburi), pop. 1,660—2,318,000; in the delta of the Manam Chao Phya. Other centres are Chiangmai, Nakorn Sawaan and Korat, but no other town approaches Bangkok in size or importance.

FLAG.—Five horizontal bands, red, white, dark blue, white, red (the blue band twice the width of the others).

BRITISH COUNCIL

Representative, R. Bruce, 122 Chakrapetr Road, Bangkok.

TOGO (Republic of Togo)

President, Sylvanus Olimpio, assumed office as Head of State April 27, 1960; elected President, April 9, 1961.

Minister of State and Minister for Foreign Affairs, Paulin Freitas.

The Republic occupies a narrow strip of territory running north from a short coast-line on the Gulf of Guinea and lies between the Republics of Ghana on the west and Dahomey on the east. It has an area of 36,000 sq. miles and a total population of 2,500,000, including people of several African races. The Ewe race are in a majority in the south. The economy of Togo is largely agricultural, the main exports being coffee, cocoa, palm kernels, copra, cotton and manioc. A promising start has been made in the growing of teak. Development of phosphate mines by a group of French companies began in 1955 and it was expected that exports rising to 600,000 tons would begin in 1961.

Trade with U.K.

	1959	1960
Imports from U.K.....	£348,397	£457,284
Exports to U.K.....	47,742	116,938

Formerly part of the German colony of Togoland surrendered by France as a mandated territory and from 1946 as a trusteeship under the auspices of the United Nations Organization. On November 14, 1958, the United Nations General Assembly voted for the cancellation of the trusteeship and for the establishment of an independent state at a date in 1960 to be agreed between Togoland and France. Accordingly, the Republic of Togo was set up as an independent state on April 27, 1960. A new constitution was adopted and a President elected on April 9, 1961.

CAPITAL.—Ψ Lomé (70,000).

FLAG.—Green and yellow horizontal stripes; a quarter in red in one corner bearing a white star.

BRITISH EMBASSY

Ambassador Extraordinary and Plenipotentiary, His Excellency John Hugh Adam Watson, C.M.G. (1959) (Resident at Dakar).

British Chargé d'Affaires at Lomé, Togo, J. W. S. Corbett, D.S.O.

TRUCIAL STATES

Seven independent Shaikhdoms, known collectively as the Trucial States, have treaty relations with the British Government originating in treaties to prevent slavery and the piracy, which formerly gave the name of "The Pirate Coast" to this area, and to maintain a perpetual maritime truce. The earliest treaty dates from 1820.

The British Government, by virtue of a treaty made in 1892, is responsible for the external affairs of the states through the British Political Resident in the Persian Gulf and the British Political Agent in the Trucial States. Six of the states lie on the coast of the Gulf between the Musandam peninsula in the East and the Qatar peninsula in the West and one, Fujairah, lies on the Gulf of Oman. The approximate combined area of the states is 32,000 square miles and the estimated population is about 86,000. Security in the area is maintained by the Trucial Oman Scouts, the force having its headquarters at Sharjah.

Revenue is chiefly derived from customs dues on imports and oil concession payments. The export of dried fish is also a significant source of revenue and some pearling is carried on. Petroleum Development (Trucial Coast) Ltd. holds concessions in all the states except Fujairah, Ras al Khaimah and Sharjah. The British Government has financed a Trucial States Development Fund to contribute to the material welfare of the people, particularly in the field of health, agriculture and education and Kuwait and Qatar have also contributed educational assistance to the states. There is a hospital in Dubai and dispensaries in all the states. Her Majesty's Courts have jurisdiction over certain categories of foreigners. The Rulers of all the states meet together in the Trucial Council to discuss matters of mutual interest twice or three times a year. The currency is the Persian Gulf Indian rupee.

Abu Dhabi is the largest of the Trucial States in area, stretching from the Khor el Odaid in the West to the borders with Dubai in the region of Jebel Ali. It includes seven villages of the Buraimi oasis and a number of settlements in the series of oases known as the Liwa. Two oil companies are operating in Abu Dhabi territory, Petroleum Development (Trucial Coast) Ltd. on land and Abu Dhabi Marine Areas Ltd. in the Abu Dhabi off-shore concession area. Oil has been discovered off Das Island, where the latter company has its headquarters and production is expected to start in 1962. There are airfields at Abu Dhabi and at Das Island. A cable office was opened in Abu Dhabi at the end of 1960 and the British Bank of the Middle East has a branch there. Ψ *Dubai* is by far the largest town in the Trucial States and has a population estimated at about 40,000. It is the main port for the import of goods into the Trucial States and the interior of Oman, and there is also a lively entrepôt trade. The value of imports in the year 1960 was over £6,000,000. It has a good natural harbour, improvements to which began in 1959. An airport was completed in 1960 and the Dubai Telephone Company commenced operations in the same year. The main source of revenue is from customs. Wireless communications are managed by International Aeradio Limited and the Post Office is run by the British G.P.O. *Sharjah* has a port, much silted up, and a diminishing entrepôt trade. It has an airport served by Gulf Aviation which connects it with Doha, Bahrain, Kuwait and Muscat. *Sharjah* has dependencies on the Batinah coast at Khor Fakkan, which forms a good natural harbour, Kalba and Dibba. The Eastern Bank has a branch in Sharjah. There is a

trade school there run by the British Government. *Ajman* is the smallest state, having a population of only about 3,000. It has inland enclaves at Manama and Masfut. *Umm el Quwain* does a small trade in dried fish. It has an oasis at Falaj al Mu'alla where palms and some fruit are grown. *Ras al Khaimah* has a population of about 7,000, of whom about half live in the town. It is an ancient seaport near which some remains of archaeological interest have been found. Dates, vegetables and tobacco are grown. An agricultural experimental station and agricultural school have been opened in Ras al Khaimah territory under the Trucial States Development Scheme. *Fujairah* was recognized as one of the Trucial States in 1952. The inhabitants are in the main cultivators in the mountains of the Musandam peninsula and on the Batinah coast. The most important export is tobacco.

British Political Agent, Trucial States, D. F. Hawley, M.B.E. (resident at Dubai).

British Political Officer, Abu Dhabi, R. O. Miles (acting).

[Knightsbridge: 5167]

Ambassador, His Excellency Taieb Slim.

Secretaries, Hachemi Wanès; Miss Faïka Farouk; Said ben Ammar.

Area and Population.—Tunisia lies between Algeria and Libya and extends southwards to the Sahara Desert, with a total area of 45,000 sq. miles. A census held in connection with the preparation of electoral registers showed (Feb., 1956) a total population of 3,800,000 of whom 3,430,000 were Tunisians.

Government.—A French Protectorate from 1881 to 1956, Tunisia became an independent sovereign State with the signing on March 20, 1956, of an agreement whereby France recognized Tunisia's independence and right to conduct her own foreign policy and to form a Tunisian Army. The United Kingdom formally recognized Tunisia as an independent and sovereign state on May 10, 1956. Following a first general election held on March 25, 1956, a Constituent Assembly met for the first time on April 8. On July 25, 1957, the Constituent Assembly deposed the Bey, abolished the monarchy and elected M. Bourguiba first President of the Republic. A few days later the Government was reconstructed on the "presidential" model, the Ministers becoming Secretaries of State. On June 2, 1959, the Constitution was promulgated and on December 7, 1959, the National Assembly held its first session.

Important changes in the system of local government were decreed on June 16, 1956. The country was divided into 14 regions each ruled by a Governor assisted by a Secretary-General.

Production, Trade, etc.—The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated. The chief exports are cereals, olive oil, phosphates, iron-ore, lead and derivatives, wines, etc., dates, etc.; the chief imports are textiles and other manufactures, iron, steel, machinery and provisions. In 1960 imports totalled 80,092,000 dinars and exports 50,267,000 dinars. The greater part of the trade is with France which, in 1960, took 52 per cent. of the exports and supplied 60 per cent. of the imports.

TRADE WITH U.K.

	1959	1960
Imports from U.K.	£2,374,484	£2,597,322
Exports to U.K.	£4,291,081	£5,185,974

A new currency, the Tunisian *dinar*, was adopted on Nov. 3, 1958. At the same time a new Central Bank of Tunisia became responsible for the issue of notes. The *dinar* stood at 1.168 frs. (French) on Dec. 31, 1959; it was not devalued in line with the French franc in Dec., 1958, but Tunisia remains in the franc zone and in customs union with France. A revision of the union in Sept., 1959 (renewed almost unchanged in Sept. 1960), reduced or eliminated the tariff advantages enjoyed by certain French goods.

CAPITAL, Ψ Tunis, connected by canal with La Goulette on the coast, had a population (Municipal Council area) of 680,000 at the Census of 1956. The ruins of ancient Carthage lie a few miles from the city. Other towns of importance are Ψ Sfax (65,635), Ψ Sousse (48,172), Kairouan (33,968).

FLAG.—Red crescent and star in a white orb, all on a red ground.

Area and Population.—The Turks belong to the Turanian Race, which comprises the Manchus and Mongols of North China, the Finns, and the Turks of Central Asia. Their numbers probably exceed 50,000,000, with the same language, religion and culture, but the actual Turkish State occupies only a small part of the area inhabited by the Turkish Race, the remainder being in Soviet Russia, China, Afghanistan and Persia. Under the Seljuks (Turkish rulers in Anatolia) the conquest of Asia Minor was completed in the 11th century. The Seljuks were succeeded, early in the 14th century, by the Osmanli dynasty, which remained in power until the War of 1914-18.

During the 15th, 16th and 17th centuries the Ottoman Empire was one of the strongest Powers in the world, extending from the Caspian Sea to the Adriatic and Hungary, and from the Indian Ocean to Morocco and the Sudan. It comprised Asia Minor, part of Russia, the Ukraine, the Crimea, the Balkan States and the whole of Arabia. The Black Sea, the Mediterranean, the Red Sea and the Aegean were dominated by Turkish ships, and the Ottoman dominions included not only the Byzantine Empire, but the greater part of the whole Roman Empire.

Turkey now extends from Adrianople to Transcaucasia and Persia, and from the Black Sea to the Mediterranean, Syria and Iraq. The sixth general census of population was held in October 1955. The results of the last four counts are:—

Year	Population
Oct., 1945.....	18,790,174
Oct., 1950.....	20,936,524
Oct., 1955.....	24,111,778
Oct., 1960.....	27,776,769

Turkey in Europe (9,256 sq. miles, population 2,262,023 in 1955) consists of Eastern Thrace, including the cities of Istanbul (Constantinople) and Edirne (Adrianople), and is separated from Asia by the Bosphorus at Istanbul and by the Dardanelles (Hellespont)—about 40 miles in length with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west.

Turkey in Asia (285,246 sq. miles, population 21,849,755 in 1955), comprises the whole of Asia Minor or Anatolia ("Land of the Rising Sun" or Orient), and extends from the Aegean Sea to the western boundaries of Georgia, Soviet Armenia

and Persia, and from the Black Sea to the Mediterranean and the northern boundaries of Syria and Iraq. The former Turkish Sanjak of Alexandretta (latterly known as the Republic of Hatay), was ceded by France on July 23, 1939, having formed part of Mandated Syria since 1922.

Government.—For two centuries before the War of 1914-18, disintegration had reduced the power and extent of the Turkish Empire, and after that War its boundaries were still further restricted, Iraq, Syria and Arabia passing into other hands. Sultan Mehmed VI., the last of the Osmanli rulers, fled from Constantinople to Malta on Nov. 20, 1922, and the Sultanate was abolished by the National Assembly. On Oct. 29, 1923,* the National Assembly declared Turkey a Republic and elected Gazi Mustafa Kemal (later known as Kemal Atatürk) President. Following the introduction of a multi-party régime in 1945, the Democratic Party was returned to power in 1950 and re-elected in 1954 and 1957. On May 27, 1960, the D.P. Government was overthrown by the Turkish Armed Forces which now rule through the Committee of National Union, a body originally composed of 38 military officers, but reduced to 23 following an internal purge in November 1960. The committee has ruled since January 1961, in conjunction with a civilian House of Representatives, the two bodies together forming the Constituent Assembly. Following a prolonged trial on multiple charges of crimes against the Constitution, Adnan Menderes, the former Democratic Party Prime Minister, was executed on Sept. 17, 1961, together with the former Foreign and Finance Ministers. Sentence of death passed on Celal Bayar, former President, was commuted to life imprisonment. Turkey is divided for administrative purposes into 67 *vilayet* with subdivisions into *kaza* and *nahiye*. Each *vilayet* has a governor (*vali*) and elective council.

Religion and Education.—The majority of the inhabitants are Moslems. There are numerous Christians (of the Latin and Eastern rites) in Istanbul (Constantinople) and a considerable number of Jews. On April 10, 1928, the Grand National Assembly passed a law in virtue of which Islam ceased to be the State religion of the Republic. Education is compulsory, free, and secular. There are elementary, secondary and vocational schools.

In 1955 there were over 17,800 primary schools, with about 1,877,000 pupils. There are two universities at Istanbul (one being a Technical University), two at Ankara (including the recently-founded Middle East Technical University), one at Izmir and one at Erzerum (the Atatürk University). The expenditure allocated to education in the 1961 budget was £11,051,974,650.

Language and Literature.—Osmanli or Ottoman Turkish is one of the Turanian languages spoken from Macedonia to Siberia. Until 1926 this language was written in Arabic script, but in that year the Roman alphabet was substituted for use in official correspondence and in 1928 for universal use, with Arabic numerals as used throughout Europe. Mainly as a consequence of this change the percentage of Turks who can read and write is rising steadily. Ancient Turkish literature aped the Arabic manner, but the revolution of 1908 was followed by a popular reaction against the writings of the past (which appealed only to a small class) and led to the introduction of a native literature free

* TURKISH NATIONAL HOLIDAY.—Oct. 29 is observed throughout the Republic as a National Holiday.

from foreign influences and adapted to the understanding of the people. The vehicle first employed was the newspaper, printed in the neo-Latin alphabet, with supplements for prose and dramatic fiction, poetry and literary criticism. The leading Turkish newspapers are centred in Ankara and Istanbul, although most provincial towns have their own daily papers. There are foreign language papers in French, Greek and English and numerous magazines and weeklies on various subjects.

Production and Industry.—Although it is estimated that 16 per cent. of the country is entirely unproductive and only 16 per cent. fully arable, agriculture provides a livelihood for 75 per cent. of the population and the economy is based extensively on the export of agriculture products. Agriculture is still largely primitive, but is being modernized at an accelerated pace. The principal crops are cereals, cotton, tobacco, sultanas and figs, pulses, oilseeds, valonea, hazel-nuts, opium, sugar beet, and many varieties of fruit. Since 1949, when there were only 4 sugar factories in Turkey, the country has become self-supporting in sugar, and has a margin for export. There are now 18 sugar factories. With the important exception of wheat, which is grown mostly on the arid Central Anatolian Plateau, most of the crops are grown on the fertile littoral. Tobacco, sultana and fig cultivation is centred at Izmir (Smyrna), where substantial quantities of cotton are also grown. The main cotton area is the Cukurova Plain around Adana. In 1958 it was estimated that there were more than 65,300,000 head of livestock, including camels, horses, donkeys and mules. Animal by-products include wool, hides and skins, and mohair. The forests which lie between the littoral plain and the Anatolian Plateau, contain beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple. During recent years the Government has attempted, so far not altogether successfully, to combat the depredations of peasant and goat which threatens to destroy the existing forests within the next 25 years.

Turkey's second most important industry is based on her considerable mineral wealth, which is, however, as yet comparatively unexploited. The most important developments are in coal, lignite, iron ore and chrome mining and fair quantities of copper, manganese, lead and sulphur are also produced together with other minerals in only small quantities. Working mainly through the State-owned Eti (mining) and Sumer (industry) Banks, great strides have been made during recent years in industrializing the country. The share of private industry is increasing. Developments include the expansion of the iron and steel works at Karabuk and other factories and plants for the production of textiles, paper, pulp, cement, artificial silk, sugar, leather goods, glassware, heavy chemicals, artificial fertilizers, canned goods, wines and spirits, vegetable oils, soap and refined sulphur. The cement industry has recently made great progress. Many new factories have been built throughout the country, and annual production, which totalled 375,522 tons in 1949, reached the figure of 1,734,000 tons in 1959. Legislation was passed in 1954 to encourage the investment of foreign capital in Turkey and to permit the exploitation of Turkey's petroleum resources by foreign companies. At the end of 1959, 20 American, British, German and Turkish companies were prospecting for oil in Turkey, and during 1960 a number of encouraging strikes were made. Production of oil by the Turkish Petroleum Administration, from the Raman-Garzan field in Eastern Turkey, amounted to 372,176 tons in 1959.

COMMUNICATIONS

Railways.—The complete network became the property of the State Railways Administration in 1948. The total length in operation is about 7,805 km. Construction, started in 1937 and at present in progress, includes the line to the Persian border (Elazig-Kotur), the Iraq frontier line (Diyarbakir-Cizre), the conversion of the Erzurum-Sarikamis line from narrow gauge to normal, and various branch lines in the Gaziantep and Zonguldak areas. The total length of these additions is to be 1,176 km., of which about 350 km. have been completed at a cost of over £125,000,000. A 15-year plan for the addition of a further 2,310 km. of railway at a cost of £1800,000,000, which was produced in 1947, has now been shelved—possibly because of the prior claims of the 9-year programme for the construction and improvement of roads and highways. Efforts are however being made to increase rolling stock and locomotives. During 1958 the railways carried 85,422,000 passengers, 15,000,000 tons of freight and 2,600,000 head of livestock.

Roads.—In September, 1948, a 9-year road construction programme was started, involving the construction, reconstruction, improvement and maintenance of a national highway system totalling 24,300 kilometres of all-weather standard roads. Much progress has been made with the help of mechanized road building equipment from American aid sources. At the end of 1957 there were 20,760 kilometres of road open to traffic throughout the year (13,328 km. in 1950), and 22,690 kilometres under regular maintenance. The total number of motor vehicles in 1958 was 86,104 (1950, 29,118).

Posts.—In 1952 there were 46,109 km. of telegraph lines, 2,097 post and telegraph offices, 121,603 telephones were in use in Turkey in 1956.

Shipping.—The strength of the Turkish Merchant Navy at the beginning of 1956 was 1,510 vessels totalling about 752,000 tons, of which just under half is owned by the State Shipping Administration.

Civil Aviation.—The State Airlines operate all internal services and have services to Athens, Beirut, Nicosia, Rome and Frankfurt, while most of the leading foreign airlines, including British European Airways, operate services to Istanbul and some also to Ankara. The State Airlines fleet is composed of Vickers Viscounts, Dakotas and Fokker Friendships. The airports at Istanbul, Ankara and Adana have been improved to P.I.A.C.O. (Class B) standard and a sum of £145,000,000 is being spent on ten other new airfields in Turkey. In addition nine military airfields, costing £160,000,000, are being constructed by N.A.T.O.

FINANCE		1960-61

The Turkish Lira, or £T. (of 100 Kurus, each of 40 Paras) has a nominal value of 25-20 to the £ and 9-00 to the U.S. Dollar.

TRADE		1958	1959
Total imports ..	£	188,300,000	1,239,400,000
Total exports ..		692,400,000	994,300,000

Trade with U.K.

	1959	1960
Imports from U.K.	£15,751,446	£16,856,631
Exports to U.K.	14,243,218	11,551,687

The imports include iron and steel, machinery and spares, petroleum products, cotton textiles, wool and woollen yarns, agricultural machinery, locomotives, motor vehicles and pharmaceuticals; the exports include tobacco, cotton, dried fruit, cement, sugar, livestock, chrome oilseeds, opium and valonea.

The principal imports from United Kingdom are iron and steel goods, machinery, tractors, motor lorries and chemicals; the principal exports to United Kingdom are tobacco, mohair, nuts, figs and raisins.

CAPITAL OF TURKEY, ANKARA (Angora), an inland town of Asia Minor, about 200 miles S.E. of Istanbul, with a population (1955 census) of 353,170 and now estimated to exceed 500,000. Ankara (or Ancyra) was the capital of the Roman province of *Galatia Prima*, and a marble temple (now in ruins), dedicated to Augustus, contains the *Monumentum (Marmor) Ancyranum*, inscribed with a record of the reign of Augustus Caesar. A few city has been laid out on modern lines, with parks, statues and avenues. **ISTANBUL** (Constantinople), the former capital, was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328, and renamed by him; it became capital of the Eastern Roman Empire in D.C. 364; estimated population, 1,214,616. Istanbul contains the celebrated Mosque of St. Sophia, since 1934 a museum of Byzantine and Turkish art. Other cities are **IZMİR** (Smyrna) 286,310; Adana 172,465; Bursa (Brusa) 131,366; Eskisehir 122,755; Izmit 97,144; Konya 93,125; Kayseri (Caesarea) 71,127 and Erzurum 69,499.

FLAG.—Red, with white crescent and star.

EMBASSY IN LONDON

75 South Audley Street, W.1.

Ambassador, His Excellency Mohamed el-Kony (1961).

Constitution.—The United Arab Republic came into being on Feb. 1, 1958, and the union of Egypt and Syria was confirmed by a plebiscite held simultaneously in Egypt and Syria. A provisional constitution, based on 17 principles was announced on Feb. 5, under which legislative authority in the Republic was to be vested in a National Assembly chosen by the President, with the condition that half its members would be selected from the existing Egyptian and Syrian Chambers. Executive power is vested in the President, assisted by Ministers appointed by himself. The President will select heads of Regional Councils. The provisional constitution included statements that the Republic would be a "Presidential democracy" with a common flag, common people and a common army; it provided that all laws in Egypt and Syria would remain valid within the districts prescribed for them at the time of issue, though subject to

later modification or annulment; private property would be safeguarded and not subject to confiscation without due compensation; existing public services and administration would remain as they are until re-organized by Presidential decree; the independence of the judiciary would be guaranteed and all international treaties concluded by Egypt and Syria would remain valid. The 17 provisions were expanded on March 5, when a list of 75 articles was proclaimed, including a new provision that the President could dismiss one or more vice-presidents and that the National Assembly would have the right to pass a vote of no confidence in a Minister. Four Vice-Presidents were nominated on March 6, together with the new Cabinet. The first parliament, consisting of 400 Egyptian and 200 Syrian deputies, appointed by the President, was opened on July 21, 1960. A number of the deputies had been members of the former separate national assemblies of Egypt and Syria.

CAPITAL.—Cairo (pop. 2,100,486).

Following a rising in Syria at the end of September, 1961, a new Syrian Government, independent of Egypt, was seeking diplomatic recognition. (See also *Events of the Year and Occurrences during Printing.*)

1st Secretary (Claims), G. A. Minto.

1st Secretary (Claims), J. R. G. Harrop.

2nd Secretary (Commercial), T. Quinlan.

2nd Secretary, H. I. Duck.

2nd Secretary and Administration Officer, N. G. Goode.

2nd Secretary and Vice-Consul, P. H. Wilkinson.

2nd Secretary (Claims), M. Sullivan.

Archivist, D. Jenkins.

There are British Consular Offices in Alexandria (Egypt) and Damascus (Syria).

BRITISH COUNCIL

Representative, H. Williams.

EGYPTIAN REGION

AREA AND POPULATION.—The total area of Egypt is estimated at 1,000,000 square kilometres (386,113 square miles), the inhabited area being only 35,168 square kilometres (13,578 square miles), with a population (Census of 1960) of 26,000,000.

There are three distinct elements in the native population. The largest, or "Egyptian" element, is a Hamito-Semitic race, known in the rural districts as *Fellahin* (*fellāh*—ploughman, or tiller of the soil). The *Fellahin* have been mainly of the Moslem faith since the conquest of the country in the 7th century, but there are more than 1,000,000 Coptic and Greek Orthodox Christians in Egypt. A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts, of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated end of the Nile Valley and the Fayūm. The third element is the Nubian

of the Nile Valley between Aswān and Wadi-Halfa, of mixed Arab and negro blood. The *Bedouin* and Nubians are Moslems.

The territory of Egypt comprises (1) *Egypt Proper*, forming the N.E. corner of the African continent, divisible into (a) the valley and delta of the Nile, (b) the Libyan or Western Desert, and (c) the Arabian or Eastern Desert; (2) *The Peninsula of Sinai*, forming part of the continent of Asia; and (3) a number of *Islands* in the Gulf of Suez and Red Sea, of which the principal are Iubal, Shadwan, Gafatin and Zeberged (or St. John's Island). This territory lies between 22° and 32° N. lat. and 24° and 37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is coterminous with the Sudan. The western boundary runs from a point on the coast 10 kilometres N.W. of Sollūm to the latitude of Siwa and thence due S. along the 25th meridian to the parallel of 22° N. (the N. boundary of the Sudan) at 'Uweināt Mountain. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15' E. long.) to the head of the Gulf of Aqaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aqaba and the Red Sea. The "settled land area" is stated officially at 7,667,000 *feddāns* (12,431 square miles) and the area of lakes at 641,000 *feddāns* (1,039 square miles), a total of 8,308,000 *feddāns* (13,470 square miles).

Physical Features.—The Nile valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The Nile has a total length of 4,160 miles. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 13 feet. Westward from the Nile Valley into Tripoli stretches the *Libyan Desert*, an arid region, containing some depressions, whose springs irrigate small areas known as *Oases*, of which the principal, from S.E. to N.W., are known as Kharga, Dakhla, Farafra, Baharia, and Siwa. On the eastern edge of the Libyan Desert, a few miles south-west of Cairo stand the Pyramids of Giza, of which the highest, the *Great Pyramid*, is 451 feet high. Close to the pyramids is the *Great Sphinx*, 189 feet long. In the Eastern Desert a great backbone of high and rugged mountains extends north-westwards from Ethiopia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones, dissected by *wadis* (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main *wadis* from well to well, and here and there are to be found small encampments of wandering Arabs.

Religions.—At the Census of 1947 there were 19,037,984 Moslems, 1,273,371 Coptic and Greek Orthodox Christians, 50,200 Roman Catholics, 103,256 other Christians (Protestant and Reformed Churches), and 65,639 Jews. The chief Moslem religious authorities in Egypt are the *Sheik el Gami el Azhar* and the *Mufti al Diyar al Misriyyah*.

Government.—From 30 B.C. to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes, or bodyguard. *Mohammed Ali*, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811 and was eventually made hereditary governor of Egypt and the Sudan by a *firman* from the Sultan of June 1, 1841.

In 1882, a military revolt, headed by an officer of the Egyptian Army (*Ahmed Arâbi Pasha*), assumed alarming proportions and a British expedition was despatched to re-establish the authority of the Khedive. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohammed Ahmed, of Dongola, who proclaimed himself a *Mahdi* of Islam, and the British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation until 1936 (see below).

During the War of 1914-18 a British Protectorate over Egypt was declared (Dec. 28, 1914) and Khedive Abbas Hilmi was deposed. He was succeeded by Hussein Kamel, with the title of Sultan, who died Oct. 9, 1917, being succeeded by his brother, Ahmed Fuad. The British Protectorate terminated on Feb. 28, 1922, and Sultan Ahmed Fuad was proclaimed King of Egypt. Following closely on the accession of King Farouk, the *Anglo-Egyptian Treaty* was signed in London (Aug. 26, 1936); the military occupation by British troops was terminated and Ambassadors were duly accredited at the Courts of St. James's and Cairo.

The security of Egypt was threatened after the outbreak of war in 1939 and reinforcements were sent from Britain and the Dominions. Axis troops invaded Egypt in 1940 and fierce fighting ensued, with Allied victories and reverses, until the decisive victory in "The Battle of Egypt" (Oct.-Nov. 1942) drove the enemy out of the country. In July, 1952, following a military *coup d'état*, King Farouk abdicated in favour of his infant son, who became King Ahmed Fuad II. In June, 1953, however, Gen. Neguib's military council deposed the young king, and declared Egypt a Republic, Gen. Neguib himself assuming the Presidency. In November, 1954, General Neguib was deposed by Lt.-Col. Gamal Abdel Nasser and the military council. On June 23, 1956, Col. Nasser assumed office as President, after an election at which voting was compulsory, and he was the only candidate. Following the establishment of the United Arab Republic (see above), Nasser was elected its first President on Feb. 21, 1958.

Agriculture.—The principal crops grown during *Safî* (summer) are cotton, rice, sugar cane, and sorgho (maize). *Nîlî* (flood) part of *Safî*, has the date of its commencement fixed by the Irrigation Department according to the quantities of water available before the flood, which reaches its highest level in September—it generally begins in July; the principal crops are maize and rice. *Chîwî* (winter) begins in November and ends in June; the principal crops are cereals, bersim (a variety of clover) and—mainly in Upper Egypt—beans, lentils, onions and helba.

Railways.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to Shellal,

the First Cataract. At this point a steamer connection runs to Wadi Halfa, connecting the Egyptian Republic with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line to the frontier at Sollûm, thus joining Tripoli to Egypt. The gauge is standard (4 ft. 8½ in.). There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 282 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oasis of Kharga with the Nile Valley. In addition to the Government lines, there are 883 miles of light railways exploited by public companies.

Roads and Caravan Routes.—A sea coast motor road exists from Alexandria to Mersa Matruh, with an extension along the coast to Sollûm and thence to connect with the coast road in Libya. The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the *Darb el 'Arbain*, leading to Dar Fûr and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir being probably the most frequently used.

Shipping.—Apart from the three great seaports of Alexandria, Port Said and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollûm and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitia, Jemsa and Hurghada in the Gulf of Suez, and Safaga and Qoseir on the Red Sea.

Currency.—£E (Egyptian pound of 100 piastres) = £x os. 6½d. sterling. Official Rate of Exchange—(Buying) Piastres 97.40 = £x; (Selling) Piastres 97.60 = £x. (See also p. 84.)

Trade with U.K.

	1959	1960
Imports from U.K. . . .	£13,786,873	£19,396,701
Exports to U.K. . . .	4,254,405	6,756,174

The principal imports are metals, and manufactures thereof, coal and coke, chemicals and pharmaceuticals, capital plant and other machinery, vehicles, foodstuffs, timber and wood and paper. The exports are principally raw cotton, rice, mineral products and onions.

CAIRO, the capital (population 1947, 2,100,486), stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century.

† **ALEXANDRIA** (pop. 1947, 928,237), founded 332 B.C. by Alexander the Great, was for over 1,000 years the capital of Egypt and a centre of Hellenic culture which vied with Athens herself. Its great *pharos* (lighthouse), 480 feet high, with a lantern burning resinous wood, was one of the "Seven Wonders of the World." Other towns are: Tanta (139,965), † Port Said (178,432), Mansura (102,709), Asyût (90,378), Faiyûm (74,314), Zagazig (82,912), Mahalla el Kubra (125,509), Damamhur (84,983), Minya (69,667), † Suez (108,250), Beni Suef (57,464), † Damietta (68,520), Giza (53,620).

CAIRO is 2,520 miles from London: transit *via* Trieste, 5 days; *via* Marseilles, 6 days.

SYRIA

Area and Population.—The Syrian Region of the United Arab Republic is in the Levant, covering a portion of the former Ottoman Empire, with an estimated area of 70,800 sq. miles and a population

of 4,500,000, Arabic speaking and mainly Moslems. It includes the districts of Damascus, Aleppo, Lattakia, Hama, Homs, Hassakeh, al Rashid, Deir-ez-Zor, Idlib, Deraa and Suweida. It is bounded on the north by Turkey, on the east by Iraq, on the south by Jordan and Israel, and on the west by the Lebanon and thence northwards by the Mediterranean to the Turkish frontier. The Orontes flows northwards from the Lebanon range across the northern boundary to Antioch (Turkey). The Euphrates crosses the northern boundary near Jerablus and flows through north-eastern Syria to the boundary of Iraq.

Archaeology, etc.—The region is rich in historical remains. Damascus (*Dimishq ash-Sham*) is the most ancient city in the world, having an existence as a city for over 4,000 years. It is situated on the river Abana (now known as Barada), in an oasis at the eastern foot of the Anti-Lebanon, and at the edge of the wide sandy desert which stretches to the Euphrates. The city contains the Omayyad Mosque, the Tomb of Saladin, and the "Street Called Straight" (Acts ix, 12), while to the North-East is the Roman outpost of Dmeir and further east is Palmyra.

On the Mediterranean coast at Amrit are ruins of the Phoenician town of Marath, where the *tell* has been found and is being excavated and also ruins of Crusaders' fortresses at Markab, Sahyoun, and Krak des Chevaliers. At Tartous (also on the coast) the cathedral of Our Lady of Syria, built by the Knight Templars in the XII-XIII century has been restored as a museum.

Hittite cities, dating from 2,000 to 1,500 B.C., have recently been explored on the west bank of the Euphrates at Jerablus and Kadesh and also on the Orontes at Atchara, near Antioch.

Government.—Syria, which had been under French mandate since the 1914-18 war, became an independent Republic during the 1939-45 war. The first independently elected Parliament met on August 17, 1943, but foreign troops were in part occupation until April, 1946. Syria remained an independent Republic until February, 1958, when it became part of the United Arab Republic (see above). The Syrian Region has an Executive Council composed of a President (also Minister of the Interior) and 14 Ministers.

Production and Industry.—Agriculture is the principal source of production; wheat and barley are the main cereal crops, but the cotton crop is the highest in value. Tobacco is grown in the maritime plain in Sahel, the Sahyoun and the Djebel district of Lattakia; skins and hides, leather goods, wool and silk, textiles, cement, vegetable oil and copper and brass utensils are locally produced. Mineral wealth is small but oil has been found at Karachuk in the north-eastern corner of the Region and drilling is continuing. An oil refinery is in production at Homs and revenue is derived from the Kirkuk-Banias oil pipeline and the pipeline from the oilfields of Saudi-Arabia to Sidon in Lebanon (Tapline). There is a five-year industrial development plan and a 10-year economic development plan.

Language and Literature.—Arabic is the principal language (see Arabia), but a few villages still speak Aramaic, the language spoken by Christ and the Apostles. There are 7 daily newspapers and one periodical in Arabic published in Damascus and 9 daily newspapers and 2 periodicals in the provinces.

Education.—Education in the Region is under State control and, although many of the schools are privately owned, they all follow a common system and syllabus. Elementary education is free at State Schools, and is compulsory from the age of seven. Secondary education is not compulsory

and is free only at the State Schools. Because of the shortage of places, entry to these State Schools is competitive. Damascus University, founded in 1924, has faculties of law, medicine, engineering, science, arts and a Higher Teachers' Training College. The number of students has risen from a few hundred in 1943 to about 14,000 in 1961 of whom several thousands come from the Syrian Region. Approximately 10 per cent. of all students receive scholarships, and at the present time Palestinian refugees are admitted free. The rest pay fees.

Communications.—A narrow-gauge railway runs from Beirut in the Lebanon to Damascus, connecting at Rayak (Lebanon) with the standard-gauge line which runs from Tripoli (in the Lebanon) through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotchek. From Damascus the Hejaz railway runs southwards to Jordan. All the principal towns in the country are connected by roads of varying quality. A small internal air service operates between Damascus and Aleppo, and between Aleppo and Qamichliyé, and Aleppo, Lattakia and Damascus. There are also flights from Damascus to Palmyra and Deir-ez-Zor.

Currency.—The monetary unit is the Syrian paper pound (£Syr.). The note circulation stood at £Syr 529,200,000 on Dec. 31, 1960. The market rate of exchange for commercial transactions was approximately £Syr 9.93 = £1 sterling in July, 1961. A serious adverse balance of trade led, in February, 1961, to the imposition of exchange control which placed all exchange at the disposal of the Regional Government and abolished the free money market.

TRADE

Principal Imports.—Gold, textiles, petroleum products, vehicles, agricultural equipment, machinery of all kinds and electrical material, base metals and wares thereof, chemicals and pharmaceuticals, wood and its manufactures, live animals and animal products, vegetable products, rubber products.

Principal Exports.—Textile materials and manufactures (including raw cotton and wool), cereals and vegetable products, live animals and animal products, raw hides and skins, prepared foods, gold.

The value of Syria's foreign trade at the free rate of exchange, was:—

	1960
Imports.....	£Syr. 778,260,000
Exports.....	344,208,000

Trade with U.K.

	1959	1960
Imports from U.K.....	£6,644,812	£7,169,987
Exports to U.K.....	1,747,318	1,680,670

CHIEF TOWNS.—Damascus (population 450,000) is the capital of Syria, other important towns being Aleppo (population 450,000), Homs (150,000) and Hama (100,000), and the principal port is Lattakia (52,000). The principal town of Jebel Druze is Soueida (Black), built in mid-19th century by refugees from Lebanon from stones of the ruined Nabatean city of Soada and of blocks of local black basalt.

BRITISH CONSULATE-GENERAL Damascus.

(Re-opened Feb. 15, 1961.)

Consul-General, G. H. Clarke.

Consul, A. G. Battle.

Vice-Consuls, F. W. J. Cooper; C. J. H. Keith; C. A. Roberts.

URUGUAY

(República Oriental del Uruguay)

NATIONAL COUNCIL OF GOVERNMENT

Sr. Eduardo Victor Haedo (*President*, 1961-62);
Dr. Martín R. Echegoyen; Sr. Benito Nardone;
Dr. Justo M. Alonso; Dr. Alberto Artagaveytia;
Sr. Faustino Harrison; Sr. Ledo Arroyo Torres;
Ing. Manuel Rodríguez Correa; Sr. César Batlle Pacheco.

Minister of Interior, Dr. Nicolás Storace Arrosa.
Foreign Affairs, Sr. Homero Martínez Montero.
National Defence, General Modesto Rebollo.
Finance, Sr. Juan E. Azzini.
Public Works, Sr. Luis Giannattasio.
Public Health, Dr. Aparicio Mendoz.
Public Instruction and Social Welfare, Dr. Eduardo Pons Echeverry.
Industries and Labour, Sr. Angel María Gianola.
Livestock and Agriculture, Sr. Carlos V. Puig.

EMBASSY IN LONDON

48 Lennox Gardens, S.W.1

[Kensington: 8835]

Ambassador in London, His Excellency Dr. Roberto E. MacEachan (1961).

Minister-Counsellor and Consul-General, Señor Don Marcos Brondi.

Secretary, Señor Don Guy P. Nery.

Secretary and Consul, Señor Don Carlos A. Ghiringhelli.

Area and Population.—The smallest Republic in South America, on the east coast of the Río de la Plata, situate in lat. 30°—35° S. and long. 53° 25'—57° 42' W., with an area of 72,180 square miles, and an estimated population of 3,000,000, almost entirely white and predominantly of Spanish and Italian descent. Most Uruguayans are Roman Catholics. There is complete freedom of religion and no church is established by the State.

Physical Features.—The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which cross the Brazilian boundary and extend southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet. The principal river is the *Río Negro* (with its tributary the Yi), flowing from north-east to south-west into the *Río Uruguay*. The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the *Negro* is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguarón, Santa Lucía, Queguay, and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Merin. The climate is reasonably healthy. The summer is warm, but the heat is often tempered by the breezes of the Atlantic. The winter is, on the whole, mild, but cold spells, characterized by icy winds from the South Polar regions, are experienced in June, July and August. Rainfall is regular throughout the year, but there are occasional droughts.

Government.—Uruguay—or the *Banda Oriental*, as this territory lying on the eastern bank of the *Uruguay River* was then called—resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century, and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726-1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine

Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. In 1825, the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated.

A new Constitution was approved and brought into force on March 1, 1952, whereby the executive power is discharged by a National Council of State composed of nine members, elected every four years and assisted by nine ministers. The members of the National Council of State are eligible for re-election after four years have elapsed since the date on which their mandate ceased. The Legislature consists of a Chamber of 99 deputies and of a Senate of 30 members, elected for four years by all adult male and female citizens who can read and write. Elections for the National Council of State and the legislature took place in November, 1958. They were won by the Partido Nacional after 93 years in opposition and the new government took office on March 1, 1959.

The Republic is divided into 19 Departments each with a chief of police and a Departmental Council. The most important cities of the interior are Salto and Paysandu, both situated on the River Uruguay, which forms the main line of division from Argentina.

Production and Industry.—Wheat, barley, maize, linseed, sunflower seed and rice are cultivated. The wealth of the country is obtained from its pasture, which supports large herds of cattle and sheep, the wool of which is of excellent quality. The 1956 livestock census showed figures of 8,154,109 cattle, 22,954,230 sheep, 667,251 horses, 258,980 hogs, 5,568,451 poultry and 511,547 milch cows. In addition to the meat packing industry, textiles and wine and beer are of importance. The development of local industry continues and during and since the Second World War, in addition to the greatly augmented textile industry, marked expansion in local production is notable in respect of tyres, sheet-glass, three-ply wood, cement, leather-curing, beet-sugar, edible oils and the refining of petroleum and petroleum products. There are no mineral deposits of importance.

Communications.—There are about 5,000 miles of national highways, and about 7,508 miles of telegraph, with 48,375 miles of telephones.

In 1955 there were about 1,828 miles of standard gauge railway in use in Uruguay. A national Corporation was formed to administer the railway systems purchased by the Government from four British companies in 1948.

Civil aviation is developing rapidly. An internal airline, PLUNA, which is now owned by the State, runs a daily passenger and limited freight service to the principal capitals of the interior, and also runs services to Southern Brazil, Paraguay and Argentina. International passenger and freight services are maintained by American, South American and European airlines. The airport of Carrasco lies 12 miles outside Montevideo.

Education and Social Services.—Uruguay is one of the most advanced of the South American states, with old-age pensions, maternity and child welfare centres, accident insurance, etc. Primary education is compulsory and free, with about 250,000 pupils in 1,800 state schools and technical and trade schools, and evening courses for adult education. In 1957 there were 50,650 pupils in secondary schools including 9,700 in the 11 State liceos of the capital. The University at Montevideo (founded in 1849) had, in 1950, 8,540 students enrolled in its ten faculties.

Language and Literature.—Spanish is the language of the Republic. Modern literature has provided some authors with international reputations and the literature of Spain is accessible in all public libraries. Over one-third of the nation lives in the capital and all the main daily newspapers are published there.

FINANCE

The budget for 1959 was \$900 million (revenue) and \$895 million (expenditure). The budget for 1960–63 was approved in November, 1960, and provided for an estimated revenue of Ur.\$1,475 million for 1960, rising to Ur.\$2,580 million by 1963. Expenditure was estimated at Ur.\$1,347 million increasing to Ur.\$2,251 million during the same period.

Ur.\$

Internal Debt (March, 1961).....810,964,838
External Debt (March, 1961).....79,136,330

The monetary unit is the *peso*. By a law dated December 17, 1959, the nominal value of the *peso* was reduced from 0.585 grammes of fine gold to 0.136719 grammes of pure gold of a standard value of 900 milésimos of fine gold giving a parity of pesos 6.50 to the U.S. dollar. The circulating medium is, however, the paper *peso* which at the free rate of exchange has a value of about 8d. The rate for the £ in May, 1961, was about pesos 30.81 (buying) and for the U.S. dollar pesos 11.02 (buying).

TRADE

	1959	1960
Total imports \$U.S.	213,959,500	\$U.S.244,441,390*
Total exports.....	97,797,939	129,400,501

Trade with U.K.

	1959	1960
Imports from U.K.....	£3,362,461	£6,265,202
Exports to U.K.....	5,996,600	12,368,453

*The total import figure for 1960 includes goods to the value of \$U.S.21,344,621 received under U.S. Public Law No. 480, which are payable in Uruguayan currency. Also included is an amount of \$U.S.15,837,936 corresponding to goods imported by state enterprises before 1960, but which had not been shown in previous trade returns.

The exports are principally animal and agricultural products, and include chilled, frozen and canned meat, wool, hides and oleaginous products; the imports are principally machinery, motor vehicles, fuels and lubricants, raw materials, construction materials, timber and foodstuffs. The principal imports from the U.K. are machinery, motor vehicles, hardware, tinplate, rayon fibre, and music, radio and photographic equipment.

CAPITAL. Montevideo, Pop. (1959), 900,000. Other centres are Ψ Salto (41,000), Ψ Paysandu (42,000), Rivera (31,000), Ψ Mercedes (24,000), Melo (21,000) and Minas (20,000).

FLAG.—Four blue and five white horizontal stripes surcharged with sun on a white ground in the top corner, next flagstaff.

Time of transit from London to Montevideo, by air, 22 hours (B.O.A.C. Comet).

U.S.S.R.

(Soyuz Sovetskikh Sotsialisticheskikh Respublik = Union of Soviet Socialist Republics)

THE COMMUNIST PARTY OF THE SOVIET UNION

(August, 1960)

(K.P.S.S. = Kommunisticheskaya Partiya Sovetskogo Soyuza)

President of the Central Committee, A. B. Aristov; L. I. Brezhnev; Mrs. Ye. A. Furtseva; N. G. Ignatov; N. S. Khrushchev; A. N. Kosygin; F. R. Kozlov; O. W. Kuusinen; A. I. Mikoyan; N. A. Mukhltidnov; N. V. Podgorny; D. S. Polyansky; N. M. Shvernik; M. A. Suslov (full members). V. V. Grishin; J. E. Kalinberzin; A. P. Kirilenko; D. S. Korotchenko; K. T. Mazurov; V. P. Mzhavanadze; M. G. Pervukhin; P. N. Pospelov; G. I. Voronov (candidates for membership).

Secretaries of the Central Committee, N. S. Khrushchev (1st) (elected September 13, 1953); F. R. Kozlov; O. W. Kuusinen; N. A. Mukhltidnov; M. A. Suslov.

Party Control Committee, N. M. Shvernik (Chairman); I. P. Boitsov; P. T. Komarov (Vice-Chairman).

GOVERNMENT OF THE U.S.S.R.

The Presidium of the Supreme Soviet (= Council) of the U.S.S.R.

President, Leonid Ilyich Brezhnev (elected May 7, 1960).

Secretary, M. P. Georgadze.

The Council of Ministers of the U.S.S.R.

Chairman, Nikita Sergeyevich Khrushchev, appointed March 27, 1958.

First Vice-Chairmen, A. N. Kosygin; A. I. Mikoyan.

Vice-Chairmen, N. G. Ignatov; V. N. Novikov; K. N. Rudnev; D. F. Ustinov; A. F. Zasyadko.

MINISTERS

Agriculture, M. A. Olshansky.

Communications, N. D. Psurtsev.

Construction of Power Stations, I. T. Novikov.

Culture, Mrs. Ye. A. Furtseva.

Defence, Marshal R. Ya. Malinovsky.

Finance, V. F. Garbuzov.

Foreign Affairs, A. A. Gromyko.

Foreign Trade, N. S. Patolichev.

Geological Prospecting and Mineral Wealth Protection, P. Ya. Antropov.

Higher and Technical Secondary Education, V. P. Yelyutin.

Medium Machine-Building (Nuclear Weapons), Ye. P. Slavsky.

Merchant Marine, V. G. Bakayev.

Public Health, S. V. Kurashov.

Railways, B. P. Beshchev.

Transport Development, Ye. F. Kozhevnikov.

Officials of ministerial rank, P. V. Dementyev; V. E. Dymshits; A. A. Goreglyad; A. A. Ishkov; I. G. Kabanov; V. D. Kalmykov; G. S. Khlamov; L. R. Korniets; A. I. Kostousov; M. A. Lesechko; Ye. S. Novoselov; G. V. Perov; V. M. Ryabikov; L. V. Smirnov; N. I. Strokin; V. P. Zotov.

Chairmen of Committees, Councils and Boards forming part of the Council of Ministers:

State Planning (Gosplan), V. N. Novikov.

State Control, G. V. Yenyutin.

Labour and Wages, A. P. Volkov.

Vocational and Technical Education, G. I. Zelenko.

Automation and Machine-Building, A. I. Kostousov.

Aircraft Industry, P. V. Dementyev.

Defence Equipment, L. V. Smirnov.

Radio Electronics, V. D. Kalmykov.

Shipbuilding, B. Ye. Butoma.

Science and Research Coordination, K. N. Rudnev.

Electronics, A. I. Shokin.

Atomic Energy, V. S. Yemelyanov.

Chemistry, V. S. Fedorov.

Building, I. A. Grishmanov.

Food Procurement, N. G. Ignatov.

External Economic Relations, S. A. Skachkov.

External Cultural Relations, G. A. Zhukov.

State Security (K.G.B.), A. N. Shelepin.

State Bank, A. K. Korovushkin.

Central Statistical Board, V. N. Starovsky.

Science and Economics, A. F. Zasyadko.

The Prime-Ministers of the 15 constituent Republics belong *ex officio* to the Council of Ministers of the U.S.S.R. (see their names under the individual Republics, below).

EMBASSY OF THE U.S.S.R. IN LONDON

13 Kensington Palace Gardens, W.8.

[Bayswater: 3628]

Ambassador Extraordinary and Plenipotentiary, His Excellency Alexander Alexeevich Soldatov (1960).

Counsellors, V. A. Loginov; N. B. Korovin; L. S. Tolokonnikov; V. I. Yarotsky; A. G. Pavlov; A. I. Romanov.

1st Secretaries, A. G. Vislykh; A. V. Krasov; G. Z. Ioanisyany; N. P. Karpekov; V. S. Safronchuk; M. S. Almasov; V. I. Vorobyev; E. I. Belyakov. 2nd Secretaries, N. B. Litvinov; L. A. Rogov; I. P. Glazkov; M. V. Chizhov; Y. B. Teplov; V. A. Dozhdalev; B. A. Averyanov; N. A. Kiasashvili; G. I. Stepanov; V. I. Generalov; Y. P. Filimonov; M. M. Avdeev; Y. I. Loginov.

Military Attaché, Maj.-Gen. I. P. Efimov.

Air Attaché, Col. F. S. Roumiantsev.

Naval Attaché, Capt. K. Sukhoruchkin.

Trade Representative, V. I. Rodnov.

Deputy Trade Representatives, A. G. Tikhonov; S. F. Animov.

AREA AND POPULATION

The U.S.S.R. is now composed of 15 Union-Republics (see below). Before the outbreak of the war of 1939-45 the U.S.S.R. consisted of 11 Republics—the Russian Socialist Federal Soviet Republic (R.S.F.S.R.) and the Ukrainian, Belorussian, Armenian, Azerbaidjan, Georgian, Turkmenian, Uzbek, Tadjik, Kazakh and Kirghiz Soviet Socialist Republics. After the collapse of Poland in September, 1939, the Soviet Government by agreement with Germany seized five-eighths of Poland's territory, the so-called *Western Ukraine* and *Western Belorussia*, subsequently incorporated into the Ukrainian and Belorussian Republics respectively.

In March, 1940, some territories ceded by Finland under the 1940 Treaty were joined to the Karelian Autonomous Soviet Socialist Republic to form a Karelo-Finnish S.S.R., which

became the 14th constituent Republic of the U.S.S.R., while others, including the town of Viipuri (Vyborg), were added to the R.S.F.S.R. Similarly, in August of the same year, the major part of *Bessarabia* ceded by Roumania in June was joined to the Moldavian A.S.S.R. to form a Moldavian S.S.R., as the 13th Soviet Republic, while a smaller part of Bessarabia, including the Danube estuary port of Izmail, and *Northern Bukovina*, also ceded by Roumania, became part of the Ukraine. The new Soviet-Roumanian frontier was confirmed by the 1947 Peace Treaty with Roumania.

In August, 1940, the three independent Baltic States, *Estonia*, *Latvia* and *Lithuania*, were forcibly incorporated into the Soviet-Union to form the 14th, 15th and 16th Republics respectively. In June, 1945, *Ruthenia* was ceded by Czechoslovakia and became part of the Ukrainian S.S.R. under the name of *Transcarpathia*. After the defeat of Germany, a part of *East Prussia* with its capital Königsberg (renamed Kaliningrad in July, 1946) became part of the R.S.F.S.R., while the port and district of *Memel* (Klaipeda) was incorporated into the Lithuanian S.S.R. By the 1947 Peace Treaty with Finland, the district of *Petsamo* (Pechenga) was added to the territory of the R.S.F.S.R. In the Far East, the southern half of *Sakhalin* and the whole of the *Kurile Islands* were incorporated into the last-named Republic in 1945, after the defeat of Japan. In October, 1944, *Tannu-Tuva*, until the war of 1939-45 a nominally independent state lying to the N.W. of Outer Mongolia, became the autonomous province of *Tuva* within the R.S.F.S.R.

In July 1956, the Karelo-Finnish Republic reverted to the status of an Autonomous (Karelian) Republic within the R.S.F.S.R.

Area and population (according to the 1959 census) of the constituent Republics of the U.S.S.R. (with their capitals):—

Republic	Sq. miles	Population
I. R.S.F.S.R. (Moscow).....	6,593,391	117,494,000
II. Ukraine (Kiev)....	232,046	41,893,000
III. Belorussia (Minsk). 80,154		8,060,000
IV. Uzbekistan (Tashkent).....	158,069	8,113,000
V. Kazakhstan (Alma-Ata)....	1,064,092	9,301,000
VI. Georgia (Tbilisi)...	26,911	4,049,000
VII. Azerbaidjan (Baku)	33,436	3,700,000
VIII. Lithuania (Vilnius).	26,173	2,713,000
IX. Moldavia (Kishinev).....	13,012	2,880,000
X. Latvia (Riga)....	24,695	2,094,000
XI. Kirghizia (Frunze).	76,642	2,063,000
XII. Tadjikistan (Stalinabad)....	54,019	1,982,000
XIII. Armenia (Erevan).. 11,306		1,768,000
XIV. Turkmenistan (Ashkhabad)....	188,417	1,520,000
XV. Estonia (Tallinn)...	17,413	1,196,000
Total.....	8,599,776	208,826,000

The net increase of population since the 1939 census amounts to only 18,100,000. Assuming a theoretical average annual rise of 3,000,000 (at present the annual rise is 3,500,000), the net increase between 1939 and 1959 should have amounted to about 60,000,000. The deficit of 42,000,000 is the measure of direct and indirect losses suffered by the Soviet people as a result of the war and the deportation policies of the Government. The age-groups of young people born between 1942 and 1946 are abnormally thin.

Geographically, the growth of the population has been very uneven. There has been a steady shift eastwards. Thus, while the total population has increased since 1939 by 9.5 per cent., that of the Urals has risen by 32 per cent.; of Western Siberia, by 24 per cent.; of Eastern Siberia, by 34 per cent.; of the Far East, by 70 per cent.; of Central Asia and Kazakhstan, by 38 per cent. Two Republics on the Western fringes of the Union, *Belorussia and *Lithuania, have actually suffered a net loss of population (844,000 and 167,000 resp.).

Another demographic feature is the growing urbanization. While in 1939 the proportion of urban population was 32 per cent. of the total,* in 1959 it has reached 48 per cent., owing to migration into towns, growth of new towns, incorporation of villages into conurbations and a higher birth-rate in urban areas. There are now 25 towns with over 500,000 (12 in 1939).

The proportion of women to men is 55 to 45 per cent. There is a high incidence of marriages (12 per mille), a high birth-rate (25 per mille) and a low mortality-rate (7.5 per mille).

Ethnical Composition of the Population (millions)

Russians	114.827
Ukrainians	36.981
Belorussians	7.829
Uzbeks	6.004
Tatars	4.969
Kazakhs	3.581
Azerbaidjanis	2.929
Armenians	2.787
Georgians	2.650
Lithuanians	2.326
Jews	2.268
Moldavians	2.214
Germans	1.619
Chuvashes	1.470
Latvians	1.400
Tadjiks	1.397
Poles	1.380
Mordovians	1.285
Turkmenians	1.004
Bashkirs	0.983
Kirghizians	0.974
Estonians	0.969
Daghestan tribes	0.945
Udmurtsians	0.623
Maris	0.504
Other Nationalities	5.009

CONSTITUTION

Under the 1936 ("Stalin") Constitution, the *Union of Soviet Socialist Republics* is "a socialist state of workers and peasants" (§ 1) in which "all power belongs to the working people as represented by the Soviets [Councils] of Working People's Deputies" (§ 3), while its economy is based on "the socialist ownership of the instruments and means of production" (§ 4). "The land, its mineral wealth, waters, forests, mills, factories, mines, rail, water and air transport, banks, communications, large state-organized agricultural enterprises, as well as municipal enterprises and the bulk of dwelling-houses in the cities and industrial localities, are state property" (§ 6), while "the joint enterprises of collective farms and co-operative organizations . . . constitute the common, socialist property of the collective farms and co-operative organizations" (§ 7). "The law [also] permits the small private economy of individual peasants and handicraftsmen based on their own labour and precluding the exploitation of the labour

of others" (§ 9). "The personal property right of citizens in their incomes and savings from work, in their dwelling-houses and subsidiary home enterprises, in household articles . . . as well as the right of citizens to inherit personal property, is protected by law" (§ 10). The whole economic life, however, is subordinated to the state economic plan (§ 12).

The U.S.S.R. is a federal state, "formed on the basis of a voluntary union of equal Soviet Socialist Republics" (§ 13); every Republic has "the right to secede from the U.S.S.R." (§ 17).

"The highest organ of state power in the U.S.S.R. is the Supreme Soviet of the U.S.S.R." (§ 30) which exercises exclusively the legislative power (§ 32). It consists of two Chambers, the *Soviet of the Union* (elected on the basis of one deputy for every 300,000 of the population) and the *Soviet of Nationalities* (elected at the ratio of 25 deputies from each Union Republic, 11 from each Autonomous Republic, 5 from each Autonomous Province and 1 from each National Territory) (§§ 33-35). The *Supreme Soviet* which, as a rule, meets 4 to 5 times a year for about a week, delegates most of its power to its *Presidium* which acts as a kind of collective President of the U.S.S.R. between the sessions.

"The highest executive and administrative organ of state power is the Council of Ministers of the U.S.S.R." (§ 64). It is appointed by the Supreme Soviet (§ 70) and is accountable to it, or, in the intervals between the sessions, to its *Presidium* (§ 65).

The Supreme Court of the U.S.S.R. and the Special Courts of the U.S.S.R. are elected by the Supreme Soviet for a term of five years (§ 104). Similarly, the Procurator-General, who exercises "supreme supervisory power to ensure the strict observance of law" (§ 123), is appointed by the Supreme Soviet for a term of seven years.

Citizens of the U.S.S.R. have the right to work, to rest and leisure, to maintenance in old age and sickness and disability relief and to education (§§ 118-121). "Women are accorded equal rights with men" (§ 122). Citizens are accorded equal rights irrespective of their nationality or race (§ 123). The citizens are also guaranteed freedom of speech, of the press, of assembly and of street processions and demonstrations, "in conformity with the interests of the working people and in order to strengthen the socialist system" (§ 125).

Section 126 of the Constitution is remarkable for containing the only reference to the real master of the country, the Communist Party. It says that "the most active and politically conscious citizens in the ranks of the working class and other sections of the working people unite in the Communist Party of the Soviet-Union, which is the vanguard of the working people in their struggle to strengthen and develop the socialist system and is the leading core of all organizations of the working people, both public and state." The draft of a new Party programme, published on July 30, 1961, envisages a great increase of the economic capacity of the country and promises the transition to "full Communism" some time after 1980.

Local Government.—The State power in regions, provinces, autonomous provinces, territories, districts, towns and rural localities is vested in the *Soviets of Working People's Deputies* (§94), elected by the working people of the respective administrative units for a term of two years (§95). The executive and administrative organ of a Soviet is its Executive Committee elected by it (§99). The Union Republics and the Autonomous Republics

* Within present borders.

have Supreme Soviets and Councils of Ministers of their own (§§ 57-63 and 79-88), although their jurisdiction is severely circumscribed in favour of the central Government. Since February, 1944, the Union Republics have had the right to enter into direct relations with foreign states and to conclude agreements and exchange diplomatic and consular representatives with them (§ 18A). So far, however, the only important activity of this kind has been the individual membership of the Ukraine and of Belorussia in the United Nations Organization. Similarly, the 1944 law allowing each Union Republic to possess its own Republican military formations (§ 18B) seems to have remained a paper provision.

The Union Republics possess Ministries of their own for internal affairs, certain branches of heavy and light industry, agriculture, public health, trade, finance and the like. The work of these Ministries is co-ordinated by respective federal Ministries and/or the *Gosplan*. The Union Republics possess exclusive jurisdiction over such matters as motor transport, housing, social security, municipal affairs, local industry, education and, since 1956, inland water transport and justice. The general trend lately has been toward progressive administrative decentralization or, rather, "de-concentration," particularly in industrial matters.

Religion.—Section 124 of the Constitution lays down that "in order to ensure to citizens freedom of conscience, the church in the U.S.S.R. is separated from the state, and the school from the church," and that "freedom of religious worship and freedom of anti-religious propaganda is recognized for all citizens." Churches have remained open in virtue of contracts concluded between the congregations and the local authorities. The clergy live on voluntary donations from their parishioners. A new *modus vivendi* between the Government and the religious communities was created during the War of 1939-1945. Two administrative bodies, the Council for the Affairs of the Russian Orthodox Church and the Council for the Affairs of Religious Cults, were set up in October, 1943, to provide liaison between the Council of Ministers and the religious bodies. In September, 1943, Stalin agreed to the election of the Patriarch of Moscow and All Russia, a post which had been vacant since the death of Patriarch Tikhon in 1925. Patriarch Sergius, elected by the Council of the Russian Church in 1943, died in May, 1944, and was succeeded in February, 1945, by the present holder of the See, Patriarch Alexius. A number of seminaries for training of priests, many churches, mosques and synagogues and several big monasteries have been reopened. Several religious periodicals are now published in the U.S.S.R., but religious propaganda is still banned.

The proselytizing successes of the religious communities, notably of various sectarian bodies, have become of great concern to the authorities; there has been a great increase of anti-religious articles in the press since 1958.

Education.—Under the Constitution, citizens of the U.S.S.R. have the right to education. Since 1956 the entire educational course, including higher education at universities, technical colleges, etc., has been free. In view of an acute shortage of young man-power caused by the abrupt fall of the birth-rate in the years 1942-1946, the government has been discouraging secondary school graduates from going on immediately to the University. Boys and girls of school-leaving age are ordered by law to put in two years of practical work in industry and agriculture, and 80 per cent. of all

vacancies in the universities are reserved for young people who have accomplished this spell of practical work.

The state controls all educational institutions, theatres, cinemas, museums, libraries and picture galleries, as well as the press and the radio. The main centre of research and learning is the Academy of Sciences of the U.S.S.R., which is in effect a vast and efficient government-controlled pool of scientists.

President, M. V. Keldysh.

Chronological system.—On February 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar, and by a decree of June 16, 1930, the Soviet Government advanced all the clocks in the Union by one hour, thus adopting permanent Summer Time. The country is divided into several time zones (Moscow time is 3 hours ahead of G.M.T.).

LANGUAGE, LITERATURE AND ARTS

Language and Literature.—Russian is a branch of the Slavonic family of languages which is divided into the following groups: *Eastern*, including Russian, Ukrainian and White Russian; *Western*, including Polish, Czech, Slovak and Sorbisch (or Lusatian Wendish); and *Southern*, including Serbo-Croat, Slovene, Macedonian and Bulgarian. The Western group and part of the Southern group are written in the Latin alphabet, the others in the Cyrillic, said to have been instituted by SS. Cyril and Methodius in the ninth century, and largely based on the Greek alphabet. Before the Westernization of Russia under Peter the Great (1682-1725), Russian literature consisted mainly of folk ballads (*byliny*), epic songs, chronicles and works of moral theology. The eighteenth and particularly the nineteenth centuries saw a brilliant development of Russian poetry and fiction. Romantic poetry reached its zenith with Alexander Pushkin (1799-1837) and Mikhail Lermontov (1814-1841). The 20th century produced great poets like Alexander Blok (1880-1921), the Nobel Prize laureate of 1958 Boris Pasternak (1890-1960) and Vladimir Mayakovsky (1893-1930). Realistic fiction is associated with the names of Nikolai Gogol (1809-1852), Ivan Turgenev (1818-1883), Fedor Dostoyevsky (1821-1881) and Leo Tolstoy (1828-1910), and later with Anton Tchekhov (1860-1904), Maxim Gorky (1868-1936) and Ivan Bunin (1870-1954).

Great names in music include Glinka (1804-1857), Mussorgsky (1839-1881), Rimsky-Korsakov (1844-1908), Rubinstein (1829-1894), Tchaikowsky (1840-1893), Rakhmaninov (1873-1949), Scriabin (1872-1915), Prokofiev (1891-1953), Stravinsky (b. 1882) and Shostakovich (b. 1906).

FINANCE

A new, "heavy" Rouble was introduced on January 1, 1961. Prices and wages have been changed accordingly at the rate of 10 old Roubles = 1 new Rouble. The exchange rate of the new Rouble, however, has been altered in favour of foreign currencies. The official exchange rate is now £1 = R. 2.52. Old notes should have been exchanged by 1st April, 1961. New banknotes in circulation are those valuing R. 1, 3, 5, 10, 25, 50 and 100. There are also new coins valuing Kopecks 1, 2, 3, 5, 10, 15, 20, and 50 and R. 1. Old Kopeck coins are also current at the same value as new ones.

DEFENCE

No official returns concerning the services have been made for many years. According to Western estimates, the Soviet forces (including the MVD and KGB troops) amounted in 1959 to about 3,500,000

men. The successive reductions of their numerical strength since 1955 amount, according to the same estimates, to about 1,250,000. The ground forces consisted in 1958 of ca. 140 divisions (including 70 armoured), 40 artillery divisions (including some tactical missile units), an unknown number of cavalry divisions and independent brigades and 230 cadre divisions. The Navy is believed to possess 10 cruisers, 20 light cruisers (of the *Sverdlov* type), 150 destroyers, 550 submarines, 500 torpedo boats and 1,000 smaller vessels. The Air Force consists of 400 air regiments and possesses 19,000 aircraft, including 10,000 in the tactical air force, 3,500 in the air defence, 3,500 in the naval air force, 1,500 long range aircraft and 500 transport aircraft. There is an unknown number of strategic missile units (equipped with long- and intermediate-range missiles) and of A.A. units which were made a separate arm in 1955. A new Rocket Weapons Command has been set up in 1960.

Length of service is fixed at two years for the Army and the MVD troops, three years for the KGB border units and the Air Force and four years for the Navy and Coastal Defence Units. The general tendency is to turn the Soviet Armed forces into a professional body.

Minister of Defence, Marshal R. Ya. Malinovsky.
Senior Vice-Minister, Marshal A. A. Grechko.
Chief of General Staff, Marshal M. A. Zakharov.

On May 24, 1955, a Treaty of Friendship, Co-operation and Mutual Assistance was signed in Warsaw between the Soviet Union and its European satellites (Albania, Bulgaria, Eastern Germany, Hungary, Poland, Roumania and Czecho-Slovakia) to serve as a counter-poise to NATO. A unified military command was set up in Moscow (C.-in-C., Marshal A. A. Grechko).

INDUSTRY AND AGRICULTURE

One of the most remarkable aspects of Soviet economy has been the transformation of what was primarily an agricultural country into the second-strongest industrial country in the world in the course of the five successive *Five Year Plans* and the current *Seven Year Plan*. The 1958 output amounted to 43,000,000* tons of pig iron, 59,900,000 tons* of steel, 42,900,000* tons of rolled metal, 506,500,000* tons of coal, 129,500,000* tons of crude oil, 33,300,000 tons* of cement, 264,000,000,000 kW/h of electric power.

The area under crops increased from 292,121,000 acres in 1913 to 484,400,000 in 1959. The yield of the major crops has been steadily rising owing to more rational and scientific methods of farming. Land under crops east of the Volga and the Caspian Sea has greatly increased, in Kazakhstan by nearly five times, since 1913. Stock breeding has been less of a success. The live stock in 1959 included 74,100,000 cattle (66,800,000 in 1928), including 33,900,000 cows (33,200,000 in 1928), 136,100,000 sheep and 53,300,000 pigs.

Two major reforms in the course of 1958 have given greater scope to the collective farms (*kolkhozy*)—the abolition of the State-owned Machine-and-Tractor Stations and the sale of their equipment to the *kolkhozy*; and the reorganization of the system of compulsory deliveries of produce by the farms to the State.

Forests cover nearly 40 per cent. of the whole area of the Union and form a considerable source of wealth.

Trade with U.K.

	1959	1960
Imports from U.K....	£27,433,584	£37,082,167

COMMUNICATIONS

Railways.—Length of railways in use:

Year	Miles	Year	Miles
1913.....	44,551	1950.....	72,637
1928.....	47,772	1955.....	74,998
1940.....	65,926	1957.....	75,265

European Russia is relatively well served by railways, Leningrad and Moscow being the two main focal points of rail routes. The centre and south have a good system of north-south and east-west lines, but the eastern part (the Volga lands) traversed as it is by trunk lines between Europe and Asia which enter Siberia *via* Sverdlovsk, Chelyabinsk, Magnitogorsk and Ufa, lacks north-south routes. In Asia, there are still large areas of the U.S.S.R., notably in the Far North and Siberia, with few or no railways. Railways built since 1928 include the Turkestan-Siberian line (*Turksib*) which has made possible a large-scale industrial exploitation of Kazakhstan, a number of lines within the system of the *Trans-Siberian Railway* (Magnitogorsk-Kartaly-Troitsk, Sverdlovsk-Kurgan, Novosibirsk-Proyektnaya, etc.), which are of great importance for the industrial development in the east, the Petropavlovsk-Karaganda-Balkhash line which has made possible the development of the Karaganda coal basin and of the Balkhash copper mines, and the Moscow-Donbass trunk line. Lines envisaged under the new Seven Year Plan include the Stalinsk-Magnitogorsk trunk line. In the northern part of European Russia, the North Pechora Railway has been completed, while in the Far East a second Trans-Siberian line is under construction; it will follow a more northerly alignment than the existing Trans-Siberian and will terminate in the Pacific port of Sovetskaya Gavan.

Sea Ports and Inland Waterways.—The most important ports (Odessa, Nikolayev, Batum, Taganrog, Rostov, Kerch, Sebastopol and Novorossiisk) lie around the Black Sea and the Sea of Azov. The northern ports (Leningrad, Murmansk and Archangel) are, with the exception of Murmansk, ice-bound during winter. Several new ports have been built along the Arctic Sea route (between Murmansk and Vladivostok) and are now in regular use every summer. The great Far Eastern port of Vladivostok, the Pacific naval base of the U.S.S.R., is kept open by icebreakers all the year round. Inland waterways, both natural and artificial, are of great importance in the country, although all of them are icebound in winter (from 21 months in the south to 6 months in the north). The great rivers of European Russia flow outwards from the centre, linking all parts of the plain with the chief ports, an immense system of navigable waterways which carries about 139,000,000 tons of freight per year. They are supplemented by a system of canals which provide a through traffic between the White, Baltic, Black and Caspian Seas. The most notable of them, built largely by forced labour, are the *White Sea-Baltic Stalin Canal*, and the *Moscow-Volga Canal*. The 63-miles long *Volga-Don Canal*, linking the Baltic and the White Seas in the North to the Caspian, the Black Sea and the Sea of Azov in the South, was completed in May, 1952.

FLAG OF THE U.S.S.R.—Red, with five-pointed star above hammer and sickle.

NATIONAL DAY OF U.S.S.R.—November 7 (Commemorating the Bolshevik coup d'état of 1917).

BRITISH EMBASSY

(Sofiskaya Naberezhnaya 14, Moscow)

British Ambassador, His Excellency Sir Frank Kenyon Roberts, K.C.M.G. (1960).....£5,000

Minister, W. Barker, C.M.G., O.B.E.

Counsellors, H. W. King, M.B.E. (Commercial); Dr. D. A. Senior (Scientific).

1st Secretaries, E. Bolland; K. J. Uffen; A. J. V. George (H.M. Consul); C. M. James. (Cultural Attaché); Dr. T. R. Austin (Medical Officer).

2nd Secretaries, M. J. E. Fretwell; R. W. Chisholm;

M. J. F. Duncan; M. C. C. Wheeler; D. O. Amy.

3rd Secretaries, C. L. G. Mallaby; A. D. Loehnis;

E. G. B. Johnson; C. R. W. Langdon; Miss J. M.

King; G. D. G. Murrell; C. F. G. James, M.B.E.

Naval Attaché, Captain J. F. R. Dreyer, R.N.

Assistant Naval Attaché, Lt.-Cdr. H. M. Ellis;

Lt.-Cdr. J. L. Varley, R.N.

Military Attaché, Brig. L. Maxwell, O.B.E.

Assistant Military Attaché, Major J. L. Jealous, R.E.

Air Attaché, Air Commodore M. D. Lyne, D.F.C.

Assistant Air Attachés, Sqn.-Ldr. M. F. Laing; Sqn.-

Ldr. N. J. Gardner.

There are no British Consulates in the U.S.S.R.

apart from the Consular Section attached to the Embassy.

I.—R.S.F.S.R.

(The Russian Soviet Federal Socialist Republic)

Chairman of the Presidium of the Supreme Soviet, N. N. Orgonov.

Chairman of the Council of Ministers, D. S. Polyanskiy.

Minister of Foreign Affairs, S. G. Lapin.

Chairman of All-Russian Economic Council, S. A. Afanasyev.

The R.S.F.S.R. has no Communist Party Central Committee of its own; there is, however, a Bureau of the Central Committee of the CPSU for the R.S.F.S.R., with N. S. Khrushchev as its Chairman, and G. I. Voronov as Vice-Chairman.

The R.S.F.S.R., the largest and the most important of the Republics, occupies the major half of the European part of the U.S.S.R. and the major northern half of its Asiatic part and makes up 77 per cent. of the total territory of the U.S.S.R. with 56 per cent. of the total population. It consists of 15 Autonomous Republics (the Bashkir, Buryat, Checheno-Ingush, Chuvash, Daghestan, Kabardin-Balkar, Kalmyk,* Karelian, Komi, Mari, Mordovian, North-Osetian, Tartar, Udmurt and Yakut A.S.S.R.'s); 6 regions (Altai, Khabarovsk, Krasnodar, Krasnoyarsk, Maritime and Stavropol) containing in their turn 5 autonomous provinces and 4 national territories; 49 provinces (Amur, Archangel, Astrakhan, Belgorod, Bryansk, Chelyabinsk, Chita, Gorky, Irkutsk, Ivanovo, Kalinin, Kaliningrad, Kaluga, Kamchatka, Kemerovo, Kirov, Kostroma, Kuibyshev, Kurgan, Kursk, Leningrad, Lipetsk, Magadan, Moscow, Murmansk, Novgorod, Novosibirsk, Omsk, Orel, Orenburg, Penza, Perm, Pskov, Rostov, Ryazan, Sakhalin, Saratov, Smolensk, Stalingrad, Sverdlovsk, Tambov, Tomsk, Tula, Tyumen, Ulyanovsk, Vladimir, Vologda, Voronezh and Yaroslavl), which in their turn include 6 national territories; and 1 autonomous province (Tuva).

Physical Features.—The R.S.F.S.R. may be conveniently divided into three areas, a low-lying flat Western part stretching eastwards up to the Yenisei and divided in two by the Ural ridge; an eastern part, between the Yenisei and the Pacific,

consisting of a number of tablelands and ridges, and a southern mountainous part. Climatically, the R.S.F.S.R. lies in all zones, except the tropics, and may be divided into the following belts (from north to south): Arctic, Tundra, Forest, Mixed Forest-Steppe, Steppe, Sub-Tropics.

The Republic has a very long coast-line, including the longest Arctic coast-line in the world (about 17,000 miles). The most important rivers in the European part of the R.S.F.S.R. are the Volga with its tributaries Kama and Oka, the Northern Dvina and the Pechora, the short but wide Neva, the Don and the Kuban, and in the Asiatic part, the Ob with the Irtysh, the Yenisei, the Lena and the Amur, and, further north, Khatanga, Olenek, Yana, Indigirka, Kolyma and Anadyr. Lakes are abundant, particularly in the north-west. The huge Baikal Lake in Eastern Siberia is the deepest lake in the world. There are also two large artificial water reservoirs within the Greater Volga canal system, the Moscow and Rybinsk "Seas."

Minerals.—The Republic occupies one of the first places in the world for mineral wealth. Coal is mined in the Kuznetsk area, in the Urals, south of Moscow, in the Donets basin (its Eastern part lies in the R.S.F.S.R.) and in the Pechora area in the North. Oil is produced in the Northern Caucasus and in the area between the Volga and the Ural (the so-called "Second Baku"). The Ural mountains contain a unique assortment of minerals—high-quality iron ore, manganese, copper, aluminium, gold, platinum, precious stones, salt, asbestos, pyrites, coal, oil, etc. Iron ore is mined, in addition to the Urals, near Kursk, Tula, Lipetsk, Khoper, in several areas in Siberia and in the Kola Peninsula. Non-ferrous metals are found in the Altai, in Eastern Siberia, in the Northern Caucasus, in the Kuznetsk Basin, in the Far East and in the Far North. Nine-tenths of all U.S.S.R. forests are located in the R.S.F.S.R.

Production and Industry.—The vastness of the territory of the Republic and the great variety in climatic conditions cause great differences in the structure of agriculture from north to south and from west to east. In the Far North stag breeding, hunting and fishing are predominant. Further south, timber industry is combined with grain growing. In the southern half of the forest zone and in the adjacent forest-steppe zone, the acreage under grain crops is far larger and the structure of agriculture more complex. In the eastern part of this zone, between the Volga and the Urals, cereiculture is predominant (particularly summer wheat), with cattle breeding next. Beyond the Urals, we find another important grain-growing and stock-breeding area in the southern part of the Western-Siberian plain. The southern steppe zone is the main wheat granary of the U.S.S.R., containing also large acreages under barley, maize and sunflower. In the extreme South (Krasnodar region, Stavropol region) cotton is now cultivated. Vine, tobacco and other Southern crops are grown on the Black Sea shore of the Caucasus.

Industrially, the R.S.F.S.R. occupies the first place among the Soviet Republics. Major changes in the location of industry have occurred since the revolution and again since the war with two new industrial areas being developed in the Urals and in the Kuznetsk basin, although Moscow and Leningrad are still the two largest industrial centres in the country. Most of the oil produced in the U.S.S.R. now comes from two areas in the R.S.F.S.R.—the Bashkir and Tartar Autonomous Republics. All industries are represented in the R.S.F.S.R., including iron and steel and engineering. Industrial centres include Magnitogorsk,

* During the Second World War, the Kalmyks, a Mongolian people, were scattered to remote areas in a deportation programme. Their territory was restored as an autonomous province in 1957, and on July 30, 1958, the Supreme Soviet of the U.S.S.R. restored a Kalmyk A.S.S.R.

Chelyabinsk, Stalinsk, Tula, Komsomolsk, Perm, Ufa, Irkutsk, Kuibyshev, Krasnoyarsk, Nizhny-Tagil, Novosibirsk, Omsk, Stalingrad, Gorky, Saratov, Grozny, Rostov and Taganrog.

CAPITAL, MOSCOW. Population 5,032,000 (an increase of 120 per cent. since 1939). Moscow, founded about A.D. 1147 by Yuri Dolgoruki, became first the centre of the rising Moscow principality and, later, in the 15th century, the capital of the whole of Russia (Muscovy). In 1325, it became the seat of the Metropolitan of Russia. In 1703 Peter the Great transferred the capital to the newly built St. Petersburg, but on March 14, 1918, Moscow was again designated as the capital. Ψ Leningrad (before the First World War "St. Petersburg" and from 1914-1924 "Petrograd") has a population of 3,300,000.

Other cities with populations exceeding 500,000 (1959) are:—

Gorky (Nizhny-Novgorod).....	942,000
Novosibirsk (Novonikolayevsk).....	887,000
Kuibyshev (Samara).....	806,000
Sverdlovsk (Yekaterinburg).....	777,000
Chelyabinsk.....	688,000
Kazan.....	643,000
Perm.....	628,000
Ψ Rostov-on-Don.....	597,000
Stalingrad (Tsaritsyn).....	591,000
Saratov.....	581,000
Omsk.....	579,000
Ufa.....	546,000

About 83 per cent. of the population are Russians.

Ψ Seaport.

II.—THE UKRAINE

First Secretary of the Party Central Committee, N. V. Podgorny.

Chairman of the Presidium of the Supreme Soviet, D. S. Korotchenko.

Chairman of the Council of Ministers, V. V. Shcherbinsky.

Minister of Foreign Affairs, L. F. Palamarchuk.

This Republic, second largest in population, lying in the south-western part of the European half of the U.S.S.R., was formed in December, 1917. It consists of 25 provinces—Cherkasy, Chernigov, Chernovtsy, Crimea, Dnepropetrovsk, Kharkov, Kherson, Khmelnytsky, Kiev, Kirovograd, Lugansk, Lvov, Nikolayev, Odessa, Poltava, Rovno, Stalino, Stanislav, Sumy, Ternopol, Transcarpathia, Vinnytsa, Volhynia, Zaporozhye and Zhitomir.

Physical Features.—The larger part of the Ukraine forms a plain with small elevations. The Carpathian mountains lie in the south-western part of the Republic. The climate is moderate, with relatively mild winters (particularly in the south-west) and hot summers. The main rivers are the Dnieper with its tributaries, the Southern Bug and the Northern Donets (a tributary of the Don).

Production and Industry.—The main centre of Soviet coal mining and iron and steel industry is situated in the southern part of the Ukraine. Engineering and chemical industry have been greatly developed under the Soviet régime. In 1955, the Ukraine provided 37 per cent. of the total Soviet steel, 39 per cent. of metal goods and 32 per cent. of coal. The central forest-steppe region (mainly on the right bank of the Dnieper) is the greatest sugar-producing area in the U.S.S.R. The Ukraine also leads in grain-growing and stock-raising.

There are large deposits of coal and salt in the Donets Basin, of iron ore in Krivoy Rog and near Kerch in the Crimea, of manganese in Nikopol, and of quicksilver in Nikitovka.

CAPITAL (since 1934), Kiev, the oldest city in Russia, founded in the 9th century A.D., was the capital of the Russian State from 865 to 1240. Population (1959) 1,102,000. Other cities with population over 500,000 are:—

Kharkov.....	930,000
Stalino (Yuzovka, i.e. Hughes-ovka).....	701,000
Ψ Odessa.....	667,000
Dnepropetrovsk (Yekaterinoslav).....	658,000

III.—BELORUSSIA

(White Russia)

First Secretary of the Party Central Committee, K. T. Mazurov.

Chairman of the Presidium of the Supreme Soviet, V. I. Kozlov.

Chairman of the Council of Ministers, T. Ya. Kiselev. Minister of Foreign Affairs, K. V. Kiselev.

The Belorussian S.S.R., lying in the western part of the European half of the U.S.S.R., was formed early in 1919. It now consists of six provinces (Brest, Gomel, Grodno, Minsk, Mogilev and Vitebsk). It is largely a plain with many lakes, swamps and marshy land. Before the revolution of 1917 the area was one of the most backward parts of European Russia. Since then, agriculture has been greatly developed, thanks to draining of swamps. Most of the Republic's industry is also of recent growth. Woodworking is of great importance, but engineering has also been greatly extended with several major plants built in Gomel and Minsk.

The main rivers are the upper reaches of the Dnieper, of the Niemen and of the Western Dvina.

CAPITAL, Minsk. Population 509,000.

Belorussians make up four-fifths of the population, with Russians and Poles coming next.

IV.—UZBEKISTAN

First Secretary of the Party Central Committee, Sh. R. Rashidov.

Chairman of the Presidium of the Supreme Soviet, Mrs. Ya. S. Nasriddinova.

Chairman of the Council of Ministers, R. Kurbanov.

The Uzbek S.S.R. was formed in 1924 and consists of the Kara-Kalpak A.S.S.R., and of 7 provinces (Andizhan, Bokhara, Ferghana, Khorezm, Samarkand, Surkhan-Darya and Tashkent). It lies between the high Tianshan Mountains and the Pamir highlands in the east and south-east and sandy lowlands in the west and north-west. The major part of the territory is a plain with huge waterless deserts and several large oases, which form the main centres of population and economic life. The largest is the Ferghana valley, watered by the Syr-Darya. Other oases include Tashkent, Samarkand, Bokhara and Khorezm. The climate is continental and dry. Minerals include oil (in the Ferghana valley and in Khadag), coal (Angren) and sulphur (Shorsu).

The Uzbeks, a Turkic people, make up 62 per cent. of the population, the Russians (14 per cent.) and Tartars (five per cent.) come next.

There is a major agricultural machinery plant at Tashkent and a chemical combine at Chirchik. Uzbekistan is the main cotton-growing area of the U.S.S.R., producing more than 60 per cent. of all Soviet cotton. Irrigation has always been of decisive importance in this area, and the Soviet Government has done much in this field, including the construction of the Great Ferghana Canal (230 miles).

CAPITAL, Tashkent. Population 911,000. Samarkand 195,000, contains the Gur-Emir (Tamerlane's Mausoleum), completed A.D. 1400 by Ulug-bek, Tamerlane's astronomer-grandson, and a 15th-century observatory, recently restored.

V.—KAZAKHSTAN.

First Secretary of the Party Central Committee, D. A. Kunayev.

Chairman of the Presidium of Supreme Soviet, I. Sh. Sharipov.

Chairman of the Council of Ministers, S. D. Daulenov.

The Kazakh S.S.R., the second-largest Union-Republic, stretching from the lower reaches of the Volga and the Caspian in the west to the Altai and Tien-shan in the east, and bordering on China, was formed in 1920 as an autonomous republic (under the name of the Kirghiz A.S.S.R.) within the R.S.F.S.R., and was constituted a Union Republic in 1936. It consists of the *Tselimny Kray* (= Virginland Region) comprising the Kokchetav, Kustanay, North-Kazakhstan, Pavlodar and Tselinograd (formerly Akmolinsk) Provinces; and of ten other provinces: Aktyubinsk, Alma-Ata, Djambul, East-Kazakhstan, Guryev, Karaganda, Kzyl-Orda, Semipalatinsk, South-Kazakhstan and West-Kazakhstan.

Kazakhstan is a country of arid steppes and semi-deserts, flat in the west, hilly in the east and mountainous in the south-east (Southern Altai and Tien-shan). The climate is continental and very dry. The main rivers are the (Upper) Irtysh, the Ural, the Syr-Darya and the Ili. Kazakhstan contains rich deposits of non-ferrous metals: copper in Kounrad, Djezkazgan and Boshchekul, other metals in the Altai, in the Kara-Tau Mountains, and elsewhere. It also contains an important coal-producing area (Karaganda) ranking third in the U.S.S.R. and an oil-bearing area (near Emba). Major centres of metal industry exist now in the Altai Mountains, in Chimkent, North of the Balkhash Lake and in Central Kazakhstan. Stock-raising is highly developed, particularly in the central and south-western parts of the Republic. Grain is grown in the North and north-east and cotton in the south and south-east. In 1954 an ambitious programme of development of "virgin" lands in the steppes was launched by the Government to increase grain production.

The Kazakhs (a Turkic people) are now in a minority in the Republic named after them; they constitute only 30 per cent. of its population. Russian settlers make up 43 per cent. and Ukrainians 8 per cent.

CAPITAL, Alma-Ata (formerly Verny). Population 455,000.

VL.—GEORGIA

First Secretary of the Party Central Committee, V. P. Mzhavanadze.

Chairman of the Presidium of the Supreme Soviet, G. S. Dzoteniidze.

Chairman of the Council of Ministers, G. D. Djavakishvili.

The Georgian S.S.R., occupying the north-western part of Transcaucasia, lies on the shore of the Black Sea and borders in the south-east on Turkey. It was formed in 1921; in 1922 it joined the Transcaucasian Federation which, in its turn, adhered to the U.S.S.R. in the same year. After the liquidation of the Transcaucasian S.F.S.R. in 1936 Georgia became a Union Republic. It contains two Autonomous Republics (Abkhazia and Adjara) and the South-Osetian Autonomous Province. Georgia is a country of mountains, with the Greater Caucasus in the north and the Smaller Caucasus in the south. A relatively low-lying land between these two ridges is divided into two parts by the Sura Ridge: Western Georgia with a mild and damp climate and Eastern Georgia with a more continental and dry climate. The Black Sea shore and the Rion lowlands are subtropical in their climatic character. The most

important mineral deposits are manganese (Chiatyry), coal (Tkibuli and Tkvarcheli) and oil (Kakhetia). Georgia is leading as regards production of manganese in the U.S.S.R. There are also many oil refineries. Viniculture and tobacco-growing are the two main agricultural industries. The Black Sea coast harbours many famous holiday resorts. Georgians make up 63 per cent. of the population, the remainder being composed of Armenians, Russians, Azerbaidjani and Osetians.

CAPITAL, Tbilisi (Tiflis). Population 694,000.

VII. AZERBAIDJAN

First Secretary of the Party Central Committee, V. Yu. Akhundov.

Chairman of the Presidium of the Supreme Soviet, S. M. Djafarov.

Chairman of the Council of Ministers, M. A. Isken-derov.

The Azerbaidjan S.S.R. occupies the eastern part of Transcaucasia, on the shores of the Caspian Sea, and borders on Persia. It was formed in 1920. Between 1922-1936 it formed part of the Transcaucasian Federation. In 1936 it became a Union Republic. It contains the Nakhichevan Autonomous Republic and the Nagorno-Karabakh Autonomous Province.

The north-eastern part of the Republic is taken up by the south-eastern end of the main Caucasus ridge, its south-western part by the smaller Caucasus hills, and its south-eastern corner by the spurs of the Talysh Ridge. Its central part is a depression irrigated by the Kura and by the middle reaches of its tributary Aragva. Sheltered by the mountains from the humid west winds blowing from the Black Sea, Azerbaidjan has a continental climate. The land requires artificial irrigation. The Republic is very rich in minerals, particularly in oil. The Baku oilfields form the second-largest oil-producing area in the U.S.S.R. A large power station on the Kura (Mingechaur) was completed in 1954. Azerbaidjan is also important as a cotton growing area. The Azerbaidjani (Turks) make up two-thirds of the population of the Republic, Armenians, about 12 per cent., and Russians, about 14 per cent.

CAPITAL, Baku. Population 968,000.

VIII.—LITHUANIA

First Secretary of the Party Central Committee, A. J. Sniecūkus.

Chairman of the Presidium of the Supreme Soviet, J. I. Paleckis.

Chairman of the Council of Ministers, M. J. Šumauskas.

Lithuania, formerly a Province of the Russian Empire, was declared an independent Republic at Vilna in 1918 and was incorporated into the U.S.S.R. in August, 1940. It was occupied by German forces from June, 1941, until the autumn of 1944. The Republic forms a plain with a large number of lakes and swamps. The forests occupy 19 per cent. of the whole area. The main river is the Niemen with its tributaries.

The chief industries are agriculture and forestry, the chief products being rye, oats, wheat, barley, flax, sugar-beet and potatoes. Before its incorporation into the Soviet Union, Lithuania exported a large quantity of meat and dairy produce.

The Lithuanians make up four-fifths of the population, Russians and Poles, 8.5 per cent. each. The majority of the Jews were exterminated by the Germans.

CAPITAL, Vilnius (Vilna, restored to Lithuania by U.S.S.R. after invasion and collapse of Poland in 1939, and recaptured by Soviet forces in July, 1944). Population 235,000.

IX.—MOLDAVIA

First Secretary of the Party Central Committee, I. I. Bodyul.

Chairman of the Presidium of the Supreme Soviet, I. S. Koditsa.

Chairman of the Council of Ministers, A. F. Diorditsa.

Moldavia, occupying the south-western corner of the U.S.S.R., borders in the west on Roumania with the Pruth forming the frontier. In 1918, Roumania seized the Russian Province of Bessarabia. In 1924 a Moldavian Autonomous Republic was formed within the Ukraine, and in 1940 the U.S.S.R. forced Roumania to give back Bessarabia, the major part of which was merged with the Moldavian A.S.S.R. to form a Moldavian Union Republic. Moldavia was occupied by the Germans and Roumanians between 1941-1944.

The northern part of the Republic consists of flat steppe lands, now all under plough. Some forests skirt the Dniester. Further south, around Kishinev, there are woody hills, and further south again, low-lying steppe lands. The climate is moderate. The main river is the Dniester, navigable along the whole course.

The main industry is agriculture (viniculture, fruit-growing and market-gardening). Industry is insignificant in both parts of Moldavia, but the Republic has the densest population in the U.S.S.R. A radical agrarian reform has been carried out under the Soviet régime. Moldavians make up 65 per cent. of the population, with Ukrainians, and Russians next. In the south there are colonies of Bulgarians.

CAPITAL, Kishinev (Chisinau). Population 214,000.

X.—LATVIA

First Secretary of the Party Central Committee, A. J. Pelse.

Chairman of the Presidium of the Supreme Soviet, J. E. Kalnberzin.

Chairman of the Council of Ministers, J. V. Pejve.

The Latvian S.S.R., lying on the shores of the Baltic and of the Gulf of Riga, was formerly a Baltic Province of the Russian Empire. It was proclaimed an independent state in 1918 and was forcibly incorporated into the U.S.S.R. in August 1940. Between 1941 and 1944 the Republic was occupied by the German forces.

The surface of the country is generally flat, interspersed by occasional chains of hills. The climate is moderately-continental. The main rivers are the lower reaches of the Western Dvina and its tributaries. Forests occupy 20 per cent. of the total territory.

The Latvians make up 62 per cent. of the Republic's population, the Russians, 27 per cent.

Latvian industry was always highly developed, with shipbuilding, engineering, chemical industry, textile industry, wood-working and dairying being the chief occupations. Both Riga and Liepaja (Libava, Liebau) are important sea-ports.

As in other newly-acquired Republics an agrarian reform was carried out in Latvia in 1940-41 and again after 1944.

CAPITAL, Riga. Population 605,000.

XI.—KIRGHIZIA

First Secretary of the Party Central Committee, T. T. Usubaliyev.

Chairman of the Presidium of the Supreme Soviet, T. Kulatov.

Chairman of the Council of Ministers, B. Mambetov.

The Kirghiz S.S.R. occupies the north-eastern part of Soviet Central Asia and borders in the south-east on China. In 1924, a Kara-Kirghiz

Autonomous Province was formed within the R.S.F.S.R. In 1926 it became a Kirghiz Autonomous Republic, and in 1936, a Union Republic. It contains two provinces (Osh and Tien-Shan). The Kirghiz Republic is a mountainous country, the major part being covered by the ridges of the Central Tien-Shan, while mountains of the Pamiro-Altai system occupy its southern part. There are a number of spacious mountain valleys, the Alai, Susamyr, the Issyk-kul lake and others. The majority of the population is concentrated in plains, lying at the foot of mountains—Chu, Talass, part of the Ferghana Valley where agriculture prospers. Industry is insignificant, but some mining is done. A number of railways have been built under the Five Year Plans. The Kirghiz now constitute only 40 per cent. of the population, the Rusians, 30 per cent. The Uzbeks (in Eastern Ferghana) amount to 10 per cent.

CAPITAL, Frunze (formerly Pishpek). Population 217,000.

XII.—TADJIKISTAN

First Secretary of the Party Central Committee, D. R. Rasulov.

Chairman of the Presidium of the Supreme Soviet, M. Rakhmatov.

Chairman of the Council of Ministers, A. Kakharov.

The Tadjik S.S.R. lies in the extreme south-east of Soviet Central Asia and borders in the south on Afghanistan and in the east on China. It was originally formed in 1924 as an Autonomous Republic within the Uzbek S.S.R. and became a Union Republic in 1929. It includes the Gorno-Badakhshan Autonomous Province and the Leninabad Province.

The country is mountainous: in the east lie the Pamir highlands with the highest point in the U.S.S.R., the Stalin Peak (24,590 feet), in the centre the high ridges of the Pamir-Altai system. Plains are formed by wide stretches of the Syr-Darya valley in the north and of the Amu-Darya in the south.

Like the other Central-Asiatic Republics, Tadjikistan is a cotton-growing country. Its climatic conditions favour the cultivation of Egyptian cotton. Irrigation is of great importance. Fifty-three per cent. of the population are Tadjiks (linguistically and culturally akin to the Persians), about 23 per cent. Uzbeks, the rest Russians and Tartars.

CAPITAL, Stalinabad (formerly Dyushambe). Population 224,000.

XIII.—ARMENIA

First Secretary of the Party Central Committee, Ya. I. Zarobyan.

Chairman of the Presidium of the Supreme Council, Sh. M. Arushanyan.

Chairman of the Council of Ministers, A. Ye. Kochinyan.

The Armenian S.S.R. occupies the south-western part of Transcaucasia; it was formed in 1920. In 1922 it joined the Transcaucasian Federation, and on its liquidation in 1936 became a Union Republic. In the south it borders on Turkey. It is a mountainous country consisting of several vast table lands surrounded by ridges. The population and the economic life are concentrated in the low-lying part of Armenia, the Aras valley and the Erevan hollow; the climate is continental, dry and cold, but the Aras valley has a long, hot and dry summer. Irrigation is essential for agriculture. At the junction of the former Turkish, Persian and Russian boundaries is Mount Ararat (17,160 ft.), the traditional resting place of

"Noah's Ark." Industrial and fruit crops are grown in the low-lying districts, grain in the hills. Armenia is traditionally noted for her wine. There are large copper ore and molybdenum deposits and other minerals. The Armenian Church centred in Etchmiadzin is the oldest established Christian Church, Christianity having been recognized as the State religion in A.D. 300.

Nearly 90 per cent. of the population is Armenian.

CAPITAL, Erevan. Population 509,000.

XIV.—TURKMENISTAN

First Secretary of the Party Central Committee, B. O. Ovezov.

Chairman of the Presidium of the Supreme Soviet, N. Bayramov.

Chairman of the Council of Ministers, A. A. Annaliev.

Turkmenia occupies the extreme south of Soviet Central Asia, between the Caspian and the Amu-Darya and borders in the south on Iran and Afghanistan. It was formed in 1924 and contains three Provinces (Chardjou, Mary and Tashauz). The country is a low-lying plain, fringed by hills in the south. Ninety per cent. of the plain is taken up by the arid Kara-Kum desert. Of all Central-Asiatic Republics, Turkmenia is the lowest and driest. The principal industries are agriculture and stock-raising, cotton, wool, astrakhan furs, carpets and horses being the principal products. Minerals include oil and sulphur. Most of the land under plough is artificially irrigated. Silk industry is of an old standing. There are also some fisheries in the Caspian.

Turkmens, nomadic in the past, make up 61 per cent. of the population, with Russians coming second, and Uzbeks, third.

CAPITAL Ashkhabad (formerly Askhabad, Poltoratsk). Population 170,000.

XV.—ESTONIA

First Secretary of the Party Central Committee, I. G. Käbin.

Chairman of the Presidium of the Supreme Council, I. G. Eichfeld.

Chairman of the Council of Ministers, A. A. Mürlsepp.

Estonia, formerly a Baltic province of the Russian Empire, was proclaimed an independent Republic in 1918. In 1940, it was forcibly incorporated into the U.S.S.R. It lies on the shores of the Baltic and of the Finnish Gulf in the north and of the Gulf of Riga in the south-west. Some 800 islands, among them Dagö and Ösel, form part of Estonian territory. Between 1941-44, Estonia was occupied by the German forces.

The country forms a low-lying plain with many lakes, among them the Chud (or Pskov) Lake, on the border with the R.S.F.S.R. Forests take up about one-fifth of the territory. Agriculture and dairy-farming are the chief industries, rye, oats, barley, flax and potatoes being the chief crops, and butter, bacon and eggs the chief products of dairy farming. There are important manufactures, including textiles, engineering, shipbuilding, wood-working, etc.

The population consists of Estonians (73 per cent.) and Russians (22 per cent.).

CAPITAL, Tallinn (formerly Reval). Population 280,000.

VENEZUELA

(La Republica de Venezuela)

President, Señor Romulo Betancourt, assumed office Feb. 13, 1959.

EMBASSY IN LONDON

3, Hans Crescent, S.W.1

[Knightsbridge: 4206]

Ambassador in London, His Excellency Dr. Ignacio Iribarren Borges (1959).

Minister-Counsellor, Dr. Hernán Gonzalez Vale.

Economic Counsellor, Señor Julio Planchart.

1st Secretary, Señor Gabriel Paoli.

3rd Secretary, Señora Mercedes Senior.

Naval Attaché, Capt. Armando de Pedraza Pereira.

Military Attaché, Col. Simón Medina Sánchez.

Air Attaché, Lt.-Col. Edgar Suárez Mier y Terán.

Special Attaché, Señora Miriam Blanco-Fombona de Hood.

There are Consulates-General at London and Liverpool.

Area and Population.—The most northerly Republic of South America, situated approximately between 1° 40' S. lat. and 12° 26' N. lat. and 59° 52' - 73° 15' W. long. It consists of one Federal District, 20 states and 2 territories. The best authorities calculate the actual present area to be approximately 352,051 square miles. The population on Dec. 31, 1960 was estimated to be 6,807,000.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia, east by British Guiana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being Margarita, which is politically associated with Tortuga, Cubagua and Coche to form the State of Nueva Esparta. Margarita has an area of about 400 square miles. In 1942 Great Britain ceded to Venezuela the small island of Patos (170 acres) about 3 miles from the mainland.

Physical Features.—The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de Caracas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraima, and on the eastern border the Sierras de Rincote and de Usumapo, enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The Sierra Parima contains Yaparana (7,175 feet) and Duida (8,120 feet), and Para Caima contains Maraguaca (8,228 feet) and Roraima (9,000 feet), the latter being on the Venezuela-Guiana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly llanos, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the Orinoco, with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in the southern highlands of the republic to its outflow in the deltaic region of the north-east.

A Franco-Venezuelan Expedition, led by Major Frank Risquez, claims to have discovered the source of the Orinoco, on Nov. 27, 1951, at 63° 15' W. long., 2° 18' N. lat., and about 1,100 metres above sea-level.

The Orinoco is navigable for large steamers from its mouth for 700 miles, and by smaller vessels as far as the Maipures Cataract, some 200 miles farther up-stream. Dredging operations completed at the beginning of 1954 opened the Orinoco to ocean-going ships, of up to 24 ft. draft, as far as

Puerto Ordaz (about 150 miles up-stream) Among the many tributaries of the main stream are the Ventuari, Caura and Caroni from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Río Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the *Casiquiare*. The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which *Maracaibo*, with an area exceeding 7,000 square miles, is the largest lake in South America. Other lakes are *Zulia* (290 square miles), south-west of Maracaibo, and *Valencia* (216 square miles), about 1,400 feet above sea-level in the Maritime Andes. The *llanos* also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot, wet season lasts from April to October the dry, cooler season from November to March.

Government.—Venezuela was visited by Columbus in 1498, and in 1499 by Alonso de Ojeda and Amerigo Vespucci, the former naming the Gulf of Maracaibo Venezuela, or "Little Venice" (on account of the Indian pile-built settlements on the coast and shores of the lake), and the name was afterwards extended to the whole of the Orinoco basin. In 1550 the territory was formed into the captaincy-general of Caracas, and the country remained under Spanish rule until the revolt under *Simón Bolívar*, a native of Caracas, who defeated the Spanish forces in the battles of Los Taguanes (1813) and Carabobo (1821), and thus secured the independence of the country. Bolívar was an untiring hero in the cause of independence, and through his efforts (and those of his adjutant Sucre) Venezuela, Ecuador and Colombia achieved their freedom from Spain, while Peru was enabled to establish its independence in consequence of his victories. He died in 1830, at the age of 47. Venezuela formed part of the Federal Republic of Colombia from 1822–30, since which time it has been independent.

On Nov. 30, 1952, polling took place to elect a new Constituent Assembly, which published a new Constitution on Nov. 30, 1952, and chose a Senate and Chamber of Deputies. The validity of these elections was subsequently queried, but Col. Marcos Pérez Jiménez declared himself elected as the Provisional President. On April 19, 1953, with the passing of the new Constitution, he was declared Constitutional President for a term of five years. Before the expiry of this term, however, on January 23, 1958, his military dictatorship was overthrown by a popular and military uprising, and a Government Junta, presided over by Rear-Admiral Wolfgang Larrazábal Ugueto, assumed the temporary government of the country. Larrazábal resigned on Nov. 14, 1958, in order to stand for President in the elections held on December 7, 1958, his place as President being filled by Dr. Edgar Sanabria who in turn handed over the Presidency to Sr. Rómulo Betancourt on the success of the latter and his party in the elections. Sr. Betancourt presides over a Coalition Government composed of his own political party A.D. (*Acción Democrática*) and COPEI (the Social Christian Party).

Production and Industry.—The produce of Venezuelan forest and fields includes the following: (a) Tropical forest region: orchids, wild rubber,

timber, mangrove bark, balata gum and tonka beans. (b) Agricultural areas: cocoa beans, coffee, cotton, rice, maize, sugar, sesame, ground-nuts, potatoes, tomatoes, other vegetables, sisal and tobacco. Although there is an extensive beef and dairy farming industry, the country does not produce all the grain and other food products it requires. Food and drink imports were valued at the equivalent of £61,631,000 in 1958. An autonomous Government department, the *Corporación Venezolana de Fomento*, and other Government agencies, are endeavouring, by loans, investment and other means, to foster agricultural and industrial development. A strong nationalist movement began in 1958 to speed up the rate of industrialization; to this end many tariffs were raised and legislation introduced to compel Governments to give preference to national manufacturers.

The principal industry is that of *Petroleum*. The production of the oilfields is shown below (in barrels of 42 gallons):—

Year	Barrels	Year	Barrels
1945.....	323,400,000	1953.....	644,221,000
1946.....	388,500,000	1954.....	691,181,000
1947.....	438,000,000	1955.....	785,237,000
1948.....	490,000,000	1956.....	899,183,000
1949.....	482,300,000	1957.....	1,014,929,190
1950.....	546,730,000	1958.....	950,057,040
1951.....	622,187,000	1959.....	1,010,873,705
1952.....	658,427,000	1960.....	1,044,520,500

Before the war of 1939–45 over 80 per cent. of the crude oil was exported to Netherlands' West Indies refineries. In 1942 small refineries were established in Venezuela, capable of handling about 200,000 barrels daily. The large Shell plant at Punta Cardon went into production in February, 1949, and the Creole refinery at Amuay a year later. Other refineries are being operated at Caripito, San Lorenzo, Puerto La Cruz, Tucupito, El Chaure and El Palito and 30 per cent. of the total output of crude oil was refined in Venezuela in 1960. Hitherto the Venezuelan Government has been receiving over 50 per cent. of the profits of local oil companies. As a result of income tax increases decreed in December, 1958, this percentage was raised to over 60 per cent. Rich iron ore deposits in South Venezuela are being developed and production reached 19,490,379 metric tons in 1960. A steel tube mill is in the process of being completed near Ciudad Bolívar, which is designed to use local iron ore, and power from the newly-opened Caroni River hydroelectric plant.

Other industries include gold, diamonds and asbestos; cotton, wool and rayon weaving; manufacture of paper, cement, beer, tyres, cigarettes, soap, animal feeding concentrates, non-alcoholic drinks, simple steel products, shoes, tins, jewellery, rope, metal and wooden furniture, sacks, paint and motor-vehicle assembly, preparation of pharmaceutical goods, lard, powdered milk, vegetable oil, flour, biscuits and other foods; fishing and fish-canning; pearl fishing. New industries planned include petrochemicals, plate glass, and the manufacture of paper from bagasse.

Language and Literature.—Spanish is the language of the country. Some Venezuelan literature is of international repute. There are 23 daily newspapers in Venezuela, of which 8 are published in Caracas, 75 weeklies and 23 fortnightly. There are also 23 other periodicals, mostly monthlies, but including also some appearing once, twice or three times a week.

Education is free and primary education compulsory from the age of 7 years. There were, in 1959–60, 1,074,434 primary school pupils and

149,335 secondary school pupils including those at technical schools. There are seven universities in Venezuela, three in Caracas and the others in Maracaibo, Mérida, Valencia and Ciudad Bolívar. The total number of university students is 21,292 (1960).

FINANCE

	1958-59 Bolívares	1959-60* Bolívares
Revenue.....	5,306,420,000	5,851,000,000
Expenditure.....	6,240,650,000	5,932,000,000
Internal Debt (March 31 1960)...		170,910,000

* Provisional figures.

The public debt on February 28, 1961 amounted to Bs.1,493,495,914. The Government controlled foreign exchange rate at present fluctuates around Bs.9.38 to the £. The official free rate is about Bs.12 to the £ and the unofficial free rate is slightly higher (June, 1961). There are special buying rates for petroleum, coffee and cocoa. (See also p. 84.)

Communications.—There are about 17,900 miles of all-weather roads. The State has now acquired all but a very few of the railway lines, whose total length is only some 760 miles. A substantial railway reorganization plan has been drawn up which will involve the abandonment of four systems with differing gauges and the construction of new lines of standard gauge. One of these lines, 173 km. long (Puerto Cabello-Barquisimeto), was inaugurated in 1959. Several British, U.S. and European airlines provide Venezuela with a wide range of services. There are three Venezuelan airlines (two of them state-owned) which between them have a comprehensive network of internal lines and also connect Caracas with New York, Miami, Bermuda, Havana, Lima, Bogotá, the West Indies, Lisbon, Madrid and Rome. The Venezuelan state-owned merchant fleet controls a total tonnage of about 250,000. Foreign vessels are not permitted to engage in the coast trade. The telegraph, radio-telegraph and radio-telephone services are state-owned. There are one government-controlled and 79 commercial broadcasting stations. There are five television stations in Venezuela (three in Caracas, one in Maracaibo and one in Valencia). The two Caracas commercial television stations have relay transmitters in the interior of the country, Radio Caracas T.V. having five and Venevisión three.

TRADE

	1959	1960
Imports	Bs. 4,720,000,000	Bs. 3,571,424,000
Exports.....	7,897,000,000	—

The principal imports are machinery, textiles, foodstuffs, steel and iron and chemicals. The principal exports are petroleum and petroleum products (90.5 per cent. in 1959), iron ore, coffee and cocoa. The value of exports of iron ore in 1959 amounted to Bs.424,330,000.

Trade with U.K.

	1959	1960
Imports from U.K....	£33,998,331	£27,695,100
Exports to U.K.....	75,705,326	71,933,000

CAPITAL. Caracas (3,000 it.). Population, December, 1956, 1,102,230; other principal towns are Maracaibo (289,723), Barquisimeto (164,908), Valencia (124,376), Maracay (95,137), San Cristóbal (77,876), Cumaná (68,756) and Ciudad Bolívar (42,177).

FLAG.—Three horizontal bands, yellow, blue, red (with seven white stars on blue band).

VIETNAM

President of the Republic of Vietnam, Ngo dinh Diem, assumed office, Oct. 26, 1955; re-elected for 5 years, April, 1961.

VIETNAM EMBASSY IN LONDON

12 Victoria Road, W.8

[Western: 3765]

Ambassador Extraordinary and Plenipotentiary, Ngo Dinh Luyen (1956).

1st Secretaries, Phan Van Thinh; Le Van Ky (Consular); Pham Huy Ty (Economic).
2nd Secretaries, Nguyen Trieu Dan; Dao Huu Tuong; Le Van Loi; Tran Manh Phuc.
3rd Secretary, Nguyen Duc Quy (Press).
Attaché, Le Dinh Phuoc.

Since the Geneva Conference of July 1954, Vietnam has been divided into two zones.

SOUTHERN ZONE

The Southern Zone has an area of 66,300 sq. miles. Its population was estimated in 1960 at 14,100,000. Rice and rubber are the chief products. Total trade in 1960 was: Imports £84,120,000; Exports £29,940,000.

Trade with U.K.

	1959	1960
Imports from U.K.....	£1,822,857	£2,590,959
Exports to U.K.....	555,162	1,691,093

The rate of exchange (official market sale) in 1961 was VN\$98.98 = £1.

On October 23, 1955, a referendum showed a large majority in favour of the deposition of the former Chief of State, Bao Dai, and the election of Ngo dinh Diem to his place. The latter was accordingly proclaimed Chief of State on October 26, and his first act was to declare Vietnam a Republic of which he became the President. An elected constituent assembly, after two months' deliberation, set up a democratic constitution which was promulgated on October 26, 1956. This constituent assembly, on the date of the promulgation of the constitution, became the first Legislative Assembly of the Republic of Vietnam. A

new national assembly was elected in 1959 and President Diem was re-elected for a second term of 5 years in April, 1961. The Government of the Republic of Vietnam in Saigon is recognized by the United Kingdom, the United States, France and other members of the United Nations as the legal government of Vietnam.

CAPITAL.— Ψ Saigon, population (1960, with Cholon), 1,400,000. Other principal towns are Hué (1960 population: 104,500) and Ψ Tourane (1960 population: 110,500). Saigon and Tourane are the main ports.

BRITISH EMBASSY Saigon

Ambassador Extraordinary and Plenipotentiary, His Excellency Henry Arthur Frederick Hohler, C.M.G. (1959)..... £4,115

British Council Representative, H. C. Burrow, 119 Dai-lo Nguyen-Hue, Saigon.

NORTHERN ZONE

President, Ho Chi Minh, assumed office, 1945; re-elected July 15, 1960.

Vice-President, Ton Duc Thang.

Prime Minister, Pham Van Dong (1955).

Minister of Foreign Affairs, Ung Van Khiem.

The Northern Zone (north of the 17th parallel) has an area of approximately 63,000 sq. miles and a population (Census of 1960) of 15,903,000. The capital is Hanoi (638,600) and the chief port is Ψ Haiphong (367,000). The chief crop is rice, of which the production in 1959 was claimed to be over 5,000,000 tons, while the chief industrial products are coal and cement. The production of apatite (phosphate) is increasing, and with Chinese and Soviet aid some new factories have been built to produce consumer goods.

The régime in the north styles itself the Government of the Democratic Republic of Vietnam, of which the President is Ho Chi Minh. Power is wielded by the *Lao Dong* (or Workers') Party which is Communist in character, and which can exert its influence through another mass organization known as the Fatherland Front (which some years ago superseded the "Vietminh"). The policy of the northern régime is to work for unification of north and south, whilst in the meantime it strives to remould the political and economic life of the north on Communist lines. A five-year plan started in 1961. Elections to the "Second National Assembly" were held in the north in May 1960. The régime has diplomatic relations with the U.S.S.R., China and other states of the Sino-Soviet bloc, but very few other countries recognize it.

There is a British Consulate General at Hanoi.

VOLTAIC REPUBLIC (Republic of Upper Volta)

President, Maurice Yaméogo, re-elected for five years, Dec. 8, 1960.

President National Assembly, Koné Begnon.

EMBASSY IN LONDON

M. Gérard Ouédraogo was designated to be the Republic's first Ambassador in London.

The Voltaic Republic is an inland, savannah state in West Africa, situated between 9° and 15°N and 2°E and 5°W with an area of about 100,000 square miles and a population estimated in 1959 at 4,000,000. It has common boundaries with Mali on the west, Niger and Dahomey on the east and Togo, Ghana and the Ivory Coast on the south. The

largest tribe is the Mossi whose king, the Moro Naba, still wields a certain moral influence.

Upper Volta was annexed by France in 1896 and between 1932 and 1947 was administered as part of the Colony of the Ivory Coast. It decided on December 11, 1958, to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 5, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, etc., were signed in Paris on April 24, 1961. The Voltaic Republic is a member of the *Conseil de l'Entente* (see Ivory Coast). The official language is French. The constitution, adopted by referendum on November 27, 1960, provides for a presidential form of government with a single chamber National Assembly, whose life was extended by the terms of the constitution for a further period of five years.

The principal industry is the rearing of cattle and sheep and the chief exports are livestock, groundnuts, shea nuts and cotton. Small deposits of gold, manganese and copper have been found. Total revenue of the Republic in 1960, excluding foreign aid, was francs CFA4,894,000,000; expenditure, francs CFA5,824,000,000. Value of trade in 1960 amounted to: Imports, francs CFA 2,027,000,000; Exports, francs CFA1,603,000,000. The currency is the Franc CFA (francs CFA50 = French N.F.).

CAPITAL.—Ouagadougou (70,000). Other principal town: Bobo-Dioulasso (45,000). **FLAG.**—Three horizontal stripes, black (above), white and red.

British Ambassador, see Ivory Coast.

THE YEMEN

(The Mutawakkilite Kingdom of The Yemen)

King of The Yemen. Imam Ahmed bin Yehya Muhammad Hamid Ud Din, b. 1895, proclaimed March 14, 1948, after the assassination in February, 1948 of his father the late King, Imam Yehya Muhammad Hamid Ud Din. *Heir Apparent,* Saif al Islam Muhammad al Badr.

YEMEN LEGATION IN LONDON.

41 South Street, W.1.

[Grosvenor: 5246]

Minister, His Excellency Ahmed Mohamed Al-Shamy (1961).

Yemen, "the land on the right hand" (of Syria) and the *Arabia Felix* of the ancients, occupies the S.W. corner of Arabia between Asir and the Aden Protectorate, with an estimated area of 74,000 square miles and a population of 4,000,000. It extends inland to the borders of the Hadramaut. The highlands and central plateau of Yemen, and the highest portions of the maritime range form the most fertile part of Arabia, with an abundant and regular rainfall. The main exports are coffee, cotton, oil-grains, salt, hides, and raisins. Trade agreements have been concluded with a number of countries. Aden is an important centre for Yemeni exports and imports. No statistics of the total British trade with the Yemen are available. Direct imports from the U.K., which in 1960 totalled £29,369 and direct exports to the U.K., which in 1960 totalled £47,267, represent only a small percentage of the actual trade between the two countries. The chief port of the Yemen is Ψ Hodeida (Ahmedia) which now has deep water quays, able to accommodate ocean-going vessels.

The Imam is the head of one branch of the Zeidi sect of the Shiah Division of the Islamic religion. The ruins of Marib, the ancient Sabæan capital and its dam are in the Yemen.

On March 8, 1958, an agreement was signed in Cairo whereby the Yemen joined the United Arab Republic in a federation to be known as the United Arab States (see United Arab Republic).

FLAG.—Red, with horizontal Arabian sword in centre with 3 stars above and 2 below.

CAPITAL. Taiz (pop. about 14,000); Sana'a has about 60,000 inhabitants. Other cities of the Yemen are Ψ Hodeida, Ibb, Mocha and Beidha.

British Chargé d'Affaires. R. W. Bailey, C.M.G.

YUGOSLAVIA

(Federativna Narodna Republika Jugoslavije.)

President of the Republic, President of the Federal Executive Council and Chairman of the National Defence Council, Josip Broz Tito, assumed office, Jan. 13, 1953, re-elected for 4 years, Jan. 29, 1954 and April 19, 1958.

Vice-Presidents of the Federal Executive Council, Edvard Kardelj; Aleksandar Ranković; Mijalko Todorović; Rodoljub Čolaković.

Secretary of the Federal Executive Council, Veljko Žeković.

President of the Federal People's Assembly, Petar Stambolić.

Secretary of State for Foreign Affairs, Koča Popović.

National Defence, Ivan Gošnjak.

YUGOSLAV EMBASSY IN LONDON

25 Kensington Gore, S.W.7

[Kensington: 3400]

Ambassador in London, His Excellency Srdja Prica (1960).

Counsellors, Antun Duhaček; Milan Stojaković; Djuro Vukolić.

1st Secretaries, Nikola Zic; Stevan Mladenović.

2nd Secretary, Živojin Jazic.

3rd Secretaries, Nenad Radovanović; Petar Lombardić.

Military and Air Attaché, Col. Radovan Vojvodić.

Naval Attaché, Capt. Ljubiša Mihajlović.

Economic Counsellor, Svetozar Marković.

Asst. Air Attaché, Lt.-Col. Stevo Leke.

Assistant Military Attaché, Maj. Stojanče Stojičić.

Press Counsellor, Smiljan Pećjak.

Asst. Press Attaché, Ante Ilić.

Area and Population.—Yugoslavia is a Federation comprising the People's Republics of Serbia, Croatia, Slovenia, Montenegro, Bosnia and Herzegovina, and Macedonia. Serbia includes the autonomous province of the Vojvodina and the autonomous region of Kosovo and Metohija (Kosmet). In July, 1946, Pelagosa and adjacent islands with all territory east of the line known as the French Line in Istria (including Pola and Fiume) were ceded by Italy to Yugoslavia. By an agreement concluded in London on Oct. 5, 1954, between Yugoslavia, Italy, the United Kingdom and the United States, Zone B of the Trieste Territory was transferred to the civil administration of Yugoslavia, under whose military administration it had been since 1945. Zone B, an area of 200 square miles with a population of 73,500, included the towns of Kopar (Capodistria), Piran (Pirano) and Novi Grad (Cittanuova). The area

has now been divided between the Republics of Slovenia and Croatia. The area of Yugoslavia in 1953 was estimated at 255,804 square kilometres (98,725 square miles) and the population in January, 1961, at 18,512,805. As a result of the war there was a decrease of nearly 2,000,000 in the population of Yugoslavia, and this loss has only recently been made up.

Montenegro (Crna-Gora) was united to Serbia by a decision of the Montenegrin Parliament in November, 1918, when King Nicholas was deposed.

Government.—Stretching from Central Europe to the Balkans, different parts have been subjected to different historical, religious, cultural and geographical influences. Serbia came early under the Orthodox Church and then passed 500 fallow years of subjection to the Turkish Empire. In Bosnia, an outpost of the Turkish Empire, large numbers of the population were forcibly converted to Islam. Croatia and Slovenia, on the other hand, came under the Roman Catholic Church, and in later years were subjected to the civilizing influence of the Austro-Hungarian Empire. Such factors have, despite community of race, hampered the process of fusion into a united nation. In Jan. 1929, King Alexander abrogated the Constitution and instituted an absolute monarchy for two years, when it was superseded by a modified constitution. On King Alexander's assassination in 1934, his brother, Prince Paul governed as Regent, with two others, on behalf of the young King Peter. Faced with the threat of German invasion, the Government came to an accommodation with Hitler on March 25, 1941, but was overthrown two days later by a popular rising, which placed King Peter at the head of the state. The country was invaded by the German and Bulgarian armies on April 6, 1941, and the King and Government went into exile. The invaders parcelled up the country, placing Serbia under a puppet government, Dalmatia under Italian administration and Croatia under the so-called independent régime of Pavelić (Ustashi). Two main resistance movements developed, the Chetniks under Mihajlović, and the Partisans under Marshal Josip Broz, commonly known as Marshal Tito. The latter emerged from the turmoil of the war years as the most potent force in the country and the modified constitution was superseded by an agreement signed on November 1, 1944, by the Yugoslav Prime Minister (Dr. Ivan Subasić) and Marshal Tito as leader of the National Liberation Committee, recognizing a provisional parliament. On March 7, 1945, the agreement was confirmed by the Royal Yugoslav government in London, and a provisional government was set up in Belgrade.

On Nov. 29, 1945, the Constituent Assembly of Yugoslavia, at a joint session of the Skupština and the House of Nationalities, proclaimed Yugoslavia a Republic. In January, 1953, a new Constitution became effective, under which two houses (the Federal Council and Council of Producers) were established. Elections to these houses were held in November, 1953 and March, 1958.

Defence.—The Army, Navy and Air Force on a peace footing consist of 370,000 officers and men, the war strength being about 1,250,000.

Religion and Education.—The Orthodox, Roman Catholic, Protestant, Islamic and Judaic faiths are recognized by the State. According to the 1948 Census, 49.53 per cent. of the population is Orthodox, 36.7 per cent. Catholic, 1.14 per cent. Protestant and other Christian denominations 12.52 per cent. Moslem and 0.04 per cent. Jews. The Church is

separated from the State. All religious instruction in schools has been forbidden since January 1952. Priests are allowed to teach in churches. Eight years elementary education is compulsory and all education is free. In 1960 there were 14,417 elementary schools with 79,532 teachers and 2,500,000 pupils and 1,548 secondary schools with 33,897 teachers and 409,000 pupils. There are five universities: Belgrade, Zagreb, Ljubljana, Sarajevo and Skopje, with 59 faculties and 82,927 students and 11 art academies with 1,412 students.

Language and Literature.—The languages of the country are Serbo-Croat, Slovenian and Macedonian, all South Slav tongues. Serbo-Croat predominates and is the language of the Federal Government. In Serbia, Macedonia and Montenegro the Cyrillic script is used and in the rest of the country the Latin; Hungarian, Roumanian, Albanian and Italian are also used in certain districts. The desire for the political union of the South Slavs led to a cultural unity and a revival of Slav literature. There are 4 Serbian daily newspapers in Belgrade, 2 Slovene dailies in Ljubljana (Laibach), 2 Croat dailies in Zagreb, 2 dailies in Novi Sad, one in Hungarian, 2 dailies in Rijeka, one in Italian and daily papers at Skopje, Sarajevo, Prištine, Split, Maribor and Osijek.

Production and Industry.—About 50 per cent. of the population is engaged in agriculture, although in recent years industry has expanded rapidly and industrial production has more than doubled since 1947. Since 1955 substantial new investment has been diverted from basic industry to consumer goods. In agriculture the main emphasis is on increased investment in mechanization and fertilizers. The main crops are wheat and maize, of which the average yield in 1960 was 3,517,000 and 6,120,000 tons respectively. The forest areas produced some 8,988,000 cubic metres of timber in 1960. According to Yugoslav official estimates, the livestock population at the beginning of 1961 was approximately as follows: horses, 1,272,000; cattle, 5,295,000; sheep, 11,460,000; pigs, 6,208,000; poultry, 30,388,000. Minerals are a great source of wealth particularly in the central regions. Estimated production in 1960 included the following ('000 tons): Hard coal, 1,283; brown coal, 9,629; lignite, 11,801; copper, 17; lead, 89; iron ore, 2,200; pig iron, 972; steel, 1,442; aluminium, 25; zinc, 36; mercury, 0.485 and petroleum, 944.

FINANCE

Federal Budget (estimated figures).

	1960 Dinars
Revenue.....	493 200,000,000
Expenditure.....	401 700,000,000

The Yugoslav Dinar has a nominal value of 1/7 penny, the official exchange rate being 1,680D=£1 (see also p. 84).

PASSPORT REGULATIONS

Applications for Foreign Office passports must be made on the forms obtainable at any of the Passport Offices (addresses given below) or at any Local Office of the Ministry of Labour. Applications for passports required in less than four working days should not be taken to Ministry of Labour Offices.

London.—Clive House, Petty France, S.W.1. (Hours: Mon.—Fri., 9.30–4.30.)

Liverpool.—India Buildings, Water Street, Liverpool 2. (Hours: Mon.—Fri., 9.30–4.30.)

Glasgow.—14 Princes Square, 48 Buchanan Street, Glasgow, C.1. (Hours: Mon.—Fri., 9.30–4.30.)

The Passport Offices are also open for cases of special emergency only, between 4.30 p.m. and 6

Communications.—In 1960 there were approximately 11,900 miles of standard and narrow gauge railway. There are also 20,714 miles of telephone lines and 21,560 miles of telegraph lines. Yugoslavia has a long seaboard on the Adriatic coast. The principal Yugoslav ports are Rijeka, Šibenik, Split, Zadar, Dubrovnik and Kotor (Carraro) and new ports are under construction at Ploče and Bar. The Danube forms a great commercial highway and the tributary rivers Sava and Tisa provide other shipping routes.

Trade with U.K.

	1959	1960
Imports from U.K.	£11,156 381	£14,374,225
Exports to U.K.	13 683 825	15,742,112

The chief exports to the United Kingdom are cereals (mainly maize), meat and meat products, timber and furniture. The main imports from the United Kingdom are machinery of all kinds, chemicals, iron and steel, road vehicles, aircraft, and metal goods.

CAPITAL.—Belgrade, population (1960) 542,000. Other towns are: Zagreb (470,000), Ljubljana (155,000), Sarajevo (395,000), Skopje (167,000), Rijeka (87,000), Maribor (84,000), Novi Sad (97,000) and Split (84,000).

BRITISH EMBASSY

Prvog Maja 46, Belgrade

British Ambassador Extraordinary and Plenipotentiary.

His Excellency Sir Michael Justin Creswell, K.C.M.G. (1960).....£4,115

Counsellors, T. W. Garvey, C.M.G.; T. E. Rogers, C.M.G., M.B.E. (Commercial).

Naval Attaché, Capt. R. F. Whinney, D.S.C., R.N.

Military Attaché, Col. A. I. G. Ramsay.

Air Attaché, Group Capt. F. C. Ambrose, D.F.C., A.F.C.

1st Secretaries, D. D. Brown, M.M. (Head of Chancery); R. H. Ellingworth (Information); M. H. Morgan.

2nd Secretaries, E. W. Cook (Consular); H. A. Rogers (Commercial); A. E. Higgs (Visa).

3rd Secretaries, J. M. Candlish (Commercial); Miss J. A. Stowe; D. K. Sprague (Information); D. Harris (Consular).

Attachée, Miss M. B. Bird.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Belgrade, Zagreb, and Split.

BRITISH COUNCIL

Representative, J. B. S. Jardine, C.B.E., Prvog Maja 34, Belgrade. There is also a centre in Zagreb.

p.m. (Saturdays 9.30–4) or (Glasgow 9.30–1 p.m.) and in London on Sundays and Public Holiday; between 10 a.m. and noon.

To facilitate the issue of passports applicants are recommended to make personal application to any one of the above mentioned offices. If it is not possible to make personal application at one of the Passport Offices or Ministry of Labour Local Offices, completed forms of applications should be sent to one of the three Passport Offices, with photographs, supporting documents and the fee of £1 10s. Remittances sent with postal applications should be in the form of a Cheque or Postal Order which should be crossed and made payable to the Passport Office. Notes or postage stamps should not be sent in payment.

Foreign Office Passports are granted:—

- (i) To citizens of the United Kingdom and Colonies.
- (ii) To British subjects without citizenship.
- (iii) To British Protected Persons.

Passports are available for *five years* in the first instance, unless otherwise stated. They may be renewed for a further period of 5 years for a fee of £1. Where, however, a passport has already been renewed for a shorter period, it may be extended for the remainder of the 5 year period on payment of a fee of 4s. 6d. for each year of renewal. They are not available *beyond ten years from the original date of issue*. Thereafter, or if at any time the Passport contains no further space for visas, a new Passport must be obtained.

A Passport including particulars of the *holder's* wife is not available for the wife's use when she is travelling alone. A wife's particulars may only be added at the time of issue of a passport.

Children who have reached the age of sixteen years require separate Passports. When they apply for a Passport the written consent of father or other legal guardian is necessary.

The application must be countersigned in Section 9 by a Member of Parliament, Justice of the Peace, Minister of Religion, Medical or Legal Practitioner, Bank Officer, established Civil Servant, Public Official, Police Officer or any person of similar standing personally acquainted with the applicant. The applicant's birth certificate and other evidence in support of the statements made in the application must be produced.

In the case of children under the age of 16 requiring a separate passport, an application should be made by the child's father or other legal guardian on form (B) obtainable from a Passport Office or any local office of the Ministry of Labour.

If the applicant for a Passport be a British subject by naturalization or registration, the Certificate of Naturalization or registration must be produced with the application.

British Passports are generally available for travel to all countries. The possession of a Passport does not, however, exempt the holder from compliance with any *Immigration Regulations* in force in British or foreign countries, or from the necessity of obtaining a *visa* where required.

A Passport cannot be issued or renewed by the Foreign Office on behalf of a person already abroad; such person should apply, in a foreign country, to the nearest British Mission or Consulate, or, within the British Commonwealth outside the United Kingdom of Great Britain and N. Ireland, to the nearest local Passport issuing authority.

Persons resident in Northern Ireland should apply in person to the Foreign Office Passport Agency, 1 May Street, Belfast, or by post to the Branch Passport Office, Liverpool; citizens of the United Kingdom and Colonies resident in the Irish Republic should make application to the Visa Section, British Embassy, 30 Merrion Square, Dublin.

RENEWAL OF PASSPORTS

Applications for the renewal of Foreign Office passports must be made on Form D, obtainable at

any of the Passport offices (see above) or at any local office of the Ministry of Labour.

PHOTOGRAPHS

Duplicate unmounted photographs of applicant (and his wife, if to be included in the Passport) must be sent. These photographs should be printed on *thin* paper and must not be glazed on the reverse side. They should measure not more than $2\frac{1}{2}$ in. by 2 in. or less than 2 in. by $1\frac{1}{2}$ in., and should be taken full face without a hat.

British Visitors' Passports

A simplified form of travel document is available for British subjects* (Citizens of the United Kingdom and Colonies) wishing to pay short visits (not exceeding three months) to certain foreign countries, *viz.*

AUSTRIA	LUXEMBURG
BELGIUM	MONACO
DENMARK†	NETHERLANDS
FINLAND†	NORWAY†
FRANCE	PORTUGAL (incl.
(incl. CORSICA)	MADEIRA &
GREECE	AZORES)
W. GERMANY	SAN MARINO
(incl. West Berlin	SPAIN (incl. BALEARIC &
by air only)	CANARY ISLANDS
ICELAND	SWEDEN†
ITALY	SWITZERLAND
LIECHTENSTEIN	

Holders may also pay short visits to Gibraltar and Malta.

A fee of 7s. 6d. is charged for the issue of a British Visitors' Passport, which is valid for 12 months, cannot be amended and is not renewable; on expiry application should be made for a new passport if required. Particulars of an applicant's wife and/or children under 16 years can be included at the time of issue only at no extra cost. A child of 8 years of age and over is eligible to hold a British Visitors' Passport. Applications for, or including, a person under 21 years of age (unless married or serving in H.M. Forces) must be countersigned by the legal guardian.

British Visitors' Passports are obtainable by application on Form VP (from any local office of the Ministry of Labour and from the Passport Office or Branches). Applicants in England, Scotland and Wales should take the completed form in person to any local office of the Ministry of Labour which will normally issue the passport without further delay; applicants in Northern Ireland to any office of the Ministry of Labour and National Insurance. *British Visitors' Passports are not obtainable from the Passport Office or Branches.* Two recent passport photographs will be required, of the applicant and of his wife if to be included; photographs of children are not required. Size of photographs must be 2 in. x $1\frac{1}{2}$ in. (see also PHOTOGRAPHS above). Particulars of any foreign exchange already obtained during the year (from November 1) must be declared on the application form. No visas are required on British Visitors' Passports.

*See Legal Notes. †Length of stay restricted to three months in any nine months in Nordic Group Countries (including Finland) as a whole.

ECONOMIC CO-OPERATION IN EUROPE

Long-term plans for the expansion of world trade were agreed during the later years of the Second World War. The Bretton Woods Agreement of 1944 led to the establishment of the International Bank (IBRD) and the International Monetary Fund (IMF) in 1945 and to the signing by 37 nations in 1947 of the General Agreement on Tariffs and Trade (see p. 821). The promise of substantial assistance by the United States (Marshall Aid) to European countries was followed by the establishment of a European Recovery Programme (ERP). Fourteen nations (all outside the Soviet bloc) accepted a general invitation by the United Kingdom and France to all European countries to discuss joint economic action at Paris in July, 1947, and the 16 countries signed on April 16, 1948, a convention setting up an Organization for European Economic Co-operation (OEEC), with the objects of promoting production, removing restrictions on trade and payments and of striving for financial stability and full employment.

OEEC and OECD

The immediate task of OEEC was to administer the European Recovery Programme and to allocate American aid which totalled \$13,100,000,000. Marshall Aid provided the dollars necessary for certain vital imports, while the counterpart funds accruing to member countries from the re-sale of these imports were used for promotion of long-term investment and productivity. By 1956, OEEC countries had considerably surpassed the pre-war level in most of the main sectors of production and trade. Aid to the United Kingdom was suspended in 1950 and to other participants in 1951. The work of the Organization included the co-ordination of general economic and financial policies, technical assistance to industry and agriculture, the promotion of research and of scientific and technical training and information, the assessment of long-term energy requirements, peaceful development of nuclear energy, allocation of raw materials in times of shortage, special assistance to the development of less advanced areas in Greece, Italy and Turkey and arrangements for the liberalization of trade and payments. Spain entered OEEC in July, 1959.

Under control of the Council (now the Council of OECD) two executive agencies were set up. The *European Productivity Agency* (1953) is controlled by a governing body of representatives of member and associated states and works through centres in member countries. It has paid particular attention to management training, trade union problems, wholesale and retail marketing, applied research, private restrictive practices, farming methods and technical assistance to the less developed areas of Europe. The *European Nuclear Energy Agency* (ENEA) was set up on Feb. 1, 1957, to further the development of production and uses of nuclear energy by co-operation between member states. It has set up three joint undertakings—The European Company for Chemical Processing of Irradiated Fuels (*Eurochemic*), the Halden Boiling Heavy Water Reactor in Norway and the Dragon project in the United Kingdom. The latter is the building of a high-temperature, gas-cooled reactor at the Atomic Research Establishment at Winfrith, Dorset, and research on reactors of this kind. Work has also been done on health and safety norms and on nuclear insurance.

EUROPEAN MONETARY AGREEMENT (EMA).—A European Payments Union (EPU) was organized in 1950 to make possible multilateral settlements between member countries of OEEC in spite of restrictions on currency convertibility. The arrangements of EPU were unsuitable for operation where currencies were convertible and in 1955 arrangements were made by OEEC for EPU to be succeeded automatically by a new European Monetary Agreement (EMA) if countries with more than half of the EPU quotas (credits allowed under the system of settlement) gave notice that they would make their currencies convertible. This stage was reached in December, 1958, when

non-resident sterling was made freely transferable and restrictions on the convertibility of the Belgian, French, German, Italian and Dutch currencies were removed.

EMA consists of a multilateral system of settlements and a European Fund. It provides facilities for monthly settlements in dollars, but only of such balances as have not been normally settled through the foreign exchange markets. The European Fund is financed by gold contributions from members and resources transferred from EPU. It facilitates the system of settlements and provides short-term credits (up to 2 years) to member states in balance of payments difficulties.

Board of Management

Chairman, Dr. H. K. von Mangoldt-Reiboldt. Members, M. P. Calvert (France); L. Petch (U.K.); M. C. de Strycker (Belgium); G. Carli (Italy); K. Getz Wold (Norway); M. A. Hay (Switzerland).

CODE OF TRADE LIBERALIZATION.—Decisions and resolutions of the Council of OEEC have set standards for the removal of quantitative restrictions on trade between member countries. Since 1955, most member countries have accepted the obligation to the other member countries of keeping at least 90 per cent. of their trade free from restrictions. In the categories of agriculture, raw materials, and manufactures the proportion freed is 75 per cent. The Code is administered by a Steering Body for Trade of 7 members appointed by OEEC in 1956.

OECD.—Conferences held in 1959 and 1960, between representatives of the OEEC countries, the Governments of the United States and Canada, and the Commission of the European Common Market (EEC), recommended the establishment of an improved organization for economic co-operation in which Canada and the United States would participate as full members. Accordingly a Convention was signed on December 14, 1960, providing for the reconstitution of OEEC as the *Organization for Economic Co-operation and Development*. Signatories of the Convention are:—

Austria	Italy
Belgium	Luxembourg
Canada	Netherlands
Denmark	Norway
France	Portugal
Germany	Spain
(Federal Republic)	Sweden
Greece	Switzerland
Iceland	Turkey
Irish Republic	United Kingdom
	United States

Following ratification by the Governments concerned, the Convention came into force on Sept. 30, 1961, at which date OEEC was superseded by the new Organization.

The objects of OECD are (1) to achieve the highest sustainable economic growth and employment and a rising standard of living in member

countries and thus to contribute to the development of world economy; (2) to contribute to sound economic expansion in member, as well as non-member, countries in the process of economic development; and (3) to contribute to the expansion of world trade on a multilateral, non-discriminatory basis in accordance with international obligations.

The Convention provides for a Council composed of all the members as the executive body of the Organization, to meet in sessions of Ministers or permanent representatives, with a chairman designated annually, and any necessary committees and subsidiary bodies. Paris was designated as the headquarters of the Organization and Prof. Thurkill Kristensen (Denmark) was appointed to succeed M. René Sergent as Secretary-General of OEEC on Sept. 1, 1961, and to be chairman of a preparatory committee for OECD.

EUROPEAN COAL AND STEEL COMMUNITY (ECSC)

High Authority, Place de Metz 2, Luxembourg.
Council of Ministers, Rue Auguste Lumière 3-5, Luxembourg.

Common markets in coal and iron ore were formally opened in February, 1953, and in steel in April, 1953, by Belgium, France, Germany (Federal Republic), Italy, Luxembourg and the Netherlands. Originally proposed by M. Robert Schumann, the French Foreign Minister, in 1950, the Community functions under the terms of a treaty between the six powers, effective on July 5, 1952. Four principal organs were set up. The *High Authority* is a supra-national executive body of nine members drawn from the member countries, who may not report to individual governments nor receive instructions from them. Duties of the High Authority under the Treaty are to ensure free competition; to supervise investments and to make and guarantee loans; to obtain funds by levies on production, by borrowing and through grants; to regulate production and distribution and to fix wages and prices in certain prescribed cases. A Consultative Committee expresses the views of producer, dealer and consumer groups.

For a 5-year transitional period certain tariffs, subsidies and price controls were allowed to continue. By February 10, 1958, when the period ended, barriers to trade in coal and steel had been abolished, subsidies eliminated and rules of non-discrimination applied; harmonized external tariffs on steel products of 2-13 per cent. *ad valorem* had been introduced for the member countries. By 1955 the tonnage of iron and steel traded within the Community had risen by 169 per cent. over the tonnage traded in 1952; the tonnage of coal traded in 1955 was 42 per cent. more than in 1952.

The *Council of Ministers* of ECSC, consisting of one government representative from each member country, co-ordinates the economic policies of the Community with those of its member states. The Common Assembly set up by the 1952 Treaty, drawn from the parliaments of member countries, was re-named *The European Parliamentary Assembly* by the 1957 Treaty of Rome and provides a forum for discussion and general control in respect not only of ECSC but also of the European Economic Community (EEC) and *Euratom* (see below). Functions of the original Council of Justice of ECSC were similarly extended in 1957.

EUROPEAN ECONOMIC COMMUNITY (EEC) (THE COMMON MARKET)

Discussions were held at Messina, Sicily, in 1955 between the Foreign Ministers of the six member

states of ECSC (see above) on proposals for further advances towards economic integration in Europe, and after intensive study of these proposals, a treaty was signed at Rome on March 25, 1957, setting up the European Economic Community.

The Treaty aimed to lay the foundations of an enduring and closer union between the European peoples by gradually removing the economic effects of their political frontiers. It provides a transitional period of 12-15 years during which customs duties between member states are being progressively reduced, trade restrictions and discrimination removed, economic and social policies harmonized, and a common agricultural policy established. In view of the different social structure of agriculture in the various countries of the Community, a special régime applies, but policy includes increased productivity, safeguards for an adequate standard of living in the agricultural population, stabilization of markets and fair prices for consumers. Members are permitted to fix minimum prices for imported commodities during the transitional period.

A first 10 per cent. reduction in custom duties within the Common Market took place on Jan. 1, 1959, and import quotas of individual member states were converted to global quotas and increased. Tariffs were again reduced by 10 per cent. on Jan. 1, 1960. The Council of the Community resolved on May 12, 1960, to speed up the process of liberalization and to aim for complete elimination of internal tariffs by 1966. An additional reduction in customs duties was accordingly made on Jan. 1, 1961. Speed-up measures in the programme for agriculture were also introduced in 1961 and it was expected that tariffs in general would reach 50 per cent. of their former level by the end of that year. The Council reported an increase in industrial production of 12 per cent. in 1960, compared with 1959. Internal trade increased by 25 per cent. in 1960 and showed an overall increase of 50 per cent. in 1958-1960. Community imports from non-member countries in 1960 showed an increase of 20 per cent. over the previous year.

External Tariffs.—The Treaty visualizes the achievement of a common external tariff at the end of the transitional period, when in general an average of the national tariffs of members will be applied. The Common External Tariff may not exceed 3 per cent. for most raw materials; 10 per cent. for most semi-manufactured goods; and 15 per cent. for certain chemicals. For some products the tariffs are fixed by negotiation and not by calculation. Provision was made for introduction of the common tariff by three 4-year stages. No change may be made in it except by unanimous decision of the Council, but by majority vote a temporary modification not exceeding 20 per cent. may be made.

State Subsidies.—Subsidies which distort competition are prohibited by the Treaty. There are certain exceptions such as special aid for under-developed areas, subsidies given to certain areas of Germany in compensation for economic disadvantages caused by the division of Germany, and subsidies of a social character, such as relief after natural catastrophes. The Council of the Community, with the European Commission, has the duty of determining what other kinds of subsidy are compatible with the Treaty and of securing the amendment or abolition of subsidies which are incompatible.

Labour.—Free circulation of labour, services and capital throughout the Community is envisaged,

as well as the right to settle, work and trade anywhere in the Community by the end of the transition period. In furtherance of the policy of the Community to promote the co-ordination of the social policies of member countries, the *European Social Fund* has been set up to facilitate employment and mobility of labour within the Community. The Treaty provides for the refund to any member country of 50 per cent. of the cost to that country or its public bodies for (1) retraining for other employment workers who have become unemployed as a result of the operation of the Common Market; (2) moving to another locality workers compelled to change their place of residence through operation of the Common Market; (3) maintaining the standard of living of workers placed on short time through changes in production by the undertaking employing them. A Committee for the Social Fund had been appointed and was at work in 1961.

The *European Investment Bank* was set up to promote a common investment policy within the Community. Its function is to grant, on a non-profit basis, loans or guarantees (1) for projects in under-developed areas; (2) for modernization, reorganization or extension of industries difficult to finance on a purely national basis; and (3) to new industries of joint interest to several member countries.

Transport.—The Treaty aims to establish a joint policy on transport, with common rules for international transport within the Common Market, covering road, rail and inland water transport. Rates for freight which discriminate as to the national origin or destination of goods transported are to be eliminated within the transitional period.

Restrictive Practices.—The common rules of the Community forbid any agreement or association which restrains or distorts competition within the Common Market. They embrace agreements, etc., fixing prices, regulating or controlling production, investment or technical development, and sharing markets. Exceptions are permissible in certain cases, e.g. where an adequate share of the benefits arising is passed on to the consumer or where agreements will not open the way to monopolistic practices. Control of restrictive practices is in the first instance by individual states on receiving detailed reports from the European Commission.

Association of Overseas Territories.—The overseas territories of Belgium, France, Italy and the Netherlands are associated with the Community. Their products enter the Common Market on equal terms with those of member states and each territory applies to all the other member countries any concessions made to the country with which it is specially connected. Customs duties between associated territories and member countries are being gradually removed and quantitative import restrictions progressively abolished, but territories are permitted to keep customs duties required for the development of their industries and financing of their public expenditure, under certain conditions. Contributions by member states of EEC to an *Overseas Development Fund*, payable over a five-year period, were agreed as follows: France and the German Federal Republic, each \$200,000,000; Belgium and the Netherlands, each \$70,000,000; Italy, \$40,000,000 and Luxembourg \$1,250,000. Initial allocations were: to dependencies of France, \$511,250,000; Netherlands, \$35,000,000; Belgium, \$30,000,000 and Italy, \$5,000,000. Applications may be made by members and their associated territories for

financing of projects out of the Fund on a programme subject to approval by the Council of EEC by a weighted majority vote. Enterprises in any part of the Community may participate in projects to be financed by the Development Fund.

Budget of EEC.—Contributions to the Budget of EEC were fixed in the following proportions: France, Italy and German Federal Republic, each 28 per cent.; Belgium and Netherlands, each 7.9 per cent.; Luxembourg, 0.2 per cent.

In the autumn of 1962, after consultation with members of the British Commonwealth, the United Kingdom Government made formal application for membership of the Common Market. This was welcomed by members of the Community and negotiations were in progress at the time of going to press.

The Council of Ministers

The Council of Ministers, to co-ordinate the economic policies of the Community with those of its member states, consists of one representative each from Governments of member states. The Council takes decisions either unanimously, by simple majority or by weighted majority on lines laid down in the Treaty. Votes in cases where a qualified majority is required are held as follows: France, Germany, Italy, each 4 votes; Belgium and Netherlands, each 2 votes; and Luxembourg, 1 vote. A majority normally consists of 12 votes, but in some cases requires the consent of at least four of the member states. The Council meets monthly, the Chairman holding office for a term of three months.

The European Commission

23 Avenue de la Joyeuse Entrée,
Brussels 4.

The European Commission supervises the application of the Treaty and measures adopted under it, makes proposals to the Council of EEC, formulates opinions and makes recommendations on matters within the scope of the Treaty, takes decisions for which authority has been conferred on it and publishes annual reports, the fourth of which appeared in 1961. Members of the Commission are completely independent and neither solicit nor accept instructions from individual governments. Decisions are taken by a simple majority vote.

President, Prof. Walter Hallstein.

Vice-Presidents, Dr. Sicco L. Mansholt (Netherlands);

Robert Marjolin (France); Giuseppe Caron (Italy).

Members, Lionello Levi Sandri (Italy); Robert Lemaigen (France); Dr. Hans Von Der Groeben (German Federal Republic); Jean Rey (Belgium); Lambert Schaus (Luxembourg).

1. External Relations Group

Chairman, Jean Rey. *Members*, R. Marjolin; G. Caron.

Director-General, Gunter Seeliger.

Assistant Director-General, Götz Schoffer.

Directors, T. Hützen; J. Deniau; R. Faniel; W. Ernst; R. Luzzatto.

2. Economic and Financial Affairs Group

Chairman, Robert Marjolin; *Deputy Chairman*, Dr. H. Von Der Groeben. *Members*, Dr. S. L. Mansholt; L. L. Sandri.

Director-General, Franco Bobba.

Assistant Director-General, Gorrado Malavasi.

Directors, H. Steffe; L. Gleske; P. Millet.

3. Internal Market Group

Chairman, Giuseppe Caron. *Members*, J. Rey; L. Schaus.

Director-General (vacant).

Assistant Director-General, Michel H. De Courcy.

Directors, V. Minunni; A. Dubois; W. Scholz; C. Hemmer.

4. Competition Group

Chairman, Dr. Hans Von Der Groeben. *Members*, R. Marjolin; J. Rey.

Director-General, Pieter Verloren Van Themaat.

Assistant Director-General, Charles Van Aken.

Directors, H. Schumacher; J. Dieu; P. Nasini; A. Sacie.

Chairman, Lionello Levi Sandri; *Members*, Dr. S. L. Mansholt; R. Lemaignen.

Director-General, Gust De Muynck.

Assistant Director-General, Yves Lecocq.

Directors, W. Doerr; L. Lambert; J. Van Dieren-donck; J. Rijbs.

6. Agriculture Group

Chairman, Dr. Sicco L. Mansholt. *Members*, R. Lemaignen; H. Von Der Groeben; L. Schaus.

Director-General, Louis Georges Rabot.

Assistant Director-General, Helmut Von Verschuer.

Adviser, Mario Bandini.

Directors, M. Meyer-Burckhardt; B. Heringa; R. Grooten.

7. Transport Group

Chairman, Lambert Schaus; *Members*, G. Caron; R. Lemaignen.

Director-General, Giuseppe Renzetti.

Assistant Director-General, Jacques Dusset.

Directors, G. Krauss; J. N. Mayer; A. Reinarz.

8. Overseas Development Group

Chairman, R. Lemaignen; *Members*, H. Von Der Groeben; L. L. Sandri.

Director-General, Heinrich Hendus.

Assistant Director-General, Hans Von Stein.

Directors, Jacob Van Der Lee; Jacques Vignes; Jacques Lefebvre; Enrico Gambelli.

9. Administration Group

Chairman, The President; *Members*, The Vice Presidents.

Director-General, Bernard Smulders.

Assistant Director-General, Daniel Strasser.

Directors, B. Van Goeler (Establishments); J. Van Gronsvelt (Finance); A. Merpillat (Domestic Affairs).

10. Secretariat

Executive Secretary, Emile Noel.

Deputy Executive Secretary, Axel Herbst.

EUROPEAN ATOMIC ENERGY COMMUNITY (Euratom)

Council of Ministers, Rue Ravenstein 2, Brussels 1.

A second treaty, arising from the Messina discussions between the ECSC powers on additional means of co-operation, was signed in Rome on March 25, 1957, setting up the European Atomic Energy Community. The task of *Euratom*, defined in detail in the Treaty, is to create within a short period the technical and industrial conditions necessary to utilize nuclear discoveries and especially to produce nuclear energy on a large scale. A five-member commission was instituted by the Treaty, to promote and co-ordinate nuclear research in member countries and to disseminate to them all the information acquired. Other sections of the Treaty cover the establishment and growth of nuclear industries, the procurement, ownership and control of nuclear materials, matters affecting health and safety, including training, and external relations.

Chairman of the Council, Roger Motz (Belgium).

Atomic Energy Commission

Rue Belliard 51, Brussels 4.

President, Etienne Hirsch (France).

Vice-President, E. Medi (Italy).

Members, M. de Groote (Belgium); Herr Krekeler (German Federal Republic); Hr. Sassen (Netherlands).

ECONOMIC AND SOCIAL COUNCIL

An advisory body, common to EEC and *Euratom*, the Council consists of representatives of all sections of economic and social life, including employers' associations, trade unions and similar organizations. The Council consists of 24 members each from France, Italy and the German Federal Republic; 12 each from Belgium and the Netherlands and 5 from Luxembourg.

EUROPEAN PARLIAMENTARY ASSEMBLY

Secretariat: 19 Rue Beaumont, Luxembourg.

The European Parliamentary Assembly consist of 142 members elected by the national parliaments of the member countries—36 members each from France, Germany and Italy, 14 each from Belgium and the Netherlands and 6 from Luxembourg—meeting annually in October. Set up under the terms of the ECSC Treaty of 1952, its authority was extended by the Treaty of Rome 1957 to cover also the European Economic and Atomic Communities. The Assembly serves as a forum for general discussion and control.

President, Prof. Hans Furler (German Federal Republic) (1960).

EUROPEAN COURT OF JUSTICE

Villa Vauban, Avenue de l'Arsenal, Luxembourg.

The European Court superseded the Court of Justice of ECSC and is common to the three European Communities. It exists to safeguard the law in the interpretation and application of the Community treaties, to decide on the legality of decisions of Councils of Ministers or Commissions and to determine violations of the Treaties. The seven judges of the court hold office for 6 years and are eligible for re-appointment. The Court was inaugurated on October 7, 1958.

President, Prof. A. M. Donner (Netherlands).

Judges, N. Catalano (Italy); M. L. Delvaux (Belgium); M. Ch. L. Hammes (Luxembourg); O. Riese (German Federal Republic); R. Rossi (Italy); M. J. Rueff (France).

Attorneys-General, L. Lagrange (France); M. Roemer (German Federal Republic).

JOINT EXECUTIVE SERVICES of the European Communities

JOINT INFORMATION SERVICE.—*Director*, Jacques-René Rabier. *Assistant Director*, Mario Melani. There are offices of the Joint Information Service in Paris, Bonn, Rome, London and Washington.

JOINT LEGAL SERVICE.—*Directors-General*, Michel Gaudet (EEC matters); Robert Krawielicki (ECSC matters); Theodor Vogelhaar (*Euratom* matters). *Assistant Director-General* (EEC matters), Marc Sohler.

EUROPEAN STATISTICAL OFFICE.—*Director-General*, Rolf Wagenführ. *Assistant Director-General*, Helmut Reum.

EUROPEAN FREE TRADE ASSOCIATION (EFTA)

Early in 1956 moves were made in OEEC by the low tariff countries in Europe—Belgium, Denmark, Luxembourg, the Netherlands, Sweden and Switzerland—towards organization of a wide free trade area in Europe. Proposals were studied on a multi-lateral basis in 1957 and 1958 but were not acceptable to all parties. On May 27, 1959, Sweden invited Austria, Denmark, Norway, Portugal,

Switzerland and the United Kingdom ("The Seven") to join with her in exploring the possibility of forming a free trade area. Discussions began in Stockholm in June, 1959, and a Convention for a European Free Trade Association, agreed by Ministers of the "Seven" on Nov. 20, 1959, became effective on May 3, 1960.

The Convention defines the objects of the Association as (1) to promote economic expansion in the area of the Association and in each member state; (2) to ensure that trade between member states takes place in conditions of fair competition; (3) to prevent significant disparity between member states in the conditions of supply of raw materials produced within the area; and (4) to contribute to the harmonious development and expansion of world trade and to the progressive removal of barriers to it.

Members agreed to abolish their tariffs on imports of goods originating in the area within ten years, by means of a series of reductions. An initial 20 per cent. reduction of tariffs was made on July 1, 1960, and the programme includes further

reductions of 20 per cent. *ad valorem* (of original tariffs) on Jan. 1, 1962 and 1963; and at the beginning of each year 1965-1970. Provision is made for alterations to this programme. Members undertook to abolish quantitative restrictions on imports of goods from the free trade area within 10 years, existing quotas being reduced by 20 per cent. each year. There is no common external tariff for the Association, each member country being free to fix the level of its tariffs against countries outside the area. Various rules govern trading within the area of goods manufactured wholly or in part from materials originating outside the area and fair conditions of competition—such matters as government subsidies, restrictive practices, dumping, etc. Special arrangements are in force in relation to agricultural produce and fish.

The Council of EFTA consists of one ministerial or official representative from each member country. Each state has a single vote and recommendations must normally be unanimous. Decisions of the Council are binding on member countries.

DISTANCES FROM LONDON BY AIR

A list of the distances in statute miles from London to various places abroad. Distances given are those of the shortest routes in use by the British Airways Corporations—B.O.A.C. services (O); B.E.A. services (E).

THE DERBY, 1951-1961

For particulars of the Derby from 1780-1950 see 1921-51 editions.

The Distance of the Derby course at Epsom is 1½ mile. Lord Egremont won Derby in 1782, 1804, 5, 7, 26 (also, 5 Oaks); Duke of Grafton, 1802, 9, 10, 15 (also, 9 Oaks); Mr. Bowes, 1835, 43, 52, 31; Sir J. Hawley, Teddington (1851), Beadsman (1858), Musjid (1859), and Blue Gown (1868), the 1st Duke of Westminster, Bend Or (1880), Shotover (1882), Ormonde (1885), and Flying Fox (1899). Lady James Douglas was the first lady to win the Derby—War Substitute at Newmarket (1918); at Epsom, Mrs. G. B. Miller (1937). First winner was Sir Charles Bunbury's Diomed in 1780. From 1940 to 1945 a substitute Derby was run at Newmarket. By winning his 5th Derby, the late Aga Khan equalled Lord Egremont's record. He also won 2 Oaks.

County Championships

The first County Championship was in 1873 when Gloucestershire and Nottinghamshire finished equal on points. Yorkshire have won 24 times; Surrey 16; Notts 8; Lancs 8; Middlesex 5; Kent 4; Gloucester 2; Derby 2; Warwick 2; Glamorgan 1; Hampshire 1; Notts and Lancs tied in 1879 and 1882, and Notts, Lancs and Surrey were all equal in 1889. Middlesex and Yorkshire tied in 1949 and Lancashire and Surrey tied in 1950.

Minor Counties Championship, 1961

County	P.	W.	L.	First Innings		No. res.	Pts.	Avg.
				W.	L.			
Somerset II	8	6	0	1	1	0	64	8.00

Throwing

In November, 1960, the M.C.C. stated that they and the English counties had agreed with the Australian Board of Control that English umpires would be instructed not to no-ball Australian bowlers for throwing prior to June 7, 1961, but that they should make confidential report in any case in which they were not entirely satisfied. It was later agreed that the same truce period should apply to English bowlers playing against the Australians and it was understood that one English bowler was reported.

MISCELLANEOUS CRICKET RECORDS

Highest individual scores.—In first-class cricket in England: A. C. MacLaren, 424, for Lancashire *v.* Somerset at Taunton, July, 1895. In Australia: D. G. Bradman (Australia), 452 (not out) for N.S.W. *v.* Queensland, Sydney, 1929-30. In India: B. B. Nimbalkar (Maharashtra *v.* W. Indian States), Poona, 1948-49, 443 (not out). In Pakistan: Hanif Mohammed, 499, Karachi *v.* Bahawalpur, 1959. In a minor inter-county match: F. E. Lacey (Hampshire *v.* Norfolk), Southampton, 1887, 323 (not out). In other minor matches: A. E. J. Collins, aged 14, scored 628 (not out) in a Junior House match playing for Clarke's House *v.* North Town at Clifton College. This score extended over five afternoons, 1890.

Highest team innings.—Australia, Victoria 1,107 *v.* N.S.W., Melbourne, 1926; England, England 903 (for 7 dec.) *v.* Australia, 1938.

Win.—Victoria beat New South Wales by innings and 656 runs, Dec. 29, 1926.

Runs in a day.—Australia *v.* Essex, Southend, May 15, 1948, 721.

Smallest totals.—Oxford University (one man absent), 12 *v.* M.C.C. at Oxford, May, 1877; Northants, 12 *v.* Gloucester, June 11, 1907.

Highest Aggregate.—Fifth Test, Durban, March, 1939. S. Africa 530 and 481; England 316 and 654 for 5 wickets. 1,081 (35 wkts.). India, Bombay, 651 and 714 for 6 dec. *v.* Maharashtra, 407, 604. Total 2,376 (38 wkts.).

Highest Partnerships.—Gu. Mahomed (319) and V. S. Hazare (288 not out) made 577 for 4th wicket for Baroda *v.* Holkar (Mar. 7, 1947). Previous: C. L. Walcott and F. M. Worrell, 574 for Barbados *v.* Trinidad, 1946. P. Holmes and H. Sutcliffe 555 for Yorks. *v.* Essex, Leyton, 1932, 1st wicket highest.

Most centuries in one season.—D. C. S. Compton, 18 (1947); J. B. Hobbs, 16 (1925); W. R. Hammond, 15 (1938); H. Sutcliffe, 14 (1932); D. G. Bradman

(1938), C. B. Fry (1901), W. R. Hammond (1933, 7), T. Havard (1906), E. P. Hendren (1923, 7, 8), C. P. Mead (1928), and H. Sutcliffe (1928, 31), 13 centuries. Six consecutive—C. B. Fry, 1901; D. G. Bradman (Australia), 1938-9; five consecutive Test centuries, E. Weekes, 1949. Total centuries in career—J. B. Hobbs, 197 (175 in Eng.).

Most runs made in a year.—D. C. S. Compton (Middlesex), 3,816 (1947); W. J. Edrich (Middlesex), 3,539 (1947); T. Hayward (Surrey), 3,518 (1906). L. Hutton (Yorks), 3,429 (1949); F. E. Woolley (Kent), 3,352 (1928).

Most wickets in season.—A. P. Freeman (Kent), 304, 1928, and 298, 1933; T. Richardson (Surrey), 290, 1895.

Aggregates.—J. B. Hobbs, 61,221; W. G. Grace, 54,896, 2,876 wkts. W. R. Rhodes, 4,188 wkts. Also F. E. Woolley, 58,969; E. P. Hendren, 57,610; W. R. Hammond, 50,408; A. P. Freeman, 3,775 wkts.

Record Benefits.—C. Washbrook (Lancs.), £14,000 (1948); D. C. S. Compton (Middlesex), £12,200 (1949); A. V. Bedser (Surrey), £12,866 (1953). Sir D. G. Bradman received £10,000 for his Testimonial match in Australia, 1948-49.

1,000 runs in May—W. G. Grace, 1895, W. R. Hammond, 1927, C. Hallows, 1928, D. G. Bradman, 1930, 1938, W. J. Edrich, 1938; incl. April, T. Hayward, 1900. In June, L. Hutton, 1,294, 1949. In July.—A. E. Fagg, 1,018, 1938; August.—W. R. Hammond, 1,281, 1936; L. Hutton, 1,050, 1949.

Fastest scoring.—P. G. H. Fender for Surrey *v.* Northamptonshire in 1920, 100 runs in 35 mins.

Most Sixes in Innings.—17, W. J. Stewart, Warwickshire *v.* Lancashire, 1959.

Double.—J. H. Parks (Sussex), 3,003 runs and 101 wkts., 1937. In match: A. E. Fagg (Kent) *v.* Essex, 1938, Colchester, 244 and 202 (not out).

Highest batting average in England 115.66, D. G. Bradman (S. Aust.), 1938.

Most Catches in Match—W. R. Hammond 10, Gloucestershire *v.* Sussex at Cheltenham, 1928.

UNIVERSITIES AND SCHOOLS, ETC.

Oxford and Cambridge

First played 1827. Played 116. Cambridge have won 50, Oxford 43, drawn 24.

1956 Drawn. (Cambridge 303 for 7 (dec.) and 134 for 5 (dec.); Oxford 247 for 9 (dec.) and 58 for 5).

1957 Cambridge (innings and 186 runs). Oxford 92 and 146; Cambridge 424 for 7 (dec.).

1958 Cambridge (99 runs). Cambridge 161 for 7 (dec.) and 269 for 8 (dec.); Oxford 180 and 151.

1959 Oxford (85 runs). Oxford 217 and 238; Cambridge 174 and 196.

1960 Drawn. Cambridge 153 and 243 for 9; Oxford 310.

1961 Drawn. Cambridge 173 and 254 for 6; Oxford 232 for 8 (dec.).

Eton and Harrow

First played 1805. Played 125. Eton have won 46, Harrow 39. Drawn 40.

1954 Harrow (9 wkts.). (Eton 168 and 119; Harrow 221 and 69 for 1).

1955 Eton (38 runs). (Eton 161 and 166; Harrow 105 and 184).

1956 Drawn. (Eton 157 for 8 (dec.); Harrow 94 for 1 (match abandoned)).

1957 Drawn. (Harrow 183 for 9 (dec.); Eton 204 for 6).

1958 Drawn. (Eton 170 and 110 for 7 (dec.); Harrow 96 and 81 for 7).

1959 Drawn. (Eton 270 for 5 (dec.) and 106; Harrow 175 and 157 for 8).

1960 Harrow (124 runs). (Harrow 216 and 143; Eton 153 and 82).

1961 Harrow (innings and 12). (Harrow 295 for 9 (dec.); Eton 147 and 136).

School Matches, 1961

Eton beat Winchester by 7 wickets. Winchester 232 and 189; Eton 315 for 8 (dec.) and 108 for 3.

Oratory beat Beaumont by 93 runs. Oratory 171; Beaumont 78.

Tonbridge beat Clifton by 7 wickets. Clifton 195 and 186; Tonbridge 316 and 66 for 3.

Haileybury and I.S.C. drew with Cheltenham. Haileybury 292 for 6 (dec.); Cheltenham 167 and 103 for 4.

Rugby and Marlborough drew. Rugby 204 and 267 for 7 (dec.); Marlborough 256 and 60 for 1.

Southern Schools beat Rest by 7 wickets. Rest 216 and 173 for 6 (dec.); Southern Schools 224 for 6 (dec.) and 166 for 3.

Combined Services beat Public Schools by 4 wickets. Public Schools 227 for 7 (dec.) and 101; Combined Services 200 for 9 (dec.) and 132 for 6.

Gentlemen *v.* Players (Lord's)

Players won by 172 runs. Players 203 and 263 for 6 (dec.); Gentlemen 177 and 117.

 Boys' Diving: D. Priestley, 73.94 pts.
 Girls' Diving: Miss M. Austen, 75.68 pts.

YACHTING

THE AMERICA'S CUP

The New York Yacht Club accepted the Royal Yacht Squadron's challenge for a series of match races for the America's Cup in 1958. The races took place off Newport, Rhode Island, from Sept. 20–26, 1958, between two yachts of the 12-metre class, the British *Sceptre* and the American *Columbia*. The *Columbia* won all four completed races.

History.—The America's Cup, originally a British trophy, was won outright by the U.S. schooner *America* at Cowes on August 22, 1851, and every contest since has been won by the U.S.A. There have been 17 unsuccessful attempts to take the cup out of the United States—15 by Britain and 2 by Canada. There have been 17 contests and 54 races, 48 of the races being won by the U.S.A.

Shamrock I lost to *Columbia*, 1899; Shamrock II lost to *Columbia*, 1901; Shamrock III lost to *Reliance* 1903; Shamrock IV lost to *Resolute*, 1920; Shamrock V lost to *Enterprise*, 1930; Endeavour lost to *Rainbow*, 1934; Endeavour II lost to *Ranger*, 1937; *Sceptre* lost to *Columbia*, 1958.

YACHTING, 1961

Harwich-Hook of Holland Race (May 19-21).—Class I, Myth of Malham.
Finn Class Championship (Studland Bay, June).—Phaon (R. P. Creagh-Osborne).
Universities (Gareloch, July 5-7).—Cambridge University beat Oxford University.
National Merlin Rocket Championship (Gorleston, June).—Restless IV (B. L. Southcott).
International Dragon Championship (Duke of Edinburgh Cup) (Clyde, June 20-24).—Spagetti (Norway) (O. Christiansen).
International 14 ft. Dinghy (Prince of Wales Cup) (Whitstable, July 15).—Gossip (S. H. Morris).
Britannia Cup (Cowes, Aug. 1).—Fedalah (N. E. Watts).
Fastnet Cup (Aug. 5-10).—Zwerver (Netherlands).
Bembridge Trophy (Public Schools Old Boys).—Oundle.

CANOEING, 1961

Devizes-Westminster Race (124 miles).—1, D. W. Mitchell and R. A. Seeger (Royal Marines), 21 hr. 46 m. (record time); 2, W. Mundell and G. W. Smith (2nd S.A.S. Regt.); 3, B. Latimer and B. E. Joyles (Royal Marines).

THE UNIVERSITY BOAT RACE

(Putney-Mortlake, 4m. 1f. 180 yds)

Year	Winner	m. s.	Won by
1951	Cambridge ... (After re-row)	20 50	12 lengths
1952	Oxford	20 23	Canvas (about 10 f.)*
1953	Cambridge ...	19 54	8 lengths
1954	Oxford	20 23	4½ lengths
1955	Cambridge ...	19 10	16 lengths
1956	Cambridge ...	18 36	1½ lengths
1957	Cambridge ...	19 1	2 lengths
1958	Cambridge ...	18 15	3½ lengths
1959	Oxford	18 52	6 lengths
1960	Oxford	18 59	1½ lengths
1961	Cambridge ...	19 22	4½ lengths

*This was the closest verdict ever given in the Boat Race except for the dead-heat in 1877.

Cambridge have won 59 times, Oxford 47, and there has been 1 dead-heat.

Race Mishaps.

1859.—Cambridge sank, Oxford won.
 1912.—Cambridge sank at 1 mile, and Oxford shortly after Hammersmith Bridge, Oxford won re-row.
 1925.—Oxford sank soon after Hammersmith Bridge and Cambridge paddled home to win.
 1951.—Oxford sank after half a mile. Race abandoned because of weather and rowing conditions. Cambridge won the re-row.

HENLEY REGATTA, 1961

Grand Challenge Cup.—U.S.S.R. Navy beat Leander by 1 length, 6 m. 43 s.
Ladies' Challenge Plate.—Lady Margaret (Cambridge) beat Eton by 1½ lengths, 7 m. 27 s.

CYCLING, 1961

- Tour de France*.—J. Anquetil (France).
Tour of Britain.—W. Holmes (England).
World Championships:—
Professional Sprint.—A. Maspes (Italy).
Professional Pursuit.—R. Altig (W. Germany).
Amateur Sprint.—S. Bianchetto (Italy).
Amateur Pursuit.—H. Nydam (Netherlands).
Amateur Road Race.—J. Jourden (France).
Professional Road Race.—R. van Looy (Belgium).
Ladies' Sprint.—G. Ermolaeva (U.S.S.R.).
Ladies' Pursuit.—Y. Reynders (Belgium).
Ladies' Road Race.—Y. Reynders (Belgium).
National Championships:—
Amateur Sprint.—L. Binch.
Ladies' Sprint.—V. Rushworth.
Amateur Pursuit.—P. B. Hoban.
Professional Pursuit.—J. Geddes.
Ladies' Pursuit.—B. Burton.
Amateur Road Race.—W. Bradley.
Professional Road Race.—D. Bedwell.
Ladies' Road Race.—J. Bedwell.
National (R.T.T.C.) Time Trial Championships:—
25 miles.—P. J. Woodburn, 56 m. 1 s.
50 miles.—P. B. Hoban, 1 hr. 57 m. 4 s.
100 miles.—J. Baylis, 4 hr. 11 m. 54 s.
12 hours.—R. J. Wilkins, 266.7 miles.
24 hours.—A. C. Harding, 470.3 miles.
Ladies' 25 miles.—B. Burton, 1 hr. 2 m. 45 s.
Ladies' 50 miles.—B. Burton, 2 hr. 6 m. 3 s.
Ladies' 100 miles.—B. Burton, 4 hr. 23 m. 1 s.

MOTOR RACING, 1961

- 24-hour Race (Le Mans)*.—1, O. Gendebien and P. Hill (Ferrari), 2,782.2 miles (115.89 m.p.h.); 2, W. Mairesse and M. Parkes (Ferrari) (114.92 m.p.h.); 3, P. Noblet and J. Guichet (Ferrari) (110.24 m.p.h.).

- Monaco Grand Prix*.—1, S. Moss (Lotus) 2 hr. 45 m. 50.1 s. (70.70 m.p.h.); 2, R. Ginther (Ferrari) 2 hr. 45 m. 53.7 s.; 3, P. Hill (Ferrari) 2 hr. 46 m. 31.4 s.
Netherlands Grand Prix.—1, W. von Trips (Ferrari) 2 hr. 1 m. 52.1 s. (96.21 m.p.h.); 2, P. Hill (Ferrari) 2 hr. 1 m. 53 s.; 3, J. Clark (Lotus) 2 hr. 2 m. 5.
Belgian Grand Prix.—1, P. Hill (Ferrari) 2 hr. 3 m. 3.8 s. (128.15 m.p.h.); 2, W. von Trips (Ferrari) 2 hr. 3 m. 4.5 s.; 3, R. Ginther (Ferrari) 2 hr. 3 m. 23.3 s.
Italian Grand Prix.—1, P. Hill (Ferrari) 2 hr. 3 m. 13 s. (130.1 m.p.h.); 2, D. Gurney (Porsche) 2 hr. 3 m. 44.2 s.; 3, B. McLaren (Cooper) 2 hr. 5 m. 41.4 s.
British Grand Prix (Aintree).—1, W. von Trips (Ferrari) 2 hr. 40 m. 53.6 s. (83.91 m.p.h.); 2, P. Hill (Ferrari) 2 hr. 41 m. 39.6 s.; 3, R. Ginther (Ferrari) 2 hr. 41 m. 40.4 s.
European Grand Prix (Nurburgring).—1, S. Moss (Lotus) 2 hr. 18 m. 12.4 s. (92.34 m.p.h.); 2, W. von Trips (Ferrari) 2 hr. 18 m. 33.8 s.; 3, P. Hill (Ferrari) 2 hr. 18 m. 54.9 s.
World Racing Drivers' Championship.—P. Hill (U.S.A.).
Tourist Trophy (Goodwood).—1, S. Moss (Ferrari) (86.62 m.p.h.); 2, M. Parkes (Ferrari); 3, R. Salvadori (Aston Martin).
MOTOR CYCLING, 1961
Senior T.T. Isle of Man.—1, M. Hailwood (Norton) 2 hr. 5 m. 2 s. (100.6 m.p.h.); 2, R. McIntyre (Norton) (99.2 m.p.h.); 3, T. Phillips (Norton) (98.78 m.p.h.).
Junior T.T. Isle of Man.—1, P. Read (Norton) 2 hr. 22 m. 50 s. (95.1 m.p.h.); 2, G. Hocking (M.V. Augusta) 2 hr. 24 m. 7.8 s. (94.25 m.p.h.); 3, R. Renson (Norton) 2 hr. 25 m. 3 s. (93.65 m.p.h.).
Manx Grand Prix (Isle of Man).—*Senior*: 1, N. Minihan (Norton) 2 hr. 24 m. 59 s. (93.69 m.p.h.); 2, D. Williams (Norton) 2 hr. 26 m. 14 s. (92.89 m.p.h.); 3, M. Kelly (Norton) 2 hr. 26 m. 29 s. (92.73 m.p.h.). *Junior*: 1, F. Reynolds (A.J.S.) 2 hr. 47 m. 8.6 s. (81.28 m.p.h.); 2, R. Dawson (A.J.S.) 2 hr. 50 m. 11.2 s. (79.82 m.p.h.); 3, A. Newstead (A.J.S.) 2 hr. 52 m. 30.2 s. (78.75 m.p.h.).
CHESS, 1961
Universities.—Oxford University and Cambridge University drew 3½-3½.
British Championship (Aberystwyth).—J. Penrose. *Ladies*, Miss E. Tranmer; *Junior Under 21*, D. G. Wells; *Boys Under 18*, R. A. Beach; *Boys Under 15*, P. Murphy; *Girls*, V. Horsnell.
Hastings Congress.—S. Gligoric (Yugoslavia) 7; I. Bondarevsky (U.S.S.R.) 6; K. W. Lloyd (England) and L. Szabo (Hungary) 5.
County Championships.—*Senior*, Warwickshire; *Junior*, Surrey; *Correspondence*, Gloucestershire.
Clare-Benedict Tournament.—Austria 12; W. Germany 11½; Great Britain 10; Netherlands 10; Switzerland 9½; Italy 7.
Glorney Cup.—England 14; Scotland 9; Wales 8; Ireland 5.

 MORAY M.C.—Mrs. J. M. Brewster, Carrick, Forres.
 MOUNTAINEERING SECTION OF THE CAMPING CLUB.—G. H. Watkins, 8 Bankhurst Road, S.E.6.

HOMES OF SPORT

RACING

The two most famous homes of British flat racing are Newmarket and Epsom. The former, the home of the Jockey Club and the headquarters of British racing since the days of Charles II, who paid frequent visits there, is the scene of two of the "Classics", the 2,000 and 1,000 Guineas, and of many other important races, including the Cesarewitch and the Cambridgeshire, the "Autumn Double". At Epsom, with the exception of the war years, the Derby has been run since 1780 and the Oaks since 1779. The Coronation Cup also takes place during the Derby meeting. There are many trainers' establishments at both Newmarket and Epsom. The fifth classic race, the St. Leger, is run at Doncaster in September.

Two events of long-standing social, as well as racing, significance are the Royal Ascot meeting in June and the Goodwood meeting at the end of July. The latter is the only occasion during the year at which racing takes place at Goodwood, but there are a number of meetings on Ascot Heath, including that at which the very valuable King George VI and Queen Elizabeth Stakes, an important feature in the present-day racing programme, is run.

Courses near London include Alexandra Park (Wood Green), Hurst Park (near Hampton Court), Kempton Park (Sunbury-on-Thames), Sandown Park (Esher) and Windsor. Among important courses in other parts of the country may be mentioned Lincoln and Manchester, the scenes of the first and last big flat races of the season, the Lincolnshire and Manchester November Handicap, respectively, and York and Chester, the homes of the Ebor Handicap and Chester Cup. Steeplechasing and hurdling under National Hunt rules also take place during the winter at many centres of flat racing.

The Grand National steeplechase is run over a distance of 4 m. 856 yds., with 30 fences, at Aintree near Liverpool. Other very important races under National Hunt rules, including the Cheltenham Gold Cup and the Champion Hurdle, take place at the National Hunt meeting at Cheltenham, while the King George VI Steeplechase at Kempton Park on Boxing Day has in recent years been very popular.

CRICKET

Test matches are now played on six English grounds—Lord's, The Oval, Trent Bridge (Nottingham), Old Trafford (Manchester), Headingley (Leeds) and Edgbaston (Birmingham). In the normal course, five Test Matches are played against

MYNYDD C.C.—J. C. Burns, 23 Meadway, Bramhall, Cheshire.
 NORTUMBRIAN M.C.—Miss M. F. Brown, 12 Moor Lane, Whitburn, Sunderland.
 PINNACLE CLUB.—Countess D. Gravina, Rose Cottage, Frittenden, nr. Cranbrook, Kent.
 RUCKSACK CLUB.—J. E. Byrom, Highfield, 3 Douglas Road, Hazel Grove, Stockport.
 SANDSTONE C.C.—G. M. Clarke, 34 High Worple, Rayners Lane, Harrow, Middx.
 SCOTTISH M.C.—J. S. Stewart, 121 Bath Street, Glasgow, C.2.
 SOUTHERN M.A.—M. Foster, 28 Phineas Pett Road, Eitham, S.E.9.
 YORKSHIRE M.C.—E. A. Shepherd, 6 Station Road, Clayton, Bradford, Yorks.
 YORKSHIRE RAMBLERS' CLUB.—E. C. Downham, Bierley House, Oakenshaw, Bradford, Yorks.

In addition, most universities, colleges and branches of the armed services have mountaineering clubs open to members of the respective University, college or service.

visiting teams to England and take place at Lord's, the Oval and three out of the other four test-match grounds, one dropping out each season in turn.

Lord's, the headquarters of Cricket and of the M.C.C., is the third ground of the name. Thomas Lord founded his first ground in 1787, and after two moves, established it on the present site at St. John's Wood in 1814. Middlesex play almost all their home matches at Lord's, as do Surrey at the Oval at Kennington, which has been the home of Surrey cricket since 1846.

In addition to the grounds already mentioned, others of great historic interest and current importance include, in the South, the Sussex county ground at Hove and the St. Lawrence ground at Canterbury, and in the North, Bramall Lane (Sheffield) and the ground at Scarborough, where the annual end-of-season Festival has taken place since last century.

ASSOCIATION FOOTBALL

The F.A. Cup Final has been held at Wembley Stadium since 1923, on the famous occasion when the crowd invaded the ground. Since then admission to the Cup Final has been by ticket only, but the Stadium can accommodate about 100,000 spectators. Many international matches and the F.A. Amateur Cup Final also take place at Wembley.

Wembley is, however, surpassed in capacity by Hampden Park, Glasgow, where the record for paying spectators is 149,547. England v. Scotland matches take place at Wembley and Hampden Park in alternate years.

London teams, with their grounds, currently playing in First Division football are as follows: Arsenal (Highbury), Chelsea (Stamford Bridge), Fulham (Craven Cottage), Tottenham Hotspur (White Hart Lane) and West Ham United (Upton Park).

RUGBY FOOTBALL

The three most famous centres of Rugby Union Football in the United Kingdom, scenes of many international matches, are Twickenham, the headquarters of the Rugby Union, Cardiff Arms Park and Murrayfield (Edinburgh). The University match and the games for the Services Championship are also played at Twickenham, where, in addition, most of the Harlequins' home matches take place. Of other famous London clubs, Blackheath play at the Rectory Field, Blackheath, Richmond and London Scottish share the Richmond Athletic Ground and the London Welsh occupy

the nearby Old Deer Park. Rosslyn Park, who for many years played at the latter, now have a ground of their own at Roehampton. The Wasps' ground is at Sudbury.

GOLF

The links at St. Andrews, the home of the Royal and Ancient Golf Club and the traditional centre of golf, remain the most famous in the world. Other great Scottish courses are at Muirfield, Prestwick and Troon.

The 1957 Ryder Cup match was played at Lindrick and the Professional Match Championship has many times taken place at Walton Heath in Surrey. Except for Sandwich, however, most of the major championship courses are now either in Scotland or in Lancashire or Cheshire (e.g. Hoylake, Formby, Birkdale and Royal Lytham and St. Annes). Other famous golfing centres are Rye, Burnham and Westward Ho! and in Wales, Harlech and Porthcawl.

ATHLETICS

While the number of running tracks in this country is slowly increasing and well-attended meetings are held in many centres, most of the international matches and events such as the A.A.A. Championships and the University Sports take place at the White City Stadium at Shepherd's Bush. The 1958 Empire Games were held at Cardiff and the 1948 Olympic Games at Wembley.

LAWN TENNIS

The All-England Lawn Tennis Championships have been played at Wimbledon since their inception in 1877, first on the former ground at Worple Road and more recently on the present courts of the All-England Lawn Tennis Club in Church Road. Bournemouth is the venue of the British Hard Court Championships, and in recent years one of the leading Professional Tournaments in this country, the Slazenger Championship, has taken place at Devonshire Park, Eastbourne.

TENNIS, RACKETS, ETC.

The chief centre for tennis and rackets may be said to be Queen's Club in West Kensington. A number of other tennis courts are still in use, notably at Lord's, where the M.C.C. Gold and Silver Prizes are important events, Hampton Court (built by Henry VIII in 1530), Oxford, Cambridge, Canford School, Leamington and Manchester. Many

of the leading squash rackets matches take place in the courts belonging to West End Clubs.

ROWING

Most of the leading rowing events of the year are contested on the River Thames. The Henley Regatta continues to attract the foremost oarsmen from all over the world. Apart from the Boat Race, several other important races take place either from Putney to Mortlake or in the reverse direction, including the Thames Head of the River Race and the Wingfield Sculls. The course for Doggett's Coat and Badge, instituted in 1715, possibly the oldest sporting event still regularly contested, is from London Bridge to Chelsea. The rowing events in the 1958 Empire Games took place on Lake Padarn in Wales.

YACHTING

Cowes, the headquarters of the Royal Yacht Squadron and of the Royal London Yacht Club and the scene of the great Cowes Week at the beginning of August, is still the most famous name in British yachting, but there are many other centres of the sport. Among others on or near Spithead and the Solent are Bembridge, Ryde, Yarmouth, Southampton and Hamble and, elsewhere, Burnham-on-Crouch, Poole Harbour, Weymouth, Plymouth, Falmouth and the Clyde.

POLO

In recent years, the polo grounds at Cowdray Park, Midhurst, and at Windsor have become the two most important centres of the sport in this country, though a number of other grounds exist, among which those at Woolmers Park, Hertfordshire and Cirencester may be mentioned.

OTHER SPORTS

The National Rifle Association's annual meeting at its headquarters at Bisley Camp, near Brookwood, Surrey, is the chief event in the rifle-shooting programme. Since the closing of Harringay Arena, many big boxing programmes have been staged at the Empire Pool, Wembley, and well-known provincial centres of the sport are the Liverpool Stadium and the Granby Halls, Leicester. The Greyhound Derby is run at the White City and the Waterloo Cup, the most important coursing prize, at Altcar, Lancashire.

BROADCAST RECEIVING LICENCES

Sound.—Broadcast Receiving Licences (excluding television) may be obtained at most Post Offices at a charge of £1.

Television.—Broadcast Receiving Licences (including television) are obtainable at most Post Offices for £4 (issue fee £3, plus £1 duty). If application is made at any post office which conducts wireless licence business, but does not stock television licences, arrangements will be made for a licence to be issued from the local Head Post Office and forwarded by post to the applicant. If the applicant holds an unexpired (£1) sound licence it should be surrendered when the television licence is applied for and the price of the television licence will be abated at the rate of 2s. 8d. for each month of the unexpired portion of the surrendered (£1) licence.

Blind Persons.—Blind persons who produce the required certificates of registration may obtain free sound licences or concessionary television

licences for £3 (issue fee £2 plus £1 duty) or £2 in Jersey or Sark.

Licensing requirements.—One licence (which must be a television licence if a television set is used anywhere in the household) covers any number of sets in a single household; but lodgers, paying guests and occupiers of flats (even if not self-contained) count as separate householders and require separate licences. Licences are required both for self-contained sets and for loudspeakers worked by wire extensions from main receiving sets outside the household concerned. Licences are also required by those using apparatus which is rented or hired. A separate licence is necessary for a broadcast receiving set fitted in a motor-car.

Period of Validity.—An initial licence (either sound or television) is dated to expire twelve months from the last day of the month preceding that of issue. Thereafter all renewal licences are dated to expire one year after the licence they supersede.

THE NOBEL PRIZES

The Nobel Prizes are awarded each year from the income of a trust fund established by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died on December 10, 1896, leaving a fortune of £1,750,000. They are awarded to those who have contributed most to the common good in the domain of (a) Physics; (b) Chemistry; (c) Physiology or Medicine; (d) Literature; (e) Peace. The first awards were made in 1901 on the fifth anniversary of Nobel's death. The awarding authorities are the Swedish Academy of Science—(a) Physics; (b) Chemistry; the Royal Caroline Institute, Stockholm—(c) Physiology or Medicine; the Swedish Academy—(d) Literature; a committee of five persons elected by the Norwegian Storting—(e) Peace. The Trust is administered by the Board of Directors of the Nobel Foundation, Stockholm. The Board consists of four members and two deputy members appointed by the awarding authorities; the Swedish Government appoints a chairman and a vice-chairman.

The nationality of prizewinners is indicated as follows: (a) Great Britain; (b) U.S.A.; (c) France; (d) Sweden; (e) Belgium; (f) U.S.S.R.; (g) Germany; (h) Netherlands; (i) Switzerland; (k) Denmark; (l) Norway; (m) Spain; (n) Poland; (o) Austria; (p) Italy; (q) India; (r) Hungary; (s) Finland; (t) Canada; (u) Chile; (v) Argentine; (w) Japan; (x) Portugal; (y) Irish Free State; (z) Republic of Ireland; (aa) South Africa; (bb) Iceland; (cc) China; (dd) Czechoslovakia; (ee) Australia. The distribution by nationalities is shown at foot of table.

For prize winners for the years 1901-1944, see earlier editions of WHITAKER'S ALMANACK.

BOOKS PUBLISHED

Among the books published between October, 1960, and October, 1961, were the following:

Bibliography

"Sir Robert Walpole: The King's Minister," by J. H. Plumb; "Mr. Secretary Peel," by Norman Gash; "Wilfred Scawen Blunt," by the Earl of Lytton; "One-Leg," by the Marquess of Anglesey; "Edison," by Matthew Josephson; "A Prime Minister Remembers," by Francis Williams; "The Supreme Command, 1914-18," by Lord Hankey; "Hadrian," by Stewart Perowne; "The Destruction of Lord Raglan," by Christopher Hibbert; "Father Faber," by Ronald Chapman; "Sir George Grey," by James Rutherford; "Charles Booth," by T. S. and M. B. Simey; "Nobel," by Nicholas Halasz; "Sir Patrick Hastings," by H. Montgomery Hyde; "Conversation with Max," by S. N. Behrman; "Lord of the Isles," by Nigel Nicolson; "The Infernal World of Branwell Brontë," by Daphne du Maurier; "Branwell Brontë," by Winifred Gerin; "Sir Hubert Wilkins," by John Grierison; "King William IV," by W. Gore Allen; "Arthur Cayley Headlam," by Ronald Jasper; "The Young Disraeli," by B. R. Jerman; "Mrs. Patrick Campbell," by Alan Dent; "Tudor Secretary," by F. G. Emmison; "The Hollow Crown," by Harold F. Hutchison; "Fighting Admiral," by Donald Macintyre; "The Late Lord Byron," by Doris Langley Moore; "Letters of Sigmund Freud," ed. Ernst L. Freud; "Edward Gibbon Wakefield," by Paul Bloomfield; "The Young Mr. Wesley," by V. H. H. Green; "The Age of Churchill," by Peter de Mendelssohn; "My Dearest Uncle," by Joanna Richardson; "The Whiston Matter," by Ralph Arnold; "A Pride of Lions," by Monica Stirling; "Catherine the Great," by Ian Grey; "Gertrude Bell: From her Personal Papers, 1914-26," by Elizabeth Burgoyne; "James Anthony Froude: Vol. I," by Waldo Hilary Dunn; "A Tudor Tragedy," by Lacey Baldwin Smith; "Poor Kit Smart," by Christopher Devlin; "Shelley and his Circle," Vols. I and II, ed. Kenneth Neill Cameron; "The Garnett Family," by Carolyn G. Heilbrun; "The Eye of the Wind," by Peter Scott; "The Days Were Too Short," by Marcel Pagnol; "Dust in the Lion's Paw," by Freya Stark; "George," by Emyln Williams; "Mr. Citizen," by Harry S. Truman; "All in One Lifetime," by James F. Byrnes; "An Only Child," by Frank O'Connor; "Sketches from Life," by Dean Acheson; "People and Life," by Ilya Ehrenburg; "The Wandering Years," by Cecil Beaton; "Green Memory," by L. A. G. Strong; "The Road Past Mandalay," by John Masters; "The Sea is Strong," by Sir Dudley De Chair; "Roses in December," by Frances Parkinson Keyes; "William Beckford," by André Parreaux; "The Pilgrim Daughters," by Hesketh Pearson; "The First Five Lives of Annie Besant," by Arthur H. Nethercot; "Stravinsky," by Roman Vlad.

Fiction

"The Mighty and their Fall," by Ivy Compton-Barnett; "A Burnt-Out Case," by Graham Greene; "A Test to Destruction," by Henry Williamson; "The Winter of our Discontent," by John Steinbeck; "Now Sleeps the Crimson Petal," by H. E. Bates; "The Severed Head," by Iris Murdoch; "Don't Tell Alfred," by Nancy Mitford; "Two for the River," by L. P. Hartley; "The Foxglove Saga," by Auberon Waugh; "The White Rajah," by Nicholas Monsarrat; "Pomp and Circumstance," by Noel Coward; "The View from the Fortieth Floor," by Theodore H. White; "The Frontiers of Love," by Simon Harcourt-Smith; "Ourselves to Know," by John O'Hara; "Sermons

and Soda-Water," by John O'Hara; "The Mansion," by William Faulkner; "No Signposts in the Sea," by V. Sackville-West; "Mezzotint," by Sir Compton-Mackenzie; "The Right Hand Man," by James Tucker; "The Loser," by Peter Ustinov; "The Journey Homeward," by Gerald Hanley; "Are You Hungry, Are You Cold?" by Ludwig Bemelmans; "The King of Athelney," by Alfred Duggan; "The Talent Scout," by Romain Gary; "Mr. Olim," by Ernest Raymond; "The Man who Won the Pools," by J. I. M. Stewart; "Conventional Weapons," by Jocelyn Brooke; "China Court," by Rumer Godden; "The Father's Comedy," by Roy Fuller; "A Season of Mists," by Honor Tracy; "Debbie Go Home," by Alan Paton; "A Holiday by the Sea," by Gerald Brennan; "The Implacable Hunter," by Gerald Kersh; "The Minister," by Maurice Edelman; "My Master Columbus," by Cedric Belfrage; "Adrift in Soho," by Colin Wilson; "Stephen Morris," by Nevill Shute; "Every Advantage," by John Verney; "Ice in the Bedroom," by P. G. Wodehouse; "Covenant with Death," by John Harris; "Marnie," by Winston Graham; "The Fox in the Attic," by Richard Hughes; "In a Summer Season," by Elizabeth Taylor; "Mothers and Daughters," by Evan Hunter; "Death of a Highbrow," by Frank Swinnerton; "The Agony and the Ecstasy," by Irving Stone; "Jason," by Henry Treece; "Three Players of a Summer Game," by Tennessee Williams; "The Old Men at the Zoo," by Angus Wilson; "Touch and Go," by John Stroud; "The Custom House," by Francis King; "The Last Exile," by James Aldridge; "The Thirty-First of June," by J. B. Priestley; "Image of My Father," by R. C. Hutchinson; "The Judas Tree," by A. J. Cronin; "Last Score," by Storm Jameson; "Nuncle," by John Wain; "A Night in Cold Harbour," by Margaret Kennedy; "The Heart of London," by Monica Dickens; "I Met a Lady," by Howard Spring; "The Adventure of the Christmas Pudding," by Agatha Christie; "The Worm of Death," by Nicholas Blake; "Thunderball," by Ian Fleming; "Sue Crowther's Marriage," by Thomas Armstrong; "Doctors Wear Scarlet," by Simon Raven; "Hands of Healing," by D. L. Murray; "His Lordship," by Philip Gibbs; "Vendetta in Spain," by Dennis Wheatley; "The Chess Players," by Frances Parkinson Keyes; "Daughters in Law," by Henry Cecil.

Literature and Criticism

"Collected Essays," by Aldous Huxley; "The Age of Reason," by Sir Harold Nicolson; "Resistance, Rebellion and Death," by Albert Camus; "The School of Donne," by A. Alvarez; "The Modern Poets," by M. L. Rosenthal; "Greek Lyric Poetry," by Sir Maurice Bowra; "The English Novel," by Lionel Stevenson; "George Orwell," by Richard Rees; "Saturn Over the Water," by J. B. Priestley; "Somerset Maugham," by Richard Cordell; "A Reviewer's ABC," by Conrad Aiken; "W. B. Yeats: His Poetry and Thought," by A. G. Stock; "The Imagination of Charles Dickens," by A. O. J. Cockshut; "George Gissing and H. G. Wells," ed. Royal A. Gettmann; "The Image of the Modern French Novel," by Stephen Ullmann.

Poetry

"Solstices," by Louis MacNeice; "More Poems, 1961," by Robert Graves; "Summoned by Bells," by John Betjeman; "The Bluebells," by John Masefield; "Song for a Birth or a Death," by Elizabeth Jennings; "My Sad Captain," by Thom Gunn; "The Screens," by I. A. Richards; "Collected Poems, 1920-1959," by James Reeves; "On a Calm Shore," by Frances Cornford; "Poems,

1955-59," by Boris Pasternak; "Some Poems," by E. H. W. Meyerstein; "Weep before God," by John Wain; "Selected Poems," by Conrad Aiken; "An Anthology of English Poetry, 1945-60," ed. Thomas Blackburn; "Collins Albatross Book of Verse," ed. Louis Untermeyer; "The Rats," by Alan Sillitoe.

Religion and Philosophy

"The New English Bible: The New Testament"; "The Early Christians," by Michael Gough; "Letters from the Early Church," by Roger Lloyd; "According to Mark," by Philip Carrington; "English Religious Dissent," by Erik Routley; "The Mind of the Oxford Movement," ed. Owen Chadwick; "The Historic Reality of Christian Culture," by Christopher Dawson; "Man as Churchman," by Norman Sykes; "Man: The Known and Unknown," by John Langdon-Davies; "The Pre-Conquest Church in England," by Margaret Deanesly; "Essays in Pastoral Reconstruction," by Martin Thornton; "William Temple's Philosophy of Religion," by Owen C. Thomas; "The Christ of the Fourth Gospel," by E. M. Sidebottom; "The Savage My Kinsman," by Elisabeth Elliot; "The Theological Frontier of Ethics," by W. G. MacLagan; "Philosophy and Religion," by John Wilson; "Judaism," by Leon Roth; "Sensation and Perception," by D. W. Hamlyn; "Persons in Relation," by John Macmurray.

History

"The Reign of George III," by J. Steven Watson; "The Franco-Prussian War," by Michael Howard; "The South Sea Bubble," by John Carswell; "Protest in Arms," by Edgar Holt; "The Navy at War, 1939-45," by S. W. Roskill; "Revolution and Papacy, 1769-1846," by E. E. Y. Hales; "The Rise and Fall of the Third Reich," by William L. Shirer; "An Illustrated History of France," by André Maurois; "Party Politics: The Growth of Parties," by Sir Ivor Jennings; "The King's Servants," by G. E. Aylmer; "Bayonets to Lhasa," by Peter Fleming; "The Origins of the Second World War," by A. J. P. Taylor; "The Spanish Civil War," by Hugh Thomas; "Britain in World Affairs," by Lord Strang; "Corunna," by Christopher Hibbert; "A Study of History: Vol. XII, Reconsiderations," by Arnold J. Toynbee; "The Levellers and the English Revolution," by H. N. Brailsford; "The Century of Revolution, 1603-1714," by Christopher Hill; "Russia and the West under Lenin and Stalin," by George F. Kennan; "Culloden," by John Prebble.

Travel

"A Zoo in my Luggage," by Gerald Durrell; "Greece in My Life," by Sir Compton Mackenzie; "Eastern Windows," by F. D. Ommannay; "The Lotus and the Robot," by Arthur Koestler; "High Street Africa," by Anthony Smith; "The Slaves of Timbuktu," by Robin Maugham; "North from Kabul," by Andrew Wilson; "No Latitude for Error," by Sir Edmund Hillary; "Himalayan Pilgrimage," by David Snellgrove; "The Ascent of Dhaulagiri," by Max Eiselin; "Karakoram," by Fosco Maraini; "Alone Across the Atlantic," by Francis Chichester.

General

"British Foreign Policy since the Second World War," by C. M. Woodhouse; "The Constitutional Structure of the Commonwealth," by K. C. Wheare; "The Concept of Law," by H. L. A. Hart; "The Idea of Punishment," by Lord Longford; "The White Nile," by Alan Moorehead; "Baroque in Spain and Portugal," by James Lee-Milne; "Looking at Pictures," by Sir Kenneth Clark; "Victorian Comfort," by John Gloag; "A Punch History of Manners and Morals," by Alison Abdurgham; "Living Free," by Joy Adamson; "World Prehistory," by Grahame Clark; "Egypt of the Pharaohs: An Introduction," by Sir Alan Gardiner; "The Prehistoric Chamber Tombs of France," by Glyn Daniel; "The Concise Encyclopedia of Archaeology," ed. Leonard Cottrell; "Wonders of Antiquity," by Leonard Cottrell; "The Art of War," by Cyril Falls; "The Watery Maze," by Bernard Fergusson; "Hitler Confronts England," by Walter Ansel; "Salerno," by Hugh Pond; "The Sands of Dunkirk," by Richard Collier; "Anzio," by Wynford Vaughan-Thomas; "The Battle of Matapan," by S. W. C. Pack; "Malta Convoy," by Peter Shankland and Anthony Hunter; "Operation Tombola," by Roy Farran; "War in the Desert," by Sir John Glubb; "The Potemkin Mutiny," by Richard Hough; "America in the Modern World," by D. W. Brogan; "Inside Europe Today," by John Gunther; "New Dimensions in Foreign Policy," by Max Beloff; "The De Gaulle Revolution," by Alexander Werth; "Shooting at Sharpeville," by Bishop Ambrose Reeves; "The Treasure of the Copper Scroll," by J. M. Allegro; "Eton," by Christopher Hollis; "The Origin of English Place-Names," by P. H. Reaney; "Studies in Words," by C. S. Lewis; "You English Words," by John Moore; "Voltaire and the Calas Case," by Edna Nixon; "Ten Rilling-ton Place," by Ludovic Kennedy; "Lanterns and Lances," by James Thurber.

BOOK PRODUCTION AND BOOK EXPORTS

Figures issued by The Publishers Association (based on information supplied to its Chartered Accountants by individual publishers) show a marked increase in book exports since the outbreak of war in 1939. The totals for the years 1949 to 1960 are shown below:—

Year	Total value of Books produced in U.K.	Total value of Books exported from U.K.	Year	Total value of Books produced in U.K.	Total value of Books exported from U.K.
1949.....	£34,297,251	£9,798,838	1955.....	£49,439,087	£18,156,084
1950.....	37,158,652	11,394,220	1956.....	56,659,484	20,870,594
1951.....	41,553,760	13,740,323	1957.....	60,456,095	22,505,440
1952.....	42,790,387	14,482,036	1958.....	63,608,654	23,817,453
1953.....	44,892,291	15,566,874	1959.....	66,945,183	25,393,960
1954.....	46,270,953	16,527,054	1960.....	75,426,683	29,833,866

BOOKS PUBLISHED IN GREAT BRITAIN IN 1960

This Table, from *The Bookseller* of December 31, 1960, shows the books published in 1960 with the number of new editions, translations and limited editions.

Books and pamphlets priced at less than 6d. have been omitted, as are also all Government publications except the more important issued by H.M. Stationery Office.

COPYRIGHT

The Government Department dealing with Copyright is the *Industrial Property Department, Board of Trade, 25 Southampton Bldgs., W.C.2.*

Subject to the provisions of the Copyright Act, 1956, copyright subsists automatically in every original literary, dramatic, musical and artistic work and continues to subsist until the end of the period of fifty years from the end of the calendar year in which the author died and shall then expire. No registration or other formalities are required in order to obtain the protection of the Act. Protection is conferred not only against reproduction but also against the public performance of a work without permission. Copyright may also subsist in sound recordings, cinematograph films and television and sound broadcasts. Libraries

entitled to receive free copies of books published in the United Kingdom, are the British Museum, the Bodleian Library, Oxford, University Library, Cambridge, the National Library of Wales, the National Library of Scotland and Trinity College, Dublin.

Voluntary Registration at Stationers' Hall.—Compulsory registration at Stationers' Hall terminated on Dec. 31, 1923, but in the following year the Stationers' Company established a new Register in which Books and Fine Arts can be registered. A copy has to be filed at Stationers' Hall and certified copies of the entries are issued, the fees being 10s. for a Book, or a Fine Art; certified copies 10s. in either case. The fee for a search is 5s.

MUSIC AND OPERA OF 1960-61

(1960) Oct. 1. The Hallé Orchestra, under Sir John Barbirolli, played at the Festival Hall. 3. Schönberg's violin concerto, completed in 1936, received its first concert performance in London, being played at the Festival Hall with Wolfgang Marschner as soloist. 4. Jascha Horenstein played Alban Berg's violin concerto with the London Philharmonic Orchestra at the Festival Hall. 5. The Sadler's Wells opera season opened with a new production of *La Traviata*. The B.B.C. series of fortnightly Symphony Concerts began. 11. Sir Malcolm Sargent conducted the Royal Choral Society, with Ronald Dowd, John Holmes and Jennifer Vyvyan as soloists, and the London Philharmonic Orchestra in a performance of Haydn's *Creation* at the Albert Hall. 12. The Royal Philharmonic Society's season began at the Festival Hall. 14. Haydn's little-known opera *L'infedeltà Delusa* was performed for the first time in this country at the Festival Hall, with Hugues Cuénod, Alexander Young, Donald Bell, Jennifer Vyvyan and Jacqueline Delman. 16. The London Symphony Orchestra started their new season at the Festival Hall with a concert of Spanish music, conducted by Enrique Jorda. 17. Otto Klemperer conducted the Philharmonia Orchestra in Beethoven's *Mass in D* at the Festival Hall, the soloists being Franz Crass, Ernst Häfliger, Agnes Giebel and Marga Höffgen. 18. The Japanese National Radio Orchestra, during the course of a world tour to celebrate the 35th anniversary of the Japanese Broadcasting Corporation, gave a concert at the Festival Hall. 19. The Hallé Orchestra and the B.B.C. Northern Orchestra came together for a concert in the Free Trade Hall, Manchester, at which Sir John Barbirolli conducted Mahler's seventh symphony and Nielsen's fifth. 20. Claudio Arrau gave a Chopin recital in the Festival Hall in aid of the Chilean Earthquake Relief Fund. 21. The new season opened at Covent Garden with a production of Bellini's opera *La Sonnambula*, which had not been performed there since 1921. 23. At the City of Bath Bach Choir's Bach Festival, which was held for the first time since 1954, the *St. Matthew Passion* was sung, with William Herbert, John Carol Case, Donald Bell, Wilfred Brown, Janet Baker and Elsie Morison as soloists, and a section of the London Symphony Orchestra. 25. The Hamburg Philharmonic State Orchestra paid its first visit to England for a concert at the Albert Hall under its regular conductor, Wolfgang Sawallisch. 26. The first of two concerts in commemoration of Mahler was given at the Festival Hall by the Philharmonia Orchestra, conducted by Jascha Horenstein, with Dietrich Fischer-Dieskau as baritone soloist. 28. At the Festival Hall, Dietrich Fischer-Dieskau accompanied by Gerald Moore gave a Wolf song recital in the centenary year of Hugo Wolf's birth.

Nov. 2. At the B.B.C. Symphony Concert in the Festival Hall, Malcolm Arnold conducted the first performance of his fourth symphony, specially commissioned by the B.B.C. 6. At the Festival Hall, the Hungarian State Symphony Orchestra gave its first concert in London. 8. The first performance of Peter Racine Fricker's third symphony, commissioned by the London Philharmonic Society, took place at the Society's concert in the Festival Hall. 21. The bicentenary of the birth of Cherubini was marked by the performance of his overture to *Anacréon* at the Royal Philharmonic Orchestra's concert at the Festival Hall, conducted by Pierre Monteux. 22. The annual St. Cecilia concert took place in the Festival Hall in the presence of Queen Elizabeth the Queen

Mother. The City of Birmingham Symphony Orchestra took part under Hugo Rignold, Benno Moiseiwitsch played in Rachmaninov's *Paganini Rhapsody*, and the City of Birmingham Choir, with David Galliver, sang in Ireland's *There Things Shall Be*. A specially commissioned suite was performed to which each of four young English composers—Thea Musgrave, Iain Hamilton, Alun Hoddinott and Geoffrey Bush—contributed one movement. 23. Walton's second symphony, which had first been heard at Edinburgh in September, received its London *première*, being performed at the Festival Hall by the Royal Liverpool Philharmonic Orchestra, conducted by John Pritchard. 29. Benjamin Britten conducted the first English performance of his *Cantata Academica* (which was written for the quinqucentenary of Basle University in June, 1960) in the Cambridge Guildhall. It was presented by the choir and orchestra of the Cambridge University Musical Society, with Peter Pears, Owen Brannigan, Jennifer Vyvyan and Helen Watts as soloists. At the Festival Hall, the Bach Choir, conducted by Meredith Davies, sang Bach's *Mass in B Minor*; the soloists were David Galliver, Richard Standen, John Holmes, Heather Harper and Marjorie Thomas.

Dec. 13. The London Philharmonic Society gave the first performance in England of Frank Martin's oratorio *The Mystery of the Nativity* at the Festival Hall; Jaroslav Krombholc was the conductor and the soloists included Owen Brannigan, Richard Lewis and April Cantelo. 19. The B.B.C. produced for the first time a version of Mahler's tenth symphony, left unfinished at his death in 1911, edited by Deryck Cooke and played by the Philharmonia Orchestra under Berthold Goldschmidt.

(1961). Jan. 17. The London Philharmonic Orchestra and London Philharmonic Society gave a concert at the Festival Hall to mark Sir Adrian Boult's 10-year association with them. The programme included Elgar's violin concerto with Alfredo Campoli as soloist, and the previously unperformed Dance Concerto, *Phalaphala*, by Priaulx Rainier, specially commissioned for the occasion. 20. The Northern Sinfonia Orchestra, which was founded in 1958, appeared for the first time at the Festival Hall.

Feb. 2. Benjamin Britten's opera *A Midsummer Night's Dream*, composed for the 1960 Aldeburgh Festival, was performed at the Royal Opera House in a new production by Sir John Gielgud, with Georg Solti as conductor. 7. The Bach Choir sang Verdi's *Requiem* at the Festival Hall. 12. Alfredo Campoli played the Sibelius and Tchaikovsky violin concertos at the Festival Hall with the Philharmonia Orchestra under Pierino Gamba. 21. David Oistrakh played the violin concerto of Shostakovich at the Festival Hall, and with his son Igor, Prokofiev's unaccompanied sonata for two violins. 22. Jascha Horenstein conducted the B.B.C. Symphony Orchestra and the B.B.C. Chorus and Choral Society in Beethoven's *Missa Solemnis* at the Festival Hall, with Kim Borg, Richard Lewis, Norma Procter and Teresa Stich-Randall. 24. A new production of *Fidelio*, produced and conducted by Otto Klemperer, was presented at Covent Garden.

March 10. Britten's *Cantata Academica* was heard for the first time in London at a London Symphony Orchestra Concert at the Festival Hall, conducted by George Malcolm, with the same soloists as in the Cambridge performances in November 1960. 19. The Bach Choir conducted by David Willcocks sang the *St. Matthew Passion*, at the Festival Hall.

20. First prize winners in a competition for young conductors, organized by the Philharmonia Orchestra, took part in one of the Orchestra's concerts at the Festival Hall. 22. In a B.B.C. concert of modern music at the Festival Hall, Stravinsky's recent *Movements* for piano and small orchestra, was given for the first time in this country, with Aloys Kontarsky as soloist. 28. Honegger's *King David* was performed at the Festival Hall by the London Philharmonic Orchestra and choir under Sir Malcolm Sargent. 30. A new violin concerto by Alun Hoddinott was performed by the City of Birmingham Orchestra, with Manong Parikian as soloist.

April 2. Our Lady's Choral Society of Dublin, conducted by Sir John Barbirolli, sang Elgar's *Dream of Gerontius* in the Albert Hall, with David Galliver, Marian Nowakowski and Kerstin Meyer as soloists. 14. The Berlin Philharmonic Orchestra gave the first of four concerts on successive evenings at the Festival Hall, during which they performed all Beethoven's symphonies. 24. The Philharmonia Orchestra under Otto Klemperer gave a concert of music by Mahler at the Festival Hall, to mark the fiftieth anniversary (in May) of the composer's death. On April 25. Sir John Barbirolli conducted the Hallé Orchestra in Mahler's seventh symphony, also at the Festival Hall, and at the same hall on April 28 the London Symphony Orchestra played Mahler's first symphony, conducted by Jascha Horenstein in the absence through illness of Josef Krips.

May 4. Charles Graves made his last appearance as conductor of the Birmingham Symphony Orchestra at the orchestra's benevolent fund concert. 17. The Handel Opera Society produced *Rinaldo* at Sadler's Wells, this being the first production of the opera in England since Handel's death. 24. The Glyndebourne opera season started with a production of Donizetti's *L'Elisir d'Amore*. 28. Yehudi Menuhin played at the Albert Hall with the Philharmonia Orchestra under Sir Malcolm Sargent. The London Philharmonic Orchestra's concert at the Festival Hall was marked by the début in this country of the Italian conductor, Francesco Mander.

June 1. The Bath Festival opened. Yehudi Menuhin played in Mozart's G major violin concerto and a new violin concerto by Lennox Berkeley, conducted by the composer. 5. Artur Schnabel gave a recital at the Festival Hall. 8. A gala performance of *Cavalleria Rusticana* and *Pagliacci* took place at Covent Garden, in the presence of Queen Elizabeth the Queen Mother, in aid of the Royal Opera House Benevolent Fund. The singers included Victoria de Los Angeles, Jon Vickers, Geraint Evans and Ronald Lewis. 26. The London Philharmonic Orchestra's concert at the Festival Hall was conducted by Thomas Baldwin, who was making his London début. 28. The Aldeburgh Festival opened with a performance of Britten's *The Turn of the Screw* by the English Opera Group. During the Festival, Alexander Goehr's Suite, specially commissioned for the Melos Ensemble, was heard for the first time and Peter Pears and Benjamin Britten performed Schubert's *Winterreise* song-cycle. Cello recitals were given by Mstislav Rostropovich, who also played for the first time in the new Cello Sonata in C composed for him by Britten. In addition, Rostropovich made his début in this country as a pianist, accompanying his wife, Galina Vishnevskaya. Britten's *Noye's Fludde* was also performed at the Festival. 30. Yehudi Menuhin conducted the last concert in the London

Symphony Orchestra's centenary and series at the Festival Hall.

July 3. At the opening concert of the Cheltenham Festival of British Contemporary Music, Malcolm Arnold's specially commissioned fifth symphony was played by the Hallé Orchestra, with the composer conducting. Other new works performed at the Festival included John Wilks' *Six Pieces* for orchestra, Alan Rawsthorne's concerto for 5 wind and 5 string instruments, a *Sonata da Camera* by the Australian composer, Don Banks, commissioned by the B.B.C. in memory of Matyas Seiber, Banks' teacher, a composition for wind instruments and lower strings by George Newson, Peter Racine Fricker's twelve *Studies* for Piano, Op. 38, played by Lamar Crowson, to whom they were dedicated, Reginald Smith Brindley's five sketches for violin and guitar, William Bardwell's *The Tragic Mask*, settings of six poems by C. A. Trypanis for tenor, oboe, Milanese mandolin and guitar and Alan Bush's Dorian Passacaglia and Fugue for orchestra. 4. The Bach Choir, at their summer concert at the Festival Hall, sang Howells' *Hymnus Paradisi* and Honegger's *King David*. 13. Hans Werner Henze's new opera, *Elegy for Young Lovers*, was performed at Glyndebourne. 22. The 6th series of the Promenade Concerts opened at the Albert Hall.

August 2. Sir Arthur Bliss, on his 70th birthday, conducted his *Colour Symphony* at a Promenade Concert. 20. The Edinburgh Festival opened; at the first concert Leopold Stokowski conducted Arnold Schönberg's *Gurrelieder* with the London Symphony Orchestra, the Edinburgh Royal Choral Union and soloists including James McCracken, Forbes Robinson, John Lanigan, Alvar Liddell, Grébrouwen Brouwenstijn and Neil Rankin. On Aug. 21 the Covent Garden Opera Company presented a new production of Gluck's *Iphigénie en Tauride*. At the Freemasons Hall morning concerts, attention continued to be paid to the works of Schönberg, including his four string quartets, which were played by the Drolc Quartet from Berlin. The London Symphony Orchestra played at the Usher Hall concerts until Aug. 23. The B.B.C. Scottish Orchestra and the Scottish National Orchestra performed there on Aug. 24 and the Berlin Philharmonic Orchestra took their place on Aug. 25. On Aug. 29. Annie Fischer and the Allegri String Quartet gave an evening recital in the Usher Hall. 21. At a Promenade concert, the Glyndebourne Opera Company, whose season had just ended, gave a concert performance of *Don Giovanni*.

Sept. 3. The Three Choirs Festival opened at Hereford; on the following day Dr. Melville Cook conducted Bach's A minor Mass, with the London Symphony Orchestra. On Sept. 5 the morning and evening concerts in the Cathedral included Hindemith's *Requiem for those we Love* and Monteverdi's *Vespers* and in the afternoon Peter Pears and Benjamin Britten gave a recital in the Shirehall. On Sept. 6 Peter Racine Fricker's cantata *The Vision of Judgment* was performed, with Peter Pears and Jennifer Vyvyan as soloists, and the London Symphony Orchestra. 6. At the Promenade Concert a final tribute to Schönberg, who had died 10 years previously, took the form of a presentation of his last work, the cantata *De Profundis*, by the B.B.C. Chorus and the London New Music Singers. 8. Malcolm Williamson, the Australian composer, appeared in a Promenade Concert as the soloist in the first performance of his organ concerto, with the London Philharmonic Orchestra, conducted by Sir Adrian Boult.

DRAMATIC SUMMARY, 1960-1961

An interesting theatrical development of the year was the creation of a repertory company from which were chosen leading actors and actresses for performances at the Shakespeare Memorial Theatre at Stratford-upon-Avon, which, by command of the Queen, became the Royal Shakespeare Theatre, and the Aldwych Theatre, which became the London home of the Stratford centre. The members of the company undertook to give the two theatres the first claim on their services for the next three years and to form the nucleus from which players were to be chosen for productions. The programme for the Aldwych is to consist mainly of new plays and non-Shakespearean classics. The first effort at the London theatre was a presentation of *The Duchess of Malfi*, John Webster's play, and subsequently several members of the company were seen in *Becket*, by Jean Anouilh, which was described by a leading critic as the French dramatist's finest play since *Antigone*. The institution of a National Theatre seemed slightly nearer by the Government's decision to consider a scheme to embrace the Old Vic, the Royal Shakespeare Theatre and Sadler's Wells, and, while refusing to agree to provide more than the sum of £1,000,000 already approved by Parliament towards capital costs, to guarantee an annual subvention of up to £400,000 to cover drama and opera, including ballet, at the three theatres.

The following is a list of productions between Oct. 1, 1960, and Sept. 30, 1961:—

ADELPHI, Strand, W.C.2.—(1960) Nov. 16. *Little Darlings*, translated from the French by Worthington Miner, (Alan White, Roger Dann, Faith Brook, Dawn Greenhalgh and Sally Smith). Dec. 23. *Cinderella*, pantomime by Rodgers and Hammerstein II (Jimmy Edwards, Arthur Howard, Bill Newman, Joan Heal and Janet Waters). (1961) March 16. *The Music Man*, American musical by Meredith Willson (Van Johnson, C. Denier Warren, Alan Thomas and Patricia Lambert).

ALDWYCH, Aldwych, W.C.2.—(1960) Dec. 15. Opened as the London home of the Stratford-upon-Avon repertory company with *The Duchess of Malfi*, John Webster's play (Eric Porter, Patrick Wymark, Max Adrian, Derek Godfrey and Dame Peggy Ashcroft.) Dec. 19. *Twelfth Night* revived (Eric Porter, Patrick Wymark, Derek Godfrey, Max Adrian, Dorothy Tutin and Geraldine McEwan). (1961) Feb. 20. *The Devils*, by John Whiting (Richard Johnson, Max Adrian, Derek Godfrey and Dorothy Tutin). June 12. *The Hollow Crown* (Dame Peggy Ashcroft). July 11. *Becket*, by Jean Anouilh (Eric Porter, Christopher Plummer and Gwen Ffrangcon-Davies). Sept. 13. *The Taming of the Shrew* revived (Derek Godfrey and Vanessa Redgrave).

APOLLO, Shaftesbury Avenue, W.1.—(1960) Oct. 31. *The Importance of Being Oscar*, selections from works of Oscar Wilde read by Micheal MacLiammoir. (1961) Aug. 9. Youth Theatre Season opened with *Richard II* (Richard Hampton and David Weston.) Sept. 7. *The Fantasticks*, musical extravaganza by Tom Jones and Harvey Schmidt (John Wood, John Cater and Stephanie Voss).

COLISEUM, St. Martin's Lane, W.C.2.—(1961) Jan. 28. *Tokyo*, 1961, Japanese musical and dancing entertainment.

COMEDY, Panton Street, S.W.1.—(1960) Dec. 7. *The Tinker* by Laurence Dobie and Robert Sloman (Edward Judd, Richard Gale, Annette Crosbie and Sally Layng). (1961) Jan. 24. *Fairy Tales of New York*, by G. P. Donleavy (Robert Ayres, Harry Towb and Barry Foster). April 13. *The Tenth Man*, by Paddy Chayefsky (David Kossoff, Martin Miller and Valerie Gearon).

CRITERION, Piccadilly, W.1.—(1961) Feb. 13. Three short plays—*A Slight Ache*, by Harold Pinter; *The Form*, by N. F. Simpson, and *Lunch Hour*, by John Mortimer (Emlyn Williams and Alison Leggatt). April 11. *The Irregular Verb to Love*, by Hugh and Margaret Williams (Hugh Williams, John Standing and Joan Greenwood).

DUCHESS, Catherine Street, W.C.2.—(1961) June 7. *Celebration*, by Keith Waterhouse and Willis Hall (Morgan Sheppard, Robert Lang and Gabrielle Hamilton). Aug. 30. *Caesar and Cleopatra*, Bernard Shaw's drama, revived (Alun Thomas and Yolande).

DUKE OF YORK'S, St Martin's Lane, W.C.2.—(1961) Feb. 22. *The Connection*, by Jack Gelber (Warren Finnerty and James Anderson). April 5. *One Over The Eight*, revue (Kenneth Williams and Sheila Hancock).

FORTUNE, Drury Lane, W.C.2.—(1960) Oct. 6. *And Another Thing*, revue (Bernard Cribbins and Anna Quayle). (1961) May 10. *Beyond The Fringe*, written and acted by Alan Bennett, Peter Cook, Jonathan Miller and Dudley Moore.

GLOBE, Shaftesbury Avenue, W.1.—(1961) April 6. *The Rehearsal*, by Anouilh, translated by Pamela Hansford-Johnson and Kitty Black (Alan Badel, Robert Hardy, Phyllis Calvert, Diana Churchill and Maggie Smith). June 1. *Dazzling Project*, by M. J. Farrell and John Perry (Richard Leech, Margaret Rutherford and Joyce Carey). June 21. *On The Avenue*, revue by several authors (George Rose, Beryl Reid, Joan Heal and Marion Grimaldi).

HER MAJESTY'S, Haymarket, S.W.1.—(1961) June 15. *Bye Bye Birdie*, American musical (Marty Wilde, Peter Marshall, Chila Rivera and Angela Baddeley).

LYRIC, Hammersmith, W.6.—(1960) Oct. 24. *Sive*, by John B. Keane (Johnny Cahill, Maureen Pryor and Betty Hardy). Nov. 22. *The Life Of The Party*, by Ray Mathew (Alan Badel, Anthony Booth, Dorothy White and Olive McFarland). Dec. 20. *Hooray For Daisy!*, musical show by Dorothy Reynolds and Julian Slade (Robin Hunter, Eleanor Drew and Dorothy Reynolds). (1961) April 7. *South*, by Julien Green (Denholm Elliott). July 5. *Oh Dad, Poor Dad, Mamma's Hung You In The Closet, And I'm Feeling So Sad*, by Arthur Kopit (Andrew Ray, Ferdie Mayne and Stella Adler). Aug. 8. *Under Milk Wood*, by Dylan Thomas.

MERMAID, Puddle Dock, E.C.4.—(1960) Oct. 6. *Mr. Burke, M.P.*, by Gerald Frow (Peter Clegg, Raf De La Torre, John Turner and Sally Miles). Dec. 15. *Emil And The Detectives*, new adaptation of German play (Gerard Menuhin). (1961) Feb. 16. *John Gabriel Borkman*, Ibsen's play, revived (Bernard Miles and Freda Jackson). April 5. Cycle of the Wakefield Mystery Plays revived (Daniel Thorndike and John Woodvine). June 6. *The Andersonville Trial*, by Saul Levitt (William Sylvester, Maurice Denham, William Squire and John Woodvine). July 26. *The Bishop's Bonfire*, by Sean O'Casey (Davy Kaye, Godfrey Quigley and Annette Crosbie). Aug. 29. *'Tis Pity She's A Whore*, Ford's drama, revived (David Sumner, John Woodvine, Edward de Souza, Patience Collier, Zena Walker and Barbara Barnett).

OLD VIC, Waterloo Road, S.E.1.—(1960) Oct. 4. *Romeo and Juliet* revived (John Stride, Alec McCowen, Judi Dench and Peggy Mount). Oct. 11. *Mary Stuart*, translation by Stephen Spender of Schiller's drama, revived (Robert Harris, John Humphry, Gwen Watford and Valerie Taylor). Nov. 8. *She Stoops To Conquer*, Goldsmith's

comedy, revived (Tommy Steele, Nicholas Meredith, John Humphry, Michael Meacham and Peggy Mount). Dec. 20. *A Midsummer Night's Dream*, revived (Alec McCowen, Douglas Campbell, Michael Meacham and Judi Dench). (1960) Jan. 12. *Ordine* by Jean Giraudoux (Richard Johnson, Leslie Caron, Gwen Ffrangcon-Davies and Sian Phillips). Feb. 14. *Henry IV—Part I* revived (John Stride, Douglas Campbell, Tony Britton and Robert Harris). April 18. *Twelfth Night* revived (Alec McCowen, Michael Meacham, Ioss Ackland and Barbara Jefford). May 20. *The Merchant of Venice* revived (Robert Harris, George Baker, John Stride, Barbara Leigh-Hunt and Rosemarie Dunham). Sept. 19. *King John* revived (Robert Eddison, Maurice Denham and Paul Daneman).

PALACE, Shaftesbury Avenue, W.1.—(1961) May 28. *The Sound of Music*, musical play by Richard Rodgers and the late Oscar Hammerstein (Roger Dann, Harold Kasket, Constance Shacklock and Jean Bayless).

PALLADIUM, 8 Argyll Street, W.1.—(1960) Dec. 22. *Turn Again Whittington*, pantomime (Norman Wisdom, Desmond Walter-Elis, Yana and Thelma Ruby). (1961) May 19. *Let Yourself Go*, revue (Harry Secombe, Roy Castle, Marion Ryan and Audrey Jeans).

PHOENIX, Charing Cross Road, W.C.2.—(1960) Nov. 24. *Out Of This World*, translated by William Weaver from the Italian (Paul Massie, Andre Van Gysegheem, Ferdy Mayne and Odill Versofs). Dec. 22. *The Geese Are Getting Fat*, by Arthur Watkyn (Michael Wilding, Eynon Evans, Bobby Howes, Alice Landon and Joyce Heron). (1961) Feb. 16. *Pools Paradise*, by Philip King (Hubert Gregg, Claude Hulbert, Henry Kendall and Pat Kirkwood). March 23. J. B., by Archibald MacLeish (John Clements, Paul Rogers, Donald Sinden and Constance Cummings). April 12. *On The Brighter Side*, revue by many authors (Stanley Baxter and Betty Marsden).

PICCADILLY, Denmark Street, W.1.—(1960) Oct. 12. *The Playboy of The Western World*. Synge's play revived (Donal Donnelly and Siobhan McKenna). Nov. 10. *Toys In The Attic*, by Lillian Hellman (Ian Banner, Coral Browne, Wendy Hiller and Diana Wynyard).

PRINCES, Shaftesbury Avenue, W.C.2.—(1960) Dec. 19. Season of Gilbert and Sullivan Opera opened with *The Mikado* (John Reed and Gillian Knight). (1961) Feb. 23. *King Kong*, all-African musical by Harry Bloom and others (Joe Mogotsi and Peggy Phango).

QUEEN'S, Shaftesbury Avenue, W.1.—(1961) March 15. *The Lady From The Sea*, Ibsen's play, revived (John Neville, Andrew Cruickshank, Margaret Leighton and Vanessa Redgrave). July 20. *Stop The World—I Want To Get Off*, musical by Leslie Bricusse and Anthony Newley (Anthony Newley and Anna Quayle).

ROYAL COURT, Sloane Square, S.W.1.—(1960) Oct. 13. *Platonov*, translation by Dimitri Makaroff of Chekhov's play (Rex Harrison, Rachel Roberts, Mary Watson, Elvi Hall and Rosalind Wright). Nov. 23. *Trials By Logue*, two short plays by Christopher Logue (George Rose and Mary Ure). Dec. 29. *The Lion In Love*, by Shelagh Delaney (Garfield Morgan, Patricia Burke and Patricia Healey). (1961) Feb. 21. *The Changeling*, by Thomas Middleton and William Rowley, revived (Robert Shaw, Jeremy Brett, Mary Ure, and Annette Crosbie). March 22. *Jacques*, by Eugene Ionesco (Denys Hawthorne and Valerie Hanson). April 19. *Altona*, by Sartre (Basil Sydney, Kenneth

Halgh, Diane Cilento and Claire Bloom). May 30. *The Blacks*, by Jean Gevet (Harry Baird and Vida Deghanar). June 27. *The Kitchen*, by Arnold Wesker (Wolf Parr and Andreas Malendrinios). July 27. *Luther*, by John Osborne (Albert Finney, George Devine, John Moffatt, Bill Owen and Meryl Gourelly). Sept. 12. *August For The People*, by Nigel Dennis (Rex Harrison, George Benson and Rachel Roberts).

ROYALTY, Kingsway, W.C.2.—(1960) Nov. 2. Brief season of revue and cabaret opened by Zizi Jeanmaire. (1961) Jan. 26. *Masterpiece*, by Larry Ward and Gordon Russell (Anton Walbrook and Margaret Leighton). March 9. *The Miracle Worker*, by William Gibson (John Robinson, Anna Massey, Janina Faye and Dilys Hamlett).

ST. MARTIN'S, West Street, W.C.2.—(1961) Jan. 19. *The Bargain*, by Michael Gilbert (Alistair Sim, Peter Copley, George Cole and Helen Christie). May 11. *Time And The Yellow Roses*, by Lesley Storm (Keith Baxter, Dame Flora Robson, Madge Ryan and Patricia Healey). June 28. *You Prove It*, by Colin Morris (Ronald Shiner and Thora Hird). Aug. 17. *Guilty Party*, by George Ross (Donald Sinden, Ralph Michael, Hugh Sinclair, Melissa Stribling and Frances Rowe).

SAVILLE, 135 Shaftesbury Avenue, W.C.2.—(1961) Feb. 6. *Magic Lantern*, Czech entertainment of films and living performers. May 3. *Progress To The Park*, by Alun Owen (Tom Bell, Norman Rossington and Billie Whitelaw). Aug. 23. *The Lord Chamberlain's Regrets*, revue by Peter Myers and Ronald Cass (David Morton, Ronnie Stevens, Joan Sims and Millicent Martin).

SAVOY, Strand, W.C.2.—(1961) May 31. *The Bird Of Time*, by Peter Mayne (Clive Morton, John Bown, Gladys Cooper, Diana Wynyard and Jean Marsh).

SCALA, Charlotte Street, W.1.—(1960) Dec. 16. *Peter Pan* revived (Donald Sinden, Russell Thorndike, Julia Lockwood and Juliet Mills). (1961) June 12. *Electra*, opening of season by the Greek Tragedy Theatre.

STRAND, Aldwych, W.C.2.—(1960) Oct. 19. *Settled Out Of Court*, by Henry Cecil and William Saroyan (Nigel Patrick, Charles Heslop, Eric Pohlmann and Maxine Audley). (1961) May 4. *Belle*, musical play by Wolf Mankowitz and Monty Norman (George Benson, Jerry Desmonde, Davy Kaye, Rose Hill and Virginia Vernon). June 20. *Hamlet* revived (Jeremy Brett, Joseph O'Connor, Robert Eddison and Helen Cherry). July 18. *Goodnight, Mrs. Puffin*, by Arthur Lovegrove (Jack Allen, Kenneth Thorntt and Irene Handl). Sept. 21. *The Affair*, by C. P. Snow (John Clements, Alan Dobie, Geoffrey Lumsden, Michael Atkinson, Ian Shand, Kynaston Reeves, David Horne, Gerald Cross, Peter Copley, Harold Scott and Dorothy Alison).

VAUDEVILLE, Strand, W.C.2.—(1960) Oct. 20. *This Year, Next Year*, by Jack Ronder (Michael Gough, Terence Stamp, Pamela Brown and Brenda Bruce). Nov. 25. *The Bride Comes Back*, by Ronald Millar (Jack Hulbert, Robertson Hare and Cicely Courtneidge). (1961) Aug. 3. *Wildest Dreams*, musical fantasy by Julian Slade and Dorothy Reynolds (John Baddeley, Angus Mackay, Dorothy Reynolds, Anna Dawson and Rosamund Burne).

VICTORIA PALACE, Victoria Street, S.W.2.—(1960) Dec. 21. *Young In Heart*, "farewell show" of the Crazy Gang (Bud Flanagan, Eddie Gray, Nervo and Knox, Naughton and Gold). Dec. 23. *Billy Bunter's Swiss Roll* (Keith Banks).

WESTMINSTER, Palace Street, W.1.—(1960) Dec. 20. *Toad Of Toad Hall*, revived (Gerald Campion.

Richard Goolden, Peter Hughes and John Warner). (1961) June 14. *The Bad Soldier Smith*, by William Douglas Home (Moray Watson and Rex Graham).

WHITEHALL, 14 Whitehall, S.W.1.—*One For The Pot*, by Tony Hilton and Ray Cooney (Brian Rix, Leo Franklyn, Larry Noble and Barry Lord).

WYNDHAM'S, Charing Cross Road, W.C.2.—(1960) Nov. 3. *Chin-Chin*, adapted by Willis Hall from the French, of François Billeloux (Anthony Quayle, Brian Smith and Celia Johnson). (1961) March 29. *Sparrows Can't Sing*, by Stephen

Lewis (Bob Grant, Roy Kinnear, Stephen Cato and Amelia Baynton).

THE REPERTORY PLAYERS produced at the Royalty on Dec. 11, 1960. *Sea View*, by Denys Ives (John Hart-Dyke, Anthony Woodruff and Angela Vale); on Feb. 19, 1961. *Out Of Season*, by Thomas Muschamp (Wensley Pithey, Barbara Mullen and Cherry Morris); on April 30, at the Phoenix, *The Landing Place*, by R. H. Ward (Raymond Huntley, John Stride, Marian Spencer and Gladys Boot); on June 4 at the Lyric, *Race Against Time*, by Robert Elgin.

WIRELESS DEVELOPMENT AND BROADCASTING, 1960-61

INTERTEL

The formation of an international television federation, to be known as Intertel, was announced in London on Dec. 6, 1960. The four members of the Federation are Associated Rediffusion, of London, the Australian Broadcasting Commission, the Canadian Broadcasting Corporation and the National Educational Television and Radio Centre and Westinghouse Broadcasting Company of the U.S.A. A preliminary meeting of the federation was held in Vancouver, at which agreement was reached on the subjects for the first six programmes. The object of the federation is to produce high-quality television programmes aimed at promoting a wider knowledge of contemporary world affairs and better understanding of world problems. World distribution, with audiences between 40,000,000 and 60,000,000, is guaranteed for the programmes. It was agreed that when one of the countries was "emotionally involved" in the subject of a programme, one of the other partners would be responsible for its production.

TELEVISION STATISTICS

The number of combined television and sound licences current in Great Britain and Northern Ireland in July 1961 was 11,484,806, an increase of 43,922 over the previous month. Licences for sound only totalled 3,850,387, including 492,979 for sets fitted in cars.

The figures issued by the B.B.C. for the April-June quarter, 1961, showed that 2,000,000 more people watched television than 12 months previously. On the average day, nearly 32,000,000 people turned on their sets. The average time spent in viewing was 13½ hours a week, the same figure as for the corresponding period in 1960. At all times except during the B.B.C. "Grandstand" programme on Saturday afternoons, more people watched commercial television, the ratio of 63 per cent. to 37 per cent. remaining the same as in the previous year.

BRITISH-U.S.S.R. EXCHANGES

A live television transmission of the May Day parade in Moscow, with Richard Dumbleby as commentator, was shown by the B.B.C. in this country, and on May 14 an agreement was reached between the B.B.C. and the Moscow Central Television Network whereby the Trooping the Colour ceremony on June 10 was televised with a Soviet commentator, direct to Russia from the Horse Guards Parade, together with additional scenes of London and its people. The Soviet authorities chose the Trooping the Colour Ceremony for live transmission in Russia from a number of alternatives offered by the B.B.C., including the Edinburgh Festival and the Farnborough Air Show. The transmission was made through the Intervision and Eurovision networks. The agreement also secured for the B.B.C. exclusive rights for the transmission to Britain of three sporting events taking

place in Russia—the match between Aston Villa and a Soviet national team in the Lenin Stadium, Moscow, on May 18, the Britain v. U.S.S.R. swimming match on May 20-21 and the U.S.S.R.—U.S.A. athletics match on July 15-16.

NATIONAL BROADCASTING DEVELOPMENT COMMITTEE

It was announced in April that a National Broadcasting Development Committee had been formed under the chairmanship of Lord Lloyd. Its aims were stated to be: To support the principle of competition in broadcasting, to press for the raising of the standard of programmes in radio and television, and to study and make recommendations on the impact of programmes on children and young people, and of considering how broadcasting could be further employed in education. The committee included a number of other well-known persons (among them Lord Woolton), most of whom had been associated with the campaign carried on by the Popular Television Association in favour of the introduction of independent television. Bristol and West of England Radio, a commercial television company, announced that it was a founder-member of the committee.

COST OF BROADCASTING

The B.B.C. *Handbook* for 1961 contained some interesting figures on the cost of broadcasting. The B.B.C. television service during 1960, it was stated, cost £15,816,000, its visual programmes costing an average of just over £4,000 an hour. Sound broadcasting, with operating costs running at nearly £12,000,000, was produced at an hourly cost of just under £560. External services cost £5,817,000, or £187 an hour. The B.B.C. spent £9,750,000 in fees to musicians, composers, artists and writers. Of that sum, £580,000 was spent on the Corporation's permanent orchestras, providing full-time employment for about a quarter of all permanently employed musicians in the country. Altogether, more than 56,000 hours of programmes were broadcast during the year by the B.B.C. sound, television and external services.

The handbook also said that an average of over 17,000,000 adults looked at B.B.C. television each day during the first quarter of 1960, and over half the adult population listened to sound radio at some time during the day. It was normal for nearly half the children in the country to be watching television between 5 p.m. and 6 p.m., and almost as high a proportion (including one-third of the 5-7 age group) between 6 p.m. and 9 p.m.

NEW TRANSMITTERS

The new B.B.C. low-power television station, sharing the site of an Air Ministry radio station on the cliffs above Dover, was brought into operation on Feb. 7. It replaced the temporary station which had been serving the Dover area since April, 1958,

and is a combined television and v.h.f. sound broadcasting station.

On June 15, the I.T.A. announced that it was to bring into service at its Lichfield station a mast 1,000 ft. high, to replace the existing one of 450 ft., and a new directional aerial system radiating a maximum power of 400 Kw. to the south, 200 Kw. to the north and west, and 100 Kw. to the east. The combined result was intended to increase coverage from 6,410,000 people to 7,450,000.

THE DUKE OF KENT'S WEDDING

It was estimated that about 25,000,000 people watched at least part of the wedding of the Duke of Kent and his bride, in York Minster on June 8, on television. This figure included many thousands of viewers in France, the Netherlands and Belgium. Reception on the Eurovision network was reported to be entirely satisfactory. The ceremony was covered by the B.B.C. and Independent Television on equal terms. On the following day, a telerecording of the wedding was flown to Australia, and telerecordings were also made available to other Commonwealth countries.

TELEVISION IN WALES

On Sept. 26, it was announced that the Postmaster-General had rejected the B.B.C.'s plans for the early development of television in Wales. The Post Office statement said that it was essential to avoid any action which would prejudice any recommendations which the Pilkington Committee might make for any long-term solution of a unified Welsh television service, or developments in the United Kingdom as a whole. It added that the B.B.C.'s proposals would be reconsidered when the Pilkington Committee's report had been received. The B.B.C. plan had required the allocation of a Band III channel for a new transmitter at Wenvoe to serve South Wales, while the existing Wenvoe transmitter would continue to serve the West of England in Band I.

Meanwhile, the Independent Television Authority stated, on June 6, that it had accepted, subject to contract, an application by the Wales Television Association (Teledu Cymru) to act as programme contractor for West and North-West Wales. The chairman of the association is Dr. B. Haydn Williams, director of education for Flintshire and chairman of the council of the Royal National Elsteddod, and the vice-chairman Col. C. G. Traherne, Lord Lieutenant of Glamorgan. Both the chairman and vice-chairman are Welsh-speaking. The I.T.A. said that the company would in the first instance provide programmes from two stations, one in Pembrokeshire and one in the Llyn peninsula. It was expected that the total population to be covered by the two stations would be nearly 750,000, of whom about 400,000 were estimated to be Welsh-speaking. The stations should be on the air about the end of 1962.

SATELLITE STATIONS

The Wales Television Association was the last independent company to be appointed in completing the I.T.A.'s first service. Further stations which the Authority will open in securing total national coverage of their first network of transmitters will be operated as satellites of existing programme companies, since they will not cover areas large enough to support their own companies. It is expected that about 10 satellite stations will be opened during 1963 and 1964.

LOCAL RADIO

The B.B.C. held one-day programmes in local broadcasting in Bristol, Portsmouth, Norwich,

Hull and Dundee, and although these experiments were regarded as very successful, it was doubted whether the quality of local programmes could be sustained. The corporation therefore began, on Sept. 5, a further experiment, lasting a week, with programmes on closed circuit from the Bournemouth, Christchurch and Poole area. It was arranged for recordings to be heard later by members of the Pilkington Committee. Mr. Frank Gillard, Controller of the B.B.C. West Region, said, at a press conference held in connection with the scheme, that the cost of setting up a local station would be in the region of £15,000 to £20,000, with an annual running cost of £30,000. He estimated that an additional 7s. 6d. on each radio licence would produce enough revenue for more than 100 local stations, and that once permission for these was granted, they could be produced within two years. The B.B.C. pictured a daily programme of four to six hours of local material interspersed with matter from the Home Service or Light Programme. They were hoping to entertain by stimulating an interest in local affairs.

RESEARCH ON VIEWING AND LISTENING

In June, the B.B.C. published a booklet, *Facts and Figures about Viewing and Listening*, compiled by the Corporation's Audience Research Department. The researchers found that an increase in the number of television programme hours in the evening was not followed by a proportionate increase in viewing, and that since commercial television became available there had been very little difference between the amount of time spent in evening viewing by those who could receive both B.B.C. and independent television and by those who could receive only B.B.C. television. From these facts, the compilers inferred that introduction of a third and even a fourth television service would be unlikely to cause an increase in the total amount of time which people devoted to viewing. It had also been found that over the years 1958-60, the number of adult listeners to B.B.C. sound programmes amounted to about 55 per cent. of the population, and had not fluctuated very greatly, in spite of the continuing increase in television coverage. It was thought that even if the time should come when virtually everyone had a television set, the audiences for sound broadcasting in the evening would still be about 1,000,000 persons.

COLOUR TELEVISION

The possibilities of colour television continued to be much discussed during the year under review. In October, 1960, Mr. Hugh Carleton Greene, Director-General of the B.B.C., said that they were ready and very eager to go ahead with a small colour service on 405 lines in Band I. They knew the difficulties facing the radio industry in the design and manufacture of a colour receiver at a reasonable price, but to wait for colour on 625 lines meant that there would be no colour television for a national audience for nearly 10 years. On December 14th, however, the Postmaster-General said that he had been advised against the introduction of colour television in the near future, and on April 19, 1961, in reply to a question in the Commons, Mr. Bevin amplified his views on the subject. He said that the B.B.C. test transmissions were to continue and he hoped that this would help British manufacturers to develop a reliable and less expensive receiver which would not require an imported tube. But he had rejected the B.B.C. application to start regular colour programmes because he took the view that the question of line

definition should be settled first. On May 10, the Postmaster-General reiterated these views, and said that colour television was within the terms of reference of the Pilkington Committee, whose recommendations were expected within 12 months and who might advise a higher line definition. He also said that it was open to the Pilkington Committee to make an interim report on any matter within its terms of reference if it so wished. Sir Harold Bishop, B.B.C. Director of Engineering,

said subsequently that the Corporation would continue its experimental colour work, which early in 1962 would be extended to include work on 625 lines.

Experimental British sets had hitherto used cathode-ray tubes manufactured in the U.S.A., which cost about £65, but it was estimated during the year that a British colour television set could be produced, if there were sufficient demand, for between £150 and £200.

Independent Television Authority

14 Princes Gate, S.W.7

Set up under the *Television Act, 1954*, the Authority is responsible for the provision of television services and for the control and development of independent television in Great Britain; it owns and operates television stations, transmitting programmes provided by programme companies (see below) under contract to the Authority. Independent television is financed from advertising revenue and draws no income from licence fees or from other public funds. The Authority regulates the system under which the programme companies sell time for advertisements and has wide responsibilities for securing proper standards in the programmes. Independent television broadcasting was inaugurated on September 22, 1955, by a programme broadcast from the Authority's station at Croydon.

Weekly Average Production.—The average production of passenger cars rose from 17,261 per week in 1955 to 26,014 in 1960; of goods vehicles from 6,343 per week in 1955 to 8,441 in 1960; and of omnibuses, coaches and trolleybuses from 186 per week in 1955 to 366 in 1960. The average weekly production of these classes of vehicle in the second quarter of 1961 was 21,820, 9,237 and 340 respectively.

BRITISH ARCHITECTURE OF 1960-61

GUILDFORD CATHEDRAL

The need for a new cathedral at Guildford became apparent when the ancient diocese of Winchester was sub-divided into three parts: Portsmouth, Guildford and a smaller diocese of Winchester. At Portsmouth an existing church was readily available to be turned into a cathedral, but at Guildford there was no such church and a new cathedral was inevitable. The final design was the result of an open competition, for which drawings were submitted by 183 architects. Five designs were eventually short listed and the work was finally placed in the hands of Sir Edward Maufe.

Work on the cathedral, which was finally consecrated in May 1961 in the presence of the Queen, the Duke of Edinburgh, Princess Margaret and Mr. Antony Armstrong-Jones began in 1932, only to be interrupted by the war. When work restarted, the sum of money required to complete the building was £740,000 of which all but about £200,000 has been contributed. At the time of the consecration the parts of the cathedral remaining to be built were the sacristy, the lady chapel and garths, and the tower. A "consecration appeal" by means of which it is intended to raise the required amount to put this work in hand was launched at the beginning of May and it is hoped will lead to a speedy completion of the structure.

Sited on Stag Hill, a long spine running west to east, easily accessible from the by-pass on the west, the cathedral commands a view over Guildford city to the east. The highest point of the hill was chosen as the centre of the great tower and a brass flag was inserted in the paving of the cathedral stair at this point. The flat part of the hill was large enough to take the length and breadth of the body of the building and gave a long rising plateau to the west and a steep drop to the east.

The traditional use of brick in the construction of the cathedral made from the clay from the hill on which the building stands has given rise to a strong, even austere, outward appearance. The interior by contrast is more graceful and full of light. Stone was selected for the more exposed parts such as windows and copings, but the traditional structural vault formation of the nave and aisles in keeping with modern building technique is constructed in reinforced concrete to support a copper clad roof. Craftsmanship is evident in the wrought iron screens and the finely engraved glass by John Hutton in the south transept doors. Other artists and sculptors who have already contributed their skill are Eric Gill, the designer of the eastern sculpture, Vernon Hill, who is responsible for many of the stone figures and John Cobbett, who has completed his *Madonna and Child* in stone on the north side of the nave.

THE UNIVERSITIES

Halls of Residence

The unprecedented expansion programme of university education taking place in Britain today, requires not only new teaching accommodation, but a vastly increased amount of living space for students, only a small proportion of whom can be housed in lodgings. The appropriate answer is the hostel or hall of residence, and most universities are now actively considering the erection of such buildings as reasonably near the main university buildings as it is possible to find sites. Several of these buildings show originality of thought and

quality of design indicating the tendency to plan buildings for a purpose which is more than mere dormitory accommodation, providing self-contained units with social as well as living space in character with the resources familiar in the residential colleges of our older universities.

One such building is College Hall, Leicester, designed by J. Leslie Martin in association with Trevor Dannatt. Built within easy reach of the central university building it accommodates 170 students, a warden, bursar and academic and domestic staff. The three residential blocks are planned around two linked courtyards, with a social block placed to form the fourth side of both these courtyards. The residential blocks three storeys high contain study bedrooms of an average 115 sq. ft. in area, planned generally in groups of eight related to service accommodation. The social block is designed around an open ended internal court. The social rooms consisting of junior and senior common room, main dining hall and library, are planned on the ground floor with warden's flat, music rooms, games rooms, and accommodation for the bursar and senior domestic staff on the upper floor. These rooms, approached by public or private staircases, are planned as a series of roof pavilions separated by terraces. A large terrace adjacent to the music room can be used for outdoor concerts.

Another good example of this type of residential building is to be found at Southampton University. Chamberlain Hall, designed by Basil Spence and Partners, provides accommodation for 150 women students, each having her own study bedroom, containing built-in wardrobes, and a dressing/desk/food cupboard-unit with shelves above it along one wall. The general accommodation is very similar to that at Leicester, but the aspect from the social building is on to a more open courtyard, furnished with a pool, paving, grass and flowers.

Educational

The academic building programme meanwhile proceeds unabated. Continued emphasis is being placed on a high level of scientific education which has given rise to new architectural concepts involving more advanced techniques of building technology.

A very fine example of contemporary thought envisaging an application of advanced building methods is exemplified in the new Institute of Mathematics at the University of Liverpool.

This new building, due for completion in the autumn of 1961, is designed to house the department of mathematics and oceanography, and in addition a central boiler house for the adjoining new university precinct.

It had to be designed to come within the price limit of £5 per square foot set by the University Grants Committee. To do this and still achieve a worthy environment for learning in the middle of a slum clearance area, meant that the users' requirements had to be most carefully arranged to eliminate waste space in circulation areas and the entire structure was studied to enable structural elements to play their part without further expensive coverings. The special interest of this building lies in the way this has been done. It is important to realize that the effect of atmospheric conditions on this particular site was the underlying motive for the finishes chosen. In spite of clean air schemes, Liverpool still has a fairly dirty atmosphere. It is humid and smoke from the docks drifts over the city. On this particular site the

condition is aggravated by smoke from the adjacent railway cutting. This kind of atmosphere not only reduces contrasts in the colours of materials but also makes smooth flat surfaces look smeary.

Before designing the building at all, the architect, Bryan Westwood of Bryan and Norman Westwood and Partners, looked at the old Cunard Building on the Pierhead at Liverpool, which is a supreme example of weathering which has taken place in such a way as to enhance the architecture. Bearing this example well in mind, the architect set about choosing materials which are intended to be effective when dirty, but at the same time endeavouring to make certain concrete elements as dark as possible and others very light.

A very high building did not appear to be appropriate for this scheme because of the difficulty of massing large numbers of students at certain times. A balance had to be struck between freeing space on the ground and excessive expenditure on vertical circulation. Almost 55 per cent. of the ground is left free and savings made by the design approach are being used in landscaping the building. To add to the feeling of space at ground level, the ends of the buildings are cantilevered and the main approach passes under a low block. The main block rises six storeys above ground level, with a boiler house 20 ft. deep going down to rock underneath. Laboratories for the department of oceanography are planned in a single storey wing linking the high block at the rear of the site with a two storey block on the main frontage, containing a computer and ancillary rooms.

The penthouse on the roof and the computer room at the end of the two storey block both have timber hyperbolic paraboloid roofs, which are interesting architectural forms, at once decorative and satisfying in themselves and need no further treatment.

The external surfaces of the concrete elements are finished in special ways and do not necessitate the use of applied cladding or further finishes. The spandrel panels were cast in polystyrene moulds and have a very smooth finish. They are moulded in the form of tetrahedrons in a mixture of white Cornish granite and white cement, and are expected to keep clean on their upper surfaces and become darker on those protected from the rain. On the end walls, very large tetrahedrons in reconstructed Bath stone have been used and are already showing evidence of this effect, with parallel dark streaks on their under surfaces. A pond to reflect the walls of the high block has been framed in concrete, and the surfaces of the walls generally at this level have been covered with small strips of marble giving a textured finish of very high quality.

Inside the main entrance hall, black sculptured concrete designed by Eric Peskett has been used on the wall facing the entrance, giving a contrast of plain shiny surfaces and rugged sculptured ones. On the south wall of this hall, John McCarthy has prepared a series of some fine composite panels in *red ierosa ferrata*, representing, in various groups, the essence of mathematics. The subject matter of the panels was well debated among the professors, and their interpretation into decorative art forms which satisfy both artist and mathematicians, is a remarkable achievement.

Another distinctive group of buildings setting a high standard for the rest of the current University building programme is the extension to the Sanderson Engineering Laboratories for the University of Edinburgh. In designing this extension to a building which presents a heavy and rather institutional character, the architect, R. Gardner-Medwin, in association with Stephenson Young and Partners, has aimed at articulating

separately the integral units of the same building to provide workshops and laboratories for electrical and structural engineering and new teaching and staff accommodation for the whole department. The steeply sloping site, having a fall of some 15 feet, has been exploited by forming a sunken court. This forms an enclosure for the students' common room on the lower ground floor and out of the pool in the court springs the plastic form of the reinforced concrete lecture theatre. A light steel and glass bridge, linking the theatre to the main hall in the classroom unit, allows heavy demonstration material to be wheeled into the theatre from the workshops without any change of level.

The two storey laboratory and drawing office unit is constructed in exposed welded steel, lightly clad in plywood and aluminium. In contrast the five storey library and classroom block has a reinforced concrete frame clad on the ends with mosaic-lined brick and window spandrels with grey stone enamelled insulated panels. The lecture theatre itself is also in reinforced concrete, the upper part clad with hardwood planks, the lower section expressing the self finished plastic nature of the constructional form.

Expressing in full the nature of engineering, the structural system is everywhere apparent, the plasticity of the concrete contrasting with the precision and elegance of steel and glass to symbolise the range of modern structural engineering coupled with architecture.

HOUSING

On looking around the country it is encouraging to find that an increasing number of speculative builders and developers do mind about good architecture and are commissioning good architects to work for them. Eric Lyons has recently completed 51 houses at Waldegrave Park, Twickenham. Laid out round an informally shaped green, restricted to pedestrians and with car parking areas dispersed around the site, the two storey houses have no private front gardens. The central space is designed as a single landscape and each house has a small enclosed back garden only giving on to a rear access road. All the trees existing on the site have been retained and many more planted, and a variation of ground-pattern created by areas of formal paving, turf and shrubs. Again at Blackheath, Eric Lyons has shown how flats and houses can be integrated on the gentle slopes below Blackheath Park.

Sixty flats at Cambridge designed by James & Bywaters on a site near Churchill College, echo the current trends. Their scheme of 5 three-storey blocks of 12 flats each is planned round two garden courtyards, with 30 garages in three separate blocks at the rear, suitably screened by walls and trees.

In contrast perhaps, but none the less enlightening, is an apartment building, erected in London's West End, on a site facing Queen's Walk on the east side of Green Park and approached from St. James's Place, where there are some extremely good examples of Georgian architecture. This block of luxury flats designed by Denys Lasdun & Partners, is worthy of the highest commendation, and was, in fact, awarded the London Architecture Bronze Medal for 1960. One aim of the design was: "To produce a building of our time, which would, in terms of urban renewal, concern itself with the relationships between buildings of historic interest and modern architecture." Time itself will, of course, be the proving factor, but meanwhile it is obvious to all, that Spencer House (1756-65) designed for Earl Spencer by John Vardy, occupy-

ing the adjacent site, coexists admirably with its new neighbour.

Accommodation includes garage space for 12 cars, caretaker's flat, entrance hall, four large apartments with 13 ft. high living rooms, two smaller apartments, one apartment on the ground floor with a garden, and one apartment as a pent-house on the seventh floor with its own roof garden above. The resulting external architectural treatment is a direct expression of the internal spatial organisation, modulated only by the position of structural columns and service ducts. The reinforced concrete structure is faced externally with $1\frac{1}{2}$ in. thick Baren's grey granite with white vitreous mosaic on the soffits. There are concealed gutters at all floor levels over the entrance hall to deal with watershed, window sub-frames all made from bronze sections, and the roof parapet incorporates a track for a travelling cradle to facilitate window cleaning and other items of external maintenance.

On an immensely larger scale, the housing development at the New Town of Peterlee, embodies much of the pioneer instinct expressed by Eric Lyons and exemplified by Denys Lasdun and others. Much has been written about the social and architectural inadequacies of the suburban style of housing which comprises the greater part of the residential areas of the new towns—inadequacies which are shared by housing estates all over the country—but are more disappointing in the new towns. Situated in the coal mining area of the county of Durham, the new town of Peterlee was begun in 1948 and has had a succession of chief architects. In 1955 the general manager of the Peterlee Development Corporation, Mr. A. V. Williams, conceived the idea of collaboration between two young architects Peter Daniel and Frank Dixon and the painter Victor Pasmore, who together formed a planning and design team responsible only to the general manager and the chief architect. They were given the task of developing about 300 acres, called the South West Area, which is separated from the remainder of the town by unstable land which can not be built on. The team evolved a plan for the development of the area, which was accepted by the Corporation in 1957 and construction of the first 218 houses began in 1958 with a further 170 in 1959. These 388 houses forming the first major section of the area and others which are following, have achieved a rare freshness of treatment and a fine balance of unity and variety, combined with a patterned grouping which has provided usable outdoor pedestrian space yet preserved a built-up character of its own. The mass of the buildings contrasts with the landscape, which remains completely rural in character, with the lined hedgerows and plantations through which winds a deep forested ravine, widening to the sea.

Contrary to the usual practice, the first housing layouts were not entirely conceived on paper, but emerged from laying out scaled wooden blocks on a workshop floor. These blocks were followed by a series of scale models and the whole process of manipulating these models brought about a means by which painter and architects were able to develop their ideas together.

Housing groups are planned about spine service roads which in turn join other roads which focus on small shopping centres giving access to the remainder of the town. The first major group provided 14 different house plans showing the maximum degree of flexibility in living arrangements. Most houses have but one entrance providing access to a living room adjoining a kitchen and a sitting room which can easily be closed off

from the remainder of the house. The staircase opens off the living room most attractively to give access to the two or three bedrooms and bathroom over. Each house has access to its own private patio, screened to serve as a private extension to the living area. There is an enclosed space where children can play safely under supervision, as well as providing the necessary space for storage of prams and bicycles and for drying clothes.

The importance and effectiveness of tree planting in the landscaping of the area is obvious to any visitor. It is estimated that over 1,500 trees have now been planted either as informal groups on the southern boundary or as lines of trees asymmetrical in depth on the western boundary, designed to limit the two opposing housing groups. Trees too provide shelter from the coastal wind and define the outline of each section of housing, occasionally in short lines aiding the transition between the open spaces and the land dominated by houses and roads.

GENERAL OFFICE BUILDINGS

Almost daily it seems, the London skyline changes as new tower blocks rear up from the jumble and chaos of our city streets. Many of the new buildings are erected purely upon a speculative basis to satisfy the ever-increasing demand for office accommodation. Others, such as the new Vickers Armstrong building at present in the course of erection at Millbank and the controversial Shell building nearing completion on the old Festival of Britain site can claim to come under the heading of prestige buildings. One such office tower has been recently completed for Radiation Limited, a group of companies manufacturing domestic appliances, who in the past have had their many administrative offices and sales organisations scattered around central London. Conforming with the current official planning policy regarding the location of new office buildings, the siting of the new building on the North Circular Road at Neasden made possible good road communication with the group's factories while still remaining within easy reach of central London. The restricted nature of the site, owing to existing buildings and planning restrictions, was one of the factors which convinced the architects, Dennis E. Pugh & Associates, of the necessity to build upwards. The resulting graceful 13-storey tower, 169 ft. high, gives a new vertical emphasis in relation to the North Circular Road, and by relieving the absolute monotony of the existing uncontrolled two-and-four storey development in the surrounding area, has set a new standard in London's fringe development.

In complete contrast, the redevelopment of the central areas of London has given rise to many vast new multi-storied office buildings. Typical among these is State House, built for the Wohl Group of companies at a cost of over £1,250,000. Dominating High Holborn, the building covers a total nett floor area of approximately 282,000 square feet with garage facilities for more than 100 cars. A unique feature of the design devised by the architects Trehearne and Norman Preston & Partners, lies in the first large scale use of Portal Frame construction enabling the coverage of large floor areas with virtually no obstruction from intermediate supporting structural columns.

Even this immense structure has been eclipsed in size by St. Christopher House, Southwark. Erected for City and General Investments Ltd. under the direction of Morris De Metz, this building is claimed to be the largest office structure in Europe, with 18½ acres of floor space and over

2,000 offices. It stands between Southwark Street and Zoar Street and consists of two 11-storey blocks and one of 14 storeys placed in parallel with one another. The three blocks are joined together by short wings placed at right angles and at the south eastern corner of the site is a separate six-storey block with shops occupying the ground floor. The structure is one of reinforced concrete, set upon piled foundations. Each block is 44 ft. wide with a 6 ft. central corridor supported on two sets of columns 16 ft. apart on either side, the outer columns being set back 2 ft. 6 in. from the outer face of the building. The finishing materials on the main façade are an exposed aggregate of green Criggin granite set between thin precast mullions of reconstructed Portland stone which contrast with the exposed aggregate of dark red harden stone used on the flank walls.

HOTELS

The Carlton Tower, Knightsbridge, designed by Michael Rosenauer, is worth noting as a successful venture of the Hotel Corporation of America. Built at an approximate cost of £2,000,000, this luxuriously appointed building, rising 16 storeys above street levels, contains 318 rooms with accommodation for about 450 guests, including a ballroom for approximately 450 dancers and an underground garage with parking space for 75 cars.

The 180 or so guest rooms contained in the Oriol Hotel at London Airport, fulfil a long outstanding need for hotel accommodation in the area. The need to accommodate travellers for short periods at a point close to the airport was recognised as far back as 1957, but the first designs prepared then by the architects, Russell Diplock and Associates, have little resemblance to the completed building. In fact at that time, the architects were briefed to prepare plans for a "motel" catering for motorists using the Bath Road. Many changes were made before the final drawings were prepared in 1959, by which time the present site had been acquired and the basic idea of providing partial "motel" accommodation had been abandoned. The unusual circular plan shape was maintained, but at a reduced overall diameter of 176 ft. An inner ring of single rooms and an outer ring of double ones open off the central corridor on each of the three upper floors. Since only one of the double rooms faces due north, the aspects of all are considered to be equal, facilitating the problem of letting. It was also discovered that only a small proportion of the rooms would be facing the starting point of the aircraft runway and be affected by the direct sound waves of departing aircraft. To combat the noise further, double windows were provided to all rooms. These need be opened only for cleaning purposes, since each bedroom has full air conditioning from a higher velocity system.

THE DUNGENESS LIGHTHOUSE

The new Dungeness Lighthouse, the first major Trinity House lighthouse to be built for over 50 years, which was designed by Ronald Ward and Partners, was completed in 1960 at a cost of approximately £35,000. The 130 ft. high tower is mounted on a white concrete spiral base in the form of a ramp enclosing the machine room. The slenderness of structure was achieved by using prestressed concrete units giving rise to a wall of only six inches in thickness. The tower, 12 ft. in diameter, was erected as a series of concrete drums each 5 ft. high, placed one on top of the other. High tensile steel prestressing wires were then

threaded through the walls from top to bottom and tensioned with powerful jacks. In appearance the tower presents the traditional black and white banded colour scheme, made permanent by the use of coloured cement and special aggregates.

COVENTRY DANCE HALL

It is not often that a mere dance hall achieves architectural significance, owing largely, no doubt, to the lack of thought which has hitherto attended the erection of such structures. When, however, the building is incorporated in the central precinct of a city, by the city council, then one may expect a certain purposeful attention to detail and ultimate effect. In planning such an addition to the centre of Coventry the city architect, Arthur Ling, aimed at bringing life and movement back into the pedestrian shopping area after the shops have closed for the night. The dance hall block is in the middle of the shopping area and completes the development at the intersection of the two main pedestrian precincts. Indeed shops occupy the basement, ground and first floor areas, with service access from the rear and the dance hall itself, on the second floor. To avoid any obstruction of the shops themselves and to emphasise the singularity of the dance hall entrance, a glass and steel entrance tower stands in front of the main building and is linked to the foyer on the second floor by a footbridge.

The general massing of the main building conforms to the character of the precinct, but to emphasise the dual function of the building the treatment of the façade has been differently handled. Above the canopy, the shops are faced with Portland stone, which forms a base plinth to the hall over them, from which it is separated however by a continuous glazing strip. The dance hall itself is outlined by bands of white Sicilian marble and is faced with panels of brickwork set against a background of brightly coloured mosaic set in an abstract pattern, designed by Fred Millet. A series of lighting units has been incorporated, which after dark provide a fine pattern of illumination and combine well with the vertical movement visible within the fully glazed light shaft and entrance tower.

N.U.M. HEADQUARTERS

Designed by Molret & Wood, the new headquarters building of the National Union of Mine-workers stands on a site in Euston Road, previously occupied by a terrace of the original Euston Road houses. The size and shape of the building was strictly controlled by angles of light and plot ratios, but although planning is tight, internal spaces nevertheless seem generous in comparison with the building, especially in the luxuriously appointed boardroom and its associated lobby, which have been taken through the height of two storeys.

The building was constructed generally in reinforced concrete, which is exposed at the rear and painted. The front elevation however, in rich contrast, is clad in Swedish grey granite in a rough sawn textured finish with contrasting green slate and white marble decorated trim. Projecting window frames are in polished Devon granite, while the grillwork motifs at ground floor have been carried out in contrasting black Swedish granite, penetrated by the white marble walls flanking the main entrance hall, which is paved with a green serpentine marble. Internally the vestibule walls are finished in a grey marble with Ashburton pier facings, offsetting a sculptural relief by Professor Edmund Moiret.

SCIENCE, DISCOVERY AND INVENTION IN 1961

EXPERIMENTS IN SPACE TRAVEL

The exploration of space, which was begun in the International Geophysical Year, was continued with greater intensity during 1961 by British, American and Russian scientists, acting, as before, in friendly co-operation. Other countries have joined in this important work. For instance, a 210-foot radio telescope, weighing 900 tons, has been built 230 miles west of Sydney, which is expected to discover new galaxies in the southern skies hidden from British and American observers.

Russia has the credit of the most startling work in space exploration. At 9.07 a.m. Moscow time, on April 12 the Soviet Union sent the first man into space in a spaceship weighing more than 4 tons. One hundred and eight minutes later, after circling the earth once 27-year-old Major Yuri Alexeyevich Gagarin landed at a predetermined spot in the Soviet Union. At 9.22 he was over South America; at 10.15 he was over Africa, untroubled by weightlessness. Ten minutes—and 2,800 miles—later he was approaching his own country and on the way down. He had not even a bruise to show for his landing. The Government issued a statement proclaiming Russia's lead in the space race and appealing for world peace and disarmament.

During the flight Gagarin kept check on the radio, television and recording equipment designed to give a complete account of his behaviour in space.

Describing what he saw from the Vostok spaceship, Major Gagarin said: "The day side of the earth was clearly visible. The coasts of continents, islands, big rivers, big surfaces of water and structural features were clearly distinguishable." Flying over Soviet territory he could see distinctly the big squares of collective farm fields and distinguish ploughed land from meadows. He saw for the first time the earth's spherical shape. "It is possible to see the remarkably colourful change from the light surface of the earth to the completely black sky in which one can see the stars. This dividing line is very thin, just like a belt of film surrounding the earth's sphere. It is of a delicate blue colour. When I emerged from the shadow of the earth, the horizon looked different. There was a bright orange strip along it, which again passed into a blue hue and once again into a dense black colour. I did not see the moon. In space the sun is shining ten times brighter than on earth. Stars are bright and distinct."

Major Gagarin said that when weightlessness appeared, he felt excellent. Legs and arms weighed nothing. "Objects are swimming in the cabin, I did not sit in the chair, I was suspended in mid-air. During the state of weightlessness I ate and drank, and everything was like on earth. Handwriting did not change, though the hand was weightless. But it was necessary to hold the writing block, as otherwise it would float away from the hands. I was in communication contact on various channels, using a telegraph key. Weightlessness has no effect on the ability to work. The passage from weightlessness to gravitation happens smoothly. I ceased to be suspended over the chair, but sat in it."

A more remarkable feat was accomplished by Major Gherman Stepanovich Titov, 26 years old, who became Russia's second space man by spending August 6 whirling round the earth in egg-shaped orbits in a 4½-ton spaceship named Vostok II. When he landed safely on August 7 he had spun 17 times round the earth in 25 hours 18 minutes—a journey of 435,000 miles, as far as the moon and back. During the journey he had gone to bed for a 7½-hour sleep as he journeyed at 110 to 160 miles above the earth. He had a good supper before going to bed. Earlier he was reported to have had a three-course luncheon.

To get any sleep in his condition of weightlessness Major Titov would presumably have to strap himself to his padded couch, otherwise he would float uncontrollably about in the cabin, where the temperature was at about 60 degrees Fahrenheit—as warm as an average English summer day. He was reported to have taken personal control of the spaceship. Moscow radio said he tried the controls and the ship responded perfectly.

Short bursts of speech in Russian were picked up at Jodrell Bank in the morning and again in the afternoon, when the spaceship was calculated to be

about 160 miles above London. Other signals, which lasted for nearly half an hour, were heard at Tatsfield.

Sir Bernard Lovell, director of Jodrell Bank, said that, provided there were no unforeseen biological effects resulting from this prolonged exposure in outer space, the flight would be followed in a few years by an attempted night to the moon.

American scientists continued their efforts to send a man into space. A chimpanzee named Ham survived a flight in a spacecraft to a height of 155 miles, though the landing area was overshot and the capsule floated in the sea for three hours until it was recovered. The chimpanzee was picked up alive and well 420 miles from Cape Canaveral. Ham, selected from six chimpanzees trained to manipulate simple controls when lights are flashed during flight, carried out his duties while travelling at 5,000 m.p.h. The test was planned to ensure that a human being could survive space flight, think clearly, and perform useful functions in the weightless void, before an astronaut attempted to orbit the earth.

Commander Alan Shepard was the first American astronaut on a flight through space on May 5. He was launched from Cape Canaveral and was recovered from the Atlantic 15 minutes later 302 miles away. In a conference on the medical results of his flight, he said that his sight became blurred for a short time because of head vibration sufficient to prevent him being able to read the instruments on his Mercury space capsule. The doctors reported that he was physically well and there was no disturbance in his thought or intellectual functions as a result of his flight. It was disclosed that he performed all the 27 spacecraft control and 78 radio reporting tasks given him. His pulse rate jumped from 80 during the countdown, to 138 as the rocket climbed to its top speed of 5,036 miles an hour; his breathing varied between 15 and 40 breaths a minute. His responses to five minutes of weightlessness and gravity forces up to 14 times the normal were within the limits of intact functions.

It has since become known that Commander Shepard travelled for a minute or so behind a white-hot mass of air comparable in temperature with the radiating surface of the sun, and that he and his capsule were saved from being vaporized by "sacrificial cooling." As the outer layer—formed of fibre glass bonded with plastic—is reduced to vapour it carries heat away from the capsule and provides a partial screen between the white-hot air and the capsule.

The United States launched its second man into space on July 21 but lost some of the information it had hoped to gain when the capsule sank after landing by parachute in the Atlantic. Captain Virgil Grissom, the 35-year-old astronaut who made the flight, was forced to swim from the capsule when water poured in through the escape hatch, and he was picked up by helicopter two minutes later.

Until the landing Captain Grissom's flight was as successful as Commander Shepard's had been. The flight lasted 16 minutes (compared with 15 minutes by Commander Shepard), and it took Captain Grissom 118 miles high (compared with 116) and 303 miles out into the Atlantic (one mile farther). The space capsule reached a top speed of 5,310 miles an hour (compared with 5,100), and Captain Grissom had five minutes of weightlessness.

Soon after watching the space journey on television, President Kennedy signed the Bill which authorizes N.A.S.A. to spend \$1,784,300,000 (about £630m.) on space research in 1962. The Bill was passed without any reduction in the amount which the President had requested for the first year of the space programme designed to send a man to the moon before the end of this decade. Some American astronomers have gone so far as to say that they might put a team of three men on the moon by 1967.

In February, messages, consisting of telegraph and teleprinter signals, were sent from Jodrell Bank to Australia by way of the moon. The first message was "Jodrell Bank testing. The quick brown fox jumps over the moon."

While astronauts have been busy on their voyages into space, a view that the universe is constantly evolving has been put forward by Dr. Martin Ryle, F.R.S., Professor of Radio Astronomy at Cambridge.

Since 1948 two contradictory theories of the universe have been in the minds of astronomers. The first is of an evolving universe, born at a definite time in the past and likely eventually to die. The second is that of a "steady state" universe, which started with a bang 10,000 million years ago and will always exist in its broad features. British scientists claim to have disproved the "steady state" theory and to have shown that the universe is expanding. One possible explanation they say, is that thousands of millions of years ago all the galaxies were compressed into a very much smaller volume, that an explosion took place and that, since then, the parts of the Universe have been flying apart.

Eight workers at the Mullard Radio Observatory, Cambridge, under Professor Ryle, carried out observations which have taken them 8,000 million light years into space. They suggest that matter far away is more concentrated than that which is closer to us. This was in contradiction to the "steady state" theory.

In 1948, three Cambridge astronomers, Bondi, Gold and Hoyle, proposed a theory according to which the universe has no beginning and no end, matter is being continuously created and continually condensing to form new galaxies to replace those which speed out of sight. Wherever one looked in the universe things would be much the same, with much the same density of matter.

Under theories of an expanding universe, this would not be so. Light takes so long to travel from far distant objects, that when we look vast distances we see things as they were epochs ago, and, according to the theories, when the universe was much more concentrated.

The possibility of checking theories by such observations has been realized for some time, but it

had not been done because one would need to look much farther than was possible even with the Jodrell Bank radio-telescope or the 200-in. optical telescope at Mount Palomar.

This is what Prof. Ryle and his workers claim to have done, using a radio-telescope quite different from the moveable-reflector type at Jodrell Bank. There is an aerial 1,450 feet long, and another smaller one, which moves on tracks, about half a mile away. The effect is to simulate two large aerials each 850 ft. by 250 ft.

At 10,000 million light years, galaxies would be receding faster than the speed of light. By analysing signals received from about 1,000 radio sources, each about a million times as bright as our own galaxy, Prof. Ryle concluded that radio sources were much more concentrated there, that the "steady state" theory was wrong and that the universe was expanding. He believed his discoveries will do much to change cosmology from a philosophical study to a science. The next thing is to find out what sort of expanding universe we lived in. Even on the pulsating theory, which says the universe starts from an initial explosion, expands to a certain distance and then contracts back for another explosion, we should be all right for another ten thousand million years at least.

ABU SIMBEL TEMPLES.—After final tests by independent experts, the United Arab Republic decided to adopt the Italian plan for raising the two rock-hewn temples at Abu Simbel about 190 ft. to save them from inundation by the waters of the Nile High Dam. The project is expected to cost about £25m. and will take eight years, starting in January 1962. An alternative was the French plan, which envisaged building a dam in a wide sweep around the façades of the temples—that of Rameses II and Queen Nefertari. President Nasser said that the lifting project had been chosen as the surest means of keeping intact the two temples. International co-operation was needed if the Nubia salvage programme were to be carried out in the time available, and the United Arab Republic would contribute over the next seven years £9m. towards the cost. Two Norwegian experts and one Swede had carried out tests on the effects of vibration on the rock of the temples, and on the temporary concrete box in which they would be lifted; the process of lifting by hydraulic jacks; and the effects of wind and sand erosion on the colossi outside the temples once they were in their new position. The lifting would be done in two stages: the pre-elevation work, such as cutting the temples (they are estimated to weigh 300,000 tons and 150,000 tons) from the cliff and surrounding them by a concrete casing, which would take from January 1962 until November 1965, and the elevation—from November 1965, until the end of 1968. Two oases will be made, one on the west bank plateau behind Abu Simbel, and the other farther north, at which will be grouped some of the temples which can be transferred from their present sites.

ACCURATE RELIEF MAPS.—A new technique for the production of extremely accurate relief maps has been introduced by the Clarendon Press. These maps, to the scale of 16 miles to the inch, are produced by a vacuum forming process in which a thin plastic sheet is drawn over a relief mould under vacuum and made to assume the contours and depressions of the mould. Before the first maps can be made the moulds must be accurate enough to give a map correct in every detail. After various trials a technique using moulds made from Shell Epikote resins was found to be suitable. There are three main stages in the manufacture of a relief

mould. The mapmaker builds up a detailed relief map using small pieces of plastic and Plasticine, which is used as the model for the master mould this being cast in an Epikote resin composition. The master mould is used to reproduce as many relief moulds as may be required; these again being moulded in a resin composition. They can be used repeatedly in the vacuum forming machine.

ASTRONOMICAL CLOCK 600 YEARS AGO.—The first astronomical clock to be produced in Britain for 250 years was shown at the Science Museum, South Kensington. It is an exact reproduction of a clock designed nearly 600 years ago by the Italian savant John Dondi, a Professor of Logic, Medicine and Astronomy. During 1348 to 1364 he constructed the first clock to show, besides mean or clock time, the sidereal or star time and the motions of the sun, the moon and of the five then known planets, all driven from an ordinary weight-driven movement. It was made of brass and involved most delicate and intricate gearing. This is more extraordinary since the weight-driven mechanical clock was invented only about 50 years before and was then a clumsy, forged-iron affair. Besides the motions described, the clock records the hour, the minute, the length of daylight, the Saints' days, the day of the month and the rising and setting of the sun. It has a dial to record the motion of the nodes, of which the hand makes one revolution in over 18 years; and a perpetual mechanical calendar for Easter, an achievement not paralleled for 500 years. The clock remained in Italy until 1585 and then in Spain till 1809, when it was destroyed in the Peninsular wars. Fortunately Dondi left a full description of it, in Latin, with working drawings, but no one examined it, horologically till the late G. H. Baillie had it translated in the 1930's. Mr. H. Alan Lloyd completed Baillie's work and undertook the reconstruction of the clock. The ultimate destination of the clock is the Smithsonian Institute, in Washington.

AUSTRALIA'S NEW DAM.—The opening of the Warragamba Dam near Sydney marked the end of 14 years' work to provide Australia's largest city with more water. The dam is the third stage of a long-term programme to develop the water resources of the 3,383 square mile catchment area of the Warragamba River and its tributaries.

The dam, the highest in the Southern Hemisphere, is of the straight gravity type in mass-concrete, with a length at the top of 1,000ft., a height of 380ft. and a width at the base of 340ft. It contains 1,600,000 cubic yards of concrete. When the storage is filled to capacity, a lake will be formed stretching back for 36 miles and impounding 460,000 million gallons of water for Sydney.

On the dam spillway crest are five Glenfield gates; a 90ft. wide, 25ft. deep drum gate, similar to those supplied for the Pitlochry and Clunie dams in Scotland, and four 40ft. wide, 43ft. 9 in. deep radial gates. They are the largest of their type yet made in Britain and among the largest in the world. The purpose of the gates is to retain the maximum storage capacity of the reservoir and to allow the automatic release of surplus water during flood periods while maintaining the upstream level constant. Together they can pass a maximum flow of 2,800,000 gallons per second.

BABIES UNBORN MEASURED.—A new line of research on which scientists worked in Glasgow enables doctors to measure the heads of unborn

babies. A machine, somewhat like the echosounding apparatus used in ships, suggests that it may be possible to estimate the size of the unborn baby's head to within about a twelfth of an inch.

The research work, carried out under the Scottish Western Regional Hospitals Board, is designed to help physicians when they expect difficult births because of the narrowness of the pelvic opening.

A pulsed ultrasonic beam is directed through the abdomen and is absorbed, scattered, or reflected depending on the nature of the material through which it passes. Doctors have obtained echoes simultaneously from each side of the unborn baby's head. The echoes are automatically photographed when they appear and the head diameter of the baby can then be obtained by measurement of the photograph.

BALLISTIC MISSILE WARNING.—With the completion of B.M.E.W.S. (ballistic missile early warning system) which has stations in Alaska, Greenland and Yorkshire, and has cost a billion dollars, the North American continent has the most elaborate radar defence in the world.

Supporting B.M.E.W.S. is the Distant Early Warning Line (D.E.W.) which runs on the northern rim of the continent; 600 miles south is the Mid-Canada Line, and behind this the Pinetree line of radars built and operated jointly by the United States and Canada. This covers the whole of southern Canada, and it is supported by a network of radar stations within the United States itself.

The United States "contiguous radar system" is supported by ships and radar aircraft in the Pacific and the Atlantic. In the Atlantic there are a number of Texas Tower radar stations, each 60 to 80 miles off-shore, which can instantly transmit warnings of air attack to the North American Air Defence Command in Colorado. It is calculated that the American radar chains would give at least half an hour's warning, even of a rocket attack, yet the Strategic Air Command has instituted a day-and-night patrol of battle-ready B-52 bombers, presumably armed with nuclear weapons. The B-52 is an eight-jet long-range heavy bomber.

BARNACLES RESEARCH.—After 20 years' study, the research establishments of the Royal Navy have produced an anti-fouling and anti-corrosive technique which makes it possible for ships to remain at sea four times as long as before. The problem was tackled before the last war, when ships had to return to dockyards every six months because of the corrosion and fouling which marine flora and fauna were causing to the steel plates. An exposure station was set up at Langstone harbour near Portsmouth, steel plates lowered into the sea to collect barnacles for analysis. Today no ship need return to the dockyard for reasons of corrosion for at least two years. Not only are they kept at sea longer but they operate more efficiently, since even a small quantity of barnacles on a ship's plates, by increasing drag, makes it impossible to achieve maximum speed. How barnacles congregate was demonstrated at Langstone, where a plate lowered into the water from the floating raft collected nearly 20,000 marine animals. Enormous quantities of paint for the hulls are needed each year. The complete repainting of an aircraft carrier takes five tons below the water line. This is made up of 600 gallons of anti-corrosive and 175 gallons of anti-fouling. Experiments to discover the marine life which attacks ships produced some new species. At Plymouth in 1953 a tank landing ship from Korean waters brought back a *Styela clava* or sea squirt on its hull. It was the first

occasion that it had been found in British waters. Today it abounds here.

BATHYSCAPHE SIX MILES DOWN.—A French bathyscaphe, which will go deeper into the ocean than any other similar craft, was launched at Toulon. A design enabling the 60-ton vessel to withstand pressure of more than 180,000 tons will allow the *Archimède* to stay down longer than any other bathyscaphe. Its first mission will be to explore the bottom of one of the world's greatest oceanic chasms, the 10,540 metre (about 34,300 feet) deep Kuriles Pit north-east of Japan. The bathyscaphe will be laden with every type of instrument for underwater exploration, including ultrasensitive devices to detect the sound made by fish. Other instruments will measure pressure, temperature, the speed of currents, and radio-activity of the water. It will also collect specimens as it crawls along the ocean bottom and photograph the creatures living there with the help of two 10,000-watt searchlights.

BATS, MOTHS AND FISH TO AID AIRMEN.—The American Air Force has sponsored research on bats, beetles, electric eels, octopuses, blind fish, waltzing mice, deaf cats, ants, locusts, lizards, porpoises, crickets, scorpions, praying mantises, fighting fish, newts, spiders and toads. These creatures can do things which the Air Force would like to do, but cannot. The tiny sense organs of some insects can perform tasks quite out of reach of the most massive electronic computer. Bats give out high-pitched squeaks and steer by the echoes. They can fly through a dark room criss-crossed with fine wires without touching one of them. They are not deafened by other bats and can steer even if loudspeakers fill the room with other sounds. Some moths, which are eaten by bats, have developed remarkable counter-measures to detect hostile bat squeaks with a sensitivity which surpasses the best microphone. Porpoises and whales have a sound-radar navigation system. Some fish have an electrical navigation system. They emit low-voltage pulses into the water, and alterations in the electric field caused by other fish can be detected. The fish will respond to the electrostatic charge on a comb drawn through someone's hair and then waved in front of its aquarium. Rattlesnakes are sensitive to temperature differences. Offered two spheres differing in temperature by a fraction of a degree, the snake strikes immediately at the warmer. Insects have sensitive devices for detecting smells, tastes, and vibrations. Flies have turned their rear wings into a type of vibratory gyroscopic stabiliser which controls the front wing beats. Engineers are now trying to imitate this device.

BEE RESEARCH PLEA FOR £25,000.—"The honeybee is one of the best friends we have ever had and we should do all we can to cherish and encourage it," said the late Sir David Bowes Lyon, president of the Bee Research Association, in launching an appeal for £25,000 to establish a permanent headquarters for the assembly and distribution of the world's information about the honeybee and other useful bees. In an address to scientists, beekeepers, and diplomats Sir David said that the Bee Research Association was accepted in 76 countries as the world centre of scientific information about bees, honey and beeswax production, and the pollination of fruit and crops by bees and other insects. The entry of chemical sprays and weedkillers into farming had brought new benefits to agriculture and could not be halted, but it had brought new problems calling for ecological and biological research to ensure that the balance of

nature and wild life is not detrimentally upset. The Association keeps in touch with 400 research institutes, selects information of value, translating from 40 different languages. Since 1955 demands on its services have trebled. The association's American, European and African Committees also provide special services in their territories. The appeal was being made to a wide circle to give the Association a foundation of security—to makers of agricultural chemicals, wax importers, suppliers of beekeeping equipment, fruit growers, horticulturists, traders in honey, fruit and farm produce—to beekeepers and all those interested in rural crafts and the prosperity of the countryside.

BILHARZIA: £50,000 GRANT.—A Rockefeller Foundation grant of £50,000 for research on bilharzia, one of the world's most important unconquered parasitic diseases, was made to the London School of Hygiene and Tropical Medicine. Together with research funds available under the Colonial Development and Welfare Act, it will be used to set up a study of the full medical effects of the disease, which is widely spread in parts of Africa, the Caribbean, South America, and the Far East, and to set up research mechanisms in Africa to ensure the development of research amid changing political conditions. It is intended to establish a unit at Mwanza, on the southern shore of Lake Victoria, to work with the East African Medical Research Institute. A five-year study will be made of the prevalence of the condition, and an assessment of the frequency, nature, and immediate causation of the chronic effects. It is hoped to gain a clinical picture of the condition in parallel with work on the prevention of the disease. An African staff will be trained. Bilharzia affected the Pharaohs, as we know from the eggs of the parasite found in the mummified tissues of those monarchs. (See WHITAKER'S ALMANACK 1957.)

BIRD OBSERVATORY AND FIELD CENTRE.—Mr. Peter Scott opened the new Portland bird observatory and field centre. The observatory, the product of 10 years of planning and development by Dorset ornithologists, headed by Dr. K. B. Rooke, is under the general direction of a committee of the Dorset Field Ornithology Group and is housed in the disused Old Low Lighthouse, Portland Bill. In the first four years of its existence the Portland observatory was manned without a roof for 156 days. During this period much useful information was gained and 1,332 birds of 42 species were ringed. Since then the work of the observatory has increased and more than 10,000 birds have now been ringed. The work will not be confined to bird study. The committee intends to develop the Old Low Lighthouse and grounds as a complete field centre, embracing all branches of natural history.

BIRD REMAINS FROM THE ICE AGE.—Mr. D. Bramwell, a Derbyshire ornithologist, has reported to the Merseyside Naturalists' Association on his research into bird distribution in glacial and post-glacial Britain. Bird remains were found in caves near Buxton, in Staffordshire, Somerset and other parts of the country. His chief field work has been among remains from the close of the Ice Age, 25,000 to 15,000 years ago. Remains of willow-grouse, ptarmigan, eagle owl, raven, tawny owl, mistle-thrush, pipit and dunlin came from the Manifold Valley, in association with reindeer, bison and lemming. From the Dowel cave near Buxton, came lapwing and partridge to the late glacial list. In a much colder climate the ptarmigan was more widespread than today, and in the post-glacial period from 8,000 to 5,000 B.C., wild duck and waders

were distributed over a wide area because of the wetter land. The beaks of hawfinch and greenfinch and the bones of partridge were found in Neolithic deposits, and of cliff-nesting house martins, blue tit, robin and hedgesparrow. From food refuse at a Bronze Age site near Bakewell came the bones of a buzzard and a raven. A small cave in the Peak District continues the sequence of bird remains from Roman times to the present day. After the Romano-British occupants left the cave, and Saxons used it, an immature golden eagle also occupied it, feeding on black grouse (which still dwell on the local moors), wild duck, plover, polecat, and squirrel.

BORING TO GRANITE IN DURHAM.—A bore-hole put down in the Pennines at Rookhope, west Durham, has penetrated granite 1,280 feet below the surface, the Geological Society was told, by Professor K. C. Dunham, of Durham University. The bore, which was financed by the Department of Science and Industrial Research, has indicated that valuable minerals continue to three times the depth of local mining. The source lies at still greater depths and the bore-hole is being continued.

BRITISH ASSOCIATION.—The British Association for the Advancement of Science held its 123rd annual meeting at Norwich on August 30-September 6, under the presidency of Sir Wilfrid Le Gros Clark, F.R.S., Professor of Anatomy at Oxford.

The subject of his presidential address was "The Humanity of Man." The frightening question is now beginning to present itself, he said, whether the civilization which mankind has built up over thousands of years can avoid disastrous dissolution as the result of uncontrolled struggles for political power or economic superiority. The basic difficulty with the larger groupings of human society was that with increasing population pressure the altruistic sentiments which had become ingrained in the mentality of the individual were too apt to be suppressed by the narrow interests of each particular group. We now have to face the fact that the larger the units of co-operation in social communities, the greater the tendency for their segregation into populations opposed to each other by conflicting economic and ideological interests. Thus the historical process of unification has tended to slow up and ultimately threatens to come to a halt. A major conflict involving the nations of the world today must lead to a degree of destruction that would render precarious the very existence of mankind. An essential prerequisite for any unification for the good of mankind is the ability to give full expression to the impulse for co-operation and this can only be made possible by free intercourse and the free interchange of ideas among the population of the world. We had met with considerable success by using all the physical and biological sciences by more effective methods of pest control and protection against disease, and also by intensive studies of the physiological and psychological factors underlying the adaptational potentialities of the human body. Much progress had been made in the field of climatic adaptation in man and animals, and "ergonomics," the study of man in relation to his working environment. "I need hardly emphasize the relevance of ergonomics to industry, for this is now widely recognized for its importance in the rational design of machinery and in the control of the immediate climatic environment."

The sociological environment to which mankind needed to adapt itself presented a more formidable problem. Science had a vitally important part to play in the promotion of that idea. There is a universality in scientific method which permits an

intimacy of understanding hardly possible in fields of learning not amenable to scientific inquiry by the rigorous test of repeated observation and experiment. The recent multiplication of international congresses and colloquies was an expression of the urgent need felt by the scientifically minded to extend still further contacts in a world which threatens to become disrupted by the conflict of national interests.

The British Association could claim a good share in the promotion of international amity through the medium of science, for it had always provided an open forum for the free discussion of contemporary problems. That spirit of freedom in scientific inquiry gave full expression to the deep-rooted altruism which is an essential attribute of the humanity of man and which can do more than anything else to preserve and intensify the feeling of harmony among all peoples of the world. But we need to press ahead in our efforts with the utmost vigour for the dangers which now threaten the unity of mankind are formidable indeed—and time is getting very short.

The presidents of the sections and the subjects of their addresses were—Mathematics and Physics, Dr. R. Stoneley, F.R.S., "Interior of the Earth"; Chemistry, Prof. R. G. W. Norrish, F.R.S., "Chemistry and the spectroscope"; Geology, Prof. K. C. Dunham, F.R.S., "Black shale, oil and sulphide ore"; Zoology, Prof. C. M. Yonge, F.R.S., "Life on the bed of the sea"; Geography, Prof. S. H. Beaver, "Technology and geography"; Economics, Prof. C. F. Carter, "Economic use of brains"; Engineering, Sir Gordon Radley, "World communications"; Anthropology, Dr. K. P. Oakley, "Dating man's emergence"; Physiology and Biochemistry, Prof. Sir Bryan Matthews, F.R.S., "The Senses and the Sciences"; Psychology, Prof. George Seth, "From Galton to Crowther"; Botany, Dr. R. E. Holtum, "Taxonomy as a scientific discipline"; Forestry, Dr. L. Chalk, "Wood Anatomy"; Education, Dr. B. E. Lawrence, "Education in Uganda"; Agriculture, Sir William Slater, F.R.S., "The revolution in agriculture"; Sociology, Prof. Max Gluckman, "African jurisprudence"; General, The Earl of Cranbrook, "Science and social service."

There was a total membership of 3,636 for the Norwich meeting, half of whom came from the locality, which was high for a non-university city and a region without extensive industrialization.

The annual meeting in 1962 will be held in Manchester from August 29 to September 5, under the presidency of Sir John Cockcroft, O.M., F.R.S., who achieved world fame by his work with E. T. S. Walton, in breaking the atomic nucleus for the first time by artificial means. The annual meeting in 1963 will be held at Aberdeen, and in 1964 at Southampton.

BRITISH · NUCLEAR SUBMARINE.—The Queen named and launched Britain's first nuclear submarine, the *Dreadnought*, at Barrow in Furness. The *Dreadnought* is the 295th submarine to be launched at Barrow and she is the Royal Navy's ninth ship of this name. The first was in action at Cadiz when Drake "singed the king of Spain's beard." The fifth *Dreadnought* took part in the Battle of Trafalgar. The present *Dreadnought*, built at the cost of £20,000,000, has a surface displacement of 3,500 tons. Her nuclear propulsion will enable her to remain submerged at high speeds for long periods. She is 266 ft. long and her beam is 32 ft. Her reactor is a pressurized water type, driving a single shaft through steam turbines. The core of the reactor, consisting of uranium plates coated with zirconium, is the source of heat. Water is circulated

between the plates to extract the heat produced by the nuclear fission process. This coolant is pumped to a steam generator in which the heat from the primary water is transferred to the secondary water in the generator. The steam formed in this way is initially saturated and not super-heated. It passes through a steam turbine plant which forms the main propulsion machinery and a proportion is used to drive the turbo-generator which is providing electricity.

CABLE TO CIRCLE THE WORLD.—The first link of the cable to encircle the world, at a cost of £8,300,000, has been laid. In a length of 2,100 nautical miles it will join the G.P.O. shore terminal near Oban and New Hampden in Newfoundland. The next link will cross Canada by cable and micro-wave radio to a point near Vancouver. A further stage will be a cable across the Pacific Ocean—at some points four miles deep—which will link Australia and New Zealand with Canada. The cable will be British throughout. Britain has agreed to contribute 50 per cent. of the total cost—the other 50 per cent. to be shared among Commonwealth countries.

CASPIAN SEA TO BE REPLENISHED.—A plan to divert from 80,000–100,000 million cubic yards of water to replenish what the Caspian Sea has lost through excessive evaporation was announced in Moscow. This is part of a scheme to control and supplement the water reserves of the Caspian Sea, the world's biggest land-locked lake, which has a maximum depth of over 3,000 ft., and an area of more than 170,000 square miles. Since 1930 the level of the Caspian has fallen by about 8 ft. and its area has shrunk by more than 50,000 square miles. In several places the water has receded from 10 to 16 miles from the former shore line. This is particularly harmful to the Russian fishing industry, which relies on the Caspian catches for much of its valuable fish. Part of the plan provides for the emptying of the Petchora and Wycheгда rivers into the Caspian by way of the Kama and the Volga; another part is to reverse the flow of the Siberian rivers Ob and Enisei and direct some of their waters also into the Caspian. This would add sufficient water to meet the loss by evaporation. (see WHITAKER'S ALMANACK, 1961).

CENTRAL LONDON A HEAT ISLAND.—By taking the temperature of London, geographers of London University have mapped a "heat island", or a mass of warm air, lying within and above the city. Mr. T. J. Chandler, organizer of the survey, told the British Association that the difference between temperatures in central London and its suburban districts was greatest by night and weakest by day. On a calm clear night after a sunny day this difference might be as much as 16°F. More frequently central London was warmer by about 4° and during the day West End temperatures were one or two degrees higher than in the green belt rural districts. Visible evidence of the heat island could be seen when snow lay thickly in fields around the city and on suburban lawns while that in the central parks had almost melted. Regent's Park plants flowered earlier than those in gardens nearer the city margins. By absorption and retention of heat in its buildings, roads, and pavements, central London stayed warm and sultry on nights when the suburbs were cool. The London "heat island" was best developed during the summer and autumn when the haze hood above the city was playing a part.

CENTROLAPHTHUS MAORICUS.—One of the world's rarest fish, a *centrolaphtus maoricus*, was caught by a trawler in the Bay of Plenty off New Zealand's

northern shore. It is believed to be the first specimen landed since the turn of the century. Only two other specimens of the fish, a member of the rudder family, are in collectors' possession. One is in a British Museum and the other in an Australian museum. The latest catch is in the Dominion Museum at Wellington.

CLIMATE OF NORTH CHINA.—Mr. Lu Wo, a leading Chinese meteorologist, discussing the droughts and floods of recent years, suggested that the climate of North China may be changing. He attributed the droughts and floods to vast masses of arid continental air obstructing the passage of rain-filled typhoons, which were able only to skirt the edges of the arid air mass and move along a narrow coastal strip from south to north, bringing these areas excessive rain and floods and leaving the interior drought-stricken. The first definite indications of drought were seen in 1957 and became increasingly serious in the succeeding years. If the tendency to rising temperatures continued, it was possible that China was entering a cycle of generally warmer climate. Greater weather forecasting facilities now existed to warn peasants of typhoons, floods, and other natural hazards.

CLOGS USED TO AID LEPROSERS.—Leprosy is responsible for more crippling than any other disease in the world, yet there is only one orthopaedic surgeon for every million patients. Such is the statement of Mr. Paul Brand, Professor of Orthopaedic Surgery at the Vellore Christian Medical College, South India, and director of orthopaedic work for the Mission to Lepers. Since he went to Vellore after the end of the war, he has evolved new methods for treating crippled leprosy patients. By tendon transplantation the patient can be given a useful hand, and in many cases his sight can be saved by a simple operation. Professor Brand has employed wooden shoes to prevent deformity of the feet. The gross deformity of the feet, a distressing feature of advanced cases of leprosy, is due mainly to loss of sensation, which means that the patient is unaware when he has damaged his foot, or whether it is infected. By the wearing of wooden shoes—comparable in almost every respect to the clogs of Lancashire—the feet are adequately protected from undue stress and strain.

CLUE TO DISEASE OF EARLY PEOPLES.—The Bronze Age pastoralists of Criche Down suffered only a third of the childhood illnesses that Anglo-Saxon agriculturists around Burgh Castle contracted—probably because the Criche folk were protected by more protein in their diet. But a group of Middle Saxons in a poor village on the Caister by Yarmouth estuary had more than six times the Bronze Age people's morbidity. This revealing backward look into the health of early man in Britain was given to the British Association by Dr. Calvin Wells. By means of radiography a complete series of illnesses in an archaic population could now be traced. While examining the radiographs of a shin bone from an Anglo-Saxon leper, Dr. Wells noticed a dozen horizontal zones of increased density at regular intervals inside the shaft. Known as Harris's Lines, these were formed by ossification near the end of a bone if its regular growth was interrupted. Illness or starvation were the commonest causes of these bone scars. A Harris's Line normally remained permanently in the bone, and was radiographically detectable from the time it was laid down until death. The position of each line in a long bone could be used to estimate the age of the child when it was deposited—a view of his development unobtainable in any other way. Thus we know that the

Caister people not only had more disease than their contemporaries a few miles away at Burgh Castle but a much higher proportion came to them in the first six years of life. A third of all their morbidity was over before the age of seven, and only a tenth of it occurred after 12. The Burgh Castle folk's peak period of disease came at 11, while for Caister it fell two years earlier.

COAL SEAMS ATLAS.—The National Coal Board has issued the first volume of a new type of atlas which will run eventually to about 180 volumes, one for each of the more important coal seams in Britain. It is the result of 30 years' work. Its purpose is to show the variation of each seam in depth, structure, and thickness, and in properties that affect the quality and use of the coal. So far 11 volumes have been printed covering at least one major seam in each coalfield. The properties affecting quality which are being charted include ash content, the proportion of sulphur (which for metallurgical coke must be low), chlorine (unpopular in power stations because it causes troubles in superheater tubes), "rank" and volatile matter in coal, and the amounts of carbon, hydrogen, and phosphorus. Tests by the National Coal Board's boring tower have discovered reserves of coal amounting to 300,000,000 tons under the sea off the coast of County Durham. The chairman of the National Coal Board said that Parkside colliery, near Newton-le-Willows, which is costing £13m., would be the first in the world to have the gamma ray machine which would revolutionize mining. The machine could, by remote control, move all the props in a 200 yds. coalface and with scientific aids select only the good coal. Australian mining engineers have successfully experimented with high-pressure jets of water to replace conventional coal-cutting machinery. The coal is first loosened by explosives and then washed out of the mine in sluices. By using water coal dust and the formation of gas are reduced. The jets are supplied from a reservoir holding 1,500,000 gallons of water.

COCKROACH ALARM CLOCK.—Important advances in understanding biological clocks have been made in the Zoology Department of Cambridge University. Dr. Janet Harker has identified a small group of specialized cells in a large nerve ganglion underneath the gullet of the cockroach. These cells secrete a hormone at regular twenty-four-hour intervals—and the cockroaches start being active when the hormone goes into their blood. So the cells are the cockroach's alarm clock, which can be re-set by keeping the insect in an artificial twenty-four-hour cycle. It can be slowed down by cooling, and the cells can be removed and placed in another cockroach. If this cockroach has lost its own twenty-four-hour rhythm by being kept in an unchanging environment for a few days, it takes on the rhythm of the donated clock. A striking experiment was to remove the clocks from cockroaches on an ordinary twenty-four-hour day and night cycle, and insert them in cockroaches whose clocks had been re-set twelve hours "out" by exposing them to the light during the night and dark during the day. These cockroaches then possessed two clocks showing biological "times" twelve hours apart. Every one of these insects developed cancer.

COMMUNICATION TOWER IN LONDON.—The Post Office began construction of a 507 ft. tower in London to meet the communication needs of coming years. Expected to cost £1,500,000, the tower will be next to the present Museum Telephone Exchange. The 54 ft. diameter cylinder,

expected to be in use by mid-1964, will rise above surrounding buildings to avoid obstruction to the information-laden waves pouring in and out. It will relay tele-programmes between studios, control stations and transmitters, but not television broadcasts, and will be a centre for radio broadcasting links to the outside. By 1980 twenty-four telephone systems, each capable of carrying 960 separate telephone conversations, are expected to be in use from this centre, and the number could be doubled in the next twenty years. This will leave room for more than 100 television outlets, including colour. Wind tunnel tests of scale models were made at the National Physical Laboratory to ensure that the tower will be aero-dynamically stable. Wind gusts of 70 m.p.h. are expected to produce a deflection of six inches at the top and the heat of the summer sun may produce movements of as much as two inches. A revolving restaurant near the top of the tower will give diners an uninterrupted view over the city.

CREVASSE DETECTOR.—A weasel, with crevasse detector, led the United States Army Transportation Corps tractor train during an expedition in previously unmarked danger areas on the Greenland Arctic Cap. Electronically operated, the detector sounds a warning when one of its bowl-shaped devices passes over a cleft in the ice.

CRYSTAL 61 HIGHER THAN EIFFEL.—A tower of reinforced concrete and glass 1,016 ft. high, on a site near St. Pancras Station, is proposed as an exhibition hall for British industry. Known as Crystal 61, the tower will be made by the Glass Age Development Committee, a body convened by Pilkington Brothers, Ltd., the glass manufacturers. The tower, higher than the Eiffel Tower, would provide five halls, having an exhibition area greater than Olympia. The design takes the form of a central hollow concrete column 130 ft. in diameter at the base tapering to 30 ft. at the top. The halls are in the form of drums around the column, the entire building being glazed in the pattern of a cut-glass decanter. The entire structure would be poled on the lower end of the central column which would rise through a four-storey podium containing 4,500 parking spaces. The tower structure would have to penetrate 160 ft. beneath the ground to the chalk beds, where the walls would be 3 ft. thick. The estimated cost is £10,000,000.

DIAMOND SAWS IN ROAD MAKING.—Diamond saws are now being used in the United States to provide non-skid surfaces on roads which have become slippery from tyre rubber and oil. The saws are spaced in the cutting head of a machine to cut shallow parallel grooves in the surface. This fast method of correcting dangerous surfaces is employed at swimming pools and factories as well as for roads and pavements.

DRAÇONE ON TOW.—A dracone, a British invention, is a large sausage-shaped container of woven fabric which can be filled with fluids and towed easily across the sea or inland waterways. The idea of it was conceived by Professor W. R. Hawthorne, Sir Geoffrey Taylor and Mr. John Shaw, of Cambridge University. During a demonstration a tug in Southampton Water towed a dracone weighing 100 tons.

DRILLING DOWN TO LAVA LAKE.—Scientists of the Lawrence Radiation Laboratory of the University of California and the University of Hawaii have drilled through a thick crust of solidified lava, reached a rock temperature of at least 1,900°F., and cut through into a molten lava lake beneath.

The lake, more than 300 ft. deep, and containing about 45 m. cubic yards of lava, was formed as a result of the eruption of Kilavea Iki, Hawaii, in November, 1909, and the experiment was a technical trial of the problems arising in drilling into molten rock, and to add to knowledge of volcanoes. The difficulties encountered were described by D. E. Rawson of the Lawrence Radiation Laboratory. The first 14 ft. of the hole was drilled to a diameter of $3\frac{1}{2}$ in. and was cased to seal off possible communication with the surface. By this time a temperature of 1,600°F. had been reached. Diamond bits were badly damaged by heat, and it was difficult to circulate sufficient air for cooling. Silver solder on the drilling bits began to melt; lubrication with powdered graphite was needed to prevent threads on the drilling tools from seizing up; and on the last lap water cooling was used successfully. At a depth of 19 ft. the boundary between solid rock and molten lava was reached, and at 19½ ft. the bit and tools dropped slowly into the hole of their own weight. Finally, specimens of the lava proper and gas samples were collected.

EARLIEST MAN YET KNOWN.—Dr. L. S. B. Leakey, of the Coryndon Museum, Nairobi, announced the discovery in the Olduvai Gorge in Tanganyika, of what he called the earliest man yet known. It was considerably earlier than the 600,000-year-old "nut cracker man" (*Zinjanthropus*) whom he discovered in 1959. Pending a detailed study of remains of an 11-year-old child and parts of an adult, he could not estimate how much older the new find was than the "nutcracker man." It had been named the "Pre-Zinj Find." It was possible to say that the child had been murdered by a blow on the head—so that the discovery had also brought to light the world's oldest crime. He was hesitant about trying to describe what the "Pre-Zinj man" would have looked like, but he said that the 11-year-old child's collarbone was as massive as that of a present-day male adult. The child also had a very large prominent jaw and its brain was bigger than the "nutcracker man's." The new discovery was made by Dr. Leakey's son, Jonathan, about 250 yards from the spot where the "nutcracker man" was found. In the case of the child the remnants were three pieces of skull, a collarbone, part of a foot, part of a hand and part of the jaw. Some teeth, several pieces of skull and possibly a collarbone were the remnants representing the adult. With the remains were found rough tools, fashioned out of stone. That is why they can be claimed as the earliest man, rather than the nearly related *Australopithecines*, the "ape men" of South Africa, whose status as toolmakers has not been well established.

Dr. J. F. Evernden and Dr. Garniss Curtiss, of the University of California, using the recently developed potassium-argon dating process, estimated that the prehistoric skull of *Zinjanthropus* was 1,750,000 years old. Though the potassium-argon method of dating ancient specimens is similar to the radio-active carbon method, potassium can be used for ages greater than a million years because of the low rate at which its atoms are transformed by radio-active decay. Carbon is more useful for working out ages measured in thousands and tens of thousands of years.

Dr. Kenneth Oakley, in an address, "Dating man's emergence," at the British Association, said that the results of the potassium-argon technique indicated that the earliest hominids, the *Australopithecinae*, found in Tanganyika, were a million years old. The *Australopithecinae* had teeth of basically "human" pattern, they were capable

of living in open country, walking upright on two feet; but had brains not substantially larger than those of the great apes. The question of whether the *Australopithecinae*, the oldest undoubted hominidae, should be counted as men was debatable. There must have been some threshold at which the hominids' mental attributes became "human."

ECLIPSE OF THE SUN.—A total eclipse of the sun took place on February 15. The moon completely hid the sun out over part of the Bay of Biscay, and then the shadow of the moon moved in a curving path from 130 to 164 miles wide across southern Europe and into Russia, travelling at first at about 12,000 m.p.h., gradually slowing down to 1,700 m.p.h. over the Crimea. Cloud and mist prevented the partial eclipse from being seen in the south of England, but its later stages were visible at New-castle-upon-Tyne. In London, although nothing could be seen, the temperature on the Air Ministry roof dropped during the eclipse—from 47°F to 46°F at 7 a.m., and 45°F at 7:30 a.m. France watched the eclipse—the first total eclipse it has been able to see since 1912. Over a belt from Bordeaux in the west to Monte Carlo in the east, reaching as far as Grenoble to the north and Marseilles to the south, the sun was completely hidden, and in Paris 96 per cent. of its surface was obscured. Fine weather and a clear sky provided favourable conditions in Italy, where the total eclipse was visible within a belt running from Turin to Rimini on the north and from Grosseto to Pescara on the south. Russian scientists in a jet aircraft met the eclipse at Rostov and followed its course across the Crimea. The B.B.C. had television cameras in an R.A.F. aircraft over Selsey Bill trained on the sun as it rose with much of it already covered by the moon. Another aircraft on the track of totality photographed the moon's shadow as it swept across the ground below. Television services were at work in five different countries and some viewers were able to see the eclipse of the sun as viewed from sites many hundreds of miles apart. (See Illustrations, p. 560.)

ELECTRON MICROSCOPE AND THE CELL.—Dr. U. A. Epstein, of the Middlesex Hospital told the British Association that the immensely magnified snapshots of animal cells and their components given by the electron microscope—to all appearances rigid and firm in their structure—are giving place to a dynamic picture in which fine components in the cell are seen in constant movement and change. An example was the transport of fluid across the kind of cell which lines the fine capillaries through which blood flows. The membrane of such a cell on the side nearest to the moving blood had been caught in one picture with part of its surface bent inwards as if to incorporate a fine droplet and in the same picture a complete droplet could be seen half-way across the cell. There were continuous channels of communication—only a few millionths of an inch across—linking the outside of the cell and the cell nucleus—and on the surface of the double membrane surrounding the nucleus there were frequent fine pores which traversed its whole thickness. Not only could movements in the cell be studied; it had been possible, by using special stains, to pin down the site of one particular chemical reaction to small bodies about two millionths of an inch across and to take pictures showing the distribution of this reaction in the cell. It was one which released energy for other chemical reactions.

ELEPHANTS AND TREE DESTRUCTION.—According to a report of the East Africa High Commission, elephants and other animals with itchy backs are responsible for the destruction of a large amount of softwood in Kenya. The trees are not damaged by the rubbing, but before the scars have time to heal the exposed areas are attacked by wood-boring insects which drill deep into the heart wood, leaving no signs on the outside of the tree. The infested timber sometimes goes into the support of a building before the "worm" crawls out as a fully-fledged insect. The timber in one hotel in Nairobi was so badly damaged that it had to be pulled down and rebuilt. One of the most voracious woodborers in Kenya is the long-horned *Oemida gahani* which, in its larval stages, is particularly fond of a valuable local commodity—cypress wood. *Oemida* attacks trees which have been scarred by animals or the pruning shears of foresters. The eggs of the beetle are laid in minute cracks, almost invisible to the naked eye, and as the grubs hatch out they bore towards the heart of the tree, leaving behind oval-shaped tunnels about half a centimetre across. Mr. Tecwyn Jones, an entomologist employed by the East African Agriculture and Forestry Research Organization, has been working on means of cutting short the wood-hungry life of *Oemida*. One problem was whether or not the larvae were killed by heat, for example. He began by using microphones. The noise of an active grub was like "an enormous animal crashing through undergrowth." He then tried ultra-sonic pulses from a small crystal transmitter attached to the trees, but the method was expensive and the maximum penetration only about eight inches. Gamma radiography was tried, but the wood proved too dense for the employment of a scintillation counter. It is now becoming clear that *Oemida* is susceptible to heat and high humidity, and that prolonged exposure of the timber to the sun on the docks at Mombasa will kill the grubs. But the problem of resisting the initial attack remains. Scars from pruning shears can be painted over, but damage by buffalo and elephant is harder to control. It has been suggested that carefully roughened ferro-concrete scratching posts might do the trick.

Fossil Beetle Collectors.—Two amateur geologists at Bognor Regis who collected 300 beetle fossils each 40 million years old were honoured by having two new genera named after them. The geologists are Mr. Edmund Venables, aged 59, curator of the Bognor Museum, and Mr. Herbert Taylor, aged 74, a retired schoolmaster. The new genera will be named *Taylorius* and *Venablesia*.

FULL-STOP ELECTRIC MOTOR.—A miniature electric motor only six thousandths of an inch in diameter (about the size of the full stop on a typewriter) was shown at Pasadena, California, under a microscope. The motor has 13 parts, including four coils of wire with 21 turns per coil, a quartz bearing, and a rotor. It develops one millionth of a horsepower. Dr. Richard Feynman, a physicist of the California Institute of Technology, had said he would give \$1,000 for the first man who makes an operating electric motor that can be controlled from the outside that will be only one sixty-fourth of an inch cube, not counting lead-in wires. The award was made to William McLellan, an electronics engineer.

GEOLOGICAL DISCOVERIES.—Discoveries of economic significance made during 1961 included coal seams in Oxfordshire and a bed of anhydrite (an anhydrous form of gypsum) in Northern Ireland, and that the reserves of salt in Cheshire are

double the previous estimates. The coal, discovered at Apley Barn, Witney, is the first to be found in Oxfordshire of a workable thickness. Coal measures were proved from 820 ft. to 3,968 ft. and boring ceased at a depth of 4,942 ft. This work was part of the Geological Survey's programme of borehole drilling of deeper rocks in Southern England. The reserves of salt in Cheshire are now estimated as at least 400,000 million tons, twice the amount which could previously have been reasonably estimated. Gypsum was discovered near East Belfast. A borehole was put down at Avoniel, in East Belfast, and 16 ft. of massive anhydrite were proved between 365 ft. and 381 ft. depth below surface.

GEOLOGICAL SURVEY.—Mr. Denzil Freeth, Parliamentary Secretary to the Minister for Science, in answer to a question on the Geological Survey of the United Kingdom, stated in the House of Commons that in 1960, 392 square miles of primary six-inch survey were completed, as well as 317 square miles of revision survey. Rather more than three-quarters of Great Britain has been surveyed on this scale. At the present rate of progress, the primary six-inch solid and drift survey will be complete in about 55 years. It was hoped to reduce this to 35–40 years. The survey was now at the most difficult mountainous regions.

GIANT SNAILS RAVAGE ISLANDS.—The small Guimaras Island in the central Philippines and the Seychelles Islands suffered attack from the giant snails which have become a pest in many tropical and sub-tropical countries. About 8,000 families on Guimaras faced starvation when the snails ravaged about 400 acres of rice paddies, orchards and vegetable plots. Government health teams spraying the snails were forced to stop because of the harmful effects on livestock and the danger to the water supply. In the Seychelles the vegetable crops were ruined, and a consignment of smaller snails were sent from Mauritius to prey on the giant snails by eating the larvae of the larger species. The giant snail is presumably *Achatina fulica*, originally an East African species which in the last 160 years has spread eastward across the Indo-Pacific region as far as California. It has a shell 5 in. long, is hermaphrodite, and at a year old is capable of laying 50–300 eggs every three months for five years or more. The small snail sent to the Seychelles is probably a carnivorous species of the genus *Goniaxis*, which preys on *Achatina* in its native East Africa. (See WHITAKER'S ALMANACK, 1950.)

GLASS-FIBRE INDUSTRY.—Manufacturers of fibrous glass in the United States are spending many millions on new plant and expansion. In 1960 the turnover exceeded \$300m., an output not sufficient to meet all requirements. It has been estimated that there are already more than 30,000 uses for the material, ranging from insulating homes to reinforcing plastic shotgun barrels, from boats to textiles, from luggage to van and lorry bodies, and from fishing rods to insect screens. Glass fibres—glass reduced to a molten state and drawn into fibrous form—are among the strongest commercial materials known, but they are chemically inert and highly resistant to corrosion and will not support combustion. Two types of fibre are produced, one is short, fluffy, and forms a woollen mass, the other is a continuous filament of extraordinary fineness. The former is the basis for thermal and acoustical insulations and filters and the latter is processed to create a variety of products. The filaments can be twisted and plied to form yarns and fabrics, or may be distributed in random pattern

to form non-woven mats. The most spectacular product is in the field of plastics reinforcement, for which the various filament forms of fibrous glass are used. The degree of strength depends on the kind and amount of glass reinforcement, and may be greater than that of steel with far less weight. The combination of glass and plastics is easily moulded, does not rot or corrode, requires no paint or surface covering, and is highly durable and easy to maintain. The glass has hundreds of applications in aircraft and missiles; in the motor industry for bodywork; and fabrics of fibrous glass are used by the ton for draperies and curtains.

GRANTS FOR BRITISH RESEARCH.—British research and scholarship shared in the £10,631,000 (about £3,000,000) in grants made by the Rockefeller Foundation during the last quarter of 1960. The Strangeways Research Laboratory at Cambridge has a three-year grant of £20,000. The laboratory specializes in bone and cancer research. The South-west Metropolitan Regional Hospital Board received £23,000 for research on the biochemistry of the nervous system under the direction of Dr. Derek Richter at the British Medical Research Council's neuropsychiatric research unit, Carshalton. Other United Kingdom recipients were: Miss Kathleen Jean Wallace Wilson, assistant lecturer, Nursing Studies Unit, University of Edinburgh, £3,640 to observe nursing education at nursing schools abroad and attend the annual meeting of the International Council of Nurses in Melbourne; St. Catherine's Society, Oxford University, \$2,400 for interpretive studies by Dr. George A. Holmes of European development from 1350 to 1450; and Miss Mary Freda Carpenter, director, education department, Royal College of Nursing, London, \$1,755 for the observation of recent developments in nursing education at Canadian and United States Centres.

INDIAN OCEAN SURVEY.—A new research ship is being built for the National Institute of Oceanography at the cost of £800,000. It will fly the Blue Ensign and will come under the Admiralty for management and maintenance. The price includes much specialized equipment. There will be 3,000 sq. ft. of laboratory space provided under cover. The ship will have a length of 260 ft., a beam of 46 ft., and a draught of 15 ft. 2 in. Special features will include a bow thrust propeller situated in a tube athwart the ship, well forward, and there will be an open vertical well through the ship just forward of the bridge so that instruments can be lowered directly into the sea from a laboratory on the upper deck. A noticeable omission will be the entire absence of rigging. Instead, there will be "goal-post" masts on the deck. In addition to the main laboratories, there will be a portable laboratory which can be connected to the main services. The normal complement will be 57, which will include 14 scientists, but provision will be made for another six as necessary. When the new ship commissions, her first assignment is likely to be in connection with the Indian Ocean survey in 1963.

INSECT LIFE AT 6,000 ft.—Pure white insects living 6,000 ft. above sea level in Antarctica were discovered by Dr. Keith Wise, a New Zealander working for the United States Antarctic Research Programme. The team was engaged on a systematic search for living things in the area of McMurdo Sound and the Palmer Peninsula. The insects—primitive "spring-tails"—were living under loose rocks at the head of a glacier near Mount Gran. This is the highest altitude at which insects have been found in Antarctica. Besides

spring-tails, Mr. Wise found a dozen small mites living nearby. What they live on is obscure, since no plant life of any kind was found in the area.

ISOTOPE WEATHER STATION.—The United States and Canada, acting in combination, installed the world's first isotope-powered automatic weather station on uninhabited Graham Island, near Norwegian Bay, in the Canadian Arctic. It is capable of working for two years. The use of isotopes, permitting a continuous source of power, had enabled meteorologists to realize their dream of getting automatic weather observations from strategically situated areas. The station and power source are housed in an insulated cylinder about 8 ft. long, of which 5 ft. is buried in the frozen ground. Instruments will measure temperature, barometric pressure, and the direction and speed of the wind. These readings will be fed into a data-processing system and emerge ready for radio transmissions every three hours to receiving stations on the North American continent.

KARIBA DAM STRENGTHENED.—It has been found necessary to use thousands of tons of concrete and rock filling to buttress the Kariba dam and make the dam wall safe against the record high water levels in the next few years. The buttressing will consist of 70,000 cubic yards of concrete—half underground, half above ground—and 25,000 cubic yards of rock filler. The strengthening wedge will be roughly like an inverted cone spearing into the rockbed at the base of the dam wall. It will be 90 ft. high and 120 ft. wide at the top, tapering almost to a point at the bottom. It will project 50 ft. from the dam wall. A weakness was found in the quartzite rock in the top part of the flank of the dam on the southern bank. The new measures are expected to make certain that the south abutment is fully capable of carrying water pressure at the very top level of the largest man-made lake in the world—175 miles long and 45 miles wide in places. This is not the only anxiety at Kariba. The lake is being covered with weeds which make it difficult for fish to live there, and through which boats have difficulty in passing.

KING OFFA SILVER PENNY.—When the National Portrait Gallery acquired a silver penny of Edward the Confessor, dated 1065, it was said to be the earliest portrait in its possession. The record is pushed back some 250 years by the acquisition of another silver penny, this time of Offa, King of Mercia, who died in 796. This coin, only five-eighths of an inch across, is a beautiful example of numismatic design and records the only Saxon King to be depicted on his coinage in a portrait rather than a formalized image of royalty.

LISTENING HORN FOR SATELLITES.—The world's largest horn, enclosed in the world's largest balloon, has been under construction in the United States. It is a highly sensitive antenna for beaming radio signals at orbiting satellites, and also for picking up faint signals relayed from them. The horn, 177 ft. long and 94 ft. high, rotates on rails, and rolls on its axis, so that it can "listen" in any direction. It is protected from the weather by a balloon of rubberized fabric. When inflated, the air pressure inside will be only one-tenth of a pound per square inch greater than outside. People, and even trucks, will go in and out of the balloon through air-locks. The apparatus will be ready for use early in 1962.

MAYAS' LANGUAGE DECIPHERED.—With the help of an electronic computer, three Russian scientists, named Yevreinov, Kosarev, and Ustinov, have

deciphered the written language of the Mayas, the American Indians, ethnically related, who occupied an area of 125,000 square miles in what is now Guatemala, Honduras and the Yucatan peninsula. They spoke several related languages and their empire flourished until the Spanish conquest. Mr. S. Sobolev, of the Institute of Mathematics, who guided the work of the three scientists, states that their task was the translation of a few inscriptions on stone and of the only remaining written manuscripts, known as the Madrid, Dresden, and Paris codices. They include 372 hieroglyphs, of which 200 have remained a mystery until now. The meaning of some of the others could be guessed and there were only a few whose meaning was not clear. In order to decipher the manuscripts it was necessary first to pick out all the words and letters of a Mayan dictionary preserved from the sixteenth century and then compare them in turn with the hieroglyphs, evaluating all the possible meanings and selecting the right ones. This task meant analysing all the possible permutations of 200 elements, with the number of possibilities running into a figure of more than 300 noughts. The Russian scientists decided to restrict the sphere of search for the meanings of the hieroglyphs to the minimum. For example, the frequent repetition of certain signs in the manuscripts led to the belief that they stood either for possessive pronouns or prepositions. Another fact was certain regularities in the structure of sections, sentences and groups of sentences. By establishing these regularities, it was possible to judge which words should be nouns of a definite class; such as the names of gods and names of points of the compass. The signs for "sun," "turkey" and "fish" were easily recognizable. The drawings always had a canonical meaning in the manuscripts, which were calendars used by priests. By comparing the drawings and their parts with the text, it was possible to build substantiated hypotheses about the meanings of hieroglyphs. Mr. Sobolev says the deciphering was accomplished by a combination of work of the human brain and the electronic brain. "We believe the machine will have to work about 200 hours and perform approximately 12,000 million simple actions in order to decipher all the Mayan manuscripts." Up to date the Russian investigation involved about 1,000 million actions and took two full days of work by computer. As a result about 40 per cent of all the texts of the Dresden and Madrid codices, or approximately 600 sentences, were deciphered. According to the Columbia Encyclopedia, "among the Mayan ruins there are many inscriptions written in a hieroglyphic which is far from completely understood. Comparing accomplishments of the Mayas with those of other American Indian civilizations, they emerge as undisputed masters of abstract knowledge—writing, astronomy, arithmetic, calendric development, chronology and the recording of history."

MESOLITHIC FLINTS IN WALES.—The first clear evidence that the Mesolithic (Middle Stone Age) hunter-fishers penetrated the uplands of Wales, and were not confined to the coast, has reached the National Museum of Wales. It is contained in a collection of flint implements of Mesolithic and Bronze Age types from the moorland of Craig-y-Llyn, above Treherbert, in Glamorgan. The discovery is regarded as the most scientific find made during 1960 by one of the Museum "observers"—amateurs who watch in Wales for things which might be of interest to the National Museum. The finder was Mr. S. Price, of Treherbert, a retired roadman. He began by finding a few flints, and was encouraged by the Keeper of Archaeology,

Dr. H. N. Savory, who visited the site with him, to look for others—which he did, successfully.

MIDGET CANNIBALS IN NEW GUINEA.—Australian patrol officers in Papua, New Guinea, after a ten-year search, have made the first contact with midget cannibals, who belong to the Keba tribe and live in the southern highlands. They admitted to the patrol officer that they ate the dead of their own tribe, but not the tribal enemies they killed. These they threw into the rivers or left lying in the jungle. About 150 Kebas live in a hilly pocket near the Erave River. The first patrol to the area was made in 1949, but the Keba people—very shy and timid—ran into the bush. In 1958, a second Australian patrol penetrated the isolated region. This time Patrol Officer Anthony told the Kebas that the Government did not approve of their eating human flesh, but did not press the point and reported to the Government in Port Moresby, that the Kebas would stop their cannibalism in time. The remnants of the giant warriors are dying out in Central New Britain. They kill pigs with their huge axes with which they once took human heads. They are the Makolkols, whose ancestors passed into legend as a fierce race of giants. Only 23, six men, five women and 12 children, are living today in their village of grass huts. The Makolkols are not aggressive, but keep strictly to their own habits. They will not eat rice or tinned foods and refuse to travel by night because they fear evil spirits. Only a small proportion of the 1,500,000 natives in Papua and New Guinea have not been contacted by white-led patrols. The policy of the Australian Administration is to civilize these people in a gradual manner. Already some advanced New Guinea tribes enjoy local autonomy. Several natives are elected to the Legislative Council, which is the parliament of the island territory.

MIGRATION OF INSECTS.—A process of stock-taking is in progress on migratory flights by insects by entomologists in many countries. Recorded flights are impressive. The Monarch butterfly moves in the autumn from southern Canada and central United States towards the coastal belts of California and the Gulf of Mexico and also to Central America. In Europe, in spring, the Painted Lady flies in swarms from North African coastal districts as far north as the Western Isles of Scotland. In some cases there is evidence of return flights. Painted Lady butterflies have been marked on the Isle of Canna in the Inner Hebrides and recovered at Grangemouth on the Firth of Forth. Research on locusts has done much to destroy the idea that long-distance flights at low altitudes are a main means of migration. Dr. R. C. Rainey, working for the Desert Locust Survey in East Africa, applied a meteorological argument to account for the frequent arrival of locusts at about the same time as rain, with the result that food for them was soon available. Following up his ideas, he transformed what had appeared to be "purposeful" active migration into a process of being carried by the wind, largely at high altitudes. He suggested that the winds would tend to blow the swarms into regions where different air masses converged, which would tend also to be regions of rainfall. As more information is available the line between migratory flights and casual dispersal has become blurred. High-level flight ensures a dispersal, by winds, over wide areas. Low-level flight provides a means by which suitable host plants may be encountered. Taken together, the two mechanisms provide a means by which the probability of suitable conditions being encountered is increased, and the survival of the

species favoured. Some of the insects find what they need in all directions and at all distances.

MINE TEST EXPLOSIONS.—To enable scientists to discover more about the mechanism of coal dust explosions a new dust explosion gallery is being built at the Safety in Mines Research Establishment at Buxton at a cost of £250,000. Tests have been conducted at Buxton since 1926 in two four-foot diameter 100 yards long steel galleries, but an experimental chamber of a size nearer to that of an actual mine road is needed. The new gallery will be eight feet high and 400 yards long. Some fire-damp explosions cause clouds of dust to rise up and these in turn ignite. A dust cloud burns not unlike a mixture of gas and air and the reaction product behind the flame expands to produce a further blast ahead of it. This raises still more dust along the roadway, on which the advancing flame can feed. To fight the hazard, it is necessary to understand how the coal dust explosion is propagated. This means studying such explosions in controlled conditions and the theoretical investigation of the aerodynamics involved.

MOHOLE BORING PROJECT.—"Operation Mohole," the project for boring a hole through the earth's crust in the ocean depths of the Pacific off Guadeloupe Island was reported to have reached the "second layer." Two 10-ft. cores from the hole showed that the layer was made of basalt, a volcanic material, which appeared to indicate that the drill might have pierced the earth's crust. The "second layer" lies 550 ft. lower than the ocean floor, which at this point is 2.2 miles below the surface of the water. The temperature at 500 ft. below the ocean bottom was 68°F. The two cores consisted of hard, fine-grained basalt. Scientists call this the "second layer" because they believe it lies between the bed of grey-green clay on the bottom of the ocean and a "third layer" expected to consist of some form of basalt. Beneath that again is the Moho (or Mohorovicic discontinuity, named after a Yugoslav geologist) which is thought to mark the boundary between the earth's crust and the "mantle" below it. It is questionable, in view of the solid nature of the "second layer," whether any prehistoric evolutionary evidence will be found. One theory is that while the "third layer" is uniform rock everywhere, the "second layer" elsewhere may prove to be less solid and more heterogeneous, so that all hope of obtaining the sought-for information is not yet abandoned.

NAUTILUS SECRETS.—The search for the Nautilus, which took Dr. Annette Bidder to the Pacific, has produced a description of how these early sea animals may have lived one thousand million years ago. Modern Nautilus lives in a fat spiral shell, like a hunting horn curled up, the size of a man's hand. It is rare, being found in the south-west Pacific off the coasts of New Caledonia, and Fiji. Empty shells have been long known, but the first intact specimen was not recovered until the end of the last century, and only in the last few years have specimens been kept alive in tanks. Nautilus, Dr. Bidder told the British Association, is of high interest because fossils show that creatures much like it were the first shell fish to appear. The modern animal is a direct descendant of the original, other less direct descendants are ammonites and the cuttle fish. Especially interesting is the survival in the modern animal of a large empty space in the shell, for buoyancy, and the use of a jet of water squirted from the head for propulsion. Dr. Bidder caught her animals in traps like lobster pots at ocean depths of up to 100 metres. Nautilus specimens

could be recovered from great depths without harm, while fish caught in the same traps were dying because their swim bladders had blown up through their mouths and choked them. The animal can adjust its buoyancy, possibly by injecting fluid into the empty space in its shell and it can take on protective colouring. This is an indication that it lives naturally in comparatively shallow water.

NEW PEAK IN MID-ATLANTIC.—H.M.S. *Owen*, the naval surveying ship retracing the first and last parts of Darwin's cruise in the *Beagle*, brought up a 4 ft. "core" of the sea bottom from a depth of nearly five miles in the Puerto Rico trench. This is the deepest core yet obtained by the Navy. The ship discovered a new peak on the Mid-Atlantic Ridge not shown on any chart. It is 370 fathoms from the surface—almost exactly half the depth previously recorded by any ship with a 100-mile radius. Some of the ship's company and scientists landed on the remote 64 ft. high St. Paul's Rocks forming the highest point of the Mid-Atlantic Ridge. In 1872 the *Challenger* deposited a glass bottle there containing a page from the current Navy List, giving names of her officers. The *Owen* left a glass jar containing a list of the officers, scientists and ship's company on board, a signed certificate explaining the circumstances and date of the visit, details of the ship herself, and three copies of *The Times*.

PACIFIC SALMON IN ATLANTIC.—Norwegian fishermen found in their nets fish they had never seen before, to which they gave the name of "Russian Salmon." The name was a compliment to Russian scientists who have been engaged in an experiment to bring two species of Pacific salmon into Russian Rivers which flow into the Atlantic. When hydrological conditions off the Murman coast were found to correspond closely to those of the north Pacific, 2,400,000 fertilized eggs were flown from the Sakhalin district in 1956. In 1957 to 1959 the air cargoes were increased to 13, 19 and 21.6 million eggs. The 1960 programme was for 35,000,000 supplemented by eggs from the local stock returning to the rivers from their feeding period at sea. The two of the five Pacific species referred to are known in Canada as the humpback (*Oncorhynchus gorbuscha*), the smallest of the family, running to 3-6 lb., and the dog salmon (*O. keta*), 10-12 lb. Since mature fish began to be caught over 30,000 humpbacks were reported by Russian fishermen, and the director of the economic council for the Murman region says the time is not far distant when a regular fishery for the Pacific salmon so introduced will be established in Atlantic waters.

PARROT OF THE NIGHT.—The Kakapo, a parrot that sleeps by day and lives on snowy heights, was captured in New Zealand, in an effort to breed this vanishing bird in captivity. It was feared that it had not survived, but its mossy cavity burrows and paths leading to its feeding grounds were found in the Fiordland National Park. Several searches were made without seeing the bird. This was not remarkable, for the Kakapo emerges only at night, and, except in the mating season, makes no sound save a muttering croak as it feeds. When mating, the male bird has a booming drum call that can be heard several miles, but the mating season comes only in alternate years. Some 65 years ago it was much easier to take the Kakapo, and when Resolution Island near Dusky Sound was made a bird sanctuary, the naturalist-custodian, Mr. Richard Henry, was able in one season to take 135 Kakapo from the mainland for liberation on the island. The sanctuary liberation was made in an effort to

avert extinction of the night parrot. It had disappeared from the North Island before white settlement began, for it was defenceless against skilful Maori bird-hunters. Its last retreat was to the fastnesses of the glacial valleys of Fiordland. The latest capture of the Kakapo throws further light on the odds that piled up against the bird. Four traps were set on the Kakapo track through the mountain tussock. When examined next morning two were empty, one held the Kakapo, and the next an opossum. The Tutoko Valley, where the Kakapo was taken, is over three hours hard walk from the road to Milford Sound. Days were spent in searching the rough bush, scrub, and mountain grass; followed by night vigils to hear the Kakapo mating cry. A few days after the first Kakapo was taken, two others were captured. All are now safe at a North Island farm-sanctuary. They are beautiful birds, almost two feet long, bright green on the back and wings, with flecks of yellow. The Kakapo cannot fly, but uses its wings to help its balance in tree-climbing and gliding downhill. It was well-named by the Maoris "Parrot of night"—and naturalists now hope that the night will not be the long night of extinction.

PARTICLE OF MATTER: SHORT LIFE.—The discovery of a new elementary particle of matter, which gives an important insight into the structure and behaviour of the atomic nucleus, was announced in Washington by the Atomic Energy Commission. The particle, called the omega meson, was discovered by scientists in the University of California's Lawrence Radiation Laboratory at Berkeley. The particle, whose existence was predicted several years ago on a theoretical basis, has a lifetime of a hundred billionth of a second. It plays an important part in the structure of protons and neutrons, the basic "building blocks" of atomic nuclei. Like the neutron, it has no electrical charge.

PETRA'S EARLIEST BUILDINGS.—A few of the missing pages in the history of Petra, capital of the Nabatean Kingdom, have been found as the result of excavations by the British School of Archaeology. For the first time, buildings have been unearthed dating from the third century B.C., the period at which the Nabateans emerged from the Arabian Desert to begin the creation of their astonishing "rose-red city half as old as Time." Until now there had been no evidence of habitations at that period other than caves. Excavations beside the ceremonial Roman road have revealed, at a depth of more than 7 ft., the remains of free-standing buildings, their walls formed of stones held together by beaten mud. A clay oven has been found largely intact; and copper slag suggests it may have been used for smelting. In a separate excavation was part of a better-made house—indicating the pace at which the Nabateans evolved from a nomadic to a settled people—and a third pit exposed a course of solid wall showing workmanship of a high standard. Further evidence of the Nabateans' progress was produced by the excavation at the large mounds covering part of the valley floor below Umm el Biara, the 3,500 ft. mountain. Fifteen feet below the surface the archaeologists came upon a commodious building of the early first century A.D., constructed of well-cut blocks of stone, the inside walls originally covered with moulded and painted plaster. It had drains and baths. The site yielded an assortment of coins, figurines, bone needles, cosmetic spoons and ear-picks. The pottery used in this residence is delicate and distinctive in decoration—in contrast with the plain and coarse shards from the other pits. At the summit of

Umm el Biara an examination of an Iron Age site revealed remains of the defensive works of a settlement which may possibly be the Sela of the Edomites.

PIPELINES.—The Minister of Power, Mr. Richard Wood, stated in the House of Commons that legislation would be introduced to provide for public enquiries into objections to pipeline projects. Reputedly known to the Chinese in 5,000 B.C., one of the first pipelines recorded was a trans-desert pipeline of sewn oxhides ordered by Cambyses, King of Persia, to carry water for his army invading Egypt in 525 B.C. Carriers of oil in modern times, they have developed from the first wooden six-mile length in Pennsylvania in 1861, to 50,000 miles of steel in the United States alone. For years Russia has piped oil from Baku to the Black Sea; now natural gas is carried directly to Moscow. In 1962 the 2,500-mile-long pipe from Kuibyshev will take all the oil needed to East Germany, Hungary, Poland and Czechoslovakia. Italy has a highly developed network of natural gas pipelines, France hopes to receive Saharan oil and gas from pipes under the Mediterranean, oil companies plan a pipeline from Marseilles to the North Sea. During the war Britain developed 1,200 miles of military pipelines to carry fuel; details of the network are still secret. Pluto (pipeline under the ocean) took fuel across the Channel to the Second Front. Emphasizing the importance of pipelines, Lord Lucan, in the House of Lords, counted the products which could be transported by them in the future. Solids could be made to flow in compressed air or liquid; coal, flour, sugar, cement and milk might be on tap.

PITCHER PLANT FLOWERS AT KEW.—One of the rarest pitcher plants, the *Heliamphora Nutans*, came into flower at Kew Gardens. The species is known only from very wet places on Mount Roraima in British Guiana, and was first found there, at 6,000 ft. above sea level, by R. H. Schomburgk. The present specimens were collected by Mr. Adrian D. Thompson, Deputy Director of Land Development in British Guiana, who led an expedition to Mount Roraima, and in June, 1960, sent to Kew a number of live specimens of the *Heliamphora*, with orchids and other plants. These are the first plants of *Heliamphora* to be grown at Kew. It was cultivated for many years at Edinburgh, but was eventually lost. It has now been replaced there with some of the present consignment at Kew. The plant, which needs a very damp atmosphere, is extremely difficult of cultivation, and little is known about how it functions or derives nutriment from its prey. *Heliamphora nutans* has green, pitcher-shaped leaves, which grow in tufts from the ground and in which insects are trapped. The specimen at Kew sent up two flowering stems. The taller of these was about 17 in. high. The plant is apetalous, but it has four sharply pointed perianth segments which look like petals. They are 1 in. long and white with a scarcely perceptible pink tinge.

POND SLIME HELPS RESEARCH.—A new method of providing a variety of organic chemicals in radioactive form for research was developed at the Atomic Energy Authority's radiochemical centre at Amersham. Scientists there grew the micro-organism chlorella, of which the green slime in stagnant ponds is mainly composed, in an atmosphere of radioactive carbon dioxide. The compounds that chlorella builds up are thus automatically made radioactive and can be identified in experiments. The importance of this in medical research is that chlorella produces a wide range of

living substances similar to those in the human body. Radioactive acids produced from *chlorella* may be used to explore the theory held by some heart specialists that an excess amount of saturated fatty acids in human diet is one of the main causes of coronary thrombosis.

PONTIUS PILATE STONE.—A tablet inscribed with the name of Pontius Pilate, which was used in building a theatre in Caesarea, near Haifa, was discovered by a team of Italian archaeologists led by Professor Antonio Frova, of Milan. The stone, which also bore the name of the Emperor Tiberius, may have been part of a monument demolished after Pilate was recalled to Rome in A.D. 36 to be tried for the slaughter of Samaritans, who searched Mount Gerizim for golden vessels said to have been buried there by Moses. Professor Frova said the stone measured 80 cm. by 50 cm. and the letters were 8 cm. high. There were four lines of text, but the only decipherable words were "Tiberium" and "Pontius Pilatus." The stone had been used as a step. The theatre which the Italian archaeologists are unearthing is believed to have been built towards the end of the first century B.C. or early in the second century A.D. but the Italian archaeologists have unearthed only additions or repairs from the second, third, and fourth centuries A.D. Caesarea, the Mediterranean port city built by King Herod as a tribute to Augustus, was Pilate's headquarters when he was Procurator of Judea and Samaria between A.D. 26 and A.D. 36. He went to Jerusalem mainly during Jewish festivals when there was danger of disturbances.

READING BY MACHINE.—A device which can recognize printed numerals, and may become the basis of a machine for reading printed letters and numerals automatically, was exhibited by the Royal Society. It has been developed by Dr. M. B. Clowes and Mr. J. R. Parkes, of the National Physical Laboratory. Dr. Clowes has explained that the machine differs in principle from others used for the automatic recognition of characters, and it might for this reason turn out to be more successful. Apparently earlier devices for automatic recognition have found it difficult to take account of the imperfections and misorientations of the type produced in commercial practice. The essence of the new machine is an optical device which makes it possible to form copies of an original character in terms of a pattern of light reflected between nearly parallel mirrors, and to superimpose these copies on each in such a way that each is displaced slightly from the original. By the apparatus it is possible to arrange that copies of the original character are displaced from the original in different directions. Light sensitive devices which can keep a record of the amount of light falling on each other at different orientations are then used to produce a record characteristic of the essential identity of the numeral concerned, and comparatively unaffected by misalignment of printing or by imperfections of type face.

RHEUMATISM: WHAT IS THE CAUSE?—To advance research into rheumatism, particularly cartilage and the part it plays in osteo-arthritis, the first electron microscopy unit in the world was opened by Lord Astor of Hever at St. Thomas's Hospital, London. The unit, which cost more than £12,000, has been provided by the Empire Rheumatism Council. The director is Professor D. V. Davies, Professor of Anatomy at St. Thomas's Medical School. Dr. W. S. C. Copeman, chairman of the Empire Rheumatism Council, said there were no statistics for osteo-arthritis, a disease

of the joints, but he estimated that at least half a million suffered from this complaint in Britain. Up to the present cartilage has been studied with ordinary compound microscopes which magnify up to 1,000 times. The electron microscope magnifies up to 150,000 times and makes possible a study of the detail of the cells under all conditions. Its magnification is such that if an ordinary full-stop in print were put under this instrument it would appear to be 50 yards in diameter. In this way the cell, which is only one-thousandth of an inch, is enlarged to a diameter of 15 in. We still could not say what causes many of the different kinds of rheumatism. Until the basic cause was known effective treatment could not be expected.

RICH LIFE ON THE SEA BED.—Discussing life and environment on the bed of the sea, Professor C. M. Yonge, F.R.S., told the British Association that the floor of the continental shelf was a region of profound importance. Evolutionary changes had occurred there which had stocked every available bottom environment. From it animals had migrated down the continental slope into the ever-increasing monotony and the ever-decreasing food supplies of the abyssal environment or upwards into the greater hazards, but greater returns, of shallower waters. This had sometimes led them on to the shore or into fresh water and even, on to the land. Worms, molluscs and crustaceans, formed the food of fishes and so were of direct economic concern to mankind. In those depths, nowhere exceeding some 100 fathoms (600 ft.) and often less than half that depth, the physical environment was not exacting. Salinity altered little if at all; temperature changed slowly and extremes were not great. Pressure, which might have some effect in greater depths, had none there. What did vary was the nature of the bottom. That was the reason why the content of dredge or trawl varied so much from place to place. Long before man began to view the bed of the sea by the aid of cameras or underwater television or by gazing through the windows of a bathyscaphe upon an illuminated ocean floor, he had obtained a fair idea of the varied nature of the sea bed by the simple process of noting what adhered to the tallow inserted into the hollow at the end of the sounding lead. The Victorian naturalists and their European contemporaries revealed the wealth of animal life on the continental shelf.

ROCKS STILL BEING FORMED.—Rocks formed out of, and sometimes with the help of, organic materials were the subject of discussion among the geologists at the British Association. The formation of black shale rocks, such as those associated with the coal measures is still going on in several parts of the world. Professor Kinsley Dunham, of Durham University, pointed out that in Dartmoor swamps which were badly drained, in lakes such as those in Denmark, in river estuaries, particularly those running into the Baltic, and in land-locked sea basins like the Black Sea and the Norwegian fiords, organic material was being carried down with other sediment in a way which will form shale rocks millions of years hence. In each case the sediment must be deposited in places where organic remains cannot be got rid of by the scavenging action of oxygen dissolved in the water. Dr. L. G. Love, of Sheffield University, described finding fossilized remains of micro-organisms in ancient shale rocks. These were microscopic spherical objects made of iron sulphide. The fossils were the remains of organisms which fed on organic remains and iron sulphide within their own bodies as a result. It was reasonable to suppose

that a good deal of the sulphide ores found in conjunction with black shale rocks might have been caused by the action of similar organisms.

ROMANO-BRITISH CHRISTIAN CHURCH.—The reported discovery at Silchester of the only Christian church of Roman Britain, as revealed in 1892, has been confirmed by Professor Ian Richmond, of Oxford, and Mr. George Boon, of the National Museum of Wales. After the excavations of 1892 the remains were filled in. Mr. W. H. St. John Hope then said, "Close to the south-east corner of the forum, in the centre of the city, and in the angle formed by the intersection of two of the main streets, the excavations have disclosed the foundations of a small basilica, which, there seems every reason to believe was a Romano-British Christian church." He estimated that as the building must have been constructed probably not later than the end of the fourth century, the foundations of the oldest church yet discovered in Britain had been laid bare. Mr. Boon now states that it is certain that the church dated after the Edict of Toleration in A.D. 313. Coins of the period of Constantine the Great (A.D. 306-337) were found in levels associated with the use of the building. It was possible that one of the coins had been built into the mosaic on which the altar stood, although this could not be established with certainty because the building had been occupied by squatters who might have dug the holes in which the coins were buried.

ROMAN FORT NEAR CAERNARVON.—The Royal Commission on Ancient and Historical Monuments for Wales and Monmouthshire has concluded its investigations of a Roman fort at Llystyn, 11 miles south of Caernarvon, the existence of which was unknown until it was revealed in gravel digging. Unhappily the site has been progressively destroyed as the gravel has been extracted, and has now almost entirely disappeared. The Commission has been able, however, to take photographs, and to make drawings, which disclose almost the whole plan of two forts which existed on the site. The area of the original fort is about 450 ft. square, with the angles at the cardinal points, and stands 400 ft. above sea level. This fort dates from A.D. 80, and was a Roman auxiliary fort of conventional type, having a headquarters in the centre with commandant's house and granaries on either side. Other parts of the fort were devoted to barracks for the troops, and a hospital. The first fort was destroyed by fire, perhaps 20 or 30 years after it was built, and on the northern corner a second fort, of only a quarter of the area, was constructed, since timber stumps of the earlier fort were unrotted. Few objects from the second period were found, but the earlier fort produced a quantity of pot-sherds and fragments of glass, which give clear evidence of its date.

ROYAL SOCIETY.—Sir Howard Florey, Professor of Pathology at Oxford University, who in 1945 shared the Nobel award for the discovery of penicillin, was elected President of the Royal Society in succession to Sir Cyril Hinshelwood. Sir Howard, born in Adelaide in 1898, is the first Australian president. In his final address as president Sir Cyril returned to his own research on the adaptation of micro-organisms to new conditions, including exposure to antibiotics. His view is that mutations, acted on by selection, are "not the sole or even the most important source of resistance" to drugs. He disclosed that unpublished experiments by W. T. Drabble suggested that both processes might act together, and he thought there should be a re-synthesis of views with

an approach that appealed more to the chemist and physicist. The council of the Royal Society accepted an offer of the Leverhulme Trust Fund to mark the Society's tercentenary by the award of a gold medal for award every three years to the individual who in the opinion of its council shall have made the most significant contribution in the field of pure or applied chemistry or engineering, including chemical engineering. The medal is accompanied by an award of £500. The first award was made to Sir Cyril Hinshelwood, for his contribution to physical chemistry.

SALMON STEER BY THE STARS.—Observations made by the Department of Fisheries at their biological station at Nainamo, British Columbia, indicated that the sockeye salmon used the sky and the stars to orient themselves while migrating. Migration of the adult fish is limited to particular pathways at particular times. The influences of daily, lunar and seasonal cycles in activity or behaviour, of weather changes, and of hydrodynamic forces, have also been substantiated. When the salmon have a vision of a clear sky their directional tendencies are consistent. But if the sky is overcast or there is some artificial covering the fish point in all directions. Moonlight, the sunset after-glow or even city lights can interfere with their "built-in radar". There is sufficient evidence to show that the celestial orientation is essential for the migration of the sockeye salmon out of the lakes and towards the sea. Experiments have shown that adult salmon can keep up a speed of two and a half feet a second for 100 hours, but suffer fatigue at three feet per second. In one instance two salmon were still swimming after covering 175 miles in three and a half days.

SEA WATER FOR DRINKING.—A new method of extracting drinking water from the sea was announced by the General Electric Company, which claims that it is cheaper and better than many other available systems. The basis of the method is a tube containing revolving blades similar to those of a car's windscreen wiper. The sea water is fed into the tube and the blades then spread it in a thin film over the walls, which are heated by steam. The water vaporizes and passes out through the top while the concentrated brine is removed from the bottom. The value of the blades is that they permit the water to be vaporized without boiling—and boiling reduces the purity of the product. The system is said to produce 42 lb. of fresh water from every 100 lb. of sea water, and to require only one-quarter of the energy other systems would use in the same operation. The Company claims that it also saves 60 per cent. in space and 40 per cent. in weight, and that the water contains only one part of salt to a million parts of water.

SLUGS AT FREEZING POINT.—Slugs have a physiological system which enables them to lead an active life at temperatures which cold-blooded animals could not tolerate. This has been demonstrated by Dr. Kenneth Mellanby, at Rothamsted Experimental Station. One of the most menacing slugs, *Agrotolimax reticulatus*, which wades into germinating wheat, feeds as normal at 0-8°C., and is not immobilized even at freezing-point. A garden slug, *Arion hortensis*, becomes sluggish at 5°C., while *Milax budapestensis* keeps on until 0-8°C. This does not seem to be a matter of acclimatization. Many insects, and amphibians such as frogs and newts, can become acclimatized so that their "chill-coma" temperature is raised or lowered according to what conditions they are used to. A warm spell will not soften them and they keep eating when frosts return.

SOLAR WIND.—A space probe sent up from Cape Canaveral disclosed the existence of a "solar wind" sweeping into space from the sun at a speed of millions of miles an hour. It consists of hydrogen nuclei and electrons thought to pour outwards from the sun's corona. One suggestion is that it may have conveyed the hydrogen from the sun to the earth during the estimated 3,300m. years of the earth's history, that hydrogen from this source should reach the earth at the rate of about $1\frac{1}{2}$ tons a second, and that, if oxidized to water the amount would be of the right order to account for all the water in the sea.

SPOT OF LIGHT ON THE MOON.—The Bell Laboratories in the United States announced a "light laser," a device which is capable of shining a spot of light on the dark limb of the moon. The light laser uses a mixture of helium and neon gas to produce a beam of infra-red radiation, instead of the brief pulses of light hitherto available. A beam of light can carry far more messages than a radio beam. But in ordinary light, the light waves are out of step, and cannot be used to carry information like radio waves. The laser, however, produces light which is like a single tone of sound—where ordinary light is like the mixture of tones which comes from a musical instrument. Laser light emerges from the device in a parallel beam which does not fan out like a searchlight, but continues as a thin needle of light over immense distances. A beam one yard wide on earth would be about 170 yards wide at the distance of the moon—while a searchlight beam would be thousands of miles wide. This suggests that the laser could be an ideal method for space communication. Messages could be sent over great distances, and a deal of information sent in a very short time. Apart from its practical applications, laser light could have many uses in the laboratory for measurement and analysis.

SUN-GLOW EXPLAINED.—Recent investigations have thrown doubt on the explanation once given of the beautiful sunsets which began in July 1908 and were followed by afterglows seen far into the night. On June 30 there had been a great fall of meteorites in Siberia and their impact on the earth had sent large clouds of dust into the upper atmosphere. It was remembered that when the volcano Krakatoa erupted in 1883 the fine ash sent into the air had caused spectacular red sunsets over the greater part of the globe. Hence the sky-glow of 1908 were due to a similar cause. It is now clear that, whatever fell in 1908, the destructive effects at the point of impact were due to the expansion of the highly compressed air brought down in their passage earthwards. This mass of air expanded horizontally on reaching the ground, and all the forest trees within a radius of 30 miles were laid flat. It was hard to see how any large quantity of dust could be thrown to a great height, as the region was swampy and covered with vegetation. A Soviet astronomer has revived the alternative theory that the bodies which struck the earth in 1908 were not metallic or stony meteorites but were the nucleus or solid part of a small comet. These nuclei are composed mainly of frozen gases, either in the form of one large mass or of a condensed swarm of smaller masses, and their melting and evaporation on reaching the earth would account for the absence of any solid remains of the bodies involved in the fall. The sunset effects might be attributed to the finely divided matter surrounding the nucleus and forming the "coma" and tail of the comet. Coming probably from the direction of the sun, it would be in a bright sky and would give no warning of its approach.

TAY BRIDGE TO COST £4,500,000.—Work on the road bridge across the Firth of Tay is to begin early in 1963. The bridge will cost £4,500,000, and will take three and a half years for completion. The course of the bridge will be from the King William dock areas at the Dundee end, and the south end will be at Craighead of Newport. It will be approximately a mile and a half long, and is expected to earn about £185,000 net annual revenue.

TIDAL INSTITUTE AT LIVERPOOL.—Liverpool Observatory and Tidal Institute, which for more than 30 years was administered jointly by the Mersey Docks and Harbour Board and Liverpool University, has become the sole responsibility of the University. In addition to its work of tidal prediction the Institute was involved in the study of major problems, such as the determination of mean sea level and the investigation of storm surges, as well as other matters of geophysics and oceanography. At the time the observatory was founded in 1845 by the Liverpool Dock Trustees, astronomy and meteorology required most effective pursuit, but while these studies are now being met in other directions, the work of the Institute in serving the maritime needs of the nation has met with an ever growing need. The one o'clock gun, which has been a traditional feature of Merseyside since September 21, 1867, will still be heard.

TIDAL SURGE WARNING.—The prediction of dangerous surges of the sea around the coasts of Britain is now accurate and—in the North Sea at least—comparatively easy, Dr. G. W. Lennon of the Tidal Institute of Liverpool University told the British Association. The conditions which caused a prolonged increase of sea level such as that which led to the disastrous floods of 1953 were now predicted as a matter of routine. Suitable circumstances caused the movement of a long water wave southwards down the North Sea. Theoretical analysis and a study of past statistics had made it possible to work out the most desirable height of sea defences along the East Coast. The prediction of tidal surges elsewhere in Britain was a matter of some difficulty. There had been some success in the Severn estuary where experience had shown that the level of the sea at Avonmouth could be changed by as much as fifteen feet in six hours as a result of variations of wind speed and direction.

UNDERGROUND STEAM IN NEW ZEALAND.—The geysers and hot springs in North Island, New Zealand, have been tapped by a geo-thermal power station at Wairakei, and have been made capable of delivering 6,500 kW of electricity to the national grid. It is the first natural-steam-driven generating plant in the southern hemisphere, and its development has been so satisfying that many more bores to tap steam down to 3,000 ft. and to deliver 170,000 kW are scheduled. It is estimated that the natural steam potential of the area can support development up to 260,000 kW. Wairakei is only one small outcrop of the vast triangular thermal region of North Island. United Kingdom consultants estimate that there are 7,300m. British thermal units locked up in this triangle waiting to be used. Virtually nothing is known of the source of this underground heat.

UNDERSEA CURRENTS ON THE SEA BED.—Scientists of Columbia University have spent eleven years in examination of the sea bed in the Atlantic and the Caribbean, and have come to the conclusion that long-standing opinions about it are not satisfactory. With a steel tube driven into the floor of the ocean,

the scientists took more than 500 samples of mud. These showed that the bottom, instead of being a place of undisturbed calm as commonly believed, changes almost as much as continental land masses change in geological processes and that samples of mud differ greatly. Only one of 20 or 20 samples contained a complete and continuous record of the gradual and steady fall of what makes sediment on the ocean floor. From studies of undisturbed bottom sediment, and the use of carbon 14 determination, there was reason to believe that the last Ice Age, which began 60,000 years ago, ended not 20,000 but only 11,000 years ago. Dr. David Ericson, one of the team, said it used to be believed that about an inch of bottom mud accumulated in a thousand years. Now the records showed that as much as 6 ft. could suddenly be deposited by an undersea current of mud. The rate of sediment accumulation could range from a centimetre a thousand years up to 170 centimetres. Sudden slumping of sediment could carry large layers of mud down to the ocean floor, deep currents could scour off layers of sediment. The oldest cores studied by the team came from the upper Cretaceous era, 100,000,000 years ago. The conclusion was that the ocean basins came into existence at some time during the Cretaceous era. There must have been seas before that time, but the continental distribution was very different from what it now is.

WEATHER RADAR CHAIN. The British Government ordered equipment for a meteorological radar chain over the Middle East air route—Ankara, Tehran, Karachi—as a contribution under the programme of technical assistance to the regional countries of the Central Treaty Organization. The equipment comprises five Decca wind-finding radars and one weather radar. The type of wind-finding radar supplied can measure wind speed and direction up to the 100,000-ft. level and will meet the needs not only now but five to seven years hence when supersonic airliners will be operating at altitudes between 50,000 and 80,000 ft.

WILD ANIMALS IN PERIL.—An international conference on the preservation of wild life in Africa was held at Arusha, in the Northern Province of Tanganyika. The main object was to interest Africans in the conservation of the wild life in the countries they are now taking over. The primitive African's view of an animal is something to be killed and eaten, or at any rate killed. The politically minded African thinks that National Parks are just a hobby of the white man who has exterminated wolves and bears in his own country. The aesthetic and scientific cases for conservation are not too easy to put before minds such as these, and the most hopeful approach is the argument of expedience. Experience has shown that National Parks, and other areas in which herds of wild animals are to be seen, are a fast increasing tourist attraction. In Kenya tourism is already the second largest source of revenue, bringing in £8m. a year.

There is a vast amount of poor African land of which the most economic use is not to cultivate it in European fashion but to run native animals such as antelopes upon it and to take an annual "crop" to be sold as meat.

While the conference was in session news was received of a gigantic poaching operation from the northern boundary of the Serengeti National Park. Organized gangs of motorized poachers were waylaying vast herds of game on their annual migration northwards and carrying out a systematic massacre with poisoned arrows, snares, shotguns, and any other available weapon.

WORM 5 FT. 6 IN. LONG.—The Zoo acquired a giant earthworm which, when extended to its full length was 5 ft. 6 in. long. It was discovered in the Colombian Andes, at a height of 15,000 ft., by an American explorer, Mrs. Marte Latham, who was reported to have been hunting for it for 20 years. It travelled from New York in a sealed wooden crate packed in ice crystals, covered with damp loam, and on arrival at the Zoo buried itself in two or three feet of leaf mould taken from the Zoo worm area and special soil brought from the Andes to make it feel it was at home. The worm, named Gertrude, looked like a snake with a flattened head a little thicker than the rest of its body and about two inches in diameter. It was greyish blue in colour, and covered with a large number of rings. Its food consisted of lettuce, vegetable leaves, and apple mixed in the earth mould. It died after a few weeks at the Zoo. American zoologists acclaim it as one of the most inexplicable scientific discoveries for years. One theory is that it belonged to a prehistoric group sometimes found in Burma and Australia. The claim from the Zoo was quickly challenged. A report from Port Elizabeth stated that local scientists claimed there were earthworms in parts of the Cape Province much bigger and better than the five-foot Andean specimen in London. A former museum director of Albany, Dr. John Hewitt, said he had measured one worm 10 ft. long, and the director of the museum in King William's Town, Mr. J. Skead, said the worms made their home in a wide stretch of country, making basins up to 15 ft. across and 6 ft. deep.

YEAR OF THE QUIET SUN.—A counterpart to the International Geophysical Year to be known as the International Year of the Quiet Sun (I.Q.S.Y.) is being planned for a 21-month period from April 1, 1964, to December 31, 1965. The I.G.Y. coincided with the 11-year cycle of maximum activity in the sun; the I.Q.S.Y. will cover much the same field of interests at a time when the sun is "resting." A Royal Society committee have been formed for co-operation in geophysics. Radio will be the principal interest; but cosmic rays, the aurora and geomagnetic phenomena will be among the subjects studied.

THE NATIONAL BUILDINGS RECORD

Fielden House, 20 Great College Street, S.W.1.

The National Buildings Record is an organization established in 1941 under the direction of an Advisory Council. It is supported by an annual grant from the Treasury, and its functions are:

To maintain a library of photographs and measured drawings of English and Welsh architecture which is open to the public for consultation and study. There are over 525,000 photographs.

To supply copies of photographs where nega-

tives are available. There are approximately 300,000 negatives.

To prepare and acquire additional records which are constantly being added to the library.

To maintain an index of architectural records (photographs measured drawings, sketches, and engravings) in public and private possession.

Chairman of Advisory Council, Sir James Mann, K.C.V.O., Hon. V.P.S.A., F.B.A.
Secretary, Cecil Farthing, F.S.A.

WEATHER IN THE UNITED KINGDOM, 1960-1961

(1960) August.—Cool, thundery and rather wet weather prevailed during August, as in the previous month. Periods of rain, or showery weather, alternated with occasional sunny days. Temperatures nowhere rose above 78°F. The 11th was the coldest August day at Worthing for 25 years. For the first 19 days the winds were mainly from the north. The first two days of the month were generally sunny, with thunderstorms in south-east England. The 3rd and 4th were mainly dull, with widespread rain and drizzle, but 78°F. was recorded on the 3rd at Renfrew and Pitlochry in Perthshire. Thunderstorms occurred during the 5th to 7th, giving 3½ in. in 2 hours at Old Malden, Surrey, on the 7th. Mainly sunny weather prevailed on the 8th. The 9th to 11th were wet in southern England, some places recording continuous rain for 30 to 40 hours. Brighton had nearly 5 in. for these three days, floods and landslides resulting in parts of Sussex, with delays to road and rail traffic. The 12th was generally sunny, but more general rain reached south-west England on the 13th. Thundery rains occurred locally on the 13th and 14th; Harlech, on the coast of Merionethshire, recorded 1 in. in 15 min. on the 13th. In Scotland slight air frost occurred locally on the 13th and 14th, and in North Wales on the 10th. The 15th to 17th brought sunny periods, but scattered thundery showers with winds from the north-west. Thunderstorm rains were widespread on the 18th. From the 19th to 25th mainly south-west winds predominated, with bright spells and scattered showers. Temperature rose to 78°F. at Cannington (Somerset) on the 23rd, when a secondary depression moving north-eastwards across the Irish Sea brought heavy rain to parts of the Midlands, Northern Ireland and south-west Scotland. More than 5 in. of rain fell in parts of the counties of Antrim and Londonderry, causing disastrous flooding. Thunderstorms occurred locally each day from the 19th to 27th and gale force winds on the 24th, 25th and 27th. On the 27th a tornado swept across parts of Wiltshire and the Cotswolds. Most western districts experienced sunny weather on the 30th, but the 31st brought rain to most districts. The total rainfall over England and Wales was more than that of any August since that of 1939 and over Scotland since those of 1957 and 1956. There was more than twice the average in a number of areas, including parts of south-east England, the Midlands and near the Moray Firth. Mean temperature was below average nearly everywhere, but August 1956 was cooler over both England and Wales, and Scotland. Sunshine totals were markedly below the local averages in the neighbourhood of the Moray Firth, but mainly above average in north-west England, North Wales and Northern Ireland.

September.—Wet, changeable and rather cool weather continued over most of England and Wales, while over Scotland the weather was drier and sunnier than usual. The first week brought widespread rains in central and southern England, which were heavy at times and associated with thunderstorms, especially from the 2nd to 5th. As an anticyclone developed on the 6th the weather became sunny, dry and warm. Temperatures rose to 78°F. on the 10th at Letchworth and on the 11th at Huddersfield and over Scotland to 72°F. on the 10th at Stirling. These two days were the warmest of the month, with 10-12 hours of sunshine at many stations. The 12th brought severe thunderstorms along the south coast with as much as 1½ in. of rain in 50 mins. at Freshwater, Isle of Wight. Widespread rains were frequent until the 22nd, although

there were sunny periods. The rainfall was heavy in the west on the 13th and 14th; in south-east England late on the 15th; in central and northern England on the 16th; in south-east England on the 19th, when 2 in. fell in 4 hours near Cambridge and 1 in. in an hour near Great Yarmouth; in the Midlands on the 22nd. A ridge of high pressure brought generally sunny and dry weather, although heavy rain occurred in north Scotland on the 24th. Dry and rather cool weather persisted in northern England and Scotland for the remainder of the month. The last four days were exceptionally wet in south-west England, resulting in disastrous floods around Exeter, where some places recorded 5 in. of rain. The total rainfall was less than half the average over parts of the north and south-east Scotland, but exceeded twice the average along the south coast of England and across central England to East Anglia, with more than 250 per cent. around Exmouth. Mean temperature was rather below average, except in the extreme north of Scotland. Mean maximum temperature was 2°F. below average in eastern and central England, but exceeded the average in west and north Scotland. Sunshine totals exceeded the average over most of Scotland, especially along the west coast, over Northern Ireland, and also in Cornwall.

October.—The weather was generally dull and unusually wet in the south and east, with extensive flooding in many parts of England and Northern Ireland, recurring four or five times in south-western England. On the 1st more than 4 in. of rain fell in 12 hrs. around Exeter and during the five days ending on the 2nd Teignmouth recorded nearly 7 in. Temperatures nowhere exceeded 69°F., the warmest days of the month being between the 2nd and 6th. On the 7th a local thunderstorm brought 7 in. of rain in about 5½ hrs. at Horncastle (Lincolnshire), when cars in the lower part of the town were submerged under 6 ft. of water. The 8th was the wettest day of the month at many places in southern England, when falls of 2 to 3 in. were widespread. Northerly winds, with showers, affected much of the British Isles on the 9th and 10th. Cool weather continued for about five days, with light northerly winds and scattered showers, but good sunny periods, especially on the 11th and 12th when many places recorded over 7 hrs. of bright sunshine. As the British Isles came under the influence of an anticyclone on the 16th, winds became light and widespread fog developed. Many areas reported rain by the 17th and this became widespread and locally heavy on the 19th and 20th. Outbursts of rain continued and floods occurred in the south-west and in parts of south-east England, South Wales and the Midlands. The rainfall during the 31 days Sept. 27-Oct. 27 exceeded 19 in. on the Croydon and Brendon Hills, to the south of Minehead. During the last three days of the month rains were confined mainly to the eastern half of the country; at Montrose, Angus, 3 in. fell on the 31st with local flooding. The total rainfall for the month exceeded three times the average over eastern Devonshire and western Somerset, in Buckinghamshire, Lincolnshire and in the East and North Ridings of Yorkshire. Much of western Scotland had less than half the average, experiencing remarkably fine weather. This was the wettest October over England and Wales as a whole since that of 1903, while the total July to October 1960 exceeded that of any similar period on record, being slightly wetter than in 1903. The four months November 1914 to February 1915 were, however, appreciably wetter. Mean temperature was about average nearly everywhere, except in south-west

England. Parts of the west of Scotland had more than average sunshine, but over England and Wales as a whole it was one of the duller Octobers on record.

November.—Mild, cyclonic weather predominated with some rain on most days. Over England and Wales and Northern Ireland the warmest day was the 1st, when temperature rose to 66°F. at Bromley, Kent. A tornado, some 200 ft. wide, caused considerable damage in its passage from Crewe towards Manchester, while gales were widespread and severe on the 1st to 3rd, a gust of 90 m.p.h. being recorded at Holyhead on the 2nd. Heavy rains occurred in Wales, north-west England and north-east Scotland on the 1st, in Kent and Sussex on the 2nd with extensive flooding and in Ulster on the 3rd. At Brighton as much as 3.23 in. was measured for the 1st to 3rd. By the 5th northerly winds covered the British Isles and the next two days were generally cold and dry. As an anticyclone moved in from the Atlantic about the 7th there were sunny periods, with ground frost at night followed by dense fog in much of central and northern England on the 8th. Cyclonic weather persisted until the 17th, with frequent rains, and flooding occurred as rain fell on ground already saturated, particularly in the west country. With lighter winds fog became widespread over England and Wales and persisted throughout the 18th and 19th, and again throughout the 22nd in places. Northerly winds brought a second short cold spell, from the 26th to 27th, but by the 29th mild south-westerly winds were restored with widespread rains, heavy in the south-west, and also with gale force winds. The mildest day of the month in Scotland was generally the 30th, temperatures reaching 59°F. at Kinlochewe (Ross-

shire) and Gordon Castle (Moray). The total rainfall amounted to less than half the average in western Sutherland, but more than twice the average over much of Wales, to the west of the southern Pennines and near Ilfracombe. Over England and Wales as a whole there have been ten wetter Novembers in the past 35 years, the most recent being that of 1954. The total rainfall for the five months July to November 1960 exceeded that of any previous July to November for more than two hundred years. Mean temperature exceeded the average nearly everywhere, the mean maximum temperature being above average for England and Wales for the first time since June. Sunshine totals exceeded the average in most districts, over England and Wales again for the first time since June.

December.—The weather was generally rather cold and wet, giving the sixth consecutive month with rainfall in excess of average over England and Wales. With the saturated ground, floods were prevalent in early December over more than 40 counties in Britain. The first few days of the month were mild and stormy and temperatures reached 59°F. at Maldon (Essex) on the 1st. On the Brecon Beacons 7 in. of rain fell during the first three days, many places in Exmoor and South Wales recording over 4 in. for the 3rd, with 5½ in. in 20 hr. in the Rhondda Valley. With lighter winds on the 5th, ground frost occurred at night, while fog became widespread, especially in industrial areas of the north and Midlands, where for about three days temperatures rose little above freezing point. By the 9th some snow occurred in the south-west and on the 10th and 11th easterly winds brought sleet showers to eastern England with snow over high ground. This soon melted

General Values, 1958-61 (July)

and with moist air from the Atlantic, fog developed widely, especially in the west Midlands and Forth-Clyde Valley. Northerly winds on the 19th and 20th brought sleet and snow as far south as Cornwall. By the 21st and 22nd weather became dry with sunny periods. From the 23rd mainly unsettled weather prevailed. Christmas Day was generally cloudy, but sunny periods occurred in southern and eastern England at first, while at night heavy rain fell in North Wales, north-west England and southern Scotland, giving 3 in. in parts of Westmorland and Snowdonia. Further belts of rain moved across the country, with snow in the north on the 26th, but long sunny periods in places on the 27th and 31st. The total rainfall was less than half the average in parts of Northern Ireland, but twice the average around Dover and along the Lincolnshire coast. The rainfall exceeded the average over both England and Wales and over Scotland, but was appreciably less than that of December 1959 over the country as a whole. Mean temperature was everywhere below average. This was due mainly to low maximum temperatures over England and Wales, but over Northern Ireland more especially to low minimum values. Sunshine totals were above average in most areas, especially in Northern Ireland, Scotland and northern England. Margate had only 75 per cent. of average but the London area about 150 per cent.

Year 1960.—The weather generally was much wetter and rather cooler and less sunny than that of 1959. Following a relatively dry March to June, the last six months of the year were unusually wet, especially in southern England, where widespread flooding occurred. The general rainfall over England and Wales from July to November amounted to 26.9 in., rather more than in any similar period since 1727. The total for the year reached 47.5 in., larger totals being recorded only in 1872 with 50.7 in. and 1852 with 49.8 in. Rainfall totals exceeded 140 per cent. of the 1916-50 average over much of the southern half of England and Wales, especially along the south coast, over the Wye Valley and in Lincolnshire, as well as near Aberdeen. At Horncastle there was 169 per cent. of average. Less than the average occurred over much of the Western Highlands of Scotland, with rather less than 70 per cent. at stations in the north. The mean temperature for the year slightly exceeded average in most districts, especially in Scotland. Temperatures were generally 2° F. above average in April, May and June (nearer 3° F. in Scotland), but were 2° F. below average in Scotland and Northern Ireland in February and December. The weather over the United Kingdom during April to June was warmer than in any similar period since the beginning of the century. Extreme recorded temperatures were for England and Wales 89° F. at Wyton (Huntingdonshire) on June 18 and 8° F. at Kielder Castle (Northumberland) on February 24 and for Scotland 85° F. at Grantown-on-Spey on June 24 and -8° F. there on February 18. The total sunshine was generally about average, giving 97, 105 and 109 per cent. over England and Wales, Scotland and Northern Ireland respectively. March and October were dull, but February, June, November and December brought appreciably more than average amounts. Surface winds from an easterly point were unusually frequent, especially during the first half of the year. Thunderstorms were frequent during July and August.

(1961) January.—The weather was changeable and rather cold. During the first two weeks a series of depressions moved eastwards, over or near the British Isles. Widespread and heavy local rains occurred on the 1st and 2nd, followed by two days of wintry showers and northerly winds. Snow was

widespread over the mountains of Scotland from the 2nd to 5th. A further depression on the 5th brought a renewal of heavy rains, followed by northerly winds and widespread frost at night. At Moor House, in the Northern Pennines, temperatures fell to 15° F. on the 7th. Another depression brought further rain by the 7th, with snow at first in the north. On the 9th prolonged rain occurred over much of England and Wales, associated with the southward movement of a depression from Scotland to France. Cold north-easterly winds, with showers, spread over the British Isles, and the ridge of high pressure gave a generally fine day on the 11th. Snow was fairly widespread over the mountains of Scotland and northern and central England during the first ten days and occurred in southern England around the 3rd. Further heavy rains occurred on the 12th and 13th, especially in North Wales and north-west England. By the 14th anticyclonic weather predominated, with generally sunny periods, but over-night fog in some industrial areas failed to clear and there temperatures remained around freezing. From the 15th to 18th winds were from the east and south-east, with cloudy, dry, weather after the dispersal of early morning fog. At Grantown-on-Spey temperatures fell to 10° F. on the 16th. Milder, wet, weather prevailed from the 19th to 21st. By the 22nd easterly winds became re-established, except in the south-west of England. Snow or sleet again occurred in southern England around the 25th and fog was widespread in Scotland from the 22nd to 25th. The 27th brought an exceptionally wet and stormy period, although mild with sunny breaks between the rains. Lerwick recorded a gust of 100 m.p.h. on the 27th during a severe gale. Temperatures reached 57° F. at Lissiemouth (near Elgin) on the 27th, and at Colwyn Bay and near York on the 29th. The total rainfall was less than half the average in the north-west of Scotland, but exceeded 150 per cent. in parts of England and Wales. Mean temperature was generally below average. Total sunshine was less than usual in January over most of central and southern England and Wales, but appreciably more in the north and west of Scotland.

February.—The weather of the month was unusually mild, especially in southern England, where the nights were mild and frosts infrequent. There were a few days of brilliant sunshine. The first ten days were changeable and unsettled, with frequent rains. Temperature fell to 21° F. at Moor House, in the northern Pennines on the 4th, and to 12° F. in the Grampians on the 5th. With sunny afternoons on the 7th and 9th temperatures rose in places to 55° F. An anticyclone was centred over western Europe by the 10th. Rain and cloud became less frequent and fog formed extensively over south-east England on the night of 13th-14th, clearing quickly to give a warm, sunny, day. Afternoon temperatures exceeded 60° F. in parts of south-east England and East Anglia, and 65° F. in central London and at Bromley, Kent, unusually high temperatures for mid-February. The 15th was dull and misty in southern districts and temperatures in London failed to reach 50° F. The next three days brought a moist southerly airstream over the British Isles, with persistent sea fog along the south and west coasts of England. At Largs, on the Firth of Clyde, 60° F. was recorded on the 16th. From the 18th to 23rd fresh south to south-east winds prevailed over the north-west of the British Isles with good sunny periods. In southern Scotland there was a good deal of fog from the 23rd to 25th and in England and Wales on the 23rd. By the 23rd many stations in southern England, including London, had experienced 15 consecutive days without measurable rain. Sub-

sequently unsettled weather prevailed over the British Isles with widespread rains and strong winds from the west. On the 26th a gust of 106 m.p.h. was recorded at Tiree, in the west of Scotland, and of 100 m.p.h. at Lissiemouth on the east coast. Heavy rain occurred in southern England on the 27th and in the Midlands next day. The total rainfall was less than half the average along the Norfolk coast, but exceeded 150 per cent. in parts of southern England, north-west Scotland and Northern Ireland. The month ranked over the country generally as one of the mildest Februarys this century, being nearly as mild as February 1945. Kew (Surrey) experienced the mildest February since 1871. Sunshine was below average in the south-west of England, but exceeded the average from south Lancashire to North Wales and in the north-west and north of Scotland.

March.—Anticyclonic weather predominated and the month was mainly mild and unusually dry in the south. During the first half of the month an anticyclone persisted to the south of the British Isles, with depressions from the Atlantic passing to the north. The greater part of Britain was sunny and dry, while Northern Ireland and western Scotland were cloudy with occasional rains. On the 3rd a moist southerly airstream gave sea fog and low cloud in southern and western districts, fog persisting in Cornwall during the 8th and 9th and extending well inland on the 9th. Many parts of the country experienced 8-10 hrs. of bright sunshine during each of the first six days of the month and by the 8th temperatures reached 64° F. at Aberdeen and by the 9th 68° F. in north-east Scotland. On the 10th a south-westerly airstream brought cooler weather with slight rain and drizzle to many districts. By the 15th winds over southern England became more southerly and by the 16th came from the south-east, giving temperatures exceeding 68° F., with 73° F. in Bedfordshire and central London, the highest March temperature in the British Isles for 14 years. By the 17th pressure was high to the west of Ireland and northerly winds spread over the country, bringing showers to most districts, with sleet or snow at times even to southern England. This was followed by north-westerly winds with wintry showers in Scotland and Northern England. By the 23rd pressure was high to the south-west, westerly winds predominated and temperatures exceeded 60° F. in eastern England. Cold northerly winds again spread over the country on the 26th, giving severe gales in Scotland, with a gust of 85 m.p.h. at Lerwick. Milder weather returned on the 28th but subsequently northerly winds were resumed in Scotland giving moderate falls of snow. The total rainfall was less than one-quarter of the average over much of the south and centre of England and Wales, as well as in parts of south-east Scotland and Co. Down. There was more than the average in the north-west of Scotland with locally more than 150 per cent. Many stations recorded 15 consecutive days without measurable rain and in parts of southern England 30 days from late February to late March were rainless. It was the warmest March since the very warm March of 1957. Sunshine totals exceeded 150 per cent. of average in the London area, but were appreciably below average over much of Scotland and Northern Ireland.

April.—Mainly cyclonic weather prevailed and the month was mild, cloudy and wet. At most stations in England and Wales April was much less sunny than March. At Kew (Surrey) colder nights were recorded in every April since 1870. The first four days of the month were cold and temperatures in many parts of Scotland did not exceed 36° F., the minimum being 12° F. in the Grampians. Snow was widespread in parts of

the Midlands and further north on the 4th, but the 5th and 6th were fine and dry in the north of Scotland. The 7th was dull in the east, sunny in the north-west, but rainy in south-east England. Rain spread from the south-west across the country on the 8th and the following two days were generally dull and mild with occasional rain. Temperature reached 68° F. at several places in central and south-east England between the 6th and 11th. The 13th and 14th were showery with occasional thunder. On the 15th to 18th sunny, dry, anticyclonic weather predominated, temperatures reaching 68° F. in parts of East Anglia and the North Midlands. Unsettled and changeable weather returned to all districts from the 19th to 22nd, with widespread rains, especially in southern England. A feeble ridge of high pressure on the 27th to 29th gave sunny periods, but low cloud and fog along north-eastern coasts. Further rain from the Atlantic reached most districts on the 30th. The total rainfall was less than half the average in north-east Scotland, but exceeded 250 per cent. in south Wales and Northern Ireland. At Ross-on-Wye it was the wettest April since 1889 and at Armagh since 1840. Over England and Wales as a whole the last wetter April occurred in 1900. Mean temperatures exceeded the average everywhere. Over England and Wales it was the mildest April since that of 1949, but over Scotland the Aprils of four out of the last six years were milder. Sunshine exceeded the average in north-west Scotland and in the neighbourhood of the Moray Firth, but was less than half the average in the Midlands. Over England and Wales it was the dullest April since 1937.

May.—There was very little rain over the country during the period 9th to 24th, while damaging frosts occurred in central and southern England on the 27th and 28th. The 1st was generally dull and wet, followed by two brighter but showery days. The 4th brought rain to England and Wales, with thunderstorms in the Midlands and eastern England. Fine, sunny, weather prevailed on the 5th, but the 6th was wet in most districts. On the 8th winds freshened, reaching gale force in many places, especially in the north, a gust of 68 m.p.h. being recorded at Durham, but there were sunny periods in eastern England. Anticyclonic weather then prevailed until the 17th, with little rain and good sunshine amounts. Temperatures rose to 73° F. in many places on the 12th and 13th, reaching 76° F. at Llandrindod Wells on the 13th. The south-west recorded 12-13 hrs. of bright sunshine each day from the 10th to 14th, while cloudy weather moved into northern Scotland on the 13th and to eastern districts on the 14th. On the 15th winds were from north-east and cooler weather prevailed for a week, with ground frosts on the 17th and 18th. The Whitsun weekend, 20th-22nd, was mainly cool, dry and cloudy, but temperature rose to 74° F. at Loch Tay (Perthshire) on the 21st. Westerly winds occurred on the 23rd, but northerly winds spread across the country on the 24th and 25th, with hail showers in Scotland on the 26th and 27th, and widespread ground frosts on the 27th and 28th. Temperature fell to 22° F. on the 27th at Glenlivet (Grampians). On the 29th dull weather prevailed with rain in many places. During the last two days winds were from the south-east and temperature fell to 20° F. on the 31st at Santon Downham (Norfolk). The total rainfall was less than one-quarter of the average in north Kent and around Exeter, Huntingdon and Bedford, but exceeded 150 per cent. in Co. Antrim. Mean temperature was near average in most districts, in spite of the latter half of the month being rather cool in the east of Great Britain. Sunshine totals were generally above average, especially in the south-west

and east of England, where the average was exceeded by more than 70 hours.

June.—Except in the north-west, the month was drier and sunnier than usual. Cool, changeable, weather prevailed during the first half of the month, but subsequently it was much warmer. The 1st was cold in eastern districts, although warm and sunny in the north-west. The maximum temperature at Kew only reached 51°F., being more typical of that experienced in March. The next few days were warm and sunny, with occasional rain in the north and west. From the 7th-12th shallow depressions moved across the country, with periods of rain and local thunderstorms. On the 12th rain was heavy from South Wales to the Thames Estuary, but in Scotland the 10th to 12th were generally dry and sunny. The 13th and 14th were fine and sunny, night screen temperatures falling to 28°F. on the 14th near Norwich and in North Wales. Rain occurred in northern districts between the 15th and 17th, with west and south-west gales in parts of Scotland on the 17th and 18th. A ridge of high pressure brought fine weather with steadily rising temperatures, although ground frost occurred in the north Midlands on the 21st. The next three days were cloudy in the west, with sea-fog in the south-west, but fine and sunny inland. Temperatures rose in places to 84°F. on the 24th and 25th, with 75°F. at Belfast on the 24th. Following thundery rains in southern England on the 26th, cloudy weather with rain occurred in the north-western half of the country, but elsewhere it was fine and warm. Temperature rose to 86°F. in many parts of England on the 30th, with 88°F. at Gillingham, Kent. The total rainfall was less than

average over most of the British Isles and much of England and Wales had only five or six days with rain. The total exceeded 150 per cent. in the north-west of Scotland. Mean temperature was usually slightly in excess of average. Sunshine totals exceeded the average in the south-eastern half of the country.

July.—The month was generally cool and cloudy, except in the south. Temperatures on the 1st exceeded 77°F. over much of England and Wales, reaching 93°F. at places in the south-east. This was the warmest day in central London for 14 years. Cooler weather with thundery rains occurred on the 2nd. The 3rd and 4th brought rain and gales to northern districts, with gusts reaching 87 m.p.h. along the Berwickshire coast. The 5th and 6th were generally fine and sunny, but night temperatures on the 6th fell to 30°F. near Norwich. The 7th to 10th gave unsettled weather but rainfall amounts were small in the south. Most of the rainfall recorded during the month fell between the 11th and 16th. At Bolton 3.31 in. fell on the 12th, the largest amount recorded there in a day since 1887. A grass minimum temperature of 26°F. was recorded on the 14th at Dalwhinnie in Central Scotland. Subsequently, dry anticyclonic weather with northerly winds prevailed for about a week. Rain was widespread in the north on the 25th and 26th, and fell in most districts on the 27th. Fine, sunny, weather prevailed during the last four days of the month. The total rainfall was less than half the average in parts of the south of England. Mean temperature was generally below average. Sunshine totals exceeded the average only in parts of the south-west and south of England.

TEMPERATURE AND RAINFALL RECORDS

GENERAL: The maximum shade temperature of the air on record is 136° F. at Azizia (Uzzizia) in Tripoli on Sept. 13, 1922; the extreme lowest recorded temperature is in Antarctica e.g.—125° F. at Vostok on Aug. 25, 1958. In the upper air temperatures as low as —143° F. have been recorded—e.g. over Halley Bay on Aug. 9 1959 at about 27 kms.

The wettest place in the world is considered to be the neighbourhood of Cherrapunji in Assam where annual averages exceeding 400 inches have been obtained, of which 90 per cent. usually falls in the six months April to September, and annual totals have reached 670 inches.

U.K.: The maximum shade temperature recorded in the air at 4 feet above the ground is 100° F. at Greenwich Observatory (Aug. 9, 1911).

The lowest shade temperatures are —17° F. at Braemar (Feb. 11, 1895) and —16° F. at Kelso (Dec. 3, 1879).

The greatest rainfall recorded in a day was at Martinstown, near Dorchester, 11.00 inches in the 24 hours commencing 9 a.m. (July 18, 1955). Annual totals exceeding 240 inches were recorded at The Sty, Borrowdale, in 1872, 1923, 1928 and 1954; at Ben Nevis Observatory in 1898 and at Llyn Llydaw, Snowdon, in 1909. The smallest annual total is 9.29 inches at Margate in 1921 and the largest may be regarded as 257 inches at Sprinkling Tarn in 1954.

The maximum wind-velocity on record occurred on the top of Costa Hill, Orkney, on December 12, 1956, in a gust of 127 miles per hour.

Average	71.8	56.2	1015.5	—	62	195

Entries of Maximum Temperature cover day period 9-21 h.; Minimum Temperature night period 21-9 h. and are entered to day of reading; Rainfall the 24 hours commencing at 9 h. on day of entry; Sunshine the 24 hours 0-24 h.; Pressure and Wind are recorded at 9 h.; Wind is recorded in degrees E = 90° S = 180° W = 270° and N = 360°. Pressure is at station level, the correction to M.S.L. being usually + 1.3 mb. Rainfall 1000 mm = 39.37 in. Averages refer to the following standard periods:—Temperature, Pressure and Sunshine 1921-50 (average pressure being at M.S.L.); Rainfall, 1916-50.

TEMPERATURE AND SUNSHINE AT VARIOUS PLACES IN GREAT BRITAIN

Mean Temperature of the air (° F. or ° C.) and Bright Sunshine (as mean hours per day) at representative British Health Resorts and Towns during the year July, 1960, to June, 1961, and the calendar year 1960. Also height of Climatological Station above mean sea level, altitude being given in feet. Fuller details of the weather are given in the *Monthly Weather Report* published by the Meteorological Office.

TEMPERATURE AND SUNSHINE AT VARIOUS PLACES IN GREAT BRITAIN

Mean Temperature of the air (° F. or ° C.) and Bright Sunshine (as mean hours per day) at representative British Health Resorts and Towns during the year July, 1960, to June, 1961, and the calendar year 1960. Also height of Climatological Station above mean sea level, altitude being given in feet. Fuller details of the weather are given in the *Monthly Weather Report* published by the Meteorological Office. (To convert ° C. to ° F. multiply by 9/5 and add 32.)

SOLICITORS' FEES

Solicitors and their clients may (subject to certain rules designed to prevent undercutting) make special agreements as to remuneration in non-contentious business (including conveyancing) under Section 57 of the Solicitors Act, 1957. In the absence of any such agreement the solicitor's remuneration is governed by Orders made under Section 56 of that Act. There are two methods of charging under the Orders. The more usual is by a scale based upon the amount of money involved; the other is by a charge (usually known as a Schedule II charge) determined by reference to all the circumstances of the case, the amount of money involved being only one factor amongst many. Usually a scale charge is payable in conveyancing matters, provided the transaction has not been abortive, but a solicitor has an option to elect, before undertaking any business, to be paid a Schedule II charge instead. For negotiating sales or purchases the charges are always under Schedule II. In addition to solicitors' charges, disbursements such as Government stamp duty, search fees and Land Registry fees may be payable.

The Solicitors' Remuneration Order (1959) and The Solicitors' Remuneration (Registered Land) Order, 1959, increased the scales of permitted charges in the case of certain conveyancing transactions where the consideration does not exceed £1,000.

In sales by auction further charges may be payable, which will be computed under Schedule II below, e.g. for preparing or perusing Particulars of Sale and poster and attending the sale.

The following sections illustrate the scales of charges on sales, purchases and mortgages based upon the amount of money involved:—

I. For Unregistered Land

(Land, including houses, having a title which is not registered at the Land Registry).

For the following, charges are the same:—

Vendor's solicitor for deducing title to freehold or leasehold property, and perusing and completing conveyance (including preparation of contract or conditions of sale, if any);

Purchaser's solicitor for investigating title to freehold or leasehold property, and preparing and completing conveyance (including perusal and completion of contract, if any);

Mortgagor's solicitor for deducing title to freehold or leasehold property, perusing mortgage and completing;

Mortgagee's solicitor for investigating title to freehold or leasehold property, and preparing and completing mortgage;

Value of Land or Amount of Charge	Scale of Remuneration
Under £100.....	£9 9s.
£100 or over, but not exceeding £150.....	£10 10s.
Over £150 but not exceeding £200.....	£11 11s.
Over £200 but not exceeding £300.....	£12 12s.
Over £300 but not exceeding £350.....	£12 15s.
For each additional £50 thereafter up to £1,000.....	15s. per £50

Value of Land or Amount of Charge	Scale of Remuneration
For the second and third £1,000.....	£1 10s. per £100
For the fourth and each subsequent £1,000 up to £10,000.....	15s. per £100
For the remainder without limit.....	10s. per £100

Vendor's solicitor for conducting a sale of property by public auction, including the conditions of sale:—

When the property is sold:—For the first £1,000, 30s. per £100; for the second and third £1,000, 15s. per £100; for the fourth and each subsequent £1,000 up to £10,000, 7s. 6d. per £100; for the remainder without limit, 3s. 9d. per £100. When the property is not sold, half the scale rates are charged on the reserved price.

NOTE:—A minimum charge of £7 10s. is to be made whether a sale is effected or not.

Mortgagor's solicitor for negotiating loan:—For the first, second and third £1,000, 16s. 10d. per £100; for the fourth and each subsequent £1,000 up to £10,000, 5s. 7d. per £100; for the remainder without limit 3s. 9d. per £100. These charges apply equally to land having a registered title.

Mortgagee's solicitor for negotiating loan:—For the first, second and third £1,000, 33s. 9d. per £100; for the fourth and each subsequent £1,000 up to £10,000, 11s. 3d. per £100; for the remainder without limit, 7s. 6d. per £100.

Title registered after completion.—Where the title is registered under the Land Registration Act, 1925, after completion, charges under Schedule II are payable in addition in respect of the first registration.

II. For Registered Land

(Land including houses having a title registered at the Land Registry.)

Scale of solicitor's charges for Transfers on Sale, Charges, Sub-Charges, Mortgages, Sub-Mortgages and Transfers thereof.

Value of Land or Amount of Charge	Scale of Remuneration
(1) Up to and including £100	£5 15s. 6d.
Over £100 to £150.....	£6 6s.
Over £150 to £200.....	£7 7s.
Over £200 to £300.....	£8 8s.
Over £300 to £350.....	£8 10s.
For each additional £50 thereafter up to £1,000	10s. per £50
For the second and third £1,000.....	£1 per £100.
For the fourth £1,000.....	10s. per £100.
For each subsequent £1,000 up to £13,000..	7s. 6d. per £100.
For each subsequent £1,000 up to £17,000..	5s. per £100.
For the remainder without limit.....	4s. per £100.
(2) Above £1,000, fractions of £100 under £50 are to be reckoned as £50, fractions of £100 above £50 are to be reckoned as £100.	

CLUB AND LIBRARY EDITION OF WHITAKER, 1962

The Club and Library Edition of Whitaker's Almanack, 1962, contains 1,206 pages, including illustrations and coloured maps (The World, The British Isles, Baltic States, Russia and her neighbours, Germany and her neighbours, France and Spain, The Far East, India, Pakistan and Burma, Africa, Canada, and Newfoundland, The United States, South America, Australia, New Zealand) in strong leather binding, with gilt top and silk headband. Price 37s. 6d. net.

THE PRESS COUNCIL

In April, 1947, a Royal Commission was appointed to enquire into the control, management and ownership, etc., of the Press and news agencies and to make recommendations thereon. The Commission, in its report of June, 1949, recommended *inter alia* that a voluntary Press Council be formed.

A constitution ultimately set up provided for the establishment of such a council on July 1, 1953. The objects of the Council were stated in the constitution to be (1) to preserve the established freedom of the British Press; (2) to maintain the character of the British Press in accordance with the highest professional and commercial standards; (3) to keep under review any developments likely to restrict the supply of information of public interest and importance; (4) to promote and encourage methods of recruitment, education and training of journalists; (5) to promote a proper functional relation among all sections of the profession; (6) to promote technical and other research; (7) to study developments in the Press which may tend towards greater concentration or monopoly; (8) to publish periodical reports recording its own work and reviewing from time to time the various developments in the Press and the factors affecting them.

The membership of the Council is composed of 15 editorial representatives (3 national newspaper editors, 2 provincial newspaper editors elected by editors of newspapers in membership of the Newspaper Society, 2 provincial newspaper editors nominated by the Guild of British Newspaper Editors, 1 Scottish newspaper editor, 4 editorial representatives nominated by the National Union of Journalists and 3 editorial representatives nominated by the Institute of Journalists) and 10 managerial representatives (4 nominated by the Newspaper Proprietors Association, 4 nominated by the Newspaper Society, 1 nominated by the Scottish Daily Newspaper Society and 1 nominated by the Scottish Newspaper Proprietors Association).

Chairman, G. Murray, C.B.E.

Vice-Chairman, H. Bate.

Members, T. Blackburn; K. Brown; S. Campbell; M. Chapman-Walker, C.B.E., M.V.O.; E. M. Clayton; A. Dunnett; C. Eade; M. Edmunds; G. R. French; R. A. Gibbs; C. D. Hamilton; C. Hamnett; F. M. Johnston; J. G. Jones; A. M. Lee; A. Lofts; G. Newton; R. J. Erskine Orr; B. Pook; G. Reed; E. T. Symons.

Secretary, Col. W. C. Clissitt, T.D., 1 Bell Yard, Fleet Street, W.C.2.

BRITISH STANDARDS INSTITUTION

British Standards House, 2 Park Street, W.1

The British Standards Institution is recognized as the organization responsible for preparing and publishing voluntary national standards for industrial and consumer products.

The Institution dates from 1901 when the Institutions of Civil, Mechanical and Electrical Engineers together with the Iron and Steel Institute and the Institution of Naval Architects formed a Joint Engineering Standards Committee, which eventually became the British Engineering Standards Association. Between 1923 and 1929 the building, chemical and textile industries joined in the work. In 1929 the organization was incorporated by Royal Charter under the title of "British Standards Institution."

British Standards are arrived at by common consent among authorized representatives of the industries which make and use the materials and goods concerned (mainly the engineering, chemical, building and textile industries). The 300 new and revised British Standards published each year specify agreed manufacturing processes, dimensions, methods of test and analysis, standards of safety and performance, and glossaries of terms.

The Institution has more than 11,000 subscribing members, consisting of public authorities, trade and technical institutions, distributors, manufacturers, engineers and other users.

President, R. E. Huffam, M.C.

Director, H. A. R. Binney, C.B.

- WOOL FEDERATION, BRITISH, Commerce House, Bradford.—*Sec.*, E. Barlow.
- BRITISH EMPLOYERS' CONFEDERATION**
36 Smith Square, S.W.1.
- The British Employers' Confederation was established in 1919. Its membership consists of 60 national employers' organizations which deal with labour questions in most of the principal industries, other than the nationalized industries.
- President*, The Lord McCordquodale of Newton, P.C.
Director, Sir George Pollock, Q.C.
Secretary, F. J. C. Honey, C.B.E.
- FEDERATION OF BRITISH INDUSTRIES**
21, Tothill Street, S.W.1.
- The Federation of British Industries was founded in 1910, and in 1923 was granted a Royal Charter. In the Charter, the F.B.I. is defined as an association of manufacturers founded for the "encouragement, promotion and protection of British Industries of all kinds."
- The membership consists of individual firms engaged in productive industry (excluding the nationalized industries) and trade associations. More than 8,000 firms and 300 trade associations (representing about 40,000 firms) are members. The Federation has 12 regional and district offices and has representatives in 140 centres overseas.
- President*, C. E. Harrison.
Director-General, Sir Norman Kipping.
Secretary, J. Gough.
- NATIONAL UNION OF MANUFACTURERS**
6, Holborn Viaduct, E.C.1.
- The National Union of Manufacturers is a national organization representing manufacturing industry. Formed in 1925, its membership (restricted to manufacturers) now totals over 5,000 individual firms with 70 affiliated trade associations. It is regarded both by Government and by industry as the national representative of medium-sized and smaller firms in particular. It has no party-political affiliations. There are branches in London, Birmingham, Manchester, Liverpool, Nottingham, Leeds, Newcastle, Glasgow, Cardiff and Northern Ireland.
- President*, Col. E. R. Mayer, T.D.
Director, H. J. Gray, C.M.G.

TRADES UNION CONGRESS (T.U.C.)

Congress House, 23-28 Great Russell Street, W.C.1

[Museum: 4030]

The Trades Union Congress, founded in 1868, is a voluntary association of Trade Unions, the primary purpose of which is to enable the representatives of unions to meet annually to consider matters of common concern to their members. The Congress has met annually since 1871 (with the exception of 1914) and in recent years has met normally on the first Monday in September, its sessions extending through the succeeding four days. Congress is constituted by delegates of the affiliated unions on the basis of one delegate for every 5,000 members, or fraction thereof, on whose behalf affiliation fees are paid. Affiliated unions (in 1960-61) totalled 182 with an aggregate membership of 8,056,493.

The main business of the annual Congress is to consider the report of its General Council dealing with the activities of the Congress year, along with resolutions from affiliated societies on questions of policy and organization. Although 184 trade union organizations are affiliated to Congress, some of these, especially in cotton, are themselves federal bodies including in total 150 more unions. Only three British unions with large membership are not affiliated to the T.U.C.

One of the important responsibilities of the annual Congress is to elect a General Council to keep watch on all industrial movements, legislation affecting labour and all matters touching the interest of the Trade Union Movement, with authority to promote common action on general questions, and to assist Trade Unions in the work of organization. The General Council is elected by Congress and is composed of 35 members (33 representing 18 trade groups and two representing women workers). Following is a list of these trade groups with the aggregate membership of unions in each group (the woman membership included in the total being shown separately), and with the number of representatives each group is entitled to have on the General Council:—

Trade Group (with representation)	Membership	
	Total	Women
Mining and Quarrying (3)	625,409	160
Railways (3)	477,921	28,045
Transport (other) (3)	1,419,462	154,052
Shipbuilding	130,911	—
Engineering, Founding and Vehicle Building (3)	1,389,585	91,918
Iron and Steel and Minor Metal Trades (2)	223,122	7,928
Building, Woodworking and Furnishing (2)	535,868	14,293
Printing and Paper (1)	339,105	77,662
Cotton (2)	115,725	79,322
Textiles (other) (1)	93,039	38,620
Clothing (1)	166,887	129,339
Leather and Boot and Shoe (1)	201,591	43,096
Glass, Pottery, Food, Chemicals, etc. (2)	472,582	204,698
Agriculture (1)	135,000	7,500
Public Employees (1)	279,971	105,848
Civil Service (2)	476,682	154,006
Non-Manual (1)	271,327	77,526
General Workers (3)	802,306	174,089
TOTAL	8,056,493	1,388,002

Among the powers vested in it by consent of the Unions in Congress is the responsibility of adjust-

ing disputes and differences between affiliated organizations; such matters being dealt with by a Disputes Committee of the General Council which investigates matters referred to it and issues its findings thereon, which are invariably accepted by the parties to the dispute. The General Council has power also, if there appears to be justification, to institute an investigation into the conduct of any affiliated organization on the ground that its activities are detrimental to the interests of the Trade Union Movement or contrary to the declared principles and policy of the Congress; but membership of the Congress is voluntary and Unions retain full control of their own affairs, and a penalty of suspension from membership of the Congress or exclusion from membership is the only measure that can be taken to enforce Congress decisions. Through the General Council the Trade Union Movement maintains organic relations with the Government and Government Departments, and with a large number of outside bodies. The principal instrument for Government relations is the National Joint Advisory Council which functions on the Cabinet level; in this body the British Employers' Confederation and the Boards of nationalized industries are represented along with the T.U.C. for purposes of consultation and advice on matters of governmental policy and administration affecting industry. The same bodies, together with the chairmen of the eleven Regional Boards for Industry and representatives of the Federation of British Industries, National Union of Manufacturers and Association of British Chambers of Commerce, serve on the National Production Advisory Council on Industry which meets under the chairmanship of the Chancellor of the Exchequer, who is accompanied by Ministers of Departments concerned with aspects of production, to advise the government on production questions. The General Council nominates members to serve on numerous other bodies, e.g. Economic Planning Board, the National Savings Committee, National Insurance Advisory Committee, British Productivity Council, Consumers' Councils for the nationalized industries and numerous educational and miscellaneous bodies. Trades Councils and Federations, which are the local agents of the T.U.C., are registered annually and close contact is maintained with them through a Joint Consultative Committee. There are also a number of national advisory bodies for various groups of industries, including the non-manual workers, local Government employees and the nursing profession.

Chairman (1961-62), Miss B. A. Godwin, O.B.E.

General Secretary, G. Woodcock, C.B.E.

Assistant General Secretary, V. Feather, C.B.E.

SCOTTISH TRADES UNION CONGRESS

12, Woodlands Terrace, Glasgow, C.3.

Chairman (1961-62), P. Connon.

General Secretary, G. Middleton, C.B.E.

The Scottish Trades Union Congress was established in 1897 and it is pointed out that it is in no way a competitor of the British Congress, nor does it "justify its existence on strictly nationalist lines." Its objects are parallel to those of the T.U.C., with which it works in the closest co-operation.

In 1961 the Congress had 90 affiliated Unions and 44 Trades Councils with a membership of 775,220. The Annual Congress is held in April and a General Council of twelve members is elected.

TRADE UNIONS

A list of the 182 Trade Unions affiliated to the Trades Union Congress in 1960-61. The number of members of each Union is shown in parenthesis.

- ACTORS' EQUITY ASSOCIATION, BRITISH** (9,676).—*Sec.*, G. Crossdell, O.B.E., 8 Harley Street, W.1.

- PRESS TELEGRAPHISTS, NATIONAL UNION OF (1,535).—*Sec.*, M. A. Clayton, 145 Fleet Street, E.C.4.
- PRINT BLOCK ROLLER AND STAMP CUTTERS' SOCIETY (406).—*Sec.*, S. E. Ramsden, 18 Printon Avenue, Blackley, Manchester, 9.
- PRINTERS AND ASSISTANTS, THE NATIONAL SOCIETY OF OPERATIVE (44,362).—*Gen. Sec.*, R. W. Briginshaw, 13-16 Borough Road, S.E.1.
- PRINTING, BOOKBINDING AND PAPER WORKERS, THE NATIONAL UNION OF (158,028).—*Sec.*, T. J. Smith, 74 Nightingale Lane, S.W.12.
- PROFESSIONAL FOOTBALLERS' ASSOCIATION (2,212).—*Sec.*, C. Lloyd, 105 Corn Exchange Buildings, Cathedral Street, Manchester 4.
- PUBLIC EMPLOYEES, NATIONAL UNION OF (200,000).—*Sec.*, B. Roberts, 8 Aberdeen Terrace, Blackheath, S.E.3.
- RADIO OFFICERS' UNION (3,890).—*Sec.*, H. O'Neill, O.B.E., 4-6 Brannil Road, Upminster, Essex.
- RAILWAYMEN, NATIONAL UNION OF (333,888).—*Sec.*, S. F. Greene, Unity House, Euston Road, N.W.1.
- RETAIL BOOK, STATIONERY AND ALLIED TRADES EMPLOYEES' ASSOCIATION, THE (3,273).—*Sec.*, R. V. Motts, 152-3 Temple Chambers, Temple Avenue, E.C.4.
- ROLL TURNERS' TRADE SOCIETY, BRITISH (1,087).—*Sec.*, G. Prentice, 21 Park Road, Bellshill, Lanarkshire.
- RUBBER WORKERS OF GREAT BRITAIN, THE UNITED (3,100).—*Sec.*, L. Walsh, 57 Ardwick Green North, Manchester, 12.
- SAILMAKERS, AMALGAMATED UNION OF (165).—*Sec.*, J. Pye, 58 Winskill Road, Liverpool, 11.
- SALT AND CHEMICAL INDUSTRIES ALLIED WORKERS' UNION, MID-CHESHIRE (1,520).—*Sec.*, R. M. Moss, Central Passage, Wilton Street, Northwich.
- SALT WORKERS, ALKALI WORKERS, MECHANICS AND GENERAL LABOURERS, FEDERATION OF TRADE UNIONS OF (1,565).—*Sec.*, G. Miles, 30 Granville Square, Winsford, Cheshire.
- SAWMAKERS' PROTECTION SOCIETY, SHEFFIELD (373).—*Sec.*, H. Lambert, 46 Archer Lane, Sheffield, 7.
- SCALEMAKERS, NATIONAL UNION OF (2,559).—*Sec.*, H. Bending, 33-4 Temple Chambers, Temple Avenue, E.C.4.
- SCIENTIFIC WORKERS, THE ASSOCIATION OF (12,000).—*Sec.*, J. K. Dutton, 15 Half Moon Street, W.1.
- SCREW, NUT, BOLT AND RIVET TRADE SOCIETY (2,100).—*Sec.*, H. Cater, 368 Dudley Road, Birmingham, 18.
- SEAMEN, NATIONAL UNION OF (62,500).—*Sec.*, J. Scott, Maritime House, Old Town, Clapham, S.W.4.
- SHALE MINERS AND OIL WORKERS, NATIONAL UNION OF (1,600).—*Sec.*, J. Heaney, 11 Drumshoreland Road, Pumphreston, Mid Calder, Midlothian.
- SHEET METAL WORKERS AND COPPERSMITHS, NATIONAL UNION OF (50,189).—*Gen. Sec.*, E. Roberts, 75-77 West Heath Road, N.W.3.
- SHEET METAL WORKERS' SOCIETY, BIRMINGHAM AND MIDLAND (8,897).—*Sec.*, A. E. Cooper, 134 Bromsgrove Street, Birmingham, 5.
- SHIPCONSTRUCTORS AND SHIPWRIGHTS' ASSOCIATION (23,182).—*Sec.*, A. Williams, 8 Eldon Square, Newcastle-upon-Tyne, 1.
- SHOP, DISTRIBUTIVE AND ALLIED WORKERS, UNION OF (355,271).—*Sec.*, Sir Alan Birch, 188 Wilmslow Road, Fallowfield, Manchester 14.
- SHUTTLEMAKERS, SOCIETY OF (330).—*Sec.*, S. Brown, 6 Moyse Avenue, Walshaw, Bury.
- SIGN AND DISPLAY TRADES UNION (2,890), Sutton House, 2-4 Homerton High Street, E.9.—*Gen. Sec.*, A. C. Torode.
- SILK WORKERS AND TEXTILE TRADES ASSOCIATION, NATIONAL (3,500).—*Gen. Sec.*, T. Molloy, 59 Park Green, Macclesfield, Cheshire.
- SLATERS, TILERS AND ROOFING OPERATIVES SOCIETY, AMALGAMATED (2,012).—*Gen. Sec.*, L. Poupard, 430 Holderness Road, Hull.

SPINDLE AND FLYER MAKERS' TRADE AND FRIENDLY SOCIETY, UNITED OPERATIVE (142).—*Sec.*, A. Scott, 1 Beard Road, Gorton, Manchester, 18.

SPINNERS AND TWINERS, THE AMALGAMATED ASSOCIATION OF OPERATIVE COTTON (7,100).—*Sec.*, J. W. Whitworth, 115 Newton Street, Manchester.

SPRING TRAPMAKERS' SOCIETY (90).—*Sec.*, J. Martin, 45 Market Place, Willenhall, Staffs.

STOVE GRATE AND GENERAL METAL WORKERS, THE NATIONAL UNION OF (5,440).—*Sec.*, J. Higham, M.B.E., Stove Grate Offices, Imperial Bldgs., High Street, Rotherham.

STREET MASONS, PAVIORS AND ROAD MAKERS, NATIONAL SOCIETY OF (2,400).—*Sec.*, W. Armitage, Kingston House, 1 Kingston Grove, Woodhouse Lane, Leeds, 2.

SUPERVISORY STAFFS, EXECUTIVES AND TECHNICIANS, ASSOCIATION OF (25,552).—*Sec.*, C. Jenkins, 2-4 Homerton High Street, Hackney, E.9.

TAILORS AND GARMENT WORKERS, NATIONAL UNION OF (115,786).—*Sec.*, J. E. Newton, 41 Portman Square, W.1.

TECHNICAL CIVIL SERVANTS, SOCIETY OF (9,303).—*Sec.*, C. Cooper, 372 Wandsworth Road, S.W.8.

TEXTILE CRAFTSMEN, YORKSHIRE SOCIETY OF (1,231).—*Sec.*, C. Hall, Textile Hall, Westgate, Bradford, 1.

TEXTILE DAYMEN'S AND CLOTH PATTERN MAKERS ASSOCIATION (118).—*Sec.*, J. Haley, 18 Airedale Crescent, Bradford 3.

TEXTILE WAREHOUSEMEN, AMALGAMATED (6,000).—*Sec.*, T. Ashe, 6 The Rock, Bury.

TEXTILE WORKERS AND KINDRED TRADES, AMALGAMATED SOCIETY OF (5,800).—*Sec.*, H. Lisle, "Foxlowe," Market Place, Leek, Staffs.

THEATRICAL AND KINE EMPLOYERS, THE NATIONAL ASSOCIATION OF (21,579).—*Sec.*, Sir Tom O'Brien, 17 Waterloo Place, S.W.1.

TOBACCO WORKERS' UNION, THE (16,994).—*Sec.*, P. Belcher, 218 Upper Street, Islington, N.1.

TRANSPORT AND GENERAL WORKERS' UNION (1,302,080).—*Sec.*, F. Cousins, Transport House, Smith Square, S.W.1.

TRANSPORT SALARIED STAFFS' ASSOCIATION (86,830).—*Gen. Sec.*, W. I. P. Webber, Walkden House, 10 Melton Street, N.W.1.

TRANSPORT WORKERS' ASSOCIATION OF ENGLAND, THE UNITED ROAD (10,000).—*Sec.*, J. Davies, 28 Hathersage Road, Chorlton-on-Medlock, Manchester 13.

TYPOGRAPHICAL ASSOCIATION (57,604).—*Sec.*, I. M. Bonfield, "Beechwood," Oak Drive, Fallowfield, Manchester, 4.

TYPOGRAPHICAL ASSOCIATION, SCOTTISH (7,446).—*Sec.*, H. Girdwood, 136 West Regent Street, Glasgow, C.2.

TYPOGRAPHICAL SOCIETY, LONDON (20,037).—*Sec.*, R. Willis, 3-7 New Street Square, E.C.4.

VARIETY ARTISTES' FEDERATION (2,323).—*Sec.*, R. W. Swinson, M.B.E., 18 Charing Cross Road, W.C.2.

VEHICLE BUILDERS, NATIONAL UNION OF (64,940).—*Gen. Sec.*, F. S. Winchester, 44 Hathersage Road, Oxford Road, Manchester, 13.

WALL PAPER WORKERS' UNION (13,003).—*Sec.*, C. Heap, O.B.E., 223 Bury New Road, Whitefield, Manchester.

WARDRESSERS, TWISTERS AND KINDRED TRADES ASSOCIATIONS, LEEDS AND DISTRICT (150).—*Sec.*, B. Jowett, 34 Green Hill Drive, Bramley, Leeds 13.

WATERMEN, LIGHTERMEN, TUGMEN AND BARGE-MEN'S UNION (4,500).—*Sec.*, W. A. Lindley, 33 East India Dock Road, E.14.

WATERPROOF GARMENT WORKERS' TRADE UNION, THE (2,191).—*Sec.*, F. C. Henry, M.B.E., 88a Miller Street, Manchester, 4.

WEAVERS' AND WOOLLEN TEXTILE WORKERS' ASSOCIATION, SADDLEWORTH AND DISTRICT (1,734).—*Sec.*, F. G. Battye, 4 Grains Road, Delph nr. Oldham.

WEAVERS' ASSOCIATION, AMALGAMATED (54,300).—*Sec.*, L. T. Wright, Chronicle Buildings, 74 Corporation Street, Manchester, 4.

WIRE DRAWERS AND KINDRED WORKERS, THE AMALGAMATED SOCIETY OF (12,965).—*Sec.*, R. Birtwhistle, 21 Stirling Chambers, Campo Lane, Sheffield, 1.

WOMEN PUBLIC HEALTH OFFICERS' ASSOCIATION (3,776).—*Sec.*, Miss N. K. Ross, O.B.E., 36 Eccleston Square, S.W.1.

WOOD-CUTTING MACHINISTS, AMALGAMATED SOCIETY OF (27,051).—*Sec.*, C. Stewart, 8 Fairfield Street, Manchester 1.

WOODWORKERS, AMALGAMATED SOCIETY OF (191,685).—*Sec.*, G. F. Smith, 9-11 Macaulay Road, S.W.4.

WOOL SHEAR WORKERS' TRADE UNION, SHEFFIELD (56).—*Sec.*, J. Billard, 19 Rivelin Park Drive, Sheffield 6.

WOOL SORTERS' SOCIETY, NATIONAL (2,104).—*Sec.*, N. Newton, 40 Little Horton Lane, Bradford, 5.

WOOL YARN AND WAREHOUSE WORKERS' UNION (540).—*Sec.*, B. W. Berry, Textile Hall, Westgate, Bradford.

INDUSTRIAL RESEARCH ASSOCIATIONS

A notable development in modern industry is the growth in numbers and importance of Industrial Research Associations and their increasing influence on the scientific and economic life of the country. The total expenditure of these Associations in 1960 was about £7,700,000 per annum, of which £1,820,000 was provided by the Department of Scientific and Industrial Research and the remainder by subscriptions of individual members.

The Government Scheme for Co-operative Industrial Research was launched by the Department of Scientific and Industrial Research in 1923. Its aim was to stimulate the industries of the United Kingdom to undertake co-operative research as a means of increasing their efficiency.

Research Associations formed under this scheme are registered companies, limited by guarantee of a nominal sum and working without the division of profits in the form of dividends. To assist the formation of such Associations the Board of Trade and the Department of Scientific and Industrial Research have drawn up a model Memorandum and Articles of Association, to which Research Associations under the scheme conform in all essential points.

The income of the Research Associations is derived from subscriptions from their individual members, supplemented in most cases by substantial grants from the Government, through the Department of Scientific and Industrial Research.

The Research Associations are autonomous bodies free to determine their own policy for the development of their research programmes and the use to be made of the results of their research. Membership is open to any British firm in the particular industry, subject to the approval of the Councils of the Research Associations.

There are now 44 Research Associations and 8 other organizations in receipt of grants from the Department. They cover most of the principal industries of the country, as follows:—

Baking.

BRITISH BAKING INDUSTRIES RESEARCH ASSOCIATION, Baking Industries Research Station, Chorleywood, Herts.—*Dir.*, G. A. H. Elton, D.Sc., Ph.D.

Boots and Shoes.

BRITISH BOOT, SHOE AND ALLIED TRADES RESEARCH ASSOCIATION, Satra House, Rockingham Rd., Kettering, Northants.—*Dir.*, H. Bradley, C.B.E.

Brushes.

BRITISH BRUSH MANUFACTURERS' RESEARCH ASSOCIATION, 80 Coleman Street, E.C.2.—*Dir.*, F. Kidd.

Cast Iron.

BRITISH CAST IRON RESEARCH ASSOCIATION, Bordesley Hall, Alvechurch, Birmingham.—*Dir.*, H. Morrogh.

Ceramics.

BRITISH CERAMIC RESEARCH ASSOCIATION, Queen's Road, Penkhull, Stoke-on-Trent.—*Dir.*, N. F. Astoury, Sc.D.

Coal Utilization.

BRITISH COAL UTILISATION RESEARCH ASSOCIATION, Randalls Rd., Leatherhead, Surrey.—*Dir.-Gen.*, D. T. A. Townend, C.B.E., D.Sc., Ph.D.

Coke.

BRITISH COKE RESEARCH ASSOCIATION, Coke Research Centre, Chesterfield, Derbyshire.—*Dir.*, G. W. Lee.

Cotton, Silk, etc.

COTTON, SILK AND MAN-MADE FIBRES RESEARCH ASSOCIATION, Shirley Institute, Didsbury, Manchester, 20.—*Dir.*, D. W. Hill, D.Sc., Ph.D.

Cutlery.

CUTLERY RESEARCH COUNCIL, Hoyle Street, Sheffield, 3.—*Superintendent of Research*, E. A. Oldfield.

Electrical.

BRITISH ELECTRICAL AND ALLIED INDUSTRIES RESEARCH ASSOCIATION, Cleeve Road, Leatherhead, Surrey.—*Dir.*, H. G. Taylor, D.Sc.

Felt.

BRITISH HAT AND ALLIED FELTMAKERS RESEARCH ASSOCIATION, Stanley House, Manchester Rd., Fairfield, Droylsden, Manchester.—*Dir.*, T. Barr, Ph.D.

Files.

FILE RESEARCH COUNCIL, Hoyle Street, Sheffield, 3.—*Superintendent*, R. H. Hancock.

Flour Milling.

RESEARCH ASSOCIATION OF BRITISH FLOUR-MILLERS, Cereals Research Station, Old London Road, St. Albans, Herts.—*Dir.*, T. Moran, C.B.E., D.Sc., Ph.D.

Food Manufacture.

BRITISH FOOD MANUFACTURING INDUSTRIES RESEARCH ASSOCIATION, Randalls Road, Leatherhead, Surrey.—*Dir.*, F. H. Banfield, Ph.D.

Fruit and Vegetable Canning.

FRUIT AND VEGETABLE CANNING AND QUICK FREEZING RESEARCH ASSOCIATION, Chipping Campden, Glos.—*Dir.*, W. B. Adam.

Furniture.

FURNITURE INDUSTRY RESEARCH ASSOCIATION, 11 Adelphi Terrace, Robert Street, W.C.2.—*Dir.*, J. C. Pritchard, O.B.E.

Gelatine and Glue.

BRITISH GELATINE AND GLUE RESEARCH ASSOCIATION, 22 Dalmeny Avenue, Holloway, N.7.—*Dir.*, D. A. Sutton, Ph.D.

Glass.

BRITISH GLASS INDUSTRY RESEARCH ASSOCIATION, Northumberland Road, Sheffield 10.—*Dir.*, R. G. Newton, Ph.D.

Heating and Ventilating.

HEATING AND VENTILATING RESEARCH ASSOCIATION, Old Bracknell Lane, Bracknell, Berks.—*Dir.*, N. S. Billington.

Hosiery.

HOSIERY AND ALLIED TRADES RESEARCH ASSOCIATION, Thorneywood, Gregory Boulevard, Nottingham.—*Dir.*, W. A. Dutton.

Hydromechanics.

BRITISH HYDROMECHANICS RESEARCH ASSOCIATION, South Road, Temple Fields, Harlow, Essex.—*Dir.*, L. E. Prosser.

Industrial Psychology.

NATIONAL INSTITUTE OF INDUSTRIAL PSYCHOLOGY, 14 Welbeck Street, W.1.—*Dir.*, C. B. Frisby, Ph.D.

I.C. Engines.

BRITISH INTERNAL COMBUSTION ENGINE RESEARCH ASSOCIATION, 111-112 Buckingham Avenue, Trading Estate, Slough.—*Dir.*, W. P. Mansfield, Ph.D.

Iron and Steel.

BRITISH IRON AND STEEL RESEARCH ASSOCIATION, 11 Park Lane, W.1.—*Dir.*, Sir Charles Goodeve, O.B.E., D.Sc., F.R.S.

Jute.

BRITISH JUTE TRADE RESEARCH ASSOCIATION, Kinnoull Road, Kingsway West, Dundee, Scotland.—*Dir.*, H. P. Stout, Ph.D.

Lace.

LACE RESEARCH ASSOCIATION, Glaisdale Drive West, Bilborough, Nottingham.—*Dir.*, John C. MacCallum, Q.B.E.

Laundering.

BRITISH LAUNDERERS' RESEARCH ASSOCIATION, The Laboratories, Hill View Gardens, Hendon, N.W.4.—*Dir.*, J. Leicester.

Leather.

BRITISH LEATHER MANUFACTURERS' RESEARCH ASSOCIATION, Milton Park, Egham, Surrey.—*Dir.*, K. W. Pepper D.Sc.

Lime.

CHALK LIME AND ALLIED INDUSTRIES RESEARCH ASSOCIATION, Laboratories, Church Street, Welwyn, Herts.—*Dir.*, G. E. Bessey.

Linen.

LINEN INDUSTRY RESEARCH ASSOCIATION, Research Institute, Lambeg, Lisburn, Co. Antrim.—*Dir.*, D. A. Derrett-Smith.

Marine Engineering.

PARSONS AND MARINE ENGINEERING TURBINE RESEARCH AND DEVELOPMENT ASSOCIATION, Pamctrada Research Station, Wallsend, Northumberland.—*Dir.*, T. W. F. Brown, C.B.E., D.Sc.

Motor Vehicles

MOTOR INDUSTRY RESEARCH ASSOCIATION, Lindley, nr. Nuneaton, Warwickshire.—*Dir.*, A. Fogg, D.Sc.

Non-Ferrous Metals.

BRITISH NON-FERROUS METALS RESEARCH ASSOCIATION, Euston Street, N.W.1.—*Dir.*, G. L. Bailey, C.B.E.

Paint.

RESEARCH ASSOCIATION OF BRITISH PAINT, COLOUR AND VARNISH MANUFACTURERS, Paint Research Station, Waldegrave Road, Teddington, Middlesex.—*Dir.*, L. Valentine, Ph.D.

Paper.

BRITISH PAPER AND BOARD INDUSTRY RESEARCH ASSOCIATION, St. Winfred's Laboratories, Welcomes Road, Kenley, Surrey.—*Dir.*, N. R. Hood, O.B.E., Ph.D.

Printing and Packaging.

PRINTING, PACKAGING AND ALLIED TRADES RESEARCH ASSOCIATION, Patra House, Randalls Road, Leatherhead, Surrey.—*Dir.*, V. G. W. Harrison, Ph.D.

Production Engineering.

PRODUCTION ENGINEERING RESEARCH ASSOCIATION OF GREAT BRITAIN, Melton Mowbray, Leics.—*Dir.*, D. F. Galloway, Ph.D.

AGRICULTURAL RESEARCH INSTITUTES AND UNITS

The following research institutes are under the direct control of the Agricultural Research Council (see p. 361):—

Field Station, Compton, near Newbury, Berks.—*Director*, W. S. Gordon, C.B.E., Ph.D., M.R.C.V.S., F.R.S.E.

Unit of Insect Physiology, Department of Zoology, Cambridge.—*Director*, Prof. V. B. Wigglesworth, C.B.E., M.D., F.R.S.

Institute of Animal Physiology, Babraham Hall, Babraham, Cambs.—*Director*, J. H. Gaddum, M.A., Sc.D., M.R.C.S., L.R.C.P., F.R.S., F.R.S.E.

Animal Breeding Research Organisation, Glenbourne, 6 South Oswald Road, Edinburgh, 9.—*Director*, H. P. Donald, D.Sc., Ph.D., F.R.S.E.

Poultry Research Centre, King's Buildings, West Mains Road, Edinburgh, 9.—*Director*, A. W. Greenwood, C.B.E. D.Sc., Ph.D., F.R.S.E.

Unit of Experimental Agronomy, Department of Agriculture, University of Oxford.—*Hon. Director*, Prof. G. E. Blackman, F.R.S.

Unit of Biometrical Genetics, Department of Genetics, University of Birmingham.—*Hon. Director*, Prof. K. Mather, C.B.E., D.Sc., Ph.D., F.R.S.

Unit of Microbiology, Department of Microbiology, The University, Sheffield, 10.—*Hon. Director*, Prof. S. R. Eldsen, Ph.D.

Rayon.

BRITISH RAYON RESEARCH ASSOCIATION, Heald Green Laboratories, Wythenshawe, Manchester, 22.—*Dir.*, L. A. Wiseman.

Rubber and Plastics.

RUBBER AND PLASTICS RESEARCH ASSOCIATION OF GREAT BRITAIN, Shawbury, Shrewsbury, Shropshire.—*Dir.*, W. F. Watson, D.Sc., Ph.D.

Scientific Instruments.

BRITISH SCIENTIFIC INSTRUMENT RESEARCH ASSOCIATION, South Hill, Chislehurst, Kent.—*Dir.*, J. Thomson, D.Sc., Ph.D.

Shipbuilding.

BRITISH SHIPBUILDING RESEARCH ASSOCIATION, 5 Chesterfield Gardens, Curzon Street, W.1.—*Dir.*, Sir Victor Shephard, K.C.B.

Springs.

COIL SPRING FEDERATION RESEARCH ORGANISATION, Doncaster Street, Sheffield, 3.—*Dir.*, R. Haynes.

Steel Castings.

BRITISH STEEL CASTINGS RESEARCH ASSOCIATION, East Bank Road, Sheffield, 2.—*Dir.*, A. H. Sully, Ph.D.

Tar.

COAL TAR RESEARCH ASSOCIATION, Oxford Road, Gomersal, nr. Leeds.—*Dir.*, D. McNeil, Ph.D.

Timber.

RESEARCH AND DEVELOPMENT COMMITTEE OF THE TIMBER DEVELOPMENT ASSOCIATION, 21 College Hill, E.C.4.—*Dir.*, P. O. Reece.

Water.

WATER RESEARCH ASSOCIATION, Medmenham, Marlow, Bucks.—*Dir.*, R. G. Allen, Ph.D.

Welding.

BRITISH WELDING RESEARCH ASSOCIATION, 19 Fitzroy Square, W.1.—*Dir.*, R. Weck, Ph.D.

Whiting.

RESEARCH COUNCIL OF THE BRITISH WHITING FEDERATION, The Hall, 30 Church Street, Welwyn, Herts.—*Dir.*, D. C. Soul.

Wool.

WOOL INDUSTRIES RESEARCH ASSOCIATION, Torrington, Headingley Lane, Leeds, 6.—*Dir.*, A. B. D. Cassie, C.B.E., D.Sc., Ph.D.

Unit of Soil Physics, School of Agriculture, Cambridge.—*Director*, E. C. Childs, Sc.D., Ph.D.

Unit of Embryology, Univ. College of N. Wales, Bangor.—*Hon. Director*, Prof. F. W. Rogers Brambell, D.Sc., Ph.D., F.R.S.

Unit of Statistics, University of Aberdeen.—*Director*, D. J. Finney, Sc.D., F.R.S., F.R.S.E.

Statistics Service, School of Agriculture, Cambridge.—*Officer-in-Charge*, R. C. Campbell, M.A., Ph.D.

Unit of Reproductive Physiology and Biochemistry, Molteno Institute, Cambridge.—*Director*, T. R. R. Mann, M.D., Sc.D., Ph.D., F.R.S.

Unit of Animal Genetics, University of Edinburgh, King's Buildings, West Mains Road, Edinburgh, 9.—*Hon. Director*, Prof. C. H. Waddington, C.B.E., Sc.D., F.R.S.

Radiobiological Laboratory, Letcombe Regis, Wantage, Berks.—*Director*, R. Scott Russell, M.Sc., Ph.D.

Unit on Plant Growth Substances and Systemic Fungicides, Wye College, Ashford, Kent.—*Hon. Director*, Prof. R. L. Wain, D.Sc., Ph.D., F.R.S.

Virus Research Unit, Huntingdon Road, Cambridge.—*Director*, R. Markham, M.A., Ph.D., F.R.S.
Ditton Laboratory, Larkfield, Maidstone.—*Director*, R. G. Tomkins, M.A., Ph.D.

Covent Garden Laboratory, Inveresk House, 346 Strand, W.C.1.—*Officer-in-Charge*, J. C. Fidler, Ph.D.

Low Temperature Research Station, Downing Street, Cambridge.—*Director*, E. Bate-Smith, M.Sc., Ph.D.

Pest Infestation Laboratory, London Road, Slough, Bucks.—*Director*, G. V. B. Herford, C.B.E., M.Sc.

Unit of Plant Physiology, Imperial College of Science and Technology, Prince Consort Road, S.W.7.—*Director*, Prof. Helen K. Porter, D.Sc., F.R.S.

Unit of Plant Morphogenesis and Nutrition, Wye College, Ashford, Kent.—*Director*, F. J. Richards, D.Sc., F.R.S.

Weed Research Organization, Begbroke Hill, Kidlington, nr. Oxford.—*Director*, E. K. Woodford, O.B.E., M.Sc., Ph.D.

Farm Buildings Research Unit, Wrest Park Lodge, Silsoe, Beds.—*Hon. Director*, W. H. Cashmore, C.B.E.

East Malling Research Station, Nr. Maidstone, Kent.—*Director*, F. R. Tubbs, C.B.E., Ph.D.

Agricultural and Horticultural Research Station, Long Ashton, Bristol.—*Director*, Prof. H. G. H. Kearns, O.B.E., B.Sc., Ph.D.

Scottish Horticultural Research Institute, Mylnecroft, Invergowrie, Dundee.—*Director*, T. Swarbrick, M.Sc., Ph.D.

Vegetables

National Vegetable Research Station, Wellesbourne, Warwickshire.—*Director*, J. Philp, Ph.D., F.L.S.

Grassland

Grassland Research Institute, Hurley, nr. Maidenhead, Berks.—*Director*, William Davies, D.Sc.

Glasshouse Crops

Glasshouse Crops Research Institute, Worthing Road, Rustington, Littlehampton, Sussex.—*Director*, F. W. Toovey, O.B.E.

(b) Research affecting Animals

Animal Diseases

Animal Diseases Research Association, Moredun Institute, Gilmerton, Edinburgh, 9.—*Director*, J. T. Stamp, D.Sc., M.R.C.V.S., F.R.S.E.

Research Institute (Animal Virus Diseases), Pirbright, Surrey.—*Director*, I. A. Galloway, D.Sc., M.R.C.V.S.

Hill Farming

Hill Farming Research Organisation, 48 Palmerston Place, Edinburgh, 12.—*Director*, A. R. Wannop, O.B.E., F.R.S.E.

Dairying

National Institute for Research in Dairying, Shinfield, nr. Reading.—*Director*, Prof. R. G. Baskett, O.B.E., M.Sc.

Hannah Dairy Research Institute, Kirkhill, Ayr.—*Director*, J. A. B. Smith, C.B.E., D.Sc., Ph.D., F.R.S.E.

Nutrition

Rowett Research Institute, Bucksburn, Aberdeen.—*Director*, D. P. Cuthbertson, C.B.E., M.D., D.Sc., F.R.S.E.

Poultry

Houghton Poultry Research Station,* Houghton Grange, Huntingdon.—*Director*, R. F. Gordon, D.Sc., M.R.C.V.S.

(c) Research on Agricultural Engineering

National Institute of Agricultural Engineering, Wrest Park, Silsoe, Beds.—*Director*, W. H. Cashmore, C.B.E.

National Institute of Agricultural Engineering, Scottish Station, Howden, Mid-Calder, Midlothian.—*Director*, W. J. West.

* Financed jointly by the Agricultural Research Council and the Animal Health Trust.

GRANT-AIDED RESEARCH INSTITUTES

In addition to the above there are other institutes which, while retaining their own individuality, are financed wholly or in the main by grants made from Government funds. Most of these institutes have governing bodies of their own to which they are directly responsible. The maintenance grants for Institutes in England and Wales are met from funds voted by Parliament and administered by the Agricultural Research Council; the Scottish Institutes are borne on the vote of the Department of Agriculture for Scotland. These Departments seek the advice of the Agricultural Research Council in the consideration of research programmes and estimates.

(a) Research affecting Plants and Soils

Soil Science and Plant Pathology

Rothamsted Experimental Station, Harpenden, Herts.—*Director*, F. C. Bawden, M.A., F.R.S.

Macaulay Institute for Soil Research, Craigiebuckler, Aberdeen.—*Director*, Prof. A. B. Stewart, M.A., B.Sc., Ph.D., F.R.I.C.

Plant Breeding

Hop Research Centre, Wye College, Ashford, Kent.—*Officer-in-Charge*, H. S. Darling, Ph.D.

Plant Breeding Institute, Maris Lane, Trumpington, Cambridge.—*Director*, G. D. H. Bell, Ph.D.

Welsh Plant Breeding Station, Plas Gogerddan, Nr. Aberystwyth.—*Director*, Prof. P. T. Thomas, B.Sc., Ph.D.

Scottish Plant Breeding Station, Pentlandsfield, Roslin, Midlothian.—*Director*, I. W. Gregor, C.B.E., D.Sc., Ph.D., F.L.S.

Horticulture

John Innes Institute, Bayfordbury, Hertford.—*Director*, K. S. Dodds, D.Sc., Ph.D.

PRINCIPAL LAND AREAS OF THE WORLD BELOW SEA LEVEL

THE LONDON CLEARING BANKS

COMMITTEE OF LONDON CLEARING BANKERS
(1821), 10 Lombard Street, E.C.3.

The Committee consists of the Chairmen of the eleven Clearing Banks listed in the Almanack (see Index) and meets regularly to discuss matters of common interest. It is the body through which the Bank of England communicates official policy to the banks and through which the banks may present their views to the Bank of England and the Treasury. The Committee controls the London Bankers' Clearing House.

Secretary, R. H. Barkshire.

Asst. Secretaries, M. C. Swift, M.C.; G. B. Scrine.

BANKERS' CLEARING HOUSE
10 Lombard Street, E.C.3.

This is the organization through which the Clearing Banks and the Bank of England exchange cheques drawn on each other and settle their indebtedness to one another. The clearing system came into being in London during the second half of the eighteenth century, and has served as a

pattern for the Clearing Houses that have been established since throughout the world.

To obtain payment for any cheque received from a customer for his credit, a banker must present it for payment to the bank on which it is drawn, and the Bankers' Clearing House affords a quick and efficient means of doing this. On an average day almost 1,500,000 cheques, etc., are exchanged and paid for by the eleven Clearing Banks and the Bank of England on behalf of their branches, throughout England and Wales, which number over 10,000. Although, on an average day, the value of items exchanged may approach £700-millions in total, the member banks settle their net indebtedness only, each either paying or receiving through the Clearing House the net balance arising from the day's work.

At present two clearings operate, generally, each business day. Cheques drawn on, and paid into, any of the eighty-odd specified Town Clearing

branches may be passed through the Town Clearing either at the morning session or, if the amount is £500 or over (£5,000 or over on Saturdays), at the afternoon session. All other cheques must be passed through the General Clearing each morning. Since April 1960, a Credit Clearing has been operated, through which the member banks exchange, and pay for, credit items in respect of monetary transfers between their customers.

At the end of each business day each member bank works out the net balance resulting from its transactions in that day's Town Clearing, the previous day's General (cheque) Clearing and Credit Clearing, and such differences as need to be adjusted. This net balance is either credited to or deducted from the bank's own account at the Bank of England.

Chief Inspector, C. C. Hobday.

Deputy Inspector, E. A. Young.

PRINCIPAL BANKS OPERATING IN THE BRITISH COMMONWEALTH

* Clearing Bankers.

† Army Agents.

SAVINGS BANKS

Post Office Savings Banks.—On Dec. 31, 1960, there were approximately 21,494,000 active deposit accounts in the Post Office Savings Bank, with the sum of £1,710,201,000 due to depositors. On December 31, 1960, Government Stock and Bonds to the amount of £1,028,725,000 stood to the credit of holders in the Post Office Savings Bank Section

of the Post Office Register. Interest on Post Office Savings Bank deposits is allowed at 2½ per cent. per annum. A depositor may have more than one account but may not deposit more than a total of £5,000 in all accounts in his name.

In 1959 the Average Amount due to each Depositor in Active Accounts was £73 2s. 11d.

TRUSTEE SAVINGS BANKS

Trustee Savings Banks were started in the early years of the 19th century by public-spirited men who recognized the importance of individual thrift to the well-being of the community.

On Nov. 20, 1960, there were 9,203,978 active accounts in the Trustee Savings Banks. The total assets of the Banks amounted to £1,519,661,997 which comprised £1,314,563,896 due to depositors in the Ordinary and Special Investment Departments, £182,913,668 Stocks and Bonds held for depositors and £22,184,403 representing the accumulated surplus of the individual Trustee Savings Banks throughout the country. Information about these Banks and their offices, numbering 1,340 (principal and subordinate) in November, 1960, can be obtained from the *Trustee Savings Bank Association*, 22 Manchester Square, W.1. —Chairman, Sir Kenneth Stewart, Bt., G.B.E.; Secretary, R. T. H. Scott, M.B.E.

PREMIUM SAVINGS BONDS

One of the most popular forms of saving in the United Kingdom is through Premium Savings Bonds. These bonds are a United Kingdom Government security and were first introduced on November 1, 1956. Instead of earning interest, however, each bond offers to its holder the chance of winning a money prize in a monthly draw.

Bonds are issued in values ranging from £1 to £500 and each £1 buys one bond, which has one chance in the monthly draw. Bonds are sold only to individuals, not to groups or corporate bodies. No more than 800 bonds can be held by any one person. The bonds are sold at Post Offices, Banks and Trustee Savings Banks. Holders may redeem bonds at any time by completing a form which is available at Post Offices and Banks.

Prizes are paid from a fund formed by the interest, at present $4\frac{1}{2}$ per cent., carried into the draw by each eligible bond. A bond becomes eligible for the draw three clear calendar months following the month of purchase and goes into every subsequent draw whether or not it has won a prize. Prizes range in value from £5,000 to £25, the winning numbers being selected by the electronic random number indicator equipment—usually called "ERNIE." Winning numbers are printed monthly in the *London Gazette*. Bonds are eligible for inclusion in one draw following the death of the holder. These terms also apply to bonds purchased before August 1, 1960 (Series "A").

It is estimated that by the end of June, 1961, bonds to the value of £388,000,000 had been sold. Of these £68,000,000 had been cashed, leaving £320,000,000 still invested. After the 50th draw in July, 1961, more than 889,000 prizes had been distributed since the draws started. These prizes had a total value of £35,750,000.

THE CINQUE PORTS

As their name implies the Cinque Ports were originally 5 in number, Hastings, New Romney, Hythe, Dover and Sandwich. They were in existence before the Norman Conquest and were the Anglo-Saxon successors to the Roman system of coast defence organized from the Wash to Spithead to resist Saxon onslaughts. William the Conqueror reconstituted them and granted peculiar jurisdiction, most of which was abolished in 1855. Only jurisdiction in Admiralty still survives.

At some time after the Conquest the "ancient towns" of Winchelsea and Rye were added with equal privileges. The other members of the Confederation, known as Limbs, are:—Lydd, Faversham, Folkestone, Deal, Tenterden, Margate and Ramsgate.

The Barons of the Cinque Ports have the ancient privilege of attending the Coronation Ceremony and are allotted special places in Westminster Abbey.

NATIONAL HEALTH SERVICE

The National Health Service was inaugurated on July 5, 1948, by the Minister of Health under the *National Health Service Act, 1946*, "to promote the establishment in England and Wales of a comprehensive Health Service designed to secure improvement in the mental and physical health of the people of England and Wales and the prevention, diagnosis and treatment of illness." There are separate Acts for Scotland and Northern Ireland, where the Health Services are run on very similar lines. The Minister of Health is responsible to Parliament for seeing that Health Services of all kinds of the highest possible quality are available to all who need them. He is advised by the Central Health Services Council (and certain Standing Advisory Committees dealing with special subjects), which he appoints after consultation with the various interested bodies.

The National Health Service which covers a comprehensive range of hospital, specialist, practitioner (medical, dental, ophthalmic), pharmaceutical, appliance and local authority services, is available to every man, woman and child in the country. Everyone resident in the country is entitled to use the Service as a whole or any complete part of it. No insurance qualification is necessary. Most of the cost of running the Service is met by the Exchequer—that is from taxes. Other sources of finance are: (i) the weekly National Health Service contributions (since September, 1957), which are estimated to produce about £133,000,000, approximately $\frac{1}{4}$ th of the total cost of the Service in 1961-62. (For convenience these are collected with the National Insurance contribution in a single combined weekly stamp); (ii) local taxation, which pays for about half the cost of local health authority services; (iii) partial charges to patients for prescription items, spectacles, dentures and dental treatment, appliances, amenity beds in hospital; (iv) superannuation contributions. The total cost of the National Health Service in England and Wales for 1961-62 is estimated at £834,000,000. The estimated net cost to the Exchequer (after taking into account the items mentioned above) is £534,000,000.

Details of the way in which the National Health Service is organized, and of the services provided by its main branches are described in the following paragraphs.

THE HEALTH SERVICES

Family Doctor Service

In England and Wales the Family Doctor Service is organized by 138 Executive Councils which also organize the Dental, Pharmaceutical and Supplementary Eye Services for their areas. There is an Executive Council for each County and County Borough area, but in some cases one Council covers two areas. Members, who serve voluntarily, are appointed by local doctors, dentists and pharmacists (12), the Local Health Authority (8) and the Minister of Health (5). Any doctor may take part in the Family Doctor Scheme, provided the area in which he wishes to practise has not already an adequate number of doctors, and about 22,000 general practitioners do so. They may at the same time have private fee-paying patients. Health Service doctors are paid on a capitation basis, i.e. an annual fee in respect of each patient accepted.

Everyone aged 16 or over can choose his doctor (parents or guardians choose for children under 16) and the doctor is also free to accept a person or not as he chooses. A person may change his doctor if he wishes, either at once if he has changed his address or obtained permission of the doctor on whose list he is, or by informing the local Executive Council (in which case a delay of about 14 days is usual). When people are away from home they can still use the Family Doctor Service if they ask to be treated as "temporary residents," and in an emergency, if a person's own doctor is not available, any doctor in the service will give treatment and advice.

Patients are treated either in the doctor's surgery or when necessary, at home. Doctors may prescribe for their patients all drugs and medicines which are medically necessary for their treatment and also a certain number of surgical appliances (the more elaborate being provided through the hospitals).

Drugs, Medicines and Appliances.—The number of chemists (including drug stores and appliance suppliers) in England and Wales, within the National Health Service at December 31, 1960 was 15,811. 218,685,118 prescriptions were dispensed in 1960. Since March 1, 1961, there has been a charge of 2s. in respect of each item on a prescription form made out by the family doctor and presented for dispensing, except for elastic hosiery for which the charge is 5s. or 10s. for each article. In those country areas where the doctor does his own dispensing, the charge is collected by the doctor.

Dental Service

Dentists, like doctors, may take part in the Service and may also have private patients. About 20,250 of the dentists available for general practice have joined the National Health Service. They are responsible to the Executive Councils in whose areas they provide services.

Patients are free to go to any dentist taking part in the Service and willing to accept them, and do not require to register with any particular dentist. Dentists receive payment for items of treatment for individual patients, instead of the capitation fee received by doctors. There is no need for the patient to obtain a recommendation before seeking dental treatment. The dentist is able to carry out at once all normal conservative treatment (e.g. fillings), provision of dentures in some cases, emergency treatment and ordinary denture repairs; he seeks prior approval from the Dental Estimates Board before undertaking treatment when it involves the extraction of teeth and the provision of dentures (in some cases); extensive and prolonged treatment of the gums; inlays; crowns (in some cases); special appliances and oral surgery and certain other items.

A dentist may, with the approval of the Dental Estimates Board, charge his patient a prescribed sum for such types of treatment as crowns, inlays or metal dentures where these are not clinically necessary, if the patient wishes to have them. Where a denture supplied under the Service has to be replaced because of loss or damage the whole or part of the cost may be charged to the patient if he has been careless. In May, 1951, charges were introduced for dentures; these were increased in May, 1961, to £2 5s.—£2 15s. for the supply of one denture or up to £5 for a set. In June, 1952, a charge of £1, or the full cost of any treatment if less than £1, was introduced. No charge is made for the clinical examination of a patient's mouth. Expectant mothers or mothers who have had a child during the preceding twelve months, children under 16; or 16 or over, but still in full-time attendance at school, do not pay charges. Other patients between 16 and 20 years of age pay charges for dentures only.

Supplementary Ophthalmic Service

Supplementary Ophthalmic Services which are run by the Executive Councils, form part of the Eye Services available under the National Health Service, and provide for the testing of sight and supply of glasses only. Any ophthalmic medical

practitioner or ophthalmic optician who has joined the Service may be consulted. The first time a person uses the Service he must obtain a recommendation from his doctor that his sight needs testing. After this he can use the Service direct without first obtaining a note from his doctor.

Until 1951 there were no charges under the Supplementary Ophthalmic Service except, in certain cases, for the renewal or repair of glasses or where the patient chose a more expensive spectacle frame than one of the standard frames available free, or asked to be supplied with special lenses where only flat lenses were necessary. In May, 1951, charges to patients of 10s. for each lens, plus the actual cost of the frames, were introduced. As from May 16, 1961, charges to patients have been increased to 12s. 6d. for each single-vision lens or 20s. for each bi-focal lens. As hitherto, children's glasses in the standard type of children's frame remain free of charge. As from May, 1961, schoolchildren aged 10 years or over may be supplied with lenses without charge if any other type of N.H.S. frame is used; the charge for the frame must then be paid.

Hospitals and Specialists

On July 5, 1948, ownership of 2,688 out of 3,040 voluntary and municipal hospitals in England and Wales was vested in the Minister of Health. The Minister has a duty to provide hospital accommodation and specialist services to such an extent as he considers necessary to meet all reasonable requirements for the treatment of the acutely ill, maternity cases, the chronic sick and those suffering from tuberculosis or infectious diseases as well as the mentally disordered. Convalescent treatment is also provided for those who need it and surgical and medical appliances are supplied in appropriate cases.

In the main, this part of the Service is organized by 15 Regional Hospital Boards (see Index); in 14 of these regions there is a University having a teaching hospital or medical school. Hospitals are administered on behalf of the Boards by 38 Hospital Management Committees. The only hospitals in the Service outside the Regional Boards' immediate responsibility are the teaching hospitals which provide facilities for undergraduate and post-graduate medical or dental education and which are administered by Boards of Governors. There are 26 Boards of Governors in London and 10 in the rest of the country.

Specialists and consultants who take part in the Service (and nearly all of them are doing so) hold hospital appointments. They can take up whole-time or part-time service and those who have part-time appointments can still accept fee-paying patients outside the Service.

Certain hospitals have accommodation in small wards or single rooms which, if not required for patients who need privacy for medical reasons, may be made available to patients who desire it as an amenity. Amenity bed charges are fixed under Regulations and are at present 12s. or 24s. per day. In such a case the patient pays nothing for the cost of treatment or the normal cost of maintenance. In some hospitals a number of pay-beds has been placed at the disposal of part-time specialists taking part in the Service for use by private patients who agree to pay full hospital maintenance costs, and (usually) private fees to the specialist as well. The fees that may be charged by specialists to patients occupying private pay-beds are normally restricted to 75 guineas to cover everything. For exceptionally long or complicated treatment this limit may be raised to 125 guineas and special arrangements may be made in a limited proportion of pay-beds for patient and doctor to agree to fees outside these limits.

Arrangements to obtain the service or advice of

a hospital specialist are made by the patient's family doctor as in the past. A specialist usually sees a patient at the hospital or clinic at which he works, but arrangements will be made for the specialist to visit the patient at home if he is unable, for medical reasons, to be taken to hospital. No charges are made to National Health Service in-patients (except for amenity beds as above or dentures or glasses of a special type supplied at the patient's request), but a charge of 2s. is made to out-patients for each item on a prescription form for drugs and medicines (unless administered at hospitals). Exemptions from this charge are made in the case of patients receiving National Assistance or their dependants; war pensioners receiving medicines for their accepted disability; and patients attending V.D. clinics who receive medicines as part of their treatment. Also hospital out-patients have to pay fixed charges for elastic hosiery, surgical abdominal supports, surgical footwear (and healing and soiling repairs), dentures, glasses and wigs. Exceptions are made in the case of a child under 16 years of age or at full-time attendance at school, to National Assistance recipients and their dependants and to war pensioners in respect of their accepted war disabilities.

There are at present 77 hospitals providing distribution centres where hearing aids can be obtained after recommendation by a specialist.

Local Health Authority Services

The Local Health Services, mainly concerned with the care of patients in their own homes, are the responsibility of the major local authorities—County Councils and County Borough Councils. There are 146 Local Health Authorities in England and Wales and 29 other authorities exercise delegated health and welfare functions.

Local Health Services provide such services as midwifery; ante-natal, post-natal and infant welfare clinics, and priority dental services where practicable for expectant and nursing mothers and young children; health visiting; home nursing; ambulances; provision of domestic help on health grounds; special care and after-care of the sick; health education; local mental health services; and also vaccination and immunization. It will also fall to the Local Health Authorities to develop Health Centres.

All these services are free of charge except for domestic help and, in certain cases, provision of residential accommodation, meals, nursing requisites, bedding, etc., for which a charge may be made according to means. Since June, 1952, Local Health Authorities have also had power to make charges for the use of day nurseries. The Local Health Authorities may only charge what is reasonable, having regard to the means of the users.

Cost of the Service

NATIONAL INSURANCE AND ASSISTANCE

For Combined Contributions, see p. 1115.

The State insurance and assistance schemes in force since July 5, 1948, comprise schemes of national insurance and industrial injuries insurance, national assistance and non-contributory old age pensions, and family allowances. The two insurance schemes and the family allowances scheme are administered by the Ministry of Pensions and National Insurance, and the national assistance scheme and non-contributory old age pensions by the National Assistance Board.

NATIONAL INSURANCE

The National Insurance Scheme operates under the National Insurance Act, 1946, as amended by the National Insurance Acts of 1949, 1951, 1953, 1954, 1955, 1956, 1957, 1959 and 1960, the National Insurance (No. 2) Act, 1957, the Family Allowances and National Insurance Acts, 1952, 1956 and 1959, and the National Health Service Contributions Acts, 1957 and 1961, and Regulations made under these Acts.

From April, 1961, the National Insurance Act, 1959, extended the existing flat-rate scheme by providing, for employed persons over 18, a system of contributions graduated according to earnings, with related graduated additions to retirement pensions. Employees with equivalent occupational pension rights may be contracted out of this graduated part of the scheme. Provision was also made for higher Exchequer supplements, and for four quinquennial increases in contribution rates beginning in 1965.

The National Insurance Act, 1960, amended the amounts of flat-rate contributions and benefits payable under the scheme from April, 1961.

INSURED PERSONS AND CONTRIBUTIONS

Subject to certain statutory exceptions, every person living in Great Britain who is over school leaving age and under pension age becomes insured under the Acts.

There are three classes of insured persons namely:

- (a) Class 1. Employed persons, i.e. persons who work for an employer under a contract of service or are paid apprentices.
- (b) Class 2. Self-employed persons, i.e. persons gainfully occupied but not working under the control of an employer.
- (c) Class 3. Non-employed persons, i.e. persons who are not gainfully occupied.

The estimated number of persons in respect of whom contributions were payable in 1959 was as follows: employed, 22.3 million; self-employed, 1.4 million; non-employed, 0.3 million.

National Insurance contributions are payable by insured persons, by employers of employed persons, and out of moneys provided by Parliament (see p. 1115).

The ordinary flat-rate contributions are paid by means of stamps on a single insurance card; the stamp also covers the National Health Service contribution and, in the case of employed persons, the Industrial Injuries contribution.

Since April, 1961, employed persons over age 18 earning more than £9 in any week (who are not contracted out as members of approved occupational pension schemes) and their employers have paid, in addition to the flat rate contribution covering earnings up to £9 a week, a graduated contribution for earnings over £9 and up to £15 a week. People in class 1 who are contracted out pay a higher flat-rate contribution (see pp. 1111, 1115). In April, 1965, and at five-yearly intervals thereafter up to March, 1980, all National Insurance contributions will be increased.

Regulations made under the Acts give married women and widows, upon certain conditions, the choice whether to pay the flat-rate contribution or not.

Men aged 70 and over and women aged 65 and over in classes (1) and (2) pay no National Insurance contribution. Men aged 65 to 70 and women aged 60 to 65 in these classes, with certain exceptions, are liable to pay contributions if they have not retired from regular employment. Normally no contributions are payable by men over 65 or women over 60 in class (3).

Regulations state the cases in which insured persons may be excepted from paying National Insurance contributions, and the conditions upon which contributions are credited to persons who are excepted.

From April, 1961, under the Act of 1959, the yearly Exchequer contribution, subject to a minimum of £170 million a year, is equal to one-quarter of the national insurance portion of the contributions paid by employers and employed persons (excluding graduated contributions) and one-third of the national insurance portion of self-employed and non-employed contributions.

BENEFITS

The Acts give the following benefits:

- Unemployment benefit.
- Sickness benefit.
- Maternity benefits, including maternity grant, home confinement grant and maternity allowance.
- Widow's benefits, including widow's allowance, widowed mother's allowance and widow's pension.
- Child's special allowance.
- Guardian's allowance.
- Retirement pension.
- Death grant.

The benefits available to the various classes of insured persons are as follows:

- | | |
|------------------------|--|
| Employed persons... | All benefits. |
| Self-employed persons. | All benefits <i>except</i> unemployment benefit. |
| Non-employed persons | All benefits <i>except</i> unemployment and sickness benefits and maternity allowance. |

There is one system of adjudication on all claims for benefit under the Acts; with certain exceptions, questions as to the right to benefit are decided by independent statutory authorities, consisting of insurance officers, local tribunals and the Commissioner and Deputy Commissioners.

UNEMPLOYMENT BENEFIT

The standard weekly rates of benefit from April 3, 1961, are as follows:

	s.	d.
Man, single woman or widow over 18...	57	6
Married woman over 18: ordinary rate	39	0
If maintaining an invalid husband, or not living with and unable to obtain any financial assistance from her husband...	57	6
Person under 18 (other than a married woman): ordinary rate.....	32	6
If entitled to an increase of benefit in respect of a child or adult dependant.	57	6
Married women under 18: ordinary rate.	32	6
If entitled to an increase of benefit in respect of a child or adult dependant...	39	0
If supporting an invalid husband, or if entitled to an increase of benefit in		

	s.	d.
respect of a child or adult dependant other than her husband and not residing with and unable to obtain any financial assistance from her husband	57	6
Increase of benefit for only child or elder or eldest child (where payable).....	37	6
Increase of benefit for each additional child (where payable).....	9	6
Increase of benefit for adult dependant (where payable).....	35	0

Normal Contribution Conditions.—The claimant must have paid 26 Class 1 contributions since July 5, 1948, and, to be entitled to benefit at the standard rate during a benefit year, must have paid or had credited 50 Class 1 contributions during the preceding contribution year.

Waiting Period.—Benefit is not payable for the first three days of a spell of unemployment or sickness unless the claimant has twelve days or more of unemployment or sickness within a period of 13 weeks beginning with the first of these days. Odd days of unemployment or sickness count for benefit only where any two or more of them fall within a period of six consecutive days, excluding Sundays, and such spells of two or more days are treated as "linked up" if not separated by more than 13 weeks.

Duration of Benefit.—A claimant can draw in respect of any period of interruption of employment 180 days of unemployment benefit, together with additional days of benefit, assessed on his record of contributions and benefit.

Requalification for Benefit.—A person who has exhausted his standard benefit, including any additional days, requalifies therefor when he has paid 13 Class 1 contributions.

Disqualifications.—As in the former scheme, there are disqualifications for receiving benefit, e.g. for a period not exceeding six weeks if a person has lost his employment through his misconduct, or has voluntarily left his employment without just cause, or has, without good cause, refused an offer of suitable employment.

Numbers Unemployed.—During the year 1960 the average number of persons registered as unemployed in Great Britain was 360,400. On November 2, 1959, 241,000 persons were receiving unemployment benefit.

SICKNESS BENEFIT

Standard Rates of Benefit.—Same as for unemployment benefit.

Normal Contribution Conditions.—Same as for unemployment benefit, except that Class 2 as well as Class 1 contributions are counted.

Waiting Period.—Same as for unemployment benefit. Days of sickness are "linked up" with days of unemployment falling within the same period of 13 weeks.

Duration of Benefit.—A person who has paid 156 Class 1 or Class 2 contributions receives sickness benefit of unlimited duration. If he has paid less than 156 such contributions, benefit is limited to 332 days (one year); but he will requalify for benefit when he has paid contributions for 13 weeks.

Disqualifications.—Regulations provide for disqualifying a person for receiving sickness benefit for a period not exceeding six weeks if he has become incapable of work through his own misconduct, or if he fails without good cause to attend for or submit himself to prescribed medical or other examination or treatment, or if he acts in a way which would retard his recovery.

Number of Claims.—During 1959, 8,768,000 new claims for sickness benefit were received. The

number of claimants incapacitated owing to sickness varied during the year from under 807,000 in August to 1,343,000 in February.

MATERNITY BENEFITS

The National Insurance Act, 1953, made changes in the structure of maternity benefits provided by the principal Act. Increases in the benefits under the National Insurance Act, 1960, took effect as from April 3, 1961.

Maternity Grant.—A cash grant of £14 is payable on the mother's own insurance or on her husband's. Extra grants are payable, in certain circumstances, if more than one child is born. The normal contribution conditions for this grant are (i) that the mother or her husband has paid not less than 26 contributions of any class since his or her entry into insurance, and (ii) that not less than 26 contributions of any class have been paid by or credited to that person during the previous contribution year, or the mother has satisfied the contribution conditions for a maternity allowance at the standard rate or at a reduced rate.

Home Confinement Grant.—An additional grant of £6 is payable to women who are confined at home or elsewhere at their own expense.

Maternity Allowance.—A woman who is gainfully occupied receives in addition a maternity allowance of 55s. 6d. a week normally for 18 weeks beginning eleven weeks before the expected week of confinement, provided that she abstains from work. The rate of allowance is increased where the woman has dependants. The normal contribution conditions for this benefit are (i) that the claimant has paid or had credited 50 Class 1 or 2 contributions during the 52 weeks ending 13 weeks before the expected week of confinement; and (ii) that in the same 52 weeks at least 26 Class 1 or 2 contributions have been paid.

During 1959 maternity grants were paid for about 827,000 births; in addition, the home confinement grant was paid in about 318,000 cases, and about 188,000 women received weekly maternity allowances.

WIDOW'S BENEFITS

This benefit in any of its three forms is payable to the widow of any class of insured person. The normal contribution conditions to be satisfied by the husband are (a) that he had paid not less than 156 contributions of any class since his last entry into insurance (104 if he was married before July 5, 1948, and insured from before September 30, 1946), and (b) that the yearly average of the contributions paid by or credited to him since his insurance started was not less than 50. Increases in this benefit under the National Insurance Act, 1960, became payable as from April 3, 1961.

Widow's Allowance.—A woman who at her husband's death is under 60, or, if the husband had not qualified for a retirement pension, is over 60, receives (during the first 13 weeks of widowhood) a cash allowance usually of 80s. a week, with an increase of 25s. for the first or only child and 17s. for each other child.

Widowed Mother's Allowance.—When the 13 weeks of widow's allowance have elapsed, a widow who is left with one or more dependent children receives a cash allowance usually of 82s. 6d. a week so long as she has a child of qualifying age, and in addition 17s. a week for each child other than the first. A widowed mother's personal allowance, usually 55s. 6d. a week, is payable to widows who have living with them a child under 18 who has left school and is not an apprentice.

Widow's Pension.—A widow who is under pensionable age or, being over pensionable age, has not retired from regular employment, receives a

widow's pension usually of 57s. 6d. a week (i) when widow's allowance ends, if she was over 50 at the time of her husband's death and had been married for not less than three years; or, (ii) when her widowed mother's allowance comes to an end, if she is then over 50 (40 if widowed before February 4, 1957) and not less than three years have elapsed since marriage.

Widow's benefit of any form ceases upon remarriage. A 57s. 6d. widow's pension is reduced by sixpence for each shilling of any net earnings in excess of 70s. and a further sixpence for each shilling of net earnings in excess of 90s. A widowed mother's allowance is reduced by sixpence for each shilling of any net earnings in excess of 100s. and a further sixpence for each shilling of net earnings in excess of 120s.; but it must not be reduced in any week by more than 57s. 6d.

If a woman, who was married before July 5, 1953, to a man insured under the old scheme immediately before that date does not qualify for widow's benefit under the new scheme, she may qualify for a widow's basic pension, usually of 10s. a week.

At the end of 1959, about 515,000 widows were receiving widowed mother's allowance, widow's pension or widow's 10s. pension, and about 20,000 widow's allowances were current.

CHILD'S SPECIAL ALLOWANCE

The National Insurance Act, 1957, provides for a special allowance for a woman whose marriage has been dissolved or annulled and who has not remarried, to be payable on the ex-husband's death if the woman has in her family a child to whose maintenance the ex-husband had before his death been contributing at least 5s. a week in cash or its equivalent. The amount of the allowance is equal to the amount of the ex-husband's contribution, subject to a maximum of 25s. a week for the first or only child plus 17s. for each other child in addition to Family Allowances. The contribution conditions for the allowance are substantially the same as for widow's benefit. The increase in this allowance under the National Insurance Act, 1960, took effect as from April 3, 1961.

GUARDIAN'S ALLOWANCE

Where the parents of a child are dead, and one at least of them was an insured person, any person who has the child in his family receives a guardian's allowance of 32s. 6d. a week while the child is of school age. The increase in this benefit under the National Insurance Act, 1960, took effect as from April 3, 1961. At the end of 1959 about 5,700 allowances were being paid.

RETIREMENT PENSIONS

A flat-rate retirement pension is payable for life to an insured person who (a) is over pension age (65 for a man and 60 for a woman), (b) has retired from regular employment, and (c) has paid the prescribed number of contributions. Men aged 70 and over and women aged 65 and over are not required to satisfy condition (b).

The basic rate of pension as from April 3, 1961, (under the National Insurance Act, 1960) is 57s. 6d. a week, plus 35s. for a dependent wife, plus 17s. 6d. for the first or only child and 9s. 6d. for each other child.

Where the insured person postpones retirement beyond minimum pension age, the weekly rate of pension is increased, when he or she finally retires or reaches the age of 70 (65 for women), in respect of contributions paid as an employed or self-employed person during the five years after reaching minimum pension age. After Aug. 2, 1959, the increment to pension is 1s. for every 12 contributions. A retire-

ment pensioner between the ages of 65 and 70 (60 and 65 for women) can choose to be treated as not retired and thus earn pension increments by temporarily forgoing his pension and paying contributions during employment or self-employment.

A man aged 65 to 70 (or a woman aged 60 to 65) who has qualified for pension will have it reduced by sixpence for each shilling of net earnings in excess of 70s. and a further sixpence for each shilling of net earnings in excess of 90s.

The Normal Contribution Conditions are (a) that 156 contributions of any class have been paid (104 if insurance began before September 30, 1946), and (b) that the yearly average of contributions paid or credited is not less than 50.

Special Provisions as to Women.—Subject to certain conditions, a married woman on reaching 60 or a woman on marriage after that age receives by virtue of her husband's insurance a retirement pension of 35s. a week. A widow over the age of 60 when her husband dies will usually qualify for a retirement pension of 57s. 6d. a week from her husband's insurance instead of a widow's pension. A retirement pension payable to a woman by virtue of her husband's insurance is increased by 6d. for every 12 contributions paid by the husband after Aug. 2, 1959, as an employed or self-employed person while he is over 65 and under 70 and she is over 60, but it should die before her, any 6d. increase he earns for her will then be paid at the 1s. rate. The pension of a woman under 65 is reduced by sixpence for each shilling of her net earnings in excess of 70s. and a further sixpence for each shilling of her net earnings in excess of 90s.

Unemployment and sickness benefit is payable to men between 65 and 70 and women between 60 and 65 who have not retired from regular employment at the same rate as the retirement pension they would have been entitled to had they retired from regular employment.

At the end of 1959 retirement pensions, or contributory old age pensions under the old Acts, were being paid to approximately 5,447,000 persons, about 127,000 more than a year earlier.

THE GRADUATED PENSION SCHEME

From April, 1961, when the new graduated pension scheme came into operation under the National Insurance Act, 1959, National Insurance contributions and retirement pensions are graduated, within specified limits, according to earnings. The scheme does not apply to employed persons under 18, or to self-employed or non-employed persons (see p. 1115).

Graduated contributions.—Employed persons over 18 (including men over 65 and under 70, and women over 60 and under 65, who have not retired), unless contracted out as members of occupational pension schemes satisfying certain conditions, pay a weekly flat-rate contribution covering earnings up to £9 a week, plus a graduated contribution on all earnings over £9 and up to £15 a week.

As from July 3, 1961, the flat-rate contribution, which includes the separate National Health Service and Industrial Injuries contributions, is 19s. 2d. for an employed man (of which the employee will pay 10s. 7d. and the employer 8s. 7d.) and 16s. for an employed woman (of which the employee will pay 8s. 8d. and the employer 7s. 4d.) (see p. 1115).

During the period up to April, 1965, on earnings above £9 and up to £15 a week the graduated contribution will be 8½ per cent. of earnings, divided equally between employer and employee. On earnings above £15 a week the graduated contribution is the same as on earnings of £15 a week, viz., 10s. 2d., divided equally between employer and employee (see p. 1115).

The graduated contribution is the same for men and women. Employed married women, and widows receiving certain benefits, are still able to choose not to pay the flat-rate contribution (other than the 4d. Industrial Injuries contribution), but, unless contracted out, they pay their share of the graduated contribution on their earnings between £9 and £15 a week.

The graduated contributions are in general payable on the gross earnings (including overtime pay, bonus, etc.) received in each week (or month, etc.) taken separately, and not on the cumulative total over the year (see Leaflet N.I. 116, obtainable at Pensions and National Insurance Offices).

Contracted-out employees (whatever their earnings) and their employers pay flat-rate contributions which, in the case of employees aged 18 and over, are higher than those payable by employees who are not contracted out (see p. 1115).

The flat-rate contributions are paid by means of a combined weekly stamp. The graduated contributions are collected through the P.A.Y.E. system, in association with income tax (see Leaflet N.I. 116).

The National Insurance Act, 1959, provides for increases in the flat-rate contributions and the graduated contributions in April, 1965, and at five-yearly intervals thereafter up to April, 1980.

The graduated pension.—The graduated addition to the flat-rate retirement pension for each contributor is at the rate of 6d. a week for each unit of graduated contributions paid by him or her since the start of the new scheme. A unit of contributions during the period from April, 1961, to April, 1965, will be £75. 10s. for men, and £9 for women, of graduated contributions paid by the employee. A widow over age 60 gets a graduated addition to her flat-rate retirement pension equal to half of any graduated addition earned by her late husband, plus any addition earned by her own graduated contributions.

Graduated additions are subject to the usual condition of retirement and initially are subject to the same earnings rules as the flat-rate retirement pension (see p. 1110). Persons who defer retirement will continue to pay graduated contributions until they retire or reach 70 (65 for women) whether retired or not, when they will qualify for graduated additions to pension in respect of graduated contributions they have paid. In addition, half of the graduated additions they have forgone by deferring retirement will be treated as extra graduated contributions paid by them and will count towards further graduated pension (see Leaflet N.I. 111).

Contracting out.—Adult employees who have retirement pension rights in an occupational pension scheme can be contracted out of the graduated part of National Insurance retirement pensions if the following conditions are satisfied:

- (1) the occupational scheme is financially sound;
- (2) it provides the employees contracted out with retirement pension rights at least equal to the maximum graduated pension that could have been earned in the State scheme for a corresponding period of service up to age 65 (women 60);
- (3) pension rights at least up to this amount are preserved should the employee change his job.

To be contracted out, an employee must be in an employment covered by a Certificate of Non-participation issued to his employer by the Registrar of Non-participating Employments. In general, the application for a certificate must come from the employer. An employer who wishes to

contract out all or particular groups of employees must first give notice to the employees and others (e.g., trustees, insurers, committee of management) concerned and allow a period for consultation, and the Registrar can defer the issue of a certificate to allow time for further consultation. There is a right of appeal to the Adjudicator against a refusal by the Registrar to issue a certificate.

If an application was not made in sufficient time before the new scheme came into force, graduated contributions will be payable from April, 1961, until a certificate is issued and takes effect. It is open to an employer to seek the Registrar's advice as to whether a pension scheme is suitable for contracting out before a formal application is made. A leaflet R 1, which explains the arrangements for contracting out and for modifying schemes for the purpose of satisfying the contracting out conditions can be obtained from the Registrar of Non-participating Employments, Government Buildings, Monck Street, London, S.W.1.

DEATH GRANT

A death grant is payable on the death of an insured person or of his wife, child or widow or, if the insured person is a woman, of her husband, child or widower. The normal grant (since Feb. 3, 1958) is for an adult £25, a child aged 6-17 £18 15s., a child aged 3-5 £12 10s., a child under 3 £7 10s. For the deaths of people who on July 5, 1948, were between 55 and 65 (men) or between 50 and 60 (women) the grant is £12 10s.

The normal contribution conditions for death grant are that (a) not less than 26 contributions of any class have been paid by or credited to the deceased or the person by virtue of whose insurance the grant is claimed since July 5, 1948, and (b) either not less than 45 contributions of any class have been paid by or credited to him in the previous contribution year, or the yearly average of the contributions paid or credited since July 5, 1948 (or 16th birthday if later) is not less than 45. No grant is payable for deaths of persons already over pension age on July 5, 1948. For deaths in 1958 about 269,000 grants were awarded.

The grant is paid to the deceased person's executors or administrators, if any; otherwise it is paid to the person who meets the funeral expenses or to the next of kin.

FINANCE

Under the Act of 1946 two funds are set up, viz. the National Insurance Fund, and the National Insurance (Reserve) Fund. The income from contributions, Exchequer grants and interest from both funds are paid into the National Insurance Fund, and payments are made out of the Fund to meet the cost of benefits and administration. Under the National Health Service Contributions Act, 1957, payments hitherto made from the Fund towards the cost of the National Health Service, which were equivalent to 10d. out of each total weekly National Insurance contribution for men, 8d. for women, and 6d. for boys and girls, were discontinued; consequential reductions were made in the rates of National Insurance contributions, and provision was made for separate National Health Service contributions, yielding twice the amount of the payments previously made from the National Insurance Fund to the National Health Service, to be collected in conjunction with the National Insurance contributions. Increases in the rates of National Health Service contributions under the National Health Service Contributions Acts, 1958 and 1961, took effect as from July 7, 1958 and July 3, 1961, respectively. (See p. 1115).

Approximate receipts and payments of the

National Insurance Fund for the year ended March 31, 1960, were as follows:—

Receipts		£'000
Balance, April 1, 1959.....		338,064
Contributions from employers and insured persons.....		708,440
Exchequer contribution.....		168,500
Income from investments.....		12,244
Transfer from the Reserve Fund of income from investments, etc.....		41,206
Other receipts.....		390
		<u>1,268,845</u>
Payments		£'000
Benefit:—		
Unemployment benefit..	41,911	
Sickness benefit.....	130,649	
Maternity benefit.....	20,000	
Widow's benefit.....	61,500	
Guardian's allowance.....	430	
Child's special allowance	10	
Retirement pension.....	656,971	
Death grant.....	5,201	
		<u>916,672</u>
Administration expenses.....		38,087
Other payments.....		7,681
Balance, March 31, 1960.....		<u>305,504</u>
		<u>1,268,845</u>

The changes in the rates of contributions and benefits and of Exchequer supplement introduced by the National Health Service Contributions Act, 1957, and the National Insurance (No. 2) Act, 1957, continued in effect during 1959-60. Payments exceeded receipts during the year by £32.6 million. Compared with 1958-59, receipts increased by £20.9 million and payments by £37.7 million. The increase in payments was mainly due to a net rise of £33.7 million in benefit payments.

The balance in the Reserve Fund at March 31, 1960, was £1,167.8 million.

The Government Actuary estimated in November, 1960, that the financial provisions of the National Insurance Act, 1960, should, on the Government's assumptions about future trends in unemployment, earnings, etc. produce small surpluses in the period 1961-66 and again from 1976 onwards, but small deficits in the period 1966-76.

INDUSTRIAL INJURIES INSURANCE

The National Insurance (Industrial Injuries) Act, 1946, substituted for the Workmen's Compensation Acts, 1925 to 1945, a system of insurance against personal injury caused by accident arising out of and in the course of a person's employment and against prescribed diseases and injuries due to the nature of a person's employment. The scheme, which insures against personal injury caused and prescribed diseases and injuries developed on or after July 5, 1948, operates under the Act of 1946, as amended by the National Insurance (Industrial Injuries) Acts, 1948 and 1953, the National Insurance Acts, 1951, 1954, 1957 and 1960, the National Insurance (No. 2) Act, 1957, and the Family Allowances and National Insurance Acts, 1952, 1956 and 1959, and Regulations made by the Minister under those Acts. Lower rates of contributions and higher rates or amounts of benefits took effect, under the National Insurance Act, 1960, in April 1961.

The Workmen's Compensation Acts, including the Workmen's Compensation (Temporary Increases) Act, 1943, (which is now made permanent) continue to apply, subject to certain amendments, to cases arising before the new scheme started.

The Workmen's Compensation (Supplementation) Scheme, 1951, which came into operation on

July 11, 1951, provides for the payment out of the Industrial Injuries Fund of allowances supplementing workmen's compensation where the accident or disease happened before 1924.

The Pneumoconiosis and Byssinosis Benefit Scheme, 1952, provides for payment of benefits out of the Industrial Injuries Fund for those totally disabled by pneumoconiosis or byssinosis, and for dependants of those who died from one of those diseases after December 31, 1949, if they are not covered by either the Workmen's Compensation Acts or the Industrial Injuries Acts. This Scheme was extended by the Amendment Scheme, 1954, to cases of partial disablement as a result of either disease, and was further amended by the Amendment Schemes, 1957 and 1958.

The Industrial Diseases (Miscellaneous) Benefit Scheme, 1954, provides for payment of benefit out of the Industrial Injuries Fund to or in respect of certain persons who are disabled or die or have died after December 31, 1949, as a result of certain malignant and other diseases due to occupational exposure to carcinogens, in cases where neither workmen's compensation nor benefit under the Industrial Injuries Act is payable.

As from August 28, 1956, under the Workmen's Compensation and Benefit (Supplementation) Act, 1956, a supplementary benefit of 17s. 6d. a week became payable out of the Industrial Injuries Fund to the classes of totally disabled persons mentioned in the Act who are receiving workmen's compensation.

INSURED PERSONS

The persons covered by the Industrial Injuries scheme correspond closely to the class of "employed persons" under the National Insurance Act, 1946 (excluding members of the Forces), and numbered in 1959 over 21½ million, of whom rather more than one-third were women.

CONTRIBUTIONS

Contributions are payable by insured persons and their employers, unless exempted, and the Exchequer contributes an amount equal to one-fifth of the combined contributions of insured persons and employers.

The normal weekly rates of contributions payable by insured persons and employers respectively are 7d. and 8d. for men over 18, 4d. and 5d. for women over 18, 4d. and 4d. for boys under 18, and 2d. and 3d. for girls under 18. Normally contributions are paid by means of stamps on a single insurance card, the same stamp also covering the flat-rate National Insurance and the National Health Service contributions.

There are no contribution conditions for the payment of benefits. Persons employed in insurable employment are covered from the time of starting work, but if employed while of school age pay no contributions.

BENEFITS

Injury Benefit is payable for not more than the first 26 weeks of incapacity; no payment is made for the first three days unless there are a further nine days of incapacity within the injury benefit period. Benefit is payable to persons over 18 and to juveniles with dependant's allowances, at the weekly rate of 97s. 6d. (days being paid for at one-sixth of the weekly rate), plus 35s. for one adult dependant, plus 17s. 6d. for the first or only child and 9s. 6d. for each other child. Juveniles not entitled to a child or adult dependant's allowance receive benefit at half the adult rate if under 17 and at three-quarters the adult rate if 17 and under 18.

Disablement Benefit is payable if at or after the end of the injury benefit period the insured person

suffers from loss of physical or mental faculty such that the resulting disablement is assessed at not less than one per cent. (In cases of pneumoconiosis and byssinosis disablement benefit is paid from the start without a period of injury benefit.) The amount of disablement benefit varies according to the degree of disablement (in the form of a percentage) assessed by a medical board or medical appeal tribunal by reference to the claimant's disabilities (incurred as a result of the loss of faculty) as compared with a normal person of the same age and sex. In cases of disablement of less than 20 per cent., benefit normally takes the form of a gratuity paid according to a prescribed scale, but not exceeding £320. Where the degree of disablement is 20 per cent. or more, the benefit is a weekly pension payable either for a limited period or for life according to the following scale:

Degree of disablement	Weekly Rate
	s. d.
100 per cent	97 6
90 " "	87 9
80 " "	78 0
70 " "	68 3
60 " "	58 6
50 " "	48 9
40 " "	39 0
30 " "	29 3
20 " "	19 6

These are basic rates applicable to adults and to juveniles entitled to an increase for a child or adult dependant; other juveniles receive one-half the adult rate if under 17, and three-quarters of the adult rate if 17 and under 18.

Basic rates of pension are not related to the pensioner's loss of earning power, and are payable whether he is in work or not. Upon prescribed conditions, however, pension is supplemented for unemployment and in cases of special hardship. There is provision also for increases of pension during approved hospital treatment or if the pensioner requires constant attendance. An increase of 35s. for an adult dependant and of 17s. 6d. for the first or only child and 9s. 6d. for each other child is also payable where the pensioner is either entitled to an unemployment supplement or receiving approved hospital treatment. Subject to certain exceptions, a pensioner who is not in receipt of unemployment supplement can draw other national insurance benefits in full in addition to disablement pension.

Death Benefit, in the form of a pension, a gratuity or a weekly allowance for a limited period, available for widows and other dependants in fatal cases, depends in amount upon their relationship to the deceased and their circumstances at the time of death and not upon the deceased's earnings. A widow who was living with her husband at the time of his death receives a pension of 80s. a week for the first 23 weeks and thereafter of 64s. or 20s. a week according to circumstances, plus 25s. for the first or only child and 17s. for each other child.

Regulations impose certain obligations on claimants and beneficiaries and on employers, including, in the case of the former, that of submitting to medical examination and treatment and attending courses of vocational training or rehabilitation approved by the Ministry of Labour.

Industrial Diseases, etc.—The Act of 1946 extends insurance to prescribed industrial diseases and prescribed personal injuries not caused by accident, which are due to the nature of an insured person's employment and developed on or after July 5, 1948.

Determination of Questions and Claims.—Provision is made for the determination of certain questions (e.g., as to insurability and liability to contribute)

by the Minister, and of "disablement questions" by a medical board (or a single doctor) or medical appeal tribunal or, on appeal on a point of law, by the Industrial Injuries Commissioner, subject to leave. Claims for benefit and certain questions arising in connection with a claim for or award of benefit (e.g., whether the accident arose out of and in the course of the employment) are determined by an insurance officer appointed by the Minister, or a local appeal tribunal consisting of a chairman appointed by the Minister and equal numbers of members representing employers and insured persons, or, on appeal, by the Commissioner.

About three-quarters of a million new awards of injury benefit are made each year. The number of awards of disablement benefit and of special hardship allowance has increased year by year. The number of disablement pensions in payment rose during the year ended October 31, 1959, from 156,300 to 163,200; of those in payment at the end of the period 45,500 were in respect of pneumoconiosis. During the same year the number of special hardship allowances in payment increased from 93,900 to 100,500. The annual number of awards of death benefit slightly exceeds 2,000; at the end of 1959, about 18,200 pensions and 13,800 allowances were in payment.

FINANCE

Contributions from employers, insured persons and the Exchequer are paid into, and benefits and administrative expenses are paid out of, a fund established under the Act of 1946, viz., the Industrial Injuries Fund.

Receipts, 1959-60	£'000
Balance, April 1, 1959.....	204,811
Contributions from employers and insured persons.....	66,512
Exchequer contribution.....	12,700
Income from investments.....	8,580
Other receipts.....	12
	<hr/> 292,615

Payments, 1959-60	£'000
Benefit:—	
Injury.....	18,032
Disablement (a).....	26,380
Death (a).....	3,060
Other benefits (b).....	1,187
	<hr/> 48,659
Administration expenses.....	6,242
Other payments.....	27
Balance, March 31, 1960.....	237,687
	<hr/> 292,615

(a) Division estimated. (b) Allowances paid under the Workmen's Compensation (Supplementation) Scheme, 1951, allowances and death benefit paid under the Pneumoconiosis and Byssinosis Benefit Scheme, 1952, as amended by the Pneumoconiosis and Byssinosis Benefit Amendment Scheme, 1954, or under the Industrial Diseases (Miscellaneous) Benefit Scheme, 1954, and allowances paid under the Workmen's Compensation and Benefit (Supplementation) Act, 1956.

As the Industrial Injuries scheme in general applies to cases arising after July 4, 1948, expenditure on benefits will not reach maturity for many years.

NATIONAL ASSISTANCE

The National Assistance Act, 1948, was designed, from July 5, 1948, to substitute for certain existing services provided by the State or by local authorities a unified State service of financial assistance according to need. The service is administered by the National Assistance Board, the ultimate responsi-

bility to Parliament resting with the Minister of Pensions and National Insurance.

Application for assistance may be made by any person aged 16 or over who is not in full-time work and is in need, including a person who needs assistance in supplementation of a pension or insurance benefit. The National Assistance Acts, 1948 and 1959, and the National Assistance (Determination of Need) Regulations, 1948, as amended, lay down how the need of an applicant shall be determined, and for this purpose how his requirements and resources shall be computed.

The scale rates for requirements other than rent, prescribed by the amending Regulations which came into operation on April 3, 1961, are as follows:

	Ordinary	Special (a)
	s. d.	s. d.
Husband and wife.....	90 0	112 6 (b)
Single householder.....	53 6	
Other persons:—		
Aged 21 or over.....	49 6	76 0
Aged 18–20.....	38 0	57 0
Aged 16–17.....	32 0	47 0
Aged 11–15.....	24 0	24 0
Aged 5–10.....	20 0	20 0
Aged under 5.....	17 0	17 0

(a) For blind and certain tuberculous persons.

(b) 127s. 6d. when both husband and wife are in the special classes.

The amount to be added for rent, if the applicant, or his wife or her husband, is a householder, or if the applicant is living alone, will be the net rent payable, or such a part thereof as is reasonable in the circumstances. If an applicant over the age of 18 is a member of a household but is not himself the householder, the amount to be added for rent will be a reasonable share of the rent payable by the householder, subject to a minimum addition of 2s. 6d. a week and a maximum of 15s. a week.

The rules for the computation of resources contain provisions for the treatment of capital and earnings and certain statutory disregards.

The amount to be paid by way of assistance is settled by the local officer of the Board; an applicant who is dissatisfied with the amount granted has a right of appeal to the local Appeal Tribunal, whose decision is final.

On July 5, 1948, national assistance had to be given to some 800,000 persons who had previously been receiving unemployment assistance (31,000), supplementary pensions (512,000), outdoor relief (200,000), blind domiciliary assistance (40,000), or tuberculosis treatment allowances (20,000). The number of weekly assistance allowances in payment rose from 1,011,000 at the end of 1948 to 1,810,000 in February, 1955. By the end of September, 1955, the number had fallen to 1,595,000, due mainly to the increase in benefit rates under the National Insurance Act, 1954. Subsequently, the number fluctuated, but during 1959 and 1960 there was an increase of 208,000. At the end of 1960 the number was 1,857,000, when the needs of 2,678,000 persons were being provided for wholly or in part. At the end of 1960 about 128,000 recipients were registered at the Employment Exchange; most of the rest were old, sick or otherwise incapable of work. More than two-thirds of the allowances were paid in supplementation of insurance benefits. During 1960 the Board also made single payments amounting to £4,966,000. In addition, assistance amounting to £2,163,000 was given to meet charges raised under the National Health Service for

prescriptions, spectacles, dentures and dental treatment, and surgical appliances.

The total net expenditure of the Board during 1960 was about £187,521,000, as compared with £157,796,000 in 1959 and £60,760,000 in 1948. Included in the figure for 1960 were payments of national assistance £166,200,000 and payments of non-contributory old age pensions £10,900,000.

NON-CONTRIBUTORY OLD AGE PENSIONS

The maximum non-contributory old age pension payable under the Old Age Pensions Act, 1936, to persons aged 70 and over, and under the Blind Persons Act, 1938, to blind persons aged 40 and over, was increased in October, 1946, from 10s. a week to 26s. a week for single persons of either sex and married men and 16s. a week for married women. Pension was payable at the maximum rate where the yearly means calculated in accordance with the provisions of the Act, did not exceed £26 5s. 0d. Where the yearly means were between £26 5s. 0d. and £89 5s. 0d. pension was payable at rates varying from 24s. (16s. for married women) to 2s. Where the yearly means exceeded £89 5s. 0d., no pension was payable. As from Jan. 27, 1958, when, under the National Insurance (No. 2) Act, 1957, the issue of weekly tobacco tokens to pensioners ceased, non-contributory pensions were increased by an amount equal to the current value of the tokens, i.e., 2s. 4d.

The National Assistance Act, 1948, which charged the National Assistance Board with the administration of non-contributory old age pensions, assimilated the pensions procedure to the national assistance procedure, and the Board has power to supplement old age pensions by national assistance in case of need.

The number of pensions in payment fell from 453,000 at the end of 1948 to 179,000 at the end of 1959, and declined further to 157,000 by the end of 1960. At the latter date, pensions were supplemented by national assistance in 111,000 cases. The award of new non-contributory pensions will eventually be brought to an end by the provisions of section 74 of the National Insurance Act, 1946, under which sighted persons do not qualify unless they reached the age of 70 by October 2, 1961.

FAMILY ALLOWANCES

The Family Allowances Act, 1945, which was brought into operation from August 1, 1946, provided for a payment by the Minister of National Insurance out of moneys provided by Parliament of an allowance of 5s. a week for each child in a family other than the elder or eldest. From September 2, 1952, under the Family Allowances and National Insurance Act, 1952, the allowance was increased to 8s. From October 2, 1956, under the Family Allowances and National Insurance Act, 1956, the allowance for the third and each younger child was increased to 10s. The allowance is payable (through the Post Office) while a child is of school age or, if handicapped, under 16, and up to the age of eighteen years if he or she is undergoing full-time instruction in a school or is an apprentice. Claim forms for allowances can be obtained at any post office or local Pensions and National Insurance Office. Claims are decided by the National Insurance adjudication authorities.

At the end of January 1959, about 5,460,000 allowances were in payment for nearly 3½ million families. It is estimated that in 1959 £126½ million was paid in allowances (excluding administrative expenses), as compared with £63 million in 1951 and £124 million in 1958.

COMBINED WEEKLY FLAT-RATE CONTRIBUTIONS

From July 3, 1961, the main combined weekly flat-rate contributions for National Insurance, the National Health Service and, in the case of employed persons, Industrial Injuries Insurance, paid by means of stamps on a single insurance card, are as follows:—

	Employees contracted out			Employees not contracted out			Self-employed persons	Non-employed persons
	Employee	Employer	Total	Em- ployee	Em- ployer	Total		
Men 18 and over...	s. d. 12 2	s. d. 9 10	s. d. 22 0	s. d. 10 7	s. d. 8 7	s. d. 19 2	s. d. 14 2	s. d. 11 5
Women 18 and over	9 6	7 9	17 3	8 8	7 4	16 0	11 6	8 9
Boys under 18.....	} FLAT-RATE CONTRIBUTIONS {			6 9	5 10	12 7	7 11	6 4
Girls under 18.....				5 7	4 8	10 3	6 9	5 3

Further details of the various contributions including the special rates for certain employed married women, widows and people over pension age are given in Leaflet N.I. 123, available at all local Pensions and National Insurance Offices.

GRADUATED NATIONAL INSURANCE CONTRIBUTIONS (see pp. 1110-1111)

Employed men and women aged 18 or over who are not contracted out of the graduated pension scheme pay in addition to the ordinary flat-rate contribution a graduated contribution (collected in association with P.A.Y.E. income tax). This amounts to approximately 4½ per cent. of that part of their pay between £9 and £15, and ranges from 1d. a week by employees earning £9 os. 1d. to £9 4s. 11d. a week to 5s. 1d. a week by employees earning £15 a week or more. The employer pays the same amount.

Examples of the graduated contributions payable for weekly paid employees are given below:

Total Weekly Pay	Employee	Employer	Total	Total Weekly Pay	Employee	Employer	Total
	s. d.	s. d.	s. d.		s. d.	s. d.	s. d.
£9 or less.....	—	—	—	£13 to £13 4s. 11d.	3 6	3 6	7 0

Fuller details are given in Leaflet N.I. 111, available at local Pensions and National Insurance Offices.

LIFE ASSURANCE AND FIRE AND GENERAL INSURANCE

LIFE ASSURANCE

THE list on the following two pages contains the names of all the more important British Life offices, and of Commonwealth companies (marked C), all of which transact business in this country.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allotted to participating policy-holders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are marked (O) in this column. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches. Those having an Industrial branch are indicated by letter (I).

FIGURES.—These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended December 31, 1960.

LIFE FUNDS.—The amounts of these funds, though interesting, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actuarially compared with assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassuring parts of the risks.

EXPENSES.—The expenses of a Life office include in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of British offices is about 16½%, of which about 5½% is expended on commission and 11% on other

expenses. This ratio taken by itself is frequently misleading, because, if the proportion of new business is large, the percentage of the total premiums absorbed in expenses may legitimately be higher than where the new business is small. Moreover, where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a gain to the policy holder through reduced premium being equivalent to an immediate cash bonus.

INTEREST.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. The rate of interest given is before deduction of Income Tax except where marked (N)—net.

VALUATIONS.—The Board of Trade require valuation returns by the companies and the last columns of the table show the basis on which valuations are made. A valuation indicates liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table (various tables are used), and that interest will be earned at a certain rate. If a company assumes that it will earn a high rate of interest in the future the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The lower the rate of interest assumed the more stringent is the valuation. The foregoing remarks, however, do not apply in the case of an office which has adopted a Bonus Reserve Valuation.

FIRE INSURANCE RATES

MOST large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merits. Tariff rates of premium per £100 insured against fire for the more common classes of risk are as follows:—

Private Dwelling Houses, built of brick or stone and tiled or slated and in no hazardous proximity 25. 6d.

Household goods therein, usually 25.

A number of companies issue "comprehensive" policies embracing in one contract all risks incidental to private houses and contents.

Shops and Warehouses, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on, from 25.

Stock and Utensils in trade fixtures, and household furniture in such shops and warehouses, from 25.

Most fire insurance companies transact accident (including Motor) and miscellaneous business,

and if a strong company be selected it will probably be found to the advantage of an insurer that he should effect with it all such policies as he may require, in place of dividing them amongst several companies. The "comprehensive" policies, previously referred to, combine in one contract protection against damage by fire to the contents of a house, or from burglary, housebreaking, larceny, theft, etc., and insurance against domestic servants' employers' liability, damage from storm or tempest, third party risks, and other hazards. This can usually be arranged for an annual premium of 55. per £100 of the full value of the contents of the house. Fire insurance of the house itself is not included, however, in this estimate, but can be included under the same policy, if desired. The advantage of a policy of this description is that it obviates the inconvenience of payments of small amounts in insurance premiums at different dates, and that in one comprehensive form it supplies protection at a moderate cost for all a householder's ordinary insurance requirements.

NOTE.—As Insurance is highly technical, particularly where business risks are involved, the advice and assistance of a qualified Insurance Broker can be utilized with considerable advantage.

* Note.—The Valuation period is for the 5 years ending in December of the year stated, unless otherwise marked.

A.—Annual Valuation.

Avon—First quinquennial Valuation.

Beacon—Three years ending December 31, 1959. Additional Bonus 30s.% on with profit. Policies in force 20 years or more.

Caledonian.—Three years ending December 31, 1959.

Canada Life.—One year ending December 31, 1960.

Clerical, Medl. and Genl.—Rates of bonus apply only to Policies effected since 1st Jan. 1946.

Commercial Union.—Three years ending December, 31, 1960.

Eagle Star.—Three years ending December 31, 1960.

Ecclesiastical.—Five years ending February 28, 1959.

Equity & Law.—Three years ending December 31, 1958. Further revisionary bonus on existing bonus additions.

Ideal Life.—Three years ending December 31, 1959.

Life Association of Scotland.—Three years ending December 31, 1960.

Liverpool Victoria.—Three years ending December 31, 1959.

Marine & General.—Additional Bonus £1/10/0% on Policies effected prior to 1958 if in force December 1960.

Natl. & L. G. Offrs.—Policies effected before 1955. Otherwise Interim rate.

National Mutual.—Two years ending December 31, 1960.

National Mutual of Australasia.—One year ending Sept. 30, 1960.

National Provident.—Three years ending December 31, 1960. Plus special Bonus £1/10/0%.

Pioneer.—One year ending March 31, 1961.

Prudential.—Plus special additions.

Royal Exchange.—Three years ending December 31, 1960.

Royal London.—Additional Bonus 10s.% for 1956 to 1960.

Scottish Life.—Additional Interim—10% of Bonus attaching.

Scottish Mutual.—Three years ending December 31, 1958.

Scottish Widows.—Plus special additions.

Standard.—Two years ending November 15, 1960. Plus special additions.

Sun Life.—Three years ending December 31, 1960.

United Kingdom.—Three years ending December 31, 1959.

Western Australian.—Five years ending June 30, 1958.

Yorkshire.—Three years ending December 31, 1960.

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE

Life assurance may be effected either with or without participation in profits. If with participation then a higher premium is charged and the Policy is entitled to a Bonus, which is a share in the profits made by the Office, as and when declared. Valuations are made by Offices at periods varying from one to five years and the rate of Bonus then

declared is usually in respect of each year since the previous valuation. These Bonuses are normally payable with the Sum Assured for their full amount, but, if desired, they can be applied to reduce the premium or surrendered for a cash payment. If a Policy is effected without participation the Sum Assured only is payable.

The ages applicable to the life and endowment assurance (but not the annuity) rates as hereafter given are "next birthday" unless otherwise stated.

AVERAGE ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE OF £100

Age at Entry	With Profits	Without Profits	Age at Entry	With Profits	Without Profits	Age at Entry	With Profits	Without Profits
	£ s. d.	£ s. d.		£ s. d.	£ s. d.		£ s. d.	£ s. d.

28	2 6 3	1 11 4	38	3 0 3	2 3 2	50	4 9 3	3 9 10
29	2 7 5	1 12 2	39	3 1 11	2 4 9	55	5 9 1	4 7 10
30	2 8 7	1 13 1	40	3 3 10	2 6 6	60	6 13 11	5 10 5

The next table shows the annual premiums payable throughout life [with some Offices premiums cease at age 85] for a policy of £100 payable at death, with and without profits. It is not sufficient to judge a life office by premium rates only. An office charging a high premium may give higher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such interim

bonuses compare with valuation bonuses, especially in cases of endowment assurance. A without profit Insurance provides the maximum amount of cover at the lowest cost and if an Office, as in some cases, is prepared to allow the option of converting the Insurance at any time to "with" profits either for whole of Life or on the Endowment plan, this gives an attractive contract. The change would, of course, entail a higher premium being paid but under this arrangement the highest cover can be obtained in the early years and the alteration made when the increased cost can be met.

ENDOWMENT ASSURANCES.

Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realization of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no medium promising more satisfactory results than an Endowment assurance participating in profits in a good bonus-paying life office. The selection of such an office is all-important, as so much depends upon profit-

earning capacity—see first page of Life Assurance.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death together with any Bonuses attaching under a "with profit" Policy.

The following table shows the annual premiums, for various ages at entry, charged by the offices named, to secure £100 at the end of 25, 30 and 35 years, or at death, if previous, with profits.

ANNUAL PREMIUMS FOR ENDOWMENT ASSURANCE OF £100, WITH PROFITS

MALE LIVES

SUM ASSURED PAYABLE AT DEATH, OR AT THE END OF

Co-operative Societies—Great Britain

Industrial and Provident Societies Acts, 1893-1961

During the 10 years ended 1960 Co-operative Retail Trading Societies (almost all General Supply Stores) expanded their membership and assets by 21 per cent. as shown by the following particulars covering the 955 societies on the register at the end of 1960 and 1,110 societies in 1950:

Year	Number of Members	Share Capital	Sales	Surplus on Year's Working	Interest on Shares	Dividends on Sales	Total Assets
		£000's	£000's	£000's	£000's	£000's	£000's
1960	12,746,000	254,193	1,007,554	62,751	7,446	48,250	482,130
1950	10,528,000	230,337	599,865	48,475	6,215	38,202	398,923

In addition, 158 Co-operative Wholesale and Productive Trading Societies (with a total membership of 54,000) were on the register at the end of 1960. The total figures for these societies are dominated by those of the two main Wholesale Trading Societies (with their "Joint" undertaking) whose combined sales for 1960 amounted to £567,000,000, their assets at the end of the year totalling £184,000,000.

The Industrial and Provident Societies Act, 1961 increases the maximum permitted shareholding in a society from £500 to £1,000.

Friendly Societies—Great Britain

Acts 1896-1958

In spite of the expansion of *Compulsory* "Health" insurance since the introduction of the *State* scheme in 1912 and its extension in 1948, the *Voluntary* business of Friendly Societies registered under the Friendly Societies Act, 1896, still continues on a large scale, as shown by the following comparative totals—those in ordinary type relate to registered Friendly Societies proper (embracing both "Centralized" societies and "Orders with Branches"); those in *italics* "Collecting" societies which, although registered under the Friendly Societies Acts, are subject also to the special provisions of the Industrial Assurance Acts:—

Enc of Year	No. of Societies on Register		Member-ship	Assurances or Policies	Total Funds	
			Thousands		£000's	
1959.....	11,210	93	6,111	32,480	243,366	300,625
1938.....	19,000	149	8,491	25,738	151,613	84,837
1913.....	25,475	71	6,783	7,431	51,489	11,165

Although recent years have seen the growth of societies registered for such specific purposes as the provision of institutional treatment or assuring annuities and pensions, most friendly societies continue to provide the customary benefits in sickness and at death. During 1959 Friendly Societies proper paid out £5,515,000 in sickness benefit and £2,077,000 in death benefit while payments on death claims by collecting societies amounted to £9,606,000.

Many societies still operate mainly on the old system of accumulating funds on a mutual basis. Others, usually termed deposit societies, allocate all or the greater part of their funds annually to the individual credit of the members to be withdrawn

by them as the rules provide. Apart from the National Deposit Society's method of a uniform contribution throughout membership there are several systems operated on individual account lines, one of which (known as the "Holloway" principle) is worked by a contribution increasing with each year of attained age after the member reaches age 30 up to age 65.

The membership and funds figures—as at the end of 1959—set out below indicate the strength of several leading old established societies, including the three largest Orders which operate through registered districts and branches subject to a central body:—

FRIENDLY Socs.—Name with (in brackets) Year Established	Membership	Total Funds
National Deposit Friendly Society (1868).....	603,000	£ 23,868,000
Hearts of Oak Benefit Society (1842).....	566,000	17,944,000
Independent Order of Odd Fellows, Manchester Unity (1810).....	437,000	27,916,000
Ancient Order of Foresters (1834).....	330,000	19,549,000
Independent Order of Rechabites, Salford Unity (1835).....	194,740	6,894,000

COLLECTING Socs.—Name and Year Established	No. of Assurances Premium Paying	Free Paid-up	Total Funds
Liverpool Victoria Friendly Society (1843).....	12,424,000	4,080,000	£ 166,752,000
Royal Liver Friendly Society (1850).....	7,590,000	2,031,000	85,699,000
Scottish Legal Life Assurance Society (1852).....	2,642,000	910,000	22,853,000

The present National Insurance scheme with its provision of "cradle to the grave" benefits has had serious repercussions on the Voluntary Friendly Societies. From the end of 1937 to the end of 1947 total membership rose from 8,341,000 to 8,608,000, an increase of 3 per cent., but during the next ten years it fell by 27 per cent. to 6,277,000. There are, however, signs that the decline in membership is now being arrested.

When the modest scheme of 1912 was introduced some people doubted the Voluntary Friendly Societies' ability to survive for long, and yet they continued to grow in the face of keen competition, although their remarkable expansion naturally brought many societies up to a point where they found it increasingly difficult to maintain a sufficient inflow of new, young entrants to replace membership losses due to death and other causes. In recent years, too, many of the older (non-deposit type) societies have had to introduce more attractive tables to cater for the growing preference amongst members for a curtailed (instead of whole-life) sickness insurance to enable a margin

of contributions to accumulate to their credit as an increasing cash endowment payable in full at age 65, or in the event of prior death, with the option of drawing on the credit from time to time if the member is in need, subject to certain conditions, including the retention of a specified minimum sum in the member's account.

In considering how far the general body of members comprising the Friendly Societies movement can afford to continue their voluntary insurances along with their higher State scheme contributions in future, it must not be overlooked that present-day wage levels are substantially higher for all classes of workers than before the war and the Government has declared that continued Voluntary insurance to supplement State benefits, wherever one's means permit, should be encouraged.

Moreover, in addition to the widespread branch units of the better known "Orders," there are numerous small independent societies whose membership is maintained more easily than in the large societies, by age-long custom of family and social

tiles within their own locality, and there still exist a few such societies whose formation dates back far beyond any "Friendly Society" legislation. In fact, long before the term "Friendly Society" came into use, the seeds of Voluntary mutual insurance had been sown in the ancient religious and trade "Guilds." As is evident from the many extant parchment returns detailing their rules and possessions under a decree of Richard II, Guilds had become widespread in Britain by the 14th century. By then, the purely charitable character of the original Guilds had largely changed with the emergence of numerous small institutions adopting primitive mutual insurance methods of a regular flat rate contribution in order to obtain relief when sick or in old age and a payment to the widow in the event of death.

The present register of Friendly Societies includes several societies which have been in existence for upwards of 200 years, the four earliest all operating in Scotland, the oldest being the "Incorporation of Carters in Leith" established as long ago as 1555. The three oldest in England were all formed in London—the "Norman Society" (estd. 1703), the "Society of Lintot" (estd. 1708) and the "Society for the Mutual Help of Swiss in London" (estd. 1703), the first two of these having been formed by Huguenot refugees from the Protestant persecution under Louis XIV.

The first Act for the encouragement and pro-

tection of "Friendly Societies" in this country was not passed until 1793, but various amending Acts were put on the Statute Book during the next century as the result of the recommendations of successive Select Committees (including a Royal Commission in 1871). For example, it was not until the 1829 Act that all registered Friendly Societies were required to keep proper records of individual sickness and mortality amongst their members, which data enabled the construction of standard actuarial tables showing the expected (average) duration of sickness at successive ages, and also (with data from the Census) the corresponding mortality rates.

The rules and other documents of societies deposited with local justices passed into the custody of the Registrar following the Act of 1846 and are of considerable interest to social historians. Those relating to some societies no longer on the register have been transferred to the Public Record Office for permanent preservation.

The present consolidating Act of 1896 allows various specific classes other than "Friendly Societies" to be registered thereunder, but exemption from income tax (irrespective of the extent of interest income) is enjoyed only by registered "Friendly Societies."

The Friendly Societies Act, 1955, extended the purposes for which societies may be registered under the Acts, and authorized societies to invest their surplus funds in other registered societies.

Building Societies—Great Britain

Acts 1874-1960.

Building Societies are, with few exceptions, associations incorporated with limited liability under the Building Societies Acts. All Building Societies are required to register their rules and file their accounts with the Registrar of Friendly Societies and Building Societies. The following particulars showing the growth of Building Societies (as also that of Co-operative and Friendly Societies tabulated on pp. 1130 and 1131) are based on the Registrar's Annual Reports. The Editor is also indebted to the publishers of the "Building Societies Year Book" for details of individual societies from which the second table hereunder has been compiled.

The building societies movement has played a considerable part in the expansion of home ownership since the war. Between 1946 and 1958 building societies advanced nearly £4,000,000,000 on mortgage, the bulk of it to assist owner-occupiers to buy their homes.

The progress of the building society movement over the past twenty years and the tendency to concentration in a smaller number of larger societies is illustrated by the following figures:—

	1940	1950	1960
Number of Societies.....	952	819	726
Total Assets.....	£756m	£1,256m	£3,166m
Average per society of total assets.....	£.8m	£1.5m	£4.4m

Advances on mortgage during 1960 totalled £559,000,000 which was £42,000,000 higher than the previous highest total for one year's advances (in 1959).

Shareholders and depositors added £584,000,000 to their accounts during 1960 while £473,000,000 was withdrawn from these accounts. The total assets increased to £3,166,000,000. Of this total, mortgage balances represented 83 per cent., the remainder consisting chiefly of investments in Government securities and cash. Reserves and profit balances represented 4.3 per cent. of the total assets.

For the year 1960 interest received by societies from borrowers amounted to £149,000,000. Interest payments to shareholders and depositors totalled £95,000,000. Management costs, at £18,000,000 for 1960, averaged only about 1½d. per £1 of the mean mortgage assets. Of this total advertising accounted for 7 per cent. and commission and agency fees 12 per cent.

In June, 1961, the Building Societies Association recommended an increase in interest rates to 6½ per cent. on mortgages and 3½ per cent. on shares and these rates have been widely adopted. Interest on deposits is now generally 3½ per cent. (income tax on both share and deposit interest being paid by the societies).

Section 1 of the House Purchase and Housing Act, 1959, empowered the Chief Registrar to designate building societies for the purposes of the section. Societies that had been designated up to the time of going to press are marked "D" in the list which follows.

A society so designated is entitled to participate in the Government scheme for Exchequer advances to building societies (at present suspended). Deposits in a designated building society rank as "narrower-range investments requiring advice" and shares in such a society as "wider-range investments" under the First Schedule to the Trustee Investments Act, 1961.

The Building Societies Act, 1960 was the first major piece of legislation relating to building societies passed since the Building Societies Act,

1894. It is understood that work is now in progress on the drafting of a Bill to consolidate all the Building Societies Acts and it is hoped that this may be ready in time to be introduced in the next session of Parliament.

The provisions of the Building Societies Act, 1960, fall broadly into two groups, those which regulate the internal administration of building societies and those which confer new powers of control on the Chief Registrar of Friendly Societies. In future building societies will not be permitted to make more than 10 per cent. of their total new advances in any year to bodies corporate or in the form of large advances (defined at present as advances exceeding £5,000) but the percentage may be increased in a particular case by the Chief Registrar to enable a society to make advances on new dwellings for letting. The formalities necessary on formation of a new building society are made more stringent and the Chief Registrar is given powers of control over small building societies (i.e. those with assets of less than £100,000) if in his opinion there has been a change in the scale or character of their business.

Section 11 of the Prevention of Fraud (Investments) Act, 1958 under which the Registrar has prohibited certain societies from inviting new investments has been repealed (but without prejudice to any order currently in force) and the Chief Registrar is empowered to direct that a building society shall not advertise at all or to give directions to a particular society as to the matter included in its advertisements. In addition he may make an order prohibiting a building society from accepting further

investments. These and other new powers of the Chief Registrar, such as the power to make regulations about the contents of building societies' advertisements generally and to prescribe the range of securities in which a society may invest its surplus funds are subject to the consent of the Treasury.

Matters of internal administration which are regulated by sections of the Act include the keeping of books of account and register of members, the preparation of annual accounts in a form prescribed by the Chief Registrar, the qualifications, appointment and removal of auditors, the form and content of directors' and auditors' reports, the right of members to receive copies of the accounts and reports, the calling and conduct of general meetings and the duties of directors. A revised procedure is prescribed for assessing the adequacy of the security for an advance and certain restrictions are placed on the persons who may make valuation reports. In addition to the annual accounts a society is required to send an annual return in a prescribed form to the Chief Registrar. The Registrar must also be notified of changes in a society's officers.

The Act of 1894 gave the Registrar power, on application by a certain number of members, to appoint an inspector to examine into and report on the affairs of a building society or to call a special meeting of the society. The Act of 1960 authorizes the Chief Registrar to exercise these powers without any application from the members if he is of the opinion that an investigation should be held into the affairs of the society or that its affairs call for consideration by a meeting of members.

BUILDING SOCIETIES, GREAT BRITAIN, 1960—with 1959 totals in italics.

PUBLIC HOLIDAYS

BANK HOLIDAYS IN ENGLAND, WALES, NORTHERN IRELAND AND THE CHANNEL ISLANDS ARE:—Easter Monday, Whit Monday, first Monday in August and first week-day after Christmas (Boxing Day).

Banks are also closed on Good Friday and Christmas Day.

The Stock Exchange is closed on Bank Holidays, Good Friday and Christmas Day; and on Saturdays throughout the Year.

Custom House and Docks, as Banks; with the Queen's Birthday (when decreed).

Excise and Stamp Offices, as Banks; with Whit Tuesday and Coronation Day, if and when decreed.

Law Offices.—Good Friday, Easter Monday and Tuesday, Whit Monday, Christmas Day, and first week-day after Christmas.

BANK HOLIDAYS IN SCOTLAND ARE: New Year's Day, first Monday in May and first Monday in August.

Banks in Scotland are also closed on Good Friday and Christmas Day. There are also Spring and Autumn holidays in most Scottish cities and towns.

Scotland has special Term (Quarter) Days:—Candlemas, Feb. 2; Whit Sunday, May 15 (Fixed date); Lammas, Aug. 1; and Martinmas, Nov. 11; the Removal Terms are May 28 and Nov. 28.

Legal Notes

ADOPTION OF CHILDREN

In England and Wales the adoption of children is regulated mainly by the Adoption of Children Acts, 1926 to 1949, and the Adoption Act, 1958. An order of court is necessary to legalize the adoption. Adoption puts the child adopted practically on the same footing as a child born to the adopter in lawful wedlock, in all matters of custody, education and maintenance; further, it is provided by the Act of 1958 that an adopted child shall be treated as the child of the adopter (and not the child of its natural parents) for the purpose of the devolution of property on an intestacy occurring, or under any disposition made, after the date of the adoption order. Applications are made to the High Court (Chancery), County Court, or Magistrates Court. Orders will not usually be made for a man to be sole adopter of a girl, and the applicant must be either:—

- (a) Twenty-five years of age or over; or
- (b) Twenty-one years of age or over and a relative (as defined in the Act of 1958) of the infant; or
- (c) the mother or father of the infant.

Two spouses may jointly adopt an infant, but unless one of them is the mother or father of the infant, condition (a) or (b) above must be satisfied in respect of one of the applicants and the other spouse must have attained the age of twenty-one.

The consent of the child's parents or guardian is required before an adoption order will be made, but in certain circumstances (e.g., where the parent or guardian has ill-treated or neglected the child) the court may dispense with this consent. Since the 1949 Act, marriage between the adopter and the adoptee is prohibited, but marriages of that kind, solemnized before the passing of the Act, are not thereby invalidated.

The 1958 Act places restrictions on societies which make arrangements for the adoption of children.

Scotland.—The Adoption of Children (Scotland) Acts, 1930 to 1949, and the Adoption Act, 1958, cover the law relating to the adoption of children in Scotland, where an Adopted Children Register is maintained. Applications are made to the Court of Session, or the Sheriff Court within whose jurisdiction either the applicant or the child resides at the date of application. The Adoption Act, 1958 which is a consolidating Act, also applies, with modifications, to Scotland, and reference is also made to the Adoption Act, 1960 which amends the law with respect to revocation of adoption orders. Owing to divergence of the laws of England and Scotland there is not, however, complete uniformity in this branch of the law in both countries. Thus, in regard to property rights, an adopted child in Scotland remains a member of the family of his actual parents, and an adoption order does not deprive him of any legal rights competent to him in the estate of his parents, nor are any rights conferred on him as the child of the adopter.

All adoptions in Great Britain are registered in the Registers of Adopted Children kept by the Registrars General in London and Edinburgh respectively. Certificates from these registers, including short certificates which contain no reference to adoptions, can be obtained on conditions similar to those relating to birth certificates. (See below.)

BIRTHS (REGISTRATION)

When a birth takes place, personal information of it must be given to the Registrar of Births and Deaths for the sub-district in which the birth occurred and the register signed in his presence, by one of the following persons:—

1. the father or mother of the child. If they fail;
2. the occupier of the house in which the birth happened;
3. a person present at the birth; or,
4. the person having charge of the child.

The duty of attending to the registration therefore rests firstly on the parents. The mother is responsible for the registration of the birth of an illegitimate child. The registration is required to be made within 42 days (Scotland 21 days) of the birth. Failure to do this, without reasonable cause, involves liability to a penalty of forty shillings (in Scotland the penalty is £1). The registration of a birth will be free when it takes place within 42 days (in Scotland 21 days). In England or Wales, the informant, instead of attending before the registrar of the sub-district where the birth occurred, may make a declaration of the particulars required to be registered in the presence of any registrar. The fee payable for this is 3s. 6d. There are special provisions relating to late registration. Under the Public Health Act, 1936, and the Public Health (London) Act, 1936, notice of every birth must be given by the father, or person in attendance on the mother, to the district medical officer of health by post within 36 hours of the birth. This is in addition to the registration already mentioned.

A "Stillbirth" must be registered and a certificate signed by the doctor or midwife who was present at the birth or has examined the body of the child must be produced to the registrar. The certificate must, where possible, state the cause of death and the estimated duration of the pregnancy.

The re-registration of the birth of a person legitimated by the subsequent marriage of the parents is provided for in the Births and Deaths Registration Act, 1953. In Scotland re-registration of a child legitimated *per subsequens matrimonium* or whose birth entry is affected by a Decree of Court respecting status or paternity is provided for by the Registration of Births, etc. (Scotland), Amendment Act, 1934.

Birth at Sea: The master of a British ship must record any birth on board and send particulars to the Registrar General of Shipping.

Birth Abroad: Consular Officers are authorized to register births of British subjects occurring abroad. Certificates are procurable in due course at Registrar General's office, London.

The registration of births occurring out of the United Kingdom among members of the armed forces, or occurring on board H.M. ships and aircraft, is provided for by the Registration of Births, Deaths and Marriages (Special Provisions) Act 1957, applicable also to Scotland.

CERTIFICATES

OF BIRTHS, MARRIAGES, OR DEATHS

England and Wales.—Certificates of Births, Deaths, or Marriages can be obtained at the General Register Office, Somerset House, on payment of fees amounting to 5s. 3d., viz., 2s. 6d. for search, and 3s. 9d. for the certificate. (When application is made by post the charges are 7s. 6d.) They can also be obtained from the Superintendent Registrar having the legal custody of the register containing the entry of which a certificate is required. Certificates of marriages can also be

obtained from the incumbent of the church in which the marriage took place (the customary fee being 3s. 9d.); or from the Nonconformist minister (or other "authorized person") where the marriage takes place in a registered building (See *post* under Marriage).

Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament, and under Births and Deaths Registration Act, 1953, a modified form of birth certificate, showing the names, sex and date of birth and certain other particulars, but not the parentage, may be obtained from the Registrar General, or the appropriate Superintendent Registrar or Registrar, on payment of a fee of 9d. (inclusive of search) and on furnishing certain particulars.

English Registers.—Records of births, deaths and marriages registered in England and Wales since 1837 are kept at the General Register Office, Somerset House. *The Society of Genealogists*, 37 Harrington Gardens, S.W.7, possesses many records of Baptisms, Marriages and Deaths prior to 1837, including copies, in whole or in part, of about 4,000 Parish Registers.

Scottish Registers of Births, Deaths and Marriages.—Certificates of births, deaths or marriages registered from 1855 when compulsory registration commenced in Scotland can be obtained at the General Registry Office, New Register House, Edinburgh, or from the appropriate local Registrar on payment of the fee of 5s. 3d., viz.:—1s. 6d. for search and 3s. 9d. for the certificate. Certificates are issued at reduced rates for specified purposes as in England & Wales and similar provision exists for abbreviated birth certificates (see *q.d.*).

There are also available at the General Registry Office old parish registers of date prior to 1855, which were formerly kept under the administration of the Established Church of Scotland. An extract of an entry in these registers may be obtained at the fee of 5s. 3d. A fee of 20s. is payable for a general search of all the Scottish registers.

BRITISH NATIONALITY AND CITIZENSHIP OF THE UNITED KINGDOM AND COLONIES

General.—The law as to British Nationality is now to be found mainly in the British Nationality Act, 1948, which came into force on Jan. 1, 1949. The Act introduces a new term, "citizenship." Every person who under the Act is a citizen of the United Kingdom and Colonies, or any citizen (by virtue of legislation in that country) of Canada, Australia, New Zealand, India, Pakistan, Ghana, the Federation of Malaya, Nigeria, or Sierra Leone (hereafter referred to as "the Dominions") has by virtue of that citizenship the status of a British subject, and may be known either as a British Subject or as a Commonwealth citizen. Under s. 2 of the Newfoundland (Consequential Provisions) Act, 1950, potential citizens of Newfoundland under the British Nationality Act, 1948, are deemed to have been potential citizens of Canada.

Nationality before Jan. 1, 1949, was determined mainly by the British Nationality and Status of Alien Acts, 1914-1943, though these Acts did not affect the status of any person born before Jan. 1, 1915.

Retention of nationality by persons born in or who are citizens of Eire (now by virtue of the Ireland Act, 1949, styled the Republic of Ireland).

By the Ireland Act, 1949, a person who was born before Dec. 6, 1922, in what is now the Republic of Ireland (Eire) and was a British subject immediately before Jan. 1, 1949, is not deemed to have ceased to be a British subject unless either (i) he was domiciled in the Irish Free State on

Dec. 6, 1922, or (ii) was on or after April 10, 1935, and before Jan. 1, 1949, permanently resident there, or (iii) had before Jan. 1, 1949, been registered as a citizen of Eire under the laws of that country.

In addition by the British Nationality Act, 1948, any citizen of Eire who immediately before Jan. 1, 1949, was also a British subject can retain that status by submitting at any time a claim to the Home Secretary on any of the following grounds: (a) he has been in the service of the United Kingdom government; (b) he holds a British passport issued in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory; (c) he has associations by way of descent, residence or otherwise with any such place; or on complying with similar legislation in any of the "Dominions."

Citizenship of the United Kingdom and Colonies.

In the majority of cases, a person who is a British subject becomes also a "citizen," either of one of the "Dominions" by virtue of legislation in that country, or of the United Kingdom and Colonies under the 1948 Act. In the latter case, citizenship is acquired by:—

1. Birth on or after Jan. 1, 1949, in the United Kingdom and Colonies (which term does not include the "Dominions"), except

- (a) children born to non-citizen fathers enjoying diplomatic immunity from suit or legal process;
- (b) children born to fathers who are enemy aliens in enemy occupied territory.

2. Descent, if the father was a citizen by birth. If the father was a citizen by descent only, the child acquires citizenship by descent if either:—

- (a) the child is or his father was born in a protectorate, protected state, mandated territory or trust territory, or in a foreign country where Her Majesty then had jurisdiction over British subjects; or
- (b) the birth (occurring elsewhere than (a)) is registered at a United Kingdom consulate within one year; or
- (c) the father is at the time of birth in the service of the Crown under Her Majesty's United Kingdom government; or
- (d) the child is born in one of the "Dominions" in which a citizenship law has then taken effect and does not become a citizen thereof by birth.

3. Registration by the Home Secretary upon application by:—

- (a) a citizen of one of the "Dominions" or of the Republic of Ireland who can show either that he is ordinarily resident in the United Kingdom and has been so resident for a period of twelve months, or is in Crown service under the United Kingdom government, or, in certain circumstances, if he is serving under an international organization of which the United Kingdom Government is a member, or is in the employment of a body established in the United Kingdom;
- (b) a woman married to a United Kingdom, etc. citizen. If she is a British protected person or an alien she must take an oath of allegiance. (A woman who marries on or after Jan. 1, 1949, does not by virtue of that marriage acquire citizenship.)

A minor child of a citizen can be registered upon application being made by his parent or guardian.

4. Naturalization.—In order to be eligible for a certificate of naturalization an alien must:—

- (a) during the eight years preceding his application have resided for not less than five years (of which not less than one year immediately preceding the application must have been spent in the United Kingdom) in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory, or have been for five years in the service of the Crown; and
- (b) be of good character and have a sufficient knowledge of the English language, and
- (c) intend to reside in the United Kingdom or any colony, etc., or to enter or continue in the service of the Crown or in the service of certain organizations.

A British protected person who satisfies (b) and (c) above can apply for naturalization if he can show either that he has resided in the United Kingdom for the twelve months (or such shorter period as the Home Secretary may allow) immediately preceding his application, or that he is in the service of the Crown under Her Majesty's United Kingdom Government.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization are supplied with the form of application which may be obtained from H.M. Stationery Office.

5. *Incorporation of Territory* when citizenship is granted to such persons as are specified by Order in Council.

6. *Transitional Provisions*, which confer citizenship on a person who was a British subject immediately before Jan. 1, 1949, if either:—

- (i) (a) he would, if born after that date, have qualified for citizenship by birth; or
- (b) he is a person naturalized in the United Kingdom and Colonies; or
- (c) he became a British subject by reason of annexation of territory which on Jan. 1, 1949, was included in the United Kingdom and Colonies; or
- (ii) at the time of his birth his father was a British subject and possessed any of the above qualifications; or
- (iii) he was born within territory comprised on Jan. 1, 1949, in a protectorate, protected state or United Kingdom trust territory; or
- (iv) he was not on that date a citizen or potential citizen of one of the "Dominions"; or
- (v) being a woman, had before Jan. 1, 1949, been married to a man who becomes, or would but for his death have become, a citizen.

A British subject who is merely a potential citizen of one of the "Dominions" continues as a British subject without citizenship until he becomes a citizen of such "Dominion" or of the Republic of Ireland, or an alien. If none of these has happened at the date when a citizenship law is passed in the country of which he is potentially a citizen, he becomes a citizen by descent of the United Kingdom and Colonies.

A woman who lost British nationality by reason of marriage to an alien regained it on Jan. 1, 1949.

By the Adoption Act, 1958, an adopted child becomes a citizen of the United Kingdom and Colonies as from the date of the adoption order if the adopter or, in the case of a joint adoption, the male adopter, is a citizen of the United Kingdom and Colonies.

Citizenship of the United Kingdom and Colonies can be lost:—

- (i) by declaration in the prescribed manner by a person who is also a citizen of a "Dominion" or of the Republic of

Ireland or a national of a foreign country.

The Home Secretary can withhold registration of the declaration in time of war;

- (ii) where the Home Secretary is satisfied that citizenship by registration or naturalization was obtained by fraud, false representation, etc.;
- (iii) by the Home Secretary depriving a naturalized person of citizenship if such person has:—

- (a) shown himself by act or speech to be disloyal or disaffected towards Her Majesty; or
- (b) in time of war, traded with the enemy; or
- (c) within five years after becoming naturalized, been sentenced in any country to a term of twelve months' imprisonment; or
- (d) continuously resided in foreign countries for seven years, and during that period has neither at any time been in the service of the Crown or of certain international organizations, nor registered annually at a United Kingdom consulate his intention to retain citizenship;

and the Home Secretary is satisfied that it is not conducive to the public good that such person should retain his citizenship;

- (iv) where a naturalized person is deprived of citizenship of a "Dominion" or of the Republic of Ireland, the Home Secretary can also deprive him of citizenship of the United Kingdom and Colonies.
- (v) Under sect. 2 of the British Nationality Act, 1958, which contains special provisions with regard to citizens of Ghana.
- (vi) Under sect. 4 of the Cyprus Act, 1960, which contains special provisions with regard to Cyprus.
- (vii) Under sect. 2 of the Nigeria Independence Act, 1960, which contains special provisions with regard to Nigeria.
- (viii) Under sect. 2 of the Sierra Leone Independence Act, 1961, which contains special provisions with regard to Sierra Leone.

STATUS OF ALIENS.—Property may be held by an alien in the same manner as by a natural-born British subject, but he may not hold public office, exercise the franchise or own a British ship or aircraft. The Republic of Ireland Act, 1949, declares that the Republic, though not part of H.M. Dominions, is not a foreign country, and any reference in an Act of Parliament to foreigners, aliens, foreign countries, etc., shall be construed accordingly.

CROWN—PROCEEDINGS AGAINST

Before 1947 proceedings against the Crown were generally possible only by a procedure known as a petition of right, which placed the litigant at a considerable disadvantage and which was not normally available at all in cases of tort (i.e., civil wrongs other than breach of contract). Thus, no proceedings would normally lie against the Government if a subject were injured by the negligent driving of a Government vehicle (although the driver could be sued) or if a Government employee were injured by the defective condition of the Crown premises on which he worked. Now, however, by the Crown Proceedings Act, 1947, which came into operation on Jan. 1, 1948, the Crown, in its public capacity, is largely placed in the same position as a subject, although some procedural disadvantages remain. Among exceptions to the Act are the

following: (a) No action lies in tort against the Crown or the individual Crown servant for anything done or omitted to be done in relation to any postal packet or telephone communication, except for loss of a registered in and postal packet (in which case the action must be brought within one year of posting), not being a telegram. (b) The Crown and any member of the armed forces are immune from liability in tort in respect of death of or personal injury to another member of the armed forces on duty provided that the death or injury is attributable to service for purposes of pension.

Scotland.—The Act extends to Scotland and has the effect of bringing the practice of the two countries as closely together as the different legal systems will permit. While formerly actions against the Crown, when permissible, were confined to the Court of Session, proceedings may now be brought in the Sheriff Court. The Lord Advocate is the proper defender in proceedings against the Crown.

The Act lays down that arrestment of money in the hands of the Crown or of a Government Department is competent in any case where arrestment in the hands of a subject would have been competent, but an exception is made in respect of Post Office Savings Bank deposits. On the other hand, the former rule that the wages and salaries of the servants of the Crown are not arrestable remains unaltered.

DEATHS, BURIAL AND CREMATION

DEATHS

(For Certificates, see under BIRTHS)

In England and Wales.—When a death takes place, personal information of it must be given to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons:—1. A relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased. In default of any relatives, 3. A person present at the death; or, the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or, the person causing the disposal of the body. Relatives present or in attendance are first required to attend to the registration. The registration must be made within five days of the death, or within the same time written notice of the death sent to the Registrar. If the deceased was attended during his last illness by a registered medical practitioner, a certificate of cause of death must be sent by the doctor to the registrar. The doctor must give to the informant of the death a written notice of the signing of the certificate, which must be delivered to the registrar. It is essential that a certificate for disposal should be obtained from the registrar before the funeral and delivered to the clergyman or other person in charge of the churchyard or cemetery. No fee is chargeable for this certificate. If the death is not registered within five days (or fourteen days if written notice of the occurrence of the death is sent to him) the Registrar may require any one of the above-mentioned persons to attend to register at a stated time and place. Failure to comply involves a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods. After twelve months no death can be registered without the Registrar General's consent and on payment of fees amounting to fifteen shillings.

A body must not be disposed of until (1) either the Registrar has given a certificate to the effect that he has registered or received notice of the

death, or (2) until the Coroner has made a disposal order (*Births and Deaths Registration Act, 1926, s. 1*).

A person disposing of a body must within ninety-six hours deliver to the Registrar a notification as to the date, place, and means of the disposal of the body (*ib. s. 3*).

"Still-born" child. (See under Births (Registration), p. 1138.)

Death at Sea.—The master of a British ship must record any death on board and send particulars to the Registrar General of Shipping.

Death Abroad.—Consular Officers are authorized to register deaths of British subjects occurring abroad. Certificates are procurable at the Registrar General's Office, London. If the deceased was of Scottish domicile, particulars are sent to the Registrar General for Scotland.

With regard to the registration of deaths of members of the armed forces, and deaths occurring on H.M. ships and aircraft, see the Registration of Births, etc. Act, 1957.

In Scotland, the rules of registration are similar, but (1) the death must be registered within 8 days, failure to do so involving a penalty of from £1 to £2; (2) the medical man concerned must give a certificate of death to the Registrar in terms of the Registration of Births, &c. (Scotland) Act, 1854, within 7 days; (3) the informant of a death receives from the Registrar a certificate that the death has been registered. This is given to the undertaker, who delivers it to the keeper of the cemetery. Failure to comply is under penalty in all cases. The Registration of Births, etc., Act, 1957, applies without modification to Scotland.

BURIAL

The duty of burial is incumbent on the deceased person's Executors (if any appointed); it is also a recognized obligation of the husband of a woman, and the parent of a child, also of a householder where the body lies. Funeral expenses of a reasonable amount will be repayable out of deceased's estate in priority to any other claims. Directions as to place and mode of burial are frequently contained in the deceased's will or in some memorandum placed with private papers, or may have been communicated verbally to a relative. Consequently steps should immediately be taken to ascertain the deceased's wishes from the above sources. If the wishes are considered objectionable, they are not necessarily enforceable: legal advice should be taken. A person may legally leave directions for the anatomical examination of his body. As to the place of burial—unless closed by Order in Council—the parish churchyard is the normal burying place for parishioners, or any person dying in the Parish, but nowadays this will apply only in villages and the smaller towns. In populous districts cemeteries and crematoria have been established either by the local council or a private company, and burials will take place there in accordance with the regulations. For an exclusive right to a burial space in the churchyard a faculty is required from the Ecclesiastical Court. Poor persons may be buried at the public expense by the local authority. As to the necessity for obtaining a registrar's certificate or authority from the Coroner for disposal, see above.

CREMATION

Under the Cremation Acts, 1902 and 1952, regulations are made by the Home Secretary dealing fully with the cremation of a body, disposal of ashes, etc., and containing numerous essential safeguards.

If Cremation is desired it is advisable for instructions to be left in writing to that effect. Cremation may not take place if deceased has prohibited that form of disposal.

To arrange for Cremation the Executor or near relative should instruct the undertaker to that effect and obtain from him the Statutory Forms required as given in the Cremation Regulations issued in 1930 (Statutory Rules and Orders, 1930, No. 1016).

DIVORCE, ETC.

Preliminary.—Matrimonial Suits may be conveniently divided into three classes viz. (1) those in which a declaration that there has never been a marriage is sought; (2) those in which the duties arising from marriage are sought to be upheld; and (3) those in which the marriage being admitted, it is sought to end the marriage or the duties arising from it.

(1) *Nullity of Marriage.*—Marriage is void *ab initio* if the parties were in the prohibited degrees of affinity, if it was bigamous, if there was no sufficient consent on the part of one or both of the parties, if one of the parties was insane, or if one of the parties was under the age of consent, i.e., 16—Marriage Act, 1949. Where the formalities of the marriage were defective, the marriage is generally void if both parties knew of the defect (e.g., where marriage took place otherwise than in an authorized building). But absence of the consent of parents or guardians (or of the Court or other authority, in lieu thereof) in the case of minors does not invalidate the marriage. Inability to consummate a marriage may also be a ground for a nullity decree; but in this case, the marriage is only voidable and remains valid until the decree is made.

Under the Matrimonial Causes Act, 1950, which does not apply to Scotland, a marriage is also voidable (i.e., a decree of nullity may be obtained) on the following grounds—(a) respondent's wilful refusal to consummate the marriage; (b) that either party at the time of marriage was a mentally disordered person or subject to recurrent attacks of insanity or epilepsy; (c) that at the time of marriage the respondent was suffering from communicable venereal disease; (d) that at the time of the marriage the respondent was pregnant by another man. In cases, (b), (c) and (d), the petitioner must have been ignorant of the grounds at the date of the marriage and must not have agreed to intercourse taking place since discovering the grounds, and proceedings must be instituted within a year of the marriage.

By the Matrimonial Causes Act, 1950, and, as to Scotland, by the Law Reform (Miscellaneous Provisions) Act, 1949, it is provided that a decree of nullity in respect of a voidable marriage shall not operate so as to bastardize any child, who would have been the legitimate child of the parties to the marriage if the marriage had been dissolved instead of annulled. Further, even if a marriage is void, a child of such a union can sometimes be treated as legitimate if at the time of conception or of the marriage (if later) either or both of the parties reasonably believed that the marriage was valid (Legitimacy Act, 1959).

A spouse's insistence upon the use of contraceptives will not constitute wilful refusal to consummate within (a) above, even though there has been no normal intercourse, but it may in certain circumstances enable a petition for Divorce to be brought on the grounds of cruelty (as to which see below). Further it has been allowed as a defence to a charge of desertion against the aggrieved party.

In one High Court case the judge held that a husband's insistence on the practice of *coitus interruptus* amounted to wilful refusal to consummate the marriage, where there had been no other intercourse. In other High Court cases the judges have disagreed with this view, but held that, in

the circumstances of the particular cases, a divorce could be granted on the ground of legal cruelty.

(2) *Restitution of Conjugal Rights.*—This is a form of relief generally sought by a spouse who has been deserted. Disobedience to a decree of restitution of conjugal rights is a ground for obtaining judicial separation.

(3) *Judicial Separation and Divorce.*—The third class of suit includes a suit for judicial separation (which does not dissolve a marriage) and a suit for divorce (which, if successful, dissolves the marriage altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation on the same grounds as those for divorce and also on the ground specified in (2) above.

Divorce.—Complete divorce is now obtainable by either husband or wife upon any one of the following grounds: adultery of respondent since marriage; desertion by respondent for 3 years immediately before petition; cruelty to petitioner; incurable insanity (under certain conditions); and by the wife, also on commission by the husband of certain criminal sexual offences. Matrimonial Causes Act, 1950, s. 1.

The foregoing is subject to a clause prohibiting any petition for divorce (but not for judicial separation) before the lapse of three years from the date of marriage, except in the case of exceptional hardship (upon petitioner) or of exceptional depravity of respondent.

Cruelty, in a legal sense, is conduct of such a character as to have caused injury or a reasonable apprehension of injury to life, limb, or health (bodily or mental). A course of conduct calculated to break the spirit of the sufferer, continued until health breaks down or is likely to break down under the strain, constitutes legal cruelty.

Desertion may be defined as a voluntary withdrawal from cohabitation by one spouse without just cause and against the wishes of the other. Where one spouse is guilty of conduct of a serious nature which forces the other to leave, the party at fault is said to be guilty of constructive desertion.

If, upon disputes arising, the parties agree to live apart, then in general neither can be said to have deserted the other.

When the decree will be refused.—A decree must be refused, even if the suit is undefended, if the allegations in the petition for divorce are not proved. (There is no such thing in the Divorce Court as judgment against the respondent by default.) Other absolute bars to relief are (i) connivance at the adultery of the respondent; (ii) collusion, as where the initiation of the suit is procured by agreement or bargain (but this does not prevent a fresh suit being brought free from collusion); (iii) condonation of the respondent's adultery or cruelty, i.e., complete forgiveness which restores the *status quo* (although the offence may be revived by later misconduct). There are also certain discretionary bars, as e.g., where the petitioner has been guilty of adultery; of unreasonable delay; of cruelty; or of wilful neglect or misconduct conducing to the adultery, insanity, or desertion alleged. (1950 Act, s. 4.)

Intervention by Queen's Proctor.—At any time during the progress of a suit, and before the decree nisi is made absolute, the Queen's Proctor may intervene.

Decree Absolute.—Every decree of dissolution or nullity is in the first instance a decree nisi. The marriage subsists until the decree is made absolute, usually three months after decree nisi. After that date either spouse may marry again; but as to marriage within "Prohibited Degrees" see

Marriage—Miscellaneous Notes, pp. 1151-2. By the Matrimonial Proceedings (Children) Act, 1958 a decree *nisi* cannot be made absolute until the Court is satisfied that arrangements have been made for the care and upbringing of every child of the family who has not attained the age of sixteen which are satisfactory or the best which can be devised in the circumstances or that it is impracticable for the parties before the Court to make any such arrangements.

Maintenance, etc.—The Court has wide powers to make orders as to maintenance or alimony (usually payable to an innocent wife), and as to costs. The husband can be ordered to pay his wife's costs, even if she is unsuccessful in her suit or defence. A guilty co-respondent may be ordered to pay costs and damages.

By the Matrimonial Causes Act, 1950, the High Court in England may, where the husband has wilfully neglected to provide reasonable maintenance for the wife or children, order the husband to make provision for them, *even though* no matrimonial suit is pending between the parties to the marriage, and while such an order is in force the Court may also deal with custody of and access to the children.

CUSTODY OF CHILDREN

In suits for nullity, divorce or judicial separation, whether the suit succeeds or is dismissed, the Court can make orders as to the custody of and access to the children and as to their upkeep and education, and these orders can be made not only in respect of children of the marriage but also in respect of a child of one party who has been accepted as one of the family by the other party. A guilty spouse will normally be entitled to reasonable access to the children and may even be awarded the custody if the Court thinks fit. The paramount consideration is always the welfare of the child.

A spouse who has been deprived of the custody of a child will not thereby be deprived of his other rights as the child's *guardian* unless the Court expressly so orders.

SEPARATION BY AGREEMENT

Husband and wife may agree, with or without consideration, to separate and live apart, but the agreement, to be valid, must be followed by an immediate separation. It is most desirable to consult a solicitor in every such case.

MAGISTRATE'S SEPARATION AND MAINTENANCE ORDERS

When a husband has been guilty of adultery or of certain assaults or has deserted his wife, or has been guilty of persistent cruelty to her or to an infant child of the family, or of wilful neglect to maintain her or such a child, or where he is an habitual drunkard or drug addict, or insists on having intercourse while suffering from a venereal disease, or compels her to submit herself to prostitution, the wife may obtain relief from the local magistrates' court. A husband may apply on similar grounds, so far as they are applicable to him. The Court may declare that the complainant is no longer bound to cohabit with the defendant. It may order the husband to pay a weekly sum not exceeding £7 10s. to the wife and may order her to make a similar payment to him if his earning capacity is impaired by age or illness. Provision may be made for legal custody of and access to any child of the family who is under the age of 16 years and for payment by either or both of the spouses of up to 50s. weekly to the person entrusted with legal custody in respect of each child of the family up to the age of 16. If the court thinks the

child would still be a dependant although over that age, similar payments may be ordered for support of the child up to the age of 21. The court cannot make an order that the parties need no longer cohabit or that either spouse shall support the other where the complainant has committed adultery during the marriage, unless the defendant has condoned or connived at, or by wilful neglect or misconduct condoned to, that act of adultery. The court has wide powers of revocation, revival and variation of orders already made. The order must be revoked if the parties have resumed cohabitation, and must be revoked, except so far as the order relates to the children, if the complainant is subsequently proved to have committed adultery since the marriage and the defendant has not condoned or connived at or by wilful neglect or misconduct condoned to that act of adultery. Complaints based on desertion or failure to maintain can be made whilst the offence continues. Complaints based on adultery must usually be made within 6 months of the complainant discovering it, all other complaints within 6 months of the offence itself. The Magistrates' Courts Act, 1952, separates the hearing of matrimonial disputes from ordinary Court business specifies the persons allowed to be present; limits newspaper reports, etc., etc.

SCOTLAND DIVORCE

Proceedings are brought in the Court of Session and it is necessary that the husband be domiciled in Scotland, or, he not being domiciled in the United Kingdom or in the Channel Islands or the Isle of Man, that the wife is resident in Scotland and has been ordinarily resident there for a period of three years immediately preceding commencement of proceedings.

The following are the grounds for divorce:—

1. **Adultery.**—A mere confession by the defender is of itself insufficient; there must be proof of the facts. Direct evidence is not required, if facts can be established which give rise to an inevitable inference of adultery. There must be no collusion between the parties, and the pursuer is required to swear to this. It is not collusion, however, for a guilty spouse to give information of an act of adultery already committed. It is a defence to an action of divorce for adultery to plead that the innocent spouse has condoned the misconduct on which the action is founded.

2. **Desertion.**—The defender must have wilfully and without reasonable cause deserted the pursuer and persisted in such desertion for a period of not less than three years. It must be shown that the desertion was without reasonable cause, and that the pursuer has throughout the period been willing to adhere. Refusal by one spouse to have marital relations with the other for any period of three years without any overt act of desertion does not constitute desertion. Here also, collusion is fatal to the success of the action.

3. **Incurable Insanity.**—The defender must, for five years preceding the raising of the action, have been under care and treatment as an insane person.

4. **Cruelty.**—The degree of cruelty to be established depends on the circumstances of each individual case, but the test, generally speaking, is that the conduct complained of must be such as to endanger the health of the pursuer. Cruelty may take the form of habitual drunkenness on the part of one of the spouses.

5. **Unnatural Sexual Offences.**—An extract of the criminal conviction is sufficient proof.

Effect of Divorce on Property.—A husband or wife obtaining decree of divorce against the other, except on the ground of incurable insanity, is

entitled to claim his or her legal rights, *ius relicti*, however, being excluded, as if the offender was dead. Where there has been a successful cross-action the effect is the same as though both spouses had died at the date of decree.

Nullity of Marriage.—A declaration of nullity of marriage may be obtained on the ground of any impediment, viz., consanguinity and affinity, subsistence of a previous marriage, non-age of one of the parties, incapacity or insanity of one of the parties, or by the absence of genuine consent.

SEPARATION

A decree of judicial separation may be obtained by one spouse against the other on the grounds of (a) adultery, (b) cruelty. This entitles the parties to live apart, but does not dissolve the marriage. The husband, if the guilty party, is liable for alimony.

CUSTODY OF CHILDREN

In actions for divorce and separation, the Court has a discretion in awarding the custody of the children of the parties. The welfare of the children is the paramount consideration, and the mere fact that a spouse is the guilty party in the action does not of itself deprive him or her of the right to claim custody, though where the considerations of welfare are equally balanced the Court will have regard to the element of guilt.

HIRE-PURCHASE

ENGLAND AND WALES

Protection of the hirer against unscrupulous dealings and against delivery of shoddy goods is given by the Hire-Purchase Act, 1938 (as amended by the Hire-Purchase Act, 1954), which applies to a hire-purchase agreement under which the hire-purchase price i.e., the total sum payable by the hirer to complete the purchase of the goods, does not exceed £1000 for livestock, or £300 in any other case.

Before any agreement is made, the owner of the goods must state in writing to the hirer the cash price at which the goods can be purchased, and there must be a memorandum of the agreement signed by the hirer himself and by or on behalf of the owner and any guarantor. The memorandum must contain (i) the cash price, (ii) the hire-purchase price, (iii) the amount of each instalment, (iv) when each instalment falls due, (v) a list of the goods, and (vi) a notice informing the hirer of his right to terminate the agreement (*below*), and of the restrictions on the owner's right to recover the goods (*below*), and a copy of the memorandum must be sent to the hirer within seven days of the agreement being made. In breach of any of these conditions the owner can neither recover the goods nor enforce the agreement or any security given, although the Court can dispense with any of these requirements save that as to the signed memorandum. The same result ensues (while default continues) if the owner fails without reasonable cause within four days after written request (with a tender of 2s. for expenses) to supply to the hirer a copy of the agreement and a statement of amounts paid, in arrear, and not yet payable. Before the last instalment becomes due, the hirer may by writing determine the agreement, and, although he will not thereby escape liability for any instalments which have already become due he will be under no further obligation under the agreement. Under the Act, however, he must allow the owner to retake the goods and, if one-half of the hire-purchase price exceeds the total of the sums paid and due, he must pay the difference to the owner. These rights of the hirer cannot be

taken away from him, but he can enforce more favourable rights (if any) under the agreement.

Any provision in the agreement giving the owner a right to enter any premises for the purpose of seizing the goods is invalidated by the Act. Further, even though the agreement may have been terminated because the hirer has broken it, or because the owner has exercised a right to terminate it, if one-third of the hire-purchase price has been paid or tendered, the owner cannot recover the goods otherwise than by action in a County Court, in which the Court can ensure that the hirer is fairly treated. If the owner disregards this provision, the hirer cannot recover the goods, but can recover all sums paid under the agreement.

SCOTLAND

The Hire Purchase and Small Debt (Scotland) Act, 1932, provides that no contract of hire purchase to which the Act applies is binding on the hirer unless (x) it is signed by him and (z) either a copy is acknowledged by him to have been delivered at the time of his signature or sent to him by registered post within fourteen days thereafter. Any contract which limits any right conferred by the Act on the hirer is void to that extent. The hirer may terminate the contract at any time by (z) re-delivery of the article in a good state of repair, fair wear and tear excepted, and (z) paying any instalment then due together with the amount, if any, by which one-third of the total payments stipulated for in the contract by way of instalment exceeds the *cumulo* amount of the instalments due. Even after the owner has obtained decree of delivery of an article, the hirer is entitled to retain it in his possession or to recover it if, within fourteen days of the decree, he pays the whole instalment which is due, with expenses.

The above Act was extended by the Hire Purchase Act, 1954, to apply to articles exceeding £300 in value.

ILLEGITIMACY AND LEGITIMATION

ENGLAND AND WALES

A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Public Assistance Authority where the child becomes chargeable to the local authority, and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 50s. a week. The evidence of the woman must be *corroborated* in a material particular. The mother has the custody of her bastard children. *Prima facie* every child born of a married woman during a marriage is legitimate; and this presumption can only be rebutted by strong, distinct, satisfactory and conclusive evidence.

LEGITIMATION.—By the *Legitimacy Act*, 1926, which came into force on Jan. 1, 1927, where the parents of an illegitimate person marry, or have married, whether before or after that date, the marriage, if the father is at the date thereof domiciled in England or Wales, renders that person, if living, legitimate as from Jan. 1, 1927, or from the date of the marriage, whichever last happens. Under the Act of 1959, marriage legitimates a person even though the father or mother was married to a third person at the time when the illegitimate person was born. It is the duty of the parents to supply to the Registrar General information for re-registration of the birth of a legitimated child.

Declarations of Legitimacy.—A person claiming that he, his parent, or any remoter ancestor has become legitimated, may petition the High Court or the County Court for the necessary declaration.

Rights and Duties of Legitimated Persons.—A legitimated person, his spouse or issue may take property under an intestacy occurring after the date of legitimation, or under any disposition (e.g., a will) coming into operation after such date, as if he had been legitimate.

He must maintain all persons whom he would be bound to maintain had he been born legitimate, and he is entitled to the benefit of any Act of Parliament which confers rights on legitimate persons to recover damages or compensation. The Act specially provides that nothing therein contained is to render any person capable of succeeding to or transmitting a right to any dignity or title.

SCOTLAND

Illegitimate Children (Scotland) Act, 1930.—The mother of an illegitimate child may raise an action of affiliation and aliment against the father, either in the Court of Session or, more usually, in the Sheriff Court. Where in any such action the Court finds that the defender is the father of the child, the Court shall, in awarding inlying expenses, or aliment, have regard to the means of the parties, and the whole circumstances of the case. The Court may, upon application by the mother or by the father of any illegitimate child, or in any action for aliment for an illegitimate child, make such order as it may think fit regarding the custody of such child and the right of access thereto of either parent, having regard to the welfare of the child and to the conduct of the parents and to the wishes as well of the mother as of the father and may on the application of either parent recall or vary such order. The obligation of the mother and of the father of an illegitimate child to provide aliment for such child shall (without prejudice to any obligation attaching at common law) endure until the child attains the age of sixteen years.

By Scots Law an illegitimate child is legitimated by the subsequent marriage of its parents provided there was no impediment to the marriage of the parents at the time of the conception of the child. Such legitimation is recognized by International Law so far as the laws of particular countries allow it and is valid to that extent in England. By the Legitimacy Act, 1926, an illegitimate child may, in certain circumstances, succeed on intestacy. By the Registration of Births, Deaths and Marriages (Scotland) Amendment Act, 1934, a child so legitimated, who has already been registered as illegitimate, may, in certain circumstances be re-registered as legitimate. The consent of the father of an illegitimate child to its adoption is not required.

INTESTACY

ENGLAND AND WALES

As regards deaths on or after January 1, 1953, the position is governed by the Administration of Estates Act, 1925, as amended by the Intestates' Estates Act, 1952. The latter Act considerably increased the benefits of a surviving spouse of an intestate, and also extended the provisions of the Inheritance (Family Provision) Act, 1938 (see under "Wills"), to intestacies. These notes deal with the position under the 1952 Act, so that if the death occurred before 1953 reference must be made elsewhere. If the intestate leaves a spouse and issue, the spouse takes (i) the "personal chattels"; (ii) £5,000 with interest at 4 per cent. from death until payment; and (iii) a life interest in half of the rest of the estate. This life interest can be capitalized at the option of the spouse. "Personal chattels" are articles of household use or ornament (including motor-cars), not used for business purposes. The rest of the

estate goes to the issue. If the intestate leaves a spouse and no issue, but leaves a parent or brother or sister of the whole blood or issue of such brothers and sisters the spouse takes (i) the "personal chattels"; (ii) £20,000 with interest at 4 per cent. from death until payment, and (iii) half of the rest of the estate absolutely. The other half of the rest of the estate goes to the parents, equally if more than one, or, if none, to the brothers and sisters of the whole blood. If the intestate leaves a spouse, but no issue, no parents and no brothers or sisters of the whole blood or their issue, the spouse takes the whole estate absolutely. If resident therein at the intestate's death, the surviving spouse may generally require the personal representatives to appropriate the interest of the intestate in the matrimonial home in or towards satisfaction of any absolute interest of the spouse, including the capitalized value of a life interest. In certain cases, leave of Court is required. On a partial intestacy any benefit (other than personal chattels specifically bequeathed) received by the surviving spouse under the will must be brought into account against the statutory legacy of £5,000 or £20,000 as the case may be. If there is no surviving spouse, the estate is distributed among those who survive the intestate in the following order (those entitled under earlier numbers taking to the exclusion of those entitled under later numbers):—(1) issue; (2) father or mother (equally, if both alive); (3) brothers and sisters of the whole blood; (4) brothers and sisters of the half blood; (5) grandparents (equally, if more than one alive); (6) uncles and aunts of the whole blood; (7) uncles and aunts of the half blood; (8) the Crown.

In cases (1), (3), (4), (6) and (7) the persons entitled lose their interests unless they or their issue not only survive the intestate, but also attain twenty-one or marry under that age, their shares going to the other persons (if any) within the same group who do attain twenty-one or marry. Moreover, in the same cases, succession is not *per capita*, but *per stirpes*, i.e., by stocks or families. Thus, if the intestate leaves one child and two grandchildren, being the children of a child of the intestate who pre-deceased the intestate, the two grandchildren represent their deceased parent and take between them one-half of the issue's share, the remaining half going to the surviving child. Similarly, nephews and nieces represent a deceased brother, and so on.

When the deceased died partially intestate (i.e., leaving a will which disposed of only part of his property), the above rules apply to the intestate part.

Children must bring into account (hotchpot) any substantial advances received from the intestate during his lifetime before claiming any further share under the intestacy. Special hotchpot provisions apply to partial intestacy.

Note that the old rule of primogeniture no longer applies.

For further details, see Administration of Estates Act, 1925, as amended by the Intestates' Estates Act, 1952.

The Legitimacy Act, 1926, contains special provisions concerning the intestacy of an illegitimate child or the mother of an illegitimate child.

SCOTLAND

Heritage.—The lines of succession are: (1) descendants; (2) collaterals; (3) ascendants and their collaterals and so on in the ascending scale. Males have preference over females and the rule of primogeniture obtains. Regard is had, however, to the right of representation; thus, if the eldest son of the deceased, being his heir, has predeceased him leaving issue, the issue (whether male or female) are preferred to the younger sons of the deceased.

Daughters only succeed if there are neither sons nor the issue of predeceasing sons, and where there are more than one, they share equally. There being no descendants, brothers, etc., will succeed, those of the full blood excluding those of the half blood. Among collaterals it is noted that the deceased's immediate younger brother is preferred to an elder brother. Failing a younger brother and his issue the estate ascends to the next elder brother and so on. If there are no brothers and sisters, nor the issue of brothers and sisters, the estate goes to the father and failing him to his collaterals; failing these the estate ascends to the paternal grandfather and his collaterals. The succession never ascends to the mother and her relations; even the mother's own estate, after vesting in her son or daughter, never ascends to the maternal line again.

By the Intestate Husband's Estate (Scotland) Acts, 1911, 1919 and 1959, the widow of a man dying intestate and without lawful issue is entitled to the whole estate both heritable and moveable if under £5,000 in value; if over that amount, she takes £5,000 with interest at 4 per cent. from the date of death. Out of the heritable and moveable estate rateably before any division is made, and without prejudice to her rights of terce and *jus relictae* (see *post*, p. 1155). Section 5 of the Law Reform (Miscellaneous Provisions) (Scotland) Act, 1940, gives like rights to a surviving husband. The same section covers the case of partial intestacy.

Moveable.—One-third of the moveable estate goes to the surviving spouse as *jus relicti (relictae)*; one-third to surviving children as *legitim* (see *post*, p. 1155); and one-third to surviving children and issue of predeceasing children *per stirpes*, i.e., the share which would have fallen to a predeceased parent, if alive, is divided equally among the children. Where no children or issue of children survive, half of the estate goes to the surviving spouse and half to the heirs in *mobilitibus*, i.e., nearest heirs including representatives of predecessors, subject to the spouse's right to £5,000 (*supra*). The lines of succession are the same as in heritable succession, but the right of representation (*supra*) only, applies where there are next of kin or the issue of predeceasing next of kin. Intestate Moveable Succession (Scotland) Act, 1855 (amended 1919). Beyond that relationship heirs take *per capita*. Where an intestate leaves no issue and is predeceased by his father, his mother is entitled to the same rights as the father would have had on survival (1919 Act).

JURY SERVICE

Liability to Jury Service depends upon inclusion in the local Jury Book. This is compiled from the Electors Lists for each year (see *post* under "Voters' Qualifications"). The names of all persons who are on 10th October qualified and liable to serve as jurors are marked with the letter "J" on the Electors Lists. The marked Electors Lists are published, and anyone whose name is improperly marked may before the following 17th December claim that, although qualified to serve [see below] he is exempt from service [see below]; the marks will be removed from the names of exempted persons. The remaining marked names are thereafter included in the Jury Book. No one whose name actually appears in the Jury Book may claim exemption on any ground whatever except illness or, if a woman, for medical reasons.

QUALIFICATIONS

England and Wales.—Every man and woman between the ages of 21 and 60 years [persons over 60 are exempt but not disqualified] residing in

England or Wales being the owner, legally or under a trust, of freehold land worth £20 a year or more, or of leasehold land worth £20 a year or more (if the lease is for at least 21 years) in the county in which they live; or being a householder rated in respect of premises of a net annual value of at least £20 (or in London or Middlesex £30); is qualified and liable to serve on juries in the superior courts (civil and criminal), and at Assizes in their own county, and on petty juries in the local County Court or Quarter Sessions. Also all burgesses of boroughs having separate quarter sessions or a borough civil court are qualified and liable to serve on juries therein. Special regulations govern the qualifications and method of listing common jurors in the City of London; and jurors for a coroner's inquest. By the Juries Act, 1949, a person attending for jury service is entitled to be paid travelling and subsistence allowances together with compensation for loss of earnings and other loss or expenses.

Disqualifications.—Any person who has been attainted of treason or felony, or convicted of any infamous crime (unless he has obtained a free pardon) is disqualified from service on all juries.

Exemptions.—The persons who are exempt from serving on juries (including coroner's juries) include: peers; M.P.'s; judges; ministers of religion (Christian and Jewish); practising lawyers; officers of the Courts; coroners; prison, etc., officers; keepers of public mental hospitals; practising M.R.C.S.'s, M.R.C.P.'s and L.R.C.P.'s; practising apothecaries, doctors and chemists (and registered practising dentists at their option); midwives; members of the armed forces; members of the Territorial Army (in certain cases) or the Royal Auxiliary Air Force; members of the Mersey Docks and Harbour Board, and of the Port of London Authority; certain members of Trinity House, Deptford Strond; masters of buoy and light vessels under the Trinity Houses, and all licensed water pilots; household servants of the Crown; officers of the Post Office, customs and excise; sheriff's officers; police officers; special constables; metropolitan magistrates and their court clerks and servants; officers of the Houses of Parliament.

As to their own counties: members of the L.C.C., and commissioners of income tax.

As to their local counties: borough councillors and J.P.'s, town clerks and borough treasurers; burgesses of boroughs having separate Quarter Sessions are exempt from serving on the County Sessions.

As to their own area of jurisdiction: J.P.'s.

Moreover a juror can never be called upon to serve oftener than once in each year; this period of exemption is longer in certain counties.

JURY SERVICE IN SCOTLAND

It is the duty of the Sheriff in each county to make up a list of persons qualified and liable to serve as jurors. The list is compiled from information which every householder is required to provide. From this list the General Jury Book is made up. Part II of the Juries Act, 1949 (amended by the Juries Act, 1954 with Regulations following thereon), applies only to Scotland and provides, *inter alia*, for the payment of travelling expenses and subsistence allowances to jurors, and for compensation for loss of earnings, recently increased.

QUALIFICATIONS

Every man or woman between the ages of 21 and 60 is qualified, who is possessed of heritable property of the yearly value of at least £5, or of moveable property of the value of at least £200 sterling.

Exemptions.—The persons who are exempt from serving on juries include: peers, judges of the supreme courts, sheriffs, magistrates of Royal Burghs, ministers of religion, parochial schoolmasters, practising lawyers, clerks and officers of court, prison officers, university professors, physicians, surgeons and dentists, officers in the Navy or Army on full pay, customs officers, messengers-at-arms and other officers of the law, lighthouse keepers and their assistants, soldiers, members of the Territorial Army and the Auxiliary Air Force (in certain circumstances), Inland Revenue officials and officers of the Post Office.

Jurors failing to attend without good cause are liable to a penalty.

LANDLORD AND TENANT ENGLAND AND WALES

Although basically the relationship between the parties to the lease is governed by the lease itself, the law on this subject is complicated by the mass of legislation thereon, and no attempt is made here to deal in any detail with that legislation. Some of the statutes which govern specific aspects of the topic are set out at the end of this note with brief particulars. The few points dealt with may show the desirability of seeking professional assistance in these matters. Important statutes include:—

(1) As to agricultural holdings—the Agricultural Holdings Act, 1948. Among other things, this Act regulates the length of notice necessary to determine an agricultural tenancy, the tenant's right to remove fixtures on the land, his right to compensation for damage done by game, for improvements and for disturbance, and his right to require the consent of the Agricultural Land Tribunal to the operation of a notice to quit.

(2) As to business premises—the Landlord and Tenant Acts, 1927 and 1954, which do not extend to Scotland. Part II of the 1954 Act gives security of tenure to the tenant of most business premises, and in effect he can only be ousted on one or more of the seven grounds set out in the Act. In some cases, where the landlord can resume possession, the tenant is entitled to compensation.

(3) As to unfurnished dwelling houses—the complicated mass of legislation generally known as the Rent Acts. If a house is within these Acts, the tenant may have a personal right to reside in the house and can only be ousted on certain grounds. Further, each house within the Acts has a rent limit, and the rent recoverable by the landlord is limited to this rent. Details of how this rent limit is determined are contained in the Rent Act, 1957 (*see below*). The Landlord and Tenant (Furniture and Fittings) Act, 1959, makes it an offence in connection with a grant, renewal or assignment of a tenancy of a house within the Rent Acts on terms which require the purchase of furniture to offer the furniture (which includes fittings and other articles) at a price which the vendor knows or ought to know is unreasonably high. It is also an offence under the Act to fail to furnish to a person seeking to obtain or retain such accommodation and who is provided with particulars of the tenancy a written inventory of the furniture, specifying the price sought for each item.

Houses let at a rent which includes board or substantial attendance or furniture are governed by the Furnished Houses (Rent Control) Act, 1946, as amended by the Landlord and Tenant (Rent Control) Act, 1949, if within the limits of rent control imposed by the Rent Act, 1957 (*see below*).

Since the Rent Act, 1957, the Rent Acts do not apply to a lease of a dwelling house granted for a

term certain exceeding twenty-one years, but Part I of the Landlord and Tenant Act, 1954, gives protection in such cases, provided the rateable value does not exceed £100 in London and elsewhere in England and Wales, £75. Under this Act, the contractual tenancy is automatically extended until brought to an end in the manner prescribed by the Act, and in effect the landlord can only get possession on one of the grounds specified in the Act.

The Rent Act, 1957, has made considerable inroads into the importance of rent control by removing many houses from control altogether and fixing new maximum rent limits for all houses which remain subject to control. The principal changes effected by this Act are as follows:

1. Any house whose rateable value on November 7, 1956, exceeded £40 in London and elsewhere £30, is automatically decontrolled (and the operation of the Furnished Houses (Rent Control) Act is restricted to houses within the same limits of rateable value).

2. No tenancies beginning on or after July 6, 1957, are subject to control unless the person to whom the tenancy is granted is already a protected tenant of that house.

3. For all houses remaining subject to control the maximum rent is determined by reference to the gross value shown in the rating valuation list on November 7, 1956. The maximum rent is then computed as follows:—(a) where the tenant is not responsible for repairs other than internal decorative—twice the 1956 gross value; (b) where the landlord is responsible for all repairs including internal decorative—7/3 of the gross value; (c) where the tenant is responsible for all repairs—4/3 of the gross value. (There are varying proportions in certain other cases.) In all cases there may be added, (a) rates borne by the landlord; (b) a reasonable charge for services provided by the landlord.

4. A notice to quit any dwelling house must be given at least four weeks before it is to take effect.

SCOTLAND

A Lease is a Contract, the relationship of the parties being governed by the terms thereof. As is also the case in England (see the foregoing Section) legislation has played an important part in regulating that relationship. Thus, what at Common Law was an Agreement binding only the parties to the deed, becomes in virtue of Statute 1449 c. 17, a contract binding the landlord's successors, as purchasers or creditors, provided the following four conditions are observed; (1) the lease, if for more than one year, must be in writing, (2) there must be a rent, (3) there must be a term of expiry, and (4) the tenant must have entered into possession.

It would be impracticable in a brief section of these Notes to enter upon a general discussion of this branch of the law and, accordingly, the plan adopted in the preceding Section of quoting a few important Statutes is followed here.

The Agricultural Holdings (Scotland) Act, 1949 (amended by the Agriculture Act, 1958), which is a consolidating act applicable to Scotland, contains provisions similar to those in the English Act, alluded to in the preceding Section. It cannot here be analysed in detail.

It is of interest to note that the Small Landholders Act, 1921, provided for the setting up of the Land Court which has jurisdiction over a large proportion of agricultural and pastoral land in Scotland.

In Scotland business premises are not controlled by Statute to so great an extent as in England, but the Tenancy of Shops (Scotland) Act, 1949, give

a measure of security to tenants of shops. This Act enables the tenant of a shop who is threatened with eviction to apply to the Sheriff for a renewal of the tenancy. If the landlord has offered to sell the subjects to the tenant at an agreed price the application for a renewal of the tenancy may be dismissed. Reference should be made to Section 1 (3) of the Act for particulars of other circumstances under which the Sheriff has a discretion to dismiss an application. The Act applies to premises held by the Crown or Government Departments, either as landlord or tenant.

The series of complicated statutes known as The Rent and Mortgage Interest (Restrictions) Acts, 1920 to 1939, largely govern the relations between landlord and tenant in regard to certain unfurnished houses—including parts thereof if let as separate dwellings—and it is important to note that notwithstanding conditions in the lease of a controlled house providing for the removal of the tenant, it is not possible to contract out of the Acts. The Landlord and Tenant (Furniture and Fittings) Act, 1959 (*ante*, under England and Wales), applies to Scotland. Employees occupying premises by virtue of their employment are not tenants and so cannot claim protection. The Housing (Repairs and Rents) (Scotland) Act, 1954, provides for increase in rent of a controlled dwelling house on which repairs of a certain value have been carried out. The Rent of Furnished Houses Control (Scotland) Act, 1943 contains provisions applicable to houses or parts of houses let with furniture and with or without services, as also to unfurnished premises let with services. These Acts have however been substantially altered or modified by The Rent Act, 1957. The changes in the law are *inter alia* as follows:—(1) Dwelling houses, the rateable value of which was on November 7, 1956, over £40, are released from control. (2) All tenancies coming into operation on or after July 6, 1957, are free from control, except where a new tenancy is granted to a statutory tenant already in occupation. (3) Provision is made for the increase of rent by a maximum of one quarter of all controlled houses. (4) The repairs increase of two-fifths provided for in the 1954 Act is increased to one-half.

The Rent Act, 1957, further provides that a notice to quit a dwelling house (furnished or unfurnished) must be sent at least four weeks before the date on which it is to take effect.

The Landlord and Tenant Act, 1954, referred to in the preceding section, does not apply to Scotland.

LEGAL AID

LEGAL AID IN CIVIL PROCEEDINGS

The Legal Aid and Advice Act, 1949, is designed to make legal aid and advice more readily available for persons of small and moderate means. The main structure of the new service is contained in the Act itself and the Regulations made thereunder, but the administrative details are embodied in a scheme made by the Law Society.

Legal aid is available for proceedings (including matrimonial causes) in the House of Lords, Court of Appeal, High Court, County Courts, certain local courts, and civil proceedings in Magistrates Courts. In any event, an application for legal aid will not be approved if it appears that the applicant would gain only a trivial advantage from the proceedings. Further, proceedings wholly or partly in respect of defamation, breach of promise of marriage, seduction, inducement of one spouse to leave or remain apart from the other are excepted from the scheme, as are also relator actions, election petitions and proceedings by way of judgment summons.

Eligibility for legal aid in civil proceedings depends upon an applicant's "disposable income" and "disposable capital." Legal aid cannot be granted if the former exceeds £700 per annum, and a person may be refused assistance if he has a disposable capital of more than £500 and it appears that he can afford to proceed without legal aid. Even so, the applicant may be required to contribute up to one third the excess of his disposable income above £250, together with the whole excess of his disposable capital above £125. Disposable income is calculated by making deductions from gross income in respect of certain matters such as dependants, interest on loans, income tax, rates, rent and other matters for which the applicant must or reasonably may provide. Disposable capital is calculated by excluding from gross capital the value of the house in which the applicant resides, of furniture and household possessions; a deduction of up to £75 may be made in respect of dependants. Except in matrimonial proceedings or cases where the spouses are living apart, any resources of a person's wife or husband are to be treated as that person's resources. These figures will be assessed by the National Assistance Board, and will be certified to a Local Committee, who will determine whether reasonable grounds exist for the grant of a civil aid certificate. Appeal from refusal of a certificate lies to an Area Committee. A person resident in England or Wales desiring legal aid may apply for a certificate to any Local Committee; if resident elsewhere, application should be made to the Local Committee for London. However, if the application is made in respect of proceedings in an appellate court and the applicant is resident in England or Wales, application should generally be made to any Area Committee—if resident elsewhere, to the Area Committee for London. If a certificate is granted, the applicant may select his solicitor, and, if necessary, counsel, from a panel. However, in matrimonial causes, where the applicant has disposable capital not exceeding £85, and disposable income not exceeding £130, his case will generally be conducted by a solicitor employed whole time by the Law Society to deal with such cases.

LEGAL ADVICE

Legal advice from a solicitor on the Legal Aid Panel is now available to anyone over the age of sixteen. Persons on National Assistance can get it free of charge, whilst those whose means are within the limits set out below can get it for *as. 6d.* An application form should be obtained from a Citizens' Advice Bureau, Court Office or from one of the Law Society's Legal Aid Offices, or from a solicitor whose name is on the panel, and, after completing the form, it should be taken to a solicitor on the panel and an interview requested. A person is entitled to advice on any one legal question only from one solicitor; and for not more than one hour and thirty minutes, but application for further advice may be made to the Area Committee. Lists of solicitors concerned may be consulted at the places mentioned above.

Legal advice is available for *as. 6d.* to a person whose capital is £125 or less and whose income has not been more than £7 10s. during the seven days up to and including the day of application for legal advice. Capital and income of husband and wife must be added together for this purpose, unless they are living apart or the applicant seeks advice on a matter in which the spouse has a contrary interest. In working out capital, the value of the applicant's house, its contents and the value of clothing and tools can be ignored. In working out income, a deduction of £2 5s. may be made for a spouse

living with or maintained by the applicant, of £1 7s. for each child maintained by the applicant, and of £2 5s. for any other adult person maintained by the applicant. There may also be deducted any income tax and any National Insurance, Industrial Injuries or National Health contributions paid by the applicant during the week immediately before the date of obtaining legal advice.

Quite apart from the above statutory scheme for legal advice, there exists a voluntary scheme under which any person may apply to a solicitor who is on the panel for advice for a fee of £1 for up to thirty minutes. If the matter cannot be disposed of in thirty minutes, the solicitor should give an estimate of the approximate cost of any further advice or steps which may be necessary.

It should be mentioned that under both schemes a solicitor, even though he is on the panel, is entitled to decline to give advice to the applicant without giving any reason to the applicant.

OTHER LEGAL AID

Neither of the advice schemes covers further action such as writing letters. If however a person wants something more than advice but something less than proceedings, he may obtain a certificate to take steps to assert or dispute a claim where the question of proceedings has not yet arisen, but if it did arise legal aid could be granted for those proceedings. This type of legal aid could cover writing letters, obtaining evidence, and negotiating settlements. The certificate limits the amount to be spent under it, and does not cover any step in proceedings, nor can counsel be instructed. It is available to a person whose disposable capital does not exceed £125 and who was either receiving National Assistance at the date of his application or has a disposable income not exceeding £325 per annum. In assessing disposable capital deductions are made in respect of dependants, and further deductions for them are made in assessing disposable income. Where the applicant's disposable income exceeds £253 he must pay a contribution of up to £1 for each £3 above £250.

LEGAL AID IN CRIMINAL CASES

The Poor Prisoners' Defence Act, 1930, provides for free legal aid in criminal proceedings in specified cases, and official lists are kept of solicitors and barristers willing to undertake the defence of poor prisoners. On trial for an indictable offence (i.e. before the higher courts, such as Assizes or Quarter Sessions) the person charged may have free legal aid, if Justices, on committal for trial, or judge of trial court grant a *Defence Certificate*. If the person's means are insufficient, such Certificate may be granted in cases where desirable, and must be given for a murder charge. In Magistrates' Courts, a Defence Certificate may be granted to a person of insufficient means if it is considered desirable to do so owing to gravity of charge or exceptional circumstances. The Legal Aid and Advice Act, 1949, provides that application for free legal aid under the Poor Prisoners' Defence Act, 1930, may be made by letter by any person arrested or summoned for an offence, as well as by a person charged with an offence. The letter should be addressed to the clerk to the Justices and must give particulars of the offence charged and set out the grounds of the application. Refusal of a legal aid certificate by a Justice after such application does not prevent the applicant being granted a legal aid certificate at the hearing. Legal aid is also available under the 1930 Act in proceedings on the question of the sentence to be passed, and after as well as before the defendant has pleaded or been found guilty.

Provision is also made for applications for legal aid in the event of an appeal under the Criminal Appeal Act, 1907, and the Summary Jurisdiction (Appeals) Act, 1933.

In any application for aid under the Poor Prisoners' Defence Act, 1930, the Summary Jurisdiction (Appeals) Act, 1933, or the Criminal Appeal Act, 1907, if any doubt exists as to whether the applicant can afford to provide his own legal aid, or whether it is desirable in the interests of justice that he should have free legal aid, such doubt is to be resolved in favour of the applicant. Further, the Justices have an almost absolute discretion in deciding applications.

SCOTLAND

Civil Proceedings

The Legal Aid and Solicitors (Scotland) Acts, 1949 and 1960 provide a scheme which is limited to civil actions in the Court of Session and in the Sheriff Courts except actions in respect of defamation or verbal injury, breach of promise of marriage, the inducement of one spouse to leave or remain apart from the other, election petitions (under the Parliamentary Elections Act, 1868, or the Elections (Scotland) (Corrupt and Illegal Practices) Act, 1890), and small debt proceedings (i.e., under £20) and proceedings for summary removing, in both of which liability for the debt and the amount thereof are admitted.

As to those to whom legal aid is available, the same considerations as to income and capital apply in Scotland as in England. (See the preceding paragraph.) A person believing himself to be eligible may instruct any solicitor of his own choice who is on the official lists, or he may apply for a solicitor to one of the various Legal Aid Committees which are set up to administer the scheme. Application for a certificate granting legal aid is thereafter made to the appropriate Committee by the applicant's solicitor, who is required to prepare, for the signature of the applicant, a memorandum setting forth the grounds of the proposed action. Investigation into the applicant's financial means is carried out by the National Assistance Board after the Committee has considered the memorandum and, on a suitable contribution, if any, by the applicant being approved, a Certificate is granted enabling the applicant to proceed with his action.

LEGAL ADVICE

Since March, 1959, legal advice, as distinct from legal aid in proceedings, is available to anyone in Scotland on terms similar to those stated in a preceding paragraph dealing with legal advice in England. Application forms are available in the offices of all Legal Aid Committees and Citizens' Advice Bureaux.

Criminal Proceedings

In every sheriffdom there are Solicitors for the poor, and in the Court of Session there are Counsel and Solicitors for the poor, all of whom act gratuitously. No Court dues are payable in the first instance. The means that preclude a person from the benefit of the Poores' Roll are not fixed, and each application depends on its own circumstances.

MARRIAGE

4.—MARRIAGE ACCORDING TO RITES OF THE CHURCH OF ENGLAND

1. MARRIAGE BY Banns.—The Marriage Act, 1949, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony during morning service or, if there is no morning

service on a Sunday on which the banns are to be published, during evening service. Where the parties reside in different parishes, the banns must be published in both. Under the Act, banns may be published and the marriage solemnized in the parish church, which is the usual place of worship of the persons to be married or either of them, although neither of such persons dwells in such parish; but this publication of banns is in addition to any other publication required by law and does not apply if the church or the residence of either party is in Wales. The Act provides specially for the case where one of the parties resides in Scotland and the other in England, the publication being then in the parish in England in which one party resides, and, according to the law and custom in Scotland, in the place where the other party resides. After the lapse of three months from the last time of publication, the banns become useless, and the parties must either obtain a licence (see below), or submit to the republication of banns.

2. MARRIAGE BY LICENCE.—Marriage licences are of two kinds:—

(i) *A Common Licence*, dispensing with the necessity for banns, granted by the Archbishops and Bishops through their Surrogates, for marriages in any church or chapel duly licensed for marriages. A Common Licence can be obtained in London by application at the Faculty Office (1 The Sanctuary, Westminster, S.W.1) and (for marriages in London) at the Bishop of London's Diocesan Registry (1 Dean's Court, Doctors' Commons, E.C.4), by one of the parties about to be married. In the country they may be obtained at the Offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office are available for all England and Wales. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings. [The cost of licences through a clerical Surrogate in the country (see below) is £2 15s.] No previous notice is required and the licence is available as soon as it is issued. Before a licence can be granted one of the parties must make an affidavit that there is no legal impediment to the intended marriage; and also that one of such parties has had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the parish or ecclesiastical district of the church in which the marriage is to be solemnized, or the church in which the marriage is to be solemnized is the usual place of worship of the parties or one of them. In the country there may generally be found a parochial clergyman (Surrogate) before whom the affidavit may be taken, and whose office it is to deliver the licence personally to the applicant. (In some dioceses it is necessary for the Surrogate to procure the licence from the Bishop's Registry.) The licence continues in force for three months from its date.

(ii) *A Special Licence* granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any

time, etc.; but the reasons assigned must meet with his Grace's approval. Application must be made to the Faculty Office. Fees for licence, etc., £25.

3. **MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE.**—A marriage may be performed in church on the Superintendent Registrar's Certificate (as to which see below) without banns, provided that the incumbent's consent is obtained. One of the parties must be resident within the ecclesiastical parish of the church in which the marriage is to take place unless the church is the usual place of worship of the parties or one of them.

MARRIAGE FEES.—The Church Commissioners settle tables of fees for all parishes. The usual fees are paid although a stranger-clergyman be invited to perform the service.

B.—MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE

The following marriages may be solemnized on the authority of a Superintendent Registrar's Certificate (either with or without a licence):—

- (a) A marriage in a registered building (e.g., a nonconformist church registered for the solemnization of marriages therein).
- (b) A marriage in a register office.
- (c) A marriage according to the usages of the Society of Friends (commonly called Quakers).
- (d) A marriage between two persons professing the Jewish religion according to the usages of the Jews.
- (e) A marriage according to the rites of the Church of England (see above—in this case the marriage can only be *without* licence).

NOTICE.—Notice of the intended marriage must be given as follows:—

- (i) *Marriage by certificate (without licence)*—If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party. If the parties reside in different registration districts, notice must be given by each to the Superintendent Registrar of the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before either notice can be given.
- (ii) *Marriage by certificate (with licence)*—One notice only is necessary, whether the parties live in the same or in different registration districts. Either party may give the notice, which must be given to the Superintendent Registrar of any registration district in which one of the parties has resided for the period of fifteen days immediately preceding the giving of notice, but both parties must be resident in England or Wales on the day notice is given.

The notice (in either case) must be in the prescribed form and must contain particulars as to names, marital status, occupation, residence, length of residence, and the building in which the marriage is to take place. The notice must also contain or have added at the foot thereof a solemn declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required

by law (see below) has been duly given, and that the residential qualifications (mentioned above) have been complied with. A person making a false declaration renders himself or herself liable to prosecution for perjury. The notice is entered in the marriage notice book.

ISSUE OF CERTIFICATE:

- (i) *Without licence*.—The notice (or an exact copy thereof) is affixed in some conspicuous place in the Superintendent Registrar's office for 21 days next after the notice was entered in the marriage notice book. After the lapse of this period the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage, which can then take place at any time within three months from the date of the entry of the notice.
- (ii) *With licence*.—The notice in this case is not affixed in the office of the Superintendent Registrar. After the lapse of one whole day (other than a Sunday, Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three months from the date of entry of the notice.

SOLEMNIZATION OF THE MARRIAGE:

- (i) *In a Registered Building*.—The marriage must generally take place at a building within the district of residence of one of the parties, but if the usual place of worship of either is outside the district of his or her residence, it may take place in such usual place of worship. Further, if there is not within the district of residence of one of the parties a registered building within which marriages are solemnized according to the rites and ceremonies which the parties desire to adopt in solemnizing their marriage, it may take place in an appropriate registered building in the nearest district.

The presence of a Registrar of Marriages is not necessary at marriages at registered buildings which have adopted the provisions of section 43 of the Marriage Act, 1949. This section provides for the appointment of an "authorized person" (a person, usually the minister or an official of the building, certified by the trustees or governing body as having been duly authorized for the purpose) who must be present and must register the marriage.

The marriage must be solemnized between the hours of 8 a.m. and 6 p.m. with open doors in the presence of two or more witnesses. The parties must at some time during the ceremony make the following declaration—"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D." Also each of the parties must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]," or, if the marriage is solemnized in the presence of an authorized person without the presence of a Registrar, each party may say in lieu thereof: "I, A. B., do take thee, C. D., to be my wedded wife [or husband]."

- (ii) *In a Register Office*.—The marriage may be solemnized in the office of the Superintendent Registrar to whom notice of the

marriage has been given. The marriage must be solemnized between the hours of 8 a.m. and 6 p.m., with open doors in the presence of the Superintendent Registrar and a Registrar of the registration district of that Superintendent Registrar, and in the presence of two witnesses. The parties must make the following declaration: "I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D." and each party must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]." No religious ceremony may take place in the Registry Office, though the parties may, on production of their marriage certificate, go through a subsequent religious ceremony in any church or persuasion of which they are members.

- (iii) *Other Cases*.—If both parties are members of the Society of Friends (Quakers), or if, not being in membership, they have been authorized by the Society of Friends to solemnize their marriage in accordance with its usages, they may be married in a Friends' meeting-house. The marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting house is situated. The presence of a Registrar of Marriages is not necessary.

If both parties are Jews they may marry according to their usages in a synagogue, which has a certified marriage secretary, or private dwelling-house at any hour; the building may be situated within or without the district of residence. The marriage must be registered by the secretary of the synagogue of which the man is a member. The presence of a Registrar of Marriages is not necessary.

FEES OF SUPERINTENDENT REGISTRARS.

	s.	d.
For entering notice of a marriage by certificate (with or without licence) in the marriage notice book	1	6
For a certificate for marriage (with or without licence)	2	6
For a licence for marriage	45	0
For a marriage by certificate (without licence) in the presence of a Registrar...	7	6
For a marriage by certificate (with licence) in the presence of a Registrar	25	0

MISCELLANEOUS NOTES

Consanguinity and Affinity.—A marriage between persons within the prohibited degrees of consanguinity or affinity is void. Relaxations have, however, been made by various statutes which have now been replaced by the Marriage Act, 1949 (see the 1st Schedule to the Act) and the Marriage (Enabling) Act, 1960. It is now permitted to contract a marriage with:—

Sister, aunt or niece of a former wife (whether living or not). Former wife of brother, uncle or nephew (whether living or not).

No clergyman can be compelled to solemnize any of the foregoing marriages, but he may allow his church to be used for the purpose by another minister.

Minors.—Persons under 21 years of age are generally required to obtain the consent of certain

persons (see Marriage Act, 1949, section 3 and and Schedule). Where both parents are living, both must consent; where one is dead, the survivor, or, if there is a guardian appointed by the deceased parent, the guardian and the survivor. No consent is required in the case of an infant's second marriage. In certain exceptional cases consent may be dispensed with, e.g., the insanity of a parent. If consent is refused the Court may, on application being made, consent to the marriage; application can be made for this purpose to the High Court, the County Court, or a Court of Summary Jurisdiction. The Act prohibits any marriage where either party is under 16 years of age.

C.—MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR NORTHERN IRELAND

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days, should either apply to the session clerk to publish banns or give notice of marriage to the registrar; as regards Northern Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by Certificate with licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

MARRIAGES IN SCOTLAND

According to the law of Scotland, marriage is a contract which is completed by the mutual consent of parties.

Impediments to marriage: These render the marriage null and void. (a) Age: If either party is under the age of 16. (b) Forbidden Degrees: If the parties are within certain degrees of relationship. (c) Subsisting previous marriage. (d) Impotency of either party. (e) Non-residence, i.e., if the legal requirement of prior residence of one or other of the parties in Scotland have not been complied with. (f) Insanity of either party.

No consent of parents or guardians is necessary. Marriages may be regular or "irregular."

Regular Marriages.

A regular marriage is one which is celebrated by a Minister of religion or authorized Registrar after due notice by the proclamation of banns or publication by the Registrar. Any Minister of any denomination (including a person officiating at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must either have his or her usual residence in the Registration District, or have resided there for at least 15 days before the ceremony or have a parent so residing there. No form, place or hours are prescribed by law. There are no canonical hours as in England. Public proclamation is made by (a) banns or (b) notice by the Registrar. Banns must be proclaimed in the parish church of both parties. It is ordered that the proclamation of banns should be made twice, but by immemorial practice proclamation on one Sunday is sufficient. The Clerk of the Kirk Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation may not exceed 3s. A certificate of proclamation of banns is only valid for three months.

Under the Marriage Notices (Scotland) Act, 1878, amended by the Marriage (Scotland) Act, 1956, a notice posted up in a conspicuous or accessible place on the board or outer wall of the Registrar's office is equivalent to the proclamation of banns, but a minister of the Church of Scotland is not bound, although he is entitled, to celebrate a marriage not preceded by banns. The statute is limited to persons with qualifying residence in Scotland or having parents so residing. Exhibition is made for 7 consecutive days, during which time any person may appear personally and lodge an objection in writing subscribed by him. If no objections are lodged the Registrar issues a certificate: fees, 3s. Such certificate of publication is only valid for three months. The Naval Marriages Act, 1908, regulates the publication of banns or of notice on board H.M. ships and the granting of certificates by the Officer-Commanding.

Marriage before Registrar: After obtaining a certificate of due publication as above, it is competent for the parties to contract the marriage in the office of the authorized Registrar in his presence and in the presence of two witnesses. Such a marriage is regular and valid in all respects.

Marriage by Licence: In unforeseen and exceptional circumstances—see Section 2 of the Marriage (Scotland) Act, 1939—where normal methods of publication cannot be carried through, the Sheriff, on application by the parties may grant a licence which is deemed in all respects to be equivalent to a certificate of publication.

Irregular Marriages.

Since the passing of the Marriage (Scotland) Act, 1939, only one form of irregular marriage is recognized, viz. marriage by co-habitation and habit and repute. If parties live together constantly as husband and wife, and if they are held to be such by the general repute of the neighbourhood, then there may arise a presumption from which marriage can be inferred. Before such marriage can be registered, however, a decree of declarator of marriage must be obtained from the Court of Session.

MASTER AND SERVANT

WAGES AND HOLIDAYS

Under the Truck Acts, it is in general forbidden for an employer to pay wages other than in current coin of the realm, and it is illegal for an employer to deduct from the employee's wages sums alleged to be due to the employer. However, the application of these Acts is confined to workmen, and domestic servants are specifically excluded from their operation. Even in the case of payments to workmen certain deductions, including rent and the price of food to be consumed on the employers' premises, are not forbidden where the employee's written consent is obtained. Further, under the Payment of Wages Act, 1960, it is permissible for wages to be paid otherwise than in cash at the request of the employee, e.g., by money order, postal order or into a banking account. The Truck Acts did not relate to the amount of wage to be paid to the employee, but to-day minimum wage rates for particular trades are prescribed by numerous statutes. The Wages Councils Act, 1945, established Wages Councils, which are given power to fix minimum wages in respect of a number of trades and industries. The Councils may also direct as to the length of holidays for workers in such trades and industries, and for payment of wages during holidays, under the Holidays with Pay Act, 1938. Subject to this Act, a servant's

right to a holiday is a matter of contract. The terms of the contract may be express or implied; but if there is a right to a holiday once in a year and the servant is rightfully dismissed before the end of that year, he cannot successfully claim pay in respect of the loss of the holiday.

RECEIPTS

Receipts should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, etc., received.

In Scotland, as in England, inability to produce receipts does not necessarily bar defence to an action for payment.

TOWN AND COUNTRY PLANNING

The Town and Country Planning Act, 1947, contains very far-reaching provisions affecting the liberty of an owner of land to develop and use it as he will. A person has generally to get planning permission before carrying out any development on his land from the Local Planning Authority. Development charge is not payable in respect of operations begun or uses of land instituted on or after the 18th November, 1952.

What is Development:—

(a) Carrying out of building, engineering, mining or other operations.

(b) Making a material change in use.

It is expressly provided that if one dwelling-house is converted into two or more dwelling-houses, this involves a material change in use.

Examples of what is not Deemed Development:—

(a) Maintaining, improving or altering the interior of a building (except works for making good war damage), provided there is no material change to the exterior.

(b) Change of use of property within the curtilage of a dwelling-house for a purpose incidental to the use of the dwelling-house as such. (It will, however, be development if building operations are carried out.)

Application can be made to the Local Planning Authority to determine whether or not an operation or change of use constitutes development.

Planning Permission.—Application for such permission is not always necessary, as the Minister may make Development Orders giving general permission for a specified type of development. Thus a General Development Order of 1950 specified a number of types of development for which no permission is required e.g., enlargement of a dwelling-house (including erection of a garage), so long as the cubic content of the original dwelling (external measurement) is not exceeded by more than 1,750 cubic feet or one-tenth whichever is greater, subject to a maximum of 4,000 cubic feet.

Appeal against refusal or permission lies to the Minister, and from the Minister, in limited circumstances, to the High Court. If the result of the appeal is unsatisfactory, an applicant may in certain circumstances require the Council to purchase the land.

Enforcement Notice.—If development is carried out without permission, or in defiance of conditions attached to such permission, the Local Planning Authority may serve an enforcement notice on the owner of the land calling upon him to demolish or alter any building, or to discontinue the use of land, or to comply with the said conditions. If the notice is not complied with, the Local Planning Authority may take appropriate steps to enforce it, recovering their expenses from the owner for the time being of the land. Appeal against an enforcement order lies to the Minister.

For further details and other provisions of the planning law, the Act of 1947 and the Orders made under the Act, the Town and Country Planning (Amendment) Act, 1951, and the Town and Country Planning Acts, 1953, 1954 and 1959, and the Caravan Sites and Control of Development Act, 1960, should be consulted. Elaborate provisions as to payments for loss of development value by reference to established claims on the £300 million fund (established under the 1947 Act) are contained in the 1954 Act.

Scotland.

In Scotland special provisions, on similar lines, have been made by the Town and Country Planning (Scotland) Act, 1947, which incorporates certain provisions of the Town and Country Planning (Scotland) Act, 1945, all other earlier planning Acts being repealed. The financial provisions of the 1947 Act, have, however, been amended by the Town and Country Planning Act, 1953, which abolished development charges, and by the Town and Country Planning (Scotland) Act, 1954, which set up a new Scheme of compensation. See also the Town and Country Planning (Scotland) Act, 1959.

VOTERS' QUALIFICATIONS

The franchise is governed by the Representation of the People Acts, the latest of which, the Acts of 1948 and 1949, amended in some respects, have made important changes in the law. Those entitled to vote as electors at a parliamentary election in any constituency are those resident there on the qualifying date who, at that date and on the date of the poll, are British subjects of at least twenty-one years of age and not subject to any legal incapacity to vote; but registration as an elector in the register to be used at the election in question in that constituency is a prerequisite, and at a general election no person may vote in more than one constituency. Since the Electoral Registers Act of 1949, the registers are prepared once in each year only. Under the Electoral Registers Act, 1953, the Register (of parliamentary and local government electors or, in Northern Ireland, of parliamentary electors) is published not later than February 15 in each year and is for use in the period of 12 months commencing on February 16. The qualifying date referred to is, in England, Wales and Scotland the preceding October 10, and in Northern Ireland the preceding September 15. It is, however, provided that any person who is not of full age on the relevant qualifying date, but is of full age on June 15, and is otherwise duly qualified, is entitled to vote at elections held in Great Britain between October 2 of that year and February 15 of the following year. Detailed provisions are laid down as to the meaning of "residence" in doubtful cases.

The Act of 1948 abolished the university constituencies and the business premises vote.

The Register is prepared by the Registration Officer in each constituency in Great Britain. It is the registration officer's duty to have a house to house or other official inquiry made as to the persons entitled to be registered and to publish preliminary electors lists showing the persons appearing to him to be entitled to be registered. Any person whose name is omitted may claim registration, and any person on the list may object to the inclusion therein of other persons' names: the registration officer determines the claims and objections. The procedure is slightly different for Northern Ireland.

Special provision is made for "Service voters," who include wives of Service voters resident with their husbands outside the United Kingdom.

Such persons may make a Service declaration in a prescribed form and are then treated as resident at the address specified in the declaration. Service voters may vote by post or by proxy, on making the necessary application to the registration officer.

Certain other persons (e.g., those unable to go in person to the polling station owing to the general nature of their occupation, blindness or other physical incapacity, etc.) may vote by post or, in some cases, by proxy as "absent voters."

The local government franchise now depends upon either residence in the area or the possession of a non-resident qualification, i.e., occupation as owner or tenant of rateable lands or premises of the yearly value of not less than £10, excluding occupation of furnished dwelling-houses let for less than nine weeks and excluding occupation as a lodger. There are provisions, similar to those relating to the parliamentary franchise, for the preparation of registers, etc., and in fact the same register is used, as far as possible, with a mark indicating those persons entitled to vote for local government purposes only.

The Acts apply generally to Scotland where certain matters relating to local government and parliamentary elections are further regulated by Representation of the People (Scotland) Regulations, 1949.

WILLS

IMPORTANT NOTE.—The following notes must be read subject to the provisions of the Inheritance (Family Provision) Act, 1938, which is liable to affect or modify the will of any person (domiciled in England) dying after July 23, 1939. This Act empowers the High Court to order maintenance out of the testator's estate for the benefit of certain "dependants," i.e., a surviving wife or husband; an unmarried (or invalid) daughter; an infant (or invalid) son. Such order can be made if the will does not itself make "reasonable provision" for the maintenance of the dependant who seeks the order. An application must normally be made within six months of probate. A legally adopted child comes within the definition of a "son" or "daughter" under the Act. For further details as to the limits of an order, the Act itself should be consulted.

Since the object of the Act is to provide maintenance for dependants, an application is not likely to be successful where the estate is very small, e.g., two or three hundred pounds.

There are similar provisions under the Matrimonial Causes (Property and Maintenance) Act, 1958, whereby the court may order provision out of a deceased's estate for the support of a former husband or wife where the marriage has been dissolved or annulled.

REASONS FOR MAKING A WILL.—Every person should make a will. However small the estate, it is safer in every case to protect the interests of the survivors by a will, and by the appointment of one or more trustworthy persons as executors to carry the testator's wishes into effect. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—e.g., the income being paid to his widow and the capital being ultimately divided among his children, for this requires the skill of a practised lawyer. When property is thus "settled," there may be a saving in death duties. Assuming a lawyer is not employed, a person having resolved to make a will must remember that it is only after a person is

dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that admits of another meaning than the one intended. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed (see below) an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration of any kind whatever must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is best to make a new will, revoking the old one. The use of *codicils* should be left to the lawyer. *A will should be written in ink and very legibly, on a single sheet of paper.* Although, of course, forms of wills must vary to suit different cases, the following forms may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others.

Nothing more complicated should be attempted. The forms should be studied in conjunction with the notes following.

This is the last will and testament of me (Thomas Smith) of [Vine Cottage, Silver Street, Reading, Berks] which I make this [thirteenth] day of [February, 1962] and whereby I revoke all previous wills and testamentary dispositions.

1. I hereby appoint [John Green of — and Richard Brown of —] to be the executor(s) of this my will.

2. I give all my property real and personal to [my wife Mary or my sons Raymond and David equally or as the case may be].

Signed by the testator in the presence of us both present at the same time who, at his request, in his presence and in the presence of each other have hereunto set our names as witnesses.

Thomas Smith
Signature of
Testator:

William Jones (signed) of Green Gables, South Street, Reading, tailor.

Henry Morgan (signed) of 16, North Street, Reading, butcher.

Should it be desired to give legacies and or gifts of specific property, instead of giving the whole estate to one or more persons, the form above should be used with the substitution for clause 2 of the following clauses:—

2. I give to — of — the sum of £ — and to — of — the sum of £ — and to — of — all my books (or as the case may require).

3. All the residus of my property real and personal I give to — of —.

TERMS.—Real property includes freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stocks and shares in companies, and the like. The words "my money," apart from the context, will normally only include actual ready money. The expression "goods and chattels" should not be used. In giving particular property, ordinary language is sufficient, e.g., "my house, Vine Cottage, Silver Street, Reading, Berks." Such specific gifts fail if not owned by the testator at his death.

RESIDUARY LEGATEES.—It is well in all cases where legacies or specific gifts are made, to leave to some person or persons "the residue of my property," although it may be thought that the whole of the property has been disposed of in legacies, etc., already mentioned in the will. *It should be remembered that a will operates on property acquired after it has been made.*

EXECUTION OF A WILL, AND WITNESSES.—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately afterwards sign their names in his and in each other's presence. A person who has been left any gift or share of residue in the will, or whose wife or husband has been left such a gift, should not be an attesting witness. Their attestation would be good, but they would forfeit the gift. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same."

A blind person may make a will in Braille. If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. A blind person cannot witness a will.

If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," etc. Any omission in the observance of these details may invalidate the will. *The stringency of the law as to signature and witnessing of a will is only relaxed in favour of soldiers, sailors and airmen in certain circumstances.*

EXECUTORS.—It is usual to appoint two executors, although one is sufficient; any number up to and including four may be appointed. The name and address of each executor should be given in full. An executor may be a legatee. Thus a child of full age or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not essential; but it is desirable here as elsewhere, to avoid ambiguity or vagueness.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy generally lapses and falls into the residue. Where a residuary legatee pre-deceases the testator, his share of the residuary estate will not generally pass to the other residuary legatees, but will pass to the persons entitled on the deceased's intestacy. In all such cases it is desirable to make a new will.

TESTAMENTARY CAPACITY.—A minor cannot make a will except, in certain circumstances, if

he be a soldier, sailor or airman. A married woman (married on or since January 1, 1883) may dispose by will of any real or personal property as if she were a man.

REVOCATION.—A will is revoked by a subsequent will (but, if it does not expressly revoke former wills, only so far as such subsequent will operates as an implied revocation as by making other provisions inconsistent with the previous will, for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing or otherwise destroying the same with the intention of revoking it. Such destruction must either be by the testator or by some other person in his presence and at his direction. *It is not sufficient to obliterate the will with a pen.* Marriage in every case acts as the revocation of a will, unless, in the case of a will made on or after Jan. 1, 1926, it is expressed to have been made in contemplation of a particular marriage (Law of Property Act, 1925, s. 177); so that after marriage a new will should be made, except in this last case.

PERSONAL APPLICATION FOR PROBATE OR LETTERS OF ADMINISTRATION

Application for probate or for letters of administration may be made *in person* at the Principal Probate Registry, or at a district registry, by the executors or persons entitled to a grant of administration. Applicants should bring (1) the will, if any; (2) a certificate of death; (3) particulars of property liable to estate duty; and (4) generally, a list of debts and funeral expenses. In an application for administration, the applicant will be required to enter into a bond for due administration, generally with two sureties who must attend at the Registry, although they need not do so at the same time as the applicant.

WHERE TO FIND A PROVED WILL

A will proved since 1858 must have been proved either at the Principal Registry at Somerset House, or a District Registry. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and a copy of any will read on payment of a search fee of one shilling. In the latter case, the original will proved in the District Registry, is there kept, and may be seen or a copy obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probates and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about October of the following year.

SCOTS LAW OF WILLS

A domiciled Scotsman, unlike a domiciled Englishman, cannot in certain circumstances dispose of the entirety of his estate. If he leave a widow and children, the widow is entitled to a one-third share in the whole of the moveable estate (her *jus relictae*), and the children are entitled to another one-third share equally between them (their *legitim*). If he leave a widow but no children—or children but no widow—the *jus relictae* or *legitim* is increased to a one-half share in the estate.

The remaining portion is known as the *dead's part*. The widow is also entitled to *terce*, i.e., a life rent in one-third of her husband's heritable property. A surviving husband and children have comparable rights in the wife's estate. The *dead's part* is the only portion of which the testator can freely dispose. All burdens falling upon the representatives in moveables are payable out of the whole of the moveables before any division. Burdens in the nature of legacies are payable out of the *dead's part*. Pupils cannot make wills. Minors may dispose of moveables without the consent of any other person; but minors (unless they be serving in H.M. forces) cannot dispose of heritage. A will must be in writing (except that a person may leave a legacy verbally if the amount of that legacy does not exceed 200 Scots (£8 6s. 8d. sterling) and may be typewritten or even in pencil. A will may be either (1) *holograph*, i.e., written by the testator himself, in which case no witnesses are necessary; a printed form filled up by the testator is not necessarily *holograph* but may be made effectual when it has clearly been adopted as *holograph*. Words written on erasure or marginal additions or interlineations in *holograph* writings, it proved to be in the handwriting of the maker of the deed, are valid; (2) *tested*, i.e., signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. If the testator cannot write, or is blind, his will may be authenticated by a notary and two witnesses. It is better that the will be not witnessed by a beneficiary thereunder, although

this circumstance will not invalidate the attestation of the will or (as it would in England) the gift. A parish minister may act as a notary for the purpose of subscribing a will in his own parish. Wills are registered in the Books of the County in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register House, Edinburgh. The original deed may be inspected on payment of a small fee and a certified official copy may be obtained. A Scottish will is not revoked by the subsequent marriage of the testator. The subsequent birth of a child, no testamentary provision having been made for him, may revoke a will in whole or in part. A will is revoked by a subsequent will, either expressly or by implication; but in so far as the two can be read together both wills have effect.

"Confirmation," the Scottish equivalent of Probate, is obtained in the Sheriff Court of County in which the deceased was domiciled at the date of his death or, where he had no fixed domicile or died abroad, in the commissariat of Edinburgh. Executors are either "nominate" or "dative." An Executor nominate is one nominated by the deceased in his will. An Executor dative is one appointed by the Court (1) in the case of intestacy or (2) where the deceased had failed to name an executor in his will. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must first be given up. In estates under £500 confirmation is obtained under a simplified procedure at reduced fees.

NORTH ATLANTIC TREATY ORGANIZATION

Headquarters: Porte Dauphine, Paris, 16.

Secretary-General and Chairman of the North Atlantic Council, M. Dirk U. Stikker (Netherlands).

The North Atlantic Treaty was signed on April 4, 1949, by the Foreign Ministers of twelve nations. The twelve are Belgium, Canada, Denmark, France, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, the United Kingdom and United States. Greece and Turkey acceded to the Treaty in 1952 and the Federal Republic of Germany upon the coming into force of the Paris Agreements in 1955.

The original machinery set up to carry out the provisions of the Treaty has undergone considerable modification during the passage of the North Atlantic Treaty Organization from the planning to the implementing stage. Since April, 1952, the North Atlantic Council, the principal body of the Treaty Organization, has been in continuous session in Paris. Member Governments are represented by permanent representatives, who head national delegations of advisers and experts. Ministerial meetings of the Council are held periodically. Heads of Governments may attend meetings of the Council in person. A meeting of Heads of Governments took place in December, 1957. Otherwise, at ministerial meetings, Governments are represented by their Ministers for Foreign Affairs, or by other ministers, according to the nature of the agenda. Each year a Foreign Minister is President of the Council; the Secretary-General is Chairman.

The Secretary-General is appointed by and is responsible to the Council. He has direct access to all NATO agencies and to member Governments, and is responsible for organizing the work of the International Secretariat.

The Secretary-General is assisted by a Deputy Secretary-General, Signor Alberico Casardi (Italy), and by four Assistant Secretaries-General, who are: R. Hooper (U.K.) for Political Affairs; M. François-Didier Gregh (France) for Economic and Financial

Affairs; Johnson Garrett (U.S.A.) for Production, Logistics and Infrastructure; W. A. Nierenberg (U.S.A.) for Scientific Affairs.

The senior military authority in NATO is the Military Committee (composed of a Chief-of-Staff of each member country). Its executive agency is the Standing Group which meets in Washington. The Standing Group is composed of one representative each of France, the U.K. and the U.S.A.—currently General André Beaufre (France), Air Marshal Sir George Mills (U.K.) and Gen. Clark L. Ruffner (U.S.A.). It is responsible for higher strategic direction throughout the North Atlantic Treaty area.

Of the five original Regional Planning Groups one remains: the Canada-U.S.A. Regional Planning Group, with headquarters in Washington. The functions of three of the remainder have been taken over by SHAPE (Supreme Headquarters Allied Powers in Europe, under General Lauri Norstad, U.S.A.) and its regional commands. The fourth has been absorbed in the Atlantic Command (SACLANT) under Admiral Robert L. Dennison (U.S.A.). The Allied Command Channel is exercised by Admiral Sir Manley Power, K.C.B., C.B.E., D.S.O. (U.K.).

United Kingdom Permanent Delegation

Permanent Representative, North Atlantic Council, Sir Paul Mason, K.C.M.G., K.C.V.O. £7,015
Minister, J. S. H. Shattock, C.M.G., O.B.E.
Counsellors, A. K. Potter, C.M.G., C.B.E.; D. C. Humphries; W. J. Beach; D. W. Ward.
1st Secretaries, J. G. Taylor; R. Jardine; W. F. Mumford.
and Secretaries, S. J. Rose; A. C. Beer; A. W. McMahon; A. E. Donald; Miss O. Goodinson.

TAXES, STAMP DUTIES AND LICENCES

INCOME TAX 1961-62

Income Tax is a tax on annual income, not capital, represented by money, or money's worth. In general, the charge to tax is on the full amount of income arising, subject to the deductions authorized by the Income Tax Acts: but the profits or gains of a trade or profession, assessable under Schedule D, are as arrived at on ordinary accountancy principles, and then adjusted for tax purposes. The income of a married woman living with her husband is aggregated with his income. Separate assessment may be claimed but the total tax due remains the same.

The year of assessment is the fiscal year which runs from 6th April in one year to 5th April in the next. The amount on which tax is assessed depends upon the income of the relevant "basis year." For Schedule D, the "basis year" is normally the year preceding the year of assessment, otherwise the "basis year" is the same as the year of assessment: i.e. tax is charged on the income of the actual year of assessment.

Under Schedule D the accounting year of the

trade or profession which ends in the year preceding the year of assessment is the "basis year."

Income Tax is imposed at the rates specified by the annual Finance Acts. There are graduated rates of tax, the principal rate being called the "Standard Rate," which for 1961/62 is 7/9d. in the £. There is an additional income tax on higher incomes called "Sur-tax." Tax is imposed on United Kingdom residents in respect of all sources of income, wherever arising, subject to double taxation relief. The enactments relating to income tax were consolidated in the Income Tax Act, 1952, as amended by subsequent Finance Acts.

The Tables which follow show the tax payable on the amount of income specified, after deduction of the personal allowance, children's allowance (where appropriate) and, in the case of earned income, the earned income relief. The taxpayer, however, may be entitled to further reliefs which would reduce the tax payable below the amounts shown in the Tables.

STATUTORY INCOME is computed as follows:—

Under Schedule A.—Assessed on an actual year basis, the annual value of Houses, Lands, Tenements, etc., including houses occupied by the owner. Net assessment is computed by deducting

scale allowance for repairs, insurance, etc., from rack rental, i.e. rent payable when landlord undertakes all repairs and maintenance and tenant pays rates. Owner-occupied houses are usually assessed by reference to rating valuation.

(2) Married Couples without Children

100,000.....	83,138 7 6	45,137 10 0	16 7 ½	85,514 0 0	17 1

Scale allowance for repairs by reference to gross assessment.

Lands.....	one-eighth
Houses: Where assessment does not exceed £40.....	one-quarter
Exceeds £40, but not £50.....	£10
Exceeds £50, but not £100.....	one-fifth
Exceeds £100.....	£20
plus one sixth of excess over £100	

Ministers of Religion are relieved from tax in respect of their residences.

Maintenance Relief.—Repayment or relief may be claimed for any year where average cost of previous five years' maintenance, etc., exceeds scale allowance for that year. The cost of insurance and agents' charges are allowable. In regard to recently acquired property there may be claimed the excess of the actual year's maintenance over scale allowance, provided this basis is used for first five years of ownership. Except in the case of agricultural property, relief cannot exceed the net annual value.

Under Schedule B.—Assessments are on one-third Schedule A annual value in respect of amenity lands—parks, gardens, etc., not used for husbandry. Also on woodlands, although these can be assessed on actual profits under Sch. D. Case I, if taxpayer so elects.

Under Schedule C.—Dividends, interest, annuities from public revenue on actual year basis. Income Tax is deducted at source.

Under Schedule D.—Profits of Trades, Businesses, and Professions. All interest of money, but interest on Post Office Savings Bank and Trustee Savings Bank accounts up to £15 is exempt from income

tax. Such amount of interest has to be included for Sur-tax purposes, grossed at the standard rate.

Income from Foreign or Commonwealth securities, rents and possessions: for persons domiciled and ordinarily resident in Great Britain this income is assessable whether remitted or not. Persons not domiciled or British subjects not ordinarily resident in Great Britain are assessable only on remittances to the United Kingdom of this income in any year in which they become technically resident. Income from Trades or Professions carried on abroad is assessable only to extent that it is remitted, and then only when person entitled thereto is technically resident in United Kingdom.

Profits from letting of Furnished Houses, etc., and Excess Rents (arising when rent of unfurnished house less allowable repairs allowance exceeds net Schedule A assessment).

Under Schedule E.—Income from all Offices, Employments and Pensions, including Salaries, Wages, Emoluments, Directors Fees, etc. Taxed by deduction on payment under P.A.Y.E. (pay-as-you-earn) on actual year basis. Necessary expenses are allowable, including fees and subscriptions to certain professional bodies and learned societies.

Tax is charged on the emoluments of an office or employment if the holder is resident, and ordinarily resident within the United Kingdom, provided the duties are not performed wholly abroad. A person not resident (or if resident, then not ordinarily resident) in the United Kingdom is charged only on emoluments for duties performed in the United Kingdom.

Income from employments exercised abroad is assessable only to the extent that it is received in the United Kingdom, and then only when employee is resident in United Kingdom.

(3) Married Couples with One Child not over 11

Unemployment, sickness and maternity benefit and grant; and death grant payable under the National Insurance Acts are not assessable to Income tax.

Expense allowances and payments in kind (less expenses incurred in performance of duties) to Directors and employees enjoying emoluments of £2,000 p.a. or more are assessable. Certain payments made on retirement or removal from a person's office or employment (in excess of £5,000) are assessable to tax on him.

TAXABLE INCOME is Statutory Income less Allowances and Deductions as under:

Personal Allowance.—10 single person... £140

To married man living with or normally maintaining his wife..... £240

When either husband or wife is absent from United Kingdom throughout a complete fiscal year they are treated as separate entities for tax purposes, each entitled to Single Personal Allowance. A married woman permanently separated from her husband is treated as a *feme sole*.

Allowances for Children.—For each child under 16 (or over that age at the beginning of the fiscal year receiving full time instruction at a recognized educational establishment, or who is articulated or apprenticed) and who does not have income in that year exceeding £100 in his own right, the allowances are:—

(a) Child over 16 at commencement of fiscal year..... £150

(b) Child over 11 at commencement of fiscal year..... £125

(c) Other children (each)..... £100

Scholarship or bursary does not count for this purpose. "Child" includes step-child and adop-

ted child. Child allowance is due to the person who has the custody and who maintains the child. If more than one person could claim the allowance; e.g. if a husband and wife are divorced or separated, the allowance will be apportioned between them, as necessary.

The "Family Allowance" for children ranks as the father's income subject to Earned Income Allowance.

Allowance for Dependent Relatives.—A maximum deduction for each dependent relative of £75. This allowance is reduced by £1 for every £1 by which the relative's own income (excluding voluntary allowance) exceeds £155. Claimant must maintain relative who must be incapacitated by old age or infirmity from maintaining himself or herself, except in the case of his or his wife's widowed mother (which includes any woman living apart from her husband, or whose marriage has been dissolved or annulled). If more than one person gives support to the dependent relative then allowance is divided *pro rata*. The dependent person must not be in receipt of an income exceeding £230.

A person who by reason of his or her own age or infirmity, has to retain the services of a daughter resident with him or her is entitled to an allowance of £40.

Allowance for Housekeeper or person looking after children: £75. This allowance is granted to:—

(a) any male taxpayer entitled to single personal allowances, any female tax-payer who was either working full time in some employment or business or was totally incapacitated throughout the year, and a married man entitled to married personal

allowance whose wife is totally incapacitated throughout the whole of the year, who has a female person resident with and maintained or employed by him or her for the purpose of having care of any child or children for whom the taxpayer is entitled to claim child relief.

- (b) a widow or widower who has a female relative (or, if no relative is available, a female person) resident with her or him in the capacity of Housekeeper.

A widow or widower (and certain single persons) entitled to the allowance for children but with no resident-housekeeper, is entitled to an allowance of £40.

Earned Income.—Allowance of the following fractions of earned income (after deducting allowances for necessary expenses, superannuation, etc.):—

Up to £4,005—Two-ninths.

The next £5,940—One-ninth.

Maximum allowance is thus £9,945.

Married woman earning income in her own right has deduction of two-ninths of such earnings and, in addition, an allowance equal to seven-ninths of her earnings subject to a maximum of £140 plus Reduced Rate Reliefs as shown below.

Age Relief.—Allowance of two-ninths of unearned income where taxpayer (or his wife) attains 65 years subject to total income not exceeding £800. Where the total income exceeds £800, marginal relief is given so that the full tax on the investment income scale is not payable until the marginal relief runs out.

Age exemption.—Persons over 65 years of age are exempt from tax if their total incomes do not exceed :—

Single person..... £275

Married couple (either being over 65)..... £440

Marginal relief is given as in Age Relief (above).

Pension Contributions.—Contributions by both employed and self-employed persons to officially approved superannuated funds, or premiums paid (within certain limits) to provide for retirement annuities are allowed as deductions.

National Insurance Contributions.—Certain deductions are allowable in respect of contributions payable under the graduated contribution scheme by employed, self-employed and non-employed persons respectively. The general allowance for employed adults is £18. Taxpayer paying "employer's" contribution in respect of personal or domestic servants may deduct whole of such contribution from his income.

Life Assurance Premiums.—Relief is given on premiums paid for Life Assurance or for Contracts for Deferred Annuities on life of taxpayer or his wife. In all cases, except those of policies or contracts taken up in connection with a Superannuation Scheme, a capital sum must be payable at death. Where date of policy or contract is after 22nd June, 1916, and total premiums available for relief to taxpayer and his wife do not exceed £25 an amount of £10 or total premiums, whichever is less, may be deducted from assessable income. Where total premiums exceed £25 the deduction is two-fifths of the premiums. For policies or contracts dated on or before 22nd June, 1916, following rates of relief apply:—

Net total income exceeding £1,000: 3s. 6d.; between £1,000 and £2,000: 5s. 3d.; exceeding £2,000: 7s. 0d.

Where annual premium exceeds 7 per cent. of capital sum assured relief is limited to sum equal

to 7 per cent. The amount on which relief is given must not exceed one-sixth of net total income. Relief is also given on sums paid under Act of Parliament or under terms of employment for securing deferred annuity to widow or provision for children after death of the taxpayer.

Purchased Life Annuities.—The capital element of annuities for a term referable to a life, which are purchased for money or money's worth from a person whose business is to grant annuities (with certain exceptions) is not taxable as income.

Reduced Rate Relief.—Rates of tax on taxable income are:— in the £

On first £60	1s. 9d.
On next £150	4s. 3d.
On next £150	6s. 3d.
On balance	7s. 9d.

Small Income Relief.—All incomes up to £300 are treated as Earned Income. Marginal relief is given where total income exceeds £300 but does not exceed £405.

Building Society Interest.—Majority of societies operate under special arrangement with Inland Revenue and interest is paid to depositors and shareholders "free of income tax." But such interest must be included in taxpayer's total income for assessment to surtax, grossed at the standard rate.

Surtax is an additional duty of income tax, chargeable on total income of individuals in excess of £2,000. Total income is the amount of income chargeable to income tax by assessment or deduction, less yearly interest or other annual sums payable under deduction of tax. Loss relief, and interest payable to banks and building societies are deductible. Personal allowances, child allowances, housekeeper, dependent relative and similar reliefs (to the extent they exceed £140) are also deductible.

Earned income. There is deductible from total income, earned income relief, and also an earnings allowance of £2,000, or less so as to reduce the earned income (after deducting earned income relief) to £2,000. In effect, earned income is not charged to surtax if less than £5,000, or more if personal reliefs are due.

Surtax is payable on 1st January following year of assessment, so that surtax for 1961-62 is payable on 1st January 1963. Surtax is chargeable on a sliding scale as follows:—

On each £ of first	£500	2s	in the £
" next	£500	2s. 6d.	"
"	£1,000	3s. 6d.	"
"	£1,000	4s. 6d.	"
"	£1,000	5s. 6d.	"
"	£2,000	6s. 6d.	"
"	£2,000	7s. 6d.	"
"	£2,000	8s. 6d.	"
"	£3,000	9s. 6d.	"

of remainder 10s. in the £

Seven-year Covenants.—Where covenant to pay annual sums of money is made for other than valuable and sufficient consideration, the period of the covenant must be for a term which can exceed six years if the Covenantor wishes to divest himself of such income for income tax purposes. Any such covenant entered into after 10th April, 1946, must be in favour of an individual, not employed in any way by Covenantor (and not, for example, a charitable body) in order to divest the Covenantor of the income for Sur-tax purposes.

Settlements in favour of taxpayer's own infant children.—The Income of any such Settlement made

since 22nd April, 1936, is treated as that of the Settlor for all income tax purposes if:—

- (a) the Settlement can be revoked within a period of six years (unless the child becomes bankrupt);
- (b) the income can be paid to or for the benefit of the child during the lifetime of the settlor. This ceases to apply at the end of the fiscal year in which the child attains 21 years or marries.

Agreements for the Avoidance of Double Taxation have been made between the United Kingdom and Aden Colony, Antigua, Austria, Australia, Barbados, Basutoland, Bechuanaland, Belgium, British Guiana, British Honduras, British Solomon Islands Protectorate, Brunei, Burma, Canada, Ceylon, Cyprus, Denmark, Dominica, Falkland Islands, Federation of Rhodesia and Nyasaland, Fiji, Finland, France, Gambia, Germany (Rep.), Ghana, Gilbert and Ellice Islands, Greece, Grenada, Guernsey, Ireland (Rep.), Isle of Man, Israel, Jamaica, Jersey, Kenya, Malaya, Mauritius, Montserrat, Netherlands, New Zealand, Nigeria, North Borneo, Norway, Pakistan, St. Christopher and Nevis, St. Lucia, St. Vincent, Sarawak, Seychelles, Sierra Leone, Singapore, Swaziland, Sweden, Switzerland, Tanganyika, Trinidad, Uganda, Union of South Africa, United States of America, Virgin Islands, and Zanzibar.

Double Taxation Relief.—Relief may be obtained by residents of the United Kingdom in respect of any income tax payable in any other Country, Colony or Dominion, not covered by the specific Agreements referred to above, when that income is also liable to British income tax. A credit against the British tax liability on the doubly taxed income is given at a rate equal to the rate paid outside the United Kingdom subject to a limit of the taxpayer's average or effective rate of British tax.

Persons Resident Abroad.—Persons normally resident outside the United Kingdom are not liable to United Kingdom Tax on income arising outside the United Kingdom (including Dominion, Colonial and Foreign Loans issued in London). They are liable, in general, in respect of income from United Kingdom sources but not on the interest from:—

3% War Stock 1955-59; 4% Victory Bonds; 4% Funding Loan 1960-90; 2½% and 3% Defence Bonds (all issues except the 5th); 3% Savings Bonds (all issues); 5½% Funding Loan 1982-84.

Such persons become technically resident in the United Kingdom if they visit for a period or periods exceeding six months in any fiscal year. Also if they visit for any period in a year in which they have retained a place of abode in the United Kingdom, except such persons as are engaged in full-time employment abroad. They would then be liable to United Kingdom Tax on all remittances of income arising abroad. If they visit the United Kingdom in four consecutive years for periods averaging three months or more per annum they would be regarded as ordinarily resident here.

A person who is not resident in the United Kingdom who has income which is liable to United Kingdom tax cannot claim any of the normal income tax allowances unless he is:

- (a) a British subject;
- (b) a present or former servant of the Crown; or widow of a former Crown servant;
- (c) employed by any missionary society controlled from the United Kingdom or a servant of a native State under British protection;

- (d) a resident of the Isle of Man or the Channel Islands or
 (e) was previously resident in the United Kingdom but resides abroad for the sake of his health or the health of a member of his family.

Post War Credits.—Those Credits arising out of the temporary reduction of certain income tax allowances during the years 1941-42 to 1945-46 inclusive are repayable to women over 58 and men over 63 years of age, and to widows entitled to Credits in their own right. Where a man or woman has died, repayment is made to personal representatives or beneficiaries, irrespective of age.

Holders of Credits are also entitled to repayment if certified as blind persons or in-patients of hospitals or nursing homes, or if in receipt of any of the following: National Assistance, Constant Attendance Allowance or Unemployability Supplement, Sickness or Injury Benefit, Disablement Pensions, Workmen's Compensation 1956 Supplement; or if registered as unemployed. There is a qualifying period of 26 weeks in certain categories (12 weeks for National Assistance). Interest from 1st October 1959 will be added to the sum repayable. Forms for claiming repayment may be obtained at any Post Office.

INCOME TAX ADMINISTRATION

Income Tax under Schedules A, B, D and E, is assessed by H.M. Inspector of Taxes. Schedules A and B assessments are made by H.M. Inspector for the district in which the land or property is situated. Assessments under Schedules D and E are made by H.M. Inspector of Taxes for the district in which Trade, Profession or Employment is carried on, or from which the Pension is paid, otherwise assessments are made in the District in which the taxpayer resides. Notices of Assessment are sent to taxpayer who should make a formal appeal against any assessment which he disputes direct to H.M. Inspector by whom the Notice was issued within the time limit for such appeals, as stated on the notice. The grounds of appeal should be given. If the assessment cannot be agreed with H.M. Inspector, the appeal will be heard by the General Commissioners. Alternatively, certain appeals are made to the Special Commissioners. An appeal may be made by way of Case Stated from the appeal Commissioners' decision to the High Court on points of law.

Income Tax is payable to the Collector of Taxes.

Surtax is assessable by the Special Commissioners of Income Tax to whom returns of total

income are made, except where a full return of income is made to H.M. Inspector of Taxes. Appeals are made to the Special Commissioners and thence to the Courts by way of Case Stated.

Surtax is payable to the Special Commissioners.

Penalties may be incurred for failure to make proper returns of income.

Every person chargeable to income tax must give notice of chargeability within one year (unless an income tax return has been already made).

PAYE

Income Tax payable under Schedule E is deducted by employer, who accounts for it to the Collector of Taxes. The amount of tax deduction from each payment of salary, wage, pension, etc., is determined by reference to Tax Tables issued by H.M. Inspector of Taxes to employer, in conjunction with the taxpayer's Code Number. This Code Number is an interpretation of the taxpayer's Allowances and Reliefs. Notices of Coding are issued by H.M. Inspector of Taxes and they may take into account income assessable under other Schedules. Notice of Coding should be checked on receipt and H.M. Inspector of Taxes informed of any necessary amendment in order that no considerable over or under-deduction of income tax may take place. The tax deductions are on a cumulative basis and can be carried on by successive employers should changes in employment take place during fiscal year. When leaving one employment a statement (Form P45) showing code number, remuneration, and tax deductions to date should be obtained from old employer and handed, in due course, to new employer. At the end of fiscal year employer should give employee a statement (Form P60) showing total remuneration and tax deductions for the year.

DEDUCTION OF TAX

Tax is deductible at the standard rate from annual interest, annuities and annual payments such as ground rents and mortgage interest. The tax deducted may be retained by the payer unless he has not borne tax himself at the standard rate on an equivalent amount of income, in which case he must account to the Revenue for the tax deducted in respect of the excess. Interest payable to a bank or building society (under the special arrangement with the Revenue) is paid in full. The tax paid under Schedule A by an occupier is normally deductible from the rent paid by him to the landlord.

STANDARD RATES OF INCOME TAX SINCE 1900

The standard rate of income tax, as imposed by the Income Tax Act, 1842, was 7d. in the £. Rates since 1900 are as follows:—

s. d.	s. d.	s. d.	s. d.				
1900-1	1 0	1915-16	3 0	1931-34	5 0	1941-46	10 0
1901-2	1 2	1916-18	5 0	1934-36	4 6	1946-51	9 0
1902-3	1 3	1918-22	6 0	1936-37	4 9	1951-53	9 6

OTHER TAXES AND STAMP DUTIES

NOTE.—(1) The instruments for which the use of adhesive postage stamps is "permitted" include:—
 Agreements liable to the duty of 6d.—s. 22. Bills of exchange (including cheques); for payment of money on demand—s. 34 (1). Policies of insurance (not life)—s. 99. Receipts—s. 101 (a).

(2) The Commissioners as a general rule allow deeds, etc., to be stamped after execution:—

WITHOUT PENALTY, ON PAYMENT OF DUTY ONLY:

Deeds and instruments not otherwise excepted, within 30 days of first execution.

NOTE.—Where wholly executed *abroad*, the period begins to reckon from the date of arrival here.

AGREEMENT for Lease, *see* LEASES.

AGREEMENT for SALE of PROPERTY—charged with *ad val.* duty as if an actual conveyance on sale (*see post*, pp. 1164–5) with certain exceptions, e.g. agreements for the sale of land, stocks and shares, goods, wares or merchandise, or a ship (*see* s. 59 (1), Stamp Act, 1891). If *ad val.* duty is paid on an agreement in accordance with this provision, the subsequent conveyance or transfer is not chargeable with any *ad val.* duty and the Commissioners will upon application either place a denoting stamp on such conveyance or transfer or will transfer the *ad val.* duty thereto. Further, if such an agreement is rescinded, not performed, etc., the Commissioners will return the *ad val.* duty paid.

AGREEMENT, not otherwise charged with duty, under hand only. 0 0 6
 N.B.—The following agreements are exempt:—

(a) Where the value of the subject-matter is less than £5.

(b) For the hire of any labourer, artificer, manufacturer, or menial servant.

(c) For the sale of any goods, wares, or merchandise (but hire purchase agreements, *post*, p. 1166, are not exempt).

Not otherwise charged with duty, under seal or with clause of registration. 0 10 0

APPOINTMENT of a new trustee or in exercise of a power over property, not being by a will; also on retirement of trustee, although no new trustee be appointed. 0 10 0

ASSIGNMENT:

By way of security—*see* Mortgage

By way of sale—*see* Conveyance.

By way of gift—*see* Voluntary Disposition.

ASSURANCE—*see* Insurance Policies.

"Marketable Security" includes the Registered Bonds and Debentures, generally, of Companies, Corporations, and Public Bodies.

Where a transfer is made to a body of persons established for charitable purposes only, or to the trustees of a trust so established, the maximum rate of duty is £1 per cent.; and a conveyance or transfer on sale of local authority stock issued by a local authority after the beginning of 1953, is chargeable at one-half of the above rates.

CONVEYANCE OR TRANSFER ON SALE (in the case of a Voluntary Disposition, see below, p. 1167) of any property (except stock or marketable securities for which, see above), where the consideration for the sale does not exceed £3,500... nil

Exceeds £3,500 but does not exceed £4,500 for every £50 and any fraction of £50... 0 5 0

Exceeds £4,500, but does not exceed £5,250 for every £50 and any fraction of £50... 0 10 0

Exceeds £5,250, but does not exceed £6,000 for every £50 and any fraction of £50... 0 15 0

Exceeds £6,000, for every £50 and any fraction of £50... 1 0 0

If the consideration does not exceed £3,500 (or £4,500, or £5,250, or £6,000, as the case may be) the Conveyance or Transfer on Sale must contain a certificate of value certifying that the transaction does not form part of a larger transaction or series of transactions in respect of which the amount or value or the aggregate amount or value of the consideration exceeds £3,500 (or £4,500 or £5,250 or £6,000, as the case may be).

If the Conveyance or Transfer on Sale does not contain the appropriate statement duty at the full rate of £1 for every £50 or fraction of £50 will be payable whatever the amount of the consideration.

However, if the consideration does not exceed £300, and the instrument does not contain a certificate of value, then if the consideration for the sale does not exceed £5, for every 25s. or part thereof of the consideration... 0 0 6

If, in such a case, the instrument is certified at:

£4,500	1	of the above rates
£5,250	1	" " " "
£6,000	1	" " " "

Where a transfer is made to a body of persons established for charitable purposes only, or to the trustees of a trust so established, the maximum rate of duty is £1 per cent.

CONVEYANCE OR TRANSFER of any other kind	£ s. d.
fixed duty	0 10 0

Included under this head are Transfers for nominal consideration within any of the following categories:—

(a) Transfers vesting the property in trustees on the appointment of a new trustee of a pre-existing trust, or on the retirement of a trustee.

(b) Transfers, where no beneficial interest in the property passes, (i) to a mere nominee of the transferor, (ii) from a mere nominee of the transferor, (iii) from one nominee to another nominee of the same beneficial owner.

(c) Transfers by way of security for a loan or re-transfer to the original transferor on repayment of a loan.

(d) Transfer to a residuary legatee of stock, etc., forming part of the residue divisible under a will.

(e) Transfers to a beneficiary under a will of a specific legacy of stock, etc. (Note.—Transfers by executors in discharge, or partial discharge, of a pecuniary legacy (unless made under an express power of appropriation) are chargeable with *ad valorem* duty on the amount of the legacy so discharged.)

(f) Transfers of stock, etc., forming part of an intestate's estate to the person entitled to it.

(g) Transfers to a beneficiary under settlement on a distribution of the trust funds of stock, etc., forming the share or part of the share of those funds to which the beneficiary is entitled in accordance with the terms of the settlement.

(h) Transfers on the occasion of a marriage to trustees of stocks, etc., to be held on the terms of a settlement made in consideration of marriage.

(i) Transfers by the liquidator of a company of stocks, etc., forming part of the assets of the company to the persons who were shareholders, in satisfaction of their rights on a winding-up.

The evidence necessary to establish that a transfer is liable to the fixed duty of 10s. should take the form of a certificate setting forth the facts of the transaction. In cases falling within (b) or (c) such a certificate should be signed by (1) both transferor and transferee or (2) a member of a Stock Exchange or a solicitor acting for one or other of the parties or (3) an accredited representative of a bank; in the last case when the bank or its official nominee is a party to the transfer, the certificate, instead of setting out the facts, may be to the effect that "the transfer is excepted from Section 74 of the Finance (1909-20) Act, 1920." A certificate in other cases should be signed

by a solicitor or other person (e.g., a bank acting as trustee or executor) having a full knowledge of the facts.

Registering Officers will in any case in which a Marking Officer's certificate has not been given require such evidence in order to satisfy themselves that a transfer stamped with the 10s. fixed duty is duly stamped.

COVENANT—For repayment of money, see MORTGAGE.

For original creation and sale of any annuity, see CONVEYANCE.

For an annuity (except on original creation and sale) or other periodical payments, see BOND.

750,000	750,000	75
1,000,000	1,000,000	80

Lower rates of duty are payable in certain circumstances on property passing on two deaths occurring within 5 years of one another. (Finance Act, 1958.)

A reduction of 45 per cent. of the above rates is applied to the "agricultural value" of agricultural property; and (as respects deaths on and after 30th July, 1954) to certain business assets, viz.: "Industrial hereditaments" and "machinery or plant" (Finance Act, 1954, s. 28).

Gifts made by deceased during his life for public or charitable purposes are liable for duty, unless made more than twelve months before death; other gifts are liable for duty, unless made more than five years before death, although graduated rates are provided by the Finance Act, 1960; gifts made in consideration of marriage, or as part of deceased's reasonable normal expenditure, excepted. Gifts not exceeding £100 in value or amount (or in certain circumstances £500) also excepted.

Payment of Estate Duty may, by agreement with the Commissioners, be made, wholly or in part, in the form of real or leasehold property comprised in the estate.

Interest at 2 per cent. per annum is also payable on the Estate Duty on personalty from the date of the death up to that of delivery of the affidavit or account.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, and a per cent. interest is charged on all unpaid instalments from twelve months after death.

FEES are taken in all Public Departments by means of Stamps: such payments are accounted for to the Exchequer under the heading of Miscellaneous Revenue.

LEASES:—Lease or tack of any dwelling-house or part thereof for any definite term not exceeding a year at a rent not exceeding £40 per annum, 1d., but if there is a consideration other than rent, the duty is 2d.; for any definite term less than a year of any furnished dwelling-house or apartments where the rent for such term exceeds £25, 5s., unless there is a consideration other than rent, or the average rate of rent exceeds £100 per annum, when the duty is 10s.; of any lands, tenements, etc., in consideration of any rent, according to the following table:—

Annual rent not exceeding	* Term not exceeding		Term exceeding 100 years
	35 years	100 years	
£	£ s. d.	£ s. d.	£ s. d.
5	0 1 0	0 12 0	1 4 0
10	0 2 0	1 4 0	2 8 0
15	0 3 0	1 16 0	3 12 0
20	0 4 0	2 8 0	4 16 0
25	0 5 0	3 0 0	6 0 0
50	0 10 0	6 0 0	12 0 0
75	0 15 0	9 0 0	18 0 0
100	1 0 0	12 0 0	24 0 0
Exceeding £100, for every £50 or fraction of £50	1 0 0	6 0 0	12 0 0

* If the term is indefinite the same duty is payable as if the term did not exceed 35 years. However, if the term does not exceed 35 years and the annual rent does not exceed £100, but there is a consideration other than rent, the duty is double that shown in the 1st column.

Agreement for lease not exceeding 35 years, same as actual lease.

Where a consideration other than rent is payable and duty is charged on that consideration at conveyance rates, the same graduation applies where the consideration does not exceed £6,000 as under Conveyance or Transfer on Sale (except stock or marketable securities), provided that any rent payable does not exceed £50 a year.

MINERAL RIGHTS DUTY.—This is payable in respect of minerals which are the subject of a mining lease, or which are being worked by the proprietor of the minerals. Duty is payable annually on the rental value of all rights to work minerals and of all mineral wayleaves. Rate, per 20s. of the rental value..... 0 1 0

LOCAL TAXATION LICENCES

DOG, GAME AND GUN LICENCES

In England and Wales, Dog, Game and Gun Licences are administered by the respective County Councils and County Borough Councils and the proceeds retained by them; and in Scotland by the Commissioners of Customs and Excise. Licences are issued for the Councils by the Post Office.

	£	s.	d.	
Dogs, of any kind (annually, from first day of month of issue), Great Britain.....	0	7	6	occupiers, or their servants, killing deer on their own enclosed land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorize others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence. Sailors, soldiers, airmen, territorial soldiers, or constables, on duty or at practice, need not take out a gun licence, nor need
Dogs under 6 months of age, and those kept solely for the purpose of tending sheep or cattle on a farm, or by shepherds, or by blind persons for their guidance, exempt from Duty.				

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springs; proprietors, or tenants, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds; owners or

occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he cannot authorize any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits. The rates of duty are as follows:—

GAMING LICENCES, if taken out after 31st July and before 31st Nov., to expire on 31st July following.....	£	s.	d.
After 31st July, to expire 31st Oct....	3	0	0
After 31st Oct., to expire 31st July....	2	0	0
For a continuous period of 14 days....	1	0	0
Gamekeeper's (Great Britain), to expire 31st July.....	2	0	0
Game-Dealer's Licence, to expire 31st July, annually.....	2	0	0
GUN LICENCES (gun, air gun or pistol).....	0	10	0

A Firearm Certificate (5/- for the first, 2/6 subsequently—renewable every 5 years) is also necessary (with certain exceptions) for any person in possession of a firearm, other than a smooth

bore gun with a barrel not less than 20 inches in length, or an air weapon.

A person under 17 may not purchase or hire and (with certain exceptions) a person under 14 may not have in his possession a firearm.

Firearm regulations are strictly enforced.

OTHER LOCAL LICENCES

Power to levy the duties on the following licences was transferred to county and county borough councils by the Finance Act, 1949.

	£	s.	d.
HAWKERS, annual licence.....	2	0	0
MONEYLENDERS, annual licence (to July 31).....	15	0	0
February to July.....	10	0	0
PAWNBROKERS, annual licence.....	7	10	0
REFRESHMENT HOUSES, annual licence....	1	1	0

An abatement of 75s. 10d. may be obtained by a person also taking out a wine retailer's on-licence in respect of a refreshment house not open after 10 p.m.

MECHANICALLY PROPELLED VEHICLES

Road licences and driving licences for mechanically-propelled vehicles are issued in England and Wales by county councils and by county borough councils (Scotland, 4 cities and Greenock, Motherwell, Paisley and Wishaw), on behalf of the Ministry of Transport. Renewal licences are issued in certain circumstances by the Post Office.

Bicycles (other than electrically propelled).....

(a) If the cylinder capacity of the engine does not exceed 150 cubic centimetres.....

(b) Exceeds 150 c.c. but does not exceed 250 c.c.....

(c) Exceeds 250 c.c.....

Bicycles which are electrically propelled.....

†Additional if used for drawing trailer or side-car.....

* Additional if used for drawing trailer or side-car.....

Reduced duty on certain bicycles.—Where the cylinder capacity of the engine of a bicycle exceeds 250 c.c. and the bicycle (a) is one in respect of which a licence was taken out before Jan. 1, 1933, and (b) does not exceed 224 lb. unladen weight, the bicycle shall be treated for the purpose of the above table as if the cylinder capacity of the engine exceeded 150 c.c. but not 250 c.c.

Tricycles (neither constructed nor adapted for use nor used for the carriage of a driver or passenger).....

Other tricycles.....

Vehicles other than mowing machines, being vehicles with more than three wheels neither constructed nor adapted for use nor used for the carriage of a driver or passenger.....

Hackney Carriages.

Tramcars.....

Other hackney carriages:—

Having a seating capacity for not more than 4 persons.....

Having a seating capacity excdg. 4, but not excdg. 20 persons.....

For each addnl. person over 20.....

Licensing of Public Vehicles.

Public vehicles and also the persons concerned with driving and conducting them must be licensed. Vehicles are licensed by the Traffic

Commissioners; licensing of personnel is effected by the authority in the area in which they live—not the area where the vehicle is to operate. Addresses of the Licensing Authorities can be obtained from local Police Stations. See also *Driving Licence Rules*, p. 1169.

Tractors, Cranes, Excavators, Agricultural Vehicles, etc.

Locomotive ploughing engines, tractors, agricultural tractors and other agricultural engines, not used for hauling on roads any objects except their own necessary gear, etc.....

Vehicles designed, constructed and used for the purpose of trench digging or any kind of excavating or shovelling work which (1) are used on public roads only for that purpose or for the purpose of proceeding to and from the place where they are to be used for that purpose, and (2) when so proceeding neither carry nor haul any load other than such as is necessary for their propulsion or equipment.....

Vehicles designed and constructed as mobile cranes which (1) are used on public roads only either as cranes in connection with work being carried on at a site in the immediate vicinity or for the purpose of proceeding to and from a place where they are to be used as cranes; and (2) when so proceeding neither carry nor haul any load other than such as is necessary for their propulsion or equipment.....

Mowing machines.....

Vehicles (other than vehicles in respect of which duty is chargeable under the foregoing provisions) which are constructed and used on public roads for haulage solely and not for the purpose of carrying or having superimposed upon them any load except such as is necessary for their propulsion or equipment:—

(i) Showmen's vehicles:—

Not excdg. 7½ tons unladen.....

Excdg. 7½ but not excdg. 8 tons....

Excdg. 8 but not excdg. 10 tons....

Excdg. 10 tons unladen—	£	s.	d.
For the first 10 tons.....	42	0	0

Not exceeding 1 oz.	6d.
For each further 2 oz., or less	4d.

WEIGHT LIMITS:—Inland, none. Elsewhere, 4 lb.

SIZE LIMITS: (a) If in roll form:—Inland and elsewhere length, 32 in.; length+twice diameter, 39 in. (b) not in roll form:—(i) United Kingdom, Irish Republic, British Commonwealth, territories under British Trusteeship; British Postal Agencies in Bahrain, Muscat, Qatar and the Trucial States; and the Republic of South Africa: 24×18×18 in.; (ii) Elsewhere, length, 24 in., length+width+depth, 36 in. Envelopes must be at least 4×21 in. for inland destinations. To all overseas destinations the minimum limits for letters in the form of a roll are 64 inches for the length and twice the diameter combined (at least 4 inches for the greatest dimension), unless provided with a strong address label at least 6½ inches in length and width combined and 1½ inches in width. For letters other than in the form of a roll the minimum limits are one surface 4 inches in length, 2½ inches in width, unless provided with a strong address label of the dimensions mentioned above.

POST CARDS (p. 1175).

Inland, British Commonwealth etc. in (a) above:—

Single	2½d.
Reply paid (2½d. stamp on each part)	5d.

Elsewhere abroad:—

Single	4d.
Reply paid	8d.

Limit of size for all destinations, inland or abroad: maximum, 5½ inches in length, 4½ inches in width; minimum, 4 inches in length, 2½ inches in width.

PRINTED PAPERS, BOOKS (p. 1175).

Inland:—

Not exceeding 2 oz.	2½d.
Not exceeding 4 oz.	4d.
For each further 2 oz., or less	1d.

British Commonwealth and Foreign:—

For first 2 oz.	2d.
For each further 2 oz., or less	1d.

Exceptionally, newspapers, periodicals, books, pamphlets, maps and sheets of music which comply with the conditions shown in the Post Office Guide under *Printed Papers at Reduced Rates* may be sent abroad at the prepaid rate of 1½d. for the first 2 ounces and 1d. for each additional 2 ounces or fraction thereof.

LIMITS: Size, as for Letters; Weight: Inland, 2 lb. All destinations abroad, 64 lb.; but a packet of books or booklets, sewn, bound or stapled within covers, up to 11 lb. may be sent abroad.

Unless stamped at least 3d., printed papers posted after a prescribed hour are liable to be held over until next day.

MAGAZINE POST

Canada and by dir. et steamship only:—

Not exceeding 6 oz.	1d.
Over 6 oz. to 1½ lb.	1½d.
Each further ½ lb. (up to 5 lb.)	¾d.
Size limit: 24×18×18 in.	

COMMERCIAL PAPERS

British Commonwealth and Foreign only:—

Not exceeding 10 oz.	6d. (minimum charge)
Every further 2 oz., or less	1d.

Limits: Size, as for Printed Papers; Weight, Brit. Commonwealth, Territories under British Trusteeship; British Postal Agencies in Bahrain, Muscat, Qatar and the Trucial States; and the Republic of South Africa: 5 lb.; Elsewhere, 4 lb.

NEWSPAPERS

(See also p. 1175).

Inland (Newspapers "Registered at G.P.O."):—

Not exceeding 6 oz.	per copy 3d.
Every further 6 oz., or less	per copy 1½d.
Limits: 2 lb. in weight; in size as Letters.	

Inland: Newspapers registered at the G.P.O. may be sent at printed paper rate; newspapers not registered are sent at the printed paper rate.

British Commonwealth and Foreign: See printed papers.

SAMPLES (See also p. 1175).

Inland (not to Irish Republic):—

Not exceeding 2 oz.	2½d.
Not exceeding 4 oz.	4d.
Every additional 2 oz. or less	1d.

British Commonwealth and Foreign:—

Not exceeding 2 oz.	2d.
For each further 2 oz. or less	1d.

LIMITS: Inland: As for letters, weight 8 oz.; Abroad: British Commonwealth, territories under British Trusteeship and British Postal Agencies in Bahrain, Muscat, Qatar and the Trucial States, 24×12×12 in., 5 lb. Elsewhere: as for Letters B II, 1 lb. If in form of roll, everywhere as for letters, A. To all overseas destinations the minimum limits of size are as for letters.

SMALL PACKETS (See also p. 1175).

(British Commonwealth and Foreign—certain countries only)

Not exceeding 10 oz.	10d (minimum charge)
For each further 2 oz. or less	2d.

LIMITS: Maximum size, as for Letters A and B II. Minimum limits of size as for letters; Weight, 2 lb.

INSURED BOXES (See also p. 1174).

(British Commonwealth and Foreign—certain countries only)

Not over 10 oz.	1s. 8d. (minimum charge)
For each further 2 oz. or less	4d.

Plus appropriate fee for insurance.

LIMITS: Maximum size, 12×8×4 in. Minimum size limits as for letters other than in the form of a roll; weight, 2 lb.

PARCELS

Should be marked "Parcel Post." and must be handed across the counter; postage must be prepaid by stamps, affixed by the sender. On Sundays parcels are not accepted or (except during Christmas) delivered. The name and address of sender should be inside and (not too prominent) on the outside of every parcel, and preferably be to the left of and at right angles to the name and address of the addressee.

A rural postman will accept any packets he can conveniently carry, except overseas parcels or overseas letters intended for insurance; but if on foot or cycle not more, without notice, than 15 lb. from one person. He may weigh parcels on request. Mail-drivers need not accept between regular stopping points.

Parcels to or from Irish Republic, Channel Is. or I. of Man are liable to customs duty except in last case, the sender must declare contents when posting. Addressee must pay clearance fees (1s. or 2s.) if any duty be payable. Senders can undertake to pay customs charges of Irish Republic

and some overseas countries (a deposit is required). The sender of a parcel from the Channel Islands may also pay the customs charges etc., at the time of posting.

Inland:—(Limit of size: length, 3 ft. 6 in.; length and girth combined, 6 ft.):—

U.K. and Irish Republic:—

Not over 2 lb.	2s. 0d.	Not over 6 lb.	3s. 0d.
" " 3 lb.	3s. 3d.	" " 7 lb.	3s. 3d.
" " 4 lb.	6d.	" " 8 lb.	3s. 6d.
" " 5 lb.	9d.	" " 11 lb.	3s. 9d.
Not over 15 lb. (limit)		4s. 0d.	

AIR MAIL SERVICES

For mode of packing, prohibitions, limits of size, &c., see Post Office Guide.

Normal regulations as to make-up and acceptance of various categories of postal packets and parcels apply equally to air mail items. A blue air-mail label, obtainable free from post offices, must be affixed to each air mail item except letters, letter packets and postcards for Europe. Air mail labels should not be fixed to these latter items or delay will result. Special air-mail rates apply to correspondence for members of H.M. Forces overseas (see leaflet PL89).

AIR LETTERS, postage 6d., written on special Air Letter forms may be sent to all countries. The special forms may be obtained at post offices.

SECOND CLASS MAIL. Printed papers, Commercial Papers, Samples, Small Packets may be sent by air to countries outside Europe at the rates shown in col. 4 below. Minimum charges: Commercial Papers, 6d.; Small Packets, 10d. NEWSPAPERS. Publications registered at the G.P.O. as newspapers may be sent at the reduced rates indicated in the footnote below. There is no Second Class air mail service to Europe.

COUNTRIES OUTSIDE EUROPE

For air mail services to Europe, see above; Air Parcel Rates, pp. 1179-81. For details of insurance and times of posting at London Chief Office and of transmission to principal cities, see G.P.O. Air Mail Leaflet from Post Offices (*free*).

European Countries

Letters, letter packets and postcards for all European countries, prepaid at the ordinary international postage rates, are in general despatched daily by air or surface transport, whichever offers earlier delivery. The rates are:—

Letters, 6d. for the first ounce,
4d. for each additional ounce.
Postcards, 4d.

For Gibraltar and Malta the rates are:

Letters, 3d. for the first ounce,
1½d. for each additional ounce.
Postcards, 2½d.

Air mail labels should not be used.

Air Parcel Post to Europe. Rates are included in the Overseas Parcel Post tables, see pp. 1179-81.

Countries Outside Europe

Rates for letters, postcards and second class mail appear below; for air parcel rates, see pp. 1179-81.

GENERAL REGULATIONS

EXPORT RESTRICTIONS.—Under Board of Trade regulations many kinds of goods, including certain foodstuffs, may be sent abroad (including Irish Republic) only under the authority of an export licence. Enquiries in the matter should be addressed to the Controller, Export Licensing Branch, Board of Trade, Gavrelle House, 14, Bunhill Row, London, E.C.1.

Under the Defence (Finance) Regulations, senders of trade letter packets or parcels exceeding £2,000 in value to most foreign countries, including the U.S.A., and also to Canada (including Newfoundland), must furnish with the parcel a currency declaration (form C.D.3) which, together with explanatory notices, may be obtained from banks.

Senders of private gift packets or parcels exceeding £100 in value must furnish with the packet or parcel a currency declaration C.D.3.

PROHIBITED AND DUTIABLE ARTICLES.—Among prohibitions are offensive or dangerous things, packets likely to impede the P.O. sorters, and certain kinds of advertisement. To Channel Islands, and I. of Man dutiable articles must be sent in Parcels. Abroad generally they may be sent in Parcels, in Insured Boxes and Small Packets (to those countries which accept them) or (where the "Green Label" system applies) in Letters and in some cases sample packets.

CERTIFICATE OF POSTING.—Given as a matter of course for registered and insured items. May also be obtained for ordinary parcels (no charge) and other unregistered packets (fee, 1d.).

RECORDED DELIVERY (inland, not to Irish Republic).—This service provides for a certificate of posting and a receipt on delivery. Money and jewellery are not allowed, and other contents must not exceed £2 in value. The service does not apply to parcels.

UNPAID PACKETS, except Business Reply packets and redirected parcels are charged double postage on delivery; **UNDERPAID PACKETS**, double the deficiency.

UNDELIVERABLE POSTAL PACKETS.—Inland packets chargeable with a postage of 3d. or more, undelivered, are returned to sender without charge, if his address is found either outside or inside. If the sender's address is not available, letters containing nothing of value are destroyed; packets containing anything of value, and parcels, if not applied for, are generally disposed of after 3 months, or if perishable are dealt with as requisite. *Packets chargeable with postage not exceeding 2½d. are returned to sender only on payment of a second postage, and if name, address and request for return appear on outside; those without such request are disposed of.* British packets undelivered abroad are returned to sender here on payment of charges due; printed papers of no value only if request for return appears outside in a language known in the country of destination. Magazine Post packets are charged with return Postage, when return is requested. Parcels further incur other charges unless abandonment is requested at the time of posting.

REPLY COUPONS, for the purpose of prepaying replies to letters, are exchangeable abroad for stamps representing the minimum letter postage rate from the country concerned to the U.K. Price (valid in all countries of the Universal Postal Union), 1s.; (valid within the Commonwealth and Irish Republic and the Republic of South Africa only), 5d. Sold at chief offices.

POSTE RESTANTE (solely for the accommodation of travellers, and for three months only in any one town).—A packet may be addressed as a rule to any Post Office except Town Sub-Offices, and should have the words "Poste Restante" or "to be called for" in the address. If addressed to initials, fictitious names, or Christian name only, it is treated as undeliverable. Applicants must furnish sufficient particulars to ensure delivery to the proper owner. Redirection from a Poste Restante is not undertaken for more than 14 days unless longer (up to 3 months) is applied for. Letters at a seaport on an expected ship are kept 2 months; otherwise letters are kept for 2 weeks—or for 1 month if originating from abroad—at the end of which time they are treated as undeliverable, unless bearing a request for return at or before the end of the period.

REDIRECTION.—(1) By agent of addressee: *Parcels other than parcels and business reply may be*

reposted free not later than the day after delivery (not counting Sundays and public holidays) if unopened and not tampered with, and if original addressee's name is unobscured. *Parcels may be re-directed free of charge, within the same time limits, only if the original and the corrected addresses are both within the same Town Delivery Area (or within the London Postal Area). Registered packets, which must be taken to a Post Office, are re-registered free only up to day after delivery.* (2) By the Post Office (not undertaken when other persons remain at the address). Requests for re-direction of letters, &c., should be on printed forms, obtainable from the postmaster, and must be signed by the persons to whom the letters are to be addressed. Redirection is free for 3 months (except for parcels re-directed to a different Town Delivery Area, see above); thereafter for each different surname and each new address costs 5s. for 12 months, and 10s. for each subsequent year. Separate forms must be filled in for the forwarding of telegrams.

REGISTRATION, INLAND.—All kinds of postal packets intended for registration should be marked "Registered" in bottom left-hand corner, and must be handed to an officer of the Post Office, and a receipt taken. The packets must be made up in a reasonably strong cover appropriate to their contents. Parcels (or the string with which they are tied) and letters must be fastened with adhesive (if tape is used it must be transparent and each piece must be signed or distinctively marked), or sealed with wax, lead, &c. Minimum fee 1s. 6d., exclusive of postage. Advice of delivery, a further 6d. The latest time for registering is usually half an hour before the latest time for posting ordinary packets. Compulsory registration is applied to (a) any packet apparently meant for registration and wrongly posted (1s. 6d. less any prepaid excess postage); (b) packets found open (or undeliverable) and containing any bank or currency note, coin, jewellery, stamps, uncrossed bearer cheques, uncrossed postal orders without payee's name, &c., in each case 10s. or more in value (1s. 6d.).

COMPENSATION, INLAND.—Subject to certain prescribed regulations which are fully set forth in the Post Office Guide, the Post Office pays compensation for (i) loss of or damage to registered letters and parcels, (ii) though not as a legal right, for loss of or damage to unregistered parcels and for unregistered packets conveyed by Express Messenger all the way. The onus of making up properly any packet sent by post and of packing adequately any article or articles enclosed therein lies on the sender, and the Post Office does not accept any responsibility for loss arising from faulty or inadequate packing. No compensation is paid for consequential injury or damage arising in respect of anything sent by post. *Registered letters and parcels (including items sent to the Irish Republic):* The fees for registration are 1s. 6d. covering compensation up to £20; 1s. 7d., £40; and 1d. for each additional £20 up to the maximum of 3s. 1d. for £400. (No legal right to compensation exists in respect of registered letters and parcels sent to and from Irish Republic.) *Unregistered parcels and unregistered packets conveyed by Express Messenger all the way:* Maximum compensation £5 (£4 for unregistered parcels sent to or received from Irish Republic).

Compensation in respect of money of any kind (coin, notes, orders, cheques, stamps, etc.) is only given if the money is sent by registered letter post in one of the special envelopes sold officially (see p. 1175) and, in the case of paper money, if particulars (for identification) are kept; the

maximum compensation for coin, which must be packed so as not to move about, is £5. Compensation cannot be paid for loss or damage in the case of any packet containing anything not legally transmissible by post; and for fragile articles only if they have been adequately packed and the cover is conspicuously marked "Fragile, with care." No compensation is paid for deterioration due to delay of perishable articles or for damage to exceptionally fragile articles, liquids or semi-liquids sent by letter or parcel post to or from Irish Republic whether registered or not.

REGISTRATION, BRITISH COMMONWEALTH AND FOREIGN (except for parcels and a magazine post packet for Canada, including Newfoundland), is in force to all countries with the exception of Chagos Islands, North Korea and North Viet-Nam. Valuable articles may not be sent in unregistered letters. Fee, 1s. 6d. If claimed within a year, compensation (in the U.K., £2 18s.) is paid to the sender for entire loss of registered packets while in the custody of a country in the Universal Postal Union, subject to certain conditions.

INSURANCE, BRITISH COMMONWEALTH AND FOREIGN, may be effected on packets to many countries at the following rates:—1s. 8d. for £24; 2d. each further £12 up to 6s. 10d. for £396 and 7s. for £400 (lower maxima in many countries). For H.M. Ships abroad and also members of H.M. Army and Air Force overseas using closed Forces addresses (e.g. British Forces Post Office followed by a number) only parcels are insurable, up to £50. Packets containing no articles (besides correspondence) but valuable papers (banknotes, &c.) or valuable documents (plans, &c.) can be insured as letters; other valuable articles should be sent as insured parcels, or as "insured boxes."

COMPENSATION up to a maximum of 93s. may be given for loss or damage in the U.K. to uninsured parcels to or from most Commonwealth and Foreign Countries, if certificate of posting is produced.

No compensation will be paid for any loss or damage due to the act of the Queen's Enemies.

INSURED BOX POST.—Jewellery and precious articles (not letters or paper valuables) may be sent in insured boxes to certain countries. Customs declarations must be filled in.

CASH ON DELIVERY SERVICE, 'INLAND (not to or from Irish Republic, nor to H.M. Ships.)—A sum (Trade Charge) up to £40 can, under certain conditions, be collected from addressee and re-mitted to sender of a parcel or registered letter posted at a Money Order Office, or of goods consigned by railway. Fees (extra to usual postal or rail charges): For Trade Charge up to £1, 1s. 2d.; £2, 1s. 4d.; £5, 1s. 6d.; and for each further £5 or part thereof, 2d. An additional charge of 1s. is made on consignments sent by rail.

CASH ON DELIVERY, BRITISH COMMONWEALTH AND FOREIGN.—Applicable to parcels only, but not to all countries, nor to H.M. Naval and Military Forces and R.A.F. serving overseas. Fees for collection: 4½d. for Trade Charge (amount to be collected) not exceeding £1, with 2½d. extra for each additional £1 of Trade Charge up to the maximum, which is usually £40 (see 8s. 6d.), but in some countries less. Addressee has also to pay on delivery, besides Customs, if any, a further fee (4d. in U.K.) not repayable. If Trade Charge cannot be collected, the rules for undeliverable parcels apply.

EXPRESS AND SPECIAL SERVICES (INLAND).—In general the express services are limited to the hours of telegraph business, but the times vary according to the service used and local conditions. No. (4) (below) is available on Sundays

only. **Waiting fees:** 10 minutes free, each further 10 minutes or less, 4d.:—(1) *All the way*, by P.O. messenger, of packets, conspicuously marked "Express" above the address, handed over the counter. Inclusive charge, 1s. per mile, or part of a mile, with 3d. on each separate packet after the first. Live animals, liquids, and money may be delivered by this service. (2) *After transmission by post*, on addressee's application (1s. per mile, or part of a mile, and 2d. for every ten or less additional packets). (3) *After transmission by post*, at sender's request "Special Delivery" from the ordinary delivery office, if messengers are available (1s. + postage). Packets must be marked "Express," and letters bear a broad blue or black vertical line back and front. (4) *Special delivery on Sundays of postal packets (except parcels) handed in on Saturdays.* Limited inter-city services, for London, Belfast, and certain provincial cities (except that the service is not in operation from Southampton to Belfast) are available only: (1) *Sundays:* reciprocally between certain towns as shown in the Post Office Guide; (2) *Good Friday:* to London only from towns in (1). Delivery is made from offices only during periods when they are open for telegraphic business. The handling-in offices in London are:—The London Chief Office, King Edward St., E.C.1., W. and S.W. District Offices, and (Branch Offices) Camberwell Green, Clapham Common, Hammer-smith Broadway, Holloway, Leicester Square, Stratford, and Swiss Cottage. Packets, marked "Express: Sunday Delivery," must be handed in in time to catch preceding night mails (in London 5.15 p.m.—6.30 p.m. for provincial towns). The latest time of posting to Belfast should be ascertained at selected office of posting. Fee is 3s. 0d. in addition to postage. Not available for parcels. (5) ("Rail-ex.") Postal packets not liable to registration are despatched by rail, met, and specially delivered in Great Britain, Douglas (I.O.M.), Northern Ireland, Jersey and Guernsey. Inclusive charges 2 oz., 6s.; 1 lb. (maximum) 7s. 0d.; but packets handed in in Northern Ireland or forwarded from Jersey and Guernsey to Great Britain, Douglas or N. Ireland may not exceed 2 oz. (6) *A Railway Parcel* is similarly accelerated at the cost of a telegram, of railway charges, and of Service (1) at both ends of its journey. It should be marked "Railway Parcel, to be handed to Post Office messenger at Station."

RAILWAY LETTERS, &c.—A letter, not liable to registration, may be handed in at the parcel or booking office of a railway station, at any time when the station is open to the public, for conveyance by the next available train. A railway letter may either be addressed to be called for at a station, or to the residence of the addressee in which case it is posted at the station named in the address. The service is available between any two stations in Great Britain and Northern Ireland, between Great Britain and Jersey, Guernsey and Douglas (I.O.M.), and from Great Britain and Northern Ireland to the Irish Republic. It is not available at or to stations of the London Transport Executive. Fees (besides postage): at stations in Great Britain, Jersey, Guernsey and Douglas (I.O.M.), 2 oz., 1s. 0d.; 4 oz., 1s. 8d.; 1 lb. (maximum), 2s. 7d.; at stations in Northern Ireland, 2 oz. (maximum), 7d. The maximum weight for letters to the Irish Republic is 2 oz. Except on Sundays, or in Irish Republic, the letter can be delivered Express under Service (3), or directly from the station (Service (1)) by wiring for messenger to meet it. For other combinations of rail and express, see preceding paragraph, Services (5) and (6).

AIRWAY LETTERS.—On certain internal air routes operated by the British European Airways Cor-

poration, letters may be handed in at the airport or town terminal for conveyance by the next available direct air service to be transferred to the post at the distant town terminal or to be called for at the airport or town terminal. Fees (besides postage): 2 oz., 1s. 1d.; 4 oz., 1s. 6d.; 1 lb. (maximum), 2s. 4d. The conditions on which this service operates are, in general, similar to those applying to the Railway Letter Service. The service is not available to the Irish Republic or to any country overseas. Full information can be obtained from any office of B.E.A.C.

INTERNATIONAL EXPRESS SERVICE.—Delivery by special messenger of correspondence (including parcels) to or from certain countries. In some cases the service is restricted to certain towns. 1s. is paid by the sender, the rest, if any, by addressee, according to the local regulations. (See P. O. Guide.)

POST CARDS.—Minimum size $4 \times 2\frac{1}{2}$ in., maximum $5\frac{1}{2} \times 4\frac{1}{2}$ in. The left-hand half of the address side may be used for correspondence, inland or abroad. Plain cards, if as stiff as official cards and not under $\frac{1}{16}$ th inch thick, may also be used both inland and abroad.

Reply Post Cards for abroad must have the heading *Carte Postale avec réponse payée* on first part, and on the second part (valid only to country of origin) *Carte Postale—Réponse*.

BUSINESS REPLY SERVICE (inland, excluding Irish Republic). This service enables a person or firm to receive cards, letters, etc. from clients without prepayment of postage, the postage together with a fee of 1d. being paid by the addressee on each card or letter delivered.

A licence to use the service must be obtained from the Post Office.

POSTAGE FORWARD PARCEL SERVICE.—This service enables firms to receive parcels from clients without prepayment of postage, by means of a special label. A licence must be obtained from the local Head Postmaster.

PRINTED PAPER POST (including former BOOK POST).—For certain printed or written matter (p. 1170).

By this post may be sent books and other works of a literary character, with or without written dedications, and in the inland service any other written, typed or printed matter not being in the nature of a letter, drawings, paintings, photographic prints, engravings, maps, &c., together with normal non-fragile binding and anything necessary for safe transmission. Commercial printed forms, legal documents, printers' copy and proofs, examination papers, answers and corrections, the writing on which refers solely to the subject matter of the document, Christmas and picture cards with date, names and addresses of sender and addressee, and with conventional formulas not exceeding 5 words or initials, are also admitted, and circulars (if in characters resembling typewriting, only under special conditions). To overseas, only printed matter in general is admitted as Printed Papers; items written or drawn, such as receipts, invoices and statements of account, admissible in the inland printed post service, go only as Commercial Papers, and there are other differences. Written chess-moves and puzzle-solutions, also blank stationery, are inadmissible. Printed papers being subject to examination in the post, the cover, if any, must be capable of easy removal and replacement for purposes of examination, i.e., without breaking, tearing, ungumming, or cutting. (For full conditions see the Post Office Guide or free leaflet P. 38c.)

ARTICLES FOR THE BLIND (inland, including Irish Republic). Books, papers, literature and specified articles specially adapted for the use of the blind are admissible subject to certain conditions. A packet should bear on the outside the indication "Articles for the Blind" and the name and address of the sender. Packets must be capable of easy examination in the post. Rate:—a lb., $\frac{1}{2}$ d.; 5 lb., 1s.; 8 lb., 1s. 1d.; 11 lb., 1s. 2d.; 15 lb., 1s. 3d. Limits: weight, 15 lb.; size, as for letters.

BLIND LITERATURE, COMMONWEALTH AND FOREIGN (in other respects treated as Printed Papers):—Papers, periodicals and books, if printed in special type (also plates for embossing blind literature, and voice recordings and special paper intended solely for the use of the blind) subject to certain conditions of posting, marked outside "Literature for the Blind", with name and address of sender. Packets must be capable of easy examination in the post. They may be sent post free by surface route to all parts.

SAMPLE POST (not to Irish Republic).—Restricted to bona-fide Trade Samples, without saleable value; but keys sent unaccompanied, printers' blocks, fresh cut flowers, and certain scientific specimens can be sent abroad by Sample Post. Packets must be capable of easy examination in the post. (See p. 1170.)

SMALL PACKETS POST (Commonwealth & Foreign).—For small articles of merchandise by Printed Paper mails. Registration is allowed; not insurance. Available only to certain countries. A green Customs label must be affixed and, in certain cases, Customs declarations prepared. (See p. 1170.)

NEWSPAPER POST (INLAND).—For newspapers "registered at the G.P.O." (p. 1170).

The cover, if any, must be open at both ends and easily removable, and copies should be folded so that title is readily inspected. No writing or additional printing is permitted, other than the words "with compliments", name and address of sender, request for return if undelivered, and a reference to a page.

Newspapers not "registered at G.P.O." or supplements to registered newspapers apart from their ordinary publications should be sent at printed paper rate.

STAMPS, ENVELOPES, POST CARDS, &c.

Stamps of reigns before that of King George V are no longer valid.

POSTAGE STAMPS (used also for receipts, telegrams, and certain Inland Revenue duties) are sold for the respective values of $\frac{1}{4}$ d., 1d., 1 $\frac{1}{2}$ d., 2d., 2 $\frac{1}{2}$ d., 3d., 4d., 4 $\frac{1}{2}$ d., 5d., 6d., 7d., 8d., 9d., 10d., 11d., 1s., 1s. 3d., 1s. 6d., 1s. 9d., 2s., 2s. 6d., 3s., and 4s. Books containing 4 each at 3d., 1 $\frac{1}{2}$ d., 4d., 2s.; 6 3d., 6 1 $\frac{1}{2}$ d., 6 1d. and 6 $\frac{1}{2}$ d. stamps, 3s.; 18 3d. stamps, 4s. 6d.; 12 3d. and 6 each of 2 $\frac{1}{2}$ d., 1d. and $\frac{1}{2}$ d. stamps, 5s.; and 30 3d., and 6 each of 2d., 1 $\frac{1}{2}$ d., 1d., and $\frac{1}{2}$ d., 10s. Rolls of $\frac{1}{4}$ d., 1d., 1 $\frac{1}{2}$ d., 2d., 2 $\frac{1}{2}$ d., 3d., or 4d. stamps are also sold, joined lengthwise or sideways and rolls of 6d. stamps joined lengthwise.

REGISTERED LETTER ENVELOPES with a 1s. 9d. embossed stamp (1s. 6d. for registration and 3d. for postage), are of four sizes: F $5\frac{1}{2}$ in. \times $3\frac{1}{2}$ in. or G $6\frac{1}{2}$ in. \times $3\frac{1}{2}$ in., 1s. 10 $\frac{1}{2}$ d. each; H 8 in. \times 5 in., 1s. 11d. each; K. 11 $\frac{1}{2}$ in. \times 6 in., 2s. 1 $\frac{1}{2}$ d.

FORCES AIR LETTER FORMS issued against purchase of 3d. stamp.

LETTER CARDS with 3d. stamp: 4d. each.

POST CARDS, with impressed 2 $\frac{1}{2}$ d. stamp: 3d. each.

EMBOSSSED ENVELOPES with 3d. stamp: "A" ($4\frac{1}{2} \times 3\frac{1}{2}$ in.) or "Commercial" ($5\frac{1}{2} \times 3\frac{1}{2}$ in.), 4d. each. Air Letter Forms impressed with 6d. stamp, 6d. each.

Embossed or impressed postage stamps cut out of envelopes, post cards, letter cards, air letter forms, newspaper-wrappers, or telegram forms, may be used as adhesive stamps in payment of postage or telegrams provided they are not imperic, mutilated, or defaced in any way.

MONEY ORDERS

Advice of Payment: 6d. inland (and to Irish Republic), 3d. overseas orders (to certain countries). Payment may be stopped (see 9d.), or deferred up to 10 days in case of Ordinary Inland Money Orders. Inland orders (including those for Irish Republic) may be crossed for payment through a bank.

Inland Ordinary Money Orders (and to Irish Republic).

The poundage charged is, for sums not exceeding £10, 1s. 6d.; and for each additional £10, 2d., to £50 (maximum), 1s. 8d. No order may contain a fractional part of 2d. The rules and regulations are on the forms issued. No poundage is charged for M.O. in payment of many Revenues (e.g., Income Tax) if demand note is produced.

Inland Telegraph Money Orders (and to Irish Republic).

Money may be transmitted by this means from most Money Order offices which despatch telegrams, and paid at most of those which also deliver telegrams, and at some other offices. On Sundays, Christmas Day and Good Friday, Inland telegraph money orders for amounts not exceeding £5 are issued at all Money Order Offices which transact telegraph business at the times when these offices are open for telegraph counter business and sums up to £5 are payable at, or in the delivery areas of, London Chief Office, the District Offices, and some Branch Offices in London, and during the hours when telegraph business is transacted at those offices outside London which open on Sunday.

Poundage at the same rate as for Ordinary Inland Money Orders, plus supplementary fee of 6d., and cost of official Telegram of Advice, 3s. 6d. for Inland Orders and 3s. 6d. for Irish Republic Orders.

Ordinary Money Orders for Abroad.

Poundage, up to £2, 2s.; £5, 3s.; £10, 4s., and thereafter 2s. per £10 or part thereof. Limits of amount vary according to destination but in any case may not exceed £40; validity, normally 12 months.

At present, not more than £40 per day per remitter can be sent to Canada or any other country outside the *Scheduled Territories* (formerly known as the Sterling Area), and then only when the purpose of the remittance is declared on a special form and permission has previously been granted by the Accountant General's Department, G.P.O. (Postal Remittance Branch I).

Telegraph Money Orders for Abroad.

Only to certain countries, e.g., Australia, Canada, India, New Zealand, S. Africa, U.S.A. Poundage as in last paragraph, plus cost of official Telegram of Advice (at Letter Telegram rate, if desired, to certain countries) plus a supplementary fee. For restrictions, see the preceding paragraph.

POSTAL ORDERS

Postal Orders (British pattern) are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on weekdays. They are also issued and paid in most countries within the Commonwealth. Transmission of postal orders to Canada or any other country outside the *Scheduled Territories* (formerly known as the Sterling Area) is prohibited except to members of H.M. Forces under special arrangements, particulars of which may be obtained at any Post Office transacting Postal Order business. They are paid (but not issued) in Irish Republic. They are printed with a counterfoil, for every multiple of 6d. up to 5s., for 6s., and by 1s. steps up to £1 1s. then for £2 and every multiple of £1 up to £5. Adhesive, unmarked current British Postage Stamps not exceeding two in number, if affixed in the 2 spaces provided, increase the value of an Order by not more than 5d. (orders up to 4s. 6d.) or 11d. (orders of 5s. and upwards). Poundage: 6d and 1s., 2d.; 1s. 6d. to £1 1s., 3d.; £2 to £5, 6d. The name of payee must be inserted. If not presented within six months of the last day of the

month of issue, Orders must be sent to the local Head Postmaster, or in London to the District Postmaster, for verification, and commission equal to the original poundage will be charged.

INLAND TELEGRAMS

Telegrams are accepted during counter business hours at any post office or railway station at which telegraph business is transacted. They may also be handed with the necessary payment to messengers delivering telegrams or express letters. Telegrams may be tendered by telephone at all times. Rate, 12 words or less 3s. 6d. (to Irish Republic 12 words or less 3s. 6d.), each further word 3d. Standard Greetings telegrams on appropriately designed forms in golden decorative envelopes cost 3s. 6d. for 12 words or less, each extra word 3d. Greetings telegrams for special occasions on a large de luxe folded card with matching envelope cost 5s. 6d. for 12 words or less, each extra word 3d. Greetings telegrams may be tendered by telephone or handed in any day prior to day of delivery. Priority rate (not available to or from Irish Republic) 1s. extra. A redirection charge of 3s. 6d. per telegram is made if the original and new addresses are in the same place, delivery area or London Postal District. In all other cases the redirection charge is at the ordinary inland rate. Telegrams, except Press telegrams, handed in on Sundays and (exc. Scotland) Good Friday or Christmas Day are charged 1s. 6d. extra. Replies may be prepaid up to 12s.; the reply vouchers may be used in payment or part payment of any Post Office telegram or any telegraph, telex or telephone account rendered by the Post Office, or its value refunded to sender of original telegram. Receipt for charges free on request. Certified copy 1s. 6d. There is no charge for delivery in the United Kingdom. In the Irish Republic delivery is free to addresses within 1 mile of the delivery office; beyond that any necessary charge will be collected on delivery.

TELEGRAPH OFFICES ALWAYS OPEN IN LONDON.—
Chief Office (King Edward Street, E.C.1), Leicester Sq.,
Charing Cross Road, W.C.2.

OVERSEAS TELEGRAMS

The charges for ordinary or FULL RATE telegrams from the United Kingdom to places abroad are shown below and on pp. 1179-81. The minimum charge for an ordinary telegram is as for 7 words. To any place in the British Commonwealth the full rate does not exceed 1s. 2d. per word. Urgent telegrams may be sent at double the ordinary rate.

For telegrams of a social character the GLT (Commonwealth Social Telegram) service is available to Commonwealth countries. The charge is 9s. 2d. for 12 words or less (including the indicator =GLT=), and 11d. for each word after 12 except to Canada, Cyprus, the British West Indies, Bermuda, British Guiana, and British Honduras to which lower charges apply; to Burma it is 10s. 0d.

Most countries admit Letter Telegrams at half the full rate but there is a minimum charge as for 22 words. Letter Telegrams, which must be written in plain language, are subject to delay in transmission in favour of ordinary telegrams.

Phototelegrams, i.e. pictures, photographs, drawings, plans, printed, typed or written documents may be telegraphed in facsimile to many places in the world. Full particulars of all telegraph charges and services available to any country will be given on enquiry at any Postal Telegraph or Post Office Cable & Wireless Office.

RADIOTELEGRAMS

Radiotelegrams for transmission to ships at sea in any part of the world may be handed in at any

Postal Telegraph Office or dictated over the telephone. The standard rate of charge for messages sent to ships through coast stations in the British Isles is 2s. 8d. a word; there is a reduced rate of 1s. a word for messages to ships regularly engaged on short voyages to or from ports in the British Isles. The address should contain (1) the name and/or rank of the addressee, (2) the name of the ship, and (3) either the name of a British coast station if the sender knows that the ship is within range of that station, or, if the sender does not know the name of the appropriate coast station, standard rate messages should be addressed to Portishead Radio or "Wireless", and reduced rate messages to Wick Radio.

Radiotelegrams may be sent to service personnel on board H.M. Ships in foreign waters at a charge of 1s. 1d. a word and in the Home Fleet at a charge of 8½d. a word. The address should contain (1) the name of the addressee and his rank or rating, (2) the word "Warship" (or "Submarine") (3) the name of the ship (or identifying letters and number) and (4) the word "Admiraltyradio" (or, in the case of the Home Fleet, the words "Homewaters Admiraltyradio").

Radiotelegrams may also be sent to R.A.F. vessels at a reduced rate of 8½d. per word. Such radiotelegrams should be addressed in the same way as for commercial vessels and in addition should include the words R.A.F. Vessel before the name of the ship.

INLAND TELEPHONES

The quarterly rental for single exclusive lines for residential subscribers is £3 10s., for business subscribers it is £4. Shared service, in which two subscribers use one line but enjoy nearly all the facilities of exclusive line service, is offered under certain conditions. For this service a rebate of 10s. 0d. is allowed from the normal quarterly rental for a single exclusive line. Calls to exchanges within the local call area are charged 2½d. from residence telephones and 3d. from business telephones (4d. from a call office). Trunk call charges (*viz.*, to exchanges outside the local call area) vary with distance but do not exceed 3s. 6d. by day (for 3 minutes) and 2s. during the cheap rate period which is 6 p.m. to 6 a.m. every night and all day Sunday (7s. 6d. and 3s. 3d. to Irish Republic). Call office charge 3d. extra. Personal calls (to specified person) 1s. 6d. extra (cheap rate period 0d.); if the person cannot be found nothing further is charged. Where subscriber trunk dialling facilities are provided local and dialled trunk calls are charged in 2d. units (3d. from a call office); the length of time per unit depends on the distance of the call, from 3 minutes for local calls to 12 seconds for distances over 50 miles (the time allowance is increased during the cheap rate period). For fuller information see Preface to Telephone Directory.

TELEX SERVICE

Annual rental of teleprinter, associated equipment and line to Telex exchange is £160 per annum in most cases. Where nearest Telex exchange is more than 30 miles distant an additional rental based on the excess mileage applies. Charges for inland calls between exchanges 35 miles or more apart are about half equivalent charges for daytime telephone calls. International calls to European countries are about two-thirds of equivalent charges for telephone calls; to United States of America and to the Republic of South Africa charges are the same as for telephone calls, *i.e.* £1 per minute (minimum three minutes). Automatic equipment allowing messages to be sent at the maximum speed of 66 words per minute can be rented in addition.

Descriptive booklet available from all Telephone Managers; for local address see telephone directory.

GENERAL SUNDAY AND HOLIDAY ARRANGEMENTS

(For Express services see p. 1174)

On SUNDAY THROUGHOUT THE U.K. no Parcel Post, non-telegraphic Money Order, Postal Order business is transacted, nor is there a delivery of letters, &c. There is a collection for night despatch in most places. IN LONDON, the Chief Office and Leicester Square Branch Office are open always, and some other offices are open from 9 a.m. to 1 p.m. for stamps, telegrams, and with some exceptions telegraph money orders up to £5, savings bank withdrawals up to £10, and National Savings Stamps encashment up to £3. OUTSIDE LONDON, most Head Offices and some country telegraph Sub-offices open 9-10.30 a.m. (Scotland 9-10 a.m.) for stamps, telegrams, registration and with some exceptions telegraph money orders up to £5, Savings Bank withdrawals up to £10, and National Savings Stamps encashment up to £3; but all town Sub-offices, and most non-telegraph country offices, are closed.

Christmas Day, Boxing Day and Good Friday

London: One delivery of letters and parcels on Christmas Day; none on Boxing Day and Good Friday. Most offices are closed on Christmas Day. Selected offices open from 9 a.m. to 1 p.m. for all classes of business on Boxing Day and for "Sunday" business on Good Friday.

Outside London: In Scotland, normal weekday deliveries; offices open as usual on Boxing Day and Good Friday; on Christmas Day some town sub-offices are shut, and after 1 p.m. many chief offices are open only for telegraph business. In England, Wales and Northern Ireland one delivery of letters and parcels on Christmas Day and Good Friday; none on Boxing Day; offices are closed on Christmas Day; head offices and some country telegraph sub-offices are open from 9 a.m. to 10.30 a.m. for all classes of business on Boxing Day and for "Sunday" business on Good Friday.

Other Public Holidays

In Scotland on New Year's Day office hours and classes of business are as on Sundays; no delivery of letters and parcels and no collection. Post Office counter and postal services on other public holidays in the U.K. vary in accordance with local conditions—details may be obtained from the local Head Postmaster.

OVERSEAS TELEPHONES

The caller should ask for CONTINENTAL or INTERNATIONAL Service. Callers in London with Dial Telephones with letters should dial "CON" or "INT." The charges shown are minimum rates for a call of three minutes duration, each further minute or part thereof costing one-third of this charge. Transferred charge calls are possible with certain countries. Details of countries and rates will be advised by the Continental and International Exchange.

Continental Service.

The rates quoted are for calls from all places in Great Britain. Northern Ireland, the Isle of Man and the Channel Islands to the first zone of the country concerned. For Personal Calls an additional charge equivalent to one minute's conversation is made.

International Service.

Minimum rates, the same from all parts of Great Britain, Northern Ireland, the Isle of Man and the Channel Islands are shown below. Hours of Service to most countries are limited. A person to person call may be booked without extra charge; if it falls (or call is cancelled) a Report Charge is made (4s. to 6s.) but not if call matures. On Radio Services a time allowance is made for interruption by adverse conditions. A limited duration facility (minimum 3 mins.) is available

enabling connection to be terminated after a specified period of effective conversation. A reduced rate (to p.m. to 10 a.m. on weekdays and all day on Sundays) is available on services with Canada, U.S.A., the West Indies, some South American and other countries.

Ships Services

Long, Medium and Short Range Ships' Services are also available between telephone subscribers in the United Kingdom and suitably equipped ships (see Post Office Guide).

OVERSEAS TELEPHONE CHARGES

(Continental Services are marked (A); remaining countries are on the International Service (See above)

WEIGHTS AND MEASURES

The Weights and Measures Act of 1878, superseding all previous laws, enacts the legal measures for Great Britain, basing them upon the Standard Yard and the Standard Pound, in the custody of the Standards Department of the Board of Trade.

The YARD and the POUND are the only two independent standards for weights and measures. The GALLON, the capacity standard, wet or dry, is based, upon the Pound. The Act of 1878 defines the Gallon as the volume of ten standard pounds of distilled water weighed in air against brass weights, both water and air at the temperature of 62° Fahrenheit, with the barometer at 30 inches.

New definitions for an international yard and pound were adopted on Jan. 1, 1959, by the standards laboratories of the United Kingdom, Canada, Australia, New Zealand, South Africa and the United States:

international yard = 0.914 4 metre.

international pound = 0.453 592 37 kilogramme.

All non-metric calibrations carried out by the laboratories in science or technology are now made in terms of the new definitions, which have, however, no statutory force in the United Kingdom and may not be used for trade purposes in this country.

Apothecaries' Weight

Measures of Weight.

20 grains = 1 scruple (℥i).

3 scruples = 1 drachm (℥i).

8 drachms = 1 ounce.

Measures of Capacity.

60 minims (min.) = 1 fluid drachm.

8 fluid drachms = 1 fluid ounce.

5 fluid ounces = 1 gill.

4 gills = 1 pint.

8 pints = 1 GALLON.

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' drachm is not the same as the Avoirdupois dram, and is spelled differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437.5 grains). A fluid drachm (54.6875 grains) is equal in weight to TWO Avoirdupois drams.

Avoirdupois Weight

7000 grains (gr.) = 1 pound (lb.).

16 drams (dr.) = 1 ounce.

26 ounces = 1 POUND.

14 pounds = 1 stone.

28 pounds = 1 quarter (of a cwt.).

4 quarters (112 lb.) = 1 hundredweight (cwt.).

20 hundredweight (2,240 lb.) = 1 ton.

Troy Weight

24 grains = 1 pennyweight (dwt.).

20 dwt. = 1 Troy ounce.

For gold and silver the ounce, divided decimally, and not into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce = 480 Avoirdupois grains (31.1035 Grammes) in weight. A Troy POUND (= 5,760 grains) is legalized in the United States.

Jewellers' Weight

The metric carat of 200 milligrammes is the legal standard of weight for precious stones and pearls.

Measures of Capacity

4 gills = 1 pint.

2 pints = 1 quart.

4 quarts = 1 GALLON.

1 gallon = 160 fluid ounces

= 277.274 cubic inches.

2 gallons = 1 peck.

4 pecks = 1 bushel.

8 bushels = 1 quarter.

A chaldron is 36 bushels = 4½ quarters.

Measures of Length

1 mil = 1/1000 inch.

12 inches (in.) = 1 foot (ft.).

3 feet = 1 yard (yd.).

6 feet = 1 fathom.

5½ yards = 1 rod or pole or perch.

22 yards = 1 chain = 100 links.

10 chains = 1 furlong.

8 furlongs = 1 mile = 1,760 yards.

Square or Surface Measure

144 sq. inches = 1 sq. foot.

9 sq. feet = 1 sq. yard.

30¼ sq. yards = 1 sq. rod, or pole or perch.

40 sq. rods = 1 rood.

4 roods = 1 acre.

10 square chains = 1 acre = 4,840 sq. yards.

640 acres = 1 square mile.

Cubic Measure

1,728 cubic inches = 1 cubic foot.

27 cubic feet = 1 cubic yard.

Angular or Circular Measure

60 seconds (") = 1 minute (').

60 minutes = 1 degree (°).

90 degrees = 1 right angle or quadrant.

Diameter of circle × 3.1416 = circumference.

Diameter squared × .7854 = area of circle.

Diameter squared × 3.1416 = surface of sphere.

Diameter cubed × .5236 = solidity of sphere.

One degree of circumference × 57.3 = radius.*

Diameter of cylinder × 3.1416; product by length or height, gives the surface.

Diameter squared × .7854; product by length or height, gives solid content.

* Or, one radian (the angle subtended at the centre of a circle by an arc of the circumference equal in length to the radius) = 57.3 degrees, nearly.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain.

Water Measures.

Cubic inch. = 252.458 grains.

Gallon (277.274 cu. in.) ... = 10 lb. (distilled).

Cubic foot. = 62.321 lb.

35.943 cubic ft. (224 gals.) = 1 ton.

Water for Ships: Tun, 210 gals., Butt 120, Puncheon 72, Barrel 36, Kilderkin 18 gals.

An Inch of Rain on the surface of an acre (43,560 sq. feet) = 3,630 cubic feet = 100.992 tons.

Cisterns: A cistern 4 feet by 2½ and 3 deep will hold brimful 186.963 gallons, weighing 16 cwt. 2 qrs. 21.6 lbs. in addition to its own weight.

Million, Billion, etc.

Value in the United Kingdom

Million. thousand × thousand (10⁶)

Billion. million × million (10¹²)

Trillion. billion × billion (10¹⁸)

Quadrillion. million × trillion (10²⁴)

Value in U.S.A.

Million. thousand × thousand (10⁶)

Billion. thousand × million (10⁹)

Trillion. million × million (10¹²)

Quadrillion. million × billion U.S. (10¹⁵)

United Kingdom (and other European) usage above follows the decision of the 9th Gen. Conference on Weights and Measures, 1948.

NOTE.—The normal temperature of the human body is 98° 4' F., or 37° (36° 9') C., or 29° 5' R. Freezing point = 32° F., 0° C., 0° R.; Boiling point = 212° F., 100° C., 80° R. "Absolute" temperature is Temperature reckoned from "Absolute Zero," which is at 273° C. below 0° C., 459° 4' below 0° F., and 218° 4' below 0° R., and is denoted by the letter "K."

Below 32° F. subtract 32.

METRIC WEIGHTS AND MEASURES

See also "Conversion Tables for Weights and Measures."

In addition to the Imperial standard weights and measures, the use of the Metric system of weights and measures was made permissive in Great Britain in 1897.

In the Metric system, the standard of length is the METRE, the standard of weight is the KILOGRAM, and the standard of capacity is the LITRE. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade.

1. Measures of Length

10 millimetres = 1 centimetre = 0.393 701 inch.

(mm.) (cm.)

10 centimetres = 1 decimetre = 3.937 011 inches.

(dm.)

10 decimetres = 1 METRE (m) = 1.093 614 yards.

10 metres = 1 dekametre = 10.936 143 yards.

(dam.)

10 dekametres = 1 hectometre = 109.361 43 yards.

(hm.)

10 hectometres = 1 kilometre = 0.621 371 mile.

(km.)

A kilometre is approximately five-eighths of a mile, so that 8 kilometres (4.970 82 miles) may be regarded as 5 miles.

2.—Measures of Surface

1 sq. centimetre = 0.155 sq. inch.

1 sq. METRE = 10.763 9 sq. feet = 1.195 99 sq. yds.

1 are (a) = 0.098 8 rood.

1 hectare (10,000 sq. metres) (ha) = 2.471 05 acres.

1 sq. kilometre = 0.386 102 sq. mile.

3.—Measures of Capacity and Volume

1 centilitre (cl.) = 0.070 4 gill.

1 decilitre (dl.) = 0.175 98 pint.

1 LITRE* (1/1,000 cubic metre) (lit.) = 1.759 8 pints =

0.88 Imp. quart = 0.22 Imp. gallon = 61.025 5 cu.

inch = 0.035 315 7 cu. ft.

1 hectolitre (hl.) = 21.997 5 Imp. gallons = 26.417 1

U.S. gallons = 2.749 7 Imp. bushels = 2.837 7 U.S.

bushels.

1 cubic metre = 35.314 7 cu. ft. = 1.307 95 cu. yds.

(cbm. or m³.)

(1 sterc (= 1 cu. metre) is used as a unit of measure-

ment of timber).

1 cubic cm. (water) = 1 gram; 1,000 cubic cm.

(water) or 1 litre = 1 kilogram; 1 cubic metre

(1,000 litres, 1,000 kilograms) = 1 metric ton.

A new standard metric measure of 25 millilitres

was introduced in 1959 following approval by

Order in Council.

* The volume occupied by the mass of 1 kilo-

gramme of pure water at its temperature of maximum

density and under a pressure of one standard

atmosphere (14.696 lb. per sq. inch).

4.—Measures of Weight

1 centigram (cg.) = 0.154 32 grains.

1 decigram (dg.) = 1.543 2 grains.

1 gramme (gm.) = 15.432 4 grains.

1 dekagram (dag.) = 5.643 8 drams.

1 hectogram (hg.) = 3.527 4 oz.

1 KILOGRAM kg. = 32.1507 oz. Troy = 35.273 4 oz.

Avoirdupois = 2.204 62 lb. Avoirdupois.

1 myriagram = 22.046 2 lb. Avoirdupois.

1 quintal (q.) = 100 kg. = 220.5 lb. Avoirdupois =

1.103 6 cwt.

1 tonne (t.) = 0.984 207 U.K. or long ton = 1.102 31

U.S. or short ton.

Metric Weights—continued

- 1 hectolitre 2.749 69 bushels.
 1 hectolitre per hectare = 1.12 bushels per acre.
 1 quintal = 3.6743 bushels.
 1 quintal per hectare . . 1.49 bushels per acre.

NAUTICAL MEASURES

Distance is measured in nautical (or sea) miles. The nautical mile is traditionally defined as the length of a minute of arc of a great circle of the earth; but as this length varies in different latitudes (owing to the fact that the earth is not a perfect sphere), 6,080 feet, a "rounded off value" of the mean length, has been adopted in British practice as the standard length of the nautical mile. On this basis 33 nautical miles exactly equal 38 statute miles; the statute (land) mile contains 5,280 feet. A cable, as a measure used by seamen, is 600 feet (100 fathoms) approximately one-tenth of a nautical mile. Soundings at sea are recorded in fathoms (6 feet).

- 6 feet = 1 fathom.
 100 fathoms = 1 cable length.
 10 cables = 1 nautical mile.

Note.—Some other countries, including the United States in 1954, have adopted the nautical mile of 1,852 metres as recommended by the International Hydrographic Bureau in 1929.

Speed is measured in nautical miles per hour, called knots. A knot is a measure of speed and is not used to express distance. A ship moving at the rate of 30 nautical miles per hour is said to be "doing 30 knots" and as the nautical mile is longer than the land or statute mile this represents a land speed of over 34½ miles per hour. In 1945 the Royal Air Force adopted the knot and the nautical mile as the standard measurements for speed and distance.

Knots	m.p.h.	Knots	m.p.h.	Knots	m.p.h.
1	1.1515	15	17.2727	29	33.3939
2	2.3030	16	18.4242	30	34.5454
3	3.4545	17	19.5757	31	35.6969
4	4.6060	18	20.7272	32	36.8484
5	5.7575	19	21.8787	33	38.0000
6	6.9090	20	23.0303	34	39.1515
7	8.0606	21	24.1818	35	40.3030
8	9.2121	22	25.3333	36	41.4545
9	10.3636	23	26.4848	37	42.6060
10	11.5151	24	27.6363	38	43.7575
11	12.6666	25	28.7878	39	44.9090
12	13.8180	26	29.9393	40	46.0606
13	14.9696	27	31.0909	41	47.2121
14	16.1212	28	32.2424	42	48.3636

Gross tonnage.—The total volume of all the enclosed spaces of a vessel, the unit of measurement being a ton of 100 cubic feet.

ROMAN NUMERALS

1 I	11 XI	30 XXX	400 CD
2 II	12 XII	40 XL	500 D
3 III	13 XIII	50 L	600 DC
4 IV	14 XIV	60 LX	700 DCC
5 V	15 XV	70 LXX	800 DCCC
6 VI	16 XVI	80 LXXX	900 CM
7 VII	17 XVII	90 XC	1000 M
8 VIII	18 XVIII	100 C	1500 MD
9 IX	19 XIX	200 CC	1000 MCM
10 X	20 XX	300 CCC	2000 MM

Other Examples: 43 = XLIII; 66 = LXVI; 98 = XCVIII.

339 = CCCXXXIX; 619 = DCXIX; 988 = CMLXXXVIII; 996 = CMXCVI.

1674 = MDCLXXIV; 1961 = MCMLXI.

A bar placed over a numeral has the effect of multiplying the number by 1,000, e.g.:

6,000 = $\overline{\text{VI}}$; 16,000 = $\overline{\text{XVI}}$; 160,000 = $\overline{\text{CLX}}$; 666,000 = $\overline{\text{DCLXVI}}$.

Net tonnage.—The gross tonnage less certain deductions for crew space, engine room, water ballast and other spaces not used for passengers or cargo.

FUEL AND POWER MEASURES

British Thermal Unit (B. Th. U.) = The amount of heat required to raise 1 lb of water through 1 degree Fahrenheit at or near 39.2 degrees F.
 Unit of electricity (kilowatt-hour) = Output of 1,000 watts for one hour. 1 k.w.h. = 3.413 B.Th.U.

Therm = 100,000 B.Th.U. = 29.3 k.w.h.

Atmosphere = pressure of 14.23 lb. per sq. in. = 1 kilogram per sq. cm.

Petroleum

Barrel = 35 Imperial gallons = 42 U.S. gallons.

Petroleum products are commonly quoted in metric tonnes, the conversion to barrels varying slightly according to the specific gravity of the product, e.g. the metric tonne in the major oil producing states (U.S.A., Venezuela, Persian Gulf, Saudi Arabia, Iraq, etc.) varies from 7.0 barrels per metric tonne to 7.7 barrels, and in the smaller oil producing states (e.g., Albania) is as low as 6.7 barrels per tonne. Crude petroleum in the United Kingdom, 7.355 barrels per metric tonne (2,205 lbs.); 7.472 barrels per long ton (2,240 lbs.).

LOST PROPERTY IN LONDON

PROPERTY LOST ON LONDON TRANSPORT

90,984 umbrellas were left in buses or underground trains in 1960, the highest number ever recorded. Some 40 per cent. were reclaimed. A total of 407,000 articles were received by the Lost Property Office—a rate of more than 1,100 per day—including 80,000 gloves, 12,000 pairs of spectacles, 22,000 books, 44,000 cases and bags, 52,000 items of clothing and 11,000 keys.

Enquiries about property left in London Transport Trains, Buses, Trolleybuses, or Green Line Coaches, should be made at the Lost Property Office of London Transport, 200–202 Baker Street, N.W.1. Office hours are 10 a.m. to 6 p.m. from Monday to Friday, and 10 a.m. to 1 p.m. on Saturday. The office is not open on Sundays, Good Friday, Christmas Day and Bank Holidays. Enquiries may be made by letter. Articles left in London Transport vehicles in the country area can be claimed at the nearest London Transport Country Garage within 48 hours.

PROPERTY LOST IN CABS

Enquiries as to property lost in a taxicab should be made at the Lost Property Office of the Metropolitan Police District, 109 Lambeth Road, S.E.1. Office hours are 10 a.m. to 4 p.m. (Saturdays, 10 to 1.) The office is not open on Sundays, Good Friday, Christmas Day and Bank Holidays.

CONVERSION TABLES FOR WEIGHTS AND MEASURES

NOTE.—The central figures in heavy type represent either of the two columns beside them, as the case may be. Examples:—1 centimetre = 0.394 inch and 1 inch = 2.540 centimetres. 1 metre = 1.094 yards and 1 yard = 0.914 metre. 1 kilometre = 0.621 mile and 1 mile = 1.609 kilometres.

Length		Area		Volume		Weight (Mass.)

Demy Folio.....	= 17½ × 11½ "
Royal Folio.....	= 20 × 12½ "
Music.....	= 14 × 10½ "

NOTE.—*Folio* means a sheet folded in half, *quarto* folded into four, and so on; thus, a crown 8vo page is one-eighth the size of a crown sheet. Books are usually bound up in sheets of 16 or 32 pages. Octavo books are generally printed 64 pages at a time (32 pages on each side of a sheet of quad); a crown octavo book of 320 pages will therefore require 5 sheets of quad crown, or 10 reams per 1,000 copies, the odd 16 sheets in each ream being allowed as waste. Newspapers (and some books in editions of 50,000 or over) are printed on rotary presses, for which the paper is supplied in continuous reels.

Sizes of Types

The type size chiefly used in "Whitaker" is 5½ point, or *Ruby*, set on a 6 point "body." The column contains 78 lines, and is 12 Pica cms wide; on an average every column contains about 3,100 letters, or 710 words.

Today type up to 14 point size is usually set by a keyboard machine, and mechanically cast in single letters or in complete lines of type (e.g. Monotype and Linotype). All type is cast to one uniform height ("type high"), which is 1½ inch. Individual letters vary in *breadth*, but the "body" of each character is of uniform *depth* throughout the alphabet in each size. The unit of *breadth* is the Pica M (*Em*) 6 of which, side by side, occupy one inch of space. The unit of *depth* is the Point (72 Points=1 inch), so that 6 lines of 12 Point occupy 1 inch in depth. The names of the various sizes are:—

Brilliant (3½ point). A column the size of this in "Whitaker," if set in Brilliant would contain 132 lines, and about 1,450 words.

Printing is the art of producing impressions, from characters or figures

Diamond (4½ point) is the next size; the column would contain 102 lines, and about 1,020 words.

Printing is the art of producing impressions, from characters or figures

5 point (*Pearl*), 92 lines, 830 words—

Printing is the art of producing impressions, from character

Ruby (5½ point), 84 lines, 710 words—

Further point sizes used are 24, 30, 36, 42, 48,

60 and 72.

CORRECTING FOR THE PRESS

Copyright by WILLIAM CLOWES & SONS, LTD., Printers of "WHITAKER'S ALMANACK."

The following extract is set up incorrectly in order to explain the conventional methods of correcting for the Press:—

¹0/ The process of printing, when compared with that of writing, is unquestionably a ~~dear~~ process; provided a sufficient number of any particular book are printed, so as to render the proportion of the first expense upon a single copy inconsiderable. If, for example, it were required, even at the present ~~moment~~ time, to print a single copy, or even ~~three~~ ²copies or four, only of any production, the cost of printing would be greater than the cost of transcribing.)

It is when hundreds and especially thousands, of the same work are demanded that the great value of the printing press in making knowledge cheap is particularly shown. [It is probable that the first printers did not take off more than two or three hundred, if so many, of their works, and, therefore, the earliest printed books must have been still dear, on account of the limited number of their readers. CAXTON, as it appears by a passage in one of his books, was a cautious printer; and required something like an assurance that he should sell enough of any particular book to repay the cost of producing it. In his 'Legends of Saints,' he says, "I have submysed (submitted) myself to translate into English the ³ ² ¹ Saints of Legend,' called 'Legenda aurea' in Latin; and William, Earl of Arundel, sent me a worshipful gentleman, promising that my said lord should, during my life, give and grant to me a yearly fee, that is to note, a buck in summer and a doe in winter.

²⁴ desired me — and promised to take a reasonable quantity of them — and

1. Is the mark for changing the wrong letter in the word process.
2. To substitute one word for another.
- 3 and 24. The first is the method of marking a short insertion. the second of marking a long one.
4. To have a space put between the two words.
5. To turn a letter which has been placed upside down.
6. To close the word in which a space has been improperly left.
- 7 and 8. To take away (delete, blot out) a superfluous letter or word.
- 9, 12, and 22. Different marks for transposing the arrangement of letters, words, or sentences.
10. To have no fresh paragraph.
11. To substitute a comma for a full-point or period.
13. To commence a new paragraph.
- 14, 19, 21, and 27. To insert points and marks of quotation.
15. To have any particular part printed in Italic.
16. To have words or letters printed in 'lower case,' or small letters; Roman is always understood, unless otherwise directed.
17. To have a word remain, which has been accidentally or erroneously marked. Stet is the Latin for 'let it stand.'
18. Points out a letter which does not match with the others; a 'wrong fount.'
- 20 and 23. To have certain parts printed in small or full capitals.
25. To set straight whatever may stand crooked.
26. To remove the unnecessary black mark between the words, which arises from what should form the space not having been pushed down.

EQUIVALENT INVESTMENTS

Examples:—To ascertain the yield of Consols at a price of £83 6s. 8d. look in the column headed 2½ per cent. for 83½, and it will be seen that the yield (column headed Return Per Cent.) is £3 os. od. Similarly, shares paying a fixed dividend of 6 per cent., if purchased at £189, will yield £3 3s. 6d. per cent.; while 5 per cent. shares at £152 10s. od. yield £3 5s. 7d. per cent.

When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year less £1, must be taken. Thus, for £1 at 2½ per cent, for 25 years, take 26 years, £36.012, and deduct £1 = £35.012.

WIND FORCE MEASURES

The *Beaufort* Scale of wind force has been accepted internationally and is used in communicating weather conditions. Devised originally by Admiral Sir Francis Beaufort in 1805, it now consists of these numbers 0-17, each representing certain strength or velocity of wind.

Scale No.	Wind Force	M.p.h.	Knots	Scale No.	Wind Force.	M.p.h.	Knots
0	Calm	—	—	9	Strong gale	47-54	41-47
1	Light air	1-3	1-3	10	Whole gale	55-63	48-55
2	Slight breeze	4-7	4-6	11	Storm	64-72	56-63
3	Gentle breeze	8-12	7-10	12	Hurricane	73-84	64-71
4	Moderate breeze	13-18	11-16	13	—	85-92	72-80
5	Fresh breeze	19-24	17-21	14	—	93-103	81-89
6	Strong breeze	25-31	22-27	15	—	104-114	90-99
7	High wind	32-38	28-33	16	—	115-125	100-108
8	Gale	39-46	34-40	17	—	126-136	109-118

Aviation Policies and Annuities carefully selected.

A pillar of strength

The tympanum surmounting the Royal Exchange consists of seventeen allegorical figures. In the centre stands the great figure of Commerce holding the Charter of the Royal Exchange. This famous building has given its name to the Royal Exchange Assurance. For nearly 250 years the Royal Exchange has provided policies for every form of insurance requirement for the home or business life.

PRINCIPAL CHARITABLE BEQUESTS OF THE YEAR

The following list shows the principal charitable bequests noted since our last edition. While individual legacies are payable as shown, the term residue means that part of the estate remaining after legacies and specific bequests have been satisfied and in some cases subject to life interests. The time of payment of bequests is conditional on any directions left by testators.

The number and range of charities in this year's list cover a wide field and are larger than in previous years. The gain to the various societies and institutions is governed by the scale of death duties, and the Finance Bill, which had its third reading in July, gave no relief in this matter. For example the estate of Mr. John Box, a London tailor, who left £66,846 gross, ultimately benefits Dr. Barnardo's Homes by nearly £40,000, and yet the yield from the estate of Mr. Joseph Matthews, a Bath property owner, who left over four times that of Mr. Box, is almost the same for the establishment of a home for poor aged persons of Bath.

Lord Simon, former chairman of the B.B.C., left the residue of his £397,564 estate to the Simon Population Trust, and Sir Barry Jackson, founder of the Birmingham Repertory Theatre, bequeathed the remainder of his £231,131 estate to The Actors' Benevolent Fund. Sir Arthur Croft, the industrialist, left £10,000 for charitable purposes in England as his Trustees decide and Miss Constance Pilkington, a member of the famous glass works family, left the residue of her £231,900 estate similarly. Among a number of legacies for Cancer Research is nearly £40,000 under the Will of Mr. Alfred Vines, of Brighton, "in grateful memory of my late mother to whom I owe so much, in fact everything." The varying opinions on the Health Service is exemplified in a large bequest under the Will of Miss Helen Styring, of Scarborough, who left the residue of her property to form "The W. H. and E. Lenton Styring Cancer Relief Fund" to help people of Scarborough who undergo a complete laryngectomy operation for cancer of the throat not under the auspices of the National Health Service, and directing that priority be given to middle class persons willing to bear part of the expenses. Valuable service to blind persons is shown in the increasing number of testators who bequeath their eyes for therapeutic purposes.

The care of children is shown in a number of bequests including benefits for the Boy Scouts Association, who this year opened Baden Powell House in London as a memorial to their famous founder. The House is in Cromwell Road and includes a permanent exhibition entitled "The B-P Story."

Mrs. Elsie Ward, of Weston-super-Mare, left over £25,000 for the benefit of animal societies, and a legacy of £600 to be paid in income to the person or persons having care of her pet parrot "Polly," and in another Will not listed here a Greenford (Middx.) man left £150 to the R.S.P.C.A. on condition that 15s. a week be paid for the maintenance of his dog "Nigger."

Name	Gross Value	
Mr. Will Archdale, of Four Oaks, Warwicks.	£628,988	£5,000 each to R.N.L.I., Dr. Barnardo's Homes, and the Shipwrecked Mariners' Royal Benevolent Society.

Name	Gross Value	
Mr. Harold Senior Ashworth, of Rochdale.	£59,904	£10,000 to the British Empire Cancer Campaign, and the residue equally between Rochdale Branch, R.S.P.C.A., Rochdale Adult Deaf and Dumb Society, and Rochdale Society for the Blind.
Miss Winifred Jessie Berry, of Paignton, Devon.	£316,625	The residue equally between Middlesex Hospital, London, R.N.L.I., Treloar Cripples Hospital, Professional Classes Aid Council, London Association for the Blind, National Benevolent Institution, Royal U.K. Beneficent Institution, The British Legion, St. Dunstan's, British Home and Hospital for Incurables, London, League of Remembrance, Royal Blind Pension Society, National Old People's Welfare Council, Dr. Barnardo's Homes, Church of England Children's Society, N.S.P.C.C., and R.S.P.C.A.

(continued on page x)

THEY LOOK TO YOU FOR HELP

There is still all too much hardship among ex-soldiers and bereaved wives and children. Many are in financial difficulties. They must rely on the benevolent funds of Corps and Regimental Associations—which in turn rely on the Army Benevolent Fund, the central fund of all military charities.

This is a really good cause that *deserves* your support. Through the Army Benevolent Fund you can give help where it is most needed.

Donations and Legacies should be made payable to:—

THE ARMY BENEVOLENT FUND

CENTRAL COUNCIL FOR THE CARE OF CRIPPLES

34 ECCLESTON SQUARE, S.W.1

*(Registered in accordance with the
National Assistance Act, 1948)*

The Central Council for the Care of Cripples, which was founded in 1919, is the doyen of the voluntary organisations serving the disabled. It makes no distinction in its work between different kinds of handicap and is recognised as the co-ordinating body of the movement by over 150 affiliated societies. The Council has developed voluntary services throughout the country by pioneering projects to show the need for orthopaedic and rehabilitation services, special education for handicapped children, and promotion of research into crippling diseases.

The vital work of the Council includes:

(continued on page xvi)

HOUSING and NURSING accommodation is now provided by the
Pensions Board for over 450 aged people of the parsonage.

PENSIONS are being paid to over 1,300 **CLERGY WIDOWS**
& dependants who would otherwise have insufficient on which to live.

The Pensions Authority of the Church of England has accepted
the challenge to find £100,000, the cost each year—will **YOU** help?

Please send YOUR personal contribution or your P.C.C. subscription to

THE SECRETARY & TREASURER, THE CHURCH OF ENGLAND PENSIONS BOARD
13, TUFTON STREET, LONDON S.W.1.

(forms of legacy and other information gladly sent on request)

It would be hard to find a Society with such a fine legacy

of progressive achievement in almost every field
of Evangelistic and Social Welfare work as

THE CHURCH ARMY

There are:

Homes for old people.
Holiday Homes for poor mothers and their children.
Rehabilitation and Training Centre for the Disabled.
Girls' Training Homes.
Hostels for Men and Youths.
Youth and Social Centres.
Mother and Baby Homes.
Clubs and Centres at Home and in Germany for H.M. Forces.

There are also:

Winter Relief (Fuel, clothes, extra foods, etc).
Help . . . for the needy; for Prisoners' Families.
Moral Welfare Work, etc.

Evangelistic work includes:—

News Teams. Prison Missions. Summer Seaside Crusades.
Mission Vans. Christian Advance Training Courses.
Children's Missions, and work in Parishes, etc., and Overseas Missions.

This great **CHRISTIAN WORK** has touched for
the better the lives of **COUNTLESS THOUSANDS**

They count on us . . . can we count on you?

*Enquiries please to:—*The Financial Organising Secretary,
Church Army Headquarters, P.O. Box 420, 55 Bryanston Street,
Marble Arch, London, W.1

Name	Gross Value	
Mr. William Robert John Kenten, of Merton Park, S.W.	£19,070	£6,000 to the Salvation Army, and the residue equally between them and The Church Army.
Mrs. Margaret Large, of Bournemouth.	£59,616	The residue equally between the Royal United Kingdom Beneficent Association, and the Thistle Foundation, Edinburgh.

(continued on page xviii)

THE CLAPTON MISSION

(Methodist)

is one of the foremost agencies in the east London Borough of Hackney for work among young people, with its strong uniformed organisations, and it cares especially for Old-age Pensioners with their many present-day needs.

Its Rest and Holiday Home at Herne Bay is a blessing to all who need a holiday but whose means are limited.

It has maintained with vigour through 77 years a ministry of evangelical witness and social welfare. It serves all regardless of class or creed.

Please help to maintain this great work. Gifts will be gratefully received by

Rev. NORMAN E. BARKER, 65, ELDERFIELD ROAD, E.5.

COMMONWEALTH AND CONTINENTAL CHURCH SOCIETY

Patron: HER MAJESTY THE QUEEN

President: The Rt. Hon. the Lord Luke, T.D., D.L.

The sole object of the Society is to bring the ministrations of the Church to our fellow-countrymen overseas, particularly where they are newly settled, or are living in remote areas, or where local resources are not sufficient to meet the high costs of maintaining a Church and Chaplain. The growth of the Anglican Church in the Commonwealth and in Europe owes much to this pioneer work of the Society.

The Society still actively supports the work of the Church with men and means, on each of the 5 Continents. Its Sunday School by Post and Radio provides regular religious instruction for families in isolated areas.

Gen. Secretary: The Rev. Canon S. J. HARLAND, B.D.

7 YORK BUILDINGS, ADELPHI, LONDON, W.C.2.

Your help is needed

for those who cannot help themselves

- ★ Women with young families deprived of their husband's support through sudden illness or death.
- ★ The long-term sick and infirm—middle-aged as well as aged with no one to care for them.
- ★ The frail and aged, who with financial help can still be cared for in their own homes.

Legacies and donations urgently needed.

Founder: COLONEL SIR REGINALD KENNEDY-COX, C.B.E., J.P.

Owing to continued increase in teenage crime, we plan to establish further branches to help combat the cause. Adolescents must be provided with adventurous and constructive energy outlets to overcome the boredom of dull areas. Boredom invites mischief leading to delinquency. The first branch in this expansion scheme becomes operational in Spring 1962 at Hainault, Essex. The youth must develop to the Nation's credit—they are its future! Help us to put prevention before correction.

THE FAMILY PLANNING ASSOCIATION

64 Sloane Street, London, S.W.1. Telephone: BELgravia 7575/8

THE FAMILY PLANNING ASSOCIATION has over 350 clinics throughout Britain where patients can be referred for contraceptive advice. At many of these, medical help is also available to childless couples and those with marital difficulties.

All clinics are staffed by specially trained doctors and nurses holding the F.P.A. Certificate.

The FAMILY PLANNING ASSOCIATION in addition,

- ★ has a Centre at Headquarters in London for the investigation and treatment of male-subfertility and laboratories for seminal analysis.
- ★ has a Pregnancy Diagnosis Centre at Headquarters in London. The Hogben test is used and results are obtained within 24 hours.
- ★ has standardised methods of teaching contraception. It arranges training sessions at clinics and also lectures for medical practitioners, students and nurses.
- ★ has devised standard tests for manufacturers' products and has set up an approved list of those which have passed the test. This list is available on application to Headquarters in London. Contraceptive products are not listed in the British Pharmacopoeia.
- ★ has a quarterly journal, FAMILY PLANNING, price 9d.
- ★ has a MAIL ORDER and ADVICE DEPARTMENT.

THE DARK AGES A.D. 1962

Strenuous though the efforts of medical science have been to curb loss of sight, greater longevity has brought about an increase in the number of blind persons in England. Since 1946 the figure has increased 25%, and it has been estimated that in 12 years the total will have leapt to 140,000. **The Greater London Fund for the Blind** assists no less than 14 Institutions, Societies and Associations. It depends for its existence upon voluntary contributions. Please help the **G.L.F.B.**

If you would like to know more about the work and achievements of the **G.L.F.B.** send for illustrated publication.

NATIONAL CHILDREN'S HOME

Established 1869

40 Branches

Despite all the Government is doing for children deprived of a normal home life, the National Children's Home still has to raise its own income. The need for funds is as great as ever, and an earnest appeal is made for continued support.

Legacies and covenanted gifts are particularly solicited.

Chief Offices: Highbury Park, London, N.5.

DEAFNESS means a lifetime of isolation

ALTHOUGH it has so little visual appeal to compassion, deafness is one of the most crippling of handicaps, robbing the sufferer of all normal means of communication and the enjoyment of most forms of entertainment and social intercourse.

The National Institute for the Deaf is the central national body advising on and helping to alleviate all degrees of hearing loss among all classes of people from infancy to old age.

We maintain a welfare department and advice bureau, a test and research laboratory, one of the most compre-

hensive libraries in the world, a school for double-handicap children, hostels for adolescents and homes for old or incapacitated deaf people including the deaf and dumb and deaf-blind.

Gifts and legacies are urgently needed for the continuation and extension of our work.

Desperately poor CANCER SUFFERERS need your help

The National Society for Cancer Relief is helping thousands of poor persons who have been overtaken by the cancer scourge, and has brought a measure of cheer and comfort into countless homes. Grants, pensions, etc., now total approximately £111,000 a year.

The N.S.C.R. also endeavours to spread established knowledge as to the nature and incidence of cancer, its symptoms and diagnosis, and the measures that can be taken to prevent it, or curtail its activities.

YOU can share the privilege of giving at least a measure of cheer to our huge family of patients. They are all ages, and are in all parts of the British Isles. A donation of £10 would qualify you for Life Membership in this work of mercy, but every shilling is welcome.

By Will or Codicil or Covenant...

May we suggest to Legal or Financial Advisers that when questions of their clients' benefactions arise the worthiness of the Royal Air Force Benevolent Fund may be wholeheartedly and deservedly commended.

Briefly, The Royal Air Force Benevolent Fund provides help to R.A.F. personnel disabled while flying or during other service. It assists the widows and dependants of those who lose their lives and helps with the children's education. It gives practical assistance to those suffering on account of sickness and general distress.

The need for help in nowise lessens in peace or war. Our immeasurable gratitude to that "Immortal Few" can hardly cease while memory itself endures.

“*Why should this concern me?*”

“What’s the Royal Hospital and Home for Incurables?
Just another Charity?”

Confronted with innumerable flag days, bazaars, dances, coffee parties and so on, it is all too easy for us to forget the real purpose of a particular ‘charity,’ and consequently to dismiss it. Yet every charitable organization exists to answer the desperate needs of those to whom the state can offer little or no assistance. The Royal Hospital answers such a need.

Founded over one hundred years ago, it has in its care 255 crippled men and women, many of them still in their prime, who have been struck down by incurable diseases and can no longer lead normal lives.

Their welfare and happiness is the concern of the Hospital. *Can it be yours too?*

THE ROYAL HOSPITAL AND HOME FOR INCURABLES

109 West Hill, S.W.15

DEPENDENT ON VOLUNTARY CONTRIBUTIONS

"I bequeath . . ." this can mean so much to those in the care of The Royal London Society for the Blind. Founded in 1838 the Society caters for the needs of blind people of all ages. Please remember its essential work when testators seek your advice on charitable bequests.

The Society's activities comprise the following:—

- * The education of blind children from five to sixteen years of age.
- * The industrial training of adults.
- * The employment in workshops of blind men and women.
- * The supervision of blind workers in their own homes.
- * The maintenance of two residential homes for blind adult trainees and employees.

Legacies, donations and subscriptions are urgently needed for the maintenance and extension of our work.

In the face of Death!

This child, on the verge of death, was rescued by the Save the Children Fund; but thousands of others all over the world . . . unwanted . . . uncared for and unloved . . . look to us for the necessities of life, for loving protection, for relief from sickness and disease.

Please help SCF doctors, nurses, welfare workers to save lives. Send a generous donation today, to the **Save the Children Fund, Dept W., 12 Upper Belgrave Street, London, S.W.1.**

*“A place in
my memory”*

“I shall always remember Spurgeon’s. You know, when you’ve never had a proper home, coming to Spurgeon’s is like entering another world. I do like it here. In fact, I wouldn’t be without Spurgeon’s for all the tea in China.”

Nearly two hundred needy girls and boys depend on us for a happy childhood. Please help to safeguard their future.

These Christian Homes cost £900 a week to maintain by voluntary contributions. Please help by sending a gift to Mr. Percy Hide, Secretary.

Spurgeon's Homes

38 Haddon House, Park Road, Birchington, Kent.

*I've found that address you
wanted — it's UFAW...*

that stands for the Universities Federation for Animal Welfare, 7a Lamb's Conduit Passage, W.C.1.

Yes, they're sound people, they believe the problems of animal welfare need hard heads as well as soft hearts, so they restrict their membership to university people.

A lot of the top-rank scientists are working with them...

You'd better have their Annual Report.
I'll give you the name again...
